Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-SEVENTH CONGRESS SECOND SESSION.

SENATE.

MONDAY, *July 31, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

The VICE PRESIDENT being absent, the President pro tempore [Mr. CUMMINS] took the chair.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Secretary will call the roll, to ascertain the presence of a quorum.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McKinley	Sheppard
Ball	Gooding	McLean	Simmons
Borah	Harreld	McNary	Smoot
Brandegee	Harris	Moses	Spencer
Broussard	Harrison	Myers	Stanfield
Bursum	Heflin	Nelson	Stanley
Calder	Jones, N. Mex.	New	Sterling
Cameron	Jones, Wash.	Newberry	Swanson
Capper	Kellogg	Nicholson	Trammell
Caraway	Kendrick	Norbeck	Walsh, Mass.
Cummins	Keyes	Oddie	Warren
Curtis	Ladd	Overman	Watson, Ind.
Dial	Lenroot	Phipps	Willis
Ernst	Lodge	Ransdell	
Fletcher	McCumber	Robinson	

Mr. DIAL. My colleague [Mr. SMITH] is detained on official business. I ask that this notice may continue through the day.

The PRESIDENT pro tempore. Fifty-eight Senators have answered to their names. A quorum is present. The question is upon the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] to the amendment of the committee, upon which the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I am paired with the Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the senior Senator from Maine [Mr. FERNALD] to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. KENDRICK (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. MCCORMICK]. As I am unable to obtain a transfer, I find it necessary to withhold my vote. If permitted to vote, I should vote "nay."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. MCCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. NEW (when his name was called). Transferring my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Vermont [Mr. PAGE], I vote "nay." I ask that this announcement of the transfer of my pair may stand for the day.

Mr. ROBINSON (when his name was called). Transferring my pair with the senior Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED], I vote "yea."

Mr. STERLING (when his name was called). On this question I am informed that my pair, the Senator from South Carolina [Mr. SMITH], would, if present, vote as I intend to vote. I am therefore at liberty to vote. I vote "yea."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. CURTIS (when Mr. WADSWORTH's name was called). The Senator from New York [Mr. WADSWORTH] is paired on this vote with the junior Senator from Maryland [Mr. WELLER]. If present, the Senator from New York would vote "yea" and the Senator from Maryland would vote "nay."

Mr. WATSON of Indiana (when his name was called). I transfer my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. WILLIS (when his name was called). I am paired with my colleague, the senior Senator from Ohio [Mr. POMERENE]. I transfer that pair to the senior Senator from Maryland [Mr. FRANCE] and vote "nay."

The roll call having been concluded,

Mr. HARRISON (after having voted in the affirmative). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from South Carolina [Mr. SMITH] and allow my vote to stand.

Mr. FRELINGHUYSEN (after having voted in the negative). I transfer my pair with the Senator from Montana [Mr. WALSH] to the Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON].

The result was announced—yeas 27, nays 30, as follows:

YEAS—27.

Ashurst	Harris	Lenroot	Simmons
Borah	Harrison	Myers	Stanley
Capper	Heflin	Nelson	Sterling
Caraway	Hitchcock	Norbeck	Swanson
Cummins	Jones, N. Mex.	Overman	Trammell
Dial	Jones, Wash.	Robinson	Walsh, Mass.
Fletcher	Kellogg	Sheppard	

NAYS—30.

Ball	Gooding	McNary	Smoot
Brandegee	Harreld	Moses	Spencer
Broussard	Keyes	New	Stanfield
Bursum	Ladd	Newberry	Warren
Cameron	Lodge	Nicholson	Watson, Ind.
Curtis	McCumber	Oddie	Willis
Ernst	McKinley	Phipps	
Frelinghuysen	McLean	Ransdell	

NOT VOTING—39.

Calder	Gerry	Owen	Smith
Colt	Glass	Page	Sutherland
Crow	Hale	Pepper	Townsend
Culberson	Johnson	Pittman	Underwood
Dillingham	Kendrick	Poindexter	Wadsworth
du Pont	King	Pomerene	Walsh, Mont.
Edge	La Follette	Rawson	Watson, Ga.
Elkins	McCormick	Reed	Weller
Fernald	McKellar	Shields	Williams
France	Norris	Shortridge	

So Mr. LENROOT's amendment to the amendment of the committee was rejected.

Mr. MCCUMBER. Mr. President, at this time I wish to ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock a. m.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The question is on agreeing to the amendment proposed by the Committee on Finance.

Mr. WALSH of Massachusetts. The pending question being upon the committee amendment, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. JONES of New Mexico (when his name was called). I ask that the same announcement which I made on the previous vote in reference to the transfer of my pair stand for the day. I vote "nay."

Mr. LODGE (when his name was called). Making the same transfer of my pair as on the preceding ballot, I vote "yea."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "yea."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the last vote, I vote "nay."

Mr. STERLING (when his name was called). On this question I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from California [Mr. SHORTRIDGE] and vote "yea."

Mr. TRAMMELL (when his name was called). Announcing the same transfer of my pair as on the previous ballot, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. WILLIS (when his name was called). I transfer my pair with my colleague, the senior Senator from Ohio [Mr. POMERENE], to the Senator from Maryland [Mr. FRANCE] and vote "yea."

The roll call was concluded.

Mr. DIAL. Making the same announcement as to my pair and its transfer as on the former ballot, I vote "nay."

Mr. KENDRICK (after having voted in the affirmative). I understand that the Senator from Illinois [Mr. McCORMICK], with whom I am paired, if present, would vote "nay" on this question. I am unable to obtain a transfer of my pair with the Senator from Illinois and am, therefore, compelled to withdraw my vote.

Mr. HARRISON. I have a pair with the junior Senator from West Virginia [Mr. ELKINS]. If permitted to vote, I should vote "nay." I vote "present."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from New York [Mr. WADSWORTH] with the Senator from Maryland [Mr. WELLER]. I am informed that if the Senator from Maryland were present he would vote "yea," and if the Senator from New York were present he would vote "nay."

The result was announced—yeas 33, nays 24, as follows:

YEAS—33.

Ball	Gooding	Moses	Spencer
Brandegee	Harreld	New	Stanfield
Broussard	Keyes	Newberry	Sterling
Bursum	Ladd	Nicholson	Warren
Calder	Lodge	Norbeck	Watson, Ind.
Cameron	McCumber	Oddie	Willis
Curtis	McKinley	Phipps	
Ernst	McLean	Ransdell	
Frelinghuysen	McNary	Smoot	

NAYS—24.

Ashurst	Fletcher	Kellogg	Sheppard
Borah	Harris	Lenroot	Simmons
Capper	Heflin	Myers	Stanley
Caraway	Hitchcock	Nelson	Swanson
Cummins	Jones, N. Mex.	Overman	Trammell
Dial	Jones, Wash.	Robinson	Walsh, Mass.

NOT VOTING—39.

Colt	Glass	Owen	Smith
Crow	Hale	Page	Sutherland
Culberson	Harrison	Pepper	Townsend
Dillingham	Johnson	Pittman	Underwood
du Pont	Kendrick	Poindexter	Wadsworth
Edge	King	Pomerene	Walsh, Mont.
Elkins	La Follette	Rawson	Watson, Ga.
Fernald	McCormick	Reed	Weller
France	McKellar	Shields	Williams
Gerry	Norris	Shortridge	

So the committee amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment reported by the committee.

The next amendment of the Committee on Finance was, on page 148, after line 14, to strike out:

PAR. 1113. Felts, not woven, wholly or in part of wool, valued at not more than 75 cents per pound, 20 cents per pound and, in addition thereto, 20 per cent ad valorem; valued at more than 75 cents but not more than $1.50 per pound, 25 cents per pound and, in addition thereto, 20 per cent ad valorem; valued at more than $1.50 per pound, 30 cents per pound and, in addition thereto, 25 per cent ad valorem.

And to insert:

PAR. 1113. Felts, not woven, wholly or in chief value of wool, valued at not more than 50 cents per pound, 20 cents per pound and 30 per cent ad valorem; valued at more than 50 cents but not more than $1.50 per pound, 30 cents per pound and 35 per cent ad valorem; valued at more than $1.50 per pound, 40 cents per pound and 40 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

GOVERNMENTAL EXPENDITURES.

Mr. STANLEY. Mr. President, the Senate was deeply interested a few days ago in a rather sharp colloquy between the junior Senator from North Carolina [Mr. OVERMAN], the senior Senator from Wyoming [Mr. WARREN], and others touching the increase of national expenditures not related directly or indirectly to the conduct of the war. I will cheerfully say that the very able and capable Senator from Wyoming has made an earnest, honest, and indefatigable effort, in my opinion, to curtail expenditures—and my difference with him on this occasion does not imply that he is particeps criminis to the abuse of which I am about to speak—but it is nevertheless true, Mr. President, that an analysis of the expenditures of this Government will show that the cost of administering the Government, over and above those expenditures which arose or arise out of wars, present, past, or future, has inordinately increased. I am not here to take a partisan advantage or to make a partisan appeal. This is not due entirely to the dereliction of the party in power. It is due to a persistent growth of bureaucratic control, the increase of the personnel of departments and of commissions and of boards and of bureaus, and of every other agency ever utilized or ever abused by a paternalistic régime.

The great Senator from Idaho [Mr. BORAH] not long ago, in a hearing before the Committee on the Judiciary on a bill then pending to increase this bureaucratic control by abridging the liberty of the press, declared that that particular bill was but a symptom of a worse disease—the wholesale taking from courts, from local self-government, from the States, from constituted authority in every shape and form, the conduct of the people's affairs and the control of those things that local communities have controlled during the whole history of this Government, taking it away from every other form of governmental supervision, and sticking it somewhere in a hidden bureau here in Washington.

There is more power to-day exercised in these marble sarcophagi by unknown experts, the politically controlled appointees of whispering propaganda, than by the courts themselves. The cost has become unbearable. Not only has the Senator from Idaho spoken against it but Henry Ford's paper, the Dearborn Independent, in a recent editorial claims that there are now 15,000,000 officials pensioners upon public bounty, drawing public pay, and that there are 30,000,000 actual producers in the United States. If that is the case, there is an officeholder, a tax eater, on the back of every two tax producers in the United States. That situation crushed France and produced the French Revolution. That same bureaucracy was the bane and damnation of Germany, and that same condition will bankrupt and enslave this country.

In support of what I have said, I send to the desk a very able editorial from the Chicago Tribune—I presume it will not be suspected of Democratic leanings or of sympathy with the plans and policies of the senior Senator from Kentucky—and I ask to have it read.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read as requested.

The reading clerk read as follows:

THE SPREAD OF BUREAUCRACY.

[From the Chicago Tribune of Tuesday, July 25, 1922.]

"Too little attention is given to the tendency to multiply public jobs. Mr. Oscar Hewitt contributed an interesting fact-essay on that topic to Monday's Tribune which we hope will set a good many citizens and citizenesses thinking.

"Mr. Hewitt calls attention to the fact that although the Budget estimates of revenue indicate there will be 20 per cent less collected by the Bureau of Internal Revenue, Congress has granted authority to the bureau to spend 13 per cent more. In other words, the cost of tax collecting has risen 41 per cent.

"That is a phenomenon that does not exactly square with Mr. Harding's sincere, and in many directions effectual, effort to economize. Mr. Hewitt is not at a loss for the explanation nor will anyone else be who understands our political mechanics. 'More jobs,' says Mr. Hewitt, 'are not exceedingly distasteful

to the average Congressman, because he always hopes that he may get some for his constituents.' The obverse of this is that as the average Congressman has no such hope in the case of the Army or Navy personnel he is a stern economizer there, slashing regardless of considered policies and the judgment of those more fitted than he to judge.

"We have here one powerful influence always operative for the multiplication of civilian jobs in the interest of politicians. There is another influence which is less known but very powerful. Mr. Hewitt says that the 'dominating influence' back of the act increasing the allowance of the revenue bureau was probably that of the bureaucrats.

"The public knows too little of the pressure constantly brought upon Congress in favor of increased public expenditure by those who will do the spending; that is, by the officials in charge of Government activities. It is natural for men in charge of any work to find it easy to discover things which should be done, or done better, or done on a larger scale. Each bureau is convinced of its own importance and obeys that law of growth which is a part of life. No bureau is ready to restrict itself, but on the contrary is always pressing forward.

"This tendency to growth in bureaucracy requires constant resistance. Every nation which has permitted it to go on has suffered heavily from it. The French Revolution came from the breakdown of a centralized bureaucratic system which brought France to the brink of ruin by paralyzing the functions of its economic life. It brought general stagnation, the crushing of private enterprise, and finally famine. In republican France to-day there is an enormous machinery of public officialdom which rests as a heavy weight on the French people, wasting the public taxes through red tape and inefficient service and demoralizing French politics through the influence of a great army of petty job holders. In every country where bureaucracy has grown up the results have been seriously injurious.

"In the concrete case before us, that of revenue collection, there may be expected not only an unnecessary expenditure of public money but an increased interference with private affairs, one of the curses of bureaucratic government. As Mr. Hewitt points out, 'there will be less money to collect, but there will be more collectors. There will be fewer accounts to audit, but there will be more auditors. There will be fewer schedules filed, but there will be more clerks to handle them.' In other words, not only must the taxpayer bear his burden of the tax, 'but he will be forced to submit to more questions, more audits, more investigations, and more checking up than last year, if all the bureaucrats are to find employment.'

"Here, in fact, is the worst evil of bureaucracy. It complicates machinery in order to keep itself employed. Study conditions in bureaucratic Europe and you will find red tape insisted upon so that there may be officeholders to unwind it. Ancient, involved methods are stubbornly preserved in order to give clerks something to do, and, of course, this means an enormous waste of energy and loss of motion not only in Government business but in everything unfortunate enough to be touched by Government. It means not only mulcting the taxpayer of inordinate taxes in order to maintain a system of doing public business in the most cumbersome and expensive way conceivable, but it means keeping thousands of men and women employed at doing unnecessary things when they should be working in private enterprise at some productive service; and, finally, it means entangling private enterprise itself in a network of vexatious restrictions and regulations which lower its efficiency.

"America has prospered through freedom from slavery to officialdom and Government interference. We began our national life with a wholesome distrust and dislike of them, and for a long time resisted aggrandizement of the State and extensions of regulations in our private affairs. But this resistance has weakened. We have had a large influx of people not brought up in the tradition of individual responsibility and freedom who, though many of them had suffered the oppression of governments, were willing to turn to a government presumably more beneficent to assist them in our country. Furthermore, for more than half a century there has been a persistent propaganda on behalf of socialism, which is simply bureaucracy triumphant, and, unfortunately, there have been evils of predatory individualism and dubious combinations of private power to give this propaganda a superficial plausibility.

"But the American people, if they have any regard for their liberties and any appreciation of their good fortune in keeping free from the exhausting and burdensome imposition of Government interference and control, or bureaucracy, or organized officialdom, will wake up and check the bureaucratic tendency, which has been growing ominously, before it is too late. This is a new war for freedom."

Mr. STANLEY. I ask that this editorial may be printed in the RECORD in the same type as my remarks.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. WARREN. Mr. President, referring to the remarks just made by the Senator from Kentucky [Mr. STANLEY], I can have no differences with him. The Senator's efforts are evidently along the lines of economy, the same thing for which many of us are striving; and as he makes no partisan complaint, knowing full well how and where and through whom these bureaus and this bureaucracy have been inspired and started, I feel disposed rather to thank him than otherwise for the remarks that he has made.

I have nothing further to say in regard to the matter at this time.

Mr. STANLEY. Mr. President, in this fight that I am making against the duplication of departments, against the assumption by the Federal Government of authority previously vested in the States which belongs there, against not only the betrayal of the people's liberties but the squandering of their patrimony, I welcome assistance from either side of this Chamber; and I hope patriots of both sides will forget every other consideration except the personal and material rights of a free people.

PETITIONS.

The PRESIDENT pro tempore (Mr. CUMMINS) laid before the Senate a telegram in the nature of a petition from W. G. Block Co., of Davenport, Iowa, favoring the prompt shipment of coal to Iowa for threshing, canning factories, and cold-storage plants, so as to prevent loss of grain and food, which was referred to the Committee on Education and Labor.

Mr. ROBINSON presented resolutions adopted by the convention of the Arkansas Federation of Rural Letter Carriers at Little Rock, Ark., favoring certain improvements in handling the mails, standardized compensation for postal employees, granting to rural carriers the same equipment allowance as now granted to mounted city carriers, and a single grand organization for all postal workers, etc., which were referred to the Committee on Post Offices and Post Roads.

Mr. WILLIS presented a petition of sundry shoe manufacturers in the State of Ohio, praying that hides and skins be placed on the free list in the pending tariff bill, which was referred to the Committee on Finance.

SOUTHERN PACIFIC AND CENTRAL PACIFIC RAILWAYS.

Mr. WARREN. I ask unanimous consent to present resolutions from the Board of Trade of Evanston, Wyo., the Rotary Club of Rawlins, Wyo., and the Board of Trade of Rawlins, Wyo., commending the Supreme Court findings in the case of the separation of the Central Pacific Railway from the Southern Pacific Co., and asking that Congress may not undertake to overturn that decision. I ask that the resolutions may be referred to the Committee on Interstate Commerce, and that the one from the Evanston Board of Trade be printed in the RECORD.

There being no objection, the resolutions were referred to the Committee on Interstate Commerce, and the resolution of the Evanston Board of Trade was ordered to be printed in the RECORD, as follows:

"Whereas the highest court of our Nation has decided that the Southern Pacific-Central Pacific monopoly is unlawful and that the Southern Pacific Co. must relinquish its control of the Central Pacific for the public good; and

"Whereas plans are being made to set aside the court's decision by legislative action; and

"Whereas the Southern Pacific Co. can not route transcontinental traffic over the Central Pacific without ignoring its own business interests, and consequently is not in a position to cooperate in the development of competitive business through the Ogden gateway; and

"Whereas the investments and disbursements of the Wyoming transcontinental railroads depend in a large degree upon the volume of transcontinental traffic and the building and maintaining of communities along the lines of such railroads depends in no small degree upon such traffic; and

"Whereas the Southern Pacific southern route and the Central Pacific Ogden gateway route are normally competitive and should function and operate as competitors in order that the public interest shall be fully served and in order that each line may be free to develop and maintain and may be given an opportunity to reach its maximum efficiency: Therefore be it

"*Resolved*, That the Evanston Board of Trade recognizes the great interest of all communities along the coast to coast Ogden gateway route in having the decision of the Supreme Court upheld and in having the Southern Pacific's unlawful control of the Central Pacific speedily terminated; and be it further

"*Resolved*, That we call the attention of our representatives in Congress to the attempts which are being made to legalize this harmful monopoly, and that we urge that they take such action as seems to them advisable to defeat these attempts."

I, Matthew Nisbet, of Evanston, Uinta County, Wyo., do hereby certify that I am the duly elected and acting secretary of the Evanston Board of Trade, of Evanston, Uinta County, Wyo., and that the above

and foregoing is a full, true, and correct copy of the resolutions duly and regularly adopted by the said the Evanston Board of Trade at a meeting duly held on the 25th day of July, 1922, as the same appears of record in my office as such secretary.

Witness my hand this July 25, 1922.

M. M. NISBET, *Secretary*,
By ROY E. BRYAN, *Acting Secretary*.

AMENDMENT OF COTTON FUTURES ACT.

Mr. RANSDELL, from the Committee on Agriculture and Forestry, to which were referred the following bills, reported them each adversely and submitted a report (No. 841) on both bills:

S. 385. A bill to amend section 5 of the United States cotton futures act, approved August 11, 1916, as amended; and

S. 3146. A bill to amend section 5 of the United States cotton futures act.

The PRESIDENT pro tempore. The bills will be placed on the calendar with the adverse report of the committee.

BRIDGES ACROSS GRAND CALUMET RIVER, IND.

Mr. JONES of Washington. Out of order, I ask unanimous consent to report, on behalf of the Senator from New York [Mr. CALDER], two bridge bills, and ask for their immediate consideration.

From the Committee on Commerce, I report back favorably, with an amendment, Senate bill 3793, to authorize the Gary Tube Co. to construct a bridge across the Grand Calumet River, in the State of Indiana, and I submit a report (No. 842) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was, in section 2, on line 15, before the word "expressly," to insert the word "hereby," so as to make the bill read:

Be it enacted, etc., That the Gary Tube Co., a corporation organized under the laws of the State of Indiana, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Grand Calumet River, at a point suitable to the interests of navigation, in the northeast quarter of section 3, township 36 north, range 8 west of the second principal meridian, in Lake County, in the State of Indiana, said bridge to be built across the Grand Calumet River in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. JONES of Washington. From the same committee I report back favorably Senate bill 3834, to authorize the Chicago, Lake Shore & Eastern Railway Co. to construct a bridge across the Grand Calumet River, in the State of Indiana, and I submit a report (No. 843) thereon. I ask unanimous consent for the immediate consideration of the bill.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Chicago, Lake Shore & Eastern Railway Co., a corporation organized under the laws of the States of Indiana and Illinois, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Grand Calumet River at a point suitable to the interests of navigation in the southwest quarter of section 36, township 37 north, range 8 west of the second principal meridian, in Lake County, in the State of Indiana, said bridge to be built across the Grand Calumet River in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WATERWORKS PLANTS, KANSAS CITY, KANS., AND KANSAS CITY, MO.

Mr. NELSON. From the Committee on the Judiciary I report back favorably, with an amendment, a joint resolution, to which I call the attention of the Senator from Kansas [Mr. CURTIS].

Mr. CURTIS. Mr. President, as this joint resolution simply gives the consent of Congress to acts of the Kansas Legislature and the Missouri Legislature, I ask unanimous consent for its immediate conideration.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. J. Res. 216) providing for the consent of the Congress of the United States of America to a compact and agreement between the State of Kansas and the State of Missouri respecting the erection, maintenance, and operation of the waterworks plants of the cities of Kansas City, Kans., and Kansas City, Mo.; the taxation thereof, and exercise of eminent domain in connection therewith by each State.

Mr. NELSON. The amendment simply strikes out the word "*Resolved*" and inserts the usual clause found in joint resolutions.

The PRESIDENT pro tempore. The amendment will be stated.

The amendment was, on page 3, line 1, to strike out "*Resolved*" and insert "*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*," so as to make the joint resolution read:

Whereas by a concurrent resolution adopted by the General Assembly of the State of Missouri and approved by the governor of said State on April 15, 1921, and a similar resolution adopted by the Legislature of the State of Kansas and approved by the governor of said State on March 18, 1921, it was resolved and provided that, whereas the city of Kansas City, in Wyandotte County, Kans., and the city of Kansas City, in Jackson County, Mo., are contiguous and adjoining and each owns and operates waterworks plants, the intake portions of which are on the banks of the Missouri River in Kansas City, Kans., and contiguous to each; and for the protection of each city, in the event of a breakdown of its plant, a conflagration, epidemic, or other exigency, it is vitally important that its water plant have connection with and access to the facilities of the other; and it is and has been in the past of material benefit to each city that both contribute to a common fund in protecting the banks of the Missouri River in the vicinity of said plants and farther upstream from breaking over and destroying the plants or changing its course so as to leave the intake so far from the stream as to render it impossible to obtain an adequate flow of water therefrom; and the water plants of both cities are connected at various points so that they can in the future, as they have in the past, supply each other with water, thereby preserving the health and protecting the property of each; and the plant of Kansas City, Mo., is now and will of necessity continue to be for a long period in the future the only source of water supply to the city of Rosedale, in Wyandotte County, Kans., and the maintenance of this supply is of vital importance to the health and property protection of the citizens of said municipality; and the contour of the territory of each city is such that to reach and serve certain districts it is necessary that portions of the service mains and plants occupy and run through the territory of the other State; and Kansas City, Mo., is about to invest many millions of dollars in the betterment of its plant in the immediate future and the city of Kansas City, Kans., will invest in the future large sums in extending its plant, said extensions of each municipality necessitating large investments in the territory of the adjacent State, and to raise the funds for the purpose of making these investments it is vital to each city that each plant be free from assessment and taxation in the other State; and that therefore, by reason of the advantages accruing to the municipalities of each State and to the inhabitants thereof, as hereinbefore recited, and other advantages not therein enumerated, the States of Kansas and Missouri thereby entered into the following compact and agreement:

(1) Neither the State of Kansas, nor any county, township, or municipality located within said State, or any official thereof, shall ever assess, levy, or collect any taxes, assessments, or imposts of any kind or character whatsoever on the portion of the waterworks plant of the municipality of Kansas City, Mo., now or hereafter located within the territory of the State of Kansas.

(2) Neither the State of Missouri, nor any county, township, or municipality located within said State, or any official thereof, shall ever assess, levy, or collect any taxes, assessments, or imposts of any kind or character whatsoever on the portion of the waterworks plant of the municipality of Kansas City, Kans., now or hereafter located within the territory of the State of Missouri.

It is further provided by said resolutions, compact, and agreement that the right of eminent domain, for the purpose of acquiring property rights and easements for a waterworks plant, including mains, water pipe lines, or extensions, or any part thereof, in either State, was thereby given and granted to each State and to Kansas City, Kans., and Kansas City, Mo., to be exercised by Kansas City, Kans., in the State of Missouri, and by Kansas City, Mo., in the State of Kansas, for said purposes; and that to the faithful observance of the said compact and agreement each State, by the adoption of said resolutions, pledged its good faith: Therefore be it

Resolved, etc., That the consent of Congress is hereby accorded to said compact and agreement between the State of Kansas and the State of Missouri.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAMERON:

A bill (S. 3875) granting a pension to Martin T. Knapp; to the Committee on Pensions.

By Mr. KELLOGG:

A bill (S. 3876) to extend the benefits of the Employers' Liability act of September 7, 1916, to Carol E. Reeves; to the Committee on Claims.

THE MUSCLE SHOALS PLANT.

Mr. McKINLEY. Mr. President, I ask unanimous consent to present and have printed in the RECORD in 8-point type a letter I have written to Mr. Gray Silver, of the American Farm Bureau Federation.

There being no objection, the letter was ordered to be printed in the RECORD in 8-point type, as follows:

JULY 29, 1922.

DEAR MR. SILVER: Thank you for your courteous letter of July 18 suggesting that I make a statement which you will present to your organization in the State of Illinois, giving my position in reference to the power development at Muscle Shoals.

The testimony of the United States engineers who are in charge at Muscle Shoals shows that with the auxiliary steam power which the Government has bought and paid for and which it is proposed to give Mr. Ford 200,000 horsepower can be depended upon for practically every day in the year and an additional 150,000 to 200,000 horsepower for 10 months in the year. Under the present standard of electrical art this power can be distributed to towns and cities, mines, and manufacturing plants covering a circle of 600 miles in diameter, thus providing untold advantages for a very large section of the United States. Power of this kind delivered from Keokuk over parts of western and southern Illinois sells at the dam for about $40 per horsepower per year, which would mean a revenue to the Government for the Muscle Shoals power of not less than eight or ten million dollars per year if the Government should sell same to a distributing company at same price. This is figured on a basis of about one-half of 1 cent per kilowatt hour. A farmer or a resident in a small town or city is glad to secure this power on a basis of twenty times that much, or 10 cents per kilowatt hour. One objection I have to Mr. Ford taking over this power under his present plan is because he proposes to deprive thousands and thousands of people over an area of 600 miles in diameter of power and its use in order that he may build up at Muscle Shoals a new Detroit. That is a fine thing for the inhabitants of Muscle Shoals, and naturally they are extremely desirous of seeing their real estate advance in value from $50 per acre to $10,000 an acre, but it is a bad thing for the thousands and thousands of people within this 600-mile area. This power which will wholesale at $10,000,000 per year will retail for over $50,000,000 per year. Mr. Ford proposes to buy from the Government for $5,000,000 what has cost the Government $150,000,000 and pay 4 per cent interest on the additional forty or fifty million dollars which the Government must invest to complete the dams, and in addition to that he proposes to pay the Government $46,000 a year, which he calls amortizement, and $55,000 a year which he calls repairs.

The testimony of the Army engineers is that the repairs at the dams will be about $227,000 a year, and not $55,000 a year. As Mr. Ford is to have the benefits if he gets this property on his terms and is to have these benefits for 100 years, he certainly, instead of offering to pay $55,000 a year, ought to agree to keep the dam in repair, which the Army engineers say will cost $227,000 a year.

Mr. Ford does not propose to take this property but to have a $10,000,000 corporation take title to it, and this title stands for 100 years. The experience with all large capital investments as corporations is that sooner or later, within 10 or 20 years, they pass into control of large money holders commonly known as "Wall Street." Mr. Ford, if he secures this property on the proposition indorsed by you so strongly, gets the property tax free for 100 years, with no control of any kind as to what price he should charge for power. He requires the Government to install, at Government cost, machinery for 850,000 horsepower and agrees to use 100,000 of this power to make 40,000 tons of ammonia, which would make an amount of fertilizer which would not be sufficient to fertilize one-third of the acreage of Illinois alone, not including any other State, and he only agrees to furnish this provided he can sell at a profit of 8 per cent on the 4 per cent interest money he has secured from the Government. The testimony of the Army engineers who have had this property in charge since its inception is that with Chilean nitrates, or ammonia made from the by-products of coke ovens, power must be secured at three-quarters of a mill per kilowatt. They further testify that, not getting any interest on the money the Government has already invested, and 4 per cent on the additional money which the Government must invest under Mr. Ford's offer, it would cost 2½ mills per kilowatt to generate the power, or three times as much as they testify that power must necessarily be provided in order to compete with present fertilizer.

One hundred years is a long time to give one man a tremendous natural resource, which now belongs to the people, and disinterested, thinking persons certainly should hesitate before voting for such a law. After a great deal of consideration, Congress within the past two years has created a Federal Power Commission, which can lease water power for a limit of 50 years, or half the time you have recommended that this property be given to Mr. Ford. Under Federal power control the Government has something to say. Nothing should be done with the Muscle Shoals property that takes away from the United States Government and from the State of Alabama the right to control rates. The time has gone by when large corporations should be given a free hand to exploit the people. I note within the last few days that the Governor of Alabama, recognizing the wrong which can be done to the people of his own State living away from Muscle Shoals, protested against turning over the whole property to Mr. Ford in the manner which you have recommended.

Now, in closing let me ask, what is the hurry about turning over this great power proposition to Mr. Ford at this time? This Muscle Shoals project, if properly handled, will benefit hundreds of thousands of people and bring in more than $10,000,000 annual revenue a year to the Government.

Congress has authorized the United States engineers to complete the dam, and all the testimony shows that it will take three years or more before the Government can deliver power from this project. Many important conditions may arise within three years. Mr. Ford, as you must admit, has within the past year made three offers for this power, each succeeding one more advantageous to the United States Government than his preceding offer, and at the last meeting of the committee, as you know, one of the Senators from the South, a strong advocate of Mr. Ford's offer, presented an amendment to Mr. Ford's latest proposition, in which he cuts the time down from 100 years to 50 years.

Mr. Ford has been of great benefit to the American people in producing, at a cost to himself of perhaps $200 a machine, a wonderful automobile, for which the people have gladly paid him $400. I, for one, anticipate with pleasure a proposition from him for this tremendous Muscle Shoals water power that will be beneficial to the citizens of the United States. If an offer is accepted from Mr. Ford, I want to see the rights of the whole people protected and ask him to come in under existing laws, which control rates for power which he will sell and which the people must buy.

Remember that you are proposing to lease to Mr. Ford for 100 years, at a rental of less than $2,000,000 per year, power that would sell for $100,000,000 per year, if sold at the price we are to-day paying for electric power in the city of Washington.

Sincerely, W. B. MCKINLEY.

MR. GRAY SILVER,
Representative American Farm Bureau Federation,
Washington, D. C.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. WALSH of Massachusetts. Mr. President, I have very little to say about the pending amendment. In fact, I hope that the remaining paragraphs in the wool schedule may be disposed of in very short order. I do not know of any paragraphs which are likely to provoke much discussion, except the paragraph fixing the rate upon clothing and articles of wearing apparel, and I am informed that there is to be very little debate upon that amendment.

Paragraph 1113, the pending paragraph, deals with felts not woven, wholly or in chief value of wool. I want to call attention to the fact that there are very few imports of those felts. Practically the only imports which come into this country are felts used on pianos. There is no such fine and exceptional felt manufactured in this country. It is very necessary to import those felts. But even the imports of those are insignificant in quantity and insignificant in value.

Strange to say, our exports of felt have been rather substantial. In the five months from January 1 to May 31, 1922, the present year, wool felts were exported valued at $157,792. In other words, the exports of wool felts in the first five months of this year were over three times as much as the total imports of wool felts during the year 1921. Therefore it does not seem to me that an increase in the protective duty over the rate in the present law, such as is contemplated here, is justified.

There is nothing else I care to say upon this paragraph. I would simply be repeating the arguments I made in reference to the other paragraphs, if I attempted to consume any more time. The same principle is involved, and I am simply going to

proceed hastily, and assist in having the votes taken and the wool schedule disposed of as quickly as possible. These increased protective duties can not be justified.

Mr. SMOOT. Mr. President, a number of felt manufacturers have advised me that the rates in this schedule are altogether too low to afford protection, but just by way of explanation I want to say that we have divided these fabrics into three classes, and the three brackets carry different compensatory duties and different protective duties.

Under the Underwood law all three qualities of felts carry a duty of 35 per cent ad valorem. The committee thought it would be better to fix a duty of 30 per cent on the low-priced class; on the medium bracket, a duty of 35 per cent, and on the higher-priced felts, 40 per cent. The average of the three brackets is 35 per cent, exactly the same as in the Underwood law. That is the compensatory duty.

Some of the manufacturers complain that we have not given them a sufficient compensatory duty, but I am quite sure we have, because the felts included in the different brackets can not possibly be all wool, and therefore we give only 20 cents on the first bracket instead of 49 cents, and I base that entirely upon their using the short waste wool. While there have been objections to it, the committee thinks it is ample.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 149, after line 4, to strike out—

PAR. 1114. Fabrics with fast edges not exceeding 12 inches in width, and articles made therefrom; tubings, garters, suspenders, braces, cords, and cords and tassels; if wholly of wool, 36 cents per pound; if in part of wool, whether or not wool constitutes chief value, 25 cents per pound; and, in addition thereto on all the foregoing, 30 per cent ad valorem.

And in lieu thereof to insert:

PAR. 1114. Fabrics with fast edges not exceeding 12 inches in width, and articles made therefrom; tubings, garters, braids, laces, galloons, veils and veiling, bands, belts, suspenders, braces, cords, and cords and tassels; all the foregoing if wholly of wool, 49 cents per pound; if in part of wool, whether or not wool constitutes chief value, 33 cents per pound; and, in addition thereto on all the foregoing, 55 per cent ad valorem.

Mr. SMOOT. Mr. President, I desire to offer a substitute for the amendment to paragraph 1114, proposed by the committee, and I send the substitute to the desk.

The PRESIDENT pro tempore. The Secretary will report the proposed amendment.

The READING CLERK. Strike out lines 5 to 11, both inclusive, on page 149, and insert the following:

PAR. 1114. Fabrics with fast edges not exceeding 12 inches in width, and articles made therefrom; tubings, garters, suspenders, braces, cords, and cords and tassels; all the foregoing if wholly or in chief value of wool, 49 cents per pound upon the wool content thereof and 50 per cent ad valorem.

The PRESIDENT pro tempore. The Chair understands the committee withdraws the amendment as printed in the bill and substitutes the one just read. The question is upon agreeing to the substitute just offered.

Mr. SMOOT. The Senate will notice that the committee has stricken out "braids, laces, galloons, veils and veiling, bands, belts." If the proposed amendment is agreed to, the result will be that those articles will fall in paragraph 1430 of the bill, and a detailed explanation will be made at the time that paragraph is reached. The committee also has added the words "upon the wool content thereof." Therefore there was no necessity whatever of the brackets which were originally put into the amendment. The committee have also cut the rate from 55 per cent to 50 per cent. These are fast-edged goods, very narrow, generally carrying an elastic warp, or a rubber warp, or silk, and while there is considerable produced in this country, I think as to this class of goods the amendment as submitted can be justified.

Mr. WALSH of Massachusetts. There are practically no imports of the fabrics named in this paragraph. In the last 10 years the imports have not amounted in value to over $5,000. In the last year the imports were only $2,942 in value. How can we justify such an increase in the protective duties proposed over the rates in the present law, in view of a record of practically no imports, under a rate of 35 per cent?

To show how seriously these high duties are going to affect prices, I want to call attention to some figures I have before me in reference to imports and the duties collected in previous years upon the fabrics named in this paragraph. In 1920 the imports were $3,907 in value. The duties collected were $1,367. In 1921, six months of which period the emergency law was in operation, under which, of course, the duties were increased very substantially—as the Senate knows, the compensatory duty being 45 cents per pound on wool, and the protective duty 35 per cent—the imports were valued at $2,942 and the duties collected were $1,381. In other words, the duties collected in 1921 were about 50 per cent of the value of the imported product, but while the much lower duty levied in the Underwood law was in operation, the duties collected were less than one-third of the total value of the product. When the rates here levied are in force, the duties will be close to 100 per cent of the foreign price.

I have nothing further to say with reference to this paragraph, except what I have heretofore said in opposition to all of the high duties levied under the wool schedule.

Mr. SIMMONS. Mr. President, I think it proper to make some statement with reference to this amendment now proposed by the committee, and I will make it very brief.

The amendment under discussion is in the nature of a substitute for the paragraph as provided in the bill as it passed the House, and Senators will observe that in the original committee amendment there was this provision, "all the foregoing, if wholly of wool, 49 cents per pound." That is the proper form to write an amendment of this sort, where it is intended to be compensatory.

If the original amendment had stopped there it would not have been subject to the objections made on Saturday by the Senator from Wisconsin and myself to the compensatory provisions of the paragraph then under consideration. But the original amendment of the committee did not stop there. It proceeded as follows:

If in part of wool, whether or not wool constitutes chief value, 33 cents per pound.

If that amendment had been adopted as originally proposed by the committee it would have meant that if there was a fraction of wool in the article it would bear a duty of 33 cents a pound, because the amendment very carefully provides that the 33-cent rate shall obtain as a compensatory duty for the wool, whether the wool constitutes the element of chief value or not, which, of course, could mean what I said a while ago, that the 33 cents, ostensibly for the purpose of compensating for the raw wool in the article, should be allowed although it might contain only a bare fraction of wool. In other words, if there were any wool at all in the product, under that amendment the producer of the article would be entitled to have a duty of 33 cents a pound by way of compensating him for the wool in the article, however small that quantity of wool might be. The committee has very properly stricken that out. It is very much to their credit that they have stricken it out, as, I think, it was very much to their discredit that they put it in there in the first instance.

I am calling attention to this simply for the purpose of showing how crudely this bill was originally redrafted by the committee in those particulars in which it was sought to amend it, and what would have been the situation if those amendments had not been challenged and the committee been coerced into further action by reason of the exposure of the provisions as originally drafted by it.

Mr. President, there is another comment I wish to make upon this amendment. As originally drafted it provided "all the foregoing, if not wholly of wool, 49 cents per pound." After the words "49 cents per pound," the committee now adds "upon the wool content thereof," and it changes the preceding part of the amendment to read "all the foregoing, if wholly or in chief value of wool," it having originally read, as I said, "all the foregoing if wholly of wool." So that the amendment as now changed by the committee reads substantially as the corresponding provision in some of the items which preceded it and with reference to which the Senator from Wisconsin so earnestly insisted that it should be changed so as to provide that the rates should apply only upon the wool content where the article was not wholly of wool.

I think in view of the fact that the committee have clearly changed their policy and recognized in this paragraph that where the provision provides a certain rate by way of compensation for the wool, where it is in part or in chief value of wool, in view of the fact that they have now concluded with reference to this particular paragraph dealing with a fabric that only the wool content should be considered in applying the compensatory rates with reference to this particular article, that the committee in common justice, and certainly in the interest of consistency, ought, wherever that language appears in the paragraphs of the schedule, to make the same amendment.

The Senator from Utah [Mr. SMOOT] shakes his head. I want to ask the Senator from Utah how he differentiates the situation in this respect with reference to this paragraph from the situation with reference to the same condition in the paragraphs sought to be amended on Saturday by the Senator from

Wisconsin. I also call it to the attention of the Senator from Wisconsin. It may be that in my hurry I have overlooked some circumstance, but as it appears to me now, if this is a proper amendment to the particular paragraph now pending, that it likewise would be a proper amendment, and in the interest of consistenecy ought to be applied to the other paragraphs of like import which were discussed and acted on during the past week.

Mr. SMOOT. Mr. President, I will say to the Senator that it is very easily answered. In the other case, where the language has not been added, wool waste is used. In the fabrics carried by this paragraph they do not use wool waste. The goods are entirely different, and the compensatory duty where wool waste is used——

Mr. SIMMONS. They may use cotton in the fabrics mentioned in both paragraphs.

Mr. SMOOT. Not in this one.

Mr. SIMMONS. They use nothing but wool waste in the fabrics covered in this paragraph?

Mr. SMOOT. No; they do not use wool waste in those fabrics.

Mr. SIMMONS. They do not use waste wool at all.

Mr. SMOOT. But they do use rubber.

Mr. SIMMONS. But in the paragraphs already passed over, and in the paragraphs in which the same language appears——

Mr. SMOOT. It only appears where the 49 cents per pound duty is given, and that necessarily should be all wool, and therefore we provide that unless it is all wool they shall only receive the all-wool compensatory duty on the wool content.

Mr. SIMMONS. If this particular article is all wool, why was it necessary to put it in?

Mr. SMOOT. It is not all wool. The great bulk of it is not all wool. If the Senator wants to know why the committee used the words "if in part wool, whether or not wool constitutes the chief value," there is a reason for that.

Mr. SIMMONS. I am not talking about that.

Mr. SMOOT. The Senator criticized that language.

Mr. SIMMONS. I did.

Mr. SMOOT. The Senator said it was an inconsistency. The Senator will notice that the committee have stricken out the words "laces, galloons, veils and veiling, bands, belts." The reason why the words "if in part of wool" were used in this paragraph was because if the words had not been there with those items in the paragraph, then the items would have fallen under a higher rate under paragraph 1430.

Mr. SIMMONS. I only referred to the elimination of the 33 cents portion of the paragraph for the purpose of commending the committee for taking a saner view of the matter than they originally did.

Mr. SMOOT. If the Senator understood it he would not make that statement. If we had left in here the items "laces, galloons, veils and veiling, bands, belts," if those words were stricken out, they would have fallen in paragraph 130 at a higher rate, but we have stricken those out.

Mr. SIMMONS. What has been done with the items stricken out?

Mr. SMOOT. They go into paragraph 1430, and whenever we reach that paragraph then we will decide upon the rates, but if the words "if in part of wool, whether or not wool constitutes the chief value," had been left in this paragraph or had not been put in here, then the articles would have fallen naturally into paragraph 1430 at a higher rate. It was protection which the committee had sought in putting those words in there, and not what the Senator thought it was.

Mr. SIMMONS. Was not the 33 cents per pound rate a compensatory duty?

Mr. SMOOT. Yes; certainly it was. We provided 49 cents a pound on the wool content, but in doing that we had to take out laces, galloons, veils, and veiling, bands and belts, and, as I said, there would have been no necessity for that in the first place if it had not been for the reasons I have just given.

Mr. SIMMONS. Both of the rates, the 49 cents per pound rate and the 33 cents per pound rate, are compensatory rates, because there was afterwards added 55 per cent ad valorem as a protective rate.

Mr. SMOOT. Fifty per cent.

Mr. SIMMONS. It was 55 in the original amendment to the bill.

Mr. SMOOT. They are compensatory rates, and we accepted those just as we accepted the amendment of the Senator from Wisconsin and used the exact words following.

Mr. SIMMONS. The Senator stated that they had taken out the last item in the paragraph which imposed a 33 cents per pound rate because they had stricken out of it some of the specific articles contained in the paragraph.

Mr. SMOOT. Yes; and that the only thing now——

Mr. SIMMONS. The 33 cents per pound was intended, according to the Senator, to cover the specific articles which the committee now proposes to eliminate. Now, those articles——

Mr. SMOOT. If they had not been in here it was——

Mr. SIMMONS. Let me finish my statement. That is, 33 cents per pound was put in here for the purpose of affording a compensatory rate on the articles which have been taken out. Now, those articles are in part of wool, I presume.

Mr. SMOOT. Yes.

Mr. SIMMONS. If they are only in part wool why was a 33 cents per pound rate, which is the rate on all wool, imposed in the original amendment unless it was meant that if there was any wool in the articles the manufacturer of the article should be entitled to the compensatory rate of 33 cents a pound upon total weight of the cloth?

Mr. SMOOT. Perhaps I can explain it to the Senator in this way.

Mr. SIMMONS. Taking those items out does not change the fact at all.

Mr. SMOOT. Yes, it does.

Mr. SIMMONS. It does not change the fact that it was the original intent to allow the manufacturer of the articles which have been taken out, without reference to the quantity of wool that might be in them, to have 33 cents a pound on every pound of goods.

Mr. SMOOT. If the Senator will allow me to explain, I will tell him just what would have happened. In this paragraph the wording is "wholly of wool, 49 cents per pound."

Mr. SIMMONS. Not in the section about which I was talking.

Mr. SMOOT. If the Senator will allow me to explain, I shall be glad to do so, and then he will see why the committee did it. It is very clear when it is understood.

This is the only paragraph where the words "wholly of wool" are used. This is the only paragraph where the words "if in part wool, whether wool constitutes the chief value," are used. This is what would have happened: Laces, galloons, veilings, and so forth, would have been manufactured with one thread of wool in them, and would have escaped the higher rate imposed in paragraph 1430. In fact, I had samples shown to me containing one thread of wool. The object of that, I will say to the Seantor, was that the importer could not send in here laces of the highest value, and veilings particularly, with a wool thread in and get them under the lower rate in this paragraph when they should have gone under paragraph 1430. But now that we have taken them out, it applies to the fabrics with fast edges not exceeding 12 inches, and we say that it shall be 49 cents a pound on the wool content thereof.

Mr. SIMMONS. The amendment as now adopted is in proper form. I am not criticizing it. I think it is entirely right, so far as form of laying the duty is concerned, but t ought to apply elsewhere as well as here where the conditions are substantially the same.

Mr. SMOOT. Of course I can explain also why it could not apply to some of the brackets which we have already passed over. It applies in every case where there is a 49-cent compensatory duty given, but it will not apply where there is, for instance, 20 cents a pound given and where we know it will be all wool waste. It could not apply where it is 49 cents. I think the paragraph is so worded now that there can be no deception or misunderstanding with reference to the paragraph under which these goods will fall when imported into the United States.

Mr. SIMMONS. Mr. President, I simply wish to say that when I stated that the amendment as perfected by the committee was "right" I meant as to form, of course, and not as to the amount of duty which the amendment carried.

Mr. LENROOT. Mr. President, just a word with reference to the question which has been raised by the Senator from North Carolina [Mr. SIMMONS]. It is true that where the committee assumed that the article was all wool and gave a 49 cents a pound compensatory duty they did accept the amendment making it upon the wool content. The justification of the committee for opposing the amendment which I proposed, where the compensatory duty was less than 49 cents a pound, was the plea that a part of the article was made of wool waste and wool extract and perhaps a part of it of cotton, and therefore they had taken that into consideration in giving a rate of compensatory duty less than 49 cents a pound.

I see that there is some justification for the position that the committee has taken; but, as I have stated to the Senator from Utah [Mr. SMOOT] privately, and I also want to state it upon the floor of the Senate, in arriving at the rates of compensatory duty less than 49 cents a pound, which the committee have imposed, they have assumed that a part of the article was to be a wool extract and a part of it of cotton or other material.

That being so, I do not see why the committee could not and should not, in conference, at least, give their best judgment as to what part of the article will be composed of cotton or some other material, and make the duty upon the wool content throughout. If only a part of it shall be of waste or wool extract, the committee can and should arrive at a lower rate of compensatory duty, but whatever that shall be make it upon the wool content.

I have no information, I want to say, as to what part would be of wool waste or of wool extract or what part of cotton. So I am not in a position to offer the amendments that I should like to offer if I had the information.

Mr. SMOOT. I have told the Senator from Wisconsin, I think several times, that if it were possible to ascertain the percentage of wool waste that might be in a wool thread I should be glad to figure it out; but that can not be done.

Mr. LENROOT. No; the Senator from Utah misunderstood me. I did not urge that.

Mr. SMOOT. The Senator means, on the assumption that the committee made in arriving at the rate of compensatory duty?

Mr. LENROOT. Yes. Now, if the committee assumes that one-half of an article will be of wool, two-fifths of wool waste, and one-tenth of cotton—if that makes the proper calculation; at any rate, the Senator sees what I am getting at——

Mr. SMOOT. Yes; I see what the Senator is driving at.

Mr. LENROOT. I do not object to giving a full compensatory duty upon the wool and the wool extract and the wool waste if the committee has once lowered the duty to less than 49 cents to where it thinks it ought to be; but whenever there is any cotton in the article we ought to exclude the cotton. That is my point.

Mr. SMOOT. I will say to the Senator from Wisconsin that in every case that has been taken into consideration.

Mr. LENROOT. Yes; but if it has been taken into consideration the committee must have made some kind of assumption as to how much of the article was cotton.

Mr. SMOOT. Certainly.

Mr. LENROOT. If the committee has proceeded upon that kind of an assumption, it ought to remove the cotton entirely from consideration in the imposition of the rate and give the duty upon the wool which is used. The duty ought to be imposed upon the wool and the wool waste and the wool extract.

Mr. SMOOT. That can not be done.

Mr. SIMMONS. Mr. President——

Mr. LENROOT. I wish to make myself clear to the Senate. I do not insist upon differentiating in the compensatory duty between pure wool and wool waste; but I do insist that we ought not to give any compensatory duty upon any other than the wool or the wool waste in the fabric.

Mr. SMOOT. I want to say to the Senator from Wisconsin that we have not done so in so far as we can possibly figure it. For instance, take the blanket paragraph. We start out with a duty of 20 cents a pound, and we know that the duty upon carbonized noils is 30 cents. The manufacturer is not going to use carbonized noils to make blankets falling in that bracket. I have not any doubt that he can make his warp of 90 per cent wool waste. Perhaps he could not in making the filling use quite as much; but we have figured upon those percentages and we have given the duty upon the waste that is in that class of blankets and not upon the wool.

Mr. SIMMONS. Mr. President, if the Senator from Utah will pardon me, if the proposition of the Senator from Wisconsin [Mr. LENROOT] were adopted, and that were applied only to the actual wool content of the article, there could be no trouble about it; the producer could never get more compensation than he was entitled to upon the amount of wool he used; but suppose we adopt the method of which the Senator from Utah has just spoken, and which the Senator from Wisconsin says he is not able to work out because he has not the data. Probably the Senator from Utah has the data, but if the Senator from Utah has the data, those data are not absolutely stable and fixed. The Senator may have some information as to the amount of wool that is used in a certain cloth now, when the wool is on the free list, but when wool is placed under a duty of 33 cents a pound, would we have any assurances that the manufacturer would use as much wool in making various fabrics as he would if he could get his wool free? Should we not be speculating by taking the present proportion of wool in a fabric, when wool is free, instead of considering the fact that there may be vast changes in the proportion of the mixture of cotton and wool, with wool worth 33 cents a pound more than it now is?

Mr. SMOOT. The manufacturer has in mind the making of a certain piece of goods, and he knows that it will take a certain class of wool to make those goods. If they are adulterated in any way, they are not that class of goods. I doubt whether any manufacturer will make the same kind of goods using a lower form of mixture than was used by the manufacturer who originally made the cloth.

Mr. SIMMONS. But suppose they are of a lower grade.

Mr. SMOOT. Then they will not sell for the same.

Mr. SIMMONS. I do not think the fact that they are of less value would change their classification, so far as the tariff is concerned.

Mr. SMOOT. Oh, yes; the goods would fall in different brackets wherever there is more than one provided. As I stated when the Senator first proposed his amendment to the 49-cent rate, I saw no reason why it should not be accepted, and, so far as I was concerned, I believed that the committee would accept it, and, on speaking to members of the committee, they said they would accept it. It was right; there is no question about that; but the other proposition is quite different.

Mr. SIMMONS. The paragraph reads:

Fabrics with fast edges not exceeding 12 inches in width—

That is the description. Now, any fabric answering to that description would be entitled to this duty, and it would answer to that description if there was a less quantity of wool in it than is in the similar class of goods made now.

Mr. SMOOT. No one is stating to the contrary. The only reason why the committee, or, I should say, the Tariff Commission, prepared the amendment in the form in which it is was because of the fact that there have been included in the paragraph laces, galloons, veils, and veiling which were not included in the original House provision. There is, however, no need of my explaining that again. We did not propose to leave a loophole so that the manufacturer in the foreign country could manufacture a veiling, put one thread of wool in it, and, instead of paying 75 per cent duty, pay 60 per cent.

Mr. HITCHCOCK. Mr. President, we have heard a great deal of discussion here on what seems to me a very unimportant feature of this schedule. What I should like to know is whether I have interpreted the paragraph correctly that it increases the present rate from about 35 per cent to something like 100 per cent?

Mr. SIMMONS. If the Senator will pardon me, if he had been here the other day when we were discussing the framework of the compensatory scheme proposed by the committee he would not have thought this was an unimportant matter. It is a very fundamental matter and lies at the very bottom of this whole business. It goes to the question of concealed protection.

Mr. HITCHCOCK. That is, of course, of importance, but as I read the existing law, the tariff is 35 per cent, while the schedule as now proposed will make it about 100 per cent.

Mr. SMOOT. The Senator is wrong.

Mr. HITCHCOCK. Will the Senator state, then, what the ad valorem equivalent will be?

Mr. SMOOT. The ad valorem as it was originally written on fabrics made wholly of wool would be 76 per cent; on fabrics partly of wool, as it was originally written, the duty would be 68 per cent. Of course, in view of the amendment which we have already adopted that the compensatory duty should only be allowed upon the wool contained therein, the equivalent ad valorem will fall a little lower than that. The goods embraced in this paragraph are very expensive goods, I will say to the Senator; they are narrow goods and are made into garters and suspenders and generally have silk mixed with them or their warp is of rubber.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield a moment?

Mr. SMOOT. Yes.

Mr. WALSH of Massachusetts. Of course, a fabric the import price of which is a dollar when it is made chiefly of wool under this paragraph will be taxed 49 cents per pound of wool, if there is a pound of wool in the fabric, plus an ad valorem rate of 50 per cent, which will be equivalent to 99 cents on a dollar article. That is the way it would work out.

Mr. SMOOT. If the price were a dollar a pound, it would; but no such goods as that fall in this paragraph. These are high-priced articles. They are woven in not to exceed 12-inch widths, and many of them in only three-quarters of an inch width. Most of them have rubber warp, and are used for suspenders, and frequently are mixed with silk.

Mr. WALSH of Massachusetts. Then why did the committee put in a bracket imposing 49 cents duty on the wool fabric if no goods made wholly of wool fall under this paragraph? I am assuming an article made of all wool the import price of which is a dollar. On such an article the tax is 49 cents upon

the wool and 50 per cent ad valorem. The Senator admits that in such a case the duty would be practically 100 per cent.

Mr. SMOOT. Yes; if there were such a case.

Mr. WALSH of Massachusetts. Of course, we can conceive of goods on which the rate would be more than 100 per cent.

Mr. SMOOT. The tariff rate is 76 per cent on the wool; but the amendment making the rate 49 cents on the wool content will bring the equivalent ad valorem down to a little over 68 per cent.

Mr. HITCHCOCK. I am trying to find out what the tariff duty will be on wool of the manufactured article.

Mr. SMOOT. Just the rate that is proposed upon the wool itself.

Mr. HITCHCOCK. First there is a duty of 49 cents per pound. Now, what is the equivalent ad valorem of 49 cents per pound?

Mr. SMOOT. Under the original provision the equivalent ad valorem of the 49-cent rate is the difference between the 55 per cent and 76 per cent, which would be 21 per cent.

Mr. HITCHCOCK. Then added to that must be a 55 per cent ad valorem.

Mr. SMOOT. No; 50 per cent.

Mr. HITCHCOCK. Fifty per cent ad valorem? That will make a total per cent of 71.

Mr. SMOOT. As against the present law, which was 35 per cent.

Mr. HITCHCOCK. Thirty-five per cent.

Mr. SMOOT. The other would be with 5 per cent off of 68 per cent, or 63 per cent, as against 35 per cent.

Mr. HITCHCOCK. Is there any such tremendous importation of this article as to justify more than doubling the tariff rate?

Mr. SMOOT. I can not say that there has been of late.

Mr. HITCHCOCK. Has there ever been any great importation of this character of goods?

Mr. SMOOT. We do not know as to the quantity made in this country; we have no reports as to the production in the United States, and I can not say what is the percentage of imports to domestic production.

Mr. HITCHCOCK. Apparently the records show imports of only $3,000 a year.

Mr. SMOOT. Oh, no; under paragraph 1114 in 1921 the imports were valued at $157,624.

Mr. WALSH of Massachusetts. The imports under paragraph 1114 in 1921 were valued at $2,942.

Mr. SMOOT. Of course I suppose that included braids and laces as well.

Mr. HITCHCOCK. Mr. President, if the imports are only $3,000 a year, why more than double the tariff? That is what I can not see. How can that be explained?

Mr. SMOOT. I want to say to the Senator that these goods are entirely the subject of fashion. They are passementerie. They are the highest type of luxuries. Whether or not they are made here all depends on whether or not they take during the year. Fashion governs them entirely now that we have taken the braids and galloons and veilings and veils and laces out of this paragraph.

Mr. HITCHCOCK. I can recognize that if they are luxuries it is not such a serious matter to double the tariff; but why double the tariff even on luxuries if the amount imported is negligible?

Mr. SMOOT. I do not think it will make any difference as to the importations.

Mr. LENROOT. Mr. President, I should like to ask the Senator from Utah a question. Now that braids, laces, galloons, veils, and veilings have been taken out, where will they go?

Mr. SMOOT. In paragraph 1430. There will have to be a new division made in that schedule.

Mr. WALSH of Massachusetts. Is that the sundries schedule?

Mr. SMOOT. Yes; the sundries schedule.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The next amendment was, on page 149, after line 19, to strike out—

PAR. 1115. Knit fabrics, made of wool or of which wool is a component part, whether or not constituting chief value, valued at not more than $1.25 per pound, 25 cents per pound and, in addition thereto, 20 per cent ad valorem; valued at more than $1.25 per pound, 36 cents per pound and, in addition thereto, 25 per cent ad valorem.

Hose and half hose, and gloves and mittens, made of wool or of which wool is a component part, whether or not constituting chief value, valued at not more than $3 per dozen pairs, 30 cents per pound and, in addition thereto, 25 per cent ad valorem; valued at more than $3 per dozen pairs, 36 cents per pound and, in addition thereto, 30 per cent ad valorem.

Knit underwear, finished or unfinished, made of wool or of which wool is a component part, whether or not constituting chief value, valued at not more than $2.50 per pound, 30 cents per pound and, in addition thereto, 20 per cent ad valorem; valued at more than $2.50 per pound, 36 cents per pound and, in addition thereto, 25 per cent ad valorem.

Outerwear and other articles, knit or crocheted, finished or unfinished, made of wool or of which wool is a component part, whether or not constituting chief value, valued at not more than $2.50 per pound, 30 cents per pound and, in addition thereto, 28 per cent ad valorem; valued at more than $2.50 per pound, 36 cents per pound and, in addition thereto, 33⅓ per cent ad valorem.

And in lieu thereof to insert:

PAR. 1115. Knit fabrics in the piece, wholly or in chief value of wool, valued at not more than $1 per pound, 33 cents per pound and 40 per cent ad valorem; valued at more than $1 per pound, 49 cents per pound and 50 per cent ad valorem.

Hose and half hose, and gloves and mittens, wholly or in chief value of wool, valued at not more than $1.75 per dozen pairs, 39 cents per pound and 35 per cent ad valorem; valued at more than $1.75 per dozen pairs, 49 cents per pound and 50 per cent ad valorem.

Knit underwear, finished or unfinished, wholly or in chief value of wool, valued at not more than $1.75 per pound, 39 cents per pound and 30 per cent ad valorem; valued at more than $1.75 per pound, 49 cents per pound and 50 per cent ad valorem.

Outerwear and other articles, knit or crocheted, finished or unfinished, wholly or in chief value of wool, and not specially provided for, valued at not more than $2 per pound, 39 cents per pound and 40 per cent ad valorem; valued at more than $2 per pound, 49 cents per pound and 55 per cent ad valorem.

Mr. SMOOT. Mr. President, beginning with line 11, down to and including line 16; that is, for the last paragraph of the committee amendment I offer a substitute which I sent to the desk and ask to have read.

The PRESIDENT pro tempore. The substitute will be stated.

The ASSISTANT SECRETARY. As a substitute for that part of the paragraph embraced within lines 11 to 16, both inclusive, the following is proposed:

Outerwear and other articles, knit or crocheted, finished or unfinished, wholly or in chief value of wool, and not specially provided for, valued at not more than $1 per pound, 39 cents per pound and 40 per cent ad valorem; valued at more than $1 and not more than $2 per pound, 44 cents per pound and 45 per cent ad valorem; valued at more than $2 per pound, 49 cents per pound and 50 per cent ad valorem.

Mr. WALSH of Massachusetts. There is another bracket added?

Mr. SMOOT. Yes; I will say to the Senator that the committee added another bracket. Frankly, the manufacturers claim that the competition is so keen to-day in that one bracket that nearly all of the mills making those goods in the United States are closed.

Mr. WALSH of Massachusetts. Why does not the Senator add the words "on the wool content thereof" after the compensatory duty in each case?

Mr. SMOOT. I do not know how in the world we could ever find that out in the case of these outer garments.

Mr. WALSH of Massachusetts. You have attempted to find it out in the case of the other wool fabrics.

Mr. SMOOT. That is quite different from a made-up garment. You can take a piece of cloth and test it without destroying the cloth; but in the case of garments it is absolutely impossible. The only way we could do that is by values, as has been done here in the brackets, and knowing as nearly as possible just what percentage of yarns the different costs would go into that kind of an article.

I want to say to the Senator that I had a sample of these outer garments brought to my office the other day, a number of them, with the invoice on the goods. The manufacturer claimed that they were all wool, and I doubted it. I knew that it was very coarse wool, and I doubted that it was all wool; so I said, "May I cut this garment, and if you will allow me to do so, I will test it to find out whether it is all wool or whether it is not?" I took out of that garment enough of the material to test whether it was all wool or not, and I found that it was, and the invoice price of that was 84 cents a pound. It averaged 84 cents a pound.

I want to say frankly that I am warned that if these rates go through, that part of the industry can not survive; but I think it can, because of the fact that with the low-grade wools at the price they are now I think they can get along with the compensatory duty we have offered.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. SMOOT. Yes.

Mr. LENROOT. I should like to ask the Senator a question with reference to the difficulty of ascertaining the wool content. Is it or is it not a fact that the yarn itself may be part wool and part some other material, cotton or otherwise, and that a test could not be made without injuring the garment?

Mr. SMOOT. They can not make the test without injuring the garment. If it were possible, we would do it otherwise; but I will say to the Senator that in order to test this very garment I had to take at least an inch square out of it, and

when you take out only an inch square you are liable to be 4 or 5 per cent off, because of the fact that the weights are so small, particularly if the material is adulterated a very little, that you can hardly weigh it. Your scales are hardly fine enough to find out what the percentage is. I will say to the Senator from Massachusetts that if it were possible I would gladly accept an amendment to that effect, but it is impossible to administer a provision of that kind.

Mr. WALSH of Massachusetts. Mr. President, this paragraph (1115) covers wool knit fabrics, wool gloves and mittens, wool knit underwear, and wool hosiery.

There have been comparatively small importations of these articles. Wool knit fabrics were imported in 1921 to the value of $7,425, wool gloves and mittens to the value of $303,143, wool knit underwear and outerwear to the value of $161,299. These have been negligible when compared with the production in this country. There has, however, been quite an increase in the importation of wool hosiery during the year 1921 and also during the year 1920, due to the short skirts worn by women and the inclination to wear sport hosiery and wool hosiery which was not made in this country.

Our people do not wear large quantities of woolen hosiery or woolen gloves. The gloves and hosiery and underwear worn by our people are made either wholly or in chief part of cotton or silk. Whatever wool hosiery or underwear is imported is largely of a special type and kind that does not compete with the domestically made hosiery or underwear.

The specialty shops import these wares to satisfy the demands of a certain class of customers, largely those who like to wear sport clothes and like to dress in the manner and style of the English.

I do not know that I can present my views in opposition to this amendment better than by asking to have read from the desk an article which I will send up from the Dry Goods Economist of April 29, 1922. This paper contains an interesting discussion of these duties. I suppose it is well known that the Dry Goods Economist is the leading magazine in circulation among dry goods merchants throughout the country. It is a very high-class paper. The writer of this article seems to consider these high duties indefensible, and does not believe that they ought to be levied.

I ask the Secretary to read the article.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Assistant Secretary read as follows:

NOBODY IS WILLING TO BE GODFATHER TO THE KNIT-UNDERWEAR TARIFF—MANUFACTURERS KNOW IT IS UNNECESSARY—JOBBERS SAY THEY DON'T CARE ONE WAY OR THE OTHER, AND IMPORTERS DON'T LIKE IT—WHY IT WAS PUT IN THE BILL IS A PUZZLE.

As far as can be discovered from a canvass of the market, the proposed tariff on knit underwear is nobody's child. In other words, nobody confesses to wanting it especially. But still it is there, and the presumption is that domestic manufacturers made some effort to have it put there; except perhaps Congress, in the goodness of its heart, having been so kind to the other industries, couldn't bear to leave the knit-underwear industry out in the cold. * * *

RATES CALLED EXORBITANT.

These rates are characterized by importers as both exorbitant and unnecessary. The Economist has pointed out before that the amount of knit underwear imported into this country is negligible and could not by any stretch of the imagination be looked upon as competing seriously with domestic production. Under the circumstances there appears to be no present need for protection, and the proposed rates are so high, importers say, that they will simply kill off the current small volume of importations without benefiting anybody in particular.

Apparently, manufacturers are concerned not so much with existing competition as with the possibility of competition in the future. They are afflicted with the fear that this country will be flooded with the products of cheap European labor. Ever since the armistice this country has been perpetually on the brink of the aforesaid flood; but during those three and a half years no more than a few scanty drops have trickled over.

WHERE IS THE DANGER?

There may be a reason why we are more likely to be flooded with European knit underwear during the next three years than we have been during the last three; but up to the moment of going to press this reason has not been discovered. Neither the British nor the Germans have succeeded in making knit underwear that would "go" successfully on the American market, although both have tried hard. It is possible that they may succeed eventually; but putting up a tariff against an eventual possibility is a new wrinkle.

DISTRIBUTERS INDIFFERENT TO TARIFF.

Jobbers and other distributers of knit underwear are not much concerned with the question. They handle so little imported goods, they say, that it is a matter of indifference to them whether the proposed tariff shuts off importations or not. They do not believe that it can be used by domestic manufacturers as a lever to raise prices, because the large volume of domestic production and the competition for business between domestic manufacturers will be sufficient to regulate prices.

More serious is the probable effect of the proposed tariff on raw-material prices, particularly wool. The raw-wool schedule, which aims at an average duty of 33 cents a pound, clean basis, on all except carpet wools, is enough to make the most hardened protectionist sit up and take notice. If this measure goes through the price of raw wool and of wool underwear is bound to be affected materially. The same is true of long-staple cotton, on which the proposed duty is 7 cents a pound. The only thing that seems reasonably clear about the whole matter is that the consumer, as usual, is going to get it in the neck.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment as modified.

Mr. WALSH of Massachusetts. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the last vote, I vote "nay."

Mr. STERLING (when his name was called). Making the same transfer of my pair as on the last vote, I vote "yea."

Mr. WALSH of Massachusetts (when Mr. TOWNSEND's name was called). The Senator from South Carolina [Mr. DIAL] is paired with the Senator from Michigan [Mr. TOWNSEND]. If the Senator from South Carolina were present and not paired, he would vote "nay."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last vote, I vote "yea."

Mr. WILLIS (when his name was called). In the absence of my colleague [Mr. POMERENE], with whom I am paired, I transfer that pair to the senior Senator from Maryland [Mr. FRANCE] and vote "yea."

The roll call having been concluded,

Mr. LODGE. Making the same transfer of my pair with the senior Senator from Alabama [Mr. UNDERWOOD] as before, I vote "yea."

Mr. McCUMBER. I transfer my general pair as on the previous vote and vote "yea."

Mr. ERNST (after having voted in the affirmative). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Maryland [Mr. WELLER] and let my vote stand.

Mr. JONES of Washington. I transfer my general pair with the Senator from Virginia [Mr. SWANSON] to the Senator from Connecticut [Mr. BRANDEGEE] and vote "yea."

The result was announced—yeas 31, nays 16, as follows:

YEAS—31.

Ball	Frelinghuysen	McKinley	Oddie
Borah	Jones, Wash.	McLean	Phipps
Bursum	Kendrick	McNary	Smoot
Calder	Keyes	Moses	Sterling
Capper	Ladd	New	Warren
Cummins	Lenroot	Newberry	Watson, Ind.
Curtis	Lodge	Nicholson	Willis
Ernst	McCumber	Norbeck	

NAYS—16.

Ashurst	Harrison	Kellogg	Sheppard
Caraway	Heflin	Overman	Simmons
Fletcher	Hitchcock	Ransdell	Trammell
Harris	Jones, N. Mex.	Robinson	Walsh, Mass.

NOT VOTING—49.

Brandegee	Gerry	Owen	Stanley
Broussard	Glass	Page	Sutherland
Cameron	Gooding	Pepper	Swanson
Colt	Hale	Pittman	Townsend
Crow	Harreld	Poindexter	Underwood
Culberson	Johnson	Pomerene	Wadsworth
Dial	King	Rawson	Walsh, Mont.
Dillingham	La Follette	Reed	Watson, Ga.
du Pont	McCormick	Shields	Weller
Edge	McKellar	Shortridge	Williams
Elkins	Myers	Smith	
Fernald	Nelson	Spencer	
France	Norris	Stanfield	

The PRESIDENT pro tempore. There is not a quorum present. The Secretary will call the roll.

The Assistant Secretary called the roll and the following Senators answered to their names:

Ashurst	Frelinghuysen	Lodge	Phipps
Borah	Gooding	McCumber	Ransdell
Broussard	Harreld	McKinley	Robinson
Bursum	Harris	McLean	Sheppard
Calder	Heflin	McNary	Simmons
Capper	Hitchcock	Moses	Smoot
Caraway	Jones, N. Mex.	New	Sterling
Cummins	Jones, Wash.	Newberry	Walsh, Mass.
Curtis	Kellogg	Nicholson	Warren
Ernst	Kendrick	Oddie	Watson, Ind.
Fletcher	Keyes	Overman	Willis

The PRESIDENT pro tempore. Forty-four Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The Assistant Secretary called the names of the absent Senators and Mr. LENROOT and Mr. NORBECK answered to their names when called.

Mr. BALL entered the Chamber and answered to his name.

The PRESIDENT pro tempore. Forty-seven Senators have answered to their names. There is not a quorum present. What is the pleasure of the Senate?

Mr. McCUMBER. I move that the Sergeant at Arms be instructed to procure the attendance of absent Senators.

The motion was agreed to.

The PRESIDENT pro tempore. The Sergeant at Arms will execute the order of the Senate.

Mr. TRAMMELL and Mr. CULBERSON entered the Chamber and answered to their names.

The PRESIDENT pro tempore. Forty-nine Senators have answered to their names. There is a quorum present. The Secretary will call the roll upon the amendment proposed by the committee, as modified.

The reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement with reference to my pair as on the former vote, and its transfer to the senior Senator from New York [Mr. WADSWORTH], I will vote. I vote "yea."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "yea."

Mr. McLEAN (when his name was called). I transfer my pair with the senior Senator from Montana [Mr. MYERS] to the junior Senator from Iowa [Mr. RAWSON] and vote "yea."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the last vote, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as to my pair and its transfer as on the last vote, I vote "yea."

Mr. TRAMMELL (when his name was called). Making the same announcement as to the transfer of my pair as on the previous ballot, I vote "nay."

Mr. WILLIS (when his name was called). Making the same announcement as before of the transfer of my pair with the senior Senator from Ohio [Mr. POMERENE] to the senior Senator from Maryland [Mr. FRANCE], I vote "yea."

The roll call was concluded.

Mr. WATSON of Indiana. Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. LODGE. Making the same announcement as to the transfer of my pair as previously, I vote "yea."

Mr. ERNST (after having voted in the affirmative). My general pair with the senior Senator from Kentucky [Mr. STANLEY] I transfer to the junior Senator from Maryland [Mr. WELLER] and allow my vote to stand.

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from South Carolina [Mr. DIAL].

The result was announced—yeas 36, nays 17, as follows:

YEAS—36.

Ball	Curtis	Lenroot	Nicholson
Borah	Ernst	Lodge	Norbeck
Brandegee	Frelinghuysen	McCumber	Oddie
Broussard	Gooding	McKinley	Phipps
Bursum	Harreld	McLean	Smoot
Calder	Jones, Wash.	McNary	Sterling
Cameron	Kendrick	Moses	Warren
Capper	Keyes	New	Watson, Ind.
Cummins	Ladd	Newberry	Willis

NAYS—17.

Ashurst	Heflin	Overman	Trammell
Caraway	Hitchcock	Ransdell	Walsh, Mass.
Fletcher	Jones, N. Mex.	Robinson	
Harris	Kellogg	Sheppard	
Harrison	Myers	Simmons	

NOT VOTING—43.

Colt	Glass	Pepper	Stanley
Crow	Hale	Pittman	Sutherland
Culberson	Johnson	Poindexter	Swanson
Dial	King	Pomerene	Townsend
Dillingham	La Follette	Rawson	Underwood
du Pont	McCormick	Reed	Wadsworth

Gerry	Page	Stanfield	

So the committee amendment as modified was agreed to.

Mr. McCUMBER. Mr. President, I rise to a point of order. I desire an expression from the Chair as to whether or not an order of the Senate requiring the Sergeant at Arms to procure the presence of absent Senators is deemed suspended when a quorum is secured?

The PRESIDENT pro tempore. The Chair did deem the order suspended, and ordered a roll call. The Chair is not prepared to say that that is the proper procedure, however.

Mr. McCUMBER. I do not understand that having the roll call in itself suspends the order because a quorum has been secured. However, I want the Sergeant at Arms distinctly to understand, if the rule is that the order is not suspended when he secures the presence of a sufficient number of Senators to constitute a quorum, that the order is to bring absent Senators in, and I desire that order to be continued in force, and that the Sergeant at Arms shall understand that it shall be in force during the entire legislative day, even though that legislative day lasts until next March, if it is necessary, in order to keep a quorum here.

Mr. LODGE. Mr. President, I think the practice and the understanding have always been that the order to the Sergeant at Arms remains in force unless formally vacated by the Senate. Sometimes formal action to vacate the order has been forgotten; but I think there is no doubt about the practice being as I have just stated it.

The PRESIDENT pro tempore. The Chair has no doubt that the order continues until it is suspended by a vote of the Senate.

The Secretary will state the next committee amendment.

The ASSISTANT SECRETARY. On page 151, after line 16, the Committee on Finance proposes to strike out paragraph 1116 as printed in the House text, as follows:

PAR. 1116. Clothing and articles of wearing apparel of every description, not knit or crocheted, manufactured wholly or in part, made of wool or of which wool is a component part, whether or not constituting chief value, valued at not more than $2.50 per pound, 20 cents per pound and, in addition thereto, 25 per cent ad valorem; valued at more than $2.50 but not more than $5 per pound, 25 cents per pound and, in addition thereto, 25 per cent ad valorem; valued at more than $5 per pound, 36 cents per pound and, in addition thereto, 30 per cent ad valorem.

And in lieu thereof to insert a new paragraph, as follows——

Mr. SMOOT. Before the Secretary reads the paragraph which is proposed as an amendment, I now desire, on behalf of the Committee on Finance, to offer two modifications, in order to perfect the amendment. On page 152, paragraph 1116, line 2, after the word "crocheted," I ask that there be inserted the words "manufactured wholly or in part, composed." That is simply to perfect the wording of the paragraph.

Also, on line 7, before the words "per cent," I desire to strike out the numeral "55" and to insert the numeral "50."

The PRESIDING OFFICER (Mr. ASHURST in the chair). The Secretary will read the paragraph as proposed to be modified.

The ASSISTANT SECRETARY. As proposed to be modified the paragraph reads as follows:

PAR. 1116. Clothing and articles of wearing apparel of every description, not knit or crocheted, manufactured wholly or in part, composed wholly or in chief value of wool, valued at not more than $2 per pound, 26 cents per pound and 40 per cent ad valorem; valued at more than $2 but not more than $4 per pound, 33 cents per pound and 45 per cent ad valorem; valued at more than $4 per pound, 49 cents per pound and 50 per cent ad valorem.

The PRESIDING OFFICER (Mr. JONES of New Mexico in the chair). The question is on the amendment of the Committee on Finance as modified.

PARAGRAPH 1116—CLOTHING.

Mr. WALSH of Massachusetts. Mr. President, clothes and articles of wearing apparel are given a lower protective rate than in the Payne-Aldrich law, but the total rate ranges practically as high owing to the increase of the raw wool duty. On these goods, however, there appears to be no reason why the protective rate of 55 per cent accorded in the Senate bill should even approximate the rate in the Payne-Aldrich law, namely, 60 per cent. It is a well-known fact that the clothing-manufacturing industry of the United States is not subject to foreign competition and has practically exclusive control of the domestic market. The manufacture of ready-

made clothes is conducted nowhere in the world upon such a large and efficient scale as in the United States. Indeed, the testimony of one of the leading men in the trade, Mr. Goldman, of Cohen & Goldman, New York City, before the Senate Finance Committee contains the frank admission that the protective duty upon clothes is not a matter of vital concern to the clothing manufacturers inasmuch as the industry of this country is on a competitive basis and sells its goods already far below the tariff wall. The fact is that this branch of the wool industry, even in the pre-war and post-war period, has exported clothes upon a substantial scale. Exports have generally exceeded imports by a considerable margin, and what imports have come in have been largely specialties and do not compete with the domestic industry. It is the duty upon raw wool, rather than upon clothing which vitally concerns this branch of the industry. Indeed, it will be a great marvel of business efficiency if, under the disadvantage of a duty of 33 cents per pound, the American clothing manufacturers are able to continue to export any clothing at all to other countries and compete with goods made from free wool. Even in the domestic market this duty will seriously curtail the demand for clothes of good quality.

The Department of Commerce, in its 1916 report on "The men's factory-made clothing industry," stated:

> Imports of wool clothing are negligible, as compared with the huge domestic output, and consist mainly of English overcoats, novelty garments like the Balmaccan, and golfing and motoring clothes. Imports of sack suits are rare. The people in this country who demand English clothes are few; they reside usually in the seaport cities such as New York and Boston, and are in touch with England either socially or commercially. English ready-made clothing is not comparable with the American. The English tailoring is poor, except in the finest custom work. Very conservative styles of clothing are worn in England; the models do not change from one season to another as they do in the United States. American people believe not only that the styles of clothing for men that are originated in the United States are superior to those that come from other countries, but also that the workmanship is superior to the workmanship on ready-made clothing produced in foreign countries. This belief accounts, in a measure, for the tremendous increase in the production of factory-made clothing in the United States during the last 20 years. While the manufacture of ready-made clothing is one of the large industries in the United States, this industry is of comparatively small importance in other countries.

The above facts hold true to-day, and the domestic clothing manufacturer has practically no competition from abroad; not only that but for many years exports of clothing has been larger than imports. Under these circumstances it is difficult to see how a high duty on clothing can be justified.

Yet, let us see what this bill does. We will take as a basis a £4 suit of clothes invoiced from abroad at a price equivalent in exchange value to $29.53 and sold to the consumer in this country at $75 (vide Valuation Investigation Report made by the Secretary of the Treasury in 1921).

The duties under different acts and proposed bills would be as follows:

	Specific and ad valorem duties.	Total duty per suit.	Equivalent ad valorem.
			Per cent.
Act of 1909	4 pounds at 44 cents plus 60 per cent of $29.53.	$19.48	66
Act of 1913	4 pounds at 44 cents plus 35 per cent of $29.53.	10.34	35
Emergency act	4 pounds at 45 cents plus 35 per cent of $29.53.	12.14	41
H. R. 7456 [1]	4 pounds at 36 cents plus 30 per cent of $75.00.	23.94	81
Senate bill	4 pounds at 49 cents plus 55 per cent of $29.53.	18.20	62

[1] Note the effect of the foreign valuation plan, as a basis for levying duties as provided in the House bill, in increasing protection.

The wholesale price of the comparable domestic suit, better tailored, although not of as good cloth, is stated in the report to have been $32.50; this probably retailed to the consumer at $50. The fact that the consumer was willing to pay $75 for a foreign suit as against $50 for a comparable domestic suit shows that foreign clothes are sold on a basis of quality or preference and do not undersell the domestic.

Mr. SMOOT. What the Senator has said does not, of course, apply to tailor-made clothing in the United States, and those who produce such clothing are the ones who are most vitally interested in this paragraph, as the Senator knows.

Mr. WALSH of Massachusetts. As the Senator has stated, the large clothing manufacturers entertain the view I have expressed. There are some tailoring establishments, I believe, which claim that this duty is necessary. We have developed a considerable export business in ready-made clothing; but, of course, it will all be over now. The increase of the duty upon raw wool will end all our export clothing business. Nobody claims that it will be retained.

Mr. SIMMONS. Mr. President, I beg the Senator's pardon, but will he yield to me?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from North Carolina?

Mr. WALSH of Massachusetts. I yield.

Mr. SIMMONS. The Senator from Massachusetts has made a very important statement and one which I think is striking. With the high duties on raw wool I do not think it possible that our manufacturers of clothing will be able to compete in foreign markets in the sale of their products. Can the Senator furnish us information as to the amount of the exports of clothing?

Mr. WALSH of Massachusetts. I can do so directly, but I can not at this moment. I shall, however, be glad to do so later.

Mr. SIMMONS. I think it will be very well to put that into the RECORD in order that it may appear there.

Mr. President, as long as the clothing industry is competitive these protective duties are not likely to be effective to the full amount; but it is an invitation to form combines and direct the clothing industry of this country toward a monopoly. There is really an invitation extended upon the part of the Government to an industry like the clothing industry, where such heavy duties are levied, to form a monopoly. Why? These duties shut out whatever foreign competition may threaten to come in. The only thing that prevents them from being totally effective in the home market is the home competition; so that any financiers who possess the real spirit of greed, and who seek an opportunity to make great profits, can very easily figure out how, by a consolidation of the clothing industry in this country, they can make these duties absolutely effective, and the manufacturer of clothing can increase his prices up to the very high tariff wall levied in this bill.

It is only fair to say that the duties levied upon the material which goes into the making of suits and clothing have been very greatly increased; but that does not affect the tariff. It will affect the price to the American consumer; and I want to call attention to the extent to which this industry has had its burdens increased by reasons of the duties imposed in other sections of this bill upon the materials used in the manufacture of clothing.

The per cent of increase over the Underwood law on wool cloth valued at not over 60 cents a pound is 230 per cent.

The per cent of increase over the Underwood law on wool cloth valued at from 61 to 80 cents a pound is 207 per cent.

The per cent of increase over the Underwood law on wool cloth valued at from 81 cents to $1.50 per pound is 180 per cent.

The per cent of increase over the Underwood law on wool cloth valued at over $1.50 per pound is 130 per cent.

In the case of cotton linings the increase over the Underwood law is 64 per cent.

In the case of silk used for linings the increase over the Underwood law is 12 per cent. Once more the rich, who use silk lining, are favored with a small increase in duty.

On trimmings and buttons the increase is 250 per cent.

On haircloth the increase is 216 per cent.

On canvas padding the increase is 100 per cent on one kind and on another kind 57 per cent.

On cotton thread the increase is 133 per cent.

Summing it all up, on these four chief classes the duty is increased more than 200 per cent, on five from 100 to 200 per cent, on two more than 50 per cent, and on two less than 50 per cent.

It would be a very serious matter if these duties—which, of course, will be effective to the clothing manufacturer—were levied at the high rates named here. If we had importations of clothing it would destroy the business, of course; but there are no importations. No matter what the duty is that is levied upon the material that goes into the finished product of the manufacturer, all he has to do is to charge it up to the consumer. There is not any doubt whatever but that there is going to be a substantial increase in the price of clothing, regardless of this protective duty upon clothing, by reason of the duty upon raw wool and the duty upon the various materials which go into the making of clothing. In fact, the great problem with the clothing people is the duty on raw wool. They appreciate that and they know that the production of clothing depends upon the price of clothing, and they know that they must produce clothing at popular prices in order to supply the American demand, and that the production decreases as the cost of clothing increases.

So they are opposing these duties upon raw wool and these duties upon the materials which go into the finished product, because they say it will lessen the production in America because it will increase the prices of clothing, and it will destroy

whatever foreign business the clothing industry has been able to develop.

I am putting into the RECORD, at the suggestion of the Senator from North Carolina, the figures of the exports and imports of woolen wearing apparel, not knit.

For the year 1918 our imports amounted to $4,894,000, and our exports to $4,239,262. Of course, that was a war year, and it is not a good basis of comparison.

In 1919 our imports amounted to $1,425,890, and our exports to $14,665,069.

In 1920 the imports amounted to $5,011,135, and the exports to $8,160,416.

In the year 1921, which was the year when the industry was very much depressed, the imports amounted to $3,201,582 and the exports to $3,296,490.

In normal years the exports are very much larger than the imports, and the imports, anyway, are specialties, which do not compete with the clothes made by the clothing industry. They may compete with the clothes made by American tailors; and I think the American tailors may be demanding high duties, because they claim that a large number of well-to-do go to Europe and have their clothes made there, and that when they bring their clothes into this country they should be compelled to pay the high duties named in this bill. But so far as the great clothing industry is concerned there is no tariff problem involved here, and I do not believe they want any protection. They do want cheap wool, and they are protesting strongly against the 33 per cent duty on wool per clean pound. If you want to make clothing cheap give the clothing industry a free and unrestricted wool market.

Mr. SMOOT. Mr. President, I think the Senator is right when he says that the ready-made clothing in the United States, manufactured in Baltimore, New York, and Cincinnati—they being the great centers of the ready-made clothing industry—would not require 50 per cent protection. I freely grant that. But there is not a tailoring establishment in the United States that does not claim now that their business is greatly affected by the 50 per cent rate. I do not care what duty is levied on those Americans who go over to Europe once a year and have their clothing made there, because of some style of cloth or style of make, to ape the English dude. When a man goes from here over there and has his clothes made I do not care whether he pays 50 per cent, 60 per cent, or 75 per cent.

The importations under this paragraph are of specialties, just as the Senator from Massachusetts has said. Under the rates named in this paragraph those valued at not more than $2 per pound bear an equivalent ad valorem of 53 per cent; valued at more than $2 and not more than $3, the equivalent ad valorem is 53 per cent; and valued at more than $4, the equivalent ad valorem is 62 per cent. I think the Senator from Massachusetts gave the same figures. The equivalent ad valorem in the Payne-Aldrich law was 77 and 86 per cent.

As far as the committee was concerned in drafting the paragraph, they thought that as long as those overcoats and suits are made for parties who go abroad, and do not think that any suit made in the United States is good enough for them, I am not crying about the duty they shall pay.

Mr. SIMMONS. Mr. President, it is not my purpose to enter into any specific discussion of this particular paragraph. However, I want to give my full and hearty indorsement to the position taken by the Senator from Massachusetts [Mr. WALSH] with reference to the situation which will undoubtedly develop speedily, if it has not already been accomplished, with reference to the monopolization of this industry of making clothes in this country.

In connection with all of this business, I think we have given too little attention to the fact that many of the industries to which high protection has been given are already to a very large extent consolidated and under single control, at least as far as is necessary to enable them to substantially regulate the prices of their products.

Mr. SMOOT. That is not the case in this business.

Mr. SIMMONS. I am speaking generally now. When that happens in this country with reference to a particular industry all the fundamental reasons which have heretofore been assigned by the Republican Party and the champions of protection in its behalf seem to my mind to vanish.

In my studies of the tariff question I have been taught to understand that the Republican theory of tariff protection was based upon the fundamental principle that, so far as the consumer was concerned, he would be protected against excessive and unreasonable prices by domestic competition, and while, in the first instance, prices might be advanced as the result of protection, it would tend to the establishment of the industry in this country to the point where it could supply the domestic demand, and that under the operation of the law of supply and demand prices would be kept down to reasonable and fair margins of profit.

If there is domestic monopoly none of those things for the protection of the consumer will happen. He will be absolutely at the mercy of the combination which fixes the prices, and those prices can be established by them as high as their avarice may dictate, up to the point where foreign competition would be invited if they were advanced any further.

In that condition it has seemed to me that there was no logical or economic basis upon which we could levy a protective duty upon such a product without at the same time doing a rank injustice to the domestic consumers of that product. I am simply making these general observations for the purpose of fortifying, in the main, the idea which was in the mind of the Senator from Massachusetts when he was applying this principle to the paragraph now in hand.

With reference to this clothing situation, I want to say that this paragraph is a pretty far-reaching one. It applies, as its language imports, to "clothing and articles of wearing apparel of every description, not knit or crocheted, wholly or in chief value of wool," so that it may be said, speaking generally, that the rates carried in this paragraph are the taxes which this bill imposes upon the wool clothing of the people. It embraces all woolen articles of apparel "not knit or crocheted."

It is a very serious matter to artificially and by legislation advance the price of the wool clothing of the people. Taking our country as a whole, it has during certain seasons of the year a rather hard climate. There is no apparel at all suited to the conditions which environ us in this country which will answer the requirements of the rigors of winter except wool. These articles are as necessary to the poor as they are to the rich. They are not only necessary to the comfort of every human being in the United States, outside, possibly, of a narrow strip on our southern coast, but they are equally necessary to the preservation of a high standard of physical condition and health of the people. There is no substitute for wool. It is as much a necessity, therefore, as the food we eat, and as that character of food with which we can not dispense.

In those conditions, especially when we take into consideration the distress of a very large element of our people just at this time, to deliberately and by the exercise of a function of government arbitrarily increase the prices of woolen clothes in this country to the extent these duties will necessarily increase them seems to me to be little short of an outrage.

Now there is no contention that the woolen industry in this country is in its infancy. There is no contention that the woolen industry in this country is not well established and needs further expansion in order to enable it to supply the domestic demand. It is admittedly an old industry. It is admittedly an established industry of sufficient size not only to supply the domestic requirements but to supply with its surplus other markets to a large extent.

It is also charged and generally believed that there is no industry in the country more closely consolidated, in which the prices are more arbitrarily adjusted by the different manufacturers by reason of combination of interests, than in the woolen industry. So that there would seem to be no argument, based upon tariff protection, that would apply to the industry, and no hope for the consumer of wool products through domestic competition, and therefore if foreign competition is excluded there is nothing to restrain the avarice of the producer from charging whatever price he may see fit to charge.

In these circumstances it is proposed to impose—for the purposes of protection, not compensation on account of the wool duties, but for purposes of protection, a duty of 50 per cent—55 per cent in the original bill, but very graciously, under pressure, reduced by the committee to 50 per cent. That can have but one meaning in the world, and that is—under the circumstances which now exist—to enormously increase the price of wool. The present law for all purposes of legitimate protection seems to have been effective. It imposes a rate of 35 per cent. It has excluded the foreign product. Yet we are asked to increase that rate to 50 per cent. I grant, if we are going to put a rate of 33 cents per pound on raw wool, that outside and independent of any question of protection the woolen manufacturer would be entitled to a rate that is equivalent by way of compensation.

Now in connection with these general remarks I want to read a letter. It relates to the effect of these rates in increasing the cost of a suit of clothes. There has been considerable controversy on the floor with reference to whether these increases over the present rate will increase the price of clothing and to what extent, if any, it will increase those prices. This letter contains a calculation with reference to that matter and

leaves out the question of whether there is a difference between the emergency rate on raw wool and the rate in the proposed bill on raw wool. His calculation is based upon the increase in the protective rate, excepting the rates in the emergency law and the proposed rates in the pending bill on raw wool as not specially affecting the profits.

The letter is addressed to the Hon. REED SMOOT. It is dated July 14, 1922, and is written by Edgar B. Walters, manufacturers' agent, Broadway and Twenty-third Street, Bartholdi Building, New York City, N. Y. The Senator from Utah has not seen fit to put the letter in the RECORD, and as a copy of it was sent to me I take the liberty of doing so myself. The letter reads:

JULY 14, 1922.

Hon. REED SMOOT,
Committee on Finance, United States Senate,
Washington, D. C.

DEAR SIR: According to recent press reports, you are quoted as having said:

"The proposed rates in the Fordney-McCumber tariff bill will not result in an increase in the price of clothing to the consumer."

And again:

"Whatever changes are made in the woolen schedule will be very slight, perhaps 5 per cent on woolen cloth."

I trust you will pardon me for calling your attention to paragraph 1116—

That is the paragraph with which we are dealing now—

page 152, in the proposed bill, which reads as follows:

"Clothing and wearing apparel of every description, not knit or crocheted, wholly or in chief value of wool * * * valued at more than $4 per pound—

He is taking the $4 cloth for purposes of comparison—

$0.49 per pound and 55 per cent ad valorem."

Does this not provide for an increased cost on clothing over the rates now in effect?

As an example: A man's suit now costing $20, foreign value, weight 4½ to 4¾ pounds, would under these rates cost as follows:

Foreign cost	$20.00
Weight duty ($0.49 per pound)	2.33
Ad valorem duty (55 per cent)	11.00

He is taking the rate as proposed in the original Senate committee amendment—

Carrying charges, marine insurance, and duty on container	$1.67
Total cost	35.00

That is, the present market.

Under the present tariff laws the same suit costs as follows:

Foreign cost	$20.00
Emergency law, weight duty $0.45 per pound	2.14
Ad valorem duty (35 per cent)	7.00
Carrying charges, marine insurance, and duty on container	1.59
Total cost	30.73

Now, that is simply applying the additional protective rate, the difference between 35 per cent per pound and 55 per cent per pound. The difference in the compensatory rate as provided in the emergency law and the present bill as applied to this article would only be the difference between $2.33 under the bill and $2.14 under the emergency tariff law, or a difference of 19 cents, a negligible matter. I am leaving that out of consideration. The writer concludes:

Or $4.27 less than the proposed rate on a $20 suit.

That calculation seems to me to be perfectly straight. He takes a suit costing the same price abroad, and he figures what it would cost under the rates of the pending bill and what it would cost under the rates of the present law, regarding the emergency tariff law as in force.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from North Carolina yield to the Senator from Utah?

Mr. SIMMONS. If the Senator will allow me to finish the reading of the letter, then I shall be glad to yield.

I continue reading:

I have had many years' experience as selling agent for both domestic and foreign manufacturers of ready-made clothing, and am at present representing both American and foreign manufacturers. I may also say I am the American purchasing agent for foreign manufacturers and am therefore an exporter as well as an importer.

Remember, this letter was written to the Senator from Utah [Mr. SMOOT].

I shall be pleased to place at your disposal such evidence as I have and which I believe will show that not only are the present rates, 35 per cent ad valorem and 45 cents per pound on ready-made clothing, fully protective, but that they are almost prohibitive.

England is the only country in the world equipped to do any business in this market in men's clothing, and at present the average suit of American make, $25 wholesale selling price, can not be produced there, of comparable workmanship and finish, at less than $20.50, wholesale selling price, even at the present depreciated rate of exchange.

I have not heard it said that the American clothing manufacturers had asked for an increase in the present rates. On the other hand, it is generally conceded that no country in the world has developed the ready-to-wear industry on such a scale as has been done here. In fact, the American manufacturers are at present selling goods in England and other foreign countries because of their superior methods of production and distribution.

I am convinced that the present tariff on clothing affords more protection than is necessary and should be materially reduced. I do not believe a tax of $15 on a $20 suit, as proposed, can be defended on any grounds.

Yours faithfully, ——— ———.

The original of the letter was doubtlessly signed by Edgar B. Walters.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Utah?

Mr. SIMMONS. I yield.

Mr. SMOOT. I find it a physical impossibility for me to answer the thousands of letters which I have received from all over the country. Every moment of my time from early in the morning until late at night is occupied in connection with the work on the tariff bill. I can, however, pick out here now a few of the articles in this schedule which carry a higher rate of duty than under the existing law with its rate of 45 cents. I was speaking of the cloth schedule generally. I also at the same time stated that the equivalent ad valorem upon all cloths—and that is what we were discussing, and not suits of clothes—would be reduced 5 per cent from the rates which had been reported to the Senate.

I made that statement and followed it with the inquiry as to why there were 107,000,000 pounds of wool lying in bond in the different ports of entry in the United States. Mr. Walters ought to have known why. Every woolen manufacturer knows why. It is because of the fact that the rates provided in the pending bill are lower than those which are imposed in the emergency tariff law. He makes his case out on the basis that the rates in the pending bill will be higher. The woolen manufacturers are not so silly that they would hold wool in bond waiting for a bill to be passed the duties imposed by which would be higher than those which are provided for in the existing law. I am speaking now of the emergency tariff law. The statement I have made is a complete answer to Mr. Walters's contention, I will say to the Senator from North Carolina.

Mr. SIMMONS. I beg the Senator's pardon. I did not hear the last suggestion he made. As I understand, he is speaking about the emergency tariff law, and I did not catch the point.

Mr. SMOOT. Then I shall have to repeat to the Senator what I said.

Mr. SIMMONS. Mr. Walters estimated on the basis of the 35 per cent ad valorem rate of the emergency tariff law.

Mr. SMOOT. But he has only taken into consideration the face of the rates on the scoured basis. He has not taken what the actual result would be.

Mr. SIMMONS. I think the Senator from Utah must misunderstand the matter. In his calculations he includes upon a suit of clothes purchased after the passage of this act the "weight duty" of 49 cents per pound, which is $2.33. Then in his calculation of the cost under the present law he includes 45 cents per pound weight duty. Suppose he had computed on a basis of $2.33 in both cases, it would have affected the result to the extent of 19 cents.

Mr. SMOOT. But it would be even worse than that, I will say to the Senator, because of the effect of the skirting clause. The importers are bringing in here the wools that go into suits and are holding them in bond because, notwithstanding this bill provides 33 cents on scoured wool, the rate is lower than the 45 cents on the scoured content provided for in the emergency tariff act, which is now in effect.

Mr. SIMMONS. I think, Mr. President, when the Senator from Utah reads the calculation which is made here he will see that of the $4.27 increase in the cost of an imported suit——

Mr. SMOOT. The Senator did not hear what I said.

In the first place, I can pick items in the pending bill and figure them out so that the rate would be more than the present law, but I was talking at the time the quotations were made about the cloth paragraphs. That is what I had reference to. I also stated at the same time that on those paragraphs the rate would be cut 5 per cent. I think I made that statement in answer to a question which was then asked by the Senator from North Carolina.

Mr. SIMMONS. Yes; the rates were cut 5 per cent this morning; but, of course, that would have to be taken into consideration in the calculation as to the difference of $4.27, because that reduction has been made since the letter was written.

Mr. SMOOT. Yes; I know the letter is based upon the rate that was in the bill at the time it was written, which was 55 per cent; but comparing this schedule from beginning to

end with the emergency tariff rates, considering the skirting provision in that law—I do not say that it would be so without that provision, but with the skirting provision—and the decision made by the Treasury Department, the rates now proposed will be found to be less than they are in the emergency tariff act.

Mr. SIMMONS. I am not discussing the general question now, but in the calculation made in this letter the difference in the weight duty as now proposed and that of the emergency tariff act is only 19 cents.

Mr. SMOOT. Mr. President——

Mr. SIMMONS. Let me finish. Eliminate that, and it would leave $4.08 as the increased cost of the suit of clothes by reason of the increase in the rate from 45 per cent to 55 per cent. Of course, when that is cut down 5 per cent, as has been done this morning, and only this morning, that has to be deducted from the total additional cost.

Mr. SMOOT. The Senator has time to answer the letter, and if I can get time I will answer it; but I have not had time to do so up until now. I will call the writer's attention to the fact that there are a number of other articles as to which he could make a similar contention.

Mr. SIMMONS. He invites the Senator from Utah to write him.

Mr. SMOOT. I have not had time to do so. When I have the time I will answer the letter. I can not answer all the letters received by me. I should like to see any human being, I do not care who he is, answer all the letters that I get in reference to the tariff bill and in addition do the other work which falls to me. The man who could do that does not live.

Mr. SIMMONS. I am not complaining of the Senator from Utah not answering the letter, but I am complaining that I do not think the Senator quite understands the nature of the calculation made by the writer of the letter. The calculation is a very simple one, and I do not think the result attained can be questioned. The writer is a man who professes not only to be an importer but to know what he is talking about, and also to be an exporter; and he professes to have a general knowledge of the wool business. He states that the proposed increases in rates are not needed; that the industry is amply protected, and overprotected, now; and that there is no necessity for adding $4.27 to the cost of a $20 suit of clothes, making a differential on account of the tariff, in round numbers, of $15 on a $20 suit of clothes.

Mr. President, Senators may talk about this rate adding so much and that rate adding so much, but if they will add the 55 per cent rate and the compensatory rate, just what this gentleman says will be found to be true, that a $20 suit of clothes made in Great Britain when it is sold in this market will cost the purchaser $35, or $15 more than the original cost of production.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. SIMMONS. I yield.

Mr. WALSH of Massachusetts. While the Senator has been talking I was called out of the Chamber by a gentleman who has been following the wool schedule with much interest, and who informed me that he went to his tailor this morning and found him very gloomy and depressed. The tailor showed him some samples which had just come in, and advised him that in one case cloth which last season cost $1.50 a yard this year was costing him $2.50 a yard; that another sample that cost him last season $3 a yard was costing this year $4.50 a yard; and that another sample which cost $4 a yard last season was costing him nearly $7 a yard this year. The high duties of the emergency tariff law are becoming effective in increasing prices. That fact, together with the knowledge that the rates are to be increased by the pending bill, have resulted in increasing the prices of woolen cloth and dress goods almost 100 per cent when they get into the hands of the tailor.

Mr. SMOOT. Did the Senator ask that tailor what he charged for a suit of clothes?

Mr. WALSH of Massachusetts. I did not talk with the tailor, but with a gentleman who had been to the tailor and who repeated what the tailor had told him.

Mr. SMOOT. Of course, the tailor will say that; but, on his own statement, on the basis of three yards and a half of cloth for a suit of clothes, the cloth at $2 will cost $7, but what will the tailor charge for the whole suit?

Mr. WALSH of Massachusetts. The Senator misunderstood me. The tailor showed the gentleman to whom I have referred some samples and said, "Here is a sample which came in this morning of goods which last season cost $1.50 a yard and now they are asking for it $2.75 a yard." Then he took other samples and showed similar increases.

Mr. SIMMONS. Mr. President, it is clear that this issue can not be evaded by injecting charges as to profiteering on the part of the tailors. That is not the question we are discussing here to-day. We are discussing the effect of the proposed tariff rates upon cloth and clothing, if I may speak in the language and fashion of my good friend, the junior Senator from Idaho [Mr. GOODING].

Mr. WALSH of Massachusetts. Our friend from Utah appreciates that it is very popular to abuse profiteers, especially tailors and retailers.

Mr. SIMMONS. But that is not the question here.

Mr. SMOOT. I am going to ask the Senator from Massachusetts a direct question. Does he think, if there were an advance of 50 cents a yard in the price of the cloth, there being 3½ yards in a suit of clothes, the total increased price amounting to $1.75, that the tailor would add the $1.75 to the suit of clothes?

Mr. WALSH of Massachusetts. I do not know that I understand the Senator.

Mr. SIMMONS. Let me ask the Senator from Utah a question. Does the Senator from Utah think that because the tailor charges an excessive price for his work that we ought to charge all the people of this country excessive prices for their cloth to be transferred through the wholesale merchant or through the retail merchant or through the tailor to the consumer? Does he think that is any excuse for what we are doing here?

Mr. SMOOT. That is not the point at all.

Mr. SIMMONS. That is merely aggravating it. We become then a party to the profiteering when we do that.

Mr. SMOOT. No, Mr. President——

Mr. SIMMONS. When the United States Senate undertakes to excuse itself for adding enormously to the cost of the basic material, upon the ground that the tailor who makes the goods into clothes or the manufacturer who manufactures them or the retail merchant or the wholesale merchant who sells them adds an unconsionable profit, then the Senate of the United States is saying that because these people are doing these outrageous things the great Government of the United States ought to put itself behind them and do likewise.

Mr. SMOOT. That is not the question at all.

Mr. WALSH of Massachusetts. The Senator's argument has been that the manufacturers and retailers and wholesalers will "get theirs" anyway, and therefore he does not think any of these increases will be reflected. The Senator from North Carolina very strikingly calls attention to the fact that that does not justify us in increasing these duties.

Mr. SMOOT. No; I think when a tailor charges $145 for a suit of clothes that $1.75 will make no difference whatever. That is what I think, and I think it in all sincerity. I say take it out of the people who charge exorbitant prices for clothes and let it go into the Treasury of the United States.

Mr. WALSH of Massachusetts. Mr. President, when the Senator was in the wool-manufacturing business and the price of any of his raw material was increased, did he not increase the price of the finished product?

Mr. SMOOT. Sometimes that may be done and sometimes it may not be done.

Mr. WALSH of Massachusetts. And did not the Senator in fixing the price upon the finished product estimate what each bit of the material that went into that finished product cost him, and what the labor cost was, and what the overhead charges were? Therefore does he mean to say it does not make any difference whether the material that goes into the finished product increases in price or decreases in price?

Mr. SMOOT. Sometimes conditions are such that that can not be helped. Naturally what the Senator suggests would be the orderly way and the business way to do; but I have seen it happen many a time when no advantage could be taken of such conditions. There is not a manufacturer in the world who has not found himself in the same position.

Mr. WALSH of Massachusetts. The Senator will agree with me that in ninety-nine cases out of one hundred an increase in the price of the raw material will increase the price of the finished product and a decrease in the price of the raw material ought to, if the usual laws of business honesty are applied, result in a decrease in the price of the finished product.

Mr. SMOOT. Yes; wherever there is competition, there is no doubt that is true.

Mr. SIMMONS. Not only is that so, but any increase made at the bottom is carried forward, and a similar increase is made by everybody who handles the goods. The Senator from Utah

now says that some who charge excessive rates overlook a little item like this; that they do not charge any more for their goods because of it than they otherwise would charge; that they would charge the same whether the cloth costs a high price or a lower price; and, therefore, he says, let us make these profiteers pay this into the Treasury.

Mr. President, if that argument were sound there might be some sense in it, but that argument is not sound. A tailor, like everybody else that is dealing in merchandise, is going to add the cost of his material, if that cost is increased, to his price; and the result will be, in the last analysis, that the profiteer, who the Senator from Utah thinks is able to pay this money and thinks we ought to make him pay it and let it go into the Treasury, will not pay it, but the victim of his profiteering will pay it. The victim is the final consumer, who has to bear the whole load of accumulated costs, starting with the original cost of production with the duties added, with all the freights and other items of expense added to the raw cloth; and then, when the manufacturer buys the wool, if it is wool, that increase is added, and the manufacturer of the cloth adds a profit on account of that additional cost. It has to pay its per cent of it, just as much as the cost of the article without the duty. There is, therefore, a profit laid upon the duty by the manufacturer. Then, when he sells it to the wholesaler, the wholesaler carries forward to the profit and adds a commission to it by way of compensation for his handling it. When it comes to the clothier, his cost is added up and a profit is added to that; and so it goes on and on until it reaches the final consumer. Everybody who is handling it has added to the cost, and then added a profit to himself because of that initial cost. The Senator will understand what I mean. I will not digress.

Mr. WALSH of Massachusetts. Mr. President, I wonder if the Senator has been impressed as he studied this paragraph with what a wonderful invitation has been extended here to drive the clothing industry of this country into a monopoly. Here is a great, big industry that has grown very rapidly. It has a tremendous output, and through the levying of high protective duty all foreign competition is shut off. The high duties levied here are not effective in full at present, because of the very sharp domestic competition. It is almost an invitation, it seems to me, to have these great clothing industries come together, upon the assurance and the promise that the moment they stifle domestic competition they will be able to raise the prices of clothing to the height of the tariff wall that we are setting up here.

I do not know of any other case where Congress has practically said, "Gentlemen, if you have greedy inclinations, if you want to make money, if you want to get the full effect of the protection that we are giving you, go out and form a combine. We have said that we will protect you from foreign competition, and we have left you in the position to take care of the domestic competition." As soon as the clothing manufacturers get together these duties will be effective to the last dollar. It is almost a command from Congress to combine, organize, and form a monopoly to strangle the American people with any prices they may choose.

Mr. SIMMONS. Mr. President, does the Senator doubt for a minute that if this bill is passed the process of monopolizing the industries of this country will go on at a breakneck pace at once?

Mr. WALSH of Massachusetts. Why, that is the next step in the economic development following the imposition of high protective duties. It is the necessary step that industry will take to increase its profits. The first step we are taking here, shutting out foreign competition, saying, "Nobody from abroad will influence you in fixing whatever price you see fit. It is up to you so to arrange the prices in this industry in this country that you may not suffer too much from domestic competition." Of course, that is encouraging monopolies, and I pointed out that that is what has happened already in the woolen industry. As we have shown, the little manufacturing units of woolen cloths have all disappeared. The 4,000 little woolen mills that dotted the land 40 years ago have been reduced to less than 1,000. Of course, in part this may be due to the policy of centralization, but I sincerely believe that these high protective tariff duties have had a tendency to organize the woolen industry into a monopoly; and the same thing, in my opinion, is going to happen in the clothing industry.

Mr. SMOOT. Mr. President, notwithstanding all that has been said, the Senator from Massachusetts and I agree that the cloths that are imported under paragraph 1116 to-day are novelties, used by people who want English cloths rather than American cloths, and by people who want an English overcoat rather than an American overcoat. As far as the ready-made clothing is concerned, that furnishes the clothing to the great mass of the people—98 per cent, I suppose, of the American people—the domestic manufacturers have to-day a monopoly of that trade, and I want to say that there is not any business in the United States that I know of where there is keener competition.

Take such houses as Hart, Schaffner & Marx, of Chicago; Kuh, Nathan & Fischer, of Chicago; Kuppenheimer & Co., of Chicago; Sonneborn & Co., of Baltimore; Kirschbaum & Co., of Philadelphia; and the manufacturers of Cincinnati, Ohio; I say that there is not a business in the United States where there is such keen competition. As far as the making of the clothes is concerned, they have the last word in America in the machinery, in the styles, and everything else connected with the clothing manufacture; but we have a certain number of citizens, including a lot of dudes, that do not want to wear an overcoat unless it is made in London. They do not want to wear a pair of pants unless they ape the ones worn in England. If Englishmen wear baggy pants, they have to wear baggy pants. I do not care if those people have to pay 50 per cent duty upon importations of that kind. That is what falls under this paragraph, and that is what the friend of the Senator who wrote this letter imports into this country, and he is more interested in his chances of importing that kind of goods than he is in selling any domestic product made anywhere in the United States.

Mr. SIMMONS. Mr. President, I have no doubt that there is in all lines of business in this country very sharp competition for customers; but there is a very great difference between competition for customers and competition in prices. It is competition in prices that I have been speaking about and that the Senator from Massachusetts has been speaking about.

Mr. President, I have here an article which appeared in the World's Work of August, 1922. It is written by Mr. Reuben A. Lewis, jr. It discusses the tariff question now before us in a very frank, a very candid, and so far as I can see a fairly unbiased manner, and throws a great deal of light upon a number of phases of this very important and interesting question. It is not long, and I am going to ask that it be published in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article is as follows:

[From the World's Work of August, 1922.]

A TARIFF TO RAISE THE COST OF LIVING—THE FORDNEY-MCCUMBER TARIFF THE HIGHEST PROTECTION EVER OFFERED—HOW AND WHERE IT WILL RAISE THE COST OF THE NECESSITIES OF LIFE TO AMERICAN CONSUMERS.

(By Reuben A. Lewis, jr.)

"A bill to raise the cost of living, to hamper foreign trade, and to retard the return of prosperity."

Such a title would be more appropriate for the Fordney-McCumber tariff than the pleasing and conventional platitudes with which the framers have sponsored it, "A bill to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes."

The tariff, in the making ever since the Republicans came into full power, has had a hard struggle for the spotlight. Long overshadowed by tax revision, treaties, and the soldiers' bonus, it has finally emerged from the cloister of the Senate Committee on Finance and has taken its place at the head of the administration's legislative program. With more than 2,000 proposed amendments, it would hardly be recognized as the same bill as that which passed the House of Representatives last summer. The famous American-valuation plan, which for the first time in our tariff history sought to base duties on the comparable domestic commodities instead of the foreign invoice price, has been discarded. The rates, so high that the bill was invested with the sobriquet of "Fordney's folly," have been shifted and changed helter-skelter. The more moderate views of the world's greatest deliberative body have been reflected in more conservative imposts. The free list, from which so many commodities were stricken, has regained some of its erstwhile items.

Although tempered by the sobering views of the more grizzled statesmen in the Senate, the tariff bill will stand out as the utmost in protection. The farmer, for the first time, has joined hands with the infant industries, the adolescent manufactures, and the venerable institutions of the land, appearing in the foreground of those whose continued existence is said to be threatened without the sheltering protection the dominant party has promised. While several of the more conservative members have counseled delay and the majority, to all appearances, is lacking in enthusiasm, the Republican machine has decided to press on to a conclusion. The one big push before adjournment is to pass the measure before repairing from Washington to the scenes of the fall political campaigns.

The tariff, shoved to the background in recent years by taxation as a reason for a change in administrations, will be one of the outstanding issues—perhaps the dominant issue—in the fall elections. Senator UNDERWOOD, the minority leader, early in May challenged the Republicans to make the tariff the issue upon which the electorate would be asked to pass judgment. While there has always been two schools of thought as to whether or not a protective tariff should be adopted at any time, it can hardly be gainsaid that there are compelling arguments to challenge the advisability of action now with world conditions still unsettled, no danger of a destructive flood of imports even faintly apparent, and the country industrially on the upgrade. Whole pages of protest indeed have been read into the CONGRESSIONAL RECORD from rock-ribbed Republican and independent newspapers inveighing against the tariff change as an ill-timed move. But with a foolish consistency not always the hobgoblin of the administration's best minds,

the majority, definitely committed to the adoption of a new tariff, has stumbled on toward something, which from this distance resembles a precipice more than it does a new prosperity.

Out of the welter of endless controversy one fact stands in splendid isolation. The rates in the McCumber bill, though measurably lower than those adopted by the House of Representatives last July, are higher than any ever enacted into law. Senator SIMMONS, the ranking minority member of the powerful Committee on Finance, has contended that the rates are 40 per cent above the level of those in the Payne-Aldrich bill. It is incontestably true that every one of the 14 schedules is higher than in the Underwood law. Compared with the high-water mark of protection as symbolized in the act of 1909, the rates on cotton goods, woolens, and textiles are, on the whole, lower. However, the metals schedule is markedly higher, silks are taxed as real luxuries, while duties on medicines and chemicals have soared to new heights. A selective embargo on dyes has been voted for the first year, with the condition that it may be continued for two years if the President, in his judgment, thinks the tariff wall must be kept up to protect the war-born industry.

An analysis of the pending bill reflects the changing and fluctuating conditions under which it was framed. While the underlying principle is that of protection, there does not seem to have been any orderly or scientific basis upon which the rates were determined. The Payne-Aldrich tariff, which President Taft admiringly described as the "best tariff ever," was founded upon the doctrine of equalizing the costs of production. The Underwood bill of 1913 was conceived to provide a "competitive tariff." The McCumber bill was designed to "afford protection to American industries and permit them to pay wages sufficient to enable our workmen to maintain an American standard of living; to maintain essential industries created as a result of the war and considered vital to the future industrial independence of the American people"; and "to protect the American market and preserve domestic competition and at the same time permit fair competition from other countries." In the quest of a happy descriptive term the supporters of this all-embracing bill have sought to give it the popular label of the "All-American tariff" because they contend that, for the first time, all sections of the Nation are given their share of protection.

The most extraordinary feature of the pending legislation is the provision adopted in response to President Harding's message for a way "to make for flexibility and elasticity so that rates may be adjusted to meet unusual and changing conditions which can not accurately be anticipated." Without a precedent, this administrative section endows the President with authority to increase duties on any commodities up to 50 per cent above the established rates; to transfer articles from the free list to the dutiable list; and to substitute a proclaimed American valuation for the foreign invoice value as a basis for levying duties. By investing the President with such wide powers, it is claimed that the tariff would be "removed from politics" because the Executive, before acting, would be guided by a painstaking study made by the nominally nonpartisan Tariff Commission. Inasmuch as this continues, instead of ends, the long assailed "tariff uncertainty," it will be adopted, if at all, only after a bitter and stubborn fight. The business interests of the country have taken none too kindly to the idea of this sword of Damocles dangling from the ceiling of the new tariff structure. So long as the Constitution provides that all bills for raising revenue shall originate in the House of Representatives and the party system survives, there seems to be little hope of escape from the situation where politics instead of ratiocinative processes determine what the rates of import duties shall be.

There are three distinct trends discernible in the bill—ad valorem rates have been replaced in innumerable instances by specific duties; the free list has been greatly reduced; custom duties have gone skyrocketing on two great classes of imports, agricultural products and manufactures, especially those which normally come from German and central European nations now having depreciated currencies.

But that which is more compelling in popular interest is the fact that materially higher rates are to be applied on the commonest necessities of life. American industries, reliant upon foreign markets for the absorption of their surplus, are concerned vitally with the new levies on raw materials. How is this going to affect the consumer's pocketbook? With dearer crude materials, how is the American manufacturer going to meet the competition in the foreign field?

While the tariff has been hailed as a wonder-working nostrum that may be expected to prevent the wage of the American workman from being lowered and at the same time guarantee the American manufacturer a materially higher return for his products, the minority is proclaiming that this era of superprotection will be created through a tax of billions laid on the backs of the consuming public. Indeed at the same time that Senator MCCUMBER was fervently informing his colleagues, "I do not think that this bill will raise the cost of living a dollar," Senator WALSH, Democrat, of Massachusetts, was estimating that the high duties, soaring beyond the notorious Payne-Aldrich bill, would add $21,000,000,000 annually to the cost of living. Inasmuch as the Nation's pay roll has been computed to be not more than $8,000,000,000 a year, it is reasonable to deduce that the truth lies somewhere between the two specious limits.

The cost of living is going up. The question is: How much?

Even the most meticulous survey of column upon column of rates, with their maze of ad valorems, specifics, and compounds affords little that is concrete to the popular mind. It is virtually impossible to estimate the extent in percentages the rates have advanced. The difficulty is that, in order to make any comparison, the base used must be ad valorem. In one bill there are ad valorem customs—say 10 per cent of the value of the import. In the other specific rates—assume 5 cents a yard—have been substituted. Compound rates, a combination of the two, further complicate the computation. In the process of conversion a definite valuation must be placed upon the article for which the duty is to be collected. While a precise contrast is perhaps desirable, it is such a precarious task that not even the Government's actuary or the Tariff Commission has ventured upon the hazardous estimate. Some rates are purely ornamental and meaningless. Others add a definite cost to the whole domestic consumption. So long as the inexorable law of supply and demand operates and industries gauge their prices with the idea of getting the maximum return, no one can definitely foresay what the results will be. The prophet walks on uncertain ground in this sphere, for higher tariff rates do not necessarily mean higher costs. When the emergency tariff act in 1921 raised the duty on sugar, one of the most staple articles, from 1 cent to 1.6 cents it declined to the lowest level in 30 years.

A measurable appreciation of what striking advances are destined to come, however, may be had by contrasting the hundreds of rates in the McCumber bill running above 40 per cent with the corresponding items of the present law. Pertinently relative is the fact that the average ad valorem duty, based upon imports actually brought in for consumption during 1921, was just 11.95 per cent. This represented an inflation over 6.49 per cent for the preceding year and 6.52 per cent for 1919. The increases, while not consistent with any rule, have been pretty general. Pointing out that the McCumber bill had doubled the rate on dolls and toys while providing an increase from 30 to 60 per cent on tombstones, Senator UNDERWOOD reminded the Senate that the Republican Party had placed a tax on everything from the cradle to the grave.

The essence of protective duties is that the price of the domestic supply will be raised by the amount of the customs levied on the imports. Perhaps there are no two staple commodities in normal times which have responded more faithfully to this rule than wool and sugar. The United States produces 300,000,000 pounds of wool and consumes more than 600,000,000 pounds. With wool free under the Underwood bill, the new Schedule 11—for the iniquitous letter K of the Payne-Aldrich tariff has been obliterated—provides for a duty of 33 cents a pound on scoured wool. Before the Senate started the debate on the wool schedule two advances had been marked up on all-wool fabrics by the largest American manufacturer.

To a people consuming 91.5 pounds per capita the price of sugar is not a small item in living costs. Of the four and a half million tons consumed annually, the domestic beet and sugar-cane industries contribute a bare 1,000,000 tons. The Philippines, Hawaii, Porto Rico, and the Virgin Islands, which are given the concession of sending in their output duty free, help satisfy the American sweet tooth, while Cuba, with a slight preferential over the full duty foreign supplies nearly half of the market demand. The cost of production in Cuba plus the duty more or less governs the price at which the consumer may purchase his sugar, so that there is a direct relation between what the American buyer pays and the duty that is fixed. Sugar and wool are the favorite exhibits of what a protective tariff costs because the reckoning is so simple. The same analogy might, however, be followed on a myriad of commodities, which must attribute part of their sales price to the tariff.

Here are the rates on foodstuffs:

	Payne-Aldrich.	Underwood.	Emergency.	Fordney-McCumber.
Wheat flour	25 per cent	45 cents 196-pound barrel.	20 per cent	78 cents hundredweight.
Corn meal, etc	40 cents 100 pounds	Free		30 cents hundred pounds.
Oatmeal, etc	1 cent pound	30 cents 100 pounds.		90 cents 100 pounds.
Fish, canned	30 per cent	15 to 25 per cent.		30 per cent.
Apples	25 cents bushel	10 cents bushel	30 cents bushel	30 cents bushel.
Plums and prunes	do	do		2 cents pound.
Lemons	1½ cents pound	½ cent pound		Do.
Walnuts, unshelled.	3 cents pound	2 cents pound		4 cents pound.
Potatoes, Irish	25 cents 60 pounds.	Free	25 cents 60 pounds.	58 cents 100 pounds.
Macaroni, etc	1 cent pound	1 cent pound		2 cents pound.
Cattle	$2 head to 27½ cents.	Free	30 per cent	1½ to 2 cents pound.
Fresh beef	1½ cents pound	do	2 cents pound	3½ cents pound.
Fresh pork	do	do	do	¾ cent pound.
Bacon and hams	4 cents pound	do	25 per cent	2 cents pound.
Milk, condensed or evaporated.	2 cents pound	do	2 cents pound	1 to 1¾ cents.
Butter	6 cents pound	2½ cents pound	6 cents pound	8 cents pound.
Cheese	do	20 per cent	23 per cent	5 cents pound to 25 per cent.
Poultry	5 cents pound	2 cents pound		6 cents pound.
Eggs	5 cents dozen	Free		8 cents dozen.
Almonds, unshelled.	4 cents pound	3 cents pound		5 cents pound.
Coconuts	Free	Free	Free	½ cent each.

The tariff, like other indirect taxes, is painless. It is interesting to speculate what would happen if the purchasers of imported commodities were required to pay directly out of their pockets the taxes, which in a pyramided form are passed on by the obliging middlemen. Suppose shops and stores tacked on to the bills, in just the same fashion that the erstwhile nuisance taxes were collected, imposts amounting to half of the sales price. Fancy what exclamations would come when sales prices of articles in common usage were swelled 50 per cent.

Here are some of the customs that are coming to revive that once far-heralded phrase the high cost of living:

ON ARTICLES OF WEARING APPAREL.

The McCumber duty, cotton, 60 per cent.
The McCumber duty, silk, 60 per cent.
The McCumber duty, woolen, from 40 cents plus 50 per cent to 40 cents plus 55 per cent a pound.

ON FABRICS AND CLOTHS.

The McCumber duty, cotton, 40 to 50 per cent.
The McCumber duty, silk, 55 per cent.
The McCumber duty, woolen, from 40 cents plus 50 per cent to 40 cents plus 55 per cent a pound.

In pre-war times there were large imports of cheap cotton stockings, gloves, and other wearing apparel that were absorbed by people of most moderate means. Now, by the dozen, the cheapest glove must pay a duty of $3, the lowest priced stocking 70 cents, and the coarsest undergarment a rate of 40 cents. Table, household, and kitchen utensils are assessed at 50 per cent of their value. The most common china is listed at 55 per cent. Knives, reflecting the meteoric rates in the cutlery schedule, that run as high as 400 per cent, are taxed at from 2 to 60 cents each plus 60 per cent ad valorem. Scissors must pay 10 cents plus 55 per cent a pair. The customs on clocks is half their value.

What a shock milady would suffer from head to foot when the milliner added 50 per cent on a trimmed straw hat from Paris, while the

perfumer tacked on 60 per cent for a whiff of lilac, the furrier made a simple addition of 50 per cent for a stole, and the bootery figured 60 per cent extra for a smart pair of shoes!

And thus it goes.

The conversation of the Nation is going to turn from "how dry it is" to "how high it is" unless all signs fail.

As the national mind goes beyond the 3-mile limit there is another consideration. The view that the world from an economic standpoint is indivisible is becoming more firmly fixed. The farmer has seen what it means when the purchasing power of the best customer for his surplus is impaired. The manufacturing industry, vastly overexpanded during the war-time boom, realizes that there must be a sharp contraction in its output unless a foreign market is found for this excess. There is nothing more patent, as long as exchange is the basis of world commerce, that we can not sell unless we buy.

In trade orientation the United States faces changed conditions. Before the World War the balance of trade ran from $50,000,000 to $60,000,000 a month against America. We were a debtor nation. With the war the golden tide turned. While Congress is engaged in the seemingly indeterminable debate as to how high the tariff wall should be raised, a reckoning shows that the allied Governments owe us $11,000,000,000. Secretary of Commerce Herbert Hoover estimates that American capital has poured its resources into foreign countries to the extent of $4,000,000,000 since the armistice. Even the most confirmed optimist in his dotage would scarcely expect all the Allies to refund their indebtedness under the restrictions laid down by Congress. Surely it is too much to hope for eventual repayment if we are to throw up barriers to trade at this stage and thereby lose the benefit of the increasing productivity of Europe.

So insistent and repeated has been the cry that we must increase our export trade that it would seem every stimulus would be given to effect such an end and every obstacle, as far as possible, removed. And yet there is one striking feature in the proposed tariff bill that is of more than passing consequence—the number of high duties that have been levied on raw materials. It would seem that the framers of the law had overlooked a pertinent truth. American foreign trade consists principally of three great classes of commodities—agricultural products, cotton, wheat, and grain; patented articles, typewriters, harvesting machinery, moderate-priced automobiles, and comparable products of inventive genius; and manufactured commodities. And yet raw materials from which these artitcles are fashioned have been lifted from the free list and placed on schedules where they must pay duty and enhance the cost of the finished product.

In many lines of manufacturing the United States outstrips the world. Yankee ingenuity, coupled with big-scale production, has enabled American industries to win what has promised to be a firm hold on certain widely distributed markets. The American shoe literally walks around the globe. This country, now the leading manufacturer of footwear, has wrested from Great Britain the rank of the first exporting nation. In 1920 the American factories sent out boots and shoes valued at $67,144,542. The decline in foreign purchasing power was reflected in a great drop in 1921. With Great Britain striving to regain her former position and other foreign nations importing the machinery which is largely responsible for American supremacy, it is manifest that the competition will become increasingly keen. At this juncture the McCumber bill proposes to transfer hides from the free list and thus insure higher costs of the raw materials which compose the heels and soles of shoes.

The gospel of cleanliness has been vastly aided by American soap, which has won reputation in the most distant lands. The toilet soap, as well as the household variety, has contributed to the balance of trade. There are four vegetable oils that enter largely into the production of this common necessity—those extracted from the soy bean, the coconut, the palm, and the cotton seed. Removed from the free list in the Underwood bill, these vegetable oils have been assessed handsomely. The soap industry supplies 99 per cent of the American consumption and produces more than $300,000,000 worth of these needed articles annually.

The expansion of the steel and iron industry during the last decade is one of the commercial epics. The amazing development of the automotive industry has created a new customer of vast proportions for the American plants, while the emergency shipbuilding program launched by the Shipping Board forced the mills to enlarge their activities. Before the war, when the Underwood tariff cut down the protective duties, the American steel and iron mills proved that they could produce these basic materials more cheaply than they could be imported. Profiting from the World War, the steel interests have reached out into the foreign markets and are entrenched for the struggle to hold on as Germany, Belgium, and Britain seek to regain their old customers. Of all the alloys used in the making of steel, ferromanganese is required in the largest quantity. Free under the Underwood law, a duty of $2.50 a ton is now proposed. Magnesite, an essential refractory, and virtually all of the other alloys which impart the various special qualities to high-grade steels, have been lifted from the free list and placed upon the swollen roster of dutiable commodities. The cargoes of steel and iron which have been dispatched from American ports have always constituted a respectable part of our foreign trade. Government records reveal that even in 1913 we exported approximately ten times as much in manufactures of steel and iron as the Nation imported. In 1920, for the third time, the volume surpassed the billion-dollar mark.

The automobile-tire industry is another example of how America has strode to the front. During 1920 the factories shipped more than $50,000,000 worth of tires abroad. A slump reduced the volume to sixteen millions last year. Here again, the tariff framers are making mischief. Of all the Egyptian long-staple cotton that comes into our ports about 80 per cent is consumed in the making of fabrics for tires. The agricultural bloc, led by the Arizona and California Senators, is demanding a duty of 7 cents a pound on Egypt's foremost offering to the United States and its abdication from the favored position previously accorded raw materials.

Another peculiar twist is observed in the machinery schedule. The national inventive genius has never glowed brightly enough to beat the English in the creation of textile machinery. It tops the import list. In order to obtain the novelties in design and manufacture, the American industry must bring in these patented machines regardless of cost. Singularly, the tariff rate is highest on this productive article through which our mills enjoy a wide overseas market for the finished goods.

And thus it goes with many of the other industries which have applied the spurs to their sides and have sought to speed past the barrier in the export race.

A mere scanning of the nature of our imports and exports serves to show the importance of our industries, sending out finished products to the world marts in competition with the other great exporting nations, not being burdened with dearer raw materials. Congress, imbued with a generous spirit that has a sardonic guise, has been consistent. Not only has it proposed high duties on the raw materials which we import but it has compensated by declaring that the finished products, which we export and do not import, must pay proportional rates.

The drawback, drafted to permit the manufacturer to escape the payment of customs on raw materials entering into exports, has striking, if not nullifying, imperfections. Even if full advantage were taken of this feature, it would afford only a partial restoration of duties, because the Government deducts at least 1 per cent. No allowance is made either for a return on the invested capital, frozen during the period of conversion from the crude to finished state. The rub is that only the actual importer can later claim the drawback, while the joker is that he must prove to the satisfaction of the Treasury that all of the imported raw materials entered directly into the goods shipped overseas.

The rigid inflexibility of the system ignores the fact that the manufacturer is seldom the agent through which the foreign sale is made and fails to take cognizance of the machinery that has been set up. Imagine the plight that an importer of manganese would have in gaining a drawback on watch springs! It is another fine theory shattered against the stern wall of business practice.

The cold figures of the Department of Commerce for 1921 reveal in significant divisions why duties on raw materials are a menace to our foreign trade:

Summary statement of imports and exports of merchandise.

Groups.	1921	
IMPORTS.		Per cent.
Free of duty:		
Crude materials for use in manufacturing	$747,812,561	47.87
Foodstuffs in crude condition, and food animals	260,362,031	16.66
Foodstuffs partly or wholly manufactured	53,960,736	3.45
Manufactures for further use in manufacturing	219,733,870	14.07
Manufactures ready for consumption	268,013,182	17.16
Miscellaneous	12,308,775	.79
Total free of duty	1,562,191,155	100.00
Dutiable:		
Crude materials for use in manufacturing	105,272,186	11.12
Foodstuffs in crude condition, and food animals	43,605,614	4.60
Foodstuffs partly or wholly manufactured	314,881,920	33.26
Manufactures for further use in manufacturing	124,238,064	13.13
Manufactures ready for consumption	350,913,970	37.06
Miscellaneous	7,862,494	.83
Total dutiable	946,834,248	100.00
Free and dutiable:		
Crude materials for use in manufacturing	853,084,747	34.01
Foodstuffs in crude condition, and food animals	303,967,645	12.12
Foodstuffs partly or wholly manufactured	368,842,656	14.70
Manufactures for further use in manufacturing	344,031,934	13.71
Manufactures ready for consumption	618,927,152	24.66
Miscellaneous	20,171,269	.80
Total imports of merchandise	2,509,025,403	100.00
Per cent of free		62.26
EXPORTS.		
Domestic:		
Crude materials for use in manufacturing	984,025,577	22.47
Foodstuffs in crude condition, and food animals	692,166,371	15.81
Foodstuffs partly or wholly manufactured	669,703,375	15.29
Manufactures for further use in manufacturing	399,879,573	9.13
Manufactures ready for consumption	1,625,401,862	37.12
Miscellaneous	7,846,972	.18
Total domestic	4,379,023,730	100.00
Foreign	106,098,966	.....
Total exports	4,485,122,696	.....
Excess of exports	1,976,097,293	.....

The object of the permanent tariff is to raise the prices at which American manufacturers sell their goods. While the sponsors of the legislation are frankly willing to admit that the bill will fail in its purposes unless these results are achieved, they are not so outspoken when questioned as to its effect upon the cost of living. Senator McCUMBER has declared that one of the chief objects is to prevent the industries from lowering the wages now paid to their workmen. Presenting statistics, which he claimed showed that wages were 105 per cent above the pre-war level while the manufacturers were selling their products at an advance of only 40 per cent, the successor to the mantle of the late Boies Penrose contended that only by enabling the manufacturers to get more for their goods could the high-wage scale survive. The debate in Congress thus far has been singularly devoid of predictions that the passage of the tariff bill will raise wages; on the other hand, there has been no denial that it will increase the costs of the most common necessaries of life at least when they pass from the plants of the manufacturers.

Thomas O. Marvin, chairman of the bipartisan United States Tariff Commission, holds to the view that the public will not bear the burden of these increased costs. Pointing to the wide differential between the price that the manufacturer gets for different commodities and the figure at which these are retailed, Mr. Marvin insists that this increment will be absorbed by the middlemen. "This bill is designed to raise the manufacturers' prices—not the retailers'," he explained. "The volume of trade that may accrue to American manufacturers by the most meager margin is far greater than supposed. It should be remembered that we consume from 90 to 96 per cent of all that we produce. If our industries are kept operating on a large scale the purchasing power of the workers is increased. With more demand, lower unit production costs will come. Thus the cost of manufactured articles may be lowered instead of raised."

Here is how Senator McCUMBER curiously explained how the protection to the inflated wage scale was to be applied without loss of the ineffable boon to the manufacturers:

"Let the manufacturer be satisfied with the most meager return on his investment for a while; then let the employees increase their efficiency to the highest possible degree. Then, if the retailer will just follow the manufacturer, the great American public, now hungry for more and better things, will give employment to all to supply its demand, and old-time prosperity will again reign throughout the land."

President Harding in one crisp sentence epitomized the administration's argument for tariff action: "I do not want to build up an industry abroad at the expense of one in this country."

While it would be heresy for any sponsor of the proposed tariff to say that it was for revenue only, the Treasury experts have estimated that a yield of at least $350,000,000 a year and perhaps $400,000,000 may be expected. This return will compare favorably with the $305,475,485 in receipts for 1921, $331,231,441 in 1920, and $249,774,758 in 1919. Unquestionably the higher rates will tend to keep out hundreds of commodities that are now being entered at American ports and will confine imports more rigorously to the necessities.

The minority, with an eye to the elections, has volubly and tenaciously protested the passage of key items in every important paragraph that has come up in debate. The majority, impatient to adjourn, has charged filibuster and needless delay. There is no smoke screen to conceal the fact that the tariff has become more and more the real issue between the two parties. Inasmuch as it seems likely at this time that the bill will hardly go into effect before the voters go to the polls there will be scant opportunity for even the closest observer to appraise its economic effects. Unless the champions of the two parties undergo a change of faith and complexion it seems likely the electorate will hear in one thunderous tone that this wonder-working act will restore with amazing alacrity the "old-time prosperity," while in another breath the ominous warning will be sounded of hastening ills and the empty dinner pail.

Like a grim specter on the field of battle rises the fact in political history that no party has ever revised the tariff and won the election in the same year. Little wonder that boots are quaking and hearts beating stoutly on the opposing sides of the Senate Chamber.

Mr. HITCHCOCK. Mr. President, I want to refer to what the Senator from Utah [Mr. SMOOT] said a few moments ago concerning the purchase of foreign cloths for men's clothes.

Mr. SMOOT. This paragraph covers clothing.

Mr. HITCHCOCK. Very well. I understand the Senator from Massachusetts to say—and I have verified it by asking him—that these were not British cloths nor British clothing that he was referring to, but American-made goods——

Mr. SMOOT. If it comes in as cloth, and is imported, it has to come from some other country.

Mr. HITCHCOCK. But that American-made goods that formerly were offered to the dealers in Washington for $2 a yard are now being offered as $3.50 a yard.

Mr. SMOOT. I think the Senator is mistaken.

Mr. WALSH of Massachusetts. I will send my friend up to try and get the samples and bring them here during the day.

Mr. SMOOT. I have the samples here.

Mr. HITCHCOCK. And that American-made woolens that were formerly offered at $3 are now offered at $5. The charge is not that people who import British goods are to be required to pay more, but that, because of the increase in the tariff, those who buy American goods are going to be assessed, upon every suit of clothing that they buy, a number of dollars; it is difficult to tell exactly how much. That is the charge. You are going to increase the cost of clothing for every man in the country as a result of these various increases.

Mr. WALSH of Massachusetts. The Senator agrees to that in part. He does not go as high as the Senator from North Carolina and I go. He agrees that there is going to be an increase.

Mr. SMOOT. Then the person who told the Senator about the increase was mistaken.

Mr. WALSH of Massachusetts. I have sent up to the tailor's, and I hope to have him back here before we finish this schedule.

Mr. SMOOT. I have the quotations here of the last week, with all of the prices—the price at the opening in February and the increased prices for every week after that; and the average, I will say to the Senator, is less than 13 per cent.

Mr. WALSH of Massachusetts. Those are manufacturers' prices.

Mr. SMOOT. Certainly.

Mr. WALSH of Massachusetts. I am talking about a gentleman who went into a Washington tailor's and had his samples brought out and produced to him this morning.

Mr. SMOOT. The Washington tailor does not sell the cloth to that man. The tailor buys his cloth from the manufacturer.

Mr. WALSH of Massachusetts. Exactly—from the jobber in New York, I suppose.

Mr. SMOOT. There is no necessity of it if he buys in quantities.

Mr. WALSH of Massachusetts. The Senator knows that no tailor buys from a manufacturer. He buys from a jobber.

Mr. SMOOT. Sometimes he buys from a jobber, and sometimes directly from the manufacturer.

Mr. WALSH of Massachusetts. Does the Senator mean to tell me that manufacturers sell yards of cloth to tailors?

Mr. SMOOT. Not yards of cloth, but bolts of cloth.

Mr. WALSH of Massachusetts. There is no tailor in Washington who does a large enough business to buy from a manufacturer.

Mr. SMOOT. Oh, yes; there is.

Mr. WALSH of Massachusetts. The clothing industry may buy from the woolen manufacturer, but the average tailor in a city like Washington buys from the jobber.

Mr. SMOOT. I can mention tailors that import directly from the manufacturer in England.

Mr. WALSH of Massachusetts. I am not talking about that. I am talking about the tailor here who uses domestic cloths. I say he buys from the jobber. The jobber sends him samples from New York, and he makes his selection.

Mr. SMOOT. No manufacturer cuts bolts of cloth up into suit lengths; but they do sell it by the bolt or by the 10-bolt or 100-bolt lots.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Kentucky?

Mr. HITCHCOCK. I yield to the Senator.

Mr. STANLEY. I will say to the Senator from Utah that I was under that impression, that tailors buy by the bolt almost universally. Suits of cloth are sold by the sample, and if the Senator will go to Washington tailors, for instance, and try to get a coat and two pairs of trousers of one piece of cloth, he will find that two-thirds of the samples they show are not sufficient to make two pairs of trousers with a coat. They are bought by the piece.

Mr. SMOOT. I do not know what tailor the Senator goes to, but I can take you to tailors in Washington, for instance, J. M. Stein & Co., or E. H. Snyder & Co., and the Senator will find bolts of cloth on their shelves.

Mr. STANLEY. I will not embarrass tailors by giving their names——

Mr. SMOOT. It is no embarrassment at all, because they will admit it themselves, and you can see the bolt of cloth on their shelves.

Mr. STANLEY. I was surprised at the number of tailors who did not have cloth enough of any pattern to even make into suits consisting of a coat and two pairs of trousers. These cloths come by the piece.

Mr. SMOOT. That may happen. They come both ways.

Mr. STANLEY. The bulk is bought from the jobber, I am sorry to say.

Mr. SMOOT. Whenever you have it cut it comes from the jobber.

Mr. STANLEY. There is one other question I want to ask the Senator, because he is an expert on this question and is candid in his answers, even though sometimes he has to testify against himself, unfortunately, on account of that candor.

Mr. SMOOT. If it is the truth, I would have to say it.

Mr. STANLEY. Yes; the Senator does, and I like to see him suffer, because I do not think the Senator enjoys telling the truth when it hurts an organization he loves, but he will do it, I will say that for him. I am not trying, however, to give him any pain now. Does the Senator mean to state that certain qualities of clothing, especially gents' furnishing goods, suitings, are made in this country in quantities of the same quality in which they are made in Great Britain without regard to the price?

Mr. SMOOT. Before I answer I want the Senator to repeat that question, because I did not follow him, as my attention was diverted.

Mr. STANLEY. There are a few mills in the country which produce a quality of clothing for the best suitings comparable to English cloth. I am under the impression—and the Senator knows better than I—that we do not produce in this country enough of that character of cloth—which is generally worn—either in texture or in the use of dyes that will wear, cloth that will not fade, as the English cloth will not fade.

Mr. SMOOT. There are a few mills in the United States which can make cloth just as fine as any mill in the world. The English cloths are supposed to be the best cloths made in the world, outside of the few which are made comparable to them in the United States, and the same cloths made in Germany are very nearly as good. But I want to say to the Senator that there is no laboring man who ever purchased a yard of that cloth.

Mr. STANLEY. That is true.

Mr. SMOOT. It is all made up by tailors and is not made into a ready-made suit. It is made for the Senator or for

somebody else who wants a suit made to fit him and is perfectly willing to pay the price.

Mr. STANLEY. That is what I am talking about, exactly. Suits which cost, say, from $100 to $150 are made of English cloth?

Mr. SMOOT. They are made many times of American cloth.

Mr. STANLEY. But as a rule?

Mr. SMOOT. I would not say as a rule. I think the best merchant tailors use perhaps 50–50 of the American cloth and the foreign cloth.

Mr. STANLEY. My information is that there is no American cloth of any great quantity which meets that demand. That is what I want to get at. Would we produce enough cloth of that character to supply the demand if we put an embargo on the English cloth?

Mr. SMOOT. We could produce all we use.

Mr. STANLEY. Do we?

Mr. SMOOT. No; we are not producing it to-day. It requires the most technical skill to put the proper finish on the cloth. It requires the very best of operators. It requires the finest of machinery, and it requires the very finest wool that can be grown in the world to make it.

Mr. STANLEY. Mr. W. C. P. Breckinridge, who, as I have said before, was the most versatile genius Kentucky ever sent to Congress, and had technical knowledge of all sorts, went very elaborately into this question some 25 years ago, and he produced statistics to show that this cloth could only be made by a certain character of operators; that we had not the apprentices, that we had not the technical manual skill to pull the wool, to produce this cloth in any great quantity.

Mr. SMOOT. It is not in the pulling of the wool; it is in the making and finishing of the cloth.

Mr. STANLEY. In the selection of the wool and in the finishing of the cloth. He said it was technical, like diamond cutting, and that if the English business was destroyed or an embargo were placed on it, in this country we had not, first, the wool, the technical operatives to pull it, or the technical operatives to manage the looms, and that it would be physically impossible to produce in any reasonable length of time that character of cloth, and that when we did we would simply have to import English labor; that with labor the necessary skill was not to be found here.

Mr. SMOOT. Of course, conditions are quite different now from what they were when Mr. Breckinridge made that statement.

Mr. STANLEY. I do not know whether those conditions exist, and that is what I am asking the Senator.

Mr. SMOOT. Those conditions do not prevail now as they did before, and I am quite sure that now we could, in time, gather employees together, and, with the Australian fine wool, which is what the English use in making these cloths, make similar cloth, and make it in sufficient quantities to meet the demands of the American people. But I want to say to the Senator that where cloths are made in small quantities it always costs more, relatively, than to make them in large quantities. In other words, if we start with a batch of wool to make simply one warp of cloth, the length of which would be 360 yards, the loss is tremendous. You will have a loss at the end, where you have a little more filling than you wanted, and you may have more warp yarn than you wanted; there is the waste in beginning the working of wool and surplus stock at the end, and there would be no more waste in these processes than in making 100,000 yards instead of one warp. I refer to the waste in the beginning and the waste at the close. When you have a trade in cloth of that kind you have to have a trade so large that it will take quantities, or the cost is prohibitive. That is the condition.

Mr. STANLEY. One other question and then I will be through, and I thank the Senator from Nebraska for yielding to me.

In that event I could see no great industrial necessity for hothousing or fostering the manufacture of this expensive and rare cloth in the United States. It is not a war necessity. We can do very well without it in case of extremity, and if we can exchange American commodities for that cloth at an advantage, I am at a loss to see the propriety, except as a purely revenue measure, of imposing these high duties upon that cloth.

Mr. SMOOT. I have stated virtually that myself. You can not get a suit made of that kind of cloth anywhere in the city, by any tailor I know of, for less than $100, and they run up to $145. The strange thing to me is that many of the finer cloths have dropped, particularly in this country, more than 50 per cent since the peak of 1919 and 1920, but you do not find the price of a suit of clothes reduced in the same proportion.

Mr. STANLEY. That is on account of the fact that the work is done by highly organized labor, and, as I understand it, the tailors have not dropped prices at all.

Mr. LENROOT. Mr. President, I should like to ask the Senator from Utah one or two questions. I do not understand that the cloth which the Senators have been discussing comes in under this paragraph at all.

Mr. SMOOT. It does not.

Mr. LENROOT. I would like to ask the Senator what does come in under this paragraph; certainly not these finer cloths the Senator has been talking about?

Mr. SMOOT. I will tell the Senator just what comes under this paragraph; and the Senator from Massachusetts and I agree about it. This is the clothing paragraph, covering cloth that is to be made up into clothing. As far as ready-made clothing is concerned there are no manufacturers in any country in the world who can beat the American people in making ready-made clothing. They have perfected it almost to an art.

Mr. WALSH of Massachusetts. It comes in the form of specialties.

Mr. SMOOT. Yes; specialties; just as the Senator from Massachusetts has said.

Mr. WALSH of Massachusetts. Topcoats and raincoats.

Mr. SMOOT. I know men, who are friends of mine, who would no more think of buying an American overcoat than they would think of flying. I know men who go to London every year for their overcoats and their clothing.

Mr. LENROOT. Do they buy them ready-made?

Mr. SMOOT. They have them made in England and ship them in here ready-made. They will not have any other style.

Mr. WALSH of Massachusetts. Every large American city has English specialty shops where gents' clothing of English tailoring is sold.

Mr. SMOOT. Golf clothes and of the cockney style.

Mr. WALSH of Massachusetts. Certain forms of waterproof coats and evening coats.

Mr. LENROOT. I would like to ask the Senator, for my information, the proportionate value of the cloth in a suit of clothes with reference to the entire cost of manufacture?

Mr. SMOOT. That all depends on the quality and the price.

Mr. LENROOT. What is the average?

Mr. SMOOT. It takes three and a half yards of cloth to make a suit of clothes, and——

Mr. LENROOT. I am speaking of ready-made clothing.

Mr. SMOOT. Let us take a cloth costing $6 a yard. Three and a half yards would cost $21. That is fine English cloth.

Mr. LENROOT. What would the cost of manufacture of that suit be, cloth and all?

Mr. SMOOT. Of course, if the lining were silk, it would be expensive, and I can not say what the cost of manufacture would be.

Mr. WALSH of Massachusetts. But the Senator does not want the cost of tailor-made clothes.

Mr. McCUMBER. These cloths are not made into ready-made clothes.

Mr. LENROOT. I am asking the Senator to give me the cost of the cloth in ready-made clothing. I would like to get the proportionate cost of the cloth in the cost of the manufacture.

Mr. WALSH of Massachusetts. Taking any ready-made suit, the Senator from Wisconsin wants to know how much of the price of that suit is represented in the cloth and how much in the labor.

Mr. SMOOT. Here is a fine piece of cloth [exhibiting]. The Senator wants to know what it would cost to make a suit of clothes of this, and the price of that cloth.

Mr. WALSH of Massachusetts. Take a $30 or $40 sack suit.

Mr. SMOOT. I would rather put it this way: The price of that on July 1, 1922, was $1.95 a yard. We will call it $2 a yard. Three and a half yards would be $7.

Mr. WALSH of Massachusetts. That is the manufacturer's price.

Mr. LENROOT. That is what the clothing manufacturer pays?

Mr. SMOOT. That is what the mill would sell this for to the clothing manufacturer.

Mr. WALSH of Massachusetts. The clothing manufacturer pays that for it.

Mr. LENROOT. I want the Senator to give me the price of the cloth that goes into a ready-made suit.

Mr. SMOOT. This may be made into a ready-made suit, but it is the best cloth.

Mr. McCUMBER. It is very much in excess of the value of the average cloth which goes into a ready-made suit.

Mr. SMOOT. I want to be perfectly fair with the Senator.

Mr. WALSH of Massachusetts. The cloth represents about a third and the labor two-thirds.

Mr. LENROOT. That is what I am trying to get at.

Mr. WALSH of Massachusetts. Very generally speaking. Of course, it depends on the style and other things. Is not that true?

Mr. SMOOT. The cloth does not run as high as one-third, by any manner of means. When we take into consideration the linings, the buttons, the thread, the padding, and everything else, it is not nearly one-third with exception of few instances. A suit of clothes made of this cloth could not have been purchased by anyone anywhere for less than $65.

Mr. WALSH of Massachusetts. Can the Senator give a better answer than I have given?

Mr. SMOOT. I think it would run all the way from 10 to 30 per cent in special cases. That is the only way I can give it.

Mr. LENROOT. That would be $21 that it cost the manufacturer of the suit, taking the highest figure.

Mr. SMOOT. Yes; I think that would be about right. Back in 1898 and 1899 I used to send thousands of yards of cloth to one of the large Chicago clothing manufacturers to make up into clothing. I would order that cloth made into the different sizes of clothing. I had a contract price to make that cloth and furnished all that went into it outside of the cloth for $3.75 a suit. Of course it would cost more than that to-day, but in 1898, 1899, and 1900 the contract price for making the suits, furnishing all there is in a suit with the exception of the cloth itself, was $3.75.

Mr. LENROOT. What would that cloth be worth a yard?

Mr. SMOOT. The cloth at that time was worth $1.20 a yard, but the suits sold for $15.

Mr. WALSH of Massachusetts. Mr. President, in answer to the inquiry of the Senator from Wisconsin I would like to read from the report of the Tariff Board on Schedule K, as follows:

In women's garments the cloth is also the largest single item. In skirts it is equal to 40 per cent of the net wholesale selling price; on most cloaks equal to between 30 and 35 per cent; on cheap suits it is over 25 per cent; and on more expensive varieties it falls below 20 per cent. To the manufacturer, therefore, cloth is not so important an element of cost in women's clothing as in men's. On the other hand, the labor and manufacturing expense are more important in women's clothing. The margin remaining to the manufacturer of women's garments, over and above the cost of materials and expense of converting them into wearing apparel, is somewhat less than in the men's clothing industry, but selling expenses are considerably lower for these establishments.

Mr. SMOOT. I knew I was well within the bounds when I said it was 15 to 30 per cent.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. WALSH of Massachusetts. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I transfer my pair with the Senator from Michigan [Mr. TOWNSEND] to the Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. LODGE (when his name was called). Making the same transfer of my pair as before, I vote "yea."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "yea."

Mr. McLEAN (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "yea."

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED], I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as to my pair and its transfer as on the last vote, I vote "yea."

Mr. TRAMMELL (when his name was called). Transferring my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON], I vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON], who, if present, would vote "yea." If at liberty to vote, I would vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

Mr. WILLIS (when his name was called). Making the same announcement with reference to my pair with my colleague [Mr. POMERENE] and its transfer, I vote "yea."

The roll call having been concluded,

Mr. FRELINGHUYSEN. Making the same announcement as before, I vote "yea."

Mr. HARRISON. I have a pair with the junior Senator from West Virginia [Mr. ELKINS]. In his absence I withhold my vote. If permitted to vote, I would vote "nay." I vote "present."

Mr. KENDRICK. I transfer my general pair with the senior Senator from Illinois [Mr. McCORMICK] to the junior Senator from Oregon [Mr. STANFIELD] and vote "yea."

Mr. JONES of New Mexico. I transfer my pair with the senior Senator from Maine [Mr. FERNALD] to the senior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Maryland [Mr. WELLER] with the Senator from New York [Mr. WADSWORTH];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS].

The result was announced—yeas 29, nays 22, not voting 45, as follows:

YEAS—29.

Brandegee	Gooding	McLean	Spencer
Broussard	Jones, Wash.	McNary	Sterling
Bursum	Kendrick	Moses	Warren
Calder	Keyes	New	Watson, Ind.
Cameron	Ladd	Newberry	Willis
Curtis	Lodge	Oddie	
Ernst	McCumber	Phipps	
Frelinghuysen	McKinley	Smoot	

NAYS—22.

Ashurst	Harris	Nelson	Stanley
Capper	Heflin	Overman	Swanson
Caraway	Hitchcock	Ransdell	Trammell
Cummins	Jones, N. Mex.	Robinson	Walsh, Mass.
Dial	Kellogg	Sheppard	
Fletcher	Lenroot	Simmons	

NOT VOTING—45.

Ball	Glass	Norris	Stanfield
Borah	Hale	Owen	Sutherland
Colt	Harreld	Page	Townsend
Crow	Harrison	Pepper	Underwood
Culberson	Johnson	Pittman	Wadsworth
Dillingham	King	Poindexter	Walsh, Mont.
du Pont	La Follette	Pomerene	Watson, Ga.
Edge	McCormick	Rawson	Weller
Elkins	McKellar	Reed	Williams
Fernald	Myers	Shields	
France	Nicholson	Shortridge	
Gerry	Norbeck	Smith	

So the committee amendment as modified was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The next amendment is, on page 152, line 14, after the word "figured," to strike out "5 cents per square foot and, in addition thereto, 30," and to insert "55," so as to make the paragraph read:

PAR. 1117. Oriental, Axminster, Savonnerie, Aubusson, and other carpets and rugs, not made on a power-driven loom; carpets and rugs of oriental weave or weaves, produced on a power-driven loom; chenille Axminster carpets and rugs, whether woven as separate carpets and rugs or in rolls of any width; all the foregoing, plain or figured, 55 per cent ad valorem.

Mr. WALSH of Massachusetts. Mr. President, the carpets and rugs named in this paragraph are not made in this country. The paragraph refers to oriental high-priced rugs. The tax imposed I assume is for revenue purposes. I have no objection to those who want to buy these high-priced rugs paying a good revenue tax to the Government. I have no objection to the paragraph.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The next amendment of the Committee on Finance is, on page 152, after line 16, to strike out—

PAR. 1118. Axminster carpets and rugs, not specially provided for, and carpets and rugs of like character or description, 2 cents per square foot; Wilton carpets and rugs, and carpets and rugs of like character or description, 3 cents per square foot; Brussels carpets and rugs, and carpets and rugs of like character or description, 2 cents per square foot; velvet and tapestry carpets and rugs, and carpets and rugs of like character or description, 1½ cents per square foot; and, in addition thereto, on all the foregoing, 25 per cent ad valorem.

and in lieu thereof to insert:

PAR. 1118. Axminster carpets and rugs, not specially provided for; Wilton carpets and rugs; Brussels carpets and rugs; velvet and tapestry carpets and rugs; and carpets and rugs of like character or description, 40 per cent ad valorem.

Mr. WALSH of Massachusetts. Mr. President, there is no tariff problem involved in this paragraph. One of our most prosperous industries is the carpet industry. It has been a

self-supporting and self-sustaining industry for years. It does not need any protection. There are no imports of comparable carpets or rugs, except perhaps in the case of one class of carpets made in this country—the Axminster. We have been exporting more than we have been importing of carpets. The industry does not need protection. There is no reason for increasing the duty, and in my opinion there can not be a satisfactory defense made of the attempt here to substantially increase the protective duties on carpets. This is all I care to say on this paragraph.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 153, line 7, after the word "character," to strike out "and" and to insert "or," and in the same line, after the word "for," to strike out "1 cent per square foot and, in addition thereto, 20," and to insert "30," so as to make the paragraph read:

Ingrain carpets, and ingrain rugs or art squares, of whatever material composed, and carpets and rugs of like character or description, not specially provided for, 30 per cent ad valorem.

Mr. SMOOT. On behalf of the committee I desire to modify the amendment on page 153, line 8, before the words "per cent," by striking out the numerals "30" and substituting therefor the numerals "25."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, on page 153, line 11, after the word "in," to strike out "part" and to insert "chief value," and in line 12, after the word "wool," to strike out "whether or not constituting chief value, 2 cents per square foot and, in addition thereto, 25," and to insert "40," so as to make the paragraph read:

All other floor coverings, including mats and druggets, not specially provided for, composed wholly or in chief value of wool, 40 per cent ad valorem.

Mr. SMOOT. I desire to modify the committee amendment, in line 13, before the words "per centum," by striking out the numerals "40" and inserting in lieu thereof the numerals "30."

The PRESIDENT pro tempore. The question is on the amendment as modified.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, on page 153, line 19, to increase the rate of duty on screens, hassocks, and all other articles composed wholly or in part of carpets or rugs, and not specially provided for, from "22" to "40" per cent ad valorem.

Mr. SMOOT. I desire to modify the committee amendment, on page 153, line 19, before the words "per centum," by striking out the numerals "40" and inserting in lieu thereof the numerals "30."

The PRESIDENT pro tempore. The question is on the committee amendment as now modified by the Senator from Utah.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, on page 153, after line 19, to strike out—

PAR. 1120. All manufactures not specially provided for, composed of wool or of which woo. is a component part, whether or not constituting chief value, 25 per cent ad valorem.

And in lieu thereof to insert:

PAR. 1120. All manufactures not specially provided for, wholly or in chief value of wool, 55 per cent ad valorem.

Mr. WALSH of Massachusetts. That is the "catch-all" paragraph, I suppose?

Mr. SMOOT. I will say to the Senator that we do not give in that paragraph a compensatory duty at all. As the Senator has stated, it is a "catch-all" paragraph, providing for a duty of 55 per cent, which, of course, there being no compensatory duty imposed, is rather low.

Mr. WALSH of Massachusetts. I presume this paragraph is inserted in case any importations should come in which are not taken care of in the other paragraphs?

Mr. SMOOT. That is all.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 154, line 4, after the word "goat," to insert "Cashmere goat," so as to make the paragraph read:

PAR. 1121. Whenever in this title the word "wool" is used in connection with a manufactured article of which it is a component material it shall be held to include wool or hair of the sheep, camel, Angora goat, Cashmere goat, alpaca, or other like animals, whether manufactured by the woolen, worsted, felt, or any other process.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 154, after line 6, to strike out:

PAR. 1122. All samples of manufactures of wool which are not admitted under bond for exportation within six months shall be subject to the same rates of duty and the same valuation as the manufactured articles which they are intended to represent.

Mr. WALSH of Massachusetts. Mr. President, before a vote is taken on this, which is the last amendment in the wool schedule, I ask to have printed in the RECORD three letters, one addressed to the Senator from Montana [Mr. WALSH] and the other two to myself, in reference to the duties which are levied in the wool schedule of the pending bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letters referred to are as follows:

JULY 28, 1922.

Hon. THOMAS J. WALSH,
The Senate, Washington, D. C.

DEAR SIR: I have just read in the CONGRESSIONAL RECORD (p. 10640) the following remarks by you on the wool schedule during the Senate discussion on July 25, when you condemned the rates on wool as "unjustifiably large," but objected to Senator LENROOT'S 60 per cent ad valorem maximum unless the compensatory duty could be reduced proportionately:

"Before a vote is taken on this matter I desire to say that I represent in part in this body the greatest wool-producing State in this Union. I am entirely satisfied that the rates provided for in paragraph 1102 are unjustifiably large. I am desirous of voting for very much lower rates. I should like very much to vote for the amendment offered by the Senator from Wisconsin. The wools to which it would be applicable are not produced in any considerable quantity, at least in our section of the country, and the effect would be indirect and not direct. But, Mr. President, I shall not vote to reduce the rates on the raw wool unless I can be fully assured that the compensatory duties upon the manufactured products are going to be reduced proportionately and in accordance with those rates."

This has led me to write this letter to you in order to present what I am sure is an entirely practicable plan for making the wool schedule adequately protective and also fair to the woolgrower, wool manufacturer, clothing manufacturer, and consumer.

This can be accomplished by placing ad valorem rates on wool, wool by-products, noils, waste and shoddy, tops, yarn, cloth, and all other products of wool, and making these rates high enough to protect the American production of the various products, but not so high as to burden the consumer. The Wilson-Gorman bill of 1894 and the Underwood-Simmons bill of 1913 and the experience in administering these tariff acts supply an excellent basis on which to frame an ad valorem schedule to take the place of the Underwood and Fordney-Penrose emergency acts, both of which are now in effect.

The objections to placing an ad valorem maximum on specific wool duties, as in the House bill and the Lenroot amendment, are:

1. The ad valorem equivalents of the duty on high-priced wool subject to the specific rate are lower than the ad valorem maximum on the low priced wools.

2. The compensatory duties on goods are excessive on the wools subject to the ad valorem maximum.

The second objection could be partially remedied by placing ad valorem compensatory rates on wool goods, but that would give an excess of the compensatory on high-priced goods, a defect that could be lessened by graduating the ad valorem compensatory according to the value of the goods, decreasing the ad valorem compensatory rate as the value increased. These, however, would be mere expedients partially to offset the effects of combining specific and ad valorem duties on wool.

The only right way is to begin with an ad valorem duty on new and reclaimed wool and wool by-products, and then place ad valorem compensatory and protective rate on wool goods. To do this it is necessary to decide on the following factors:

1. Ad valorem duty on wool and by-products.
2. Increase in American conversion cost over the foreign conversion cost.
3. Relative costs of wool and conversion in a dollar's worth of wool goods abroad.

Having decided on these factors the ad valorem compensatory and protective rates can be easily calculated. As I want to keep my explanation of this plan free from the suspicion of recommending or exploiting any particular rate on wool or wool goods, I will illustrate the calculation of the wool and wool goods rates from the above factors by the aid of algebraical symbols:

Let—

a=ad valorem rate on wool;
b=per cent of increase of American conversion cost over foreign conversion cost;
c=cost in cents (per cent) of wool in a dollar's worth of goods abroad;
d=cost in cents (per cent) of conversion of wool into a dollar's worth of goods abroad;
x=ad valorem compensatory rate on goods;
y=ad valorem protective rate on goods;
z=total ad valorem rate (compensatory and protective) on goods.

Then the calculation is—

ac=x;
bd=y;
ac + bd=z.

Having given this algebraical explanation of the plan in order to keep it free from the suspicion of promoting any particular rates, I will apply it to several concrete cases, assuming for all of them that one dollar's worth of goods abroad costs 50 cents (50 per cent) for wool and 50 cents (50 per cent) for conversion.

First I will take the Underwood bill of 1913. The Committee on Ways and Means had that bill framed to provide for a duty of 15 per cent ad valorem on wool. This was abandoned at the last moment and the bill as reported provided for free wool and 35 per cent ad valorem on cloth. With a dollar's worth of foreign goods costing 50 cents for wool and 50 cents for conversion, a 35 per cent ad valorem duty on goods is a protective rate based on an American conversion cost 70 per cent above the foreign conversion cost.

On this basis, and taking the original intention of the 1913 Committee on Ways and Means as an illustration, we have the following factors:

a=15 per cent;
b=70 per cent;
c=50 per cent;
d=50 per cent.

Then the rates on goods are:

.15×.50=7½ per cent, compensatory rate on goods;
.70×.50=35 per cent, protective rate on goods;
7½ per cent + 35 per cent=42½ per cent, total rate on goods with 15 per cent on wool.

If the wool duty is increased to 30 per cent ad valorem, the calculation of the revised Underwood rates on cloth would be:

a=30 per cent;
b=70 per cent;
c=50 per cent;
d=50 per cent.

Then—

.30×.50=15 per cent, compensatory rate on goods;
.70×.50=35 per cent, protective rate on goods;
15 per cent + 35 per cent=50 per cent, total rate on goods with 30 per cent on wool.

Now, let us take as an illustration the free wool Wilson bill rate of 40 per cent on goods, which represents an increase of 80 per cent in the American conversion cost over the foreign, and assume that the rate on wool is 40 per cent ad valorem. We have now—

a=40 per cent;
b=80 per cent;
c=50 per cent;
d=50 per cent.

Then—

.40×.50=20 per cent, compensatory rate on goods;
.80×.50=40 per cent, protective rate on goods;
20 per cent + 40 per cent=60 per cent, total rate on goods with 40 per cent on wool.

The Wilson bill also provided for a rate of 50 per cent on high-priced goods, which represented an increase of 100 per cent in the American conversion cost over the foreign. On this basis, with a duty of, say, 40 per cent on wool, we have:

a=40 per cent.
b=100 per cent.
c=50 per cent.
d=50 per cent.

Then—

.40×.50=20 per cent, compensatory rate on goods.
1.00×.50=50 per cent, protective rate on goods.
20 per cent + 50 per cent=70 per cent, total rate on goods with 40 per cent on wool.

These illustrations of the plan can be continued indefinitely, but I will give only one more, assuming a duty of 50 per cent ad valorem on wool and a 100 per cent increase in the American conversion cost over the foreign. We have now—

a=50 per cent.
b=100 per cent.
c=50 per cent.
d=50 per cent.

Then—

.50×.50=25 per cent, compensatory rate on goods.
1.00×.50=50 per cent, protective rate on goods.
25 per cent + 50 per cent=75 per cent, total rate on goods with 50 per cent on wool.

The above plan is equally suited for the tariff on tops, yarn, and cloth, it being necessary only to decide upon the relative proportions of wool cost and conversion cost in one dollar's worth of the product abroad. Take wool yarn as an illustration, assuming a 50 per cent duty on wool, an increase of 100 per cent in the American conversion cost, and relative cost proportions of 70 cents (70 per cent) for wool and 30 cents (30 per cent) for conversion for a dollar's worth of yarn abroad. Now we have—

a=50 per cent.
b=100 per cent.
c=70 per cent.
d=30 per cent.

Then—

.50×.70=35 per cent, compensatory rate on yarn.
1.00×.30=30 per cent, protective rate on yarn.
35 per cent + 30 per cent=65 per cent, total rate on yarn with 50 per cent on wool.

In these calculations the only variable factors are c and d, the relative proportions of wool and conversion costs in the value of goods, abroad. Those who do not want a fair tariff on wool and wool goods seek to convey the impression that the variations in the relative costs of wool and conversion mean corresponding variations in the compensatory duty on goods. See John P. Wood's testimony before the Finance Committee on December 14, page 3539; also the recent Tariff Commission's bulletin prepared by L. G. Connor, page 13. The only statistics that I know of bearing on the relative costs of wool and conversion are those given in my "Analysis of the Tariff Board Report on Schedule K," June, 1912, a copy of which I inclose. These are based on actual costs of goods made in American mills under my supervision, also on the fragmentary data in the Tariff Board's report on Schedule K, the omissions in which I supplied from data of actual costs. These statistics show that on the great bulk of wool goods the relative costs range from 60 per cent for wool and 40 per cent for conversion at one extreme, to 40 per cent for wool and 60 per cent for conversion at the other extreme, the variations beyond these limits being so few and so slight as to be negligible.

Now, let us assume a wool duty of 50 per cent and a conversion cost increase of 50 per cent, and apply the above plan to three assumed fabrics with relative costs as follows:

1. 40 per cent for wool, 60 per cent for conversion.
2. 50 per cent for wool, 50 per cent for conversion.
3. 60 per cent for wool, 40 per cent for conversion.

FABRIC NO. 1.

a=50 per cent.
b=50 per cent.
c=40 per cent.
d=60 per cent.

Then—

.50×.40=20 per cent, compensatory rate on goods.
.50×.60=30 per cent, protective rate on goods.
20 per cent + 30 per cent=50 per cent, total rate on goods with 50 per cent on wool.

FABRIC NO. 2.

a=50 per cent.
b=50 per cent.
c=50 per cent.
d=50 per cent.

Then—

.50×.50=25 per cent, compensatory rate on goods.
.50×.50=25 per cent, protective rate on goods.
25 per cent + 25 per cent=50 per cent, total rate on goods with 50 per cent on wool.

FABRIC NO. 3.

a=50 per cent.
b=50 per cent.
c=60 per cent.
d=40 per cent.

Then—

.50×.60=30 per cent, compensatory rate on goods.
.50×.40=20 per cent, protective rate on goods.
30 per cent plus 20 per cent equals 50 per cent, total rate on goods with 50 per cent on wool.

Thus if the duty on wool and the increase in the conversion cost are equal, a variation in the relative costs of wool and conversion, no matter how wide, has no effect whatever on the total rate required on goods, which is the same in all cases.

Let us now assume that the wool duty is 50 per cent ad valorem and the increase in the conversion cost is 100 per cent. We have—

FABRIC NO. 1.

a=50 per cent.
b=100 per cent.
c=40 per cent.
d=60 per cent.

Then—

.50×.40=20 per cent, compensatory rate on goods.
1.00×.60=60 per cent, protective rate on goods.
20 per cent plus 60 per cent equals 80 per cent, total rate on goods with 50 per cent on wool.

FABRIC NO. 2.

a=50 per cent.
b=100 per cent.
c=50 per cent.
d=50 per cent.

Then—

.50×.50=25 per cent, compensatory rate on goods.
1.00×.50=50 per cent, protective rate on goods.
25 per cent plus 50 per cent equals 75 per cent, total rate on goods with 50 per cent on wool.

FABRIC NO. 3.

a=50 per cent.
b=100 per cent.
c=60 per cent.
d=40 per cent.

Then—

.50×.60=30 per cent, compensatory rate on goods.
1.00×.40=40 per cent, protective rate on goods.
30 per cent plus 40 per cent equals 70 per cent, total rate on goods with 50 per cent on wool.

Thus for the practicable extremes of variation in relative costs of wool and conversion the total rates on goods vary only 5 per cent from the mean of these costs, fabric No. 1, at one extreme, requiring 5 per cent more than fabric No. 2, which represents the mean of the extremes, while fabric No. 3, at the other extreme, requires 5 per cent less than fabric No. 2, the mean.

From the above it follows that if the tariff act provides for the rate required for the mean of the extreme variations in relative costs of wool and conversion, the actual rates required for compensatory and protective duties will vary not more than 5 per cent above or below the rate imposed on the goods.

I will tabulate these results in order to make the comparison easier:

Fabric.	Rate in act.	Rate required.
	Per cent.	*Per cent.*
1	75	80
2	75	75
3	75	70

So far as the relative costs of wool and conversion are concerned, I have given you the best information available, based on my own experience and the figures compiled by the Tariff Board. The Committee on Finance, if empowered by the Senate, could obtain these comparative costs from enough of the woolen and worsted mills of the country in a few weeks to afford an up-to-date basis for carrying out the plan proposed above. All the difficulties, confusion, turmoil, special privilege, and discrimination under Schedule K are wholly the result of the specific rates in the schedule from 1867 to 1894 and from 1897 to 1913 and proposed in the House bill and Finance Committee's bill now under consideration. The only remedy is an ad valorem tariff on wool and all of its products.

The variation of 5 per cent is the extreme. The relative costs of wool and conversion for the great bulk of wool goods will be near the mean of the extremes and the duties on them thus practically in agreement with what are required.

Those who do not want a fair tariff on wool and wool goods will raise objections to an ad valorem schedule, but these objections are either baseless or negligible. They will say that undervaluations will result, ignoring the fact that the greatest frauds in the collection of duties in the United States have been in connection with specific rates on sugar, also ignoring the cases now pending in which imported wool subject to the specific rates of the emergency act is reported to have been concealed by a covering of carpet wool.

They will also claim that the duty under an ad valorem rate on wool is least when values are lowest, ignoring the fact that under normal conditions simple justice to producers and consumers demands that this should be the case, ignoring the fact that the protective duty on wool goods in every tariff law since 1867 has been ad valorem, and consequently that these protective duties which they approve are subject to the same variations that they claim are fatal to ad valorem com-

pensatory duties, and also ignoring the fact that under an ad valorem schedule the woolgrower, top maker, spinner, weaver, and clothing manufacturer would all be on the same ad valorem basis of justice.

Disregarding party politics and considering the question solely from the viewpoint of the public welfare, there is no escape from the conclusion that Schedule K should be placed on a strictly ad valorem basis with adequately protective rates on new wool, reclaimed wool, wool by-products, and partially and wholly manufactured wool goods.

The Sixty-seventh Congress may not, probably will not, do this. It will probably place on the statute book a wool schedule even less defensible than the Payne-Aldrich Schedule K. But the people rule in the end, although the popular will is often thwarted through the control of legislation by selfish interests. But the American people want just laws. They have learned much since 1909 about the injustice of the wool schedule, and sooner or later they will secure justice by an adequately protective ad valorem tariff on wool and wool goods.

The view to which you so courageously gave expression on Tuesday, July 25, the twenty-fifth anniversary of the passage of the Dingley bill, have led me to believe that you would gladly hasten the coming of the rule of justice in Schedule K. I trust you will find it possible to render this service to the public.

Yours very truly,

SAMUEL S. DALE.

—

On goods composed of mixtures of wool and other fibers—cotton, etc.—the compensatory duty should be reduced to conform to the percentage of wool in the cloth, which can be easily and accurately determined.

—

BENOIT SYSTEM,
Malden, Mass., July 1, 1922.

Senator DAVID I. WALSH,
Washington, D. C.

DEAR SENATOR: I wish to enter protest against the passing of the proposed tariff bill of 33 cents flat rate per pound on the scoured contents of the pound of wool. The people are demanding lower prices in clothing and will not stand for much higher prices.

The retail clothiers and the manufacturers have worked hard the last two years in order to lower the price of clothing, with the final result that the price of a suit of men's clothes has been reduced all the way from $5 to $12 per suit in the last two years, and yet the people are still clamoring for lower prices, and are holding off buying their accustomed needs in the hope of forcing prices downward.

If this bill is passed it will add $3 to $5 to the price of a suit of men's clothes or an overcoat, and the same proportion on boys' clothing. This proposed bill would affect particularly the people buying the medium and lower priced clothing, which is another very bad feature of the bill.

I do not advocate a low tariff on wool, but the tariff should not be so high as to place a burden on 98 to 99 per cent of the people of the country to benefit only 1 to 2 per cent of the woolgrowers of the country.

I trust that you will understand my feeling in regard to the new proposed wool tariff and will represent my interests in this matter at Washington.

I would be pleased to hear your views in this matter at your convenience.

Yours very truly,

ARTHUR H. BENOIT.

—

FITCHBURG HARDWARE CO.,
Fitchburg, Mass., July 24, 1922.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR: I desire to register my vigorous protest against Schedule 11 of the Fordney-McCumber tariff bill, which proposes a duty on raw wool of 33 cents a pound.

It is excessive, unwarranted, and beyond the point of necessary protection.

It has been universally conceded that Schedule K of the Payne-Aldrich bill was too high. Schedule 11 exceeds it. It will increase prices to the many for the benefit of the few, which is uneconomic at this time.

Kindly give this protest your earnest consideration.

Very truly yours,

M. B. DAMON.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the Committee on Finance, striking out paragraph 1122.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment of the Committee on Finance will be stated.

The ASSISTANT SECRETARY. In "Schedule 12, silk and silk goods," the Committee on Finance propose——

Mr. McCUMBER. Mr. President, before proceeding to the consideration of the silk and silk goods schedule I wish to make a very few general observations, with the hope of bringing the matter before the Senate from the standpoint of the Committee on Finance.

Mr. President, the average price of cotton is now about 15 cents per pound; the average price of wool, scoured, which places it in the same condition as cotton when it is marketed and fit to be spun into yarn, is about 60 cents a pound. When we come to the silk schedule, however, we deal with a commodity which has a value of about $6 per pound. Therefore it may easily be seen that when we enter the silk realm we enter into the field of luxuries.

By far the greater quantity of goods that are manufactured into clothing are of cotton and wool, although there is a vast volume that is composed of silk fabrics. The silk fabrics, however, are not worn by the great majority of the American people. So we may consider silk fabrics and silk clothes in the light of luxuries.

Mr. President, a few years ago the American people adopted the eighteenth amendment to the Constitution. Prior to its adoption the Government was receiving as revenue from liquors about $300,000,000 annually. The cost of conducting the Government is many times greater than it was prior to 1914, the beginning of the great World War. We have gone to the limit, according to the views of a great many American experts, in the extent to which we have levied taxes on sales and in the imposition of income and excess-profits taxes; we have gone to the limit, according to the views of a great many, in the matter of surtaxes upon incomes; but we have got to have the money; we have got to raise the $300,000,000 that we lost in revenue when we adopted the eighteenth amendment to the Constitution. Where can we best levy that tax?

I am presuming that it is a tax. I do not know a better place than upon such luxuries as silk. Therefore in determining the duties that should be imposed the committee had in view not only the matter of protection of American industries in the manufacture of silks but it had also in view the raising of a very considerable revenue. Consequently the committee did not attempt to hew close to the line of exact protection.

There are a great many articles made of fancy silks which could be sold for an increase above the cost of from 10 to 15 per cent, but which are actually sold to the American people at an increase of from 50 to 150 per cent. Those who desire to purchase such luxuries have sufficient money generally to be able to pay more than they otherwise would to support the American Government. In making the duties upon those fancy goods we have taken that propensity of some of our citizens into consideration, and we propose to allow them to indulge in it for the benefit of the American Treasury. So I say in general that the rates in the silk schedule are both for protection and revenue, with the emphasis upon "revenue."

Mr. President, in the calendar year 1921 the imports of manufactures of silk amounted to $48,207,000 worth, and the duties collected from silk manufactures amounted to $21,795,866. The silk schedule, therefore, furnished 6 per cent of the customs receipts in 1921.

Our exports of silk manufactures during the calendar year 1921 were as follows: Dress goods, $3,337,764; wearing apparel, $3,611,956; all others, $2,722,360. So, while we imported something over $48,000,000 worth of dutiable silk goods, we exported about $9,672,000 worth of the same articles.

Mr. President, paragraph 1205 relates to broad silks. In value of exports and in revenue derived it is by far the most important paragraph of the silk schedule. Since 1914 there has been a very radical change in the relative importance of the different sources of broad silk imports, and it is worth while for those who are interested in the silk schedule to bear that great change carefully in mind. In 1914, 52 per cent of the total value of the imports came from France, 12 per cent from Switzerland, 25 per cent from Japan, and 1 per cent from China. Now, note the change: In 1921 the percentages were Japan 71 as against 25 in 1914; France, 10 per cent as against 52 per cent in 1914; China, 6 per cent as against 1 per cent in 1914; and Switzerland, 5 per cent as against 12 per cent in 1914. So it will be seen that the manufacture of silk has gone from the Occident to the Orient, and we must deal therefore with the cheaper labor conditions of the Orient.

In quantity Japan's predominance in 1921 is even greater than indicated by mere values. Fabrics obtained from Europe are chiefly expensive goods, demanded because of style, unique design, or special construction. Imports from China and Japan are ordinarily low and medium grade goods of simple weave, and they have enormously increased. Considerably more than half of the total from Japan are light-weight habutaes such as are not made in the United States. The remainder are heavy habutaes and other goods similar to those made in the United States.

From China come chiefly pongees woven in the gum from wild tussah silk.

Mr. President, I think we should weigh these facts in considering the duties that are imposed upon this schedule, because our competition has gone from the higher-price producing countries prior to the war to the lower-price producing countries since the war; and considering the fact that it is necessary that we make up from some source the immense loss growing out of the eighteenth amendment, I think we should give and sustain as high a rate of duty as the trade will bear upon silk luxuries.

Mr. SHEPPARD. Mr. President, I shall pursue the course adopted by the Senator from North Dakota and discuss the silk schedule as a whole.

THE SILK SCHEDULE OF THE REPUBLICAN TARIFF BILL OF 1922.

Mr. President, silk in reaching its final form for human use passes through many stages. Its principal source is the silkworm.

THE SILKWORM.

The silkworm is hatched by artificial heat from eggs that have been collected and stored a number of months pending the arrival of the hatching season.

The worm is then placed on the leaf of the mulberry tree, and on this leaf feeds for six weeks.

It then emits from an opening in its underlip two liquid strands, called brins, which harden and unite under the influence of the air into a silk filament or thread, aided by a gum accompanying these liquid emissions.

Making a weaving motion with its head and a circular motion with its body, the worm gradually wraps about itself thread after thread until in about three days a complete encasement, known as a cocoon, is formed.

Inside this silken envelope the worm changes into a chrysalis and then into a moth, which pierces the cocoon at one of its ends and breaks out, its first and only task on emerging from its silken cradle being to provide for the propagation of its kind. The eggs the female moth lays are collected and stored for the next hatching.

REELED RAW SILK YARN.

To produce a yarn or composite thread from which the best and most widely used silk products come the firmest and smoothest threads in the cocoon must be reeled before the chrysalis becomes a moth and pierces the cocoon.

The chrysalis is killed by the use of hot, dry air and the cocoon thus kept intact. To secure the best results it has been found necessary to select from 3 to 12 or more of these intact cocoons the strongest and most evenly shaped threads and then to reel them together. The composite thread or yarn so reeled from the unpierced cocoon is the raw silk of commerce, the raw material of most of the American and other silk industries, which carry it through further stages to the final fabricated form The processes of growing the worm, developing and preserving the cocoon, and reeling from it the threads of proper size and strength are so tedious, so exacting, so wearisome, and the pecuniary return so paltry that it has not been possible to establish the reeling of raw silk in the United States, although repeated efforts have been made. For instance, it takes about 2,000 or 3,000 cocoons to produce a pound of raw silk, and a pound sells for about $8 at present. The normal price is around $4 or $5 per pound. The development of each cocoon requires the most exhaustive attention and care. It is hardly conceivable that human beings can be found to perform such painstaking, monotonous, and intensive work for such trifling compensation. The fact that they are reduced to such economic straits is a revelation of one of the tragedies underlying our civilization. That hundreds of millions throughout the world may wear a soft and glistening raiment, a fabric that contributes so much to the comfort, refinement, and general well-being of society, as well as to many of its practical needs, hundreds of thousands of the human race must suffer the direst poverty and privation. Only in China and Japan, where the struggle for a bare physical survival has reached the fiercest of proportions, are a sufficient number of mortals to be located who endure economic crucifixion that the rest of humanity may know a brighter existence, so far as the silk industry is concerned. By far the greater portion of the earth's raw silk thread or yarn comes from China and Japan. A rougher form of silk yarn is reeled from wild, undomesticated silkworms known as tussah or tusser worms that feed on the leaves of oak and other trees, mainly in China and India, and makes a stronger and coarser fabric than that which comes from the domesticated worm.

SILK WASTE THREADS.

The threads in the cocoon of such imperfect structure that they can not be used for reeling are called waste silk. Waste silk consists also of cocoons after they have been pierced by the emerging moth, or which for other reasons have become unreelable; of reeled yarns discarded for various reasons in throwing and weaving processes in the United States, the discarded yarns being known also as mill wastes; of fibers less than 2 inches in length left over after silk waste is dressed, these being known as exhausted noils. Waste silk can not be reeled, but is spun into yarn.

IMPORTATIONS OF REELED RAW SILK AND SILK WASTE.

Raw silk and silk waste, including silk cocoons, are imported into the United States free of duty, where they become the basis of the American silk industry, the largest silk industry in the world, the third largest textile industry in the United States. The reeled raw silk yarn is the basis of woven silk goods, while the waste silk is the raw material for spun-silk goods. The volume of American imports of reeled raw silk—that is, the yarn in its first stage after leaving the unpierced cocoon, the yarn from which by far the larger portion of American silk fabrics is made—is an indication of the wonderful growth of the silk-manufacturing industry in this country. Considering these imports by five-year periods and starting with those of the years from 1866 to 1870, inclusive, as a base, we find that they have grown from 2,875,970 pounds in that period to 183,240,727 pounds in the period from 1916 to 1920, inclusive, an increase of over 6,370 per cent. Before the Civil War there was a duty on raw silk, but it did not create a domestic industry for the reasons already mentioned. Since the Civil War these raw-silk imports have been on the free list. Imports of silk waste are also duty free and have averaged 3,861,893 pounds per year during the 30 years from 1891 to 1920, having grown from 1,346,689 pounds in 1891 to 11,263,546 pounds in 1920. In these silk-waste totals are included the exhausted noils, which averaged 791,119 pounds per year during the 20 years from 1901 to 1920, and the pierced or imperfect cocoons unfit for reeling but used for spinning, which averaged 120,312 pounds per year for the 30 years from 1891 to 1920. Silk-waste importations had a value of $16,135,227 in 1920; reeled raw silk importations, $437,951,434. The only form of silk waste produced in the United States is that known as mill waste and amounts to about one-eighth of all waste silk imports. Since the Civil War it has been the policy of both the Democratic and Republican Parties to keep these raw materials of the American silk industry on the free list. The term "silk waste" originated when the fibers so described were valueless. It was later discovered that while they could not be reeled and woven they could be spun into a practicable yarn by methods similar to those employed in the spinning of flax and cotton.

REELED RAW-SILK YARN "THROWN" INTO STRONGER YARNS OR WOVEN DIRECTLY INTO CLOTH.

The reeled raw silk arrives in this country in skeins or hanks, and after being cleaned and wound on bobbins is converted by what is known as the throwing process into a stronger yarn, called thrown silk, or is woven directly into cloth.

STANDARD TYPES OF THROWN YARNS.

The standard types of the thrown or twisted yarn—the word "thrown" being derived from the Saxon "thrawan," which means to twist—are tram, crêpe twist, organzine, grenadine, and poile.

Tram is made by combining or doubling two or more raw-silk threads and twisting them into one by what is technically called the slack twist, and is used chiefly for filling in the manufacture of many important silk fabrics and of knit goods. Crêpe twist is used in making a fabric called crêpe silk, and is a tram yarn to which an extra hard twist has been given.

Organzine is made by first twisting two raw-silk threads separately in one direction and then doubling and twisting them in the opposite direction, and is used as a warp in the manufacture of the fabrics for which the tram is the filling.

Grenadine is an organzine yarn to which a specially hard twist has been given, and is used in making gauzes and occasionally a fabric known as silk voile.

Poile is the only standard thrown yarn made by twisting a single raw-silk thread, and is used in making silk voile, chiffons, and chiffon crêpe.

NO INTERMEDIATE STAGE BETWEEN REELED RAW-SIK YARN AND THROWN YARN OR CLOTH.

Here it should be said that there is no intermediate stage of manufacture between the imported raw silk and these thrown yarns or the cloth into which the raw article is sometimes immediately woven without going through any further yarn process. It is true that the raw-silk thread may be wound on spools or tubes before entering further processes, but this could not be said to represent a stage of manufacture.

Nevertheless, the pending tariff bill provides a duty on silk partially manufactured from raw silk and not twisted or spun of 35 per cent ad valorem. See paragraph 1201 of the tariff bill. The only effect of this joker provision, this tariff fiction, is to supply a basis or excuse for high duties on the forms into which the reeled raw silk imports are actually converted. The thrown yarns and certain woven fabrics are the first forms into which the reeled raw silk imports are made, and the provision under discussion could not have reference to these yarns and fabrics because they are the subjects of separate paragraphs in a subsequent part of the bill, paragraphs bristling with formidable duties on these very items.

THE AMERICAN THROWN SILK YARN INDUSTRY.

From the thrown silk yarns are made most of the silk goods produced by the American silk industry. Indeed, the making of these yarns is an important and largely independent branch

of that industry. Probably more than 85 per cent of the reeled raw silk imports are made into the thrown silk yarns, much more than half of which are manufactured by separate throwing establishments, the rest being produced by finished-goods makers for their own use. The United States has distanced all other countries in the production of thrown silk yarns, 28,000,000 pounds having been turned out here in 1920. Imports are hardly worth mentioning, except to emphasize their insignificance. They have averaged about 34,000 pounds a year during the 30 years ending with 1920. Competition from abroad, therefore, is all but nonexistent. And yet the Republican Party proposes duties on thrown silk yarn 33⅓ per cent higher than the present rates.

Mr. KELLOGG. In what form is the silk imported?

Mr. SHEPPARD. In the form of skeins or hanks of what is known as reeled raw silk; also in the form of imperfect or damaged cocoons and of threads too short or too uneven for reeling.

Mr. KELLOGG. Before it is made into threads?

Mr. SHEPPARD. Before the reeled raw silk is made into a stronger composite thread or yarn called thrown yarn, which is the basis of the woven silk industry, and before the imperfect cocoons and shorter threads are made into a yarn which is the basis of the spun silk industry.

When it is observed that the present rate, 15 per cent ad valorem, is the rate under which the American industry has outstripped the world during the past nine years, the rate under which it commands and supplies the entire home market, the enormity and the absurdity of this advance of about 200 per cent in the tariff taxes on this basic item of the silk industry will become apparent.

SEWING AND EMBROIDERY SILK THREAD, ETC.

Certain articles made by twisting the reeled raw silk into a tougher thread or yarn are known as sewing thread, used mainly for hand sewing; machine twist, a thread used principally for machine sewing, although sometimes employed in sewing by hand; floss and embroidery silk; that is, threads used for machine and hand embroidering. These articles are sometimes made from spun-silk waste, but to no great extent, inasmuch as the waste yarns lack strength and elasticity. As long ago as 1879 the United States had outstripped the world in this branch of the silk industry. In that year a book was published by authority of the Silk Association of America entitled "The Silk Goods of America," and written by William C. Wyckoff, wherein appeared this statement:

> The manufacture of silk thread in this country is a distinct branch of the industry which has wholly outgrown foreign competition.

Under all tariff acts since that time the sewing and embroidery silk industry has supplied practically the entire domestic market, imports have been insignificant, with the exception of but a few years, and a substantial export trade has developed. The tariff acts of 1883, 1890, 1894, and 1897 imposed a duty of 30 per cent ad valorem on these items. The tariff act of 1909 imposed the practically prohibitive rate of $1 per pound in the gum and $1.50 a pound if ungummed or otherwise advanced by any process of manufacture. The survey of the Tariff Commission has the following comment on the Payne rate, that is, the 1909 rate:

> This duty was practically prohibitory, and the only imports thereunder consisted of one or two thousand pounds a year of special high-priced sewing silks. Owing to the absolute exclusion of ordinary sewing and embroidery silks, the equivalent ad valorem rate of duty on the trifle of high-priced silk thread imported averaged lower than the 30 per cent ad valorem duty imposed previous to the act of 1909.

But the most remarkable evidence of the superior position of the sewing and embroidery silk industry in the United States, its complete independence of foreign competition, was shown by the fact that when the prohibitive Payne rates were supplanted by the very low rate of 15 per cent ad valorem in the Democratic tariff law of 1913 imports continued to be so pitifully few that in none of the years since 1913 have they amounted to 2 per cent of the domestic production. In fact, in most years they have been less than 1 per cent of the domestic output. In 1914 the domestic output was valued at $9,681,613, while the imports had a value of $12,940, or less than one-fifth of 1 per cent. In 1919 the domestic output had a value of $9,682,000, while imports were valued at $6,332, about one-tenth of 1 per cent. During 1920, when speculative silk movements created an abnormal demand for everything made of silk, imports were less than 1 per cent of home production. On the other hand, exports in 1920 of these American sewing and embroidery silk threads to Canada alone exceeded $400,000 in value, while important quantities went to Australia and other countries. It is clear that if there is any industry in the United States which has been established beyond the slightest necessity of a fostering tariff tax it is that of sewing and embroidery silk. And yet in the very teeth of these facts the pending Republican tariff bill proposes to enact a duty increase of over 100 per cent on these articles of common use.

WASTE SILK THREADS USED IN MAKING POWDER BAGS FOR HEAVY ARTILLERY, INSULATED COVER FOR ELECTRIC WIRES, AND IN ACETYLENE-GAS CYLINDERS.

It should be said here that the type of waste silk fiber known as exhausted noils is used in making the powder bags essential to the most effective firing of heavy artillery and was in especial demand during the war. Silk is the best material for this purpose because it burns up quickly and leaves no smouldering residue. Silk from these short noils is used because it is about the least expensive way of securing silk for powder bags. Coarse-spun silk yarns were also utilized for this purpose during the World War. So we see that silk is quite an important factor in the national defense and in military operations. The exhausted noils are also used by woolen manufacturers in making mixed silk and wool goods and in making insulated cover for electric wires. They are also used in acetylene-gas cylinders.

PEIGNEE SILK YARN (DRESSED AND COMBED WASTE-SILK THREADS).

Before the silk waste is in shape for spinning it passes through a stage of partial manufacture, turning it into what is known as dressed and combed silk or peignee, a stage in which the unreelable fibers are cleaned and paralleled and tied at one end for further advancement toward spun-silk yarn. The shorter waste fibers, not under 2 inches long, are called long noils and are retained with the other cleaned threads for the next step toward the spun yarn, while waste fibers less than 2 inches long, called exhausted noils, are used as before indicated. Peignee, or dressed-silk yarn, is not made for sale in the United States, but is a mere intermediate stage between the waste-silk and the spun-silk yarn. The manufacturer of the spun-silk yarn obtains the best results when he makes his own peignee or dressed silk, and knows the exact nature of the waste silk employed in producing it. It is very difficult to determine this from peignee made by others.

Prior to the World War it was the custom for domestic spun-yarn mills to make their own peignee, and their machinery was balanced accordingly. During the war the demand for powder-bag cloth absorbed not only the short noils but the coarse yarn spun from peignee to such an extent that peignees were imported into the United States in considerable quantities for the first time in history. The silk boom in 1919 caused this accelerated importation to continue, with the result that several domestic spun-yarn mills enlarged their finishing machinery with a view to reliance on imports for peignee material. Also, combined European silk interests have established a spun-silk plant in the United States to convert into spun yarn here the peignee it makes abroad. The Tariff Commission estimates that 7,300,000 pounds of peignee were produced in the United States in 1918 and that 810,950 pounds were imported. Peignee imports come principally from Japan. Domestic mills have not yet demonstrated, however, that foreign peignee can be profitably worked up here, and this is due to its variable and uncertain quality. Furthermore, Japan is the only country making surplus peignee for export, and domestic producers relying on this foreign supply would be in a dangerous situation either in case of monopoly control in the country of export or in case of war. For military reasons, if for no other, the peignee industry should be maintained in the United States, and the present duty of 20 cents a pound is sufficient for that purpose. Because peignee represents an intermediate stage of production it is very difficult to determine its value, and ad valorem duties would be especially hard to administer. Therefore the Underwood-Simmons Tariff Act of 1913, which placed all other silk items under ad valorem duties, imposed a specific duty on peignee under the definition of silk partially manufactured from cocoons or from waste silk and not further advanced or manufactured than carded or combed silk—that specific duty being 20 cents per pound.

When it is recalled that in 20 of the 27 years prior to 1917 imports of peignees were less than 1,000 pounds per annum; that in 5 of these 27 years none at all came in; that in the remaining 2 years these imports amounted to 16,000 and 17,000 pounds, respectively; that the sudden rise in imports was due to abnormal war and after-war conditions; that the most successful makers of spun-silk yarn are those who develop their own peignees with their own machinery from their own waste silk, and that it is unsafe for them to rely on a foreign product with the raw material of which they have no definite knowledge; that so far the use of imported peignees by domestic manufacturers has not led to satisfactory results, this being due to the unsteady and uncertain quality of the foreign ar-

ticle—all these facts make it very questionable whether the importations will not revert on the advent of normal conditions to their former insignificance.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Texas yield to the Senator from Connecticut?

Mr. SHEPPARD. I yield.

Mr. McLEAN. I understood the Senator from Texas to say that there were no imports of peignee of any consequence.

Mr. SHEPPARD. I did not say that.

Mr. McLEAN. I may have misunderstood the Senator.

Mr. SHEPPARD. On the contrary, I gave the figures provided by the Tariff Commission. There were imports of 810,050 yards in 1918, but during that year 7,300,000 yards were made in this country. I say to the Senator that I admit the peignee industry ought to be maintained in this country and that there should be a duty. I take the position, however, that the present duty of 20 cents a pound is sufficient.

Remember, also, that the waste silk is put through numerous processes before reaching the peignee state, processes such as degumming, which involves proper mixing of the different kinds of waste silk threads, boiling, scouring, drying, restoration of natural moisture, softening, and storing; processes such as opening, lapping, filling, dressing, combing, and so forth—most of these processes being of a technical nature, requiring to a large extent expert adult male labor, and the advantage of a home producer who conducts these processes in his own plant and under his own supervision over a producer importing peignees is readily seen. Observe further that under the existing Democratic duties on peignees and spun-silk yarns the spun-silk business has gone forward with tremendous strides, more than trebling its output from 1914 to 1920—that is, increasing its production from 2,500,000 pounds of spun-silk yarn in 1914 to 6,700,000 pounds in 1920—and it will be hard to find excuse for the proposed increase of the present tariff rate of 20 cents per pound to the 55 cents carried in the Senate bill, an increase of nearly 200 per cent.

SLIVER YARN, DRESSED.

The peignees—i. e., dressed and combed waste silk threads—are next drawn by machinery into a loose rope without any twist called sliver. Before we take up the succeeding step toward the spun-silk yarn it will be well to quote here in full paragraph 1201 of the pending bill. It is as follows:

Silk partially manufactured, including total or partial degumming, from raw silk, waste silk, or cocoons, and silk noils exceeding 2 inches in length, or silk and artificial silk, all the foregoing not twisted or spun, 55 cents per pound: *Provided*, That none of the foregoing shall pay a less rate of duty than 35 per cent ad valorem.

The Senate Finance Committee have proposed an amendment striking out the specific rate and providing a general rate of 35 per cent ad valorem, still involving an increase which I consider to be entirely without justification. I shall attempt to demonstrate this later.

I have already shown that the clause in this paragraph purporting to relate to silk partially manufactured from raw silk not twisted or spun is meaningless. I have already cited facts showing that the proposed duty of 35 per cent on silk partially manufactured from waste silk or cocoons and silk noils exceeding 2 inches in length—that is, on what is known as peignees—is beyond the pale of apology. It might be well to say here that the words "including partial or total degumming" were inserted because of a recent customs decision holding that the mere degumming of raw silk or waste silk—that is, the softening of the natural gum on the fiber by the simple method of boiling in soap and hot water—did not change the state of the fiber, and that the degummed fiber should come in without duty as raw silk or silk waste, as the case might be. The clause in the pending bill subjecting the raw fibers to a duty of 35 per cent merely because they have been soaked in boiling water is but another instance of the voracious motive behind the entire measure. The next stage after that of the peignee is, as we have seen, the sliver, the drawn rope of peignee fiber, and sliver would be dutiable under this same paragraph if any should be imported. It represents so slight a stage of manufacture that competing importations are out of the question.

ROVING YARN.

The rope of threads called sliver is next made into what is termed "roving" by giving the sliver a slight twist by machinery on roving frames. Like sliver, roving is so slight a stage of advancement in manufacture that importation is not to be thought of. And yet, as we shall presently observe, it is subjected to a heavy duty. No roving is made for sale in this country and none is imported. Sliver is in the same condition. Both are made in the domestic spun-silk yarn factories of the United States as a part of the process of converting peignees into yarn.

SPUN-SILK YARN; ALSO KNOWN AS SCHAPPE SILK YARN.

The twisted rope of yarn known as roving is next put on bobbins and spun and further twisted into spun-silk yarn, technically known as schappe silk yarn, or to put it shortly "schappes."

Taking up the spun-silk yarn, we observe that its elaborate classification in the pending bill under a rate scale beginning with unbleached, undyed, uncolored yarn with a single twist and with a certain size estimated according to numbers and increasing as twists, numbers, dyes, and colors are added, and adding further duties if the yarn is placed on bobbins, spools, or beams, means an advance over existing rates of about 40 per cent.

By the way, the Senate Finance Committee have a belated amendment pending doing away with this elaborate classification, and it is therefore not worth while to allude to it further. The Senate Finance Committee have in effect abolished the extremely elaborate classifications in two or three paragraphs of the silk schedule dealing with the vast bulk of silk goods and adopted the plain and simple plan of statement carried in the existing Democratic tariff law. The new proposal involves an increase of the present rate on spun-silk yarn of 35 per cent to 40 and 45 per cent.

That any rate advance on spun-silk yarn is without reason is shown by the remarkable expansion of the spun-silk industry under the present duties. The processes of manufacture are so difficult, numerous, and technical that production on an extensive scale and large capital investments are required. The industry in the United States is in the hands of seven or eight firms, and its total output has grown from 1,617,416 pounds in 1914 to nearly six and three-quarter million in 1920—multiplying itself nearly five times in six years under the present tariff law. There are but four concerns making spun-silk yarn exclusively. The other three or four make the spun silk for their own finished product. It is true that importations average about one-third of the domestic production, but it is also true that they affect in the main but one branch of the spun-silk industry, to wit, certain types of velvet, and that the imported type is not yet successfully or generally produced here. Imports can not be said, therefore, to be seriously competitive with the greater part of the domestic industry. Besides velvet, spun-silk yarn is used in making plushes, piece-dyed broad silks, wool-mixed fabrics, powder-bag cloth, already described, knit goods, and so used to a constantly extending degree. These facts do not show any need for additional tariff subsidy in the production of spun-silk yarn or "schappes."

The rapid growth of the spun-silk yarn industry shows that the present high rate of 35 per cent meets whatever inequalities exist in competitive conditions. Indeed, the Tariff Commission reports that in machinery, raw material, organization, capital, and technique—except the technique necessary to certain types of velvet before referred to—the home industry can not be effectively assailed from abroad. Before 1910 spun-silk imports exceeded home production; since that time the domestic output has so quickly advanced that it has almost doubled importation.

SILK PLUSHES, VELVETS, AND OTHER SILK PILE FABRICS.

We now come to certain finished products made principally of spun-silk yarn, products known as silk plushes and velvets, used for making and trimming both clothes and hats, for imitation furs and seals, pile ribbons, chenille fabrics, draperies, furniture coverings, and so forth. They are also known as silk pile fabrics, a pile fabric being any textile fabric composed of a foundation cloth to which is attached at one end short threads or loops of threads making a hairlike surface. The word "pile" is evidently derived from the Latin "pilus," meaning hair. The short projecting threads form what is called the pile. Most silk velvets and plushes are woven in this country with a pile fashioned from spun-silk yarn and a foundation cloth of some other textile material. Pile fabrics composed wholly of silk—that is, with both foundation cloth and pile of silk—are not made to any large extent in the United States, and such as are used here are mainly brought from abroad. Very few velvet ribbons and no plush for hats are made as yet in the United States.

Silk plushes and velvets form another distinct branch of the American silk industry—a branch that has grown enormously and always enjoyed a high degree of protection under both political parties. The Underwood-Simmons Tariff Act of

1913, the act now in force, gives these articles a rate of 50 per cent ad valorem, paragraph 314 of that act reading as follows:

Velvets, plushes, chenilles, velvet or plush ribbons, or other pile fabrics, composed of silk or of which silk is the component material of chief value, 50 per cent ad valorem.

These articles have never had a smaller degree of protection than 50 per cent, and the pending bill proposes to increase that generous figure about 20 per cent.

In 1914 silk velvet had a domestic production of 16,318,000 yards, valued at $8,570,022; silk plush, 9,115,000 yards, valued at $10,136,000. In 1919 silk velvet had a domestic production of 16,150,000 yards, valued at $20,950,000; silk plush, 5,860,000 yards, valued at over $10,000,000. Imports had a total value of $4,171,390 in 1914, $440,780 in 1919, and $1,157,410 in 1920. Imports in 1920 were less than half of 1914 entries and about half of the average yearly imports through 30 years. Imports consist mainly of all-silk velvets, high-grade specialties, velvet ribbons, all of which are produced to a very small degree or not at all in the United States, and do not compete, therefore, with the mass of American silk plush and velvet production. In fact, an export trade of important proportions has developed since the war, Canada alone receiving from this country silks and velvets to the value of $563,866 in the fiscal year of 1920. In view of these circumstances it is hard to see why there should be an increase of duty over the high protective rates now enjoyed by this branch of the American silk industry. Hatter's plush requires attention at this point. For many years hatter's plush has been placed in the sundry schedule of both Republican and Democratic tariff acts at a rate of 10 per cent ad valorem.

This was done because no hatter's plush was produced in this country, and for a number of years was not imported in sufficient quantities for any particular notice. However, from an average annual value of $46,000 from 1895 to 1909 imports began to increase in 1910, rising to $170,777 in 1914, $445,070 in 1917, and $539,939 in the first nine months of 1921. This is due to the fact that hatter's plush has come to be widely used for women's hats and for a number of general millinery purposes. In view of this widened use the pending bill transfers hatter's plush from the sundry schedule to the velvet and plush paragraph of the silk schedule where it properly belongs. It is claimed by plush manufacturers here that with a proper duty this article can be successfully made in the United States. Inasmuch, however, as the domestic velvet and plush manufacturers have done so well with all other lines it would seem that they should not ask for a larger rate on hatter's plush than they now enjoy on these other lines and in which they have established themselves so firmly.

BROAD SILKS.

Of remaining finished silk products it may be said that in general they are woven from the silk yarns which had themselves been woven from the raw silk reeled from the unpierced, normal, undamaged cocoon. The spun silk yarns derived from the threads called silk waste and originating in the damaged or imperfect cocoons and in left-over fibers of certain milling processes are also used in these products to a minor extent.

Of these remaining products, by far the most important is that known as broad silk. Indeed, "broad silks," a term including all woven silk fabrics in the piece over 12 inches wide, of which silk is the component material of chief value, except bolting cloth, a silk cloth imported especially for milling purposes, so marked as to be unavailable for any other use and admitted free of duty in both existing law and the pending bill, or except when embroidered, tamboured, appliquéd, or made wholly or partly of lace, netting, veiling, and so forth, constitute the largest branch of American silk production. Their principal use is for women's dress goods, linings of all kinds, shirts, ties, underclothing, furniture coverings, draperies, and so forth. Their manufacture requires about half of all the imports of raw reeled silk, and substantial amounts of spun-silk yarn, artificial silk yarn, and yarns of cotton, wool, and mohair. Their output in this country amounted in 1914 to 216,034,000 yards, and to a value of $137,720,000, more than half the total value of domestic silk manufactures in that year. In 1919 the output amounted to 307,104,000 yards, and to a value of $391,225,000, about 44 per cent of the value of all domestic silk products in that year. In the main these articles are made of standard weaves from silk yarns of high quality and of strong fiber, adapted to machinery production on a large scale. Skilled labor is required to a considerable degree, and in recent years home producers have added fancy qualities to the usual standardized types. Imports total about 6 or 7 per cent of internal output, averaging about two and a half million pounds per year during the four fiscal years from 1916 to 1920, inclusive. Exports in 1919 had a value of $10,225,376; in 1920, $8,775,079; during the first nine months of 1921, $2,542,244. The average exports per year during the period from 1916 to 1920, inclusive, has far exceeded the average imports.

In 1914 imports of broad silks came from the following countries in the percentages indicated: France, 52.1 per cent; Switzerland, 12.2 per cent; Japan, 24.8 per cent; China, 1 per cent; other countries furnishing the remainder. In 1921 Japan had jumped to 71.1 per cent, France had fallen to 10.3 per cent, Switzerland had fallen to 4.8 per cent, while China had increased to 5.5 per cent. This means that the United States has practically preempted the field of high-quality silks of the kind made in Europe, finding these more profitable than the lower-type goods, such as Japanese habutai and other light weights, Chinese pongee from wild tussah silk yarn, and so forth. For the most part these last-mentioned products from the Orient are not made here, and supplement the domestic market rather than seriously compete with the mass of standardized high-grade American silks. Some of these, it is true, are made or can be made in the United States, but our manufacturers find the better types more responsive to skilled labor and efficient quantity production.

It may be instructive to cite one or two instances of the success with which American manufacturers supplant European producers in the making of high-class silks. The most important article in the broad-silk trade from 1916 to 1920 was that known as georgette. It originated in France in 1912, and thousands of pieces were imported into the United States in 1913, 1914, and 1915. By 1916, however, the American factories were making it to such an extent and so successfully that with the help of the Democratic tariff rate of 45 per cent they shut out importations altogether in another year or so. Again, in 1910 there originated in France a popular and fashionable silk article known as crêpe grosgrain, or Canton crêpe. It was imported into the United States in large quantities, but in a short while American producers were making it so extensively and so efficiently that the Underwood-Simmons tariff rate of 45 per cent became a complete bar to the foreigner.

With this rate in operation the domestic manufacturers of broad silks have obtained command of the home market. Imports consist either of novelties, specialties, and exceptional grades from Europe, which consumers take regardless of price, and which our own producers import for their own instruction, or of cheap types from the Orient, which home industry either does not make or does not care to make. To add a higher duty is to give what is already a practical monopoly on the part of domestic industry in all kinds of standard silk dress goods a wider license to levy tribute on the American home. And yet the pending bill proposes an increase of about 22 per cent over the present rates on the fabrics now under discussion.

SILK KNIT GOODS.

Second in value to broad silks among finished silk products are silk knit goods, goods made on knitting machines mainly from tram yarn, a yarn thrown or twisted, as we have seen, from reeled raw silk, although spun yarn from silk waste and artificial silk yarn are used to a small extent. Among the principal kinds of silk knit goods in the order of their importance are hosiery, outer wear, including sweaters, scarfs, dresses, etc., gloves, underwear, neckties, knit fabric, thread, yarn, etc. The value of the silk knit goods output had a sensational rise from $41,262,000 in 1914 to $234,927,000 in 1919. Imports have been so small that serious foreign competition can not be said to exist. They have averaged less than $500,000 in value per year during the 30 years from 1891 to 1920, inclusive.

In 1914 they were less than one-half of 1 per cent of domestic production; in 1916 about one one-hundredth of 1 per cent. Exports are in material excess over imports. Notwithstanding the position of absolute security from foreign competition which the domestic silk knit-goods industry has held under the liberal 50 per cent duty of the existing tariff law, the pending bill proposes an increase to 55 and 60 per cent.

SILK RIBBONS AND OTHER SMALL SILK WARES.

Third in value after broad silks and second to knit goods are silk ribbons, the production of which in this country rose from a value of $38,000,000 in 1914 to $66,000,000 in 1919. They are made principally from the thrown silk yarn, the yarn derived, as we have several times observed, from the reeled raw silk, but spun silk yarn as well as cotton, artificial silk, and other yarns are sometimes employed.

Imports are comparatively small and are confined to exceptional qualities not made in the United States. The home industry makes ordinary standard grades and is independent of competition from abroad. In fact, foreign manufacturers do not attempt to compete with home producers in making the staple article, and, furthermore, ribbons produced here are exported in small quantities to Canada and Latin America. The existing Democratic rate of 45 per cent ad valorem and

the high-speed multiple-shuttle ribbon loom, operating on a maximum volume basis, long ago put the overseas competitor out of the running. Nevertheless the Senate Finance Committee, running true to form, proposes an increase to 55 per cent. Silk ribbons are included in paragraph 1207 of the pending bill, which reads as follows:

Fabrics with fast edges, wholly or in chief value of silk, not exceeding 12 inches in width, including ribbons and articles made therefrom, tubings, garters, suspenders, braces, cords, tassels, and cords and tassels; all the foregoing composed wholly or in chief value of silk or of silk and india rubber, not embroidered in any manner by hand or machinery, and not specially provided for, 55 per cent ad valorem.

The items in this paragraph are called small silk wares and include, besides ribbons, narrow fabrics not over 12 inches in width made on ribbon looms from the thrown yarns, and a number of articles not woven but made directly from the reeled silk threads. Among these articles are hat and cap bands; borders or finishings for dresses; thin taffeta ribbon binding in all staple colors; bindings for tailored garments; bindings for carpets and blankets; inner belting for skirts and waists, insuring proper adjustment; casings for corset steels and "boning" used in dressmaking; elastic banding and webbing containing rubber threads and used for braces, various kinds of supports, surcingles, suspenders, and garters; tubings, cords, tassels, garment labels, fishlines, and so forth.

Imports of these articles reached the highest point during the 30-year period from 1891 to 1920 in the year 1897, when they amounted to $1,221,528. From that point they declined to $489,830 in 1913 and to $434,185 in 1921. Domestic production runs into the tens of millions. Probably more than 50 per cent of the imports now consist of hatbands from Germany, and it is evident that they compete with this particular silk small ware. This leaves practically all the other small wares without the slightest shadow of competition, and the proposal to increase the high protective rate of 45 per cent they already have to a still higher level is as absurd as it is unjust. There may be good reason for leaving the existing rate on hatbands undisturbed. Certainly there is no excuse for increasing the rates on these other wares of common, everyday household use.

SILK HANDKERCHIEFS.

The next article to invite our attention in the silk schedule is the silk handkerchief. Its status is another illustration of the tendency of American manufacturers to make the high-grade, standard silk products and leave the cheaper types to the Japanese habutai and other forms of light-weight silk fabric. The demand for silk handkerchiefs is so unsteady and variable in the United States, their manufacture in Japan from untwisted or unthrown reeled-silk threads so simple a process requiring no especial skill, that the American producer finds he can employ machinery and skill to far better advantage in the higher types of silk fabrics. The result is that there is no separate silk-handkerchief industry in this country; it exists in connection with the broad-silk manufacture or with the making of other kinds of handkerchiefs, and that perhaps 90 per cent of the supply in the United States comes from Japan, as does about 90 per cent of the world's supply. Such silk handkerchiefs as are produced here are either loom-woven from thrown silk or cut from broad-silk fabrics. Importations of silk handkerchiefs had a value in 1920 of nearly $2,000,000, having risen to that figure from $370,955 in 1914. They consist mainly of the cheapest grade of women's silk handkerchiefs, the average unit value being less than $1 a dozen. Under the present tariff law there are three classifications: (1) Silk handkerchiefs, if cut, not hemmed, or hemmed only, bear a duty of 40 per cent; hemstitched or imit..tion hemstitched, 50 per cent; embroidered or lace trimmed, 60 per cent. These are unusually high rates, and yet they have failed to establish a domestic industry. Thus the cheap silk handkerchiefs are made to pay a revenue burden out of all proportion to other articles. Notwithstanding these facts, the Senate Committee on Finance insists on raising all the present duties on silk handkerchiefs, and mufflers as well, to 55 per cent and 60 per cent. As a matter of fact and justice, the duty on these common, cheap articles, a luxury within easy reach of all, should be lowered materially, if not abolished altogether. The duty is a purely revenue duty, carries no protection, because no industry exists of sufficient size to profit by it, and could be reduced without injury to any and with justice to all.

READY-MADE SILK WEARING APPAREL.

The silk product next to be considered is that which may be roughly classified as ready-made silk wearing apparel, including all principal types of male and female wear. This branch of the silk industry consumes nearly all the broad silk cloth before described and, in fact, utilizes every existing form of woven silk goods. It operates on so efficient a basis that competition from other countries is out of the question. In fact, exports of silk wearing apparel made in the United States increased from $2,556,166 in 1918, the first year they were officially recorded, to $10,016,045 in 1920. They declined in 1921 on account of the general business depression, but they still exceeded imports by a million and a half dollars. This is sufficient to show the establishment of the domestic industry beyond the reach of foreign competition. No definite figures are available as to home production because the industry usually exists in connection with the making of garments from other textiles, but it is the statement of the Tariff Commission that it supplies nearly all the demestic consumption. Imports consist mainly of special types for which there is a special demand, and had a value of something like $2,000,000 in 1920. The Tariff Commission also states that in this division of the silk industry the efficiency of American labor offsets the difference in wages paid at home and abroad, and that other conditions are at least equal, that women's wearing apparel is imported from France chiefly for ideas and not for sales, and in deference to the world ascendancy of Paris in the matter of styles. The duty of 50 per cent in the present Democratic tariff law on silk wearing apparel is unnecessarily high, but the Senate Finance Committee, wedded to its idols, proposes an advance to 60 per cent.

ARTIFICIAL SILK.

We now come to a form of silk not derived from the cocoon but made by chemical processes from the cellulose of plant tissue—namely, artificial silk. It is more lustrous than real silk, but heavier, weaker, less elastic, and harder to manipulate. It is much cheaper than the real article and is used chiefly for hosiery and other knit goods, silk and cotton weaving, braids, plush goods, tapestries, embroideries, and so forth. It has certain other uses which do not directly compete with those of natural silk.

The domestic output of artificial silk has grown from 1,566,000 pounds in 1913 to 15,000,000 pounds in 1921. Before the World War it rarely equaled as much as half the internal consumption, but after the war in 1919 and 1920 it equaled 88 per cent of that consumption. Prior to those years one corporation manufactured practically all the domestic output, the American Viscose Co., of New Jersey, a corporation whose stock is controlled by an English artificial silk firm. New plants with varied processes have since started, and a distinct increase in the domestic supply both in quantity and variety has developed. All this has come about under the present rate of 35 per cent ad valorem on artificial silk yarns and 60 per cent on the finished product. The pending bill proposes a specific duty of 35 cents a pound on partially manufactured artificial silk waste; on yarns of various types 45 cents, 50 cents, and 60 cents, respectively, none of these rates to be less than 35 per cent ad valorem, and on finished products 45 cents per pound, plus 60 per cent ad valorem. The proposed rates involve an increase of about 11 per cent on artificial silk fabrics and of 14 to 28 per cent on artificial tram and organzine silk yarns, respectively.

The Senate Finance Committee has since offered amendments changing these rates to some extent. I shall discuss that phase of the matter a little later.

It should be said here that an additional type of artificial silk comes from imitation horsehair, and that this type, both in yarn and finished product, is included in the paragraph of the pending bill relating to artificial silk.

Two processes are principally used in making artificial silk—the viscose and the nitrocellulose. In the former wood pulp is reduced by treatment with caustic soda and carbon bisulphide to a viscous or semifluid mass, and this is converted into filaments or threads. In the latter cotton linters are nitrated into gun cotton, the gun cotton reduced to a viscous, or semifluid mass, which is then converted as in the other process.

The Tubize Artificial Silk Co. of America, a company recently organized, has invested about $7,000,000 in the erection of a plant using the nitrocellulose or cotton linter process at Hopewell, Va., where they are already employing 2,000 people, men and women, with a daily output of 6,000 pounds of yarn per day, the ultimate capacity in view being 10,000 pounds per day.

This process was the first used for making artificial silk, having been discovered by Chardonnet in 1885. It is owned by an artificial silk concern in Belgium, the Fabrique Soir Artificiale. R. H. Murray, of the Tubize Artificial Silk Co. of America, said before the Ways and Means Committee of the House that his was a new company, associated with the Belgian organization, whose processes the new company had bought for American use. He did not say on what terms the old and the new company were associated, or what royalties or what control would be enjoyed by the foreign company.

In addition to the almost miraculous development of the artificial silk industry in the United States it should be noted that its exports to other countries had a value of $3,406,191 in the calendar year of 1918, $9,694,248 in 1919, $7,909,299 in 1920, and nearly $3,000,000 during the first nine months of 1921. Imports in the calendar year of 1918 were valued at $36,577; 1919, $129,154; 1920, $726,438; in 1921, first nine months, $319,354.

Mr. Simon Rosenau, of Philadelphia, representing manufacturers of artificial silk goods, said before the Ways and Means Committee of the House that the manufacture of artificial silk fabrics and garments was growing tremendously and would in the near future be as large as the real silk industry.

It is little less than scandalous that an industry like that of artificial silk, which under exceptionally high duties has had so wonderful an expansion—multiplying itself fifteen times in less than a decade, established so firmly that its exports run into the millions while imports remain less than 5 per cent of the home output—should ask and secure the imposition of higher tariff taxes on some of its products. While there may be a slight reduction on its finished products, the Senate Finance Committee has recommended a substantial increase on artificial silk yarns, an increase from 35 per cent under existing law to 40 and 50 per cent. The present rate on finished products of artificial silk is 60 per cent. This is slightly reduced. The reduction should be greater.

THE "CATCH-ALL" OR BASKET CLAUSE.

Lest some form of silk manufacture might possibly escape the most elaborate, comprehensive, and exorbitant duty scheme ever devised, the rate in the "catch-all" or basket paragraph of the silk schedule is increased in the pending bill to 60 per cent. In the existing tariff law the basket duty is 45 per cent. Truly, the "catch-all" clause in the pending bill is all that its name implies. It is contained in paragraph 1213 of the bill under debate, which reads as follows:

PAR. 1213. All manufactures of silk or of which silk is the component material of chief value, not specially provided for, 60 per cent ad valorem.

CONCLUSIONS.

The growth of the American silk industry is an illustration of those American qualities of initiative, energy, vision, creation, and execution which rank among the marvels of modern times. The Aladdin of American genius touched the lamp of American skill and resource, and, behold, a domestic silk production valued at $295,000,000 in 1914 swept to a value of $895,000,000 in 1919. Rarely has such a development been equaled in commercial annals; rarely, if ever, has it been surpassed. So rapid has been its progress that the American silk industry is to-day the largest in the world and the third greatest form of textile manufacture in the United States. It consumes probably three-fourths of the world's crop of raw silk. Its command of the home market is shown by an importation of finished silk products in 1914 valued at only $34,797,000, which increased to but $53,000,000 in 1919, about half of which was in bonded warehouses and not intended for local consumption. Internal output almost trebled, while the ratio of imports dropped more than half in the short space of five years.

If anything could be more astounding than this expansion it would be the audacity of the proposal in the pending tariff bill to enlarge the tariff duties on silk imports in the face of the record under existing rates. The silk makers themselves were by no means a unit on such a course. Several producers urged the retention of present tariffs at the hearings before the proper committees of Senate and House. They pointed to the world leadership of this country in the fabrication of silk—to the practical monopoly it had established here in standard goods of general use—and to the fact that with high-speed machinery, volume production, efficient labor, ample capital, and aggressive management it presented a front of adamant to the assaults of foreign rivals.

The average rate of 45 per cent ad valorem on silk imports in the Democratic tariff act which has been in force since 1913 and which the Republican Party is about to increase has proved to be not only a distinctly protective duty but in many instances a prohibitive one. The Democratic Party levied so large an impost on the theory that silks were luxuries. It is clear, however, that to-day many silk or part-silk articles, among which may be mentioned surgical threads and other medical supplies, insulated coverings for electric wires, cheap handkerchiefs, household furnishings, standard dress goods, dress accessories, coffin linings, and so forth, are of such widespread use among the American people that to a material and growing extent they may be classed as comforts and in some instances as necessities. They help to form that mass of useful commodities which find a more general distribution in the United States to-day than in any other country and which make possible what is known and envied everywhere as the American standard of living. American labor, the most active and effective on earth; American capital, the most colossal and the most efficient in the records of finance; American environment and opportunity, to date the fairest and most unfettered that ever spurred achievement or sustained ambition—all these have united to surround our present population with the most varied and available supply of the articles of material welfare and development history has yet noted.

The enlargement of that supply is one of our fundamental problems. It is not yet large enough to place within the reach of every citizen of energy and intelligence the requisite quantity of the commodities that assure healthful, comfortable, hopeful life. It may be carried to that happy end if relations of harmony and confidence and mutual solicitude prevail among labor and capital and Government. The growing shadow on our economic progress and on our civilization is the hostility now arising between purveyors of capital and managers of enterprise on one side, the hosts of physical toil upon the other. How unfortunate it is that at this critical hour the party in control of Government should lash the troubled waters into further fury by the imposition of the most oppressive tariff taxes in American annals—taxes on nearly everything of human necessity and use, from the swaddling bands of infancy to the shrouds of the dead—taxes which, as in this silk schedule, buttress monopoly and invite extortion; taxes which reveal this Government as the instrument of privilege, no longer the exemplar of equal opportunity; taxes which will do much to undermine the spirit behind the economic structure that brings to the American citizen more of the satisfactions, enjoyments, substantials, safeguards, and even luxuries of life than has yet been realized in this or any other land.

Mr. McLEAN. Mr. President, I think if I knew as much about raw silk as the able Senator from Texas [Mr. SHEPPARD] knows about raw wool, I would be able to get a unanimous vote on this schedule. The Senate will remember that the Senator from Texas, who has just delivered his illuminating essay on the silkworm, voted for a tariff of 129 per cent ad valorem on the low-grade coarse varieties of wool. I voted with him, because I am certain that unless we protect the sheep industry in this country woolen cloth will be more expensive than silk cloth in a very few years.

The rates in this schedule, although they are imposed upon a luxury, a class of goods which ordinarily bears high taxes, as do wines and tobacco, are less than half of the duties on raw wool. The highest rate in this schedule is on velvets—60 per cent ad valorem. That is only 10 per cent higher than the Underwood rate, or revenue rate. The next highest is 55 per cent on silk cloth, broad silks, and that is only 10 per cent higher than the rate in the Underwood law. The rates on the yarns and the partly finished products are based upon the best information the committee could get, information gathered partly from the Reynolds report and from a very careful estimate of manufacturers' costs of silk goods in this country, and I want to say that those rates in no case give more than reasonable protection to the industry.

The chairman of the committee, the Senator from North Dakota [Mr. MCCUMBER], said that the price of silk now was something like $6 a pound. That is true with regard to the fine reeled silk, but a very large percentage of the product is called waste silk, taken from the punctured cocoons. The price of that is very much less, and from that product a very large percentage of the goods which compete with our goods is made in China and Japan.

It is unnecessary for me to call the attention of the Senate to the importance of this industry. It employs something like 140,000 men and women, which means that half a million people in this country are dependent on the industry, and the industry is now working on half time.

The first real protective tariff on silk was imposed in 1864, which, if I remember correctly, was an ad valorem rate of 60 per cent upon the finished goods. The raw silk has come in free since that time, as we all know. The effect of that tariff I think is the most graphic illustration of the benefit of the protective principle that we have, because the raw material is all imported, and the growth of this industry and its development, depending as it does upon importations for its raw material, have been remarkable, and its history, it seems to me, is a complete answer to the arguments to which we have listened for weeks and months, emanating from the other side of the Chamber, and which attempt to discredit the committee and the pending bill because of the taxes which they insist are imposed by protective duties.

The arguments to which we have listened from the distinguished Senator from North Carolina [Mr. SIMMONS] and the Senator from Massachusetts [Mr. WALSH] and others, denouncing the rates in this bill, especially those applying to the woolen and cotton industries, as taxing the American people in enormous sums, have no significance whatever and are of no value whatever in measuring the merits or the demerits of the principle of protection as a permanent national policy.

When a State builds a university, it does not estimate the value of that university in the cost of the construction of the college buildings, and when a State or a county builds a highway, they do not measure the value of that highway to the public by the cost of its construction. Yet gentlemen on the other side of the Chamber confine their arguments against this bill entirely to the cost of the article in the year succeeding the imposition of these duties. The experience we have had with the silk industry, as I have said, demonstrates that those arguments have no significance whatever when they undertake to measure the benefits of protection as a permanent policy.

Mr. President, as I have said, the industry was established after 1864. They made silk in this country as early as 1843. In 1843 the employees worked 72 hours a week and received 6 cents an hour. That meant $4.32 a week. In 1921 the employees in the industry averaged about 48 hours a week and were paid about 49 cents an hour. In 1868 the common grosgrain silks sold for $3 a yard. In 1914 they sold for 60 cents a yard.

Mr. KELLOGG. What are they selling for now?

Mr. McLEAN. The Senator knows that since the war prices of all silks have increased, and I can not tell the Senator what the price of this particular article is to-day. It is higher, but I am confining my illustration to normal times.

We have here an illustration of the effect of protection upon an industry where we have to import all the raw materials. Mr. President, a day's work to-day in this country will buy from five to six times the silk goods that it would in 1868. That is precisely what always happens when we have a protective duty upon a legitimate industry where natural conditions are comparable with those of our competitors.

I will repeat what I said to the Senator from Texas a few moments ago. I voted for the tariff upon wool because I know that our flocks decreased from 65,000,000 to something like 45,000,000 under free wool, and I know that but for the protection which the industry has had the sheep industry in the country would have been destroyed and we would have been entirely dependent upon the producers of wools in foreign countries. Once that is the case, woolen clothing would bring all the trade would bear, and that means that it would bring all the foreign monopolists desired to charge us.

Mr. President, when the Dingley bill was framed a system of specific duties was applied to the silk schedule, owing to the price of silks at that time. That same policy was followed in the Payne-Aldrich Act; that is, the specific rates were continued, and for the same reason. When the Ways and Means Committee of the House, something like 18 months ago, framed this schedule they adopted the specific rates. At that time it was realized that they would be inoperative, owing to the price of silk, but it was thought best to retain them as a sort of gun behind the door, and they were retained. They were retained by the Finance Committee of the Senate when it first considered the schedule; but upon giving the matter further consideration, realizing that the specific rates would not operate, we thought it best to recommend ad valorem duties, with one or two exceptions.

With regard to the first paragraph which comes up for consideration, I do not know whether the chairman of the committee presented the amendment or not. If not, I ask that the first amendment be reported.

The PRESIDENT pro tempore. The Secretary will report the first amendment in the schedule proposed by the Committee on Finance.

Mr. SHEPPARD. Mr. President, before the amendment is reported I want to say to the Senator that I voted for the duty on raw wool because I propose to do what I can while the bill is being perfected to see that duties are levied on the products of the ranch and farm as well as on those of the factory. If we are going to have a policy of protection let it be applied without discrimination as between products and sections. When the time comes to vote finally on the entire bill I shall, of course, vote against it.

Mr. McLEAN. I assume that the Senator from Texas voted for the duty on raw wool because he thought it was justified. It was 129 per cent ad valorem.

Mr. SHEPPARD. Certainly it is justified when the duties on the finished product are considered. It may also be justified on its own account. At any rate let there be no discrimination between the raw material and the finished product.

SILK SCHEDULE.

The PRESIDENT pro tempore. The Secretary will state the first amendment.

The READING CLERK. The first amendment of the Committee on Finance is on page 154, in paragraph 1201, in line 13, to strike out the word "manufactured" and insert "manufactured, including total or partial degumming," so as to read:

PAR. 1201. Silk partially manufactured, including total or partial degumming from raw silk waste silk or cocoons, etc.

Mr. McCUMBER. Some time ago we offered certain amendments changing the phraseology entirely. I will send a copy of those amendments to the desk.

The PRESIDENT pro tempore. The committee withdraws the amendment just stated and substitutes therefor the amendment which will be stated.

The READING CLERK. On page 154 strike out lines 13 to 19, both inclusive, and insert in lieu thereof the following:

PAR. 1201. Silk partially manufactured, including total or partial degumming other than in the reeling process, from raw silk, waste silk, or cocoons, or silk and artificial silk, and silk noils exceeding 2 inches in length; all the foregoing not twisted or spun, 35 per cent ad valorem.

Mr. SHEPPARD. I move to amend the amendment proposed by the committee by striking out the words "from raw silk," in line 5 of the amendment as printed.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Texas to the amendment of the committee will be stated.

The READING CLERK. In line 5 of the committee amendment as printed the Senator from Texas moves to strike out the words "from raw silk."

Mr. SHEPPARD. I do this because there is no such article as that described by the language I propose to strike out. The raw reeled silk comes in free. The next manufactured form is known as thrown silk. It is given a separate duty under another paragraph of the bill. There is no intermediate manufactured form. It is true that the raw reeled silk might be wound on spools or tubes, and in that form become dutiable under this paragraph, but there would be neither justice nor sense in such a proceeding. Surely the winding of the reeled raw silk on tubes and spools could not be called a stage of manufacture, such a stage as to call for a separate duty.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Texas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

Mr. McLEAN. Does the Senator from Texas wish to comment further upon rates?

Mr. SHEPPARD. Yes. I move to strike out "35 per cent ad valorem" and insert "20 cents per pound."

The PRESIDENT pro tempore. The Secretary will state the amendment now proposed by the Senator from Texas.

The READING CLERK. On line 7 of the amendment as printed the Senator from Texas moves to strike out "35 per cent ad valorem" and insert "20 cents per pound."

Mr. SHEPPARD. May I ask the Senator from Connecticut a question? What is the meaning of the expression "or silk and artificial silk"? Is that the finished product? What is intended by that language?

Mr. McLEAN. That is where they mix silk and artificial silk.

Mr. SHEPPARD. Does the Senator mean silk manufactured from silk and artificial silk?

Mr. McLEAN. Yes.

Mr. SHEPPARD. What is the kind of cloth to which that term applies?

Mr. McLEAN. It is described here. They mix the real silk with the artificial silk. The Senator knows that artificial silk is made from cellulose prepared from wood. The nitrates are removed by the use of caustic potash. I am not familiar with the process, but it is all conversion cost, and the rate has to be fully as high upon the artificial silk as it does upon the real silk.

Mr. SHEPPARD. Very well. On my motion to substitute 20 cents per pound for 35 per cent ad valorem I desire to call attention to the fact that the price per pound of the silk yarn referred to in the paragraph as made from reeled raw silk is

about $8, so that the existing duty of 20 cents a pound would be nearly 3 per cent ad valorem. In this form the reeled raw silk would be wound on spools or tubes, the only intermediate step between reeled raw silk and the thrown yarn. Very little, if any, is so imported, however. If by any chance there should be any importation, the proposed ad valorem of 35 per cent would represent an increase of about 1,000 per cent over the existing ad valorem of 3 per cent.

Mr. McLEAN. The Senator is entirely mistaken about the value of silk.

Mr. SHEPPARD. It certainly could not be less than the raw reeled silk.

Mr. McLEAN. It will be seen by the Reynolds report that it runs from $2.50 up.

Mr. SHEPPARD. When the Senator speaks of $2.50 silk yarn he is evidently referring to the artificial silk.

Mr. McLEAN. Oh, no; not artificial silk.

Mr. SHEPPARD. The Senator did not allow me to conclude. I make the statement that the price of raw reeled silk to-day is around $8 per pound.

Mr. McLEAN. Yes; the reeled silk.

Mr. SHEPPARD. The raw reeled silk. Winding it on spools and tubes and bringing it in under the proposed paragraph would not lessen its value.

Mr. McLEAN. The very fine silk which is reeled comes from perfect cocoons and is $6 per pound. A very large percentage of the material is from the waste silk, and that, it will be seen, runs from $2 a pound up.

Mr. SHEPPARD. But this paragraph professes to include yarns made from raw reeled silk as well as the threads from waste silk.

Mr. McLEAN. The importations are all from the waste silk, or nearly all. The importations are from the cheaper grades of waste silk, because they know how to handle them over there so much better than we do.

Mr. SHEPPARD. That is true, but if any of the reeled raw silk should come in on spools or tubes it would surely be worth as much as the reeled raw silk itself, to wit, about $8 at present.

Mr. McLEAN. It is only the waste silk that comes in, I will say to the Senator.

Mr. SHEPPARD. I am entirely willing to argue the matter on that basis also.

Mr. McLEAN. If the Senator will pardon me, I would like to make a brief statement with regard to that matter.

The material represented in paragraph 1201 is the first step toward manufacturing spun silk yarn from the various wastes produced in the reeling industry, the chief materials being pierced cocoons and frisons, which are the waste of reeling establishments. In the usual form in which it is likely to appear is combed silk, otherwise known as peignee. The appearance of the material is somewhat similar in condition to the wool top. There is a great deal of capital involved in the development of the article. In chemical research alone large sums have been expended.

Inasmuch as this is only a partly manufactured article, there would naturally, under normal circumstances, be no importations on the part of a person regularly engaged in the business who had a complete plant for producing the finished article. The only condition upon which it might become an important factor would be the establishment of a spinning plant in this country having a foreign connection which might manufacture its combed silk and its finished yarns in this country. Mr. President, there is such a plant already in existence, recently established by the European combination of spinners, and for that reason this paragraph may have a greater bearing in the future upon the course of the domestic industry. It should be remembered that its value is very difficult to determine. The committee did the best it could to get accurate estimates of the value of peignee. We took our estimates from the Reynolds report and from reports received from three or four of the leading manufacturers.

The statement which I am about to read is a statement of the approximate averages and the duty required to cover the cost of production in this country and abroad:

The cost of manufacturing in the United States averages approximately $2.85 per pound, of which 99 cents is conversion cost. Japan has recently developed a very large facility for its manufacture. It claims to be now in a position to manufacture all the wastes produced in China and Japan. The average cost of the product in Japan is $1.89, of which 33 cents is cost of conversion. The European cost per pound averages approximately $2.23, of which 50 cents per pound is conversion cost. Japanese and European spinners use materials of less value than those used in the United States. Originally the spinners in this country asked for specific duty of 65 cents per pound. The duty finally determined upon by the Finance Committee—

Which has now been stricken out—

was 55 cents per pound; the differential ranges from 96 cents per pound to 62 cents per pound.

The average value of this material reported by the Reynolds investigation was $2.04, on which basis a differential of 81 cents would exist. The ad valorem equivalent of the average differential is about 40 per cent.

The committee recommended 35 per cent ad valorem.

It should be borne in mind that peignee is a prime necessity in time of war, as the Senator from Texas suggested in his remarks. The Senator from Texas also suggested that for that reason it should have a protective duty. If it is to be protected at all, the rate must reasonably cover the difference in the conversion cost. Your committee has done the best it could to ascertain that cost. As Senators know, it furnishes the cartridge casings, and it is very important that this industry should be maintained.

In the hearings before the Committee on Finance considerable testimony was taken with regard to this schedule. I shall not take time to read that testimony, but Mr. M. C. Migel quoted an extract from the survey of the Tariff Commission, which I wish to read to the Senate and which it seems to me clearly implies the necessity for an adequate duty upon this product. I quote:

It has been reported from time to time that leading European spun-silk producers are considering the establishment of spinning plants in the United States to work up into yarn peignee produced by them abroad. So far, however, no such plants have been established.

That is not true to-day, for a plant has been established. I continue to quote:

Should such plants be constructed here, they would suffer no disadvantage in being dependent upon imported peignee, for they would not only possess an assured supply but would know the exact character of the waste used. In that case, unless peignee production by domestic spinners is sufficiently efficient, or the duty on peignee sufficiently high to make the cost of producing it in the United States as low as the cost of the imported article, plus duty, they would, despite their disinclination, probably be forced to use imported peignee in order to make spun silk cheap enough to sell in competition with the new concerns.

Mr. SHEPPARD. Mr. President, accepting the statement of the Senator from Connecticut that the minimum value of the yarn from silk waste covered in this paragraph is $2 a pound, the existing rate of 20 cents a pound will be equal to 10 per cent ad valorem. This paragraph proposes a rate of 35 per cent ad valorem—an increase, therefore, of about 250 per cent. I have already shown that importations of threads or yarn made from waste silk, namely, peignees, bear so small a proportion to home production that any advance in duty is beyond excuse. The proposed increase of 250 per cent should not be tolerated. If Senators wish to vote for an increase of that kind, they may do so; but not without entire knowledge of the facts.

Mr. McLEAN. I want to state——

Mr. SHEPPARD. Let me conclude. Raw reeled silk wound on spools or tubes would be dutiable under this amendment, would be subjected to a duty of 35 per cent on a value of about $8 per pound. The present rate is 20 cents a pound, about 3 per cent ad valorem. The increase, therefore, on this form of silk yarn would be about 1,000 per cent. The Senate evidently thinks that such a form exists, because it voted down my motion to strike out the words in the amendment describing it. On yarn made from waste silk, namely, on peignees, the proposed increase is at least 250 per cent. I am willing to concede that this is practically the only type of yarn dutiable under the amendment in any substantial amount.

Mr. McLEAN. If the raw material came in free and we put on a 10 per cent ad valorem, what would be the percentage of increase?

Mr. SHEPPARD. Is the Senator asking a mathematical question?

Mr. McLEAN. Yes. If on an article which formerly came in free we imposed a duty of 10 per cent or 15 per cent, what would be the percentage of increase?

Mr. SHEPPARD. Where an article is on the free list and a duty is placed upon it, there is no way of telling what the percentage of increase is. The Senator attempted a while ago to show that I had voted for a certain percentage of increase when I voted to take wool from the free list, but there is no earthly way of estimating the percentage of increase when an article is so treated. That, however, is not the situation which is presented in this paragraph.

Mr. McLEAN. It is just as easy to estimate the increase upon the proposition which I made as it is to make the estimate suggested by the Senator from Texas. Suppose we have a duty of 10 per cent and we increase it to 20 per cent, the Senator insists that we are increasing it 100 per cent; that is his proposition. I am tired of that kind of mathematics. The increase

would be 10 per cent, and that is all, if I know anything about arithmetic.

Mr. SHEPPARD. I know the Senator from Connecticut is weary of that kind of mathematics, the mathematics of truth; but Senators must realize that they are voting for an increase of at least 250 per cent when they vote for this proposed rate.

Mr. McLEAN. We are not doing that.

Mr. SHEPPARD. I ask for the yeas and nays on my amendment.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Texas to the amendment reported by the committee.

Mr. HEFLIN. Mr. President, the Senator from Connecticut says that he is getting tired of this sort of mathematics. There will be a good many things to contribute to the tired feeling of the Senator from Connecticut before he gets through with this robber tariff bill and some other measures pending in the Senate.

I hold in my hand, Mr. President, an editorial from the North American, a Republican newspaper published in Philadelphia. As I heard the Senator from Texas [Mr. SHEPPARD] talking about the Republicans in this body increasing these tariff rates from 100 per cent to 400 and 1,000 per cent, I recalled the fate of the Payne-Aldrich tariff law which provided no such high rates as are proposed by the bill now under consideration. This Republican newspaper, appealing to this Republican Congress, says:

> There is at the present time an unexcelled opportunity for some Republican or Democratic Member of Congress possessing the necessary courage and ability to perform a great public service and achieve high place as a statesman. Honor will be his and enduring fame if he will but tell the American people the truth about the tariff and pending legislation thereon.

Continuing, the editorial says:

> Truth telling about the tariff is not an unattainable ideal. It is not an unheard-of achievement. A Member of Congress once reached this height of statesmanship, and the Nation rang with his praises—and followed his farseeing advice. Jonathan P. Dolliver, United States Senator from Iowa, performed an historic service when he led the fight against the betrayal of the Republican Party and the country in the Payne-Aldrich bill of 1909. He did not prevent its passage, but he revealed its evils and its falsities with such clearness that it was discredited long before it was signed by President Taft, who himself had confessed that some features of it were "indefensible."
>
> Day after day during that summer Senator Dolliver met all comers in debate, analyzing the schedules, exposing the special interests which had dictated them, and showing how party and presidential pledges of revision downward were being dishonored. Nor did he quit the fight after he was beaten, for in June, 1910, he delivered in the Senate a speech which was a masterpiece of powerful oratory—a merciless revelation of how the President had been used by unscrupulous interests and how the public had been wronged in the manipulated legislation.
>
> Dolliver was a stanch believer in tariff protection. He stood for a tariff framed to offset the difference between foreign and American production costs and to preserve the American workers' standard of living. But he was implacably against those who, disguised as champions of honest protection, sought to put the rates so high that they could wring tribute from the American people. "It is going to be very difficult," he said—

Referring to Senator Dolliver—

> "to get me out of the old Republican Party. It can not be done by lying about me, by calling me names calculated to prejudice me in a Republican community. But I do not propose that the remaining years of my life shall be given up to a dull consent to the success of these tariff conspirators, who do not hesitate to use the lawmaking power of the United States to multiply their own wealth and to fill the market places with evidences of their avarice."

That is what a great Republican statesman did and said here, Mr. President, when the tariff barons were using the taxing power against the American people to enrich themselves. He was opposing a bill far less objectionable and monstrous than the pending tariff measure; and here is a Republican newspaper reminding this Congress of just what occurred in the other Republican Congress when the bill which Dolliver denounced, although less objectionable than the bill now before us, was forced through that Congress, and praising his name long after he is dead for the fight that he made then, telling what happened to those who voted for that bill, and reminding the Republicans now attempting to pass a worse bill that the same fate awaits them. But "none of these things" move the old standpatter, who has his instructions from the tariff conspirators of whom Dolliver spoke. These tariff barons feel that through big campaign contributions to the last Republican campaign fund they bought the right to tax the American people for their own special benefit. It remains to be seen whether the people will approve such misuse and abuse of the taxing power. The Senator from Connecticut and his party here advocate tariff rates ranging from 100 to 1,000 per cent on cheap silk. This is the only kind of silk that the poor can ever buy. The editor of the North American seems to be in search of a speech that strongly and eloquently points out some of the iniquities of the present monstrous tariff measure, and I commend to his careful consideration the able and unanswerable argument of the Senator from Texas [Mr. SHEPPARD].

The PRESIDENT pro tempore. The question is upon the amendment of the Senator from Texas to the amendment reported by the committee.

Mr. SHEPPARD. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement of my pair as on the former ballot, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Montana [Mr. MYERS] and will vote. I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as before of the transfer of my pair, I vote "nay."

Mr. McCUMBER ((when his name was called). Transferring my general pair as on the previous vote, I vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the last vote, I vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote as to my pair and its transfer, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Transferring my pair as on the last roll call, I vote "nay."

Mr. WILLIS (when his name was called). I transfer my pair with my colleague, the senior Senator from Ohio [Mr. POMERENE], to the senior Senator from Maryland [Mr. FRANCE] and will vote. I vote "nay."

The roll call was concluded.

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oregon [Mr. STANFIELD] and will vote. I vote "nay."

Mr. TRAMMELL. Making the same transfer of my pair as on the previous ballot, I vote "yea."

Mr. JONES of Washington (after having voted in the negative). Has the Senator from Virginia [Mr. SWANSON] voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. JONES of Washington. I have a pair with that Senator for the afternoon, which I find I can transfer to the Senator from Oklahoma [Mr. HARRELD]. I do so, and will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON].

The roll call resulted—yeas 15, nays 33, as follows:

YEAS—15.

Ashurst	Harris	Overman	Simmons
Caraway	Harrison	Ransdell	Trammell
Dial	Heflin	Robinson	Walsh, Mass.
Fletcher	Jones, N. Mex.	Sheppard	

NAYS—33.

Brandegee	Frelinghuysen	McKinley	Smoot
Broussard	Gooding	McLean	Spencer
Bursum	Jones, Wash.	McNary	Sterling
Calder	Kellogg	Moses	Warren
Cameron	Kendrick	Nelson	Watson, Ind.
Capper	Keyes	New	Willis
Cummins	Lenroot	Newberry	
Curtis	Lodge	Oddie	
Ernst	McCumber	Phipps	

NOT VOTING—48.

Ball	Glass	Norbeck	Smith
Borah	Hale	Norris	Stanfield
Colt	Harreld	Owen	Stanley
Crow	Hitchcock	Page	Sutherland
Culberson	Johnson	Pepper	Swanson
Dillingham	King	Pittman	Townsend
du Pont	Ladd	Poindexter	Underwood
Edge	La Follette	Pomerene	Wadsworth
Elkins	McCormick	Rawson	Walsh, Mont.
Fernald	McKellar	Reed	Watson, Ga.
France	Myers	Shields	Weller
Gerry	Nicholson	Shortridge	Williams

The PRESIDENT pro tempore. On this question the yeas are 15, the nays are 33. A quorum has not voted. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Capper	Fletcher	Heflin
Brandegee	Caraway	Frelinghuysen	Hitchcock
Broussard	Cummins	Gooding	Jones, N. Mex.
Bursum	Curtis	Harreld	Jones, Wash.
Calder	Dial	Harris	Kellogg
Cameron	Ernst	Harrison	Kendrick

Keyes	Nelson	Robinson	Trammell
Lodge	New	Sheppard	Warren
McCumber	Newberry	Simmons	Watson, Ind.
McKinley	Oddie	Smoot	Willis
McLean	Overman	Spencer	
McNary	Phipps	Sterling	
Moses	Ransdell	Swanson	

The PRESIDENT pro tempore. Forty-nine Senators having answered to their names, there is a quorum present. The question is upon the amendment proposed by the Senator from Texas [Mr. SHEPPARD] to the amendment of the committee, upon which the yeas and nays have been demanded and ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as to my pair and its transfer as on the former ballot, I vote "yea."

Mr. ERNST (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as to my pair and its transfer as on the former vote, I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "nay."

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED], I vote "yea."

Mr. STERLING (when his name was called). On this question I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from New York [Mr. WADSWORTH], and vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the previous ballot as to the transfer of my pair, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIS (when his name was called). Repeating the announcement made on the last vote as to my pair and its transfer, I vote "nay."

The roll call having been concluded, the result was announced—yeas 17, nays 34, as follows:

YEAS—17.

Ashurst	Harrison	Ransdell	Trammell
Caraway	Heflin	Robinson	Walsh, Mass.
Dial	Hitchcock	Sheppard	
Fletcher	Jones, N. Mex.	Simmons	
Harris	Overman	Swanson	

NAYS—34.

Brandegee	Frelinghuysen	McCumber	Phipps
Broussard	Gooding	McKinley	Smoot
Bursum	Harreld	McLean	Spencer
Calder	Jones, Wash.	McNary	Sterling
Cameron	Kellogg	Moses	Warren
Capper	Kendrick	Nelson	Watson, Ind.
Cummins	Keyes	New	Willis
Curtis	Lenroot	Newberry	
Ernst	Lodge	Oddie	

NOT VOTING—45.

Ball	Glass	Owen	Stanley
Borah	Hale	Page	Sutherland
Colt	Johnson	Pepper	Townsend
Crow	King	Pittman	Underwood
Culberson	Ladd	Poindexter	Wadsworth
Dillingham	La Follette	Pomerene	Walsh, Mont.
du Pont	McCormick	Rawson	Watson, Ga.
Edge	McKellar	Reed	Weller
Elkins	Myers	Shields	Williams
Fernald	Nicholson	Shortridge	
France	Norbeck	Smith	
Gerry	Norris	Stanfield	

So Mr. SHEPPARD's amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question now is upon the amendment proposed by the committee.

The amendment was agreed to.

The next amendment of the committee was, on page 154, lines 20 and 21, to strike out "silk yarn" and insert in lieu thereof "yarn of silk and artificial silk."

Mr. SHEPPARD. Mr. President, will the Senator from Connecticut tell us why those additional words are used?

Mr. McLEAN. If I understand the Senator, he refers to the amendment which includes the mixture of the artificial silk and the real silk.

Mr. SHEPPARD. I ask the Senator to explain why the words are changed.

Mr. McLEAN. You have to have the same duty on the artificial as you have on the real silk.

Mr. SHEPPARD. In paragraph 1201 the language "or silk and artificial silk" is used. The word "yarn" does not appear.

Mr. McLEAN. There is no yarn in that.

Mr. SHEPPARD. In this proposal the Senator wants to strike out the words "silk yarn" and substitute therefor the words "yarn of silk." What is the difference?

Mr. McLEAN. That was recommended by the experts as a better definition; that is all. It seems to me to be better English, and I think it defines the article better.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 154, line 23, after the word "of," to strike out "singles," and to insert "singles"; in line 24, after the word "yarns," to strike out "together" and insert "together,"; in line 25, after the word "per," to strike out "pound" and to insert "pound,"; on page 155, line 5, after the word "together," to strike out "at the" and to insert "the specific"; and in line 7, after the word "colored," to strike out "at the" and to insert "the specific"; in line 10, after the word "foregoing," to insert the word "specific," so as to read:

PAR. 1202. Spun silk or schappe silk yarn, or yarn of silk and artificial silk, and roving, in skeins, cops, or warps, if not bleached, dyed, colored, or advanced beyond the condition of singles by grouping or twisting two or more yarns together, on all numbers up to and including number 205, 45 cents per pound, and in addition thereto ten one-hundredths of 1 cent per number per pound; exceeding number 205, 45 cents per pound, and in addition thereto fifteen one-hundredths of 1 cent per number per pound; if advanced beyond the condition of singles by grouping or twisting two or more yarns together, the specific rate on the single yarn and in addition thereto 5 cents per pound cumulative; if bleached, dyed, or colored, the specific rate on unbleached yarn and in addition thereto 10 cents per pound cumulative: *Provided*, That any of the foregoing on bobbins, spools, or beams shall pay the foregoing specific rates, according to the character of the yarn or roving, and in addition thereto 10 cents per pound.

The amendment was agreed to.

The next amendment was, on page 155, line 12, to strike out all of the matter beginning after the word "pound" and the colon, down to and including the words "ad valorem" in line 14, and insert in lieu thereof the following:

Provided further, That none of the foregoing single yarn or roving shall pay a less rate of duty than 40 per cent ad valorem: *And provided further*, That none of the foregoing two or more ply yarn shall pay a less rate of duty than 45 per cent ad valorem.

Mr. SHEPPARD. I move to strike out the figure "40" and insert "35."

The READING CLERK. On page 2, line 2, of the amendment the Senator from Texas proposes to strike out "40" and insert in lieu thereof "35."

Mr. SHEPPARD. I want to say that the rate of 35 per cent ad valorem is the rate applied to this entire branch of the silk industry under the present law. It is my intention to move to substitute the text and rate of existing law for this paragraph. Under the rule now governing the debate that can not be done until the committee amendments are completed. For the present, therefore, I shall content myself by moving to substitute the present rate where it is changed in this amendment. Therefore I move to strike out "40" and insert in lieu thereof "35."

The amendment to the amendment was rejected.

Mr. SHEPPARD. For the same reason I move to strike out the figures "45" and insert "35" in the last line of the amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment to the amendment.

The READING CLERK. On page 2 of the amendment as printed, line 4, the Senator from Texas moves to strike out "45" and insert in lieu thereof "35."

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 155, line 15, after the word "yarn," to insert a comma and the words "or yarn of silk and artificial silk."

The amendment was agreed to.

The next amendment was, on page 155, to strike out all of the matter beginning with line 22 down to and including line 6 on page 156, in the following words:

PAR. 1203. Thrown silk in the gum, if singles, 50 cents per pound; if tram, 75 cents per pound; any of the foregoing containing more than 30 turns of twist per inch, and organzine, $1 per pound; if ungummed, wholly or in part, or if further advanced by any process of manufacture, in addition to the rates herein provided, 50 cents per pound: *Provided*, That none of the foregoing shall pay a less rate of duty than 12½ per cent ad valorem. In no case shall the duty be assessed on a less number of yards than is marked on the goods as imported.

And to insert in lieu thereof the following:

PAR. 1203. Thrown silk not more advanced than singles, tram, or organzine, 25 per cent ad valorem.

Mr. SHEPPARD. I will ask the Senator from North Dakota if it is his purpose to proceed with the debate on this paragraph to-night?

Mr. McCUMBER. I would be glad if we could finish the schedule to-night, but I do not know whether we can do so or not.

Mr. SHEPPARD. As we have made fairly good progress, I suggest that we recess until to-morrow.

Mr. McCUMBER. I understand that the Senator from Indiana [Mr. NEW] has a matter, to which there will be no objection, which he would like to have considered, and I will agree that the tariff bill may be temporarily laid aside for that purpose, to be followed by a short executive session, and then a recess in accordance with the unanimous-consent agreement.

COL. FREDERICK MEARS.

Mr. NEW. Mr. President, in accordance with the announcement made by the Senator from North Dakota there is a House joint resolution (H. J. Res. 316) authorizing the reappointment of Frederick Mears as a commissioned officer of the Regular Army and making him available, when so reappointed, for service as chairman and chief engineer of the Alaskan Engineering Commission, which should have immediate consideration, for reasons which I shall explain.

Col. Frederick Mears, of the United States Army, is at present filling a detail as chief of the engineering commission which is building the railroad in Alaska. Previous to his having gone there, back in the days when he was a lieutenant of engineers, he was sent to the Panama Canal Zone, where, under Colonel Goethals, he superintended the work of digging the Panama Canal. Because of the record he made and what he did there he was sent by the last administration to Alaska to serve in the detail I have just described.

When the war came on Colonel Mears was taken away from that detail and went to France, where he served all the time the Army was there as colonel of the Thirty-first Engineers and in general command of the engineering operations of the First Army Corps, I think it was. At all events he had a long and very honorable career there.

The Comptroller General has recently rendered a decision to the effect that in accepting the detail to the work in Alaska Colonel Mears vacated his place in the Army. The purpose of the joint resolution is to restore him to the place he has occupied for years and to remedy the condition which the decision made by the Comptroller General has brought about.

Mr. ROBINSON. Mr. President——

Mr. NEW. If the Senator will pardon me just a moment, I shall then be glad to yield to him.

I have talked with the Secretary of War about the matter; I have talked with the Secretary of the Interior about it; and letters from both of them are in the report accompanying the joint resolution. I have also had a full conference with the chairman of the Committee on Military Affairs. All agree that this is a very meritorious measure and ought to pass. The reason for asking immediate consideration of it is in order that the status of Colonel Mears may be thoroughly established before the general board which has recently been appointed for promotions in and eliminations from the Army undertakes its work.

Now I yield to the Senator from Arkansas.

Mr. ROBINSON. I merely desire to say that a very great injustice will result to this officer if the joint resolution or a similar measure is not passed at a very early date. He did not seek the detail, but the services which he performed under it were efficient and highly satisfactory to his commanding officer. I think the joint resolution should be considered at this time and passed.

Mr. WARREN. Mr. President, if the Senator from Indiana will pardon me, I wish to say that I agree entirely with what the Senator from Arkansas has stated. I know the officer and I knew his father. Colonel Mears is one of the most brilliant officers in the United States service. As an engineer he has at every point where stationed distinguished himself. I hope the joint resolution will pass without delay.

The PRESIDENT pro tempore. The Senator from Indiana asks unanimous consent that the tariff bill may be temporarily laid aside and that the Senate proceed to the consideration of House Joint Resolution 316.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the President be, and he is hereby, authorized, in his discretion and by and with the advice and consent of the Senate, to reappoint Frederick Mears to the Regular Army in the grade and with the date of rank to which he would have been entitled at the time of such reappointment had he remained an officer of the Regular Army continuously from the time he first became an officer thereof: *Provided*, That after such reappointment said Frederick Mears shall be regarded as having in contemplation of law the same status, rights, and privileges as an officer of the Regular Army that he would have had if he had remained a commissioned officer of the Regular Army continuously, under the various commissions in the Regular Army, issued to and accepted by him from the date of his first appointment therein.

SEC. 2. That notwithstanding the provisions of sections 1222, 1224 (as amended by the act of February 28, 1877, 19th Stats., p. 243), 1763, 1764, and 1765, Revised Statutes, the provisions of section 2 of the act of July 31, 1894 (28th Stats., p. 205), and the provisions of section 6 of the act of May 10, 1916 (39th Stats., p. 120), as amended by the act of August 29, 1916 (39th Stats., p. 582), or the provisions of other existing statutes of like import, the said Frederick Mears may, after having been reappointed an officer of the Regular Army under the provisions of the preceding section, continue in office under an existing commission as chairman and chief engineer of the Alaskan Engineering Commission or accept a new appointment as such, and may exercise the functions of said civil office without prejudice to his commission as an officer of the Regular Army or to his standing as such, and may receive the compensation duly prescribed from time to time for the incumbent of said civil office, less the pay and allowances to which he may be entitled as an officer of the Regular Army.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FEDERAL RESERVE BANK BUILDING IN DETROIT.

Mr. NEWBERRY. Mr. President, I ask unanimous consent for the present consideration of the joint resolution (S. J. Res. 229) authorizing the Federal Reserve Bank of Chicago to enter into contracts for the erection of a building for its branch office in Detroit, Mich. I think it will cause no debate. It is a joint resolution which provides that the Federal reserve bank in Chicago may proceed with the construction of its building at Detroit, Mich., upon the land which was previously purchased. The measure is approved by the Treasury officials and unanimously reported by the Committee on Banking and Currency.

Mr. ROBINSON. Let the joint resolution be read.

The reading clerk read the joint resolution; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration, as follows:

Whereas the act of Congress approved June 3, 1922, abridged the right of Federal reserve banks to enter into contracts by providing that no Federal reserve bank should have authority thereafter to enter into any contract or contracts for the erection of any building of any kind or character or to authorize the erection of any building in excess of $250,000 without the consent of Congress having previously been given therefor in express terms, which, however, did not apply to buildings under construction on June 3, 1922; and

Whereas many of the Federal reserve banks were not affected by this provision, since they had already completed or commenced construction of buildings for their head offices and branches; and

Whereas the Federal Reserve Bank of Chicago had not on June 3, 1922, actually commenced the construction of any building for its branch at Detroit, Mich., but had acquired the site therefor; and

Whereas the act of June 3, 1922, operates inequitably on said Federal Reserve Bank of Chicago: Now, therefore, be it

Resolved, etc., That the Federal Reserve Bank of Chicago be, and it is hereby, authorized to enter into contracts for the erection of a building for its branch bank at Detroit, Mich., on a lot previously acquired: *Provided*, That the total investment in such building shall not exceed an amount equal to 2½ per cent of its paid-in capital stock and surplus.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. NEWBERRY. Mr. President, I ask that there be printed in the RECORD, in 8-point type, certain correspondence in relation to the matter covered by the measure just passed.

There being no objection, the letters were ordered to be printed in the RECORD in 8-point type, as follows:

FEDERAL RESERVE BOARD,
Washington, July 18, 1922.

MY DEAR SIR: Referring to our conversation over the telephone this morning I beg to confirm my statement that I have been requested by officers of the Federal Reserve Bank of Chicago to discuss with you the matter of erecting a building for the branch of that bank at Detroit.

As you may know, the Federal Reserve Bank of Chicago purchased some time ago a lot opposite the post office in Detroit, known as the Couzens lot, for $850,000, and immediately sold to the National Bank of Commerce one-fourth of the property for $200,000, retaining 9,750 square feet on the corner at a cost of $650,000. It had been contemplated to erect a building on this lot at a cost of about $800,000, but before plans could be made and contracts let the law was amended by the act of June 3, 1922, which prohibits the Federal reserve banks from erecting any buildings costing more than $250,000 without the consent of Congress having been given therefor in express terms.

A joint resolution was passed by the Senate a few days ago authorizing the Federal Reserve Bank of St. Louis to erect a

building for its own use at St. Louis and buildings for its branches, which was amended at the instance of Senator SMOOT to provide also for the erection of a building for the use of the Salt Lake City branch of the Federal Reserve Bank of San Francisco. In the form in which this resolution passed the Senate it seemed doubtful whether it would be of any effect as far as the Salt Lake City branch was concerned, and Senator SMOOT introduced the resolution in another form on July 11, 1922, a copy of which (S. J. Res. 222) is inclosed herewith. Unless you would prefer to introduce a separate resolution, I would suggest that you might ask for the further amendment of Senate Joint Resolution 222 as indicated in the inclosed copy.

The capital and surplus of the Federal Reserve Bank of Chicago is something over $43,000,000, and if that bank is authorized to invest an amount not exceeding 2½ per cent of the paid-in capital and surplus in a building for its branch bank at Detroit, on the lot previously acquired, the amount, something over $1,000,000, would in the judgment of those who have looked into the matter be ample.

It may be said for the proposed joint resolution that Congress is not appropriating any money out of the Public Treasury, but is merely authorizing the Federal reserve banks to invest a portion of their own capital and surplus in the buildings described.

I have a telegram to-day from Chicago stating that the governor of the Federal Reserve Bank of Chicago expects to be in Washington Friday or Saturday, and that he is anxious to lay before you complete information regarding the proposed building for the branch bank at Detroit.

Very truly yours,

W. P. G. HARDING, *Governor.*

Hon. TRUMAN H. NEWBERRY,
United States Senate.

—

DETROIT CLEARING HOUSE ASSOCIATION,
Detroit, Mich., July 22, 1922.

Hon. TRUMAN H. NEWBERRY,
United States Senate Chamber, Washington, D. C.

MY DEAR SIR: The banks of Detroit, at their Clearing House Association meeting to-day, took into consideration a bill now pending in the United States Senate, which by title, rider, or amendment contemplates an appropriation for the construction of a building for the use of the Detroit branch of the Federal reserve bank, seventh district, and we, the undersigned, were appointed as a committee to ask your earnest support of the measure.

The rented quarters temporarily occupied by the Detroit branch is grossly inadequate for the accommodation of its business and can not be safely guarded or constructively protected as it should be to serve as custodian of the millions of bank reserves and Government funds deposited in that bank. When we consider that the business transacted through the Detroit branch of the Federal reserve is greater in volume and amount than that handled by any other branch in the Federal reserve system and that the Detroit district is rapidly growing and expanding in commercial and financial importance and that it has very good prospects in the near future of further expansion through direct waterway connection with the seaports of the world, the necessity of a suitable building in which to adequately carry on this vast and growing business is most apparent.

In our humble opinion the construction and equipment of a suitable building would justify the expenditure of $1,500,000 and is recommended by all financial interests of this city as a great public necessity.

J. T. KEINA,
WM. J. GRAY,
Committee.
J. H. LANGDON,
Secretary.

—

FEDERAL RESERVE BANK OF CHICAGO,
July 21, 1922.

Hon. TRUMAN H. NEWBERRY,
United States Senate Office Building,
Washington, D. C.

DEAR SENATOR NEWBERRY: Governor McDougal has just telephoned me that he has had a very satisfactory and pleasant interview with you in regard to the branch of the Federal Reserve Bank of Chicago located at Detroit and the desirability of a building for the branch. He has asked me to furnish you certain data, as follows:

The capital stock of the Federal Reserve Bank of Chicago is at this date $14,622,900. Of this capital the banks in Detroit and what we call "Detroit territory" contribute $2,472,850, or 16.91 of the total capital. The surplus of the Federal Reserve Bank of Chicago at the present time is $29,025,000, or a trifle over that figure.

The reserve deposits of the Federal Reserve Bank of Chicago, figured as of June 30, 1922, were, in round numbers, $265,000,000. Of this the reserve deposits contributed by the Detroit banks and those in Detroit territory were a little over $39,000,000, or 14.32 per cent.

You will notice that I speak of Detroit and Detroit territory. I do so for the reason that when the branch was opened certain counties in Michigan were set apart to be served directly from the branch, rather than the home office in Chicago. The inclosed map of the southern peninsula of Michigan—the only part of Michigan in the seventh Federal reserve district—shows the counties included in Detroit territory. However, this division is an arbitrary one, and there is no question but that a goodly part of Michigan outside of the territory which we have allotted to Detroit relies on Detroit rather than Chicago for the major part of its banking service. I presume that the First and Old Detroit National Bank, the People's State Bank, and perhaps a number of other large banking institutions in Detroit carry much of the reserves and supply a large part of the business demands in the territory in that part of the State which is marked on the map as Chicago territory.

Detroit is, I understand, the fourth city in population in the United States. It is one of the great industrial centers, is constantly growing in financial, commercial, and industrial importance, and serves likewise as one of the main gateways to Canada, and it appears from the map that the railway systems of Michigan have been largely planned with Detroit as a center, and, therefore, bring the whole State largely tributary to and dependent upon Detroit.

The seventh (or Chicago) Federal reserve district is the second in importance in the country and contains within its bounds the second and fourth cities in population—namely, Chicago and Detroit. The Detroit branch is the only one operated, or contemplated, by the Federal Reserve Bank of Chicago.

I am to-day informed by Mr. John Ballantyne, of Detroit, that the Detroit clearing house, or the clearing house committee, at a meeting held this morning adopted a memorial to you requesting that you prepare a bill, or rider to an already existing bill, authorizing the Federal Reserve Bank of Chicago to construct a building for the use of its branch at Detroit, at a cost not to exceed $1,400,000. You are, of course, aware that we have already purchased a building site at Detroit, the net cost of which to us is in the neighborhood of $650,000. If the building, equipped and furnished, should cost as much as $1,400,000, the total cost for the Detroit building and ground would be a little over $2,000,000. Governor McDougal informs me that Governor Harding is of the opinion that 2½ per cent of our capital and surplus would, perhaps, take care of the present and probable future needs of the Detroit branch, and that he (McDougal) after consultation with you had expressed himself that probably the 2½ per cent, instead of the 3 per cent asked for by the Detroit clearing house, might see us through.

I discussed this matter informally with such members of our executive committee as were present at the regular meeting this morning, and after further consultation with our architects we are inclined to the belief that a total of 2½ per cent of our total capital and surplus may be found sufficient to supply the reasonable needs for the Detroit branch building. Therefore, if you prepare and present your bill or rider at the suggestion of the Detroit clearing house, I think that we, as well as the board of the Detroit branch, will be fairly well satisfied that the 2½ per cent, or $1,090,000, may be practically sufficient.

If there is any other data which I can furnish you in connection with this matter I shall be only too happy to do it.

You are probably aware that the Detroit branch of the Federal Reserve Bank of Chicago is inadequately housed in an out-of-date building, with out-of-date vaults, and that the major part of its cash and securities now has to be carried in the vaults of the Wayne County and Home Savings Bank for the reason that there is neither room nor proper protection for these in the vaults of the building now occupied, and that there is a constant danger through daily transportation of cash and securities between the branch and the vaults where said cash and securities are kept.

Very truly yours,

W. A. HEATH, *Chairman.*

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent

in executive session the doors were reopened and (at 6 o'clock and 15 minutes) the Senate, under the order previously entered, took a recess until to-morrow, Tuesday, August 1, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 31 (legislative day of April 20), 1922.

COLLECTORS OF INTERNAL REVENUE.

Arnold J. Hellmich, of St. Louis, Mo., to be collector of internal revenue for the first district of Missouri in place of George H. Moore, resigned.

POSTMASTERS.

CALIFORNIA.

Hazel B. Hough to be postmaster at Arrowhead Springs, Calif. Office became presidential July 1, 1922.

Otto B. Liersch to be postmaster at Corning, Calif., in place of R. C. Hannan, resigned.

Thomas D. Walker to be postmaster at Walnut Creek, Calif., in place of E. B. Bradley, resigned.

COLORADO.

Sylvester E. Hobart to be postmaster at Nunn, Colo. Office became presidential July 1, 1922.

CONNECTICUT.

Joseph H. Derenthal to be postmaster at Madison, Conn., in place of J. H. Derenthal. Incumbent's commission expired April 6, 1922.

ILLINOIS.

Ulysses G. Stutzman to be postmaster at Carlock, Ill. Office became presidential July 1, 1922.

Daisy A. Nieman to be postmaster at Philo, Ill. Office became presidential April 1, 1921.

Lester Cromwell to be postmaster at Momence, Ill., in place of I. W. Metcalf. Incumbent's commission expired January 24, 1922.

INDIANA.

George W. Shively to be postmaster at Winona Lake, Ind., in place of G. P. De Hoff, resigned.

IOWA.

Arthur Ingraham to be postmaster at Conesville, Iowa. Office became presidential July 1, 1922.

Ralph K. Russell to be postmaster at Cushing, Iowa. Office became presidential January 1, 1921.

Arvin C. Sands to be postmaster at Mallard, Iowa. Office became presidential April 1, 1920.

Ferdinand J. Ruff to be postmaster at South Amana, Iowa. Office became presidential July 1, 1922.

Blinn N. Smith to be postmaster at Coon Rapids, Iowa, in place of Patrick Doran, resigned.

KANSAS.

Joseph B. Dick to be postmaster at Ellinwood, Kans., in place of Robert Shouse. Incumbent's commission expired July 15, 1920.

Charles I. Zirkle to be postmaster at Garden City, Kans., in place of R. E. Stotts. Incumbent's commission expired February 4, 1922.

KENTUCKY.

Newell R. Downing to be postmaster at Ways Lick, Ky. Office became presidential July 1, 1922.

MAINE.

Lloyd A. Harmon to be postmaster at Clinton, Me., in place of L. A. Burns, resigned.

MASSACHUSETTS.

Annie E. Cronin to be postmaster at North Wilmington, Mass. Office became presidential July 1, 1920.

Mabel Holt to be postmaster at Wilmington, Mass. Office became presidential October 1, 1920.

MICHIGAN.

Helen B. Martin to be postmaster at Indian River, Mich. Office became presidential July 1, 1922.

Flora Van Zinderen to be postmaster at Grandville, Mich., in place of H. R. Bouma, resigned.

Grace M. Miller to be postmaster at Union City, Mich., in place of L. L. Johnson, resigned.

MISSISSIPPI.

Carl J. Carpenter to be postmaster at Scott, Miss. Office became presidential October 1, 1920.

NEW JERSEY.

Henry R. Parvin to be postmaster at Ramsey, N. J., in place of Henry Bell, resigned.

NEW YORK.

Samuel K. Seybolt to be postmaster at Pine Bush, N. Y., in place of Edward Crawford. Incumbent's commission expired January 24, 1922.

NORTH CAROLINA.

John L. Dixon to be postmaster at Oriental, N. C., in place of G. L. Griffin. Incumbent's commission expired July 21, 1921.

NORTH DAKOTA.

Anfin Qualey to be postmaster at Aneta, N. Dak., in place of Nicholas Johnston. Incumbent's commission expired January 24, 1922.

OHIO.

Joseph Jameson to be postmaster at Lorain, Ohio, in place of Custer Snyder. Incumbent's commission expired January 31, 1922.

OKLAHOMA.

Charles M. Henry to be postmaster at Carmen, Okla., in place of A. R. Duncan. Incumbent's commission expired February 4, 1922.

Simpson B. Richards to be postmaster at Waynoka, Okla., in place of R. L. Floyd. Incumbent's commission expired June 6, 1922.

OREGON.

George D. Wood to be postmaster at Brookings, Oreg. Office became presidential October 1, 1920.

Grant L. Grant to be postmaster at Riddle, Oreg. Office became presidential October 1, 1920.

Henry E. Grim to be postmaster at Scappoose, Oreg. Office became presidential July 1, 1920.

PENNSYLVANIA.

Warren F. Leister to be postmaster at Curtisville, Pa. Office became presidential April 1, 1921.

Luna J. Sturdevant to be postmaster at North Warren, Pa. Office became presidential April 1, 1922.

Edward D. Hannum to be postmaster at Rosedale, Pa. Office became presidential April 1, 1922.

Beula E. Giesy to be postmaster at Russelton, Pa. Office became presidential January 1, 1921.

Ralph P. Holloway to be postmaster at Pottstown, Pa., in place of R. M. Root. Incumbent's commission expired January 25, 1919.

Milton W. Lowry to be postmaster at Scranton, Pa., in place of J. J. Durkin, removed.

SOUTH CAROLINA.

Dan K. Dukes to be postmaster at Orangeburg, S. C., in place of A. C. Ligon. Incumbent's commission expired January 19, 1920.

TEXAS.

Eddie C. Slaughter to be postmaster at Goose Creek, Tex., in place of E. C. Slaughter. Incumbent's commission expired January 24, 1922.

Oscar B. Acton to be postmaster at Jasper, Tex., in place of W. C. Blake. Incumbent's commission expired April 20, 1922.

John R. Ratcliff to be postmaster at Wallis, Tex., in place of T. W. Johnston, removed.

VIRGINIA.

Elihu T. Kiser to be postmaster at Roaringfork, Va. Office became presidential July 1, 1922.

Grace C. Collins to be postmaster at Drakes Branch, Va., in place of D. W. Berger. Incumbent's commission expired January 24, 1922.

Della L. Fuller to be postmaster at Honaker, Va., in place of A. B. Dye, resigned.

Charles E. Fulgham to be postmaster at Windsor, Va., in place of J. W. Roberts. Incumbent's commission expired December 20, 1920.

WASHINGTON.

Frank Morris to be postmaster at Bordeaux, Wash. Office became presidential July 1, 1922.

WEST VIRGINIA.

Claude W. Harris to be postmaster at Kimball, W. Va., in place of H. W. Early. Incumbent's commission expired July 21, 1921.

WISCONSIN.

Frank G. Johnson to be postmaster at Dallas, Wis. Office became presidential July 1, 1920.

Emil Klentz to be postmaster at Reeseville, Wis. Office became presidential April 1, 1920.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 31 (legislative day of April 20), 1922.

COLLECTOR OF CUSTOMS.

Samuel H. Thompson to be collector of customs, district No. 12, Pittsburgh, Pa.

POSTMASTERS.

CALIFORNIA.

Oliver N. Thornton, Brea.
Roscoe E. Watts, Rialto.
James E. Pharr, Scotai.

COLORADO.

Arthur I. Weaver, Creede.

ILLINOIS.

Frank C. Krans, Altona.
Edward A. Catour, Atkinson.
Lulu L. Meyer, Deerfield.
Sherman G. Jackson, Forest City.
Leo H. Borgelt, Havana.
Hugo L. Schneider, Highland Park.
Charles W. Russell, Hurst.
Bert R. Johnson, Kewanee.
Samuel J. Davis, Mooseheart.
Allie M. Reineke, Perry.
Ella L. Widicus, St. Jacob.
Raymond W. Peters, St. Joseph.
Ida C. Revell, Stillman Valley.
Ulysses G. Dennison, Winnebago.

MICHIGAN.

Andrew W. Reinhard, Brimley.

MONTANA.

T. Lester Morris, Corvallis.
Frank D. Worcester, Geyser.

NEW JERSEY.

Israel C. Harris, Alloway.
Clair McFarland, Monroeville.
Harry J. Corwin, Paterson.

NORTH CAROLINA.

Claud S. Rowland, Pinetown.
Walter F. Long, jr., Rockingham.
Calvin Y. Holden, Wake Forest.

OKLAHOMA.

Richard H. Everett, Broken Bow.

OREGON.

George C. Peterson, Bay City.
Amanda E. Bones, Carlton.
James Henderson, Cascade Locks.
Lucius L. Hurd, Glendale.
James D. Fay, Gold Beach.
Flora B. Thompson, Jacksonville.
Bernhard L. Hagemann, Milwaukie.
Etta M. Davidson, Oswego.
Henrietta Sandry, Rogue River.
Glenn D. Withrow, Talent.
Charles H. Watzek, Wauna.

TENNESSEE.

Carrie L. Waters, Goodlettsville.

TEXAS.

George Rice, Jayton.

WASHINGTON.

Thurston B. Stidham, Doty.

WEST VIRGINIA.

Hallie A. Overholt, Thurmond.

WITHDRAWAL.

Executive nomination withdrawn from the Senate July 31 (legislative day of April 20), 1922.

POSTMASTER.

Gertrude H. Ashley to be postmaster at Bay City in the State of Oregon.

SENATE.

TUESDAY, *August 1, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McCumber	Robinson
Ball	Gooding	McLean	Sheppard
Borah	Hale	McNary	Simmons
Brandegee	Harreld	Moses	Smoot
Bursum	Harris	Nelson	Spencer
Calder	Harrison	New	Stanfield
Cameron	Heflin	Newberry	Sterling
Capper	Hitchcock	Nicholson	Trammell
Caraway	Jones, N. Mex.	Norbeck	Walsh, Mass.
Culberson	Jones, Wash.	Oddie	Walsh, Mont.
Cummins	Kellogg	Overman	Warren
Curtis	Kendrick	Pepper	Watson, Ind.
Dial	Keyes	Phipps	Willis
du Pont	Ladd	Pittman	
Ernst	Lenroot	Pomerene	
Fernald	Lodge	Ransdell	

Mr. CURTIS. I was requested to announce that the junior Senator from Illinois [Mr. MCKINLEY] is detained at a committee hearing.

Mr. DIAL. I desire to announce that my colleague [Mr. SMITH] is detained on official business. I ask that this notice may continue through the day.

The PRESIDENT pro tempore. Sixty-one Senators have answered to their names. There is a quorum present.

PROMOTION OF WORLD PEACE.

Mr. HITCHCOCK. Mr. President, I present for reference to the Committee on Foreign Relations and printing in the RECORD, with the names attached, resolutions adopted by the League of Women Voters at Hastings, Nebr., signed by Mrs. Margretta S. Dietrich, wife of the former Senator, and some hundred others, praying the United States to keep its leadership asserted recently in the matter of limitation of naval armament and to continue its efforts and stand against war.

There being no objection, the resolutions, with the names attached, were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

HASTINGS, NEBR., *July 12, 1922.*

Whereas it has been called to our attention that 10 countries of the civilized world have set July 29 and 30 for demonstrations demanding no more wars for the settlement of international differences, we, the undersigned, gathered at a luncheon of the League of Women Voters in Hastings, Nebr., rejoicing that our country took the lead in the limitation of navies, respectfully urge the President and Congress of the United States to continue the leadership in an effort to outlaw war, and we affirm our approval of the resolution adopted by the National League of Women Voters in convention assembled at Baltimore, April, 1922, a copy of which is attached.

Mrs. R. S. McIntire, Mrs. B. J. Hilsabeck, Mrs. H. M. Russell, Mrs. R. E. Bryant, Mrs. E. Uden, Mrs. Jack Kelly, Miss Matilda McClelland, Mrs. S. B. Sorensen, Karl D. Beghtol, Mrs. J. M. Ferguson, Mrs. Cora M. Bartlett, Mrs. John Slaker, Mrs. Nellie I. Zinn, Mrs. W. A. Dilworth, Mrs. Hettie J. Martin, Mrs. Wm. Keal, Mrs. W. S. Holmes, Mrs. H. B. Whitney, Mrs. J. H. Lohmann, Mrs. W. S. Watson, G. B. Durkee, Mrs. George Schafer, Mrs. G. W. Buckner, jr., Mrs. Wm. Madgett, Mrs. Jennie Woodworth, Mrs. C. W. Wilson, Mrs. E. R. Erway, Mrs. L. L. Brandt, Mrs. J. H. Lantz, Mrs. A. G. Matter, Mrs. A. H. Brooke, S. B. Sorensen, Mrs. B. J. Thomas, E. A. St. John, John W. Shaw, Mabel Cramer, Mrs. P. B. Woodworth, Caroline M. Smith, Mrs. S. V. Byrne, Mrs. W. A. Graham, Margretta S. Dietrich, Mary J. Nowers, Mrs. N. W. Coleman, Mrs. Geo. W. Kimball, sr., Mrs. Martha H. Schultz, Mary Hill Landsrath, Patracia A. Johnson, Mrs. Ella Wiltrout, Mrs. Hilda Bruninger, Rena Gartner, Dorothy N. Stewart, Helen S. Fuller, P. B. Woodworth, Mrs. Lee Gauvreau, Abigail M. Kernan, Alice L. Paris, Neal J. Wyne, Raymond L. Crosson, Mrs. J. K. Sherman, Mrs. E. E. Danly, H. R. Alexander, Mrs. Nettie Sims, Mrs. John W. Brown, Helen K. Dutton, Marie Herrin, Mrs. W. G. Hay, Mrs. W. M. Whelan, Mrs. T. H. Goodwin, Susie Farmer, Mrs. Fannie Pyle, D. B. Marti, Bess Rippeteau, Mrs. M. S. Davis, Anne Stull, L. N. Button, Mrs. G. E. Isaman, Mrs. W. M. Dutton.

HASTINGS, NEBR.

I hereby certify that the above is a correct and true copy of the original resolution and signatures.

[SEAL.] A. M. LINNEMANN,
Notary Public, Adams County, Nebr.

Whereas in establishing justice and amity between human beings men have defined and repudiated crimes of individuals against the public welfare; and

Whereas the greatest crime against the public welfare is war; and

Whereas we applaud the progress toward peace in the recent reduction of naval armaments and the curb on naval competition; and

Whereas we recognize that conferences alone, as shown by those at The Hague, have not prevented or ameliorated wars in the past, and that resolutions outlawing certain methods of killing, such as poison gas and submarines, are not only futile but imply that certain other methods are justifiable: Therefore be it

Resolved, That the National League of Women Voters in convention assembled at Baltimore, Md., April, 1922, assert its conviction that the aim of all international peace efforts should be to outlaw war itself and to abolish it as a legalized institution, instead of to regulate it, and that to this end a code of international law based on equity and justice between individuals be erected, by which the waging of war be made a crime, defined and punishable under the terms of the code.

PETITIONS AND MEMORIALS.

Mr. ROBINSON presented resolutions of the Fort Smith (Ark.) Chamber of Commerce, condemning the action of railway shopmen for striking in opposition to a ruling of the United States Railway Labor Board and protesting against efforts to compel the railroads to relinquish their right to withdraw seniority privileges and other benefits from striking employees accruing from previous employment, etc., which were referred to the Committee on Interstate Commerce.

Mr. McLEAN presented a memorial of sundry citizens of New London County, Conn., remonstrating against inclusion of a $50 duty on potash in the pending tariff bill, which was referred to the Committee on Finance.

He also presented resolutions unanimously adopted at a meeting of the Connecticut Leaf Tobacco Association, remonstrating against the proposed increased duty on potash in the pending tariff bill, which were referred to the Committee on Finance.

He also presented a resolution of Wadhams Post, No. 49, Grand Army of the Republic, of Waterbury, Conn., favoring the prompt passage of the so-called Bursum pension bill, which was referred to the Committee on Pensions.

He also presented letters and telegrams in the nature of petitions from the Connecticut League of Women Voters, of Walingford, Hartford, Farmington, Meriden, and Stratford, and the Connecticut and Rhode Island State Conference of the Council of Jewish Women, held at Hartford, all in the State of Connecticut, praying that the United States take the lead toward promoting world peace through international understandings and removing the economic causes of war, which were referred to the Committee on Foreign Relations.

IMPORTATION OF THE ADULT HONEYBEE.

Mr. McNARY, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 11396) to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica), reported it without amendment.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HARRISON:

A bill (S. 3877) for the relief of Frank B. Ferrill, formerly a lieutenant (T) in the Dental Corps, United States Navy; to the Committee on Naval Affairs.

By Mr. FLETCHER:

A bill (S. 3878) to repeal an act entitled "An act to authorize the construction of a bridge across the St. Marys River, at or near Wilds Landing Ferry, between Camden County, Ga., and Nassau County, Fla.," approved October 13, 1921; to the Committee on Commerce.

By Mr. OVERMAN:

A bill (S. 3879) for the relief of William H. Lee; to the Committee on Claims.

By Mr. FLETCHER:

A joint resolution (S. J. Res. 234) authorizing the Federal Reserve Bank of Atlanta to enter into contracts for the erection of a building for its branch office in Jacksonville, Fla.; to the Committee on Banking and Currency.

FEDERAL LOCOMOTIVE INSPECTION.

Mr. HARRISON. I desire to offer a resolution at the instance of the Senator from Utah [Mr. KING]. I ask that the resolution be referred to the Committee on Interstate Commerce, and I will state in this connection——

The PRESIDENT pro tempore. Is there objection to the introduction of the resolution?

Mr. CURTIS. Let it be read.

The PRESIDENT pro tempore. The Secretary will read the resolution for information.

The Assistant Secretary read the resolution (S. Res. 327), as follows:

Resolved, That the Interstate Commerce Commission is hereby required and directed to report to the Senate whether or not the provisions of the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, and the amendment to said act approved March 4, 1915, requiring the regular inspection of the boilers of locomotives, is being violated, and if so, to report the extent of such violation, and to report specifically whether inspection of locomotive boilers is presently being made in all Federal locomotive boiler inspection districts and upon the roads of all common carriers engaged in interstate commerce as required by said act.

The PRESIDENT pro tempore. Is there objection to the introduction of the resolution? The Chair hears none.

Mr. HARRISON. I merely want it to go to the Committee on Interstate Commerce.

The PRESIDENT pro tempore. It will be so referred.

Mr. HARRISON. May I say in this connection that I have offered the resolution at the instance of the Senator from Utah [Mr. KING], who is at home on important official business, and I should like to have read a telegram received this morning which shows that I am offering it at his request.

The PRESIDENT pro tempore. Without objection, the telegram will be read.

The Assistant Secretary read as follows:

SALT LAKE CITY, UTAH, *July 31, 1922.*

SAMUEL RUSSELL,
Care Senator King, United States Senate, Washington, D. C.:

Prepare and have Senator HARRISON introduce to-morrow morning resolution directing Interstate Commerce Commission to report to what extent Federal locomotive inspection law is being violated and whether proper inspection as by law required is being made by all agencies employed in interstate transportation.

WILLIAM H. KING, *Senator.*

Mr. BRANDEGEE. I wish to inquire of the Senator from Mississippi if this is a joint resolution?

Mr. HARRISON. It is a simple Senate resolution, and may I say to the Senator I am offering it at the request of the Senator from Utah [Mr. KING].

Mr. BRANDEGEE. So I understand, but the reason why I asked the question is because it occurred to me that the Senate might not have the power to direct the Interstate Commerce Commission by a simple resolution.

Mr. HARRISON. It has been referred to the committee and the committee may make any modification necessary.

Mr. BRANDEGEE. Very well.

ASSISTANT CLERK TO COMMITTEE ON INDIAN AFFAIRS.

Mr. SPENCER submitted the following resolution (S. Res. 328), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That Senate Resolution No. 157, agreed to November 16, 1921, authorizing and directing the Senate Committee on Indian Affairs to employ an assistant clerk to be paid out of the contingent fund of the Senate for the second session of the Sixty-seventh Congress be, and the same is hereby, extended and continued in full force and effect until the end of the Sixty-seventh Congress.

MARSHAL FOR WESTERN DISTRICT OF SOUTH CAROLINA.

Mr. DIAL. Mr. President, a couple of months ago the name of a man was sent in to the Senate for appointment as marshal for the western district of South Carolina. I made known the fact that the appointment was not very agreeable to me. The matter was referred to the Judiciary Committee and a subcommittee was appointed to investigate it.

I was perfectly willing to let the matter rest there until the people of my State had an opportunity to be heard. I received numbers of communications on this subject. Some time ago, possibly 30 days or more, the nominee, ascertaining my feelings in the matter, undertook to send around at least one and in some cases two men to persuade the people of my State to write me letters asking that I withdraw my opposition, and I am informed that later they had copies of those letters made and sent to the Judiciary Committee, therefore putting me in the wrong light at home and also before the Judiciary Committee. This became so persistent that I gave out an interview yesterday, which was published in the papers, and I want to state to the Senate that this is my reason for doing so. I should have preferred to say nothing until the committee had gotten through with the matter, but a large part of the time of my force is taken up with answering these letters, and a few days afterwards I got other letters withdrawing the first one and stating that the writers signed them under this propaganda.

Mr. President, I ask to have printed in the RECORD in 8-point type the interview which I gave out, setting forth my reasons in the premises.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

In regard to the confirmation of Joseph W. Tolbert, who was recently appointed marshal for the western district of South Carolina, Senator DIAL said to-day:

"Tolbert is the South Carolina member of the Republican National Committee, State chairman of that organization, and

was recently appointed 'referee' for South Carolina for the present administration; that is, he is the chief distributor of patronage.

"I am not concerned about these positions, and would not interfere if I could and could not if I would. They are simply party matters. The appointee to the position of marshal has to be confirmed by and with the advice and consent of the Senate, and this is an entirely different proposition. When the President is of one political party and the Senators of another party there is no advice given in these appointments, when the office is not a bipartisan one, but when the name comes to the Senate we have to vote either to confirm or reject; hence we are responsible to this extent for all appointments confirmed by the Senate.

"The public has a right to expect us to use all diligence and exercise our best judgment—stronger than this, they have a right to demand that we scrutinize most carefully all such appointees. I have received letters from friends on the subject, but I know most of this is propaganda and that many of them have been imposed upon.

"I do not fall out with people because they are Republicans, notwithstanding I think they show poor judgment in the South to belong to this party; I freely accord every man the right to join whichever party he sees proper and to select his own companions, and if there are suitable individuals in their own ranks it is their privilege to select them for political offices. Neither do I quarrel with the powers that be for appointing them.

"I will not mention some unpleasant matters that will throw no particular light on the subject, but will only call to the minds of the people a few facts which confirm my opinion in the matter.

"Mr. Tolbert poses as a large farmer, whereas the record in Greenwood County shows that he does not pay a cent of taxes, except a dollar poll tax, and the records in the municipal, State, and the Federal courts—both on the civil and criminal side—show that his record is an unenviable one. I do not mean to say that it is necessary for a man to own property to hold office; far be it from me to take any such position; but Tolbert is sailing under false colors.

"Mr. Tolbert's conduct since he has been appointed 'referee' has shown him to be a spoilsman of the worst class. For instance, under the practice of this administration in selecting postmasters the Civil Service Commission sends to the Post Office Department the three names making the highest marks, and this department delegates to Tolbert, the referee, the right to select whichever he chooses. These offices are not political ones, and in our State the patrons are not 1 per cent Republicans, and the offices should be kept out of politics. However, under party rules, where they have competent persons it is their privilege to appoint them, and we have made no objection.

"In these matters Tolbert has ruthlessly ignored the spirit of the civil service and has refused to recommend parties making the highest marks, except in a very few cases. He has almost universally ignored the claims of ladies and ex-service men. Under the spirit of the civil-service rules ex-soldiers should receive the preference, but this has no weight with Tolbert, even where they make the highest marks. He has endeavored to turn lady postmasters out where they have been in office many, many years, and where they have made the highest marks. Moreover, he has turned out many officials—some who have served in this department for practically 40 years—and he named persons who were totally without experience, and these were not Republicans, either.

"In other words, he has run roughshod over our people and seems to be drunk with the power of a little authority.

"Worst of all, under previous administrations, I am informed, that the referee in our State sold patronage and that the universal charge was one-half of the first year's salary, and it is now claimed and generally believed that this practice is in vogue. The proof presented to me is unquestionable on the subject and is convincing beyond the peradventure of a doubt. The practice is to divide the State into districts and have some one in each district look after this part of the nefarious business. I am told of many instances where the offices were sold—one bringing $750, another $1,200, another $600, another $2,000, and different sums all around the State where there was competition. A recent case was reported where $1,200 was paid and the party failed to get the office, and after considerable wrangling the funds were returned. It is alleged that appointees to small offices often have to contribute.

"One of Tolbert's 'referees' was recently rejected by the Senate because he endeavored to get a lady postmaster to pay him $300 to get her confirmed. An affidavit of one of his former followers states Tolbert admitted he expected to realize $100,000 from this source.

"I can not condone the practice of buying an office, and if the competitors would cease bidding against each other this most disgraceful practice would be obliterated. However, they are to be pitied for being forced to come in contact with such a corrupt system. It can readily be seen that some one will have to fill the office anyway.

"Furthermore, I am told by the best authorities that Tolbert is by no means in sympathy with the enforcement of the prohibition law, and even has bragged to this effect. It is shown by affidavit that he had a barrel of liquor at one time. Many of his associates are among the most lawless class of our people, and it is commonly reported that he has formed a political combination with certain parties in our State calling themselves Democrats to create a political machine.

"It is generally believed that politics is rotten, and I am sorry to admit there are some grounds for such opinions, particularly as to Republican administrations, and it is incumbent upon me and all other citizens who care for the maintenance and perpetuation of good government to expose and obliterate all fraud and corrupt practices in our power. No man shall have a Government commission, with the approval—confirmation—of the Senate, to plunder our people if it is in my power to prevent it. Loving my State as I do, and feeling the pride of its reputation that I have always felt, I will not stand for the nomination one minute."

Mr. DIAL. Mr. President, this statement deals in a great measure with the debauchery of people in my section of the country. I hope that this in a measure will stop some of the corruption in regard to public office. I do not believe that right-thinking people of any faction or any party would condone any such corrupt practices. We get the condemnation in the South, and, of course, our people are not responsible for it; but I hope that practice will be obliterated from now on. The half has not been told.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Secretary will report the pending amendment of the Committee on Finance.

The READING CLERK. On page 155, in line 22, strike out paragraph 1203, in the following words:

PAR. 1203. Thrown silk in the gum, if singles, 50 cents per pound; if tram, 75 cents per pound; any of the foregoing containing more than 30 turns of twist per inch, and organzine, $1 per pound; if ungummed, wholly or in part, or if further advanced by any process of manufacture, in addition to the rates herein provided, 50 cents per pound: *Provided*, That none of the foregoing shall pay a less rate of duty than 25 per cent ad valorem. In no case shall the duty be assessed on a less number of yards than is marked on the goods as imported.

And insert in lieu thereof:

PAR. 1203. Thrown silk not more advanced than singles, tram, or organzine, 25 per cent ad valorem.

Mr. SHEPPARD. Mr. President, I move to amend the amendment of the committee by striking out "25" and inserting in lieu thereof the existing rate of 15 per cent ad valorem.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Texas to the amendment.

The READING CLERK. On page 2 of the printed amendment of the committee, in line 12, the Senator from Texas proposes to amend the committee amendment by striking out "25" and inserting in lieu thereof "15," so as to make the paragraph read:

PAR. 1203. Thrown silk not more advanced than singles, tram, or organzine, 15 per cent ad valorem.

Mr. SHEPPARD. The present amendment of the committee modifies the rate in the pending bill considerably on this branch of the silk industry, but still involves a distinct increase, an increase without any excuse whatever. The American thrown silk industry has won a position of practical immunity from foreign competition. It has surpassed all other countries in the protection of thrown silk yarn, the production in 1920 amounting to 28,000,000 pounds. The imports are entirely insignificant. They averaged about 34,000 pounds a year during the 30 years ending with 1920. Competition from abroad has practically disappeared. Certainly the increase is without justification. I ask for the yeas and nays on my amendment to the amendment.

The yeas and nays were ordered.

Mr. McLEAN. Mr. President, for the sake of the record I want to state that the facts warrant an ad valorem duty of 39 per cent on this article. There are some imports, although, of

course, the American manufacturer who has a complete plant makes this product for himself. But the rate is warranted by the Reynolds report and by the most careful investigation made by the committee as to the cost to the American manufacturer.

Mr. SIMMONS. Mr. President, I shall detain the Senate only a short time in discussion of this rather important paragraph.

Thrown silk is to the silk industry what yarn is to the cotton and the wool industries. It might be called the first stage of manufacture of the product. The chairman of the Finance Committee in his speech delivered on yesterday attempted to justify these high rates and this preferential protection given to the silk producers upon the broad ground that silk is a luxury. No one can deny the fact that formerly and until a comparatively recent period silk was, properly speaking, a luxury. It has been so treated in tariff bills in the past, and because it was so regarded it has heretofore been given preferential rates when considered in connection with other textiles. I distinctly recall when we were framing the Underwood law, in which we imposed upon this particular item a duty of 15 per cent, as I now recall, and in which we imposed rather high duties, as we then thought, upon the finished products, the theory obtained in the committee and upon the floor of the Senate in the discussion that silk was a luxury, and that these rates were to be considered not so much from the standpoint of protection as from the standpoint of revenue, regarding a luxury as a proper subject of taxation for revenue. The same general theory has obtained in our revenue bills. We have regarded articles of luxury, rather than articles of necessity, as the proper subjects of high rates of taxation. I say, therefore, that as late as 1913 we did regard silk as a luxury.

But, Mr. President, conditions, especially conditions of dress, the conditions which dictate the character of the material that the people use in clothing themselves, move and change very rapidly, and there has been no period in the history of the United States, or probably any other country, when those conditions have moved more rapidly with reference to the use of silk as a common article of human clothing than since 1913.

I think a proper understanding of the extent to which silks are now used for this purpose as well as for other domestic purposes must lead us to the conclusion that silks are no longer a luxury and should no longer be treated as a luxury. They are now almost as commonly used for the clothing of the people as are woolens, and I am quite certain that when this bill becomes operative, unless the duties on silks are made as prohibitive as the duties on woolens, that silks will be more common than woolen goods in America.

It was only the rich or people who were in very good financial circumstances who could afford expensive silks 10 or 15 years ago. Now, Mr. President, there is hardly a woman in the United States, whether white or colored, who does not, to some extent, use silk goods as a part of her raiment. The silk shirt has become almost as common as any other kind of shirt, especially at certain seasons. I am not expressing an individual opinion about this; I am stating what is generally known; and, Mr. President, I am stating what the manufacturers of silk in the United States have in the years since the beginning of the war, when the use of silks became so common among the people, declared to be a fact, that silk is a necessity. They insisted that because their product had become a necessity of almost as common use among the people as cotton and wools, it ought to be treated upon the same basis with reference to taxation as these other competing—for they are competing—textiles are treated.

I call the attention of the Senate to the fact that during the war the Silk Association of America, in connection with the division of industries into those essential and those nonessential, published a statement declaring that silk had become a necessity.

Again, in 1917, as appears from page 30 of the 1918 Annual Report of the Silk Association of America, a general meeting of the silk men called to consider the proposal in the war revenue bill of 1917, as introduced in the House of Representatives, to place a revenue tax on raw silk, stated:

> It (a tax upon raw silk) will increase the cost to the consumer of a product which is no longer a luxury but which is used by every woman in the United States.

I think, Mr. President, I may, therefore, lay down the broad proposition here that the silk manufacturers are not under the circumstances entitled to preferential treatment on the ground that their products are luxuries.

A higher rate on silk manufactures, as compared with cotton manufactures, can not be justified from the viewpoint of luxury or from that of competition; in fact, it is doubtful if the silk rates should be as high as the cotton rates, for, whereas the United Kingdom, our chief competitor, is the most important manufacturer of cotton, the United States is the most important manufacturer of silk, and there is less competition from abroad on silk manufactures than there is on cotton manufactures.

I want to introduce right here, Mr. President, a table which compares the evolution of the silk industry in the United States and Europe. Considering the total consumption of raw silk in the mills of the United States and of Europe combined as 100, we find that in the five years 1872–1876 Europe consumed and manufactured 95 per cent of the total, as against only 5 per cent by the United States. The relative amount of silk used in America, as compared with that used in European mills, has steadily increased, and for the five years 1917–1921 the United States used 64.6 per cent and Europe only 35.4 per cent of their combined total. So that during this period of 40 years, beginning in 1872 and ending in 1922, the process of the concentration of the silk industry in the United States as against Europe has been going steadily on, and as a result of that transition in the business from the one side of the water to the other side the relative proportion between Europe and the United States, so far as consumption of raw silk, and therefore manufacture of silk goods, is concerned, has changed from 95 per cent European and 5 per cent American to about 65 per cent American and 35 per cent European.

Mr. President, I ask unanimous consent that the table to which I have referred may be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 1.—*Average annual raw silk consumption in the United States and Europe, five-year periods, 1872–1921.*

[In thousands of pounds.]

Period.	Total average annual consumption in United States and Europe.[1]	Consumption in Europe.		Consumption in the United States.[2]	
		Pounds.	Per cent of total.	Pounds.	Per cent of total.
1872–1876	21,001	19,906	95.0	1,095	5.0
1877–1881	19,479	17,844	91.6	1,871	8.4
1882–1886	20,764	17,255	83.1	3,509	16.9
1887–1891	25,520	20,327	79.7	5,193	20.3
1892–1896	33,649	26,474	78.7	7,175	21.3
1897–1901	37,617	28,233	75.1	9,384	24.9
1902–1906	42,002	27,761	66.1	14,241	33.9
1907–1911	51,066	31,422	61.6	19,645	38.4
1912–1916	54,886	27,815	50.8	27,071	49.2
1917–1921	55,663	19,742	35.4	35,921	64.6

[1] Figures taken from reports of Syndicat de l'Union des Marchands de Soie de Lyon, and Silk Association of America.
[2] Figures taken from import tables in Commerce and Navigation.

Mr. SIMMONS. The movement of which I speak has been going on steadily, without a break, all during those long years, culminating in the United States not only consuming in its mills twice as much raw silk as does all of Europe but becoming the leading silk manufacturing country of the world. If that continues it is clear that we shall soon be manufacturing more silk than all other countries of the world combined. During the same four decades we have made no such gains in the manufacture of cotton goods, and the United Kingdom still exceeds us in number of spindles and looms and in value of output, although we produce raw cotton and she does not.

But, Mr. President, there would seem to be no reason why this silk industry, which has been growing in this country so rapidly, which has grown more rapidly under the present law than ever before in all of our history, should not continue to grow. In the five years 1902–1906 we manufactured only half as much raw silk as did Europe, but in the five years 1917–1921 we manufactured twice as much raw silk as did Europe. Practically all of this phenomenal increase—phenomenal when considered in the light of the increase that has taken place in the past 50 years—in the production of silk goods in the United States and in the tendency to concentrate the business of silk production in this country and to draw it away from Europe, the chief center of production 50 years ago, 30 years ago, 25 years ago, took place during the operation of what is known as the Underwood tariff bill. The greatest development in our silk industry in our history took place between 1912 and 1921, as the figures show.

Mr. McLEAN. Mr. President, the Senator is mistaken about that. If he had said between 1914 and 1921 he would have been fairly accurate.

Mr. SIMMONS. Oh, Mr. President, I qualified that properly. The Senator need not try to haul me up on a mere trifling pretext like that. The Senator knows that I said that beginning in 1912, mostly under the Underwood bill, this remarkable development had taken place; but if the Senator yearns to have it stated as from 1914 to 1921, let it be so, and it will prove all the more perfectly that this greatest development of the American silk industry began with the first full year under the Underwood law, to wit, 1914. In the period from 1912 to 1916, for I must be accurate, notwithstanding the sensibilities of the Senator from Connecticut, part of that time under the Underwood law, nearly three years of that time under the Underwood law and a little over a year under the Payne law, we had gotten to 49 per cent; but in the period from 1917 to 1921 we went from 49 per cent to practically 65 per cent—to be accurate, 64.6 per cent—of the mill consumption and production of Europe and America combined.

If the Senator thinks there is anything in that, I have confined it to the operation of the Underwood law and during that period the increase has been enormous, the heaviest ratio of increase in all our history; and during that period this particular product, the yarn of the silk industry, was taxed at 15 per cent.

Mr. STANFIELD. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Oregon?

Mr. SIMMONS. I yield.

Mr. STANFIELD. Nineteen hundred and twenty-one was not a very profitable year. While the production was great, the profits were not large; were they?

Mr. SIMMONS. In the silk industry in 1921?

Mr. STANFIELD. Yes; last year.

Mr. SIMMONS. I have not investigated the extent of the profits of the silk industry in 1921, but I will tell the Senator that the profits in the silk industry in this country will parallel the profits in any industry in the world in proportion to the capital invested. Nobody has lost any money in the silk industry. There is not any such question as was raised with reference to wool. If we were producing any raw silk in the United States worth mentioning, of course, we would have a high duty upon the raw silk to protect it. Although it might not have grown one particle in 50 years, although it might be decadent, moribund, disappearing, we would have a proposition here from the majority to protect the raw silk. But, Mr. President, we do not produce any raw silk in America. So, it comes in free. The question here is a question of protecting nothing but the manufactured product, either in its initial stages or in its completed, finished form. On that line I want to say that we are producing to-day in our own silk mills 99 per cent of all the thrown-silk yarn consumed in the United States. Ninety-nine per cent of all that we consume of thrown silk, this article upon which you are proposing to increase the duty, is made here in the United States.

Now, let us see what have been the imports; and it is, we have the right to assume, to protect this 99 per cent of domestic production against imports that it is proposed to increase this duty—a duty that has stimulated production in America, if a duty ever does stimulate, until we produce 99 per cent of all that we consume, and a duty which has kept out of our markets, to that extent, the thrown silk of Europe and of all nations.

Mr. President, I desire to put in the RECORD this statement, which I will read:

> The minimum ad valorem is so high—

This speaks about the bill before the change.

> The minimum ad valorem (in the amendment) is so high as to make the specific rates originally proposed inoperative under present prices. For this reason a straight ad valorem of 25 per cent has been substituted by the committee. The Underwood rate is 15 per cent, so the increase proposed is 10 per cent ad valorem.
>
> The United States is much the largest producer of thrown silk—a yarn made by doubling and twisting raw silk. Import has for years been negligible. The largest for 30 years occurred in the fiscal year 1917, when 125,000 pounds came in. This record import was less than one-half of 1 per cent of estimated production in the United States.

And here we have stated the largest importation of any one year in all the history of recent years since 1896—125,000 pounds, or less than one-half of 1 per cent of the estimated domestic production. In most years the importation was probably not more than one-tenth of 1 per cent; in many years even less than that.

Now, let me give the imports for the past few years. The domestic production of thrown silk amounts to approximately 30,000,000 pounds. Here are the importations against which it is proposed to increase the rate to protect the silk throwers of this country:

Importations.	Pounds.
1918	67,319
1919	10,723
1920	59,074
1921	27,195

The exports were larger than our imports.

But again, Mr. President, if those figures do not show that the present law is sufficiently protective, when we are the greatest producer in the world of this product, when we produce 99 per cent of our domestic production and import less than 1 per cent of what we consume, if there is any reason for raising the duty under which those conditions have been brought about, then, of course, there is no use of arguing this question at all. We ought in that case to impose a high rate of duty upon everything, whether it is imported to any extent or not. If this does not constitute a case where there is no justification whatever for increasing an existing rate, or for imposing a rate if the conditions have been brought about upon a basis of free trade, then we can not conceive of such a thing. The mind can not imagine one. It is the strongest case that has been presented since this bill was taken up against an increase and in support of the sufficiency of the present rate.

If I felt it would do any good I would show and demonstrate that from 80 to 90 per cent of the cost of producing thrown silk is represented by the cost of the raw material. I will not take the time to do that, but I will publish the statement in which that is shown. Eighty-five per cent would probably be a fair average. That represents material, and it is a material which we do not produce in the United States and which Europe, our competitor, does not produce in quantity to supply its needs. The price of that material is the same here as in Europe and throughout the world, so that there can be no element of difference in material cost to justify the proposed duty. The material cost is proportionately so large that it leaves only 15 per cent as representing the entire labor cost of throwing this silk.

The present duty of 15 per cent, therefore, is just the measure of the entire labor cost of throwing the silk in America. When you have given the manufacturer a duty which covers his total labor cost, in the name of God why should he ask for any more?

This bill is reeking with just such inconsistencies and outrages upon the American consumer of these products as I have disclosed. This is the worst, I concede it is the very worst, unless it be the case of sewing silk; but the great captain of the silk industry in this country is a man of tremendous influence in the financial, the industrial, and the political world. He dominates and controls the silk industry in tariff legislation to the same extent that Mr. Wood dominates and controls the woolen industry and Mr. Lippitt dominates and controls the cotton industry.

The silk manufacturers of the United States as a body are not asking for increased rates. They recognize that the rates now existing are high enough and in many instances too high. They are not asking for increased rates; they are satisfied. But Mr. Horace Cheney and the small coterie which surround him, who are more directly interested in his operations than others in the industry, want higher duties, not because Mr. Cheney meets with any competition in the manufacture of ninety-odd per cent of his products, for he does not, and he knows it; at least, all the other silk manufacturers of this country recognize it. They have really no competition. Competition in the silk industry between the United States and Europe has practically ended. It is a bagatelle. It is too small to take into account. But there is a kind of silk goods coming into the United States, known as pongees and habutai, habutai produced in Japan exclusively, I believe, and pongee in China and Japan. It is a small amount compared with the aggregate of silks consumed in America, probably not more than 6 or 7 per cent. There are a few novelties coming in from Europe still, a few new designs, which do not hurt but help the industry.

Mr. McLEAN. Mr. President, I can not let that statement go unchallenged, because while the amount that comes from Japan and China may be about 7 per cent in poundage, it is 24 per cent of the entire yardage used in this country.

Mr. SIMMONS. Mr. President, the Senator is in error, I am advised by my official Government expert, and his statement bears out the statements of scores of silk manufacturers who have been to my office. These big silk manufacturers, urging me to oppose these increases, have insisted that they were not needed, and that Mr. Cheney was not justified in demanding them. Of course, if Mr. Cheney does demand them, I know he will get what he demands, just as Mr. Wood got what he demanded, and just as Mr. Lippitt got what he demanded. Whatever these towering, Brobdingnagian characters of the financial

and industrial and political world demand of the Republican Party, they get. There can be no doubt about that. The Republican Party can not help itself. It is bound hand and foot. It is mortgaged. It must dance when they fiddle.

Those silk manufacturers declared to me that these proposed rates were not required. I have a telegram to that effect which I shall put in the RECORD. The manufacturers tell me that the pongee and the habutai silks come in in negligible quantities compared with the general production.

I do not say that they said 7 per cent, but it was small and insignificant as compared with the total, and I am advised that it is about 7 per cent. That is a matter which easily can be ascertained, however. This fact can not be wiped out—that no pongee or habutai silk is produced in this country, or if there is any produced here it is too trifling to be mentioned.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Connecticut?

Mr. SIMMONS. Our manufacturers did at one time start to produce it, but they discontinued the effort. They were perfectly content to leave that business to Japan and China.

Mr. McLEAN. They went out of business because of the low rate in the Underwood law.

Mr. SIMMONS. The Senator is again mistaken, and I decline to yield until I have consented to be interrupted. The Senator has no right to interrupt me in that way while I am speaking. If he will wait until I finish the sentence and interrupt me in the orderly way, I will yield.

I was discussing the amount of this silk produced in the United States. I said that at one time our manufacturers did undertake to manufacture this low-grade silk in this country; but after an effort all of them decided that it was better to leave the production of it to China and Japan, and as a result China and Japan are to-day practically the only producers of these two classes of silks. They are cheap products. They are that part of the silk consumed in the United States which is bought and consumed by the poorer classes of our people, people who are not able to pay the high charges and prices asked for Mr. Cheney's fine silks.

We can perfectly well understand that. People of small means recognize the fashions in silk hose, silk gloves, and silk shirts; people of small means who want to follow in those fashions of course must buy the grades of silks which conform most nearly to their financial ability to buy. They have to buy the cheaper quality, just as those people who wear the same general fashion of clothes which the rich wear have to buy a coarser and a cheaper grade of goods, whether it is cotton or wool or linen. An embargo on this pongee and this habutai, which are not produced in America, which Mr. Cheney does not produce, which no silk man produces in the United States in any quantity worth mentioning, is all Mr. Cheney is after.

Mr. McLEAN. Mr. President——

Mr. SIMMONS. Not that Mr. Cheney needs it.

The PRESIDENT pro tempore. Does the Senator yield?

Mr. SIMMONS. I will yield in a moment.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. SIMMONS. I decline to yield for the present. Mr. Cheney does not think those silks come in competition with the run of his mill. That is not why he wants a duty on this article not produced in the United States. He does not wish to permit that cheap grade of goods to displace his fine goods. Mr. Cheney wants the purchasers of that cheap grade of goods forced by legislation to purchase his expensive goods, and that is the proposition we have here—whether we shall force the poor people of the United States whose needs are satisfied with this inexpensive pongee and habutai silk of China and Japan to buy Mr. Cheney's higher-priced silks; whether, though none is made in this country, we shall prohibit the importation of those cheaper silks, in the interest of Mr. Cheney, in order that the poor people may be forced either to go without silks or to buy Mr. Cheney's expensive silks.

Now I yield the floor to the Senator from Connecticut, if he wants it.

Mr. McLEAN. Mr. President, I shall occupy the floor but a very few minutes. I understand the Senator has yielded the floor?

Mr. SIMMONS. I have.

Mr. McLEAN. The Senator from North Carolina has repeated his criticisms and strictures against this paragraph almost in precisely the same language he used when speaking of the other textile schedules.

Mr. SIMMONS. Mr. President, I am about to leave the Chamber, and I hope the Senator will not think I am leaving because I am not interested in what he is about to say, but I have just been called to the long-distance phone.

The PRESIDENT pro tempore. The Chair recognizes the Senator from Connecticut.

Mr. McLEAN. Does the Senator from Arkansas know whether the Senator from North Carolina wishes to continue his remarks?

Mr. ROBINSON. He has concluded his remarks and has left the Chamber in response to an urgent call to the long-distance telephone.

Mr. McLEAN. The Senator from North Carolina insists that silk is not a luxury. That is true in a sense, and I think we will all agree that it is not as necessary as our wool and cotton. The fact that it is not a luxury is entirely due to the protection which the Government has given to the silk manufacturer. As I stated yesterday, when the Senator from North Carolina was not in the Chamber, silk which cost $3 a yard in 1868 was sold for 60 cents a yard in 1914. That remarkable and striking decrease in the cost of the product is entirely due to the fact that this country has given reasonable protection to her manufacturers.

I want to say, Mr. President, that it is due to the ingenuity of the American manufacturer that the cost of silk has been greatly decreased throughout the world, or was up to 1914. We all know that after that time conditions were abnormal and prices of everything went up.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. McLEAN. Certainly.

Mr. ROBINSON. The Senator said that the cost of silk declined to about 60 cents a yard in 1914. Will the Senator give the cost of the silk at this time so as to enable the Senate to make a comparison between the prices of 1914 and the prices at the present time?

Mr. McLEAN. That same question was asked yesterday when peignee was under discussion. The prices are very uncertain at the present time. They have been reduced largely since 1920. I do not know just what the prices are to-day, but I will say to the Senator that the mills are working half time and no silk mill in the country has made any money in the last two years. If a yard of silk made in 1921 or 1922 is bought to-day, it will be bought for less than it cost to produce it.

Mr. ROBINSON. My object in asking the question, I will state in fairness to the Senator from Connecticut, is that he stated that silk in 1914 had declined to 60 cents per yard and I wanted to make a comparison in my own mind between the cost of silk at that time and the cost of silk at the present time. I thought, perhaps, the Senator might have the price of the particular kind of silk he had in mind.

Mr. McLEAN. The particular kind I referred to was the common grosgrain silk, and I do not think it is made at the present time. I think other varieties have taken its place.

Mr. ROBINSON. So that the Senator is totally unable to give figures which would enable the Senate to make a comparison between the prices of silk in 1914 and the prices of silk in 1922.

Mr. McLEAN. I do not think that any comparison of that kind would be of value because, as the Senator knows, the prices of silk went very high during the war. The war operated as an embargo and the industry did increase very rapidly here and prices went up. I will say to the Senator that the prices have decreased greatly in the last two years, but just what is the price of that particular product at this time I do not know.

Mr. ROBINSON. That was true of almost everything else, but that general statement can not be of very great value in enabling one to form a conclusion as to the present condition of the industry and present prices which its products command.

Mr. McLEAN. I will say to the Senator that the present condition of the industry is very much depressed. While I am on that subject I desire to make another statement. The Senator from North Carolina has referred to Mr. Cheney, who is a Connecticut man. I have known him all my life. If there is an honest man in the United States, Mr. Cheney is that man. He and his family before him are responsible for one of the finest communities in New England, if not in the United States. While I have no financial interest in the industry, I am in a position to know that the net dividends have not averaged 6 per cent since it was established.

Now, Mr. President, it is true that owing to protection the industry in this country has developed remarkably. Nearly all of the labor-saving devices were invented in this country. The Grant reel, which substituted a cross skein in place of the old straight reel, was invented here and adopted in other

countries. It saved hundreds of millions of dollars to the producers of silk.

Two years ago we sent a mission to China to instruct the Chinese in the use of modern silk machinery. Within the last three years Japan has imported over $12,000,000 worth of silk-producing machinery. China and Japan are in position to-day to drive the American producer out of the market, and will drive him out of the market in the lightweight silks, such as the pongee and habutai.

Mr. ROBINSON. Mr. President, will the Senator yield at that point for an inquiry?

Mr. McLEAN. Certainly.

Mr. ROBINSON. Has the Senator available the production figures for the manufactures of silk in the United States subsequent to the year 1919?

Mr. McLEAN. No; I have not.

Mr. ROBINSON. With reference to a statement made by the Senator from North Carolina while he had the floor and which I understood the Senator from Connecticut to challenge, I want to point out that according to the census the imports of all manufactures of silk in 1921 were valued at $48,682,507. The production of all silk manufactures in 1919 was valued at $688,946,000. Thus the imports in 1921 were about 7 per cent of the value of production in 1919. I have not the figures of production later than 1919, and of course the comparison is not entirely accurate for that reason.

Mr. SHEPPARD. May I suggest to the Senator from Arkansas that the production, including knit goods in 1919, was $895,000,000, which makes the illustration all the more striking.

Mr. ROBINSON. I have been unable to secure the figures of silk production for any year later than 1919.

Mr. McLEAN. I have not the importations, but my information is that they are about 24 per cent of the entire yardage of American production.

Mr. ROBINSON. For 1921?

Mr. McLEAN. Yes.

Mr. ROBINSON. Then there must have been a very great decrease in production.

Mr. McLEAN. That is very possible, because, as I said, the mills are working only half time.

Mr. ROBINSON. What were the total manufactures for 1919, according to the Senator's figures?

Mr. McLEAN. I have not those figures.

Mr. ROBINSON. How does the Senator from Connecticut get the percentage if he has neither the total production nor the total importations?

Mr. McLEAN. I had them when I made my estimates. The Senator can easily figure it out when he knows that the yardage imported is about 24 per cent of the entire American production for 1921. That is about 68,000,000 yards.

Mr. ROBINSON. That is starting with the assumption that the percentage is accurate. The Senator must have had the production for 1921 in order to arrive at the ratio which the production bears to the imports.

Mr. McLEAN. I gave the yardage of 1919 at 310,132,000 yards.

Mr. ROBINSON. Is that the production or the importation?

Mr. McLEAN. That is the production in yards.

Mr. ROBINSON. The figures of the census for 1919 are $688,946,000.

Mr. McLEAN. That is probably the entire product?

Mr. ROBINSON. Yes; all manufactures, and that was my question.

Mr. LODGE. The difficulty is that the Senator from Connecticut is giving the figures in yards, while the Senator from Arkansas is giving the value in dollars.

Mr. McLEAN. The entire production, as I recollect it, is upward of $700,000,000.

Mr. ROBINSON. If the Senator includes knit goods, the production figures for 1919 swell to $895,000,000, I am informed by the Senator from Texas [Mr. SHEPPARD], but I am interested to know to what character of goods the Senator from Connecticut refers. I was discussing, and so was the Senator from North Carolina, the production of all manufactures of silk in 1919.

Mr. McLEAN. As I recollect it, the value of the total production was approximately $700,000,000. That includes everything. Of course, the Senator knows that a very large percentage of that is velvet and knit goods, and a large percentage of the silk yarns go into woolen goods and cotton goods and into the insulating appliances which are used by electrical establishments. I think perhaps 50 per cent of the product——

Mr. ROBINSON. Mr. President, will the Senator yield again.

Mr. McLEAN. I yield.

Mr. ROBINSON. That would swell the total value of domestic production, if all the items which the Senator from Connecticut referred to should be included.

Mr. McLEAN. No; that is included in the $700,000,000.

Mr. ROBINSON. According to the statement just made by the Senator from Texas, if we include knit goods in silk the total would be $895,000,000 plus.

Mr. SIMMONS. Mr. President, may I interrupt the Senator from Arkansas?

Mr. ROBINSON. Certainly.

Mr. SIMMONS. I understood that the controversy between the Senator from Connecticut and myself grew out of two statements that I made, one that 99 per cent of the thrown silk consumed in this country was imported and the other that all except 7 per cent of the entire silk production in this country was produced or manufactured in this country.

Mr. McLEAN. The Senator from North Carolina discussed the whole schedule.

Mr. SIMMONS. I was speaking of both.

Mr. McLEAN. I should prefer to take up the pongees and habutais when we come to them, for a complete defense of the rates recommended by the committee. The Senator said that the American producer wants to shut off the Japanese and Chinese light goods, the pongees and habutais.

Mr. SIMMONS. No; if the Senator will pardon me, I did not say that. I said Mr. Cheney and his coterie desire to do it. I said the balance of them were not asking it.

Mr. McLEAN. The Senator is wrong about that, in my opinion. I do not know where he got his information.

Mr. SIMMONS. I got it from the silk manufacturers.

Mr. McLEAN. My judgment is that the silk manufacturer who gave the Senator that information was also an importer. Is that true?

Mr. SIMMONS. No.

Mr. McLEAN. I know, but several gentlemen have appeared before the committee who were importers and domestic manufacturers.

Mr. SIMMONS. I should like to ask the Senator a question.

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from North Carolina?

Mr. McLEAN. I yield.

Mr. SIMMONS. Is not Mr. Cheney one of the largest importers of spun silks and silk fabrics?

Mr. McLEAN. Mr. Cheney spins his own silks. He did in 1913 and 1914 import some of the habutai, because the Underwood rate was so low that he was driven out of the business; and, if he supplied his customers, he had to get the foreign goods.

Mr. President, the particular paragraph which is under discussion, being paragraph 1203, is one which evidently the Senator from North Carolina knows nothing about. Every complete plant of necessity prepares its own thrown silks. It is an expensive and technical process, and any man who makes fine goods necessarily controls the preparation of his thrown silk and his yarn.

Thrown silk is the first step in preparing the reeled silk—that is, silk prepared by unwinding from the cocoon—in manufacture. Normally there would be little or no importation of materials of this character, it being a partly manufactured product, and moreover having the disadvantage of concealing the character of the material from which it is produced to a degree. Manufacturers—

As I have stated—

usually prefer to buy their own raw silk and send it to a throwster to be prepared for weaving, otherwise they are not able to establish proper weaving conditions.

If the Senator from North Carolina knew anything about this industry, he would know that that is an absolutely accurate statement.

This paragraph covers silks of all kind, from the cheapest to the best. If the specific rates here mentioned were applied to the finest silks, they would appear prohibitive.

I want to say right here that the Japanese, for ways that are bright and tricks that are far from vain, excel their Chinese neighbors. They have absolute control of the raw product, as I shall show later when we come to the silk threads—and it is largely true of this product—and they will control the price, so that an ad valorem duty of 25 per cent will amount to nothing. It will not, in my opinion, shut out an ounce of importation. The duty should be as high as the rate which is warranted by the importations which we have been able to tabulate, which would be 10 per cent above the rate recommended by the committee.

I have here, Mr. President, a statement of costs in this country which were obtained after the most careful investigation. I want to say that when the American citizens representing this great industry appeared before the Ways and Means Committee

of the House and made their statements as to their costs they invited the committee to visit their mills and to check up those costs.

In August, 1921, the cost of materials from which press-packed tussah was made was $2.10 a pound, and the foreign cost of manufacture was $1 a pound. The specific duty at that time of 75 cents equaled only 22 per cent of the value. The material has been sold in this country as low as $1.50 a pound already thrown.

In 1921 Canton crêpes were valued at $5 a pound in the United States; the domestic cost of throwing was $1.85 per pound; Chinese cost 31 cents; differential $1.54, equal to 30.8 per cent ad valorem.

Canton weighted black organzines on beams, value $4.80 per pound; cost of manufacture in the United States, $1.90 per finished pound; cost of manufacture in Germany, where made, 31 cents; differential, $1.59 per pound; specific duty, $1.50—that is under the old law before we suggested the amendments—differential ad valorem 33 per cent.

Mr. President, as I stated yesterday when the Senator from North Carolina was absent—and I am going to repeat it to-day—the arguments presented by Senators on the other side of the Chamber in denunciation of the Finance Committee and of this bill have no merit whatever as an estimate of the benefit of protective tariffs as a permanent policy. They talk about the cost in the succeeding year, when history has shown that where protective tariffs have been permanently established the price of the product has been reduced below the price which obtained when the tariff was imposed. In the silk industry we have a striking illustration of the benefits which resulted to this country by protecting an industry the raw material of which we must import.

We have not the advantage which is incident to the cotton industry, because in the case of cotton the material is all grown here; we have not the advantage which pertains to the woolen industry, because a large percentage of the raw material in that instance is grown here; but in the case of silk we must import all of our raw material, and we are at the mercy of the foreign producer of raw silk. Yet such has been the ingenuity of the American manufacturer that a day's work in this country to-day will buy five times the silk goods that it would buy in 1868, when the first protective tariff began to take effect.

The Senator from North Carolina is, of course, interested in the political effect of the pending tariff bill. He has from time to time read editorials from the great metropolitan newspapers; he has spoken for the importers who have made common cause with the other side of the Chamber in their attempt to discredit this bill. I want to call the Senator's attention to an editorial appearing in the New York Herald, which happens to be his favorite publication at this time. The editorial is very brief and was printed the day after the minority report of the Finance Committee was presented to this Chamber. It reads as follows:

> Senator SIMMONS's minority report against the Fordney-McCumber tariff proposal has been carefully prepared as a Democratic electioneering dodger rather than an economic treatise.

I think that fairly describes the minority report and very accurately describes the subsequent speeches which have been delivered by the Senator from North Carolina.

I think I can say with regard to this particular schedule that the reason for asking for these rates, which are only reasonably protective, are similar to those advanced by the distinguished Senator when he advocated a tariff on lumber in 1909. Let me quote from the CONGRESSIONAL RECORD of April 28, 1909:

> The bill under consideration reduces the duty upon rough lumber—that is, sawed board—from $2 to $1 per thousand feet. The equivalent ad valorem rates are, respectively, about 1 per cent and 5½ per cent.
>
> I am opposed to this reduction—

Said the distinguished Senator from North Carolina—

> and in favor of retaining the present duty upon lumber—

Why?

> because the present rate is upon a revenue basis and because the proposed reduction will probably not reduce the price of lumber to the farmer and the home builder, or, if at all, only slightly and in a comparatively limited area, while—

Now we get the real reason why the Senator from North Carolina wanted a duty of $2 on lumber—

> it would work great hardship to the lumber industry and the sections of the country in which this industry is conducted by enlarging the market zone of Canada for this product.

Mr. President, that is all we are asking for. We should like to have what the Senator from North Carolina wanted; we should like to have a revenue duty high enough to keep out of this country the rapidly increasing importations from Japan and China. The Senator says they are lighter weight, they are cheaper goods. That is true. You can go into any store in this town to-day and buy them for 60 cents a yard, with an ad valorem duty of 45 per cent paid, and all we are asking is an increase of 10 per cent. It is not sufficient. In my opinion, it will be a serious menace to the industry in this country unless these rates are made higher than those recommended by the committee. Already the importations have increased from 9,000,000 yards in 1909 to something like 60,000,000 yards last year, 24 per cent of the entire yardage.

Mr. President, we will discuss the tussah and the habutai when we get to them. I am merely interjecting this now to indicate to the Senator from North Carolina that the Committee on Finance, in striking out these specific duties and reporting only the ad valorem duties, made every concession to the importer, and that this duty on the thrown silk might well be prohibitive, because no complete plant in this country should depend upon foreign importation of this article if it expects to make fine goods; but it is not prohibitive. It is only 10 per cent above the 15 per cent in the Underwood Act, and I sincerely hope that the recommendations of the committee will be adopted.

Mr. SHEPPARD. Mr. President, while no official figures have been published as to the value of the total manufactured products of silk since 1919, official figures do exist as to the volume of imports of reeled raw silk. Of course, it is well understood that we import all the raw material of the silk industry, and the importations of reeled raw silk have increased steadily since 1919. In fact, the amount of importations during the 11 months ending in May of 1922—to wit, 43,102,299 pounds—was greater than during any previous period in the history of the American silk industry.

Mr. McLEAN. Mr. President, if the importations are increasing, there is all the more reason for the tariff.

Mr. SHEPPARD. The imports of raw silk have been increasing, showing that the industry itself is continuing to make the same remarkable progress that has characterized it during the last five or six years and that has characterized it during the prevalence of the existing rate, showing that there is no excuse or justification for an increase at this time.

The yardage figures given by the Senator from Connecticut are entirely unreliable, because they do not show the number of pounds per yard in the yardage so imported. It is impossible to tell what the actual value of that importation is, and what the relation of that value is to the total value of the manufactured product.

Mr. McLEAN. The Senator is mistaken about that. These figures are taken from the invoices and customs reports.

Mr. SHEPPARD. The figures are taken from unofficial private estimates of interested concerns.

I ask for the yeas and nays on my amendment.

The PRESIDENT pro tempore. The yeas and nays have been already ordered.

Mr. SIMMONS. Mr. President, the Senator from Connecticut [Mr. McLEAN] has just read a part of an editorial in the New York Herald, a Republican paper, printed the morning after the minority filed its report upon the pending tariff bill. That minority report analyzed and dissected the bill. The editorial the Senator has now read criticized the minority report as being political and partisan.

I assume that the Herald had not then had time to digest that report. Certainly the Herald had not at that time come to understand what this tariff bill means. As soon as this great Republican newspaper, which criticized the report the next morning, before it had had time for more than a mere scanning of the report; as soon as that great Republican newspaper—Republican, I believe, through all of its history; probably the leading Republican organ of the United States; certainly one of the greatest, if not the greatest, Republican papers published in America—as soon as it came to understand what this bill meant, what these criticisms meant, and the facts that fully justified the criticisms made in the minority report, it opened wide its news columns and, in addition, from day to day, in editorials that thundered around this land, began to denounce in the bitterest and most unqualified and scathing terms this bill from beginning to end.

As soon as the iniquities of the pending measure began to dawn upon its editors, as soon as they had an opportunity to study and see the justification of the criticisms in the report, they sent to Washington a newspaper correspondent who was an expert tariff man to cover the tariff fight and they directed him to come to see me, as well as other Senators, for the purpose of getting further facts from us and of exposing what that great Republican newspaper and its editors had discovered to be an outrage against the American people.

The same thing happened, Mr. President, with the other Republican newspapers whose editorials I have heretofore, as the Senator said, read into the RECORD. At first, of course,

these Republican newspapers had supposed that a committee of their party, framing this bill under a mandate from the people to frame a protective measure, had really framed a protective measure just, from their view, to the industries of the United States and just to the consumers of this country; but when they found that the Republican majority had framed a bill in the interest of profiteers, repudiating every Republican tariff principle, perpetrating gross and cruel wrongs upon the consumers of America, they earnestly and freely used their editorial and news columns in denunciation of the monstrous thing. I have repeatedly said here that probably a majority of the great, outstanding Republican newspapers of the United States to-day, since they have come to understand this bill as the people of the United States have come to understand it, have changed from advocacy of it as a Republican tariff bill to scathing denunciation of it as a profiteering, a plunderbund, a robber tariff, that could not be justified on any principle of party or of morals or of ethics.

I thank the Senator from Connecticut for his unwittingly calling the attention of the country to the fact that this great organ of his party, the New York Herald, sought to support this measure as long as conscience would permit it to do so, and that as soon as its eyes were opened it became a mighty champion in the front ranks of those opposing this unspeakable tariff robbery.

Mr. President, I have here some additional editorials from Republican and independent and nonpartisan trade papers. I may have heretofore called attention to parts of one or two of these editorials, but taken together, and representing as they do the consensus of the views of the leading Republican editors of the United States, they are very significant and interesting. I am going to ask unanimous consent that I may insert in the RECORD, without reading, these additional editorials for the edification and enlightenment of the Senator from Connecticut and those who, like him, because a partisan organ of their party disapproved of a Democratic report the morning after it was adopted, close their eyes to the startling fact that the partisan press of the Senator's own party has now, since it came to understand this tariff bill, turned upon the measure with more bitterness in denunciation than even Democratic Senators on this side have ever shown, some of these great Republican organs speaking of it not as protection but as thievery, others speaking of it as a "damn fool tariff bill," and others as "a plundering tariff."

The PRESIDENT pro tempore. Is there objection to the request of the Senator from North Carolina? The Chair hears none, and it is so ordered.

The editorials are as follows:

[From the New York Herald, Tuesday, August 1, 1922.]

LET THE TARIFF WAIT.

The national scandal of an insufferably burdensome wool tariff made by sheep-growing, wool-raising Senators for the benefit of their own private property has deeply stirred the people of the United States. American sentiment can comprehend men in high public office going to extremes, men going wrong and even badly wrong in their partisan or fanatic devotion to an impersonal cause. American sentiment can not comprehend and American sentiment will not countenance legislators making themselves responsible for, indeed creating and jamming through, laws that directly and heavily concern their own private pockets.

The tariff makers of the present Congress can not go before the voters of the United States next November on the issue of the Senate's monstrous wool schedule, the handiwork of sheep-raising, wool-growing Senators, without inviting political revolution by an aroused Nation. But even if the wool-tariff scandal had not arisen to shock and outrage the fine American sense of conscience and propriety, the Fordney-McCumber tariff as a whole is so full of economic blunders, so fraught with public hardship, and so potentially dangerous to the country that it would not be good sense and it would not be safe to take it before the American people at the Congress elections now only about three months away.

If the crazy wool schedule were torn out of the tariff measure by the roots, if the sheep-growing, wool-raising Senators never had startled and shaken the American public with the wool tariff they have tried to impose upon the country, still the Fordney-McCumber tariff is so bad, so unworthy of anybody's support, so incapable of meeting the test of popular approval, that to take it to the polls as the great national issue of the elections of 1922 might blow any political party so doing off the face of the earth.

There is no time left between now and November to make a good enough measure out of the Fordney-McCumber monstrosity to win public confidence. There is no time left to correct in a sound, scientific way even the schedules that are the most extravagant in their economic lunacy and the most hateful to the American public. There is no time left to extract half the wrong and evil of the measure. There is no time left to do much of anything but to run for shelter out of the storm.

A frightful economic botch has been made out of the whole tariff. Anybody in his senses knows that. It is beyond all hope of satisfactory repair in the next few months or several weeks. Anybody competent to do the job knows that. To go before the country with this tariff botch would be simply to commit, on the heels of the unparalleled economic blunder, a colossal, unexampled political blunder.

Let the tariff wait until after the November elections.

[From New York Evening Post (Independent Republican), July 11, 1922.]

TARIFF TO RAISE PRICE OF CLOTHING NEARLY $5 A SUIT—TAX ON 99 PER CENT OF POPULATION TO AID A FEW WOOLGROWERS—FORDNEY-MCCUMBER SCHEDULES GET NEW NAME, BUT ARE NONE THE LESS OFFENSIVE.

(By William O. Scroggs.)

In past years Schedule K of the tariff bill, the section dealing with wool and manufactures thereof, has "smelled to heaven." After Congress tinkered with it in 1909 President Taft denounced it as indefensible, and it was so rank that the American people turned against its framers and sent a Democratic majority to Congress at the election of the following year.

In the Fordney-McCumber tariff bill the schedules bear numbers instead of letters, and Schedule K thus gets a coat of whitewash by becoming Schedule 11. But changing its name has not made the wool schedule any less offensive. Many of the duties in the new tariff bill are even higher than those in the Payne-Aldrich Act. It is not easy to compare them, because the rates in the latter measure were laid on wool in the grease, while those in the Fordney-McCumber bill are based on the scoured content.

Nevertheless, it is evident to everyone with an elementary knowledge of the wool industry that the Payne-Aldrich duty of 11 cents a pound on wool in the grease is much less than the proposed duty of 33 cents a pound on scoured wool. The degree of shrinkage varies from about a fourth up to two-thirds when wool is scoured; the average is somewhat less than a half. A shrinkage of 40 per cent would make the Payne-Aldrich rate about 18 cents a pound on the proposed new basis, whereas the Fordney-McCumber bill imposes a duty of 33 cents, or 83 per cent more.

ON AN AD VALOREM BASIS.

Just what this specific duty of 33 cents a pound on scoured wool means when converted to an ad valorem basis may be readily estimated. A coarse grade of New Zealand cross-bred wool sold recently in its home market for 13½ cents. As this grade shrinks about 25 per cent when scoured, its scoured value would be 18 cents. When brought into the United States under a 33-cent import duty, it would have to sell for 41 cents plus the carrying charges, compared with 18 cents in Great Britain. This 33-cent duty on 18-cent wool is equivalent to an ad valorem duty of 183.5 per cent, or more than double that of the Payne-Aldrich bill. It should be borne in mind also that this is the duty on cheap wool for the poor man's clothing.

Now, let us see the difference between this duty and that on the fine grades of wool that go into the manufacture of clothes for the well to do. One of the fine grade wools from Australia recently had a value of 54 cents a pound in its home market. It shrinks about 45 per cent in scouring. Its foreign value when scoured, therefore, would be 98.2 cents a pound, or over five times that of the cheap grade of wool just mentioned. Now, this 98-cent wool and this 18-cent wool are both dutiable at 33 cents. As a result the cheap, coarse wool bears the equivalent of an ad valorem duty of 183.5 per cent, and the fine grades a duty of only 33.6 per cent.

It is not surprising, therefore, that the Democrats plan to make schedule 11 (ex-K) one of their greatest assets in the coming campaign, unless their opponents reverse their position before the bill comes up for final passage. The farm bloc, which is responsible for the duty on raw wool, has left something on the doorsteps of the Republican leaders that is likely to cause them as much trouble as old Schedule K did in 1909.

These exorbitant rates on an essential commodity are not imposed with a view to protecting an infant industry. Woolgrowing in the United States, instead of being in its infancy, is more likely showing signs of senile debility; that is to say, it is largely a frontier industry, and the American frontier is vanishing. For this reason Australasia, Argentina, and South Africa are to-day the world's chief sources of wool supply, and no reasonable tariff measure can make the United States self-supporting in this field.

UNITED STATES WOOL CLIP DECREASES.

At present the country can supply only about 40 per cent of its wool requirements. The census shows that only about 7 per cent of the farms produce wool in any quantity worth mentioning, and it is only on the great western ranches that woolgrowing constitutes the chief industry. On smaller farms it is merely a side line. Only a fraction of 1 per cent of our population is directly dependent on wool production for a livelihood.

Our domestic wool clip, according to the census, was 289,000,000 pounds in 1909, and by 1919 it had dropped to 228,000,000 pounds. It should be noted, too, that this decline took place in spite of the war prices for wool that prevailed from 1914 to 1919. The industry also languished under the benevolent paternalism of the McKinley Act of 1890 and of the Dingley Act of 1897.

The Underwood Act of 1913 placed wool on the free list, but the Great War came soon afterwards and raised the price higher than any protective tariff could have done in time of peace. In spite of this encouragement, and of the special efforts of the Government to stimulate production as a war measure, the output was never brought back to the level of 1890. The reason is quite plain. The improved farm lands of the United States can raise other things more profitably than wool. Intensive agriculture is steadily supplanting sheep grazing.

Since the high duties in the wool schedule will neither develop a new industry for which the country is well adapted nor serve to make us self-sufficing as regards an essential commodity, it is evident that they can be employed only to bolster up a declining business and to enrich barely 1 per cent of the population at the expense of the other 99 per cent.

Some defenders of the wool schedule maintain that the duty on raw wool will increase the cost of men's clothing less than a dollar a suit and that this small sum will be absorbed by the dealer or manufacturer and therefore will not increase the price of clothing to the consumer. If the duties are absorbed in any instance—and it is doubtful if they will be—this can happen only in the case of the more expensive clothing. Cheap clothing, as a result of the specific duties, will be taxed more heavily in proportion to its value than the better grades, and the burden on this sort of material will be too great to be absorbed by manufacturer or merchant. This can best be shown by an illustration.

HOW THE COST INCREASES.

The average suit of clothes requires four pounds of scoured wool in its manufacture. The proposed duty on this amounts to $1.32. The wool importer pays this and adds it to the amount on which he bases his commission when he passes the material on to the spinner. The

latter includes the original duty plus the commission in the sum on which he calculates his mark up. The extra charge which the cloth manufacturer must pay for the yarn as a result of the tariff has by this time increased, say, 22½ per cent over the original duty, and is now $1.81. To this the manufacturer adds his mark up of 20 per cent, and it grows to $2.17. Next the cloth goes to the clothing manufacturer, who adds another 20 per cent, bringing the added price up to $2.62. Finally the retailer adds his mark up, varying from 35 to 50 per cent, according as the suit is of staple design or an extreme novelty.

Consequently the suit will cost from $3.54 to $3.93 more than it would if wool had remained on the free list. These figures are conservative; others estimate the extra cost at $5 per suit, and this is probably more nearly correct for the reason that the dealer, if he is compelled to raise his price as much as $3.93, will go a little further and make it $5. He can get that from the average consumer about as easily as he can the $3.93. The tariff bill tends to stimulate petty profiteering of this sort, as well as profiteering on a larger scale, by the producers, on whom it confers special favors.

It is important, however, to bear in mind the fact that this extra $5 will be added to a $25 suit as well as to one costing $125. On the clothing of the poor man the wool duty thus imposes the equivalent of a 20 per cent tax, while for the man who can affard the $125 suit the tax amounts to only 4 per cent. In the latter case the added cost is relatively so small that it is possible for the tailer or clothier to absorb it and for the wealthy consumer to escape the burden. The only way that the less affluent consumer can avoid paying more for his clothes is to purchase a suit made up of inferior fabrics. Incidentally, this may prove to be one of the worst effects of the duty on wool. The people must have clothes, and if they can not afford good wool they will wear stuff of part cotton and shoddy that will give inferior service and in the long run prove very expensive.

All this makes a travesty of the claim that the chief purpose of the tariff is to enable American working people to maintain high standards of living.

—

[Editorial in the Greensboro (N. C.) Daily News, a great independent newspaper, leaning toward the Republican Party, July 31, 1922.]

THE SENATE'S COARSE WORK.

The iniquity of the tariff bill has been the subject of lurid comment from many Republican newspapers; but the New York Herald, as stout a supporter of the G. O. P. as exists in newspaperdom, has brought charges of a peculiarly shocking nature. It is a discreditable thing for Senators to use the tariff schedules to corral votes in their individual States; but that practice is ancient, if not venerable. Unholy custom has solidified if not sanctified it. It is out of the ordinary, though, for Senators to be accused of juggling the tariff in order to put dollars into their own pockets. The wool schedule is a scandalous thing—worse than Schedule K of infamous memory. It is robbing every man and woman in the country who has to buy woolen cloth, or clothes made of woolen cloth, for the benefit of a few sheep raisers. That is bad enough, in all conscience; but the Herald makes worse charges, for it alleges that certain of the Senators are woolgrowers—that Senator WARREN, in particular, is the "greatest sheep raiser since Abraham."

Juggling the tariff bill by Senators for their own financial profit would be a new infamy in American politics. The very suggestion of such a thing shocks the country. If there is any foundation for such a charge the country should know it; yet Senator WARREN dubs the proposal to investigate the charges a "damn-fool" proposition.

Is WARREN monstrously cynical or merely imbecile? One would think that a man gifted with both integrity and intelligence would recognize the frightful nature of such a charge and would recoil in horror from it. One would imagine that a man, convinced of his own innocence but charged with the crime of using an honorable office to batten upon the necessities of the poor, would jump at any chance to clear his own name.

Furthermore, if the Senate thinks that it is "arm'd so strong in honesty" that it can afford to ignore such charges against its membership, it flatters itself. The country has not forgotten that NEWBERRY also is a Senator, and that he was made a Senator by a majority of $195,000. The country knows also that there must be some excuse for the existence of the wool schedule; and the country can see no legitimate excuse for it. The country knows that somebody will profit scandalously by that schedule; and the New York Herald charges that some of the profiteers are Members of the United States Senate. When newspapers normally Republican in politics admit that the tariff bill stinks to high heaven, is the independent voter likely to believe that it is wholesome and sound? And if the Senate is preparing to ram through a rotten tariff bill, how can it hope to maintain a reputation for dignity and integrity?

Apparently the Senate has gotten away with so much of late that it thinks that nobody will call it to account, no matter how coarse its work.

—

[Editorial, New York Sun (Republican), July 12, 1922.]

A BIG WHEAT CROP, BUT—

Farm crops promise on the whole better this year than the average of the last five years, according to the forecast of the Department of Agriculture. Corn is likely to be considerably less plentiful than last year, when many farmers could find no use for it excepting as fuel. Wheat will be a high average crop, 817,000,000 bushels.

In the fiscal year 1921 this country exported 293,267,637 bushels of wheat. In return for it foreign nations had to send us the equivalent in goods, gold, or credit. They use all three. Europe's gold reserves are already running low, the possibilities of selling on credit are limited, and Congress, with the aid of the farm bloc, seems determined to put up such a high tariff that the shipment of goods will be much more restricted.

A large wheat crop is invariably greeted as good news for the farmer and for the country. And so it is. But if the farm bloc puts through a tariff that will largely shut off imports, how is the farmer to sell his surplus wheat? If he can not export it, domestic prices will fall and he may expect in consequence a smaller return on his sales for American consumption. The farmer will find that his excessive tariff will be a boomerang, for what is the use of a big crop if you can not sell it?

[Editorial, New York Tribune (Republican), July 21, 1922.]

LOCKING UP AMERICA.

Wherein Senator GOODING, of Idaho, is superior to some of his colleagues is in his frankness. He does not beat about the bush. When he has a conviction he blurts it out. His may not be an opinion anyone else entertains, but that makes no difference to the Senator. He dares to be Daniel and stand alone.

So, as the nub and king-pin of a speech which it took him 2 hours and 24 minutes to deliver, in which he discussed the cod-liver oil industry with great thoroughness, with side trips to cuckoo clocks, monkey-faced dolls, dog muzzles, and other points of interest, he declared if he had his way he would build a tariff wall so high "that there would be an embargo against every foreign-made article that can be manufactured in this country."

He would make the aforesaid wall proof against the jimmies of wicked importers. Tropical fruits can be raised in this country by steam heat. Shipments of them here should at once be stopped. He would lock up America and throw the key into the deepest ocean. Embargo is his favorite word.

Here is a declaration calculated to make Daniel Webster, Henry Clay, James G. Blaine, William McKinley, and others rated as good protectionists uneasy in their coffins. But these were weak in the faith. It has remained for this generation to produce a true-blue champion of advanced truth.

—

[Editorial, New York Herald (Republican), July 22, 1922.]

LET THE TARIFF WAIT.

When the Senate revolt against the Fordney-McCumber tariff monstrosity starts with two or three independent members of the majority party in control; when next it picks up several more members who always are of the organization, but seldom hidebound and never stone blind; when later it gathers in still other members who recognize political danger as it begins to crash over their heads; when finally it sweeps along even some of the machine's most cherished hard-boiled tariff standpatters, as in the case of the overthrow of certain outrageous glove schedules—when the Senate tariff revolt becomes a mountain slide, carrying away everything, it is pretty nearly time for even the Fordneys and the McCumbers to wake up.

The majority control of the United States Senate, the very machine in charge of the tariff, now recognizes that the measure is not right, can not be accepted by the American people, and is sure to become a high political explosive.

The Congress machine also must realize that in the brief time left between now and the national campaign for all the seats in the House of Representatives and many of the seats in the Senate, this tariff measure can not be made right and can not be made safe.

Let the tariff wait until after the November elections.

—

[Editorial in St. Louis Globe-Democrat (Republican), July 18, 1922.]

* * * * * * *

The bill is fundamentally wrong—would have been wrong if enacted a decade or more ago, and, in view of vast changes in world trade and finance, is little less than a landmark of political fatuity now. It can be defended neither in the countingroom nor on the stump. Economically, it is unsound as a whole and unsound in its parts. Politically it is—but how can its possibilities of political disaster be described in terms which deaf leaders will heed and understand? * * *

What does this hopeful revolt mean? It shows that the views of a large part of the press which has been criticized as unfairly attacking the bill are shared by peculiarly representative party leaders. But what does it mean in the recasting and permanent improvement of the entire bill? That weighty tariff decisions should have been postponed until strike problems and distinctively legislative problems have created a veritable jam in Congress is perfectly inexcusable, but it will be better to pass no bill at all than to pass one that is not right.

—

[Editorial, New York Journal of Commerce (protectionist paper of commerce), July 15, 1922.]

TARIFF DISAFFECTION.

Signs are multiplying that tariff excesses have begun to turn the stomach even of ardent protectionists in Congress. * * *

The plain truth is they have seen the handwriting upon the wall. * * * They naturally are becoming increasingly worried as Congress goes serenely about the task of enacting this monstrous bill into law. * * *

* * * There is but one thing to do and that should have been done long ago. The bill ought to be thoroughly overhauled from one end to the other. A major operation is absolutely essential; no minor changes here and there can possibly suffice. A new tariff program based upon entirely different conceptions is the only way out for the party in power.

—

[Editorial, New York Tribune (Republican), July 17, 1922.]

MR. DOLLIVER'S MANTLE.

The defeat of the dye-embargo provision of the McCumber bill and the rejection of many other Finance Committee amendments show that a Republican group is forming in the Senate ready to take up the work which was done under Senator Dolliver's leadership in 1909. This group aims at moderating the excessive rates in various parts of the McCumber measure, notably in the cotton and woolen schedules. It is opposed, as Senator Dolliver's following was, to a perversion of the principle of protection, substituting for an equalization of foreign and domestic production costs in the interest of the public as a whole the theory of a practical absorption of the market by home producers without regard to the economic disadvantage of such an absorption.

Mr. Dolliver received his training as a protectionist under McKinley and Dingley. He was one of the framers of the Dingley tariff bill. He realized, as McKinley did, that the economic conditions of the first decade of the new century were different from those of the last decade of the last century. When the Payne tariff revision of 1909 was undertaken he favored a liberalization of the schedules, as did President Taft and the more progressive elements in the Republican Party. Senator Aldrich did not concur in this view. He accepted the theory which has now been carried to extremes by Mr. FORDNEY and Mr. MCCUMBER. He made the Payne-Aldrich bill a stiffer measure of protection than the country needed or wanted.

Mr. Dolliver took up the fight in the Senate against the high Aldrich rates. But the power of the Senate leader was too far-reaching. Mr. Aldrich had few equals as a political organizer. He held the Senate in the hollow of his hand and repulsed the Dolliver offensive.

There is no leader like Aldrich to-day. The Senate has lost confidence in Mr. McCUMBER'S mastery of the theory of tariff adjustments. The Republican majority is crumbling in its support of his bill because it feels that that measure is not only politically inopportune but loosely and faultily constructed. Senator Aldrich, with all his skill and experience, turned out a bill which the country would not accept and which helped to drive the Republican Party from power. The McCumber bill would also be a serious handicap in the coming congressional elections. There is no political or economic excuse for passing it now. But if it is to be considered and brought to a position in which it can be passed at some other session, it is wise to submit it to searching criticism and to prune it of many excesses and aberrations.

This is what the Republican group headed by Mr. LENROOT is working for under more favorable circumstances than those of Mr. Dolliver's day. It deserves success, for it is doing the Republican Party and the country a notable service.

—

[Editorial, New York Journal of Commerce (protectionist newspaper), July 12, 1922.]

RICE AS AN EXAMPLE.

In rejecting the committee's rates of duty on rice and adopting those set by the House, the Senate has yielded to pressure from three or four rice-growing States. This action of the upper Chamber is unfortunately in line with much that it has been doing in the past week or two. Facts are all too likely to be lost sight of in spirited and selfish controversies of this sort. It is well therefore to remind ourselves once more of the true inwardness of this situation.

As for rice, in 1914 we raised some 650,000,000 pounds and exported about 18,000,000 pounds, drawing 125,000,000 pounds from abroad, chiefly the Orient. During the half a decade of low duties immediately following that date a remarkable change took place. In 1920 we produced nearly 1,500,000,000 pounds of rice and exported about 400,000,000 pounds. Our imports amounted only to about 50,000,000 pounds. In short, our production more than doubled; our exports were multiplied by more than 20, while our imports were more than cut in half. Nor has the emergency tariff of 1921 had any appreciable effect upon this situation. Production was off a little in 1921, but for obvious reasons that can hardly be attributed to tariff action. Exports in that year reached the 600,000,000 mark, while imports continued to decline at about the same rate that they had been doing during the years of the Underwood Act.

As to prices, there was a sharp decline in the fall of 1920, and it continued through several months of 1921. True, they began to stiffen somewhat at about the time that the emergency tariff act took effect, but so did the London, Burma, and Siam quotations. What benefit under these circumstances can the rice farmers expect from rates such as those now proposed? These House duties are measurably about the emergency act rates. But, even so, assuming competitive conditions, what good can come of any tariff on an article which is produced in this country 25 per cent or more in excess of our consumptive capacity? Our imports are now only one-tenth of those of 1914, and less than 3 per cent of our exports. It was charged on the floor of the Senate that domestic growers are so strongly organized that they are able to control prices. If they are in a position to fasten monopoly prices upon the consumer, the tariff that makes such a situation possible is obviously a most reprehensible measure; if not, then such a law would be simply a "sop" to win credulous votes.

—

[Editorial, New York Herald (Republican), July 21, 1922.]

REACTIONARY MACHINE UPSETS.

What better proof than the continuing record of the contests at the primaries does the machine control of Congress need to convince itself that its reactionary, selfish, stubborn, defiant legislative course is alienating the American people? Or must it go on in blindness to the last deadly stroke?

In Pennsylvania the reactionary machine was against Pinchot for governor, and the Republican voters upset the machine.

In Indiana the machine was against Beveridge for the nomination to the Senate, and Beveridge, going to the voters of his party, won.

In Iowa the machine was against Brookhart, and Brookhart came through with flying colors.

In North Dakota the machine bent all its energies to renominate Senator McCUMBER—McCUMBER, author of the bonus raid on the National Treasury and of the tariff monstrosity—and McCUMBER went down to defeat.

In Nebraska the machine has been against Howell for the Senate nomination, and now Howell gets it with ease.

If the machine control of Congress can not yet realize that it is becoming well nigh fatal for any candidate for elective office to have its support the candidates are beginning to realize that such support is an all but insurmountable handicap. From the record at the primaries thus far in every State where the people are aroused to the issues of the day and to the utter incapacity of the extravagant tariff makers and reckless bonus raiders to grasp those issues it becomes evident to all eyes with the power to see that the candidate who enters the average primaries with the machine indorsement leaves hope behind.

How, then, can the candidates doubt, how can the machine itself doubt, what is liable to be in store for those of them that survive the primaries when they get to the November polls where the voters of all parties can take a crack at them?

There could be no surprise in the Nebraska primaries after Indiana in the Middle West, Pennsylvania in the East, Iowa in the West, and North Dakota in the Northwest. And if the reactionary machine control of Congress does not come to its senses both in the matter of the bonus measure, which threatens a colossal raid on the Treasury, and in the matter of the irrational tariff schedules that threaten another colossal raid on the consuming public, a Democratic sweep of Members of the House of Representatives might surprise nobody in the whole United States except the same blind reactionary machine.

—

[Editorial from the New York Journal of Commerce (independent protectionist trade paper), July 14, 1922.]

Congress has degenerated into a national grab bag into which any bloc or self-seeking interest is free to thrust its hands and pull out the particular privilege that it wants. Of legislation honestly and broadly planned for the welfare of the country at large there is little if any.

The tariff, in spite of the slight modifications now being pretentiously made in the Senate, will be much higher than its predecessor, the beneficiaries being a bloc of interests intent only on their own exclusive financial advantages. * * * The subsidy bill awards gifts to a few concerns solely for the purpose of insuring risks which they themselves are unwilling to undertake. An overtaxed and overpatient public will be called upon to pay all these in additional taxes.

* * * * * * *

Apparently statesmanship from one cause or another has gone into bankruptcy, and our whole legislative machinery is being perverted from making laws for the Nation to making laws for whatever classes prove to be the most insistent beggars. To the disinterested and thoughtful citizen this drift from national to class legislation is fraught with danger to the Republic. Before long our State and municipal legislatures will be caught in the same drift, and the whole country threatened by a welter of corruptive class legislation, the consequences of which are easy to foresee.

* * * Coming elections will prove whether the public is alive to this menace or not. It probably is, and if so there will be some wiser if not better men next November.

—

[From the New York Evening Post (Republican), June 13, 1922.]

The machinations of the farm bloc and the ineptitude of the congressional leaders have resulted in the imposition of a bread tax of $3 a year on every American family. This tax on consumption, like all others of its kind, falls most heavily on those who are least able to pay.

—

[London correspondence of Philadelphia Public Ledger (Republican), July 2, 1922.]

BRITISH RETALIATION IMPENDING.

(Copyright, 1922, by Philadelphia Public Ledger.)

LONDON, July 2.—The erection of a tariff wall on the part of England—and through cooperation with the dominions extended around the empire—of such proportions as to form much more than a stumblingblock in the path of American export trade is in the making, and probably the height of such a barrier will be determined in the next week or two when Parliament takes final action upon section 2 of the safeguarding industry act.

That the United States Government contemplates the situation with some anxiety is shown by the fact that the state of mind among English business men on the legislation has been made the subject of an investigation and report through diplomatic channels. This report declares that whatever action may be taken here will bear a close relation to what English business considers the threat of the new American tariff and will be virtually a policy of retaliation.

—

[Editorial, New York Herald (Republican), July 14, 1922.]

LET THE TARIFF WAIT.

In recent days the United States Senate has been carving slices out of the grossly overweight McCumber tariff duties; for example, in the cotton-goods schedules. That is a good thing. But a better thing and a safer thing would be to take plenty of time to go over all the extravagantly high tariff rates and cut them down to the measurement of reason and sense, every one of them. This could not be done in a wild rush.

In the few weeks that are left between now and the elections it would be a terrific job to undo all the mischief the McCumber tariff makers were able to do up to the hour they began to see the handwriting on the wall, long after everybody else had seen it, read it, and understood it. * * *

—

[Editorial, New York Evening Post (Republican), July 12, 1922.]

MORE HARD WORDS FOR THE TARIFF.

Whole-hearted supporters of the tariff bill must shiver inwardly as they see a Republican Senator rise to discuss the Fordney-McCumber measure. Instead of praising it to the skies, about which there would be a certain astronomical appropriateness, he is as likely as not to explain how hard it is going to be for him to vote in favor of it. Senator EDGE is the latest to join this growing group of critics, and in the very calmness of his attack lies its deadliness. If he had only got excited, those for whom no tariff is impossible might have found comfort in the hope that in a cooler moment he would reconsider. But Senator EDGE was not excited. He was as calm as a veteran executioner. He did not assail the bill for the monstrosity it is, but contented himself with the cautious remark: "The passage of this hard and fast tariff bill without opportunity for certain elasticity of rates might prove a national calamity." To admit that under some circumstances a measure might prove a national calamity must strike tariff Senators as a most unhappy way of advancing its fortunes. * * *

The tariff bill has been on the defensive before the country from the first day. It is rapidly being put on the defensive before the Republican Party. No wonder that its friends are urging a rule to stop debate upon it.

—

[Editorial, New York Tribune (Republican), July 9, 1922.]

THE CLOTURE FARCE.

Senator WATSON'S claim that the McCumber bill has been held up by partisan obstruction is without merit. Everybody knows that action on the bill has been retarded by the Republican managers, who took almost a year to make up their minds what to do with the Fordney measure sent over from the House. The Fordney bill passed on July 21, 1921. On July 7, 1922, the Republican Senators put in a boisterous plea that too much time has been lost bringing it to a vote in the Senate. Political Joe Millering could go no further. * * *

Mr. McCUMBER is no Nelson W. Aldrich. He doesn't know exactly what he wants. He is a little afraid of his own work. Imagine Mr. Aldrich getting up in the Senate and saying, in effect: "The rates in my bill are susceptible of abuse. Please, gentlemen who are to benefit by them, don't abuse them. As a favor to me go easy and spare the American consumer as far as you can."

The country distrusts a bill thus advertised by its sponsor. It has no confidence in Mr. McCUMBER'S workmanship. It would feel outraged to see his revision rushed heedlessly through the Senate, as Mr. FORDNEY'S was rushed through the House. The Senate has spent a year on a half-baked, makeshift bill. The present revision is not ripe and the times are not ripe for it. What is needed in its case is not cloture, but intensive reconsideration for at least another year.

[Editorial, New York Journal of Commerce (protectionist commercial journal).]

EXPORT TRADE.

Congress is giving little indication of appreciation of our export trade. So far as it is thought of at all, it is thought of as the shipment of grain and pork and cotton to Europe, with the assumption that Europe has got to have these, anyway, and it does not matter what Congress does. * * *

All nations depend largely on customs dues for their revenues, and the imposition of duties that may plausibly be designed to raise a revenue would not encounter criticism anywhere. But Congress is now establishing much higher duties than we ever had before and doing it for the avowed purpose of excluding foreign goods. Is it strange and improper that Canada should raise its duties on some of our products, or that Great Britain should contemplate using its disguised protective system against us?

Ultraprotectionist as he was when chairman of the Ways and Means Committee, William McKinley, as President, took a world-wide view of commerce and insisted repeatedly that we can not sell unless we will also buy.

—

[Editorial, New York Tribune (Republican), June 24, 1922.]

TARIFF REVISION FALLACIES.

The Fordney and McCumber tariff bills were framed with little regard to economic tendencies. They ignore the vast alteration brought about by the war in America's economic relations, to the rest of the world. * * *

We have plenty of time ahead in which to construct a rational, fairly scientific tariff. The leaders in Congress are not in a frame of mind to do anything of that sort now.

—

[Editorial, New York Tribune (Republican).]

HAVE A CARE, GENTLEMEN!

Senator LENROOT'S vehement protest against a particular McCumber duty will strengthen the suspicion with which so many Republicans view the pending tariff bill. * * *

The authors of the Fordney and McCumber bills have apparently been parceling out protection for the benefit of individual producers and groups of producers rather than with proper regard for the ultimate effects of those duties on the country as an economic whole. Few people except those in the secrets of the committee rooms know exactly what the present bill accomplishes. It is being rushed through. The debate on it has been perfunctory and largely of a smoke-screen character. The voters look askance at a permanent revision which they have not demanded and do not understand.

There is no reason for passing a complicated, highly technical, and confessedly faulty tariff bill at this session. * * *

It would be political folly for the Republican Party to pass a tariff bill before the fall elections. Mr. LENROOT knows this. He also knows that a far better tariff can be constructed later. It would be well for the Republican leaders to listen to him and not to Messrs, FORDNEY and MCCUMBER, who are about to retire to private life.

The message that goes to Washington from the country is direct and brief. It is, "Have a care, gentlemen! Mind your step!"

—

[Editorial, the Chicago Tribune (Republican), July 10, 1922.]

THE TARIFF BURDEN.

* * * The proposed tariff bill as it now stands is about the most unpopular piece of legislation yet devised.

Individuals no doubt approve it. California almond growers are pleased with it. The Aluminum Co. of America is pleased with it. Certain fertilizer manufacturers are pleased with it. Glove manufacturers are pleased with it, and so on. But each individual or group which is pleased with one item is opposed to the thousands of other items which the bill contains, and the mass of consumers who will be called upon to pay the high prices which the bill promises will be opposed to it in general.

Altogether it is distinctly unpopular. That might not be sufficient reason for rejecting it if there were any assurance that it would bring sufficient prosperity to the country as a whole to make up for the costs which it will impose. But there is no such assurance, except the verbal assurance of its sponsors. The general unpopularity of the bill will impose a heavier burden upon the Republican Party at the next national elections than any other thing on the record. This rather than impassioned oratory should influence the Senate in its consideration of the measure.

—

[Editorial in Chicago Daily News (Independent Republican), June 14, 1922.]

* * * * * * *

But the pending bill is full of jokers, excessive rates of duty, deals, and bargains in the interest of monopoly. That is the reason why it would increase prices. It is being denounced even by stanch protectionist papers, that call it a bill to empty Congress of Republicans. It is a dangerous bill politically, because it is unsound and vicious economically.

—

[Editorial in New York Evening Post (Republican), June 22, 1922.]

* * * * * * *

Are we then committed to the processes of tariff framing that have made the present bill as suspect as the Payne-Aldrich measure of unhappy memory? By no means. It may be impossible to draw an exact line between a reasonable duty and an unreasonable duty, but it is quite possible to avoid duties that are manifestly absurd. A tariff that is framed upon the principle of letting the producer write the schedules in which he is interested is one kind of unscientific tariff that can be stopped if we are determined to stop it. There is no need of trying for a perfectly scientific tariff or for taking the tariff out of politics. Defeat of a Congress that unloads a measure like the Fordney-McCumber bill upon the country will do more for proper tariff making than all other methods combined.

—

[Editorial, New York Journal of Commerce (protectionist paper of commerce), May 16, 1922.]

* * * The fact is that the adoption of the present tariff would be a severe blow to any party that sponsored it and that generalization will hold of this year as of every other.

* * * It should be remembered that the tariff has been under continuous discussion ever since the Harding administration came into office, a first installment having been supplied in the objectionable emergency tariff of a year ago. This measure has been almost disastrous in some lines, and it has wholly failed to help those for whose benefit it was intended. The present tariff has been widely advertised and is now generally considered likely to be fatal to other lines of business and industry. This is known to the commercial public at large, while the average man has already learned from the tendency of prices that he may expect a substantial advance on all commodities of common consumption if the new rates take effect. * * *

* * * It was suggested some time ago by protectionists who foresaw the harm of this tariff that the best thing to do would be simply to reenact the Payne-Aldrich tariff bill. That would at least have been consistent. The rates of the tariff of 1909, while high and while riddled with jokers, did not compare in severity with some of those in the present schedules, while the technical work done in preparing the measure was infinitely ahead of that now presented in the Fordney-McCumber tariff. Probably any such expedient is now out of the question. * * *

—

[Editorial from the Philadelphia Public Ledger (Republican), June 8, 1922.]

* * * * * * *

The big vote of two years ago that brought Harding to the White House was not a vote of approval for the Republican "organization" and the men now in control of it. Some of these men are just awaking to the meaning of that expression of public opinion. The Iowa primary should further open their eyes.

The present Iowa idea seems to be that men with a sense of guidance and direction should be put in authority; that new times need new ideas and not the political theories and practices that were found too reactionary so long ago as 1910, when the Progressive revolt began in the Republican Party. The one thing that can be ventured about these primary results in Iowa, Pennsylvania, and Indiana is that they are a questing for new leadership. They betray a restiveness and discontent with present management. It is clearly not a radical movement, but the public mind was never less in sympathy with the type of mind that framed the pending tariff bill, the reactionary mind closed to new ideas and new conditions, than it is now.

—

[Editorial, New York Journal of Commerce, Protectionist Paper of Commerce, May 22, 1922.]

TARIFF REVOLT.

* * * There is a wave of protest against the tariff that is now sweeping widely and deeply over the country as a whole. It is due to general dissatisfaction with the continued high cost of living, the manifest fact that the tariff will lessen our export trade and curtail the field of employment, and the general circumstance that the rates are in the interest of monopoly and favoritism.

Thus far there is no sufficient indication of revulsion of feeling on the part of enough Senators to make it seem probable that the "revolt" will do much more than delay matters. There is need for some energetic action on the part of the business and industrial community if the disastrous legislation now in prospect is to be checked.

—

[Editorial, the Philadelphia North American (Republican), June 30, 1922.]

* * * * * * *

As an example of what an unintelligent partisanship can produce in the way of tariff argument, consider this from the National Republican, a party organ published in Washington:

"We have had during the last nine years the lowest tariff in American history, enacted on the pledge that it would smash monopolies, stop profiteering, and end the high cost of living. Yet under it we have had the highest prices, the most profiteering, and the most outrageous exploitation by monopoly in our national history. In the face of this record the foes of protection have the unadulterated gall to shriek against the restoration of the protective policy on the ground that it will create the very evils the present low tariff has developed."

While we hold no brief for the Underwood Tariff Act, we consider it utter nonsense to charge to it conditions produced by the war—a trifling episode which the writer ignores, but which, in fact, made the Underwood tariff inoperative during the period of high prices and profiteering.

Another example was a "tariff show" staged before Republican women by Senator CALDER, of New York. As evidence that "a higher tariff does not mean higher prices," he exhibited amber beads sold by a German manufacturer for 62 cents and retailed in New York for $12.50, a German clock produced at $2.40 and marketed here at $68, a 10-cent beaded bag priced at $15, and an impressive array of like articles. Senator MCCUMBER, of North Dakota, exploited similar figures in a speech. The dishonesty of such representations is palpable, for they conceal the fact that the depreciation of the German mark makes the cost figures wholly deceptive.

But what the infatuated advocates of excessive protection do not perceive is that their line of argument is fatal to their own case. If they succeed in making the public believe their false allegations of "2,000 per cent profit on imported goods," it won't be long before there will be a demand that the extortion be ended by abolition of the tariff and the admittance of these fabulously cheap goods which consumers want.

* * * * * * *

—

[Editorial of New York Journal of Commerce (protectionist paper of commerce), July 17, 1922.]

TARIFF SCANDAL NO. 1.

An excellent illustration of the sort of "protection" provided by the tariff now being hatched in Washington is afforded by the duties on aluminum and aluminum ware. The Underwood Act places a levy of 2 cents per pound on imports of ingots, 3½ cents per pound on sheets, and 25 per cent ad valorem on aluminum household articles. The Senate now proposes 5 cents and 9 cents per pound, respectively, upon the first two and 15 cents per pound plus 60 per cent ad valorem upon the third.

Here are the facts which afford the basis for these increases. We ourselves, as far back as 1913, produced more than twice as much aluminum as any other country in the world; in fact, well over a third of the world's output. Ever since 1914 we have been producing

more than half of the world's supply. In 1920 we produced 90,000 metric tons of the metal out of a world total of less than 150,000 tons. Switzerland, our nearest competitor, produced 12,000 tons.

At the outbreak of the war we were importing about $4,500,000 worth of aluminum and articles made of the metal and exporting more than $1,000,000 worth. During the war we became heavy net exporters. Prices more than doubled and the one important producer reaped enormous profits. Now that Europe is once more a factor in the market prices to the consumer have taken a tumble. The existing rate of duty does not cover the difference between the price at which aluminum can be purchased abroad and the price our monopolists here would like to charge. The result is Congress proposes to multiply the tax on the consumer by two or three.

The Aluminum Co. of America, the dominating factor in the domestic situation, quotes ingots at present at a little over 19 cents per pound, while the imported article can be had for around 18 cents, duty paid. If the tariff is raised to 5 cents per pound, our monopolists will be enabled not only to maintain their present prices but to tack on several more cents for the consumer to pay. So also with sheets, which are only ingots rolled out flat.

But the real scandal is to be found in the case of aluminum ware. The existing duty of 25 per cent is not enough, according to lobbyists, to keep out foreign goods. True enough, as long as our producers fail to get their costs and prices to reasonable levels. But even so, there is not the slightest doubt that our importations have been grossly exaggerated. In 1921 we imported only a little more than $2,000,000 worth of aluminum ware. Moreover, it is currently reported that our imports have been of such poor quality as to be almost unsalable.

But the pending measure would increase duties more than 200 per cent. There can be no question as to what is intended. Plans are being laid to exclude all foreign competition. In this case that would mean the elimination of all competition, for there is none within the United States. Should the bill be passed in its present form, the American people would be absolutely at the mercy of the one and virtually the only producing company of this country.

—

[From the Springfield Republican (independent Republican), June 23, 1922.]

If the wool schedule as now written in the Senate bill should be enacted into law, it ought to be worth at least 10 new congressional seats for the Democrats in New England alone. Rhode Island and eastern Massachusetts have been littered with textile strikes this spring on account of wage reductions. This tariff bill would raise the price of clothes for the mill operatives at the very time they were forced to accept lower pay, and the increase of prices due to the new tariff would be greatest on the suits which the workingmen must wear.

If enacted, this bill will become law while the congressional campaign is in progress. No such political opportunity through tariff legislation has come to the Democrats since the McKinley law went into effect not long before the elections of 1890 with disastrous results to the Republican Party.

—

[From the Ohio State Journal (Republican), June 20, 1922.]

Congress has been in session so long and its record of constructive accomplishment is so comparatively meager the leaders seem to feel that they must do something to base campaign claims on, even if the claims are ill grounded and will be proved so in a short time. The best thing to do when one finds oneself panic stricken is to stop and think. There is every reason to believe that the country would rather go along with the tariff law it has for a while than to invite the increased tax burden and the restricted markets promised by this one. As for the party standpoint, no Republican leader can truly complain hereafter of any lack of plain warnings of what the public reaction to the passage of the Fordney-McCumber bill is likely to be.

—

[Editorial, Magazine of Wall Street (protectionist), July 8, 1922.]

THE TARIFF IN DIFFICULTIES.

Debate in Congress during the past week or two has demonstrated once more the difficulties under which the tariff is laboring. There can be no doubt that the public is out of sympathy with any such measure as is now pending. The more it is studied the less satisfactory it appears, and this dissatisfaction prevails not only among the consumers of the country but also among those who are supposed to be beneficiaries of the measure. Manufacturers are now convinced that they must inevitably suffer from the legislation both in their foreign and domestic trade and that not only in the export trade but also at home they will be certain to lose their markets, owing to the much greater expenses of production and consequently higher prices which they must establish.

In fact, with the provisions of the tariff as they now stand, involving as they do a very high average rate on raw materials, the manufacturer will unavoidably be compelled to put his prices up to a materially higher level. The various interests in the Senate realize this fact clearly enough, and a great deal of the discussion in that body is naturally devoted to an effort to show that the criticism on the rates is inspired by biased or interested persons. Thus there is nothing whatever to indicate—the only interests which are opposing the tariff apparently being those who are regarded as its chief beneficiaries.

—

[From New York Herald (Republican).]

G. O. P. HAS LOST CONTACT WITH BUSINESS.

[Louis Seibold, national political correspondent, New York Herald (Republican).]

The demand in favor of discarding the obsolete and unsatisfactory methods for building a tariff on a political foundation merely to vindicate the archaic doctrines of the party has been repeatedly brought to light in the tariff discussions. One thing appears to be absolutely certain. The Republican Party has lost sympathetic contact with the business interests of the country.

The demand for the disproportionate and haphazard scheme proposed by Mr. MCCUMBER comes from himself and other Senators who expect to reap desirable political benefits and not from the business interests of the country.

—

EXCERPTS FROM NEWSPAPER EDITORIALS.

[From the Chicago Daily Tribune (Republican).]

We can guarantee one thing for the new tariff bill just reported by the Senate Finance Committee. Somewhere in its maze of barbed-wire entanglements each intelligent business man, producer, and consumer who attempts to negotiate it will meet a shock. It is one of the longest, most detailed, and most complex tariff bills ever presented to Congress.

On the whole it is a very high protective tariff. It bears every evidence of having been built according to the ancient methods of allowing or soliciting every special interest in the country to appear before the committee, argue for a high rate of duty to protect its own special commodity, and obtain such a rate regardless of its effect upon the economic organization of the country as a whole.

—

[From the St. Louis Daily Globe-Democrat (Republican).]

Its protective sufficiency is not to be doubted, but examination of the schedules fails to reveal any assurance that it will permit "fair competition from other countries." We are in sympathy with the principle of protection where protection is needed, but this bill seems to have applied the principle to everything without regard to specific needs, without regard to present world conditions, and without regard to our altered position in relation to the world's trade.

—

[From the New York Herald (Republican).]

It will give the American consumer a heavy jolt to see how the Senate tariff makers propose to tax his food, as if it were not already costly enough to eat in this country, compared with pre-war prices.

—

[From the New York Herald (Republican).]

But its worst feature is that it completely shuts America out of foreign markets except in our raw materials, notably cotton and copper.

—

[From the New York Tribune (Republican).]

"It is something of a shock to learn, if the analysis of the Associated Press is accurate, that the rates of the bill are, on the whole, higher than those of the Payne-Aldrich law," remarks this stanchly Republican paper.

—

[From the Ohio State Journal, of Columbus (Republican).]

Our agricultural and manufacturing interests need as never before a wide, free foreign market.

—

[From the Business Farmer, of Michigan.]

Of what benefit to the farmer is a 25 per cent duty on a world grain like wheat, of which we produce a large surplus, when he must turn right around and pay a 40 to 80 per cent duty on the majority of things he buys? The duty on sugar is an affront to every American consumer. Michigan is an important sugar-beet-growing State, but only 10,000 of her 200,000 farmers grow beets. But three and a half million Michigan people are asked to add several million dollars to their sugar bill for the direct benefit of a few hundred sugar-mill stockholders and the very small indirect benefit of the handful of beet growers.

—

[From the Southland Farmer, of Houston, Tex.]

Written into law this tariff will bring the farming regions of the West and South under still greater bondage to the industrial sections of the East and North. The emergency tariff showed the fallacy of any tariff helping prices for farm products to any extent worth considering. This tariff will add nothing worth while to returns for the farmer, but will add hundreds of millions to the cost of what he must buy.

The bill is one written by special interests for such interests, with little regard to the plain people of the country, and it takes no prophet to foretell what its enactment will cost the Republican Party responsible for it.

—

[From the St. Paul Dispatch (Independent).]

Ridiculing the idea that it can "work the miracle of protecting industry and agriculture alike—a patent impossibility unless the fundamental laws of economics are repealed at the same time." "What of the great unregarded masses of consumers?"

—

[From the New York Evening Post (Independent Republican).]

It will make trouble for the consumer.

—

[From the New York Globe (Independent Republican).]

If we pass the McCumber tariff, or even the Fordney version of it, "we practically make Europe a present of $11,000,000,000 she owes us." For "she can't pay in gold, and we wouldn't let her if she could, for it would be ruinous to us to receive it. She can only pay in goods, and against those goods we now propose to erect impossible tariff barriers."

—

[From the Kansas City Star (Independent Republican).]

This bill is a serious economic mistake, the immediate effect of which will be to increase the cost of living. The farmer will find that the protection offered his products "is an illusion," while "the protection on what he has to buy will be real."

—

[From the Springfield Republican.]

The measure is open to severe attack by those who believe that the price of commodities should not be raised.

—

[From the Chicago Daily News.]

The Senate should modify it with a liberal hand in obedience to the logic of the world situation and of the just claims of the American consuming public.

—

[From the Indianapolis News (Independent).]

The bill represents an outrageous abuse of the taxing power.

—

[From the St. Louis Globe Democrat (Republican).]

The bill as it stands fixes very high rates on all articles that are customarily dutiable, and makes dutiable many that have heretofore been admitted free. There is in the schedules little evidence of any discriminating consideration of trade conditions as they relate to the

national welfare. The Finance Committee of the Senate, like the Ways and Means Committee of the House, seems to have adopted the easy way of acceding to all class or trade demands, and increased everything on the "horizontal" principle.

—

[From the Journal of Commerce and Commercial Bulletin (Independent).]

The public should be fully informed of the true character of the schemes that are hatching for the effective looting of its pocketbook.

—

[From the St. Louis Daily Globe Democrat (Republican).]

It will appear that the Senate committee has practically ignored the changed conditions, and has legislated upon the basis of the conditions of 20 years ago.

—

[Editorial from the Philadelphia Public Ledger (Republican), May 29, 1922.]

* * * Privately, any number of Senators will say they are afraid of the bill: they are afraid it will prove hurtful in the election; yet there is no move to abandon it. These same Senators readily will concede that the duties are being fixed and based on no recognized principle; that it is impossible to determine with any accuracy the difference in the cost of production at home and abroad. They will concede that the bill is inopportune politically and economically, and that it will cost the consumers a great sum of money in increased prices; how much no one can say. They are equally frank in hoping that the country will not find out before the November election, but they know what a handicap and burden it will be in the 1924 presidential election.

In the face of this they plod along in the spirit of condemned creatures doing penance. It passes understanding. The only interests for the bill are those which will be benefited directly by the high rates. There may have been some excuse in the beginning for the bonus as a bait for votes, but to this juncture not even the faintest proof can be cited that high tariff rates and an increased cost of living will do the country any good or appeal to an electorate whose one present desire is to get out of the deep hole of hard times into which it was thrust last year.

—

[From the New York Globe (Republican), June 23, 1922.]

There is no decent defense for the flax schedule, yet it has the merit, which some of the other schedules lack, of being an old iniquity rather than a new one. The truth is that a hand plunged at random into the Fordney-McCumber grab bag is almost certain to bring up something incredibly naive or incredibly dishonest. This isn't protection: it is a proposal to collect by force from the consumer in order to distribute largess to a few favored friends of the administration.

—

[From the New York Globe (Republican), June 26, 1922.]

The agricultural tariff is a bribe in return for which the farmers are expected to support the regular Republican nominees, and as a result of which it is hoped they will be diverted from any fundamental reform movement. The pity is that such honest and able men as Senator LADD, of North Dakota, do not realize how they are being buncoed.

—

[From the Brooklyn Eagle (Independent), June 26, 1922.]

Why go the full length of putting this monstrous tariff on the books merely to prove what everyone already knows. With the President and leading members of his own party fast losing faith in this purely party measure, why keep it to the fore to the exclusion of other legislation so badly needed? There is no demand for the new tariff except from interests that hope to profit inordinately from it. Why not let it stand as a horrible example while a really constructive tariff is being written by men who are not interested primarily in pleasing a few special interests?

—

[From the Chicago News (Independent), June 14, 1922.]

There is significance in the implied admission that the pending tariff bill will increase prices all along the line and arouse widespread dissatisfaction and resentment. If the bill were sound, no such effects would follow. Besides, what necessity is there for protective duties so high as to advance commodity prices that in many instances are still inflated?

A defensible tariff, based on ascertained differences in production costs, would have no such effect. It would not threaten defeat for the party in power. But the pending bill is full of jokers, excessive rates of duty, deals, and bargains in the interest of monopoly. That is the reason why it would increase prices. It is being denounced even by stanch protectionist papers that call it a bill to empty Congress of Republicans. It is a dangerous bill politically because it is unsound and vicious economically.

—

[Editorial from the New York Journal of Commerce (protectionist paper of commerce), June 10, 1922.]

* * * * * * *

This bill ought to be sent back to the Finance Committee with orders to reconstruct it. Study of its terms has shown its dangers. It has also shown the difficulty of revision on the floor. The inefficient patchwork of the Finance Committee is a tribute to cowardice and opportunism, not an evidence of change of heart. Only by general revision from the bottom up will any tolerable or workable measure be obtained. It would be far better to do what President Harding was asked to favor—repass the Payne-Aldrich bill—than to go on with the measure which has resulted from the blundering and the political bargaining of the dwarfish epigoni who have found the shoes of the old Senate oligarchy too large for them.

—

[From the New York Tribune (Republican), June 21, 1922.]

The tariff bill is undigested and unscientific. It is framed on ancient methods and shot through with misconceptions. It ignores the vast changes which the war brought about in our economic relations with the rest of the world. The time is not ripe for national tariff revision. And few will accuse the McCumber bill of being tainted with rationality.

To speculate further along these lines is to invite economic injury and political disaster.

[From the Indianapolis News (Independent), June 26, 1922.]

What the plain people, who do not buy 94-cent cuckoo clocks for $22, would like to know is how one of those 1,000 per cent tariff imposts which are mentioned every now and again in the tariff debate is going to bring the price down to a figure that would make them feel that they were getting their money's worth in case they were so foolish as to buy a German cuckoo clock. Furthermore, they want to know how those profiteering dealers managed to get away with that two thousand and odd per cent when there were American clocks on the market just as good, and probably better, that were selling at much lower prices. The tariff opponents are asking such questions as these and others equally embarrassing in the Senate, and are not receiving answers that make the situation any clearer to the electorate.

—

[From the New York Herald (Republican), June 24, 1922.]

In the United States to-day there are Republicans and protectionists by the hundreds of thousands who are asking one another whether the party leaders in Congress have gone crazy over the tariff. There are Republicans and protectionists by the tens of thousands who believe that the Fordney-McCumber tariff bill will destroy their party. This is becoming a national sentiment which is immeasurable in its political possibilities.

—

[Editorial, New York Journal of Commerce (protectionist paper of commerce), July 8, 1922.]

THAT TARIFF WITH CANADA.

To the fair-minded observer building a high tariff wall against Canada is harmful and stupid. Next to Great Britain, Canada is our best customer. During the 11 months ended May 31 our exports to Canada were $497,000,000, and to the United Kingdom $768,000,000. In the same period our imports were $277,000,000 from Canada and $243,000,000 from the United Kingdom. What inconceivable folly to injure our best customers! Why should a political border be turned into an economic wall, which, if high enough and drastic enough, would require a line of forts and gunboats to protect it? Both countries produce what the other needs, and free exchange is of mutual advantage.

Both countries in their economic, industrial, and social activities have much in common and would prosper more in a policy that promoted untrammeled intercourse rather than in one that restricted or destroyed advantageous commerce. How long will 105,000,000 Americans submit to being penalized for the questionable benefit of a mere handful of people near the boarder? Our proposed tariff against Canada represents the unreasonable selfishness of a small minority that should not be allowed to dominate the great majority. A high tariff wall between the United States and Canada is just as ridiculous as would be a tariff line drawn between New York and San Francisco, or a tariff against Dakota wheat for benefit of the Illinois farmers. The lower the barriers between the United States and Canada the better for both sides.

—

[From Kansas City Star (Independent Republican), June 1, 1922.]

Contemplating the process from the outside—and most everybody contemplates it in that way, if at all—it looks like a strange way to make a tariff law. The subject is economic and technical; the Senate is uneconomic and political.

But Senator LODGE'S declaration that the coming tariff will be a Republican tariff is sufficient warning, if one were needed, that the experts are going to have very little to do with it. And by experts we mean, of course, the Tariff Commission.

—

[From the New York Herald (Republican), June 28, 1922.]

Any tariff that is devised merely to take care of a domestic cost of production, regardless of whether it is too high or not, is simply a tariff not to protect home industries but to perpetuate high prices, wherever they happen to be up in the sky. Nobody can get away from that.

And a tariff that simply keeps up excessive prices at home, a tariff that jacks up the cost of living when the cost of living ought to come down, is absolutely contrary to and irreconciliable with the fundamental principles of the American tariff system itself. The people of the United States will never stand for such conditions. The export trade business of American industries can not survive them. The country will not thrive under them.

—

[Editorial, New York Journal of Commerce (protectionist paper of commerce), June 17, 1922.]

PUBLIC OPINION AND THE TARIFF.

The newspapers of the country are almost overwhelmingly opposed to the Fordney tariff bill. Even the hard-boiled Republican organs give it faint support, and not a few strongly advise moderation in order to avert party disaster. A single mail to this office brings the opinions below, which, though chance selections, are characteristic of the mass of editorial opinions.

The Providence Journal, an influential newspaper published in a protectionist stronghold, writes:

"The Fordney-McCumber tariff bill is at once a colossal piece of partisan tariff folly and an offense against the American people. The only question is to what an extent the splendid victory of 1920 is going to be diminished next November. Unless the present shameful program of the tariff makers is radically changed, there will be a sorry lot of Republican "statesmen" on the morning after the congressional elections."

The Indianapolis News calls it "profit for the few" in these words:

"The more the tariff bill is discussed the more it appears that it is a measure for the profit of the few rather than for the protection of the many. There is no longer any pretense that the effect will not be to raise prices, and raise them a great deal.

"Thus it is not surprising that there is a daily increasing antagonism to the proposed tariff not only among the people who, because of a lack of organization, can speak only at election, but among prominent Republicans who always have been protectionists, but who do not believe in protection run mad."

The Philadelphia Record comments thus:

"If the press is hostile to the Fordney-McCumber bill it is because the bill is hostile to the Nation, and whether all the people understand this or not, most of the newspapers do. Mr. MCCUMBER is simply trying to get money out of all the people for the enrichment of a few of them."

The Oklahoman, of Oklahoma, gives this warning to Republicans in Congress:

"There is now some belated effort in Congress to reduce schedules of the new tariff measure. This undoubtedly is in response to public protests against a measure carrying schedules that average nearly 50 per cent higher than those of the Payne-Aldrich tariff law, and that was so bad that it disrupted the Republican Party and ended its control of national affairs. It is time that people who object to such robbery of the many for the benefit of the few should make their objections felt, and the point of attack should be the Republicans now in Congress."

The Providence Journal, an influential newspaper published in a protectionist stronghold, writes:

"The fact that a foreign ambassador has called the tariff an international question is not going to make the American people forget that whether the quidnuncs call it an international question or a domestic question, or both, it comes home to them in higher costs of living for which there can be no justification."

Mr. SIMMONS. Mr. President, in reference to the extract that the Senator from Connecticut read from my speech upon lumber, I simply desire to say to him that in 1913, when I was making a tariff bill, I put lumber on the free list.

Mr. HEFLIN. Mr. President, the Senator from Connecticut [Mr. MCLEAN] has announced a strange doctrine, an entirely new doctrine to me. He said that when a tariff tax was laid upon an article the article thus taxed immediately became cheaper.

Mr. President, I am satisfied that there is not a Republican in the whole country except the Senator from Connecticut who will accept that doctrine. The Senator from North Dakota [Mr. MCCUMBER], in his defense of these tariff schedules, has undertaken to point out from time to time that they would result in but slight increases so far as the cost to the consumer was concerned. I have never before heard the doctrine announced from anybody, and I never expect to hear it announced again except by the Senator from Connecticut [Mr. MCLEAN] that by the employment of the taxing power to increase the selling price of an article you at the same time reduce the cost of that article to the consumer.

Mr. President, no wonder these Republican newspapers are referring to this tax measure and some of the arguments that support it as utterly ridiculous. Here is an effort to increase the tariff tax on cheap silk, and we now have a splendid trade in American silk goods abroad. I hold in my hand a pamphlet, "The Silkworm, Official Bulletin of the Silk Association of America," and here is an advertisement seeking American agents to sell our silk goods in foreign markets; and yet some Senators on the other side, including the Senator from Connecticut, are appealing for an additional tax upon that very material.

Mr. President, as the Senator from Texas [Mr. SHEPPARD] showed in his powerful speech of yesterday, we are absolutly dependent on these foreign countries for the raw material for our silk industry.

The Senator from Connecticut comes now and asks for an additional 10 per cent, to be added to the 45 per cent now on the statute books.

It is a fortunate thing that the people back home can be heard in these matters. I hold in my hand a copy of a telegram addressed to the Senator himself by one of his own constituents, which reads as follows:

The tentative rate of 55 per cent catchall clause in silk schedule is altogether too high. It shuts out French importations upon which we depend for success of American industry. We urge 45 per cent as ample protection.

Forty-five per cent is the present rate, and the Senator is seeking to put on top of that 10 per cent more, and one of his own constituents, in the business himself, says that the addition of 10 per cent would destroy their business.

It is a flagrant abuse of the taxing power to undertake to put money into the pockets of one great big silk concern, taking it away from others and destroying their business. It simply shows what I and others have contended during the tariff debates—that the little man is not considered by the bosses of the Republican Party; that the common man, the average man and woman, never is considered in its scheme of legislation. It is only the big man, it is only the man who is able to write a big check for a campaign fund who is able to have the taxing power used for his benefit in the Senate. The little man may protest by his telegram to his own Senator that his little business will be destroyed, but none of these things move the Senator from Connecticut and those with him, who stand and plead for this abuse of this taxing power.

Mr. MCLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Connecticut?

Mr. HEFLIN. I yield.

Mr. MCLEAN. The Connecticut industry at South Manchester, which is owned and managed by the Cheneys, produces less than 5 per cent of the American product.

Mr. HEFLIN. Is that any reason why it is not entitled to live? Because a concern is small should it be choked to death and killed?

Mr. MCLEAN. Mr. President——

Mr. HEFLIN. It is entitled to as much consideration as the silk kings of the country. The Democratic Party looks to the welfare of the commonest individual. None is too small for its consideration. The Government belongs to the whole people, and you have no right to use it to put money into the pockets of the few favored ones to the detriment and ruin of the many.

Mr. MCLEAN. I think the Senator from Alabama, as usual, did not comprehend my statement.

Mr. HEFLIN. I understand the Senator from Connecticut. I think he does not understand himself frequently.

Mr. MCLEAN. I understood the Senator from Alabama to say earlier in the day that this bill was drafted in the interest of the Cheney combine. I wanted to inform him that this great combine which he has mentioned controlled or produced less than 5 per cent of the American product. I did not refer to the telegram which the Senator read, because I do not know who signed it, and the Senator has not told me.

Mr. HEFLIN. I will tell the Senator. It is signed by the Portland Silk Co., Middletown, Conn., right in the Senator's own State, protesting against the very thing he is undertaking to have done, and a Democrat from the far South must champion the cause of these people in the State of the Senator and protest against the very thing he is undertaking to do in this body.

That is not all. I want to read another one to the Senator, from his own State. It is as follows:

Senator GEORGE P. MCLEAN,
Senate Office Building, Washington, D. C.:

We protest against the high rate of 55 per cent catch-all clause in the silk schedule. As manufacturers of silk goods in your State, we tell you that Cheney is not the whole show, and as your constituents we insist upon 45 per cent as more than sufficient protection. We are exporting silks that we make to England at a profit, and therefore surely do not need a prohibitive protection.

BERFELDEN SILK MILLS,
Bethel, Conn.

Mr. President, in view of what the Senator has said I read to but little purpose to the Senator yesterday from the editorial of the North American, a Republican paper published in Philadelphia. I want to read a part of it again:

Dolliver was a stanch believer in tariff protection. He stood for a tariff framed to offset the difference between foreign and American production costs and to preserve the American worker's standard of living. But he was implacably against those who, disguised as champions of honest protection, sought to put the rates so high that they could wring tribute from the American people.

What is this but raising the prices of these cheap silk goods to the poor? It is the only class of silk goods they can buy, and now comes the Senator from Connecticut asking for the increase, with silk concerns in his own State saying that they will be put out of business; that it will hurt their foreign trade if he puts this duty on, which only benefits one big concern in New England.

Again, Mr. President, it seems that the Republican bosses are deaf to the appeals of fairness and justice in anything which affects the rights and interests of the American people. As I said yesterday, it remains to be seen whether or not the American electorate will indorse the misuse and abuse of the taxing power that we see here every day.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Texas [Mr. SHEPPARD] to the committee amendment, on which the yeas and nays have been ordered.

The Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). I have a pair with the senior Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. HALE (when his name was called). I transfer my pair with the Senator from Tennessee [Mr. SHIELDS] to the Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. JONES of Washington (when his name was called). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him for the day. I find I can transfer that pair to the junior Senator from Iowa [Mr. RAWSON], and I do so and vote. I vote "nay."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from Maryland [Mr. FRANCE] and vote "nay."

Mr. MCCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED], I vote "yea."

Mr. STERLING (when his name was called). Transferring my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from New York [Mr. WADSWORTH], I vote "nay."

Mr. TRAMMELL (when his name was called). In the absence of my pair, the senior Senator from Rhode Island [Mr. COLT], I withhold my vote. If permitted to vote, I would vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my general pair with the Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW], I vote "nay."

The roll call was concluded.

Mr. HARRISON (after having voted in the affirmative). I have a general pair with the junior Senator from West Virginia [Mr. ELKINS]. He not having voted, I withdraw my vote. If permitted to vote, I would vote "yea."

Mr. JONES of New Mexico (after having voted in the affirmative). I am informed that my general pair, the Senator from Maine [Mr. FERNALD], has not voted. I am unable to obtain a transfer of that pair and therefore withdraw my vote.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 23, nays 35, as follows:

YEAS—23.

Ashurst	Fletcher	Myers	Sheppard
Borah	Harris	Overman	Simmons
Caraway	Heflin	Pittman	Stanley
Culberson	Hitchcock	Pomerene	Walsh, Mass.
Cummins	Kellogg	Ransdell	Walsh, Mont.
Dial	Lenroot	Robinson	

NAYS—35.

Ball	Frelinghuysen	McKinley	Phipps
Brandegee	Gooding	McLean	Smoot
Broussard	Hale	McNary	Spencer
Bursum	Jones, Wash.	Moses	Stanfield
Calder	Kendrick	Nelson	Sterling
Capper	Keyes	Newberry	Warren
Curtis	Ladd	Nicholson	Watson, Ind.
du Pont	Lodge	Oddie	Willis
Ernst	McCumber	Pepper	

NOT VOTING—38.

Cameron	Harreld	Norris	Swanson
Colt	Harrison	Owen	Townsend
Crow	Johnson	Page	Trammell
Dillingham	Jones, N. Mex.	Poindexter	Underwood
Edge	King	Rawson	Wadsworth
Elkins	La Follette	Reed	Watson, Ga.
Fernald	McCormick	Shields	Weller
France	McKellar	Shortridge	Williams
Gerry	New	Smith	
Glass	Norbeck	Sutherland	

So Mr. SHEPPARD's amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 156, in paragraph 1204, the committee proposes to strike out in line 9, after the word "pound," "*Provided*, That none of the foregoing shall pay a less rate of duty than 35 per cent ad valorem," and insert in lieu thereof a comma and the words "but not less than 35 per cent ad valorem," so as to read:

PAR. 1204. Sewing silk, twist, floss, and silk threads or yarns of any description, made from raw silk, not specially provided for, if in the gum, $1 per pound, but not less than 35 per cent ad valorem.

Mr. SHEPPARD. Mr. President, I recognize that the application of the proposed ad valorem duty is essential to the rate scheme contemplated in this paragraph, and, inasmuch as the amendment which I propose to offer involves a complete change of the text of the paragraph, I can not under the prevailing rule offer it at this time. Consequently I content myself with voting against the amendment for the present.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 156, in line 13, after the word "pound," the committee proposes to strike out "*Provided*, That none of the foregoing shall pay a less rate of duty than 40 per cent ad valorem," and insert in lieu thereof a comma and the words "but not less than 40 per cent ad valorem," so as to read:

If ungummed, wholly or in part, or if further advanced by any process of manufacture, $1.50 per pound, but not less than 40 per cent ad valorem. In no case shall the duty be assessed on a less number of yards than is marked on the goods as imported.

Mr. SHEPPARD. Mr. President, what I said with reference to the previous amendment applies to this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. The next amendment of the committee is on page 156, to strike out paragraph 1205, in the following words:

PAR. 1205. Woven fabrics in the piece, composed wholly or in chief value of silk, if dyed in the thread or yarn, and the weight is not increased in dyeing beyond the original weight of raw silk, if containing not more than 30 per cent in weight of silk, $1.25 per pound; if containing more than 30 per cent but not more than 45 per cent in weight of silk, $1.60 per pound; if containing more than 45 per cent in weight of silk, $3 per pound; if weight is increased in dyeing beyond the original weight of raw silk, if weighing more than one-third of 1 ounce but not more than 1 ounce per square yard, if black (except selvedges), $2.25 per pound; if other than black, $3 per pound; if weighing more than 1 ounce but not more than 1⅛ ounces per square yard, if black (except selvedges), $2 per pound; if other than black, $2.75 per pound; if weighing more than 1⅛ but not more than 1⅛ ounces per square yard, if black (except selvedges), $1.80 per pound; if other than black, $2.50 per pound; if weighing more than 1⅛ but not more than 2 ounces per square yard, if black (except selvedges), $1.65 per pound; if other than black, $2.25 per pound; if weighing more than 2 but not more than 8 ounces per square yard, and if containing not more than 30 per cent in weight of silk, if black (except selvedges), 75 cents per pound; if other than black, 90 cents per pound; if containing more than 30 per cent but not more than 45 per cent in weight of silk; if black (except selvedges), $1.10 per pound; if other than black, $1.30 per pound; if containing more than 45 per cent in weight of silk, but not more than 60 per cent, if black (except selvedges), $1.40 per pound; if other than black, $1.60 per pound; if containing more than 60 per cent in weight of silk, or if composed wholly of silk, and if having not more than 440 single threads to the inch in the warp, if black (except selvedges), $1.50 per pound; if other than black, $2 per pound; if having more than 440 but not more than 600 single threads to the inch in the warp, if black (except selvedges), $1.65 per pound; if other than black, $2.25 per pound; if having more than 600 but not more than 760 single threads to the inch in the warp, if black (except selvedges), $1.80 per pound; if other than black, $2.50 per pound; if having more than 760 but not more than 920 single threads to the inch in the warp, if black (except selvedges), $2 per pound; if other than black, $2.75 per pound; if having more than 920 single threads to the inch in the warp, if black (except selvedges), $2.25 per pound; if other than black, $3 per pound; if weighing more than 8 ounces per square yard, 33⅓ per cent ad valorem.

And insert in lieu thereof:

PAR. 1205. Woven fabrics in the piece, composed wholly or in chief value of silk, not specially provided for, 55 per cent ad valorem.

Mr. SHEPPARD. Mr. President, the Senate Finance Committee in proposing this amendment have discarded and repudiated the rate scheme which it recommended when it reported the pending bill. The paragraph as it appears in the bill covers four or five pages and includes complicated classifications, classifications amounting almost to prohibitions against imports in many instances. In proposing in lieu of that complicated paragraph a paragraph of two or three lines, following exactly the language of the existing Democratic law, the committee pays a high compliment to the ability of the Democrats in constructing the present tariff law. I congratulate it on returning to the plain, simple Jeffersonian language of existing Democratic law and wish it could also apply the same action to the rates.

It is unnecessary for me to repeat what I said yesterday regarding this paragraph. It involves the type of silk known as broad silk. Broad silk constitutes the principal part of the silk-manufacturing industry in the United States.

Under the existing Democratic rate of 45 per cent, a rate in effect highly protective, this branch of the silk industry has made most remarkable progress within the last six or eight years. It has grown from an output in 1914 of over 216,000,000 yards, valued at $137,000,000, to an output in 1919 of 307,000,000 yards, valued at $391,000,000. Thus it trebled its output under existing Democratic rates within five years. What more could Senators expect? Why do they propose a substantial increase in rates in view of a situation of this kind?

Not only has the industry shown this remarkable increase in the value of production but it has developed a notable export trade. The exports in 1919 had a value of $10,000,000 and in 1920 of $8,000,000. During the first nine months of 1921 the exports amounted to $2,000,000. Imports constitute about 6 or 7 per cent of the domestic consumption, and are confined mainly to novelties and high-grade specialties from Europe and to the cheaper grade of silks from China and Japan, which are not made to any large extent in this country or which can not be as profit-

ably made as the higher-grade standard silk goods. Our manufacturers have found it more profitable to confine their efforts to the production of the higher-grade standard silk goods than to attempt to produce the cheaper goods. The cheaper goods and the high-grade novelties constitute the bulk of the relatively small volume of imports in this branch of the silk industry.

The Senator from Connecticut [Mr. MCLEAN] said the silk industry was suffering. What is it doing with the continuously increasing volume of imported raw material? As I said a few moments ago, the imports for 11 months ending in May of this year were larger than in any similar period of the country's history. So I submit that there can be no possible basis in justice or in fact for an increase of 22 per cent in the tariff on broad silk.

Mr. HITCHCOCK. Mr. President——

Mr. SHEPPARD. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. Can the Senator state approximately the price at which the American-made silks sell in this country?

Mr. SHEPPARD. I can in a general way. Usually the value of the silk manufactured output is twice the value of the raw material. The raw reeled-silk imports are valued now at about $8 a pound. Therefore the manufactured output of woven-silk goods, the larger part of the entire production, would have an average value of $16 a pound at present.

Mr. HITCHCOCK. Can the Senator translate that into yards instead of pounds, so as to make it a little more intelligible?

Mr. SHEPPARD. It is hardly possible to translate it into yards because the quality varies with the pounds per yard, and I know of no official statement based on yards.

Mr. HITCHCOCK. Are these particular silks in general use or are they simply luxuries used by the rich?

Mr. SHEPPARD. They are standard silk dress goods and, as the Senator knows, they are in general use throughout the United States.

Mr. HITCHCOCK. By women of all classes?

Mr. SHEPPARD. Yes; by practically all women. Ninety per cent of ties and hatbands are made of silk, and silk dresses, especially the cheaper variety, are coming more and more into general use. In fact, the American people are using silk to a greater extent than ever, and it would not be accurate to say that it is a luxury solely or mainly of the rich.

Mr. HITCHCOCK. The Senator's investigations have shown that the manufactures of the American-made goods consumed are increasing rapidly, and that the American manufacturers control the market virtually?

Mr. SHEPPARD. The American manufacturers of broad silks have not only obtained complete command of the domestic market but are building up a substantial export trade. The imports, as I said, are now confined principally to the higher grades of silk goods and novelties and to the cheaper grades from Japan and China.

The existing rate of 45 per cent certainly ought to be satisfactory to Senators and to the industry. I have here a telegram from the Bethlehem Silk Co., one of the substantial silk concerns of the United States, sent to a Republican Senator and reading as follows:

JULY 26, 1922.

As domestic manufacturers of silks, and for the good of the Republican Party, we hereby protest against the high rates now proposed by the Senate Finance Committee on silk goods imports as unnecessary for protection. We are amply and fully protected against the importations from any country in the world by the present rate of 45 per cent, and any rates above this would only mean higher taxes for the consuming public.

BETHLEHEM SILK CO.

Mr. POMERENE. Mr. President——

Mr. SHEPPARD. I yield to the Senator from Ohio.

Mr. POMERENE. I did not hear the earlier part of the Senator's argument on this schedule, but can he tell the Senate what this additional tariff rate would cost the consumers of the country if it were adopted?

Mr. SHEPPARD. The output for the last year for which I have the official figures is almost $400,000,000, and the ad valorem increase is about 22 per cent. One-fifth of $400,000,000 means an $80,000,000 cost increase in this branch of the silk industry alone.

Mr. FLETCHER. Mr. President——

Mr. SHEPPARD. I yield to the Senator from Florida.

Mr. FLETCHER. May I ask the Senator what the revenue now derived amounts to under the present law?

Mr. SHEPPARD. I have not that exact figure at present, but I shall find out for the Senator and will give it to him in a moment. The revenue derived from the existing Democratic rate on broad silks amounted to about eleven and a half million dollars in 1920. The average for a number of past years was much lower.

Mr. FLETCHER. As I understand the Senator's argument, supported by the telegram which he just read, it is to the effect that the additional 22 per cent would be overprotection.

Mr. SHEPPARD. Exactly.

Mr. FLETCHER. It comes out of the pockets of the people without any benefit really to the manufacturer or to anybody else. It merely enables them to raise the price that much. May I ask the Senator how much of the raw material out of which these goods are made is imported? Is practically all the raw material imported?

Mr. SHEPPARD. All of the raw material is imported, imported free of duty, so that manufacturers are practically getting double protection. They are getting a generous protection on the finished product and they are also getting the raw material free. Why they ask for more at this time challenges my understanding.

Mr. POMERENE. Mr. President, let me ask a further question. The Senator from Texas has just read a very illuminating telegram from the Bethlehem Silk Co.——

Mr. SHEPPARD. The telegram which I read was from the Bethlehem Silk Co.

Mr. POMERENE. Are they producers of all classes of silk or are they confined to certain specialties?

Mr. SHEPPARD. They are producers in a large way of the standardized broad silks, if I am correctly informed.

Mr. POMERENE. So that any expression of that kind would reflect their sentiment as to the silk industry generally?

Mr. SHEPPARD. I think that they would reflect the sentiment of the larger part of the silk industry.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Nebraska?

Mr. SHEPPARD. I yield.

Mr. HITCHCOCK. I understood the Senator from Texas to state that the American production of silk is something like $400,000,000 worth a year?

Mr. SHEPPARD. The amount in 1919, the last year for which we have the official figures, was over $391,000,000 in broad silks alone.

Mr. HITCHCOCK. That is consumed very largely by the American public.

Mr. SHEPPARD. It is consumed principally by the American public.

Mr. HITCHCOCK. Can the Senator from Texas state or give some idea as to how the imports of that class of silk compare with the volume of American production?

Mr. SHEPPARD. The importations represent about 6 or 7 per cent of home output.

Mr. HITCHCOCK. So that competition from abroad may be said to be negligible?

Mr. SHEPPARD. That is true.

Mr. HITCHCOCK. And where the Bethlehem Silk Co. states that "any rates above" the present rates "would only mean higher taxes for the consuming public," they only refer to importations of about 6 per cent of the total consumption; so that the taxes are not a very important feature.

The real significant fact is that if the tariff were raised it would enable the producers of $400,000,000 worth of silk to raise their prices and have immunity from foreign competition; in other words, the taxes that would be levied on the American people would not go into the Treasury of the United States, but might go into the treasuries of the silk manufacturing companies?

Mr. SHEPPARD. That seems to be correct.

Mr. POMERENE. It would also follow, I assume, that instead of getting customs revenues from the importations which amount to 6 per cent of consumption, the additional tax of 10 per cent would operate as an embargo?

Mr. FLETCHER. The additional tax is 22 per cent.

Mr. POMERENE. No; the additional rate is 10 per cent.

Mr. SHEPPARD. The additional rate amounts to an increase of 22 per cent over the existing rate.

Mr. POMERENE. The rate of 22 per cent, therefore, would operate virtually as an embargo upon any further importation of silks?

Mr. SHEPPARD. It evidently would.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield, and, if so, to whom?

Mr. SHEPPARD. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. I request Senators who are debating the pending proposition to speak a little louder in order that we on this side of the Chamber may hear what they say.

Mr. SHEPPARD. I shall speak a little louder, and I shall read the names of some silk concerns which are opposed to an increase of tariff rates in this schedule; concerns which em-

brace, I think, the bulk of the silk business in the United States.

The Susquehanna Silk Mills, 149 Madison Avenue, New York City, with mills at Marion, Ohio; Jersey Shore, Lockhaven, Milton, Northumberland, Lewiston, and Huntington, Pa.

Martin L. Cohn Co., 424 Fourth Avenue, New York City.

Mr. WALSH of Montana. I should like to ask the Senator are we to understand that mills at Marion, Ohio, are protesting against this schedule?

Mr. SHEPPARD. The mill at Marion, Ohio, is protesting against this schedule. Also the Burlington Silk Mills, 424 Fourth Avenue, New York City, with mills at Burlington, N. J.

Mr. POMERENE. May I add to the illuminating statement which has just been made by the Senator from Texas in answer to the question of the Senator from Montana [Mr. WALSH] that there are more protests against the passage of this bill in my mail from Ohio from manufacturers who are Republicans than from any other source.

Mr. SHEPPARD. I thank the Senator from Ohio for that information.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Nebraska?

Mr. SHEPPARD. I yield.

Mr. HITCHCOCK. I want to state to the Senator from Texas also that there will not only be Marions who will protest against the passage of this bill but there will be Marys, Susans, Lucys, and women of a great many other names when the time comes for the new voters to go to the polls in November next. I think, perhaps, that our Republican friends have overlooked the fact that when the Marions, and the Marys, and the Lucys, and the Susans, and the Jessies go to buy their dresses and other articles of war apparel and find that the Republican policy has put up the prices of the things they have got to wear, the protests will take a very substantial form in the November elections.

Mr. SHEPPARD. We have all heard of the "steam roller" in American politics, but it seems now that Marion, Ohio, is going to get out a steam shovel and with it undermine the high walls of protection. I understand that some of the best varieties of steam shovels are made there.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Georgia?

Mr. SHEPPARD. I yield.

Mr. WATSON of Georgia. Has the Senator from Texas read the first issue of the magazine called The New Magazine, which came out in April of this year and which has been followed by subsequent monthly issues? In the first issue there was a special study, carefully made to all appearances, by an expert, and one of the most important statements made with reference to the Swiss industry was that Switzerland, a country which did not go into the war and has not since then entered the league, has had to close down its silk industry and that Germany and the American States are getting the trade in silks which Switzerland used to have.

Mr. SHEPPARD. I have not seen that publication, but I am glad to have the Senator's statement regarding it. In this connection I desire to say that the silk concerns of America, while preparing to have a great silk exhibit in New York City, recently invited foreign silk concerns to cooperate, but a number of them have declined on the ground that they could not make a decent showing in competition with American concerns. Now I shall proceed with the list.

Mr. POMERENE. Mr. President, is it possible that we can do anything of that character? I did not suppose we could do anything without this tariff.

Mr. SHEPPARD. I think that the illustration I have given ought to be sufficient evidence of the fact that we can lead the world in manufacture without the aid of exorbitant tariffs.

Now, proceeding with the list of silk concerns opposed to increases in the present silk tariff rates, I call attention to the following:

Empire Silk Co., 315 Fourth Avenue, New York (with mills at Paterson, N. J.; Carbondale, Scranton, and Wilkes-Barre, Pa.).

The Peerless Plush Manufacturing Co., 32 East Twenty-first Street, New York City (with mills at Paterson, N. J.).

Carl Shoen Silk Corporation, 260 Fourth Avenue, New York City (with mills at West Hoboken, N. J.; Scranton, Pa.; and Valley Falls, R. I.).

Stunzi Sons Silk Co., 461 Fourth Avenue, New York City (with mills at Reading, Pa.).

Sauquoit Silk Manufacturing Co., 440 Fourth Avenue, New York City (with mills at Philadelphia, South Bethlehem, and Scranton, Pa.).

American Velvet Co., 456 Fourth Avenue, New York City (with mills at Stonington, Conn.).

A. Wimpfheimer & Bro., 456 Fourth Avenue, New York City.

Astoria Silk Works, 727 Steinway Avenue, Long Island City, N. Y.

Clifton Yarn Mills, Clifton Heights, Pa.

The Portland Silk Co., 131 East Twenty-third Street, New York City (with mills at Middletown, Conn.).

R. & H. Simon Co., Union Hill, N. J. (with mills at Union Hill, N. J., and Easton, Pa.).

Pennsylvania Textile Co., 449 Fourth Avenue, New York City (with mills at York, Pa., and Central Falls, R. I.).

Manhattan Silk Co., 95 Madison Avenue, New York City (with mills at Ogdensburg, N. Y.).

Mr. FRELINGHUYSEN. Mr. President——

Mr. SHEPPARD. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. I should like to ask the Senator a question. Has he compiled the statistics of the number of looms in the mills to which he has referred, and also the quantity of material imported by those firms? Has he the number of broad looms that are represented in the list which he has read?

Mr. SHEPPARD. I have not that information. I give this list for what it is worth, and I think it is composed of representative silk firms in the United States.

Mr. POMERENE. They are opposed to this increase?

Mr. SHEPPARD. They are opposed to this increase.

Therefore, Mr. President, I move to substitute the rate of 45 per cent as found in the present Democratic law for the proposed increase to 55 per cent. The Republican Party ought to be consistent. Having adopted the language of the Democratic law it ought also to adopt the Democratic rate. I ask for the yeas and nays on the amendment.

Mr. FRELINGHUYSEN. Mr. President, before the yeas and nays are taken I want to say just a word about this industry, particularly in reference to my State.

The Senator from Texas [Mr. SHEPPARD] has read a list of several firms or factories in New Jersey that he says are opposed to this duty. I think I counted some eight or ten factories that he mentioned. There are 957 silk factories in New Jersey, and they are almost a unit in asking for this protection. We do not realize the extent or importance of the great silk industry which has been built up and fostered in this country under a protective tariff. Connecticut, for which Senator MCLEAN speaks, of course has a large silk industry within its limits. Some fifty-seven and odd millions of dollars are invested there; but in New Jersey we have $101,000,000 invested and in the State of Pennsylvania there is $237,000,000 invested. The entire capital invested in the silk industry in this country is some $532,000,000. The factories employ 137,000 wage earners, but at the present time only 59 per cent of the full capacity of the mills is in operation. The number of dependents upon the 137,000 wage earners is 413,000. So when you take the States of Connecticut, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island, these States are deeply interested from the standpoint of the protection of the labor that work in these factories.

We are considering the tariff duty on broad silk. New Jersey has 20,683 looms employed in broad-silk manufacturing, and Pennsylvania over 33,000. The employees in New Jersey on broad silk number over 32,000, while 53,000 are employed in Pennsylvania, but at the present time only 49 per cent of the capacity of the broad-silk mills in this country is in operation.

I ask that these statistics, compiled by the statistical bureau of the Silk Association of America, be inserted as part of my remarks.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[Compiled by the statistical bureau of the Silk Association of America.]

States.	Number of establishments.	Looms.		Spindles.	Wage earners.	Number of dependents (wage earners multiplied by 3).	Capital invested.
		Broad.	Narrow.				
Connecticut	69	4,974	167	138,189	11,254	33,762	$57,837,589
Massachusetts	92	3,218	.....	152,658	5,697	17,091	26,614,191
New Jersey	957	20,683	3,998	284,121	32,326	96,978	101,180,821
New York	592	6,114	1,248	263,049	13,342	40,026	62,550,489
Pennsylvania	769	33,853	3,629	1,610,086	53,052	159,156	237,628,505
Rhode Island	69	5,240	.....	40,303	4,150	12,450	20,200,627
Total in United States	2,743	87,215	9,223	2,669,459	137,716	413,148	532,732,163
Operated at present (per cent)	.....	49.8	35.3	59.3	.....	.....	.....

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Nebraska?

Mr. FRELINGHUYSEN. I yield.

Mr. HITCHCOCK. I desire to ask the Senator whether the fact that only 49 per cent of the capacity is now at work in these mills is due to large importations?

Mr. FRELINGHUYSEN. In some part it is due to the importations, and in some part to the present depressed condition of the market.

Mr. HITCHCOCK. I thought so; but how large are the importations?

Mr. FRELINGHUYSEN. I will get to that. I want to finish my statement of these figures, because I think, I will say to the Senator from Nebraska, that they are important to show the size of the industry and how it is affected. The Senator from Texas [Mr. SHEPPARD] has tried to show that there is a protest from certain factories in my State. I want to show that the majority, running into the hundreds, of the silk men of New Jersey and Pennsylvania and Connecticut believe that this tariff duty—10 per cent over the former duty—is necessary and that this protest is only a flash in the pan, started by men who are principally interested in the importation of silk.

We are considering broad silk, and these figures were compiled by the Associated Silk Manufacturers of North Hudson, N. J., a large silk center in my State, in addition to Paterson, which is the largest.

In 1919 the number of mills manufacturing broad silk in New Jersey was 600. The number of looms was 36,800. The normal help was 29,400. What is it in 1922? The present help is 14,720, or nearly one-half of what it was in 1919. The weekly wage is $363,000, as against a normal weekly wage in 1919 of $883,000, and as against an annual wage in 1919 of $45,926,000 in 1922 it was only $18,890,000.

I ask to have this table printed in the RECORD as part of my remarks.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The table is as follows:

Silk industry in New Jersey.

[Associated Silk Manufacturers of North Hudson, N. J.]

	Broad silk.	Ribbons, labels, and hat-bands.	Skein dyers.	Piece dyers.	Throwsters.	Total.
Number of mills	600	75	40	70	96	881
Number of looms	36,800	5,000				
1919.						
Normal help	29,400	6,000	2,500	3,500	2,500	43,900
Normal week wage	$883,200	$180,000	$62,500	$87,500	$50,000	$1,263,200
Annual wage	$45,926,400	$9,360,000	$3,250,000	$4,550,000	$2,600,000	$65,686,400
1922.						
Present help	14,720	1,500	750	1,400	1,250	19,620
Present week wage	$363,280	$37,500	$16,500	$30,800	$22,500	$470,580
Annual wage	$18,890,560	$1,950,000	$858,000	$1,601,600	$1,170,000	$24,470,160

Mr. FRELINGHUYSEN. The Senator from Nebraska [Mr. HITCHCOCK] asks about the importations. In 1918 there were 1,676,000 pounds of broad silk imported; in 1919, 3,123,000 pounds; in 1920, 2,565,000 pounds; and in 1921, 4,109,000 pounds. In comparison with the production, I agree with the Senator that it is a very small amount.

I did not hear what the Senator from Utah [Mr. SMOOT] said. Possibly he wishes to contribute something to the discussion.

Mr. SMOOT. No; I did not. I simply asked the Senator how many yards there generally are to a pound of silk.

Mr. FRELINGHUYSEN. I am not well enough informed to give the details.

Mr. McLEAN. From 8 to 20.

Mr. SMOOT. I stated that about 2 ounces to the yard would be 8 yards to the pound, the Senator having just a little while before asked about the importations. I am sorry the Senator thought I interrupted him in any way.

Mr. FRELINGHUYSEN. Mr. President, the value, as compiled by these figures for paragraph 1205, in 1918 was $10,645,000, and in 1921 $23,995,000, showing that the imports are increasing.

Mr. President, I have introduced these figures simply to show the importance of the industry, the present depressed condition in New Jersey, and to make the statement for the manufacturers of New Jersey that they want this protection. The condition of the mills of New Jersey at the present time is deplorable, and unless this proper duty, figured out carefully by the committee, is imposed, these people feel that they will be menaced by the importations from France and Japan.

That is all I have to say.

Mr. HITCHCOCK. Mr. President, I understood the Senator to say that the present imports are about $23,000,000 worth.

Mr. FRELINGHUYSEN. Yes.

Mr. HITCHCOCK. What is the American production?

Mr. FRELINGHUYSEN. In 1919 it was $391,000,000.

Mr. HITCHCOCK. So that the imports are a very small proportion of the consumption, or of the production here?

Mr. FRELINGHUYSEN. In 1914 the production was $137,000,000; but I have shown the progressive increase of the importations.

Mr. HITCHCOCK. Mr. President, it is evident that these mills which are producing three or four hundred million dollars' worth a year of this particular kind of silk are not seriously endangered by the importation of $23,000,000 worth.

Mr. FRELINGHUYSEN. They are to a certain extent.

Mr. McLEAN. Mr. President, if the Senator from New Jersey will pardon me——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Connecticut?

Mr. FRELINGHUYSEN. I do.

Mr. McLEAN. We are not afraid of the European competition to-day. They are novelties, very expensive goods; but we think the rate is justified because they are expensive goods and are purchased by well-to-do people who buy fancy material. The competition that we fear is from Japan and China—mostly from Japan.

Mr. HITCHCOCK. Let me ask the Senator a question there. Are these expensive goods?

Mr. McLEAN. No; they are cheap goods.

Mr. HITCHCOCK. Then the Senator wants to stop the importation of cheap goods?

Mr. McLEAN. No; we do not want to stop the importation of cheap goods. We want to be put on a fairly competitive basis, and that is all. I want to say to the Senator that while the value of the importation is only about 7 per cent of the total, the yardage is 24 per cent. They are very light goods and very cheap goods. As I stated to the Senator from Utah, they run as high as 20 yards to the pound, and it is that competition which we fear. We did make these goods in 1912 and 1913, but we were driven out of business by this Japanese competition. Since the war the importation has increased so rapidly that it is displacing a very large percentage of our yardage, and that is why we want a rate 10 per cent higher than the Underwood rate.

Mr. HITCHCOCK. Let me see if I have the figures correctly. The Senator states that in value the imports approximate only 7 per cent of the total consumption, so that is negligible. He then says, however, that when we come to measure the amount by yards the imports are 24 per cent of the total consumption; so that it is the cheap goods that are coming in, and it is the cheap goods, used by comparatively poor people, upon which the Senator seeks to levy this tax, and which he seeks to exclude from the American market. That is just exactly the statement the Senator made.

Mr. McLEAN. Let me call the attention of the Senator from Nebraska to the Reynolds report on these habutais and pongees. The first article is valued in Japan at 38 cents a yard. The selling price here is 62 cents, adding the duty and all. The selling price of the domestic article is 85 cents a yard. That would warrant a rate of 120 per cent to equalize the difference, and all that we are asking is 55 per cent. When this matter was discussed before the committee I asked the expert if this rate of 55 per cent would interfere with the importations from Japan, and he said it would not. My own belief is that we shall have to have at least 75 per cent ad valorem, but we are willing to try to do the best we can on the 55 per cent basis. That is the situation.

Mr. HITCHCOCK. The fact is that we are making four times as much silk as we are importing if we take it by yardage. Now, I want to know of the Senator from Connecticut whether he objects to any competition from abroad. Does he not want any imports?

Mr. McLEAN. I have just tried to make it clear to the Senator that these rates probably would not interfere with the importations to the extent of a yard.

Mr. HITCHCOCK. What are they put on for, then?

Mr. McLEAN. The duty will give us a fairer chance to compete than if we had to compete under the 45 per cent ad valorem rate.

Mr. HITCHCOCK. That is, it will give the American manufacturers an opportunity to raise their prices to comport with the increased tariff?

Mr. McLEAN. Oh, no; they will have to lower their prices.

Mr. HITCHCOCK. How will they get any benefit from the tariff, then?

Mr. McLEAN. They will get 10 per cent ad valorem. The price of the foreign product will be raised to that extent.

Mr. HITCHCOCK. It means that that extra protection will enable them to avail themselves of it to get that extra pay.

Mr. McLEAN. Oh, no, Mr. President.

Mr. HITCHCOCK. That is certainly so. It is a proposition to increase the price of the cheap silks to the American women by increasing the tariff on cheap silks that are imported.

Mr. McLEAN. Mr. President, these goods can be bought now for 50 or 60 cents a yard in Washington, and they pay a 45 per cent ad valorem. I want to show a sample to the Senator from Nebraska.

Mr. FLETCHER. May I ask the Senator, right there, how the prices of to-day compare with the prices in 1914?

Mr. McLEAN. We were driven out of business in 1914 by the Underwood rates and we had to stop making these goods.

Mr. FLETCHER. That does not answer the question. The Senator made a statement regarding present prices of these silks. I ask him how the present prices compare with those of 1914?

Mr. McLEAN. I can not answer that question. I think they are probably somewhat higher.

Mr. FLETCHER. I think so.

Mr. HITCHCOCK. I understood the Senator to say that the silk mills were driven out of business in 1914. Have they been out of business ever since?

Mr. McLEAN. No. During the existence of the embargo created by the war, of course, we know that all industries in this country were busy.

Mr. HITCHCOCK. The war stopped four years ago.

Mr. McLEAN. Yes; but the Underwood rates are still in existence.

Mr. HITCHCOCK. They are still in existence, and your silk people are now doing three-fourths of all the business in silks, and they are manufacturing four times as much silk as is being imported, measured by the yard.

Mr. McLEAN. But we are not making these articles, because we can not do it, as we can not get the protection. Here is a pongee [exhibiting]. It is "loaded." I do not know the prices, but if you wish it, that is what you get. [Exhibiting.] It is a pure imposition. It is weighted with China clay and rice glue, and when you boil it and wash it it is worthless. I do not think the American people would suffer greatly if they were not permitted to buy this stuff at all.

Mr. SIMMONS. Mr. President, in the colloquy between the Senator from Nebraska and the Senator from Connecticut I understood the Senator from Connecticut to make the statement that on account of the Underwood law not affording sufficient protection the industry had been embarrassed and that the importations were increased.

Mr. HITCHCOCK. The Senator went further than that. He said they were put out of business by the Underwood law.

Mr. McLEAN. We did not make this particular line in 1912 and 1913.

Mr. SIMMONS. I am talking about broad silks, which are referred to in the paragraph under consideration. I have the data with reference to broad silks——

Mr. HITCHCOCK. I hope the Senator will read them.

Mr. SIMMONS. Under the McKinley Act and under the Dingley Act and under the first two years of the Underwood Act, before the influences of the war began to affect this industry, as it did many other industries. Beginning with 1901, down to 1905, which were years when the Dingley Act was in force, the importations were, in round numbers—

1901	$12,000,000
1902	13,000,000
1903	14,000,000
1904	14,000,000
1905	14,000,000

An average for those five years of $13,602,000.

Beginning with 1906, and going down to 1910, under the Payne-Aldrich rates, the importations were—

1906	$13,735,000
1907	13,545,000
1908	10,123,000
1909	11,162,000
1910	9,861,000

That was an average during those years of $11,655,000.

Beginning with 1911, and running on down to 1919, under the Payne-Aldrich rates, the importations were—

1911	$9,000,000
1912	6,895,000

And then, in 1914, the Underwood law being in operation during a large part of that year, the importations were $11,985,000, and in 1915 under the Underwood law the importations were $8,732,000, or an average during those five years of $8,878,000, as against an average from 1906 to 1910 of $11,685,000 and as against an average from 1901 to 1905 of $13,612,000. So the importations under the Underwood law before war conditions affected the situation were less, on the average, than the importations under the Dingley law or under the Payne-Aldrich law.

Mr. HITCHCOCK. I thank the Senator for those specific figures. But if we take the figures alone given by the Senator from Connecticut and have no supporting figures of a stronger character, as given by the Senator from North Carolina, the argument is conclusive that the manufacturers of silk in this country have prospered and done a legitimate part of the American business. He has admitted that if we take these silks as a whole the importations amount at the present time to only 7 per cent of the total consumption, and the other 93 per cent is supplied by the American manufacturers. He admits that even when we come to the cheaper silks, which, he says, sell to the women of this country at something like 60 cents a yard, the importations, in yardage, amount to only 24 per cent, as I understood him. Possibly he meant that the importation, by yardage, of all silks was 24 per cent.

I do not care which figures are taken. The American manufacturers, in any event, are manufacturing four times as much silk as is being imported into the country, measured in yards, which embraces the cheaper silks, and certainly it can not be claimed that that competition is of a disastrous character when three-fourths of the market, even in these cheap silks, is in the hands of the American manufacturers. I take it that the proposition to levy an extra tax of 10 per cent, or to increase the rate by 22 per cent, is simply for the purpose of enabling the American manufacturers to raise their prices on cheap silks to the American women, and I say that is not justified. There is no impending danger to the American industry which warrants it, and it is simply compelling the American women of the poorer class to pay a tax to the factories every time they buy a yard of silk.

Mr. SIMMONS. Mr. President, in addition to what the Senator has said, with the exception of a few novelties which come from Europe and some new designs, this is clearly a proposition to exclude the very cheapest grades of silks, which are not produced in the United States at all. I have discussed already to-day their character. While the purpose and motive of the manufacturers very largely is as described by the Senator, that of obtaining an opportunity to advance their prices, with immunity from foreign competition, the fundamental ground upon which they are asking the exclusion of these silk goods, which are not produced in America, and which the poor people of this country use, because they are not able to buy the high-priced products produced in the United States, is to force that class of customers, the users of these inexpensive silks from abroad, notwithstanding their financial inability, to undertake the extravagance of buying the higher grade and more costly products which are produced in America. It is a direct blow at the consumers of the cheap products. It is the laboring people of the United States, the people of small salaries, the farm women of this country, whose husbands are in distress, who use this inexpensive silk. These cheap silks do displace to some extent the expensive silks produced in the United States, and if the cheaper goods are excluded the poor people will be forced to buy the expensive silks or go without silks, and that is the motive of the proposition of levying this duty.

All the silk manufacturers are not asking for this, and those who are not asking for it have, in conversations with me, said that that was the purpose and the motive, to force these poor people, who have been content to buy a thing they were able to pay for, not produced in America, to buy a thing produced in this country which they are not able to pay for or as an alternative to have no silks at all.

The Senator from New Jersey spoke of the rapid increase of importation. There has been no rapid increase in importations at any time. Under the Underwood rate the importations have been negligible, and even during the war and since the war there has been no appreciable change in the importations from the year 1919.

In 1919 the importations were $28,000,000, in 1920 they were $25,000,000, in 1921 they were $23,000,000, in round numbers, in value. There may have been more yards, and there were

more yards; but that has reference to the cheaper products which are imported. A greater percentage of those have been coming in since the war. The distress of our people has made it necessary for greater numbers of them to use these cheaper grades of silk than was the case during the war. During the war almost anybody could afford to buy a $10 or $14 silk shirt, or thought they could. People are not doing it now. Anybody then could afford to buy costly stockings. They can not do it now. Now they must buy the cheaper stockings, and therefore the increase in the yardage is due to the fact that a larger percentage of these cheap goods are coming in now than during the war, because the demand for them is greater than it was during the war, and the demand for the more expensive kind is less.

I do not wish to enlarge upon the very able discussion of this schedule by the Senator from Texas. I think he covered this paragraph with wonderful clearness, forcefulness, and completeness; but I have here a statement giving certain data connected with the production, the importation, the exportation, and the value of these products, together with explanatory notes prepared by an expert of the department for my use. Instead of reading it and commenting upon it, which I would do but for the very full statement and presentation of the Senator from Texas, I shall content myself by asking that it may be incorporated in the RECORD as a part of my remarks without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

PARAGRAPH 1205.

The production of broad silks (American production of broad silk is at least equal to that of all European countries combined and something like twice that of Japan)—designated in the tariff as "woven fabrics in the piece"—increased, from 1909 to 1914, 16.3 per cent in yards and 28 per cent in value; from 1914 to 1919, 43 per cent in yards and 184 per cent in value. Since 1919 production has, due to the depression, declined both in yards and in value, particularly in value. Production in 1914 and 1919 was as follows:

	Yards.	Value.
1914	216,511,000	$137,720,000
1919	310,132,000	391,736,000

Imports in the calendar year 1914 were valued at $10,257,000, or 7.4 per cent of production; in the calendar year 1919, at $28,417,000, or 7.2 per cent of production. In pounds, imports in these years 2,185,000 and 3,124,000, respectively.

Imports of broad silk from all sources rose from an annual average of 2,046,000 pounds in the five fiscal years, 1909 to 1913, inclusive, to an average of 2,409,000 pounds in the five fiscal years, 1914 to 1918, inclusive, and to an average of 2,931,000 pounds in the three fiscal years, 1919 to 1921, inclusive. Imports in the last four calendar years have been as follows:

	Pounds.	Value.
1918	1,676,168	$10,645,113
1919	3,123,889	28,416,782
1920	2,565,535	25,470,263
1921	4,109,185	23,995,339

The import in 1921 was the largest since 1903 and considerably more than double the average annual import for the five years, 1911 to 1915, inclusive. In this year the import was evidently a materially larger proportion of domestic production than in 1919.

Imports are mainly noncompetitive silks, pongees, and habutais, and those are not luxuries, but for the use of the poorer classes.

Since 1914 the character and source of imports has greatly changed. In the fiscal year 1914, 52 per cent of the total imports came from France, 12.2 per cent from Switzerland, and only 24.8 per cent from Japan. In the calendar year 1921, 74 per cent in value and 69 per cent in quantity came from Japan, only 9½ per cent in value and 7 per cent in quantity coming from France. From Japan and China together, the percentages for 1921 were 80 per cent in value and 85½ per cent in quantity. From these two sources came relatively cheap goods, used largely by the poorer classes of silk users. Those coming from France, on the contrary, are as a usual thing high-grade luxury cloths sold in small quantities to wealthy buyers. At the present time, therefore, 75 or 80 per cent of the imports consist of low-grade goods for mass consumption. They are no more luxuries than the bulk of cotton and wool fabrics which are imported. Right here lies one of the explanations of the increased import in pounds in the calendar year 1921. Because of reduced incomes, many consumers who in previous years had used domestic-made silks were forced to substitute therefor the somewhat inferior and much lower priced Japanese goods. This substitution occurred in the women's lining, underclothes, and shirt-waist trades and in the men's shirtings trade. Another important cause of the increased import of 1921 was buying in anticipation of increased duties.

Prior to 1914 the value of habutai imports constituted more than 95 per cent of the total import of broad silks from Japan. Since then the proportion of habutai has steadily decreased until in the calendar year 1921, judging by Japanese export figures, it constituted only about 47 per cent of the total pongee—a cloth not exported from Japan before 1918—now constituting about 45 per cent of the total.

The following figures indicate the course of plain habutai exports from Japan to the United States, in pounds and in estimated yardage:

	Pounds.	Yards.
Annual average 1909–1913	405,000	8,711,000
Annual average 1914–1918	948,000	20,352,000
Annual average 1919–1921	1,228,000	26,381,000
1919	1,790,000	38,456,000
1920	875,000	18,790,000
1921	1,019,000	21,896,000

Pongee exports from Japan were not differentiated by countries until 1921, for which year the American consul at Yokohama cables that the export of pongee to the United States amounted to 18,349,000 yards. From China, whence comes practically nothing but pongee, went to the United States, in 1920, 229,000 pounds of pongee, which probably amounted to a million and a half yards; in 1921, perhaps more than treble that amount—say, six to seven hundred thousand pounds, constituting four to five million yards.

For discussion, habutais may be divided into three classes—extremely lightweights (below about 4 momme weight, which equals 0.51 ounce to the square yard); medium weights (4 to 6 momme; that is, from 0.51 to 0.77 ounce per square yard); and heavyweights (above 6 momme). The extremely lightweights, which constitute 10 to 12 per cent of the total habutai import, are used chiefly as cheap coffin and cheap hat linings. They are so flimsy that they have to be used where there is practically no wear. None of them have ever been made in the United States, and their import is thus noncompetitive. If they did not come in, cotton and not silk would probably be substituted for them. The medium weights are used in making cheap undergarments, waists, and linings. They constitute probably 50 to 60 per cent of the total import and are only indirectly competitive. Under the 1909 tariff they were produced in the United States in small proportion to imports, but have not been made here since 1914. The heavyweights, which altogether constitute something like 20 to 30 per cent of the total, are directly competitive with a small domestic manufacture of imitation habutai and with a fairly large domestic manufacture of imitation radium. With other domestic goods they are also indirectly competitive. American fabrics are in general better made and command a varying price differential over the imported product.

Pongees were made here under the act of 1909, when the duty amounted usually to several hundred per cent, though consumption was greatly curtailed. Since 1914 they have not been made here, and it is doubtful whether they could except with a duty of something like 100 per cent. Imports of pongees may at present, therefore, be said to be noncompetitive. They are used for men's summer suits, men's shirts, women's dresses, suits, waists, and skirts. In many of these they are more nearly competitive with linen or cotton than with silk.

Under the present duty of 45 per cent ad valorem the bulk of American production, probably three-fourths of it, has met little or no foreign competition. The remaining fourth meets more or less direct or indirect competition from imports, chiefly from heavyweight habutai, though to some extent from European print cloths.

Attached is a table showing on various Japanese and Chinese fabrics, how under March, 1921, prices the duties of the pending bill would operate. For some of them it is also indicated how these duties would operate under 1913 prices should they return.

From the table it becomes apparent that with a minimum ad valorem the specific duties originally proposed would not only not apply under present prices, except on pongee, but would not apply under 1913 prices. Indeed, with a minimum ad valorem of 45 per cent, 27 per cent of the total import in the fiscal year 1913 was dutiable under the minimum, while the average ad valorem equivalent was 54.37.

Mr. SIMMONS. In connection with my remarks upon the schedule relating to thrown silk, I ask permission to incorporate as a part of my remarks a statement with reference to the matter I was then discussing, prepared and sent to me by the Fair Tariff League, a great protection organization of the United States, with a membership, as I understand, of 1,500,000. It is very illuminating, and I ask that I may be permitted to incorporate it as a part of the remarks I made upon that schedule.

There being no objection, the statement referred to was ordered to be printed in the RECORD, as follows:

The silk tariff has virtually been written for a generation under pressure of the Cheney family, who operate what is said to be the biggest silk mills on earth at South Manchester, near Hartford, Conn. Just so Lippett, of Rhode Island, has dominated the cotton schedule, and other manufacturers their several schedules.

* * * * * * *

Now, under the pressure and leadership of a Cheney, and with the vigorous opposition of some silk manufacturers in Connecticut and elsewhere, the Payne paragraph is restored in the pending bill, but with 20 per cent increase in rates. * * *

* * * * * * *

The present rate averages 42.6 per cent on woven fabrics, laces, embroideries, and other manufactures. The rate in the Senate bill is 62 per cent.

Under the present rate, the silk mills are permitted to add to their prices, if they can, $214,000,000 above the prices of their foreign competitors.

COST OF PROPOSED RATES.

Under the proposed bill they are invited to add $274,000,000, mostly to be picked from the pockets of the women of the United States. The unfortunate women would have to give up under the pending bill an additional $120,000,000 above present costs, one half of this going to the manufacturers and the other half going to jobbers, wholesalers, and retailers, who are everywhere protesting against it.

This statement of the unrighteousness of the proposed silk rates is based upon the following facts:

THE "DIFFERENCE IN COST HERE AND ABROAD."

Prominent and successful silk manufacturers, upon thorough investigation, declare that "the difference in the cost of production" (the rule of protection) between this country and Switzerland, our hardest com-

petitor, is 15 per cent. This, therefore, 15 per cent, would be a definite and extremely close protective rate, one which, however, no protectionist would approve, because the rates should be so liberally figured as to cover all contingencies and give domestic confidence and satisfaction.

A silk manufacturer and expert, representing many domestic silk manufacturers, says it is well known that the industry in this country is far ahead in quantity production and labor-saving devices. Also that American labor per unit produced is undoubtedly the cheapest in the world. One manufacturer says he could sell in any country in the world at a profit if he cared to go after its trade. In China and Japan a weaver operates one loom, usually a primitive hand loom. Here she operates from two to five high-speed machine looms.

Says he, the ratio of raw material to finished marketable product in domestic silk ranges between 50 and 70 per cent.

"Based on a careful survey and investigation of the costs of production here and in Switzerland, for instance, we [these manufacturers] came to the conclusion that a rate of duty of approximately 25 per cent to 30 per cent ad valorem would amply protect domestic manufacturers against any possible competition of Switzerland." Switzerland has the lowest production costs of any country making competitive silks.

Thirty per cent would be twice this difference in cost of production and decidedly liberal. The present rate is 42 per cent and the proposed rate 62 per cent.

MONOPOLY OF MARKET ON COMPARABLE GOODS.

Under the present rate our silk manufacturers have a virtual monopoly of the domestic market. Search through a great department store shows that not a single yard of foreign-made silk is commonly sold in this country, except novelties in design or quality and an extra-cheap silk from Japan, known as habutai, used mostly for linings and made of second-quality silk too weak for our looms, as we choose to run them. Shall our women of small means be estopped from the use of this silk? It is not a question of protection, because we do not make it.

From China come the Shantung light-brown silks, worn in summer by people of moderate means. The Senate would raise the duties on these in some cases to 200 per cent, thereby doubling the cost and forcing many would-be users to do without or to buy instead such silks as domestic manufacturers offer.

In 1919 we imported less than 1 per cent of the silk ribbons consumed, 3 per cent of our velvets and plushes, and 7.2 per cent of our broad silks, including the habutais and Shantungs, and 5.9 per cent of our total production of silks of all kinds, including knit goods.

A consolidation has just been effected of domestic silk-ribbon manufacturers making more than 2,000,000 yards annually and including the greatest producer in the world.

Imports from France have been steadily declining. They are now mostly very sheer fabrics, which are not profitable for our looms, novelties and art fabrics, which are needed for the stimulation of our industry as well as for the satisfaction of those who can afford them.

Importations from Switzerland have almost ceased. Silks formerly imported, such as taffetas, satins, umbrella silks, and tie silks have for a long time been successfully produced here.

WAGES.

We get some idea of the patriotism and altruism of these manufacturers from the further fact that when, under the Payne law, they had the highest protection then conceivable, 50.5 per cent, the industry paid in Rhode Island—and presumably elsewhere—only $7 to $8 wages per week of long hours, with 92.8 per cent of its operatives foreign born and doubtless many of the remaining 7.2 per cent children of the foreign-born operatives. Labor then got 18.5 per cent of the factory selling price of the product. Labor plus superintendence got 22.7 per cent. The tariff, 50.5 per cent, was over two and one-half times wages plus superintendence.

MATERIAL ONE-HALF OF COST.

While percentages vary, generally speaking, the cost of the silk itself is more than half the cost of the final product, certain crêpes are 80 per cent silk, 10 per cent overhead, and 10 per cent labor.

As the raw silk coming from the Orient is the same price the world over, no protection is required on raw material. The duty, therefore, is measurable only by differences in labor, overhead, and profit, which are more than 50 per cent of the total cost. The present duty of 42.6 per cent is 85.2 per cent of all cost elements subject to difference.

The proposed duty, averaging 62 per cent, would be 124 per cent of the foreigner's total labor, overhead, and profit—a 62 per cent tariff against an actual difference in cost of about 15 per cent.

JAPAN.

Much is said about the low wages of Japanese silk workers. Japanese processes are essentially different from ours. Not a yard of the silk we commonly use is made in Japan. For 50 years those who would frighten us picture Japan as adopting our methods some day. If in another 50 years she does adopt our methods, action can be taken then.

PRODUCTION, EXPORTS, AND IMPORTS.

The domestic industry's control of our market is evidenced by the fact that out of a total production in 1919 of $716,084,858 we imported only $48,286,344, of which $31,000,000 were the noncomparable, noncompeting habutais from Japan, with much of the remainder Shantungs from China. Exports were $16,467,168. Such is the present throttlehold of our silk industry.

In 1920 exports were $15,595,915, imports $54,763,689, mostly the noncomparable fabrics of China and Japan. We are now exporting good-quality silks to free-trade England at satisfactory profits.

PROFITS.

When the necessities of poverty are pleaded by manufacturers, demanding financial relief through Congress from the women of America, it is fair to investigate the claim.

During the war and shortly thereafter the silk market was extremely speculative, raw material rising to $15 or more per pound from $4.50 to $6 per pound pre-war. Some bankruptcies resulted and heavy losses. This is aside from tariff considerations, however.

The Cheney Co., as shown in financial statements, increased its net worth from $7,000,000 in 1905 to $14,075,489 in 1916, exclusive of dividends, if any.

Mr. Horace B. Cheney, in pleading his cause before the Ways and Means Committee February 3, 1922, gave the then net capital as three times the par value ($7,000,000) of the stock, or $21,000,000. "That is just the value." "Absolutely." This indicates a profit of $6,924,511 from 1914 to 1921, exclusive of dividends, if any—a total of $14,000,000 plus dividends, 1905–1921. Should they require more liberal public assistance?

NOT A LUXURY.

Silk is not a luxury. If it were, the American people are for whatever luxuries and convenience they can enjoy properly and modestly, and against congressional interference.

PUBLIC MISCONCEIVES COST.

The public has misconceived the cost of manufacturing silk. Although silk shines and delights, the wage cost of manufacture, being the substantial factor, as shown by the census of 1919, is substantially the same, 15.7 per cent, as in woolens, 15.6 per cent, and less than in cottons, 16.3 per cent.

The present duty should be reduced materially. Let the silk manufacturers, with their cost books, show how much. Plenty of them say this. Then let them reasonably earn their own living.

The present protection, 42.6 per cent, gives the silk manufacturers congressional permission to add $214,000,000 to their prices above those of foreign competitors.

COST OF PROTECTION.

The proposed duty, averaging 62 per cent, lifts this $214,000,000 to $274,000,000, which would be doubled at retail, making $548,000,000 to consumers, half of it lost in gratuities to manufacturers and percentage to retailers, who strenuously protest against the entire scheme.

Mr. SIMMONS. Mr. President, I was very much interested in the thrown-silk paragraph, and I was also deeply interested in the sewing-silk and embroidery-silk paragraph which immediately followed, but unfortunately about the time the Senator from Connecticut took the floor after I had closed my remarks on the thrown-silk paragraph I was called out of the Chamber by an urgent telephone call from the governor of my State, and before I could return to the Senate Chamber the sewing-silk paragraph had been passed. I do not want to discuss that further, but I do wish to put in the RECORD some very informative data which has been furnished me and which I intended to use with elaborate commentation, but which I shall now use without any elaborate discussion.

Our imports of sewing silk and embroidery silk in the calendar year 1920 were only 1,203 pounds, valued at $7,969. The exports were not recorded separately before 1922, but in the first five months of January to May, 1922, our exports were 78,478 pounds, valued at $322,089. It will be seen that on the basis of comparing imports for 12 months with exports for 5 months I am conservative in estimating the exports this year at one hundred times the quantity of imports.

The act of 1913 imposed a duty of 15 per cent ad valorem on sewing and embroidery silks. The Senate committee made the rate 35 per cent on sewing silks in the gum and 40 per cent on sewing silk ungummed. Now, with an enormous production, with exports one hundred times our imports, with only 1,000 pounds of imports of the product, how absurd, how preposterous, how ridiculous—I wish my poor and meager vocabulary might command some stronger words—it appears when the committee comes in here and for the purpose, as they say, of protecting this article from foreign importations, when there are no foreign importations, propose this greatly increased rate. These two paragraphs, thrown silk and sewing silk, present a situation which illustrates the attitude of mind in which the committee must have been when they framed the bill. This illustrates it probably better than any item we have discussed.

In 1919 we produced of these silks $18,234,479 worth, imported $1,000 worth of them, and exported one hundred times as much as we imported. That constitutes the whole basis upon which the rate must be written, if written at all, the whole foundation upon which this increase in rates must stand.

If there be any other reason which could justify it, we have not had it, and can not have it, because the necessity and the justice of the rate must be based upon production here, importations, and exportations. Here are the fundamental facts that either sustain or condemn the rate. If there is any intellect in America that can take those facts—and they have not been and can not be disputed—and justify an increase of these rates from 15 per cent, where they were when these conditions which I have described were developed, up to 25 per cent, it is an intellect more fertile in expedients to do the wrong than I would like to credit any Senator in this body with possessing. It does not mean and can not mean anything but a surrender, an abject surrender, to certain interests in the country which, desiring to increase their prices and still be free from foreign competition, have asked these rates. They were free from foreign competition under the 15 per cent rate. If they were satisfied with present profits and prices they would not ask for any more, because they had no trouble from outside competition under that rate. When they come here and in these circumstances ask for higher protection there can be but one motive—that of affording an opportunity to increase their prices and their profits without incurring the danger of foreign competition.

I say that the facts show that a committee of intelligent gentlemen, many of whom, if not all of whom, understand the principles which underlie tariff taxation, could not have misunderstood the situation and what it justified and did not jus-

tify, and when they propose these increased rates to the Senate I can not account for it, and I do not account for it. In an overabundance of justice to them, in charity to them, I do not account for it except upon the theory that they were forced by conditions which they could not control to surrender to the great and powerful interests which demanded these unnecessary, these unjust, these oppressive increases in rates.

Mr. McLEAN. Mr. President, I have just been handed the pink statement which was presented by the Senator from North Carolina alleged to have been written by Mr. Miles, representing the Fair Tariff League. Anyone who is familiar with Mr. Miles and his views would know that this statement should have been denominated a statement of the free-trade league. It is so full of misstatements that it is hardly worth considering. In the first place, Mr. Miles intimates that Mr. Cheney practically controls the silk production of the country. As I have already stated, he controls less than 5 per cent of the silk production and less than 2 per cent of the broad-silk production. The whole statement is based upon the production of broad silk—the expensive silk—and has nothing to do with the lightweight goods and the cheaper goods which are coming in from Japan, and, as I shall show before I close, in rapidly increasing poundage and yardage.

Mr. Miles in this pink statement alleges that Switzerland has the lowest production cost of any country making competitive silk. If Mr. Miles knew anything about the production of silk in the world, he would know that the Swiss production is the most expensive next to that of the United States. We have no fear of the Swiss competition. Mr. Miles alleges that there has been a consolidation of domestic silk-ribbon manufacturers. It is too bad he does not give some evidence of that, because there are something like 1,500 establishments in this country, and a good many of them make ribbons. It is a small item, and if they were to combine on anything that would be the last thing that they would undertake to monopolize. In his estimate of importations Mr. Miles says:

> Under the present rate the silk manufacturers have a virtual monopoly of the domestic market. Search through a great department store shows that not a single yard of foreign-made silk is commonly sold in this country—

Mr. President, I walked into an antique store in Washington the other day. Being interested in a little bronze Japanese vase, I went in to inquire its price. The first thing that the proprietor asked me was, "Do you want to buy some silk goods? I have just got a new importation from China." He laid down two pieces of goods on the counter. I was interested and inquired the price. He said the price was 50 cents a yard. The silk paid a 45 per cent ad valorem duty. Mr. President, the idea that the addition of 10 per cent to that ad valorem duty will raise the price of those goods to the American consumer is too ridiculous for discussion. All that Japan will do will be to lower her invoice price enough to cover the duty; that is all there will be to it. Mr. Miles goes on to state as follows:

> We get some idea of the patriotism and altruism of these manufacturers from the further fact that when, under the Payne law, they had the highest protection then conceivable, 50.5 per cent—

He is wrong about that. I think the Payne rates averaged over 60 per cent, and that, with the specific rate, the equivalent was as high as 63 per cent in many instances. It is, however, a waste of time to comment on this "pink statement," because I find nothing in it to indicate that Mr. Miles knew anything about the industry. He speaks here about the number of children who are employed and states that the labor in the product is 18.5 per cent of the factory selling price of the product. I admit that wages were low, averaging about $21 a week. The railroad men, however, get about $30 a week, while the coal miners get $35 a week. The wages in the silk industry are low, and they have been twice cut since the war; but that is because the industry is so depressed that the American manufacturer must cut wages.

I do not believe, however, there is a patriotic woman in this country who would not be willing to pay 3 cents more a yard for a pongee dress rather than have 150,000 people who are engaged in the silk industry walk the streets without a job. Mr. Miles further says:

> Much is said about the low wages of Japanese silk workers. Japanese processes are essentially different from ours. Not a yard of the silk we commonly use is made in Japan.

Mr. President, as I have said, Japan has within the last three years imported over $12,000,000 worth of modern machinery, and the last Japanese census shows that more goods were produced from foreign-made power looms than on the native looms which they had previously used. Everybody knows that the Japanese are the most skillful and most adaptable people in the world; they are expert copyists. For us to assume that the Japanese people, whose wages are now about one-eighth of ours, can not manipulate the same machines that we have, make that product, send it over here and pay a 55 per cent duty instead of a 45 per cent duty, is entirely a mistake. The whole claim is ridiculous, Mr. President.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Montana?

Mr. McLEAN. I do.

Mr. WALSH of Montana. I should like to ask the Senator why the Japanese have not done so?

Mr. McLEAN. They have done it.

Mr. WALSH of Montana. The figures show that they have not done it.

Mr. McLEAN. Well, I will read some figures to the Senator from Montana. He has not been here. That is the trouble with this whole debate. First one Senator on the other side of the Chamber, who does not know anything about the bill, delivers himself of a denunciation of it. It is explained to him. Then another Senator, who evidently does not know anything about the bill, comes in and denounces it. The importations in pounds are as follows:

Mr. WALSH of Montana. Before the Senator from Connecticut proceeds I desire to say that I do not know anything about the matter except what the Tariff Commission has told us.

Mr. McLEAN. I am quoting from the tariff reports.

In 1918 the imports were 1,676,168 pounds; in 1919 they were 3,123,889 pounds; in 1920 they were 2,560,535 pounds; and in 1921 they were 4,109,185 pounds. If these figures are wrong, the expert who sits at my right must take the responsibility. I assume that he is not only responsible for these figures but for the tariff survey; and I think he is a very accurate gentleman.

Now, let me call the attention of the Senator from Montana to some other figures. Under the law of 1909 the five-year average of importations was 9,500,000 square yards per year of habutai and pongee. Similar goods were manufactured upon a large scale in the United States, in an amount a little greater than the importations. Under the first five years of the Underwood law the importations rose to 21,500,000 square yards, according to the figures furnished by the Tariff Commission to the Ways and Means Committee of the House.

The importations of habutai silk from Japan to the United States have been as follows: In 1910—I will not quote the odd numbers—they were 8,000,000 yards; in 1911 they were 8,000,000 yards; in 1912 they were 6,000,000 yards; in 1913 they were 10,000,000 yards; in 1914 they were 13,000,000 yards; in 1915 they were 18,000,000 yards; in 1916 they were 21,000,000 yards; in 1917 they were 24,000,000 yards; in 1918 they were 20,000,000 yards; in 1919 they were 37,000,000 yards. Since that time the importations have continued to increase, in the year 1920 being 38,000,000 yards. The total importations of all silk goods from China and Japan for the year 1919 were 45,800,000 yards, while for 1921 they were 68,000,000 yards. For the year 1921 the domestic production was 237,500,000 yards.

This is a luxury. The goods are exceedingly cheap; and if we will give the American producer anything like reasonable protection he will probably devise labor-saving machinery, so that in a few years the very character of goods which are now coming from Japan will be made as cheaply here as they are there, and we will have the same result in regard to this article as we did with regard to the broad goods. As I have said, we are not afraid of European competition in the novelties and high-priced goods, but we must have this protection upon the light-weight goods from Japan.

Mr. President, it is a matter of displacement. The agriculturists of the country wanted a little protection on their wheat, and I thought they were entitled to it and voted for it. In North Dakota and in other Northwestern States there is produced a kind of wheat which is called No. 1 hard, a fine quality of wheat. It may be that some day, not long in the future, Russia will produce a wheat and call it No. 1 red, which may be laid down in America and displace the American product for half what we can produce it for. I think the wheat growers of the country realize that such competition would be disastrous to them; and I want to say to the Senator that the silk producers of the country are realizing that the constantly increasing importations of habutai and pongee silks are seriously affecting their business. I think that the men and women who are working in the silk mills on half time—three days in the week—are entitled to reasonable consideration.

Mr. SHEPPARD. Mr. President, the Senator from New Jersey [Mr. FRELINGHUYSEN] tried to create the impression that the list which I read to the Senate of manufacturers who had gone on record in opposition to increasing the existing rates in the silk schedule represented but a small and negligible number of American silk manufacturers.

The facts are, as I am reliably informed, that the list of manufacturers which I read represents in volume of output over 50 per cent of the American silk industry as a whole. It is true that the protest to which their signatures were attached applied to the rates on spun-silk articles, but it is also true that many of them have protested against the increases in the rates on other types of silk goods. It is entirely within the limits of accuracy to say, therefore, Mr. President, that a representative and substantial number of American silk manufacturers are opposed to the increases proposed in the silk schedule.

The Senator from New Jersey referred to idleness and depression in the silk industry, and the Senator from Connecticut has endeavored to reenforce the position which he took in that regard. Mr. President, it is utterly absurd to talk of idleness and depression as a permanent thing in the silk industry when the importations of raw silk are increasing every year and every day. What are the manufacturers doing with the constantly increasing quantities of raw material? They can not eat it; they must be making use of it. The facts are that in the silk industry looms are at times temporarily suspended, pending a change in fashion, and that work is halted until the factories can get a better line upon future markets. It is also true that at the present time in New Jersey an exodus is about to occur of a number of mills into Pennsylvania, where better labor conditions are thought to prevail. These facts may explain the temporary idleness of some New Jersey looms.

Mr. McLEAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Connecticut?

Mr. SHEPPARD. Certainly I yield.

Mr. McLEAN. I find it necessary to repeat what I said this morning with regard to the use of the raw silk which is imported. Practically 50 per cent of it goes into cotton, woolen, and knit goods and insulating material and not over 50 per cent of it probably goes into velvet and broad goods. The competition in cotton goods is so keen that the manufacturers of cotton cloth in this country are using silk, or part silk, in order to revive their trade. The same statement is true as to worsteds. In probably half of the worsted goods that are used for men's wear the stripe, if they contain a stripe, will be found to be of silk. It helps to sell the goods. It is not an indication that the broad-silk industry ought to revive because the importations of raw silk have increased.

Mr. SHEPPARD. Mr. President, the broad-silk industry consumes the greater portion of the imported raw silk. I further say that the factories which consume silk for any purpose are as much a part of the silk industry in America as those which make any particular kind of silk goods exclusively. So I do not think the distinction drawn by the Senator from Connecticut is valid.

The Senator from Connecticut also stated that the Underwood tariff rates drove the silk industry out of business in 1914; yet, Mr. President, under the Underwood rate from 1914 until to-day the American silk industry has made the greatest progress in its history.

Mr. McLEAN. Mr. President, again I must correct the Senator from Texas.

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Connecticut?

Mr. SHEPPARD. I yield to the Senator, of course.

Mr. McLEAN. I did not say that on account of the Underwood law the manufacturers of broad silk, or what we understand as the expensive goods, were compelled to discontinue production. I referred to the habutai and pongee silks.

Mr. SHEPPARD. Mr. President, any statement that any part of the American silk industry was driven out of business by the Underwood-Simmons rates on silk, when that industry as a whole and in all its branches has enjoyed a marvelous progress during the last seven or eight years, answers itself.

I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Texas to the amendment reported by the committee to strike out "55" and insert "45." On that amendment to the amendment the Senator from Texas asks for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from California [Mr. JOHNSON], who, if he were present, would vote "nay." If I were free to vote I would vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. STERLING. Making the same announcement as on the last vote, I vote "nay."

Mr. LODGE. I transfer my pair with the Senator from Alabama [Mr. UNDERWOOD] to the Senator from California [Mr. SHORTRIDGE] and will vote. I vote "nay."

Mr. TRAMMELL. In the absence of my pair, the Senator from Rhode Island [Mr. COLT], I withhold my vote. If at liberty to vote I should vote "yea."

Mr. HARRISON. I transfer my pair on this question to the senior Senator from Montana [Mr. MYERS] and will vote. I vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. DIAL. I am paired with the Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and will vote. I vote "yea."

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

The result was announced—yeas 22, nays 35, as follows:

YEAS—22.

Ashurst	Harris	Lenroot	Stanley
Borah	Harrison	Overman	Swanson
Caraway	Heflin	Pomerene	Walsh, Mass.
Culberson	Hitchcock	Ransdell	Walsh, Mont.
Dial	Jones, N. Mex.	Sheppard	
Fletcher	Kellogg	Simmons	

NAYS—35.

Brandegee	France	McKinley	Phipps
Broussard	Frelinghuysen	McLean	Smoot
Bursum	Gooding	McNary	Spencer
Calder	Hale	Moses	Stanfield
Cameron	Jones, Wash.	Nelson	Sterling
Capper	Kendrick	Newberry	Warren
Curtis	Ladd	Nicholson	Watson, Ind.
du Pont	Lodge	Oddie	Willis
Ernst	McCumber	Pepper	

NOT VOTING—39.

Ball	Harreld	Norris	Smith
Colt	Johnson	Owen	Sutherland
Crow	Keyes	Page	Townsend
Cummins	King	Pittman	Trammell
Dillingham	LaFollette	Poindexter	Underwood
Edge	McCormick	Rawson	Wadsworth
Elkins	McKellar	Reed	Watson, Ga.
Fernald	Myers	Robinson	Weller
Gerry	New	Shields	Williams
Glass	Norbeck	Shortridge	

So Mr. SHEPPARD's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The READING CLERK. The committee proposes to strike out, on page 161, lines 23 and 24, all of page 162, and down to and including line 13 on page 163, and to insert the following:

PAR. 1206. Plushes, including such as are commercially known as hatter's plush, velvets, chenilles, velvet or plush ribbons, and all other pile fabrics, cut or uncut, composed wholly or in chief value of silk, 60 per cent ad valorem.

Mr. SHEPPARD. I move to strike out "60" and insert in lieu thereof "50," so that the amendment will read "50 per cent ad valorem" instead of "60 per cent ad valorem."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On line 10 of the committee amendment, it is proposed to strike out "60" and insert "50."

The PRESIDING OFFICER. The question is upon the amendment proposed by the Senator from Texas to the amendment of the committee.

Mr. SHEPPARD. Mr. President, again the Senate Finance Committee has surrendered an elaborate and complicated classification and returned to the plain and simple language pursued by the Democratic tariff law. The principal change the committee has made has been to increase the rate from 50 per cent to 60 per cent.

Here is an industry which has never had a less rate than 50 per cent, evidently a high-protective tariff, and under this

high rate of 50 per cent the industry has grown from an output valued at over $8,000,000 in 1914 to over $20,000,000 in 1919—a wonderful growth.

I refer in these figures to the silk-velvet branch of the plush industry. Silk plushes have held their own. Imports have not amounted to more than 10 per cent of the domestic output, and imports to-day are smaller than they have ever been before. In fact, the imports for 1920 are half the average imports for each year during the last 30 years. The imports consist mainly of an all-silk-velvet type of goods which is produced in this country only to a nominal extent. Therefore imports do not compete in any true sense with the domestic production, and yet the Finance Committee want to increase this high-protective rate of 50 per cent to 60 per cent ad valorem.

I think the mere recital of these figures, showing the present prosperous condition of this branch of the silk industry, will be sufficient to show the injustice and the viciousness of the proposed change.

I ask for the yeas and nays on my amendment to the committee amendment.

The yeas and nays were ordered.

Mr. McLEAN. Mr. President, I wish to state for the record that on this paragraph, pile velvets, the Reynolds report authorizes an average rate of 76 per cent ad valorem on the importations that come in. The committee recommended 60 per cent. The Underwood rate was 50 per cent; and it seems to me that, as this rate applies to velvets, luxuries, and is 15 per cent below the rate authorized by the experts who examined the costs, there ought to be no opposition to its adoption by the Senate.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. McLEAN. Yes.

Mr. LENROOT. I should like to ask the Senator upon what price of silks the 76 per cent ad valorem was figured?

Mr. McLEAN. The price given in the Reynolds report is $1.57 a yard.

Mr. LENROOT. That, of course, does not tell us anything unless we know the price by the pound.

Mr. McLEAN. It seems to me that it does. It seems to me that it is a much better basis than a pound basis.

Mr. LENROOT. But we do not know what proportion the price per yard now bears to the price before, unless we know the pound basis.

Mr. McLEAN. It would be about 4 ounces to the yard, which would make about 4 yards to the pound.

Mr. LENROOT. What date does the Reynolds report bear?

Mr. McLEAN. August, 1921.

Mr. LENROOT. Silk is worth $6 a pound.

Mr. McLEAN. As to many of these articles, the Japanese will lay the goods down in this country at the price of the raw silk.

Mr. SMOOT. That is on account of the filling.

Mr. LENROOT. It is not pure silk, then?

Mr. SMOOT. No; it is mixed with China clay.

Mr. McLEAN. Most of it is weighted in some way.

Mr. SHEPPARD. Mr. President, the report of the Tariff Commission indicates that no imports of these articles come from Japan at all. They come from France, England, Germany, and Switzerland chiefly.

I ought to say, further, that this character of silk article is used in making trimming both for clothes and hats, for imitation furs and seals, for furniture covering, draperies, and so forth; articles of general, if not common use, among people. Certainly there is no reason for any increase in the rates. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former ballot, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the junior Senator from California [Mr. SHORTRIDGE] and vote "nay."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote, I vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON] who, if he were present, would vote "nay." If I were at liberty to vote, I would vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from West Virginia [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS]; and

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN].

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. NEW. Transferring my pair with the junior Senator from Tennessee [Mr. McKELLAR] to the junior Senator from Vermont [Mr. PAGE], I vote "nay." I ask that this announcement of transfer stand for the day.

The result was announced—yeas 22, nays 39, as follows:

YEAS—22.

Ashurst	Harrison	Overman	Stanley
Caraway	Heflin	Pittman	Swanson
Cummins	Hitchcock	Pomerene	Walsh, Mass.
Dial	Jones, N. Mex.	Ransdell	Walsh, Mont.
Fletcher	Kellogg	Sheppard	
Harris	Lenroot	Simmons	

NAYS—39.

Ball	France	McCumber	Pepper
Brandegee	Frelinghuysen	McKinley	Phipps
Broussard	Gooding	McLean	Smoot
Bursum	Hale	McNary	Spencer
Calder	Harreld	Moses	Stanfield
Cameron	Jones, Wash.	Nelson	Sterling
Capper	Kendrick	New	Warren
Curtis	Keyes	Newberry	Watson, Ind.
du Pont	Ladd	Nicholson	Willis
Ernst	Lodge	Oddie	

NOT VOTING—35.

Borah	Glass	Owen	Sutherland
Colt	Johnson	Page	Townsend
Crow	King	Poindexter	Trammell
Culberson	La Follette	Rawson	Underwood
Dillingham	McCormick	Reed	Wadsworth
Edge	McKellar	Robinson	Watson, Ga.
Elkins	Myers	Shields	Weller
Fernald	Norbeck	Shortridge	Williams
Gerry	Norris	Smith	

So Mr. SHEPPARD's amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 163, line 18, after the word "or," to insert the word "of"; in line 19, before the word "not," to strike out the word "if"; and in line 20, before the word "per," to strike out the figures "33⅓" and to insert "55," so as to make the paragraph read:

PAR. 1207. Fabrics with fast edges, wholly or in chief value of silk, not exceeding 12 inches in width, including ribbons, and articles made therefrom, tubings, garters, suspenders, braces, cords, tassels, and cords and tassels; all the foregoing composed wholly or in chief value of silk or of silk and india rubber, not embroidered in any manner by hand or machinery, and not specially provided for, 55 per cent ad valorem.

Mr. SHEPPARD. I move to insert "45," the existing tariff rate on the articles covered by this paragraph, in lieu of 55 per cent, proposed by the committee.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Texas to the committee amendment.

Mr. SHEPPARD. Mr. President, we have here a branch of the silk industry comprising silk ribbons and other silk small wares, which, under the existing high protective rate of 45 per cent, has grown from an output valued at $38,000,000 in 1914 to $66,000,000 in 1919. The imports are insignificant and are confined to specialties which are not produced to any great extent in the United States. An export trade has developed, quite a quantity of these goods being now shipped to Canada and Latin America.

Among the articles covered by this paragraph are hat and cap bands; borders or finishings for dresses; thin taffeta ribbon binding in all staple colors; bindings for tailored garments; bindings for carpets and blankets; inner belting for skirts and waists, insuring proper adjustment; casings for corset steels and "boning" used in dressmaking; elastic banding and webbing containing rubber threads and used for braces; various kinds of supports, surcingles, suspenders, and so forth; tubings, cords, tassels, garment labels, and the like.

I have enumerated the articles covered by this paragraph to show that in the main they can not be considered altogether as luxuries, but in many instances as necessities; in fact, many of them are necessary medical supplies and are used in the hospitals of the country to an increasing degree in ministering to the disabled.

The imports of these articles reached the highest point as long ago as 1897 and have continuously decreased until last year they amounted to less than 1 per cent of the domestic output. Yet the Finance Committee and the Republican Party propose to increase this rate by 33⅓ per cent—this rate, which is highly protective and which ought not to be increased in any degree. In fact, if justice were done, the rate ought to be decreased.

I do not know anything further that can be said to show the real situation, and I ask for the yeas and nays on my amendment.

Mr. McLEAN. Mr. President, these imports are novelties, and they come from Europe. The importations recorded in the Reynolds report warrant protective rates ranging from 65 per cent ad valorem to 85 per cent ad valorem. There would seem to be no reason why the rate on these articles should be any less than that on the broad goods from which they are made.

Mr. SHEPPARD. Mr. President, the only article that comes in substantial competition with any article mentioned in this paragraph is the hatband, which is imported from Germany. Outside of hatbands there is practically no serious competition in these articles imported from abroad. As the Senator has suggested, most of these articles are specialties and novelties. It is a fact that hatbands from Germany do compete seriously with the American article, and I refer to the fact that practically every hatband in the United States is made of silk or partially of silk to show how general the use of silk is coming to be in the United States. A rate of 45 per cent ought to be a sufficient protection on hatbands from Germany, because this branch of the silk industry has already achieved such rapid growth under that rate.

If the industry could be said to be languishing in any way, perhaps there might be some excuse for an increase, but it is making substantial and lusty progress. In my judgment there can be no basis for such an increase of duty as is here proposed, an increase of about 33⅓ per cent.

Mr. President, on my amendment I ask for the yeas and nays.

Mr. JONES of New Mexico. Mr. President, I would like to ask the Senator from Texas where Germany gets the raw silk out of which she manufactures these materials.

Mr. SHEPPARD. Principally from Japan.

Mr. JONES of New Mexico. It was my understanding of the matter that Germany got her raw silk in the world market and would pay for it just as much as we in the United States pay for it. The difference in exchange in this case, instead of operating to the advantage of any German manufacturer, is an extreme handicap upon such industries in Germany.

The PRESIDENT pro tempore. The Senator from Texas asks for the yeas and nays on his amendment to the committee amendment.

The yeas and nays were ordered.

Mr. SIMMONS. Mr. President, I wish simply to supplement some of the very pertinent observations of the Senator from Texas. I want to read from the Tariff Commission's report on silk ribbons just a few lines:

> Some American ribbons are exported each year, but normally these do not represent a significant part of the world's trade. During the last few years exports have been considerably larger than imports. The American manufacturer holds the domestic market on all but fancy goods and novelties. Imports supplement the domestic product rather than compete with it. This will probably remain the case as long as conditions of manufacture here and abroad hold their present relation.

So that we have a statement from the Tariff Commission that would seem to meet the situation and condemn the proposition of the committee to increase the rate.

I also have a telegram which I wish to read, as follows:

NORTH BERGEN, N. J., *August 1, 1922.*

Hon. F. M. SIMMONS,
United States Senate, Washington, D. C.:

We firmly believe that the present rate of 45 per cent ad valorem has been and is sufficient protection to the American silk industry.

VERITAS SILK MILLS.

A mere examination of the official statistics shows that the present rate of duty upon the product is amply protective; indeed that it is almost, if not practically, prohibitive. The last year for which we have the official statistics showing the production of silk ribbons in this country is 1919, but in that year the production was $66,000,000 in round figures, while the importations for consumption were only $74,778, or about one one-hundredth of 1 per cent of the domestic consumption. The importations are somewhat larger now than they were in 1919, but now they are less than they were in 1910. In 1910 under the Payne-Aldrich law there was a production of $32,000,000 and importations of $934,000, while in 1921 the importations were $862,000, or less than they were in 1910.

Mr. SHEPPARD. The importations reached the highest point as far back as 1897 and they have never been as large since, although the industry itself has been growing prodigiously.

Mr. SIMMONS. The importations under the Payne-Aldrich law in 1910, 1911, 1912, 1913, and 1914 were greater than they were in 1920, and in 1910 they were greater than they were in 1921. The 1914 importations were large it is true, but they fell off in 1915 and have continued to fall off ever since, showing that there is no progressive increase in importations, although the production has increased in the last 11 years from $32,000,000 to $66,000,000. The importations have actually fallen off. The importations are so small that they could not possibly be material in connection with the labor problem presented by the tariff or any problem so far as I know presented by the tariff.

It is impossible for me to conceive why, under these circumstances, any increase in the rate is asked. Certainly it can not be asked for any public purpose. I can not state definitely why it is asked, but I know it is for a private and a selfish purpose and not a purpose which concerns the general public welfare of the people of the country or the prosperity of the industry. It has to do with the prices and profits of the industry and the ability of those who operate it to increase arbitrarily those profits in response to the demands of personal selfishness and avarice. To increase duties under circumstances like these is not only preposterous and absurd, but the committee and the party responsible for the act in the commission of the act stultify themselves both intellectually and morally, and when the American people come to understand the situation they will regard this act as an act of self-stultification unless it is intended deliberately to legislate against the people in the interest of a comparatively few producers whose avarice seems to have no limitation whatever.

Mr. President, I ask permission to have printed in the RECORD a brief statement with reference to the pending item.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

PARAGRAPH 1207.

Rate: Act of 1913, 45 per cent; Senate amendment, 55 per cent.

Ribbons: American mills manufacture ribbons of standard quality and width. These constitute the bulk of the trade. Few novelty goods are made in this country. Production is very variable from year to year because demand depends upon style.

Value of silk ribbons produced in the United States.

1909	$32,744,873
1914	38,201,293
1919	66,186,609

Imports have never approached the production of any census year. The largest imports were in 1914. They amounted to 5.62 per cent of the production for that year.

Imports of silk ribbons for consumption.

Fiscal years:	Value.
1913	$596,896
1914	2,146,988
1919	74,778
1920	526,255
1921	862,727
Calendar year:	
1921	546,634

Nineteen hundred and fourteen was a year of unusual demand. It was also a year of big business for the domestic industry. (Annual Report of Silk Association of America, 1914.)

Exports were not recorded prior to January, 1922. For the first quarter of this year they amounted to a value of $175,488, during which period imports were $103,514.

Imports of all kinds of ribbons into Canada from the United States were as follows:

Year ended March 31:	Value.
1918	$646,424
1919	1,481,545
1920	1,595,053
1921	868,270

French exports to all countries were valued at $9,000,000 in 1913 and at $36,000,000 in 1920.

Small wares: There is little foreign competition in silk small wares in general, but prior to the war imports of hat bands were sufficiently large to be considered competitive. Domestic production in 1914 was $607,204, and imports amounted to $484,369.

Imports are not always of as good quality as the domestic because the use of inferior materials, which necessitate slower production, is not practicable in the United States.

Imports for consumption of silk small wares—fiscal years.

	1914	1919	1920	1921	Calendar year 1921.
Belts and belting	$42,540	$316	$42	$439	$401
Bindings and bone casing		1,656	2,663	13,934	5,643
Cords, tassels, etc		10,898	24,180	164,928	154,985
Garters, suspenders, etc		894	1,491	1,359	1,460
Webs and webbing		4,031	3,842	4,320	4,831
Bandings, including hat	484,369	36,641	142,201	249,205	131,212
Total	526,909	54,436	174,419	434,185	298,532

Hatbands are mainly from Germany and France. Cords and tassels are principally from the Orient.

Exports for the first quarter were $43,317; imports for the same period were $35,838.

Mr. McLEAN. Mr. President, I could not hear the Senator from North Carolina as he read the statement of imports, but an examination of them will show that they are very significant.

Mr. SIMMONS. Mr. President, I can not hear the Senator from Connecticut.

Mr. McLEAN. I could not hear the Senator from North Carolina.

Mr. SIMMONS. Then we will call it even, and let it go at that.

Mr. McLEAN. In 1913 the imports were $596,000 worth of ribbons. In 1914, when the industry felt the effect of the Underwood rates, the importations were $2,146,988. When we come to 1918, at the close of the war, the imports were low, $105,000, and in 1919 only $74,000, but in 1920 they jumped to $526,000, and I understand they have increased in 1921. So much for the significance of the figures as indicating an enormous increase under the Underwood rate when that rate was effective, and a constant increase since the war.

Mr. SHEPPARD. The Senator from Connecticut boasts of the increase in imports to a little over $500,000 in 1920. That means but little more than 1 per cent of the total output.

Mr. SIMMONS. They were less than the imports of 1910.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Texas to the amendment of the committee, on which the yeas and nays have been ordered.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "yea."

Mr. McCUMBER (when his name was called). I again transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote in reference to my pair and its transfer, I vote "nay."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement with reference to my pair and its transfer as on the last vote, I vote "nay."

The roll call was concluded.

Mr. LODGE. Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. CARAWAY. I wish to announce that my colleague the senior Senator from Arkansas [Mr. ROBINSON] is absent on official business. He is paired with the senior Senator from West Virginia [Mr. SUTHERLAND]. If my colleague were present and permitted to vote, he would vote "yea."

Mr. JONES of Washington (after having voted in the negative). Has the Senator from Virginia [Mr. SWANSON] voted?

The PRESIDENT pro tempore. He has not voted.

Mr. JONES of Washington. The Senator from Virginia is necessarily absent. I am paired with him for the afternoon. I find, however, that I can transfer that pair to the Senator from Colorado [Mr. PHIPPS], and I do so, and allow my vote to stand.

Mr. ERNST (after having voted in the negative). I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Iowa [Mr. RAWSON] and allow my vote to stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. ROBINSON]; and

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON].

The result was announced—yeas 16, nays 36, as follows:

YEAS—16.

Ashurst	Fletcher	Overman	Simmons
Caraway	Harris	Pomerene	Trammell
Cummins	Heflin	Ransdell	Walsh, Mass.
Dial	Jones, N. Mex.	Sheppard	Walsh, Mont.

NAYS—36.

Ball	Ernst	Lenroot	Newberry
Brandegee	France	Lodge	Oddie
Broussard	Frelinghuysen	McCumber	Pepper
Bursum	Gooding	McKinley	Smoot
Calder	Hale	McLean	Stanfield
Cameron	Harreld	McNary	Sterling
Capper	Jones, Wash.	Moses	Warren
Curtis	Kendrick	Nelson	Watson, Ind.
du Pont	Keyes	New	Willis

NOT VOTING—44.

Borah	Hitchcock	Norris	Smith
Colt	Johnson	Owen	Spencer
Crow	Kellogg	Page	Stanley
Culberson	King	Phipps	Sutherland
Dillingham	Ladd	Pittman	Swanson
Edge	La Follette	Poindexter	Townsend
Elkins	McCormick	Rawson	Underwood
Fernald	McKellar	Reed	Wadsworth
Gerry	Myers	Robinson	Watson, Ga.
Glass	Nicholson	Shields	Weller
Harrison	Norbeck	Shortridge	Williams

So Mr. SHEPPARD'S amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 163, line 23, before the words "per cent," to strike out the figures "35" and to insert the figures "55," so as to read:

PAR. 1208. Knit fabrics, in the piece, composed wholly or in chief value of silk, 55 per cent ad valorem.

Mr. SHEPPARD. I move to amend the committee amendment, on page 163, line 23, before the words "per cent," by striking out the numerals "55" and inserting in lieu thereof the numerals "50." I shall not ask for a roll call on this amendment to the committee amendment, but shall do so on the last committee amendment in the paragraph.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Texas to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in the same paragraph on the same page, in line 25, before the words "per cent," to strike out the numerals "40" and to insert the numerals "60," so as to read:

Knit underwear, hose, half hose, and gloves, finished or unfinished, composed wholly or in chief value of silk, 60 per cent ad valorem.

Mr. SHEPPARD. I move to amend the committee amendment, in line 25, by striking out the rate of 60 per cent and inserting in lieu thereof the rate of 50 per cent.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Texas to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in the same paragraph, on page 164, line 3, before the words "per cent," to strike out the numerals "40" and to insert in lieu thereof the numerals "60," so as to read:

valorem; outerwear and other goods, knit or crocheted, finished or unfinished, composed wholly or in chief value of silk, 60 per cent ad valorem.

Mr. SHEPPARD. I move to amend the committee amendment by substituting the rate of 50 per cent ad valorem for the rate of 60 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Texas to the amendment of the committee.

Mr. SHEPPARD. Mr. President, since 1913 the silk knit goods industry has enjoyed a protection under the existing law of 50 per cent. Under that law, with a 50 per cent protection, that industry has multiplied itself nearly six times. In view of that fact, what excuse can be offered for an increase in the rate of from 10 to 20 per cent?

These silk goods comprise many articles in general use, such as hosiery, outer wear, sweaters, scarfs, gloves, underwear, neckties, knit fabrics, threads, yarns, and so forth. Neckties may not be said to be a necessity, but undoubtedly they are an article of common and general use. The imports of these goods are so slight as not to be worth mentioning. In 1914 the imports were less than one-half of 1 per cent of the domestic output; in 1916 they were one one-hundredth of 1 per cent of the domestic output; the industry has a position of absolute security against foreign competition, and yet we are asked here

to vote for an increase of from 10 to 20 per cent in the tariff duties on these articles of common and general use.

Mr. WALSH of Massachusetts. From what countries do the imports come?

Mr. SHEPPARD. The imports come principally from Europe, but they are confined to high-grade specialties and novelties that are not made in this country. I ask for the yeas and nays on my amendment to the committee amendment.

Mr. McLEAN. Mr. President, the Reynolds report justifies an ad valorem rate of 55 per cent to 103 per cent. Of course the labor cost is more in many instances in the case of these goods than in the manufacture of woolen goods. The importations come from Germany, and they were considerable before the war. The potential competition is very alarming, and if Germany sees fit to resume the exports which she sent to this country before the war the competition will be serious; but more important than that, Mr. President, if people want to buy imported silk underwear and silk stockings, it seems to me there is no reason why they should not pay a duty of 60 per cent.

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Texas to the amendment reported by the committee on which the yeas and nays are demanded. Is the demand seconded?

The yeas and nays were ordered.

Mr. SHEPPARD. Mr. President, I wish to add to what I have already said that this industry has not only enjoyed the wonderful growth which I have described but is now building a substantial export trade. I do not see how Senators can vote for increased duties in the face of the facts.

Mr. SIMMONS. Mr. President, I merely desire to insert in the RECORD certain data with reference to this paragraph, which have been furnished me by the expert and which throw a great deal of light on the subject and confirm the statements made by the Senator from Texas [Mr. SHEPPARD].

While we imported practically no silk gloves at all in 1919, we produced $13,915,000 worth. With reference to silk hosiery, during the first five months of the year 1922 we exported $1,049,642 worth of silk hosiery, and there were practically no imports whatever.

Mr. President, I do not see the good of extended discussion of the paragraph. It is evident that through some influence or some adjustment that element of the Republican Party which has been protesting against the excessive rates in the bill have been quieted, and that any effort on our part, by discussion or by exposure or by demonstrating the absurdity and the preposterous character of the proposition, directed toward reducing the unnecessary increases in the present rates, which have given the producers in this country absolute control of this article, exempting them almost entirely from foreign competition, would fail to secure any cooperation from the other side.

Mr. President, I do not wish to take the time of the Senate to discuss this paragraph, but I ask permission to incorporate in the RECORD as a part of my remarks the statement to which I have referred.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement referred to is as follows:

PARAGRAPH 1208.

SILK-KNIT FABRIC, IN THE PIECE.

Rate: Act of 1913, 45 per cent (par. 318); Senate amendment, 55 per cent.

Silk-knit fabric may be made on warp or on weft knitting machines. Generaly speaking, the greater speed of production makes the conversion costs on knit fabrics less than on woven fabrics. Fine warp knit-silk fabric, known as Milanese, tricot, "glove" silk, or Italian silk, is used for underwear, gloves, and hosiery.

Production for sale by mills amounted to $2,739,000 in 1914 and $6,437,000 in 1919. A considerable quantity is cut up by the mills. The quantity and variety handled by retail stores is increasing.

No import statistics. None had been imported up to spring of 1921.

SILK-KNIT UNDERWEAR.

Rate: Act of 1913, 50 per cent; Senate amendment, 60 per cent.

Practically all the silk underwear is women's "glove" silk; only a relatively small amount of ribbed-silk underwear is made or used in this country.

Value of production of silk-knit underwear.

1904	$455,612
1909	948,292
1914	2,807,914
1919	13,747,121

Imports, not recorded separately (see below), are negligible. No "glove" silk underwear is imported.

Exports of silk underwear, including both woven and knit, were first recorded in January, 1922. For the first three months of 1922 they were valued at $16,514.

SILK HOSIERY.

Rate: Act of 1913, 50 per cent; Senate amendment, 60 per cent.

Production of silk hosiery.

	Quantity (dozen pairs).	Value.
1904	42,065	$522,203
1909	434,414	3,600,416
1914	8,710,209	29,971,695
1919	17,204,013	128,126,161

Imports not recorded separately (see below). Some French goods usually in gauges finer than any made in this country are imported.

Exports, not recorded prior to January, 1922, amounted to $1,049,642 for the first five months of 1922.

Production of silk gloves.

Rate: Act of 1913, 50 per cent; Senate amendment, 60 per cent.

Silk gloves are made from fine-warp knit fabric.

	Quantity (dozen pairs).	Value.
1914	.....	$4,683,479
1919	2,307,805	13,915,321

American silk gloves are considered superior to the foreign, hence none are imported.

SILK KNIT OUTERWEAR.

Rate: Act of 1913, 50 per cent; Senate amendment, 60 per cent.

This is an industry of comparatively recent growth. Production in 1914 amounted to $303,510 and in 1919 to over $40,000,000. Imports have been negligible. Specialties in sweaters and elaborately designed scarfs have come from Switzerland. The industry is new in other countries as well as in the United States.

Total imports of silk knit goods.

Fiscal years:	
1913	$250,794
1914	181,135
1919	29,080
1920	108,500
1921	164,017
1922 (January–March)	93,081

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Texas [Mr. SHEPPARD] to the amendment reported by the committee, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as to my pair and transfer as on former ballots, I vote "yea."

Mr. HALE (when his name was called). Making the same announcements as before with reference to my pair and its transfer, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on previous votes with reference to my pair and its transfer, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the previous ballot with regard to the transfer of my pair, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last roll call, I vote "nay."

The roll call was concluded.

Mr. SIMMONS. I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. In his absence from the Chamber I transfer that pair to the senior Senator from Montana [Mr. MYERS] and will vote. I vote "yea."

The result was announced—yeas 18, nays 35, as follows:

YEAS—18.

Ashurst	Harris	Pomerene	Trammell
Caraway	Heflin	Ransdell	Walsh, Mass.
Cummins	Hitchcock	Sheppard	Walsh, Mont.
Dial	Jones, N. Mex.	Simmons	
Fletcher	Overman	Stanley	

NAYS—35.

Ball	Cameron	France	Jones, Wash.
Brandegee	Capper	Frelinghuysen	Kendrick
Broussard	Curtis	Gooding	Keyes
Bursum	du Pont	Hale	Ladd
Calder	Ernst	Harreld	Lodge

McCumber	Moses	Oddie	Warren
McKinley	Nelson	Smoot	Watson, Ind.
McLean	New	Stanfield	Willis
McNary	Newberry	Sterling	

NOT VOTING—43.

Borah	Johnson	Owen	Smith
Colt	Kellogg	Page	Spencer
Crow	King	Pepper	Sutherland
Culberson	La Follette	Phipps	Swanson
Dillingham	Lenroot	Pittman	Townsend
Edge	McCormick	Poindexter	Underwood
Elkins	McKellar	Rawson	Wadsworth
Fernald	Myers	Reed	Watson, Ga.
Gerry	Nicholson	Robinson	Weller
Glass	Norbeck	Shields	Williams
Harrison	Norris	Shortridge	

So Mr. SHEPPARD's amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question now is on the amendment of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The ASSISTANT SECRETARY. The next amendment is in paragraph 1209, page 164, line 6, where the committee proposes to strike out "33⅓" and in lieu thereof to insert "55," so as to read:

Handkerchiefs and woven mufflers, composed wholly or in chief value of silk, finished or unfinished, not hemmed, 55 per cent ad valorem—

And so forth.

Mr. SHEPPARD. Mr. President, I move to strike out "55 per cent ad valorem" and to insert in lieu thereof "40 per cent ad valorem."

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Texas to the amendment of the committee.

Mr. SHEPPARD. Mr. President, no question of protection is involved in this paragraph. The handkerchiefs referred to are women's handkerchiefs of the cheaper grades, a grade of light-weight silk, and are imported entirely from Japan, whence 90 per cent of the supply of the United States is derived, and in fact where 90 per cent of the world's supply originates. It is merely a question of revenue. There is no separate silk-handkerchief industry in the United States. Such silk handkerchiefs as are made here are made in connection with other silk industries. It is difficult to see, therefore, why there should be an increase in duty, especially an increase from 40 to 55 per cent, on these cheap silk handkerchiefs. Their wholesale price delivered in the United States from Japan is $1 per dozen. Here is a case where an increase in rate would undoubtedly lessen the revenue. The only object of imposing the rate is revenue, and certainly there can be no reason for the increase.

I ask therefore that the existing rate of 40 per cent be retained on this cheap article, this article that is now within the reach of the masses. It may be called an article of luxury, but it is an article of common use and a luxury which, if not increased in price, will be within the reach of the people at large.

I trust, therefore, that the present rate of 40 per cent will be retained.

Mr. McLEAN. Mr. President, here we have an article of which 50 per cent of the consumption is imported. The Senator from Texas thinks there should not be any protection on *this article*. He has argued heretofore that we do not need any protection where the importations are small. I confess that I see no reason why we should not expect to make silk handkerchiefs in this country as well as all other kinds of silk products. The fact is that we can not do it because of these cheap importations from Japan. If anybody is foolish enough to use a silk handkerchief, it seems to me we ought to apply the same rate of duty that we apply on hose and knit wear.

Mr. SHEPPARD. Mr. President, this type of silk handkerchief is not made in the United States, because the American manufacturer has found that he can employ his capital and his machinery to much better advantage in making a higher grade of goods; so no protective purpose whatever can be subserved.

The Senator from Connecticut says that anybody who is foolish enough to buy a handkerchief of this kind ought to pay a rate of 60 per cent. I take the position that here is an opportunity to place a cheap luxury, if you may so call it, within the reach of the masses, and where the purpose of revenue—which is the only purpose to be subserved—may be best accomplished by not increasing the rate.

I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Texas to the amendment of the committee, on which the yeas and nays have been demanded and ordered. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former ballot as to my pair and transfer, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "nay."

Mr. SIMMONS (when his name was called). Making the same announcement of my pair and its transfer as on the previous vote, I vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as before, I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement with regard to the transfer of my pair as on the previous ballot, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. HARRISON. I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Missouri [Mr. REED] and vote "yea."

The result was announced—yeas 18, nays 36, as follows:

YEAS—18.

Ashurst	Harrison	Pomerene	Trammell
Caraway	Heflin	Ransdell	Walsh, Mass.
Dial	Hitchcock	Sheppard	Walsh, Mont.
Fletcher	Overman	Simmons	
Harris	Pittman	Stanley	

NAYS—36.

Ball	du Pont	Lodge	Nicholson
Brandegee	Ernst	McCumber	Oddie
Broussard	France	McKinley	Pepper
Bursum	Gooding	McLean	Smoot
Calder	Hale	McNary	Stanfield
Cameron	Jones, Wash.	Moses	Sterling
Capper	Kendrick	Nelson	Warren
Cummins	Keyes	New	Watson, Ind.
Curtis	Ladd	Newberry	Willis

NOT VOTING—42.

Borah	Harreld	Norris	Spencer
Colt	Johnson	Owen	Sutherland
Crow	Jones, N. Mex.	Page	Swanson
Culberson	Kellogg	Phipps	Townsend
Dillingham	King	Poindexter	Underwood
Edge	La Follette	Rawson	Wadsworth
Elkins	Lenroot	Reed	Watson, Ga.
Fernald	McCormick	Robinson	Weller
Frelinghuysen	McKellar	Shields	Williams
Gerry	Myers	Shortridge	
Glass	Norbeck	Smith	

So Mr. SHEPPARD's amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 164, line 7, to strike out "40" and insert "60," so as to read:

Hemmed or hemstitched, 60 per cent ad valorem.

Mr. SHEPPARD. I move to insert "55" instead of "60."

The amendment to the amendment was rejected.

The amendment was agreed to.

The next amendment was, on page 164, after line 7, to strike out:

PAR. 1210. Shirt collars, composed in whole or in part of silk, whether natural or artificial, 50 cents per dozen and 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 164, after line 10, to strike out:

PAR. 1211. Shirts, for men and boys, in whole or in part of silk, whether natural or artificial, 40 per cent ad valorem, but not less than 10 per cent in addition to the duty on the component materials.

The amendment was agreed to.

The next amendment was, on page 164, line 15, after the word "clothing," to strike out "ready made,"; in line 18, before the words "per centum," to strike out "40" and to insert "60"; and in line 19, after the word "valorem," to strike out the colon, so as to read:

PAR. 1212. Clothing and articles of wearing apparel of every description, not knit or crocheted, manufactured wholly or in part, composed wholly or in chief value of silk, and not specially provided for, 60 per cent ad valorem.

Mr. SHEPPARD. I move to insert "50" in lieu of "60." This type of silk product embraces practically every kind of male and female ready-made wearing apparel. It is beyond the reach of foreign competition of any character whatever. It has developed a considerable export trade. The exports of these products from the United States have grown from $2,556,166 in 1918, the first year they were officially reported, to $10,016,045 in 1920.

The Tariff Commission states that the domestic industry supplies nearly all the domestic consumption. The commission says, further, in a special report on this industry that the efficiency of American labor offsets the difference in wages paid at home and abroad, and that other conditions are at least equal; that women's wearing apparel is imported from France chiefly for ideas and not for sale and in deference to the world ascendency of Paris in the matter of style.

Under the high Democratic rate of 50 per cent this industry has been securely established, established beyond all reach of foreign competition, an industry which produces articles of general and common use throughout the United States. Any increase in rate, therefore, is without justification. I shall not ask for a roll call, but will be content with a viva voce vote.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on agreeing to the amendment of the Senator from Texas to the committee amendment.

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The next amendment was, on page 164, line 19, after the word "valorem," to strike out the following proviso:

Provided, That articles composed wholly or in chief value of any of the materials or goods dutiable under this paragraph shall pay not less than the rate of duty imposed upon such materials or goods by this title.

The amendment was agreed to.

The next amendment was, on page 164, line 25, before the words "per cent," to strike out the figure "35" and to insert "60," so as to make the paragraph read:

PAR. 1213. All manufactures of silk, or of which silk is the component material of chief value, not specially provided for, 60 per cent ad valorem.

Mr. SHEPPARD. I move to strike out "60" and insert in lieu thereof "45."

This paragraph is known in tariff terminology as the "catch-all" clause, the basket clause. It is well named when you apply to it the name of "catch-all," because it catches everything in sight, and some things not in sight.

This paragraph is inserted here for fear that some article made wholly of silk or partly of silk might escape the claws of the taxgatherer. The increase from 45 to 60 per cent is beyond all reason. I want to read a telegram from a representative silk concern, the Lenape Silk Co., of East Stroudsburg, Pa., sent to a number of Republican Senators, which reads as follows:

We understand you have temporarily placed a 55 per cent catch-all clause—

As a matter of fact, the committee has made it 60 per cent—

as a minimum rate on silk piece goods in the silk schedule. This is all wrong. It is excessive and hurts our industry by the prohibition of French imports. We insist upon 45 per cent as ample protection and no higher.

The American silk industry, under a minimum Democratic tariff rate of 45 per cent, has registered a progress absolutely unparalleled in financial and economic annals. During the life of this Democratic tariff law, imposing a minimum rate of 45 per cent on silk goods, the rate rising to 50 and 60 per cent on many types of silk goods, the industry has grown from a domestic production valued at $295,000,000 in 1914 to $895,000,000 in 1919, and the growth continues. If there is an industry in the United States which has made signal progress and which has no claim to higher protection it is the silk industry of the United States.

In addition to this protection of 45 per cent on the finished product it has had the privilege of importing all its raw material free of tariff charges. The American silk industry is to-day the greatest silk industry on earth. It has surpassed the historic silk industries of France and of other countries. It is the third largest textile industry in the United States.

So, Mr. President, voicing my protest against an increase of duty where an industry has become so prosperous as has the American silk industry, I ask for the yeas and nays on the maintenance of the existing rate of 45 per cent on all articles not specially provided for.

Mr. WALSH of Montana. Mr. President, I observe that the Senator from Connecticut has twice endeavored to get the ear of the Chair in order to make some kind of an explanation as to why this rate should be charged. The Chair overlooked him. It would be a real service if the Senator would give the Senate some reasons for this increase.

Mr. McLEAN. Mr. President, I shall be very glad to do so. It must be apparent that these imports are made of goods which bear a 60 per cent ad valorem rate. Take a jewelry box, for instance, made of silk. The silk in that box bears a rate of 60 per cent, and there is no reason why the box should not carry the same rate.

The imports have been large. In 1918 they were $476,000, in 1919 they were $602,000, in 1920 they were $1,183,000, and in 1921 they were $1,035,000. These goods are luxuries, and it would be unreasonable to impose a rate upon the articles in this paragraph lower than 60 per cent.

The Reynolds report on these articles warrants a rate of 100 per cent ad valorem on the importations.

Mr. SHEPPARD. Mr. President, the explanation of the Senator from Connecticut is an explanation which in my judgment does not explain. He said something about articles already bearing a rate of 60 per cent ad valorem. The object of this paragraph is to take care of those articles which have not been given a rate at all. That is the reason the paragraph is called a basket clause.

Mr. McLEAN. If a jewelry box is made out of velvet, that velvet, if it came in as cloth, would pay a rate of 60 per cent. Why should they not pay the same rate if it is manufactured in a jewelry box?

Mr. SHEPPARD. This paragraph would not cover an article which was already taxed; otherwise it would not be a basket clause at all.

Mr. McLEAN. It would cover the article made from the silks, of course.

Mr. SHEPPARD. Very well. I understand that. But I have contended all through the schedule that we should substitute for the very high rates of the Senate Finance Committee the rates of the Democratic tariff law, and consequently I offered that rate here. The reply of the Senator is, therefore, no just criticism of my proposal to substitute 45 per cent for 60 per cent. Neither has the Senator attempted to justify in his reply to the Senator from Montana [Mr. WALSH] the increases which have been made in the rates of the silk schedule.

I want to add that silk is becoming more and more a material of general and common use. I have already shown that it is a prime necessity in time of war; that it is a necessary material in the making of bags for powder. I have already shown that it is a necessary material in coverings which insulate every electric wire in the country, and that thus it is a prime necessity of American industry. In addition to that, surgical thread, used in operations on the human body, where life itself is frequently in the balance, is made of silk. Many essential medical supplies are made wholly or in part of silk. Household furnishings, imitation seals and furs, and standard dress goods I have already referred to. Even the linings of the cheap coffins are made of silk, affording people of limited means an opportunity to pay a tribute of tenderness and honor to their beloved dead.

So there is something more than the mere idea of luxury in the silk schedule. I have been astounded at the position taken by the Senator from Connecticut on some of these articles when he pronounces them luxuries and says if people are foolish enough to buy such articles they ought to be subject to a tax so high that they may be said to be penalized.

Mr. WALSH of Massachusetts. Mr. President, may I inquire of the Senator from Texas if there have been any sort of importations of these articles in recent months?

Mr. SHEPPARD. There has been no flood of importations. In fact, the command of the home market which the silk industry enjoys is shown by the fact that the importations in 1914 had a value of only $34,000,000, as compared to a total output of nearly $300,000,000, and that those imports only increased to $53,000,000 in 1919, whereas the total production increased to nearly $900,000,000. So the Senator can see that the imports have proportionately decreased during the last seven or eight years, while the production of the finished product has had an enormous increase.

Mr. WALSH of Massachusetts. Does the record of 1921 correspond with the record of 1914 and 1919?

Mr. SHEPPARD. The record of 1921 shows the volume of importations of the raw materials of the silk industry has continued to increase. While there have been no official figures as to manufactured products since 1919, we have the official figures as to the importations of raw materials, and those importations have continued to multiply on an advancingly rapid scale.

Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as to my pair and transfer as on the former ballot, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as to my pair as before, I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my general pair as on the previous vote, I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the previous ballot in regard to the transfer of my pair, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before. I vote "nay."

The roll call was concluded

Mr. SIMMONS (after having voted in the affirmative). I have a pair, but I have heretofore announced the transfer of that pair. Making the same statement as to my pair and transfer, I let my vote stand.

Mr. STERLING (after having voted in the negative). Making the same announcement as on the previous vote, I will let my vote stand.

The result was announced—yeas 18, nays 36, as follows:

YEAS—18.

Ashurst	Harrison	Pomerene	Trammell
Caraway	Heflin	Ransdell	Walsh, Mass.
Dial	Hitchcock	Sheppard	Walsh, Mont.
Fletcher	Overman	Simmons	
Harris	Pittman	Stanley	

NAYS—36.

Ball	Ernst	McCumber	Oddie
Brandegee	Frelinghuysen	McKinley	Pepper
Broussard	Gooding	McLean	Smoot
Bursum	Hale	McNary	Spencer
Calder	Jones, Wash.	Moses	Stanfield
Cameron	Kendrick	Nelson	Sterling
Capper	Keyes	New	Warren
Curtis	Ladd	Newberry	Watson, Ind.
du Pont	Lodge	Nicholson	Willis

NOT VOTING—42.

Borah	Glass	Norbeck	Smith
Colt	Harreld	Norris	Sutherland
Crow	Johnson	Owen	Swanson
Culberson	Jones, N. Mex.	Page	Townsend
Cummins	Kellogg	Phipps	Underwood
Dillingham	King	Poindexter	Wadsworth
Edge	La Follette	Rawson	Watson, Ga.
Elkins	Lenroot	Reed	Weller
Fernald	McCormick	Robinson	Williams
France	McKellar	Shields	
Gerry	Myers	Shortridge	

So the amendment of Mr. SHEPPARD to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. The next amendment is, on page 165, line 2, after the word "this," to strike out "title" and to insert "schedule," so as to make the paragraph read:

PAR. 1214. In ascertaining the weight or number of silk under the provisions of this schedule, either in the threads, yarns, or fabrics, the weight or number shall be taken in the condition in which found in the goods, without deduction therefrom for any dye, coloring matter, or moisture, or other foreign substance or material. The number of single threads to the inch in the warp provided for in this title shall be determined by the number of spun or reeled singles of which such single or two or more ply threads are composed.

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 165, line 11, after the words "PAR. 1215," to insert "Partially manufactured artificial silk waste, 35 cents per pound."

Mr. SMOOT. Mr. President, the chairman of the committee sent to the desk on July 29 an amendment to this paragraph. There are two changes in it which I desire to submit and then offer it as a substitute for paragraph 1215 as originally reported.

On page 2 of the amendment as printed, in line 7, the word "cellulose" is incorrectly spelled. It should be corrected. Then, in line 11, "40 per cent ad valorem" should read "50 per cent ad valorem." I ask that the Secretary report the amendment as modified and then I shall be glad to explain it.

The ASSISTANT SECRETARY. On page 165 strike out lines 11 to 22, both inclusive, and insert in lieu thereof the following:

PAR. 1215. Artificial silk waste, 10 cents per pound, but not less than 15 per cent ad valorem; artificial silk waste not further advanced than sliver or roving, 20 cents per pound, but not less than 25 per cent ad valorem; yarns made from artificial silk waste, if singles, 25 cents per pound; if advanced beyond the condition of singles by grouping or twisting two or more yarns together, 30 cents per pound; yarns, threads, and filaments of artificial or imitation silk, or of artificial or imitation horsehair, by whatever name known and by whatever process made, if singles, 45 cents per pound; if advanced beyond the condition of singles by grouping or twisting two or more yarns together, 50 cents per pound; products of cellulose, not compounded, whether known as visca, cellophane, or by any other name, such as are ordinarily used in braiding or weaving and in imitation of silk, straw, or similar substances, 55 cents per pound; but none of the foregoing yarns, threads, or filaments, or products of cellulose shall pay a less rate of duty than 35 per cent ad valorem. Knit goods, ribbons, and other fabrics and articles composed wholly or in chief value of any of the foregoing, 45 cents per pound and 50 per cent ad valorem.

Mr. SHEPPARD. Does the Senator wish to discuss the amendment?

Mr. SMOOT. Yes.

Mr. SHEPPARD. In the last line of the amendment I move to strike out "45" and to insert "40." Let me say by way of explanation that in this instance the Senate Finance Committee has recommended a slight decrease in existing rates on the finished product.

Mr. SMOOT. May I just explain the amendment I have submitted? The original amendment as offered on "knit goods, ribbons, and other fabrics and articles composed wholly or in chief value of any of the foregoing," which means the cellulose compounds or the artificial silk, provided a duty of 45 cents per pound and 40 per cent ad valorem.

Mr. SHEPPARD. That is really a reduction of the existing rate.

Mr. SMOOT. The existing law provides a rate of 60 per cent upon those goods; 45 cents, Mr. President, on these fabrics, even if they were worth $4.50 a pound, would be 10 per cent, and the addition of 40 per cent would make 50 per cent, or 10 per cent less than they are under existing law.

Mr. SHEPPARD. That is true.

Mr. SMOOT. Therefore I suggest that 40 be increased to 50 and leave the 45 cents specific rate as it is. That will leave the rate exactly as it is under the existing law, being an equivalent of 60 per cent ad valorem. That is about the only change which I have suggested in this amendment. I wish to say to the Senator from Texas, however, that the proposed amendment is much more scientifically framed.

Mr. SHEPPARD. The amendment proposes an increase on certain artificial silk yarns, does it not?

Mr. SMOOT. That rate has been increased very little, for I wish to say to the Senator that at the present prices of yarn the ad valorem rate will be operative in nearly every case. I have here to-day's prices of the yarns.

Mr. SHEPPARD. What is the value of these yarns per pound?

Mr. SMOOT. I will say to the Senator from Texas that the prices of imitation horsehair and imitation silk run about a dollar a pound; yarns made from artificial silk waste, singles, are about 80 cents a pound; if advanced beyond the condition of singles by grouping or twisting two or more yarns together made from artificial silk waste, the price is from 80 to 95 cents a pound. The Senator will therefore notice that according to those values the ad valorem rate mentioned in each case will be the rate that will be operative. I repeat that as the paragraph is now written it is far better than the provision of the existing law, of the Payne-Aldrich law, or the paragraph as originally reported to the Senate by the Committee on Finance.

Furthermore, as the paragraph is now written we can secure all the information in reference to importations and know just what is coming in, but under the law to-day that can not be done. For statistical purposes the form of the paragraph as now proposed is very much better.

Mr. SHEPPARD. What is the equivalent ad valorem of the rates of 45 cents a pound and 50 cents a pound and 55 cents a pound proposed by this amendment on various artificial silk yarns?

Mr. SMOOT. Of the 45 cents per pound rate, the equivalent ad valorem rate to-day is 30 per cent—and of course the 35 per cent bracket would catch it. Of the 50 cents per pound rate the equivalent ad valorem rate would be 27 per cent, and of the 55 cents per pound rate the equivalent ad valorem rate would be only 15 per cent.

Mr. SHEPPARD. Does that mean a lower rate than the present one on these yarns?

Mr. SMOOT. If it were not for the provision that the rate shall not be less than 35 per cent, of course the rates would all be less. But at some time in the future, if the price of yarns fall, then of course the rate will not be less. Therefore, it is a far better provision in order to take care of future conditions than the one originally reported. In other words, out of this schedule we have taken all of the specific rates, with the ex-

ception, I think, of two paragraphs, paragraph 1206, covering plushes, and one other. I can not see why the specific rates should not be taken out of those paragraphs and only ad valorem rates provided. There is, however, one reason, but I thought it was not sufficient to prevent me from expressing the opinion at least that I should prefer a straight ad valorem duty.

Mr. SHEPPARD. Mr. President, I desire to submit this observation regarding the present amendment: This is a branch of the silk industry which has enjoyed the rapid growth that has characterized the other branches of the silk industry under existing tariff rates. The artificial-silk industry has multiplied itself fifteen times under the existing tariff law in less than a decade. The Committee on Finance very wisely has proposed a decrease in the rate on the finished product of the artificial-silk industry. The Senator from Utah [Mr. SMOOT], evidently being unable to tolerate such a thing as a decrease, has offered an amendment making the rate equal to the existing rate. The Senate Finance Committee ought to have taken the same course with regard to all the other branches of the silk industry, because they all are largely in the same position in so far as growth under the present tariff rates is concerned. None of them presents a proper case for an increase of duty. I congratulate the committee on not offering to increase the rates on the products of this branch of the silk industry. This action stands out in strange contrast to its course as to other silk products. I shall not ask for a yea-and-nay vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Utah [Mr. SMOOT] on behalf of the committee.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I notice in the New York Herald of to-day, August 1, 1922, an article headed:

New woolen prices suprisingly low. Reductions from last year named in women's wear fabrics for spring.

I have noticed editorials in that newspaper in which it is stated that the rates proposed on women's woolen fabrics would result in large increases in the prices of clothing to the American consumer. In the same paper, however, I find here under the heading indicated, "Woolen prices surprisingly low," an article to one statement of which I desire to call attention, as follows:

It was generally believed in the trade that the American Woolen Co.'s prices on the women's wear fabrics would at least be above last year's figures, in view of the fact that the primary market had risen steadily since last year. The new values probably will cause some downward revision of prices by other independent factors, it is believed in the trade.

I ask that the article, together with the prices upon the commodities named therein, may be printed in the RECORD without reading.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEW WOOLEN PRICES SURPRISINGLY LOW—REDUCTIONS FROM LAST YEAR NAMED ON WOMEN'S WEAR FABRICS FOR SPRING.

The American Woolen Co. opened yesterday its complete line of women's wear woolen and worsted fabrics for next spring for the coat, suit, and dress trades. Even more surprising to the trade than the opening of the men's wear lines on July 17, when prices were found to be but slightly higher than last spring, were the comparatively low prices named on the lines shown yesterday.

Values named on the best selling or repeat numbers were from 1½ to 5 per cent lower than prices prevailing at the last spring opening, despite the fact that raw wool quotations have jumped more than 100 per cent on the finer and medium grades in the last year.

It was generally believed in the trade that the American Woolen Co.'s prices on the women's wear fabrics would at least be above last year's figures, in view of the fact that the primary market has risen steadily since last year. The new values probably will cause some downward revision of prices by other independent factors, it is believed in the trade.

Velours and tricotine worsteds were shown at prices which were the lowest for any spring opening in the company's history. Prices on the less important constructions were figured at a slightly higher plane than last spring. The standard 0417, which is the popular Normandy cloth, was figured at $3.12½ a yard, contrasted with $3.27½ last spring. This represents a decline of 4.7 per cent. The 0453 number, which is the Elysia, was shown at $3.02½ a yard, as against $3.10 last year, which is a reduction of 2.4 per cent. The 0481, or Shawsheen cloth, was opened at $3.15 a yard, compared with $3.20 last spring, which is a concession of 1.6 per cent.

The showing was said to be one of the largest for department 4. There was an extensive line of Polaires shown, ranging in weight from 14 to 20 ounces and in prices from $1.22½ to $2.45 a yard. A much larger line of fabrics for sports wear also was displayed. Polaires in small and large checks and diagonal patterns, weighing from 14 to 16 ounces, were priced at $1.42½ a yard. This showing included tweeds for suitings and coats and reversible plaid-back suitings, which are new departures for the company.

The department was fairly filled with buyers from the early morning to the close of the afternoon. Several leading houses placed large orders for various fabrics, while purchasing from other buyers was also brisk and in substantial volume.

The balance of men's wear lines will be shown to-day.

Subjoined is a list of some of the fabrics shown, with their style, numbers, weight, and price per yard:

Spring fabric prices.

TRICOTINES.

Style.	Weight.	Price.
	Ounces.	
0537	9½	$1.70
117	10	2.30
09172	11	2.40
09183	10½	2.50
VELOURS.		
1310	10	$1.27½
13909	10	1.42½

POLAIRES.		
132016	16	$1.22½
11196	14	1.27½
131514	14	1.32½

Mr. FLETCHER. Mr. President, referring to the statement of the Senator from Utah regarding the woolen-goods situation, the papers show that there has been a great increase in the trade in woolens—enormous buying of woolens. That would seem to indicate that the importers expect the price to go up, and are therefore making their purchases now. They evidently expect that the effect of this bill will be to increase the price of those woolen goods.

Mr. SMOOT. Mr. President, that is a strange argument. We have been hearing for about two weeks that there were no purchases abroad and no importations. I want to say, as I have said before, that the prices of woolen goods are lower than the prices at the last openings, and they were under existing law. These goods mentioned in the newspaper article will not be made for six months. They will be made and sample pieces delivered perhaps in six months from to-day, and then the delivery of the whole order will extend for three months longer.

Mr. FLETCHER. They are being purchased now because they expect prices to go up after this bill is passed.

Mr. SMOOT. Mr. President, these are American prices, sold in America for future delivery.

The next amendment of the Committee on Finance was, in Schedule 13, on page 165, line 23, in the subhead before the word "papers," to insert "pulp," so as to read: "Schedule 13.—Pulp, papers, and books."

Mr. WALSH of Montana. Mr. President, my attention was diverted for a moment. I will ask that the amendment may be again stated.

The PRESIDING OFFICER. The amendment will be again stated.

The Assistant Secretary again stated the amendment.

Mr. WALSH of Montana. I have no objecton to that amendment.

The PRESIDING OFFICER. Without objection, the amendment to the subhead will be agreed to.

Mr. McCUMBER. Mr. President, before the Senator from Montana proceeds with the discussion, if it is entirely agreeable to him I will ask to have inserted in the RECORD at this point certain tables bearing upon importations of chemical pulp and other pulp into the United States.

Mr. WALSH of Montana. That is entirely satisfactory to me.

Mr. McCUMBER. I will ask, first, to have printed in the RECORD a table showing the imports of pulp and the proportionate part of the total imports which were made of chemical pulp, from 1910 to 1921, inclusive, and also the domestic production of chemical wood pulp from 1917 to 1920, inclusive, showing the imports and the percentage of imports to domestic production. I also ask to have printed in the RECORD a table showing the imports of chemical wood pulp from 1918 to 1921, inclusive.

The PRESIDING OFFICER. Without objection, it is so ordered.

The tables referred to are as follows:

CHEMICAL WOOD PULP.

United States imports of pulp and the proportionate part of total imports that was chemical pulp.

	Total tons.	Chemical percentage of total.
1910	377,000	62.1
1911	488,000	52.3
1912	483,000	50.6
1913	500,000	67.5
1914	510,000	69.0
1915	588,000	68.5
1916	514,000	62.5
1917	698,000	61.3

CHEMICAL WOOD PULP—continued.

United States imports of pulp, etc.—Continued.

	Total tons.	Chemical percentage of total.
1918	505,000	62.2
1919	478,000	64.8
1920	727,000	73.3
1921	504,000	71.6

United States production of chemical wood pulp.

	Tons.	Imports, in percentage of production.
1917	1,973,986	35.3
1918	1,949,357	25.9
1920	2,008,647	36.1

Imports of chemical wood pulp, 1918-1921.

Article.	1918		1919		1920		1921	
	Tons.	Dollars.	Tons.	Dollars.	Tons.	Dollars.	Tons.	Dollars.
Unbleached sulphate	106,037	7,971,067	130,278	9,048,537	163,122	17,025,709	155,361	10,863,804

Mr. McCUMBER. Mr. President, I should like to present a few other facts concerning chemical wood pulp.

Mr. LODGE. Mr. President, if the Senator from North Dakota will allow me before he makes his statement, I desire to say something as to chemical wood pulp, and so does the Senator from Maine; but I shall not be ready to go on to-morrow, and I should like to have it put over for a day.

Mr. McCUMBER. Mr. President, there are Senators on the other side who are ready to speak, but I will allow the paragraph to go over when they have concluded.

Mr. President, the chemical-pulp industry is one that is very important to the United States, and if the example of our manufacturers in Maine, the State ranking first in the production of chemical pulp, is followed the United States can produce indefinitely all of this pulp required. In that State a certain acreage of timber is cut each year, which is fixed by reforestation that the timber resources of that State are steadily increasing. All suitable logs cut are converted into timber and lumber. The remaining, together with all parts of the trees cut, too small for use in making lumber are converted into pulp. Even the bark and sawdust are used as fuel, so there is no waste.

The chemical-pulp industry in 1921 was employing, roughly, 20,000 men at the mills and 10,000 men in the woods. It has invested $233,000,000 of capital, and converts a raw material into this pulp that is of no use in any other industry, and of which there is a sufficient supply in the United States (p. 4523 of hearings). This pulp can be made from practically any kind of wood, even from wood not suitable for any other purpose, even fuel. The refuse of the lumber mills—parts of trees too small for lumber, small second-growth timber from 5 inches in diameter up. Some 60 per cent of the cost of this pulp represents labor.

The daily capacity of the United States mills is about 9,300 tons of chemical pulp; or, working at normal capacity, 2,500,000 tons of chemical pulp per annum. Foreign pulp is causing many of our mills to close or run on part time. (Appendix A to brief of Peter G. Thompson, jr., p. 4529 of hearings, as follows:)

In making newsprint or cheap print paper 15 to 20 per cent of unbleached chemical pulp is mixed with mechanical pulp to give strength to the paper. But newsprint paper would not be affected by a duty on chemical pulp, for three reasons:

1. Practically all American mills that make newsprint paper manufacture their own pulp.

2. At least 80 per cent of these mills manufacture the chemical pulp they use. They do not buy this pulp but manufacture a surplus and offer it for sale.

3. Newsprint paper and mechanical pulp come into the United States free of duty.

Certain of our consumers of chemical pulp own grants of Canadian land and manufacture their chemical pulp in Canada and import it into this country.

In 1921 our total importation was $92,372,606 of paper and all manufactures of paper, including books, cards, cigar bands, etc.; $83,629,877 worth came in free, of which $79,123,368 was newsprint paper. Of all other print paper—that containing large quantities of chemical pulp—only $196,000 worth was imported. For the same year, $39,396,249 worth of wood pulp was imported, $9,179,183 of which was chemical pulp, a highly manufactured product coming into direct competition, free of duty, with a great American industry, and steadily driving it into bankruptcy.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. At the beginning of the paper schedule, the committee proposes to insert a new paragraph, as follows:

PAR. 1300. Chemical wood pulp, unbleached or bleached, 5 per cent ad valorem: *Provided*, That if any country, dependency, province, or other subdivision of government shall forbid or restrict in any way the exportation of (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) or impose any export duty, export license fee, or other export charge of any kind whatever, either directly or indirectly (whether in the form of additional charge or license fee, or otherwise), upon printing paper, chemical wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon chemical wood pulp, when imported, either directly or indirectly, from such country, dependency, province, or other subdivision of government, an additional duty equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government, upon either an equal amount of chemical wood pulp or an amount of wood necessary to manufacture such wood pulp, or an amount of printing paper ordinarily manufactured from such chemical wood pulp.

Mr. WALSH of Montana. Mr. President, the commodities with which this schedule deals have in the past given rise to protracted and oftentimes heated controversies, an echo of which was heard in this Chamber only a few days ago. The logic of events, however, has to a very great extent demonstrated the soundness of the contention of those who have insisted upon the introduction of this commodity free, or at a very low rate of duty.

To the almost universal public opinion to that effect the committee framing the measure have to a very great extent yielded—not wholly, but almost—so that to a very large extent the controversies of the past need not be repeated at this time.

Wood pulp is of two general classes—ground pulp and chemical pulp. Ground pulp is made by bringing the wood into contact with whirling grindstones or some similar machinery that reduces it to a pulp form. Chemical pulp, as is suggested by the term, is produced by the utilization of chemicals in the maceration process, chiefly some form of sulphite. Both classes of pulp—ground pulp and chemical pulp—are on the free list in the bill as it came from the House. The Senate committee proposes to leave ground pulp on the free list, but proposes to put a duty of 5 per cent on chemical pulp.

Wood pulp, as is of course well known, is the foundation for most of the paper that is manufactured in this country and abroad. The greater portion of it is consumed in the manufacture of what is known as newsprint. Newsprint is likewise on the free list under the bill as it came from the House and as reported by the Senate committee, so that while the product of wood pulp is on the free list wood pulp itself—that is, the chemical wood pulp—is on the dutiable list, a condition which I apprehend exists with respect to no other commodity mentioned in the bill.

In the manufacture of newsprint paper ground wood pulp is the chief constituent, but in order to make the paper acceptable to the trade about 20 per cent of chemical pulp is necessary. The chemical pulp is used in increasing proportions as the grade of the paper rises, and in the grades of paper above newsprint it becomes a very important element, as indeed it is so far as newsprint is concerned.

The duty, being 5 per cent as prescribed, is equivalent to an ad valorem of about $5 per ton, wood pulp now commanding about $100 a ton, or 5 cents a pound, in the market; so that whatever chemical pulp is introduced into this country bears a duty of practically $5 a ton, the consumption amounting to

600,000 tons a year. This imposes upon the newspaper industry of the country and other forms of manufacture of paper the trifling burden of something like $3,000,000.

Attention has been called by the distinguished chairman of the Finance Committee to the heavy importations of chemical wood pulp. They are very heavy. Perhaps these figures were given in the table submitted by the Senator from North Dakota; but I repeat, for the information of the Senate, that in 1918 our importations of unbleached chemical pulp amounted to $25,000,000, in round figures, and our importations of bleached pulp to $1,800,000. In 1919 the figures were increased to $27,000,000 of unbleached pulp and $4,867,000 of bleached pulp. In 1920 the importations jumped to $54,760,000 of unbleached pulp, and $20,866,777 of bleached pulp. The ground wood-pulp importations increased in the same high proportion—$4,700,000 worth in 1918, $5,000,000 worth in 1919, and $13,800,000 in 1920. So that by the table of production and importations a prima facie case is easily made in favor of a substantial protective tariff upon this particular article; but, Mr. President, other features are to be taken into consideration, and there are other factors in the problem.

To start out with, it will be understood that the sources of wood pulp in this country are limited. Our forests are rapidly disappearing. The alarm has been sounded for the last 20 years. We are expending annually from five to six million dollars in order to preserve the forests which are the property of the United States, not to speak of the enormous sums that are annually expended by the States and by private interests for the protection of the forests.

Our supply of pulp woods, as I have said, is being rapidly exhausted, and we have come to rely to a very large extent upon the abundant forests of Canada for our supply of pulp wood and of wood pulp.

As is well known, Canada has laid an embargo upon the exportation of pulp wood, requiring that it be converted into wood pulp in that country before it can be exported.

The question is presented, then, as one of great public policy, Shall we put a duty upon the production of chemical wood pulp, thus promoting the preservation of our forests, which are rapidly eaten up because the consumption is enormous, or would it be the better public policy to preserve our forests for use in the future, allowing the Canadians to utilize their vast sources of supply as they may see fit, for domestic use or for export?

Mr. HALE. Mr. President, does the Senator know what proportion of our annual lumber cut goes into pulp wood?

Mr. WALSH of Montana. I can give the Senator the number of cords of wood.

Mr. HALE. Does the Senator know what proportion of our annual cut of lumber in the United States goes into pulp wood? I think I can tell him. Three and one-tenth per cent of the entire cut of lumber in the United States goes into pulp wood, and that includes mechanical as well as chemical pulp wood, so that it is only a little over 1½ per cent of the lumber cut that goes into pulp wood.

Mr. WALSH of Montana. That is a feature of the controversy aside from the question I am now presenting, and, of course, it is an inconsequential proportion of the entire supply. I do not want to be diverted from the line of argument I am now pursuing—that is, the great question of public policy, as to whether we ought to put this premium upon the destruction of the American forests. Let us find out what information we have concerning the extent of our present supply of pulp wood.

The Tariff Commission tells us, by the pamphlet on wood pulp and rag pulp, F. L. 38, as follows—I read from page 28 thereof:

> The most serious problem of pulp and paper manufacture in the United States arises less from foreign competition than from the increasing difficulty in securing pulp wood. Both in the lumber industry and in the pulp and paper industry it has been hitherto the practice to exploit the virgin forests for lumber or pulp wood with little or no attention to reforestation. As a result the forests of pulp wood—spruce, hemlock, and balsam fir—in the Northeastern and Lake States, the principal seats of the pulp and paper industry, are rapidly approaching extinction.
>
> In New England and New York it is estimated that there is only a 15-year supply. In New York alone the supply will hardly last 10 years. Moreover, in New York large areas of timberland have been acquired by the State as State preserves, and on such land cutting is prohibited by the State constitution.

Mr. HALE. Mr. President, I dislike to interrupt the Senator, but my State is one of the principal States where chemical pulp is manufactured, and I can inform the Senator that, instead of the pulp wood being cut off, by the use of forestry methods our supply is growing all the time instead of diminishing.

Mr. WALSH of Montana. I observed that the Senator from North Dakota, the distinguished chairman of the Committee on Finance, told us about the reforestation in Maine. I ask the Senator from Maine when that policy was inaugurated in his State?

Mr. HALE. I think it has been in operation for the last 10 or 15 years.

Mr. WALSH of Montana. How long will it take in the State of Maine for timber to reach such a state of maturity as to be available for pulp wood?

Mr. HALE. Almost any timber can be used for pulp wood. As a matter of fact, we cut down to a certain diameter, and then, after we have cut the land over, we cut it again in another 15 or 20 years.

Mr. WALSH of Montana. How much of the reforested timber has ever been cut in the State of Maine?

Mr. HALE. We are cutting all along, all the time.

Mr. WALSH of Montana. Cutting timber which has been planted?

Mr. HALE. No.

Mr. WALSH of Montana. That is what I am talking about. I dare say that not a stick of planted timber has ever been cut.

Mr. HALE. We do not have to do that. We simply do not strip the land.

Mr. WALSH of Montana. You let it grow up naturally?

Mr. HALE. Yes.

Mr. WALSH of Montana. The same process of reforestation is going on in my State.

Mr. HALE. We cut very carefully, and we do not strip the land, so that the land takes care of itself.

Mr. WALSH of Montana. My question is, How long does it take, after the seed drops to the ground, before the timber has arrived at such a state of maturity as that it is available for pulp wood?

Mr. HALE. As I told the Senator, it is available at any time. You could put small saplings in if you wanted to, but you do not do it. You allow the tree to grow until it measures about 6 inches at the butt before cutting.

Mr. WALSH of Montana. How long does it take to grow to 6 inches at the butt?

Mr. HALE. Probably about 20 years.

Mr. McCUMBER. Mr. President, if the Senator will allow me, the evidence from which I made my statement, and which was before the committee, showed that there is just as great an amount of wood available for pulp in the State of Maine to-day as there was 15 years ago, when they began the reforestation by taking care of their trees. That is the idea I sought to convey, rather than the idea of the length of time it will take for any particular sized tree to grow to the condition in which the other trees were when they were cut and converted into pulp.

Mr. WALSH of Montana. Is there any evidence that a stick of new-growth timber was ever cut in the State of Maine for wood-pulp purposes?

Mr. McCUMBER. I do not know that there is any statement that that which started to grow 10 years ago has even been cut, but I understand the growth is sufficiently rapid so that trees much less than 15 years of age are cut and used for pulp wood.

Mr. WALSH of Montana. Does not the Senator know that the Forestry Service has reported that we never have grown timber in this country for any such uses whatever?

Mr. HALE. The Senator is now talking about timber that has been planted.

Mr. WALSH of Montana. It does not make any difference whether it was planted or not.

Mr. HALE. Most of the timberland in my State has at one time or another been cut over.

Mr. WALSH of Montana. I have no doubt in the world that since Maine was settled, some 200 years ago, it has been retimbered. What I want to know is, since the reforestation, of which the Senator from North Dakota told us, was begun, what extent of territory in the State of Maine has been cut over?

Mr. McCUMBER. The point I desire to make as to that is that the young trees are growing as rapidly as the older trees are taken away, so that the amount available for pulp remains about stationary.

Mr. HALE. They are growing because we do not cut them down. We do not strip the land. We cut intelligently. I do not know what they do in the Senator's State.

Mr. HITCHCOCK. Mr. President, I think probably I can reconcile some of these rather antagonistic statements. My information is that there is only one company in the United States that has adopted a policy of preserving its wood used for wood pulp, and that is the Northern Paper Co., of Maine.

Mr. HALE. Mr. President, the Senator refers not to the Northern Paper Co. but to the Great Northern Paper Co., of

Maine, and his information is entirely erroneous. There are other companies which do the same thing.

Mr. HITCHCOCK. If the Senator will let me finish my statement, I shall appreciate it. The fact is that the Great Northern Paper Co., which supplies newspapers in a very limited area of the United States and which is not available for the papers of the Middle West or the West, sells paper probably at a lower price than any other company in the United States. It is in possession of a vast tract of timberland, chiefly, I think, and perhaps altogether in Maine.

Mr. HALE. About a million and a half acres.

Mr. HITCHCOCK. A number of years ago it adopted a very wise policy, under which it cuts trees of only a certain size, allowing the others to develop, and by the adoption of that policy it has got in perpetuity a limited forest of wood pulp. The other States in the Union which have heretofore raised spruce and other limited varieties of wood for wood pulp have practically been denuded and, as the statistics introduced by the Senator from North Dakota have shown, the United States now is dependent for a large part of its wood pulp, both ground and chemical, upon Canada, because the American accessible forests have been practically denuded and, as I understand it, there is no practical plan of reforestation anywhere in operation.

Before I conclude, I simply want to read this quotation from Theodore Roosevelt, which was accepted at the time and which I think still stands as a wise conclusion. He said, in June, 1909:

> There should be no tariff on any forest product grown in this country, and in especial there should be no tariff on wood pulp, due notice of the change being, of course, given to those engaged in the business, so as to enable them to adjust themselves to the new conditions. The repeal of the duty on wood pulp should, if possible, be accompanied by an agreement with Canada that there should be no export duty on Canadian pulp wood.

Mr. President, the result of denuding our available spruce forests, as has been done in the past, has been to put further away the supply of this necessary wood pulp, and the result is that newspapers are compelled to pay now a much higher price for paper than they paid a number of years ago; and when the newspapers pay that increased price they have to charge it to their consumers on subscription rates and in the price of street sales. That is one of the reasons why the Sunday papers cost the average purchaser so much more than they used to and why subscription prices and street sales are so much higher than they formerly were.

It is a plain proposition. We have two objects in keeping wood pulp on the free list: First, to avoid excessive charges for the newspapers; in the second place, to allow some effort to be made to restore the already practically destroyed woodpulp forests of the country. Maine is the only State in which such a policy is being followed; and in Maine, so far as I know, there is only one company which has been able, by reason of its favored situation and its great capital, to adopt an intelligent system by which it has been able to preserve for itself a spruce forest. Such a plan does not exist for the rest of the country.

Mr. HALE. Mr. President, I tried to tell the Senator that it is a general rule in Maine to take care of timberlands in that way. It is not in any way limited to one company.

Mr. WALSH of Montana. Mr. President, that is the way to take care of timberlands everywhere. They do exactly the same thing in my State. I have seen the young timber grow up where the whole side of a mountain was denuded 30 years ago. Our forests reproduce themselves, the same as the forests in the State of Maine do. I know all about that. But that is not the proposition at all. The idea of reforestation contemplates artificial development of the timber supply, not the mere matter of allowing the cones to drop from the trees and spread themselves over the ground and reproduce. That is going on everywhere. It is going on, as I said, in my State. But everybody realizes that that kind of growth is not available for wood pulp or any other purposes until it is at least 25 or 30 years old, and it does not grow to timber size until it is 75 years old.

The Tariff Commission does not at all say incautiously or without reflection that the wood pulp supply of New England will be exhausted in 15 years, notwithstanding reforestation that is going on. They understand perfectly well that everything that is available will be gone by that time, and then we will be obliged to wait until the new timber arrives at the proper state of development after a lapse of years.

Mr. LODGE. Mr. President, may I ask the Senator a question? I am interested in what he is saying about reforestation. Do I understand him to say that reforestation can take place only by planting?

Mr. WALSH of Montana. No; I did not say that. I said I have seen our mountains and hills reforested without any effort at all artificially. I said further that when we talk about reforestation we refer to artificial planting and taking care of the new forests. When the Tariff Commission tells us, as I shall show directly, that the only relief from the situation is by reforestation, they mean by the planting of forests the same as is done in Germany, in France, and everywhere else.

Mr. LODGE. That is the point I wanted to make.

Mr. WALSH of Montana. The Senator has seen the great forests in Germany as I have. They grow up with perfect regularity, just like the stalks of corn grow in the field. They are in rows, planted, cultivated, and taken care of, and after 30, 40, 50, 75 years they become timber available for any of the purposes for which timber is available. That is what we mean by reforestation.

Mr. LODGE. I do not think it is limited to that. I think it is possible to reforest in other ways, by natural growth and proper management of the cut to preserve the forests so that the land can be cropped year in and year out and the forest never exhausted any more than we exhaust the land by cutting a crop of corn from it.

Mr. WALSH of Montana. I dare say the Senator is correct.

Mr. RANSDELL. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I will yield in just a moment. The Senator from Massachusetts is correct. The term "reforestation" is really broad enough to include both reforestation by natural process and reforestation artificially, but when the Tariff Commission speaks about it they undoubtedly mean the planting of trees and the culture and care of them.

Mr. HALE. If we can reach the same result by cutting carefully, I do not see what possible objection the Senator can have.

Mr. WALSH of Montana. The trouble is we do not reach the same result.

Mr. HALE. I think we do. I think I ought to know more about my own State than the Senator from Montana. The Senator seems to object to the process in use.

Mr. WALSH of Montana. I think I know as much about natural reforestation as the Senator from Maine.

Mr. HALE. The Senator has referred to the report of the Tariff Commission saying our supply will be exhausted in 15 years. I think if the Senator has his way and we take off this duty and let Canadian pulp come in, it may eventually be the case that we will not be able to compete with the Canadian pulp which is coming in, and the result will be that we shall have to cut off our timber and move out. The Senator would not want to see that done even in Maine.

Mr. WALSH of Montana. In due course, I presume, the Senator from Maine will make his speech. I yield now to the Senator from Louisiana.

Mr. RANSDELL. I have no desire to get in the debate, but I simply wish to correct what seems to me to be an erroneous statement on the part of the Senator from Nebraska [Mr. HITCHCOCK] when he said there is no systematic attempt to reforest our lands. There is in my State, Louisiana, quite a systematic attempt going on now. It is of the yellow pine and not timber that makes newsprint. It does not make the finer grades of paper. This plan of reforestation is being carried on by the Great Southern Lumber Co., at Bogalusa, La., where they claim to have the greatest sawmill in the world and where they have an immense paper-making plant. At the present time they are using the refuse of their enormous sawmill to make paper. Everything that does not go into lumber is used by the paper mill.

In conjunction with that they are carrying on, and have been for several years, a very intelligent system of reforestation. They leave a certain number of trees per acre from which the ground is seeded. They call them seed trees, two or three to the acre. They watch those forests very carefully. They have to fence them and guard against the razorback hog, which is one of the greatest enemies of the forest. He roots up the young trees, and is really one of the greatest enemies the forests have. He will dig around a tree and root it up when it is several years old to get the succulent roots.

Mr. WALSH of Montana. Trees how old?

Mr. RANSDELL. Trees several years old. I think it is no exaggeration to say that they root up trees 3 or 4 years old. Pine is of very slow growth at the start, and the hogs get it when it is young.

These lands have to be fenced very carefully and guarded against fire also. There is a most intelligent effort being made to reforest timberlands in the central part of the State. The effort was started by a man whom I know quite well, Mr. Henry Hardtner, at a place called Urania, in the center of my

State, about 12 or 13 years ago. I remember going over his forest in the summer of 1911. He pointed out to me a number of trees which were at that time 8 or 10 inches in diameter. He had left them on the land when he cut the big trees for his mill. He did intelligent cutting of the timber, leaving a certain number of young trees.

The Yale School of Forestry has for several years been sending its classes in forestry down to Urania, La., to study the forestry methods pursued there by my friend, Mr. Hardtner.

So it is not quite right to say that we have no intelligent reforestation going on in the United States. It has been going on in the State of Louisiana for a number of years, I am very happy to say. This does not, however, I will say to the Senator from Nebraska, apply to trees suitable for newsprint paper. We have not the quality of wood that makes print paper, but it does make an admirable brown paper, which is used for many purposes, such as wrapping paper and to make boxes. I am told that these trees attain sufficient growth in 15 or 20 years to make excellent pulp, and the plan of the Great Southern Lumber Co. is to have a perpetual forest there in the vicinity of Bogalusa. They plant a number of acres every year, and their scheme is laid out in such a way that they will never exhaust their great forests.

Mr. WALSH of Montana. I am very much obliged to the Senator from Louisiana for the valuable information. May I ask how long this system has been in vogue?

Mr. RANSDELL. In a large way by the Great Southern Lumber Co. at Bogalusa for five years, but in a smaller way at the Urania Lumber Co. for 11 or 12 years. It was 11 years ago, I know, when I drove with Mr. Hardtner over his forests, and he has carried on the work of reforestation in a very intelligent way in connection with the State conservation commission. They exempt his lands from taxes while the trees are growing and aid him in various ways. They do not collect any taxes until the timber is cut. They aid him in fighting fire and in every possible way. It is a very intelligent method that is in vogue at Urania.

Mr. WALSH of Montana. The statement made by the Senator from Louisiana is in entire accord with my information and judgment with respect to the matter. It coincides with my own experience. It will take at least 15 to 20 years for new forests to arrive at such a state of maturity as that the wood will be available for the manufacture of pulp at all.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield to the Senator from Massachusetts.

Mr. LODGE. The Senator spoke about the Great Northern Co. being the only company that was engaged in using its forest intelligently and scientifically, if I may say so, but I think we have in my State only one pulp mill that makes only pulp and is not also a conversion mill. With reference to that I have a communication as follows:

> This company, although a very small factor in the trade, has purchased these forest lands on which the growth is allowed to mature and where plans for seeding are being carried out from year to year. It is no longer the practice of pulp manufacturers to strip forest lands, but rather to cut mature growth and to give young growth every opportunity to mature.

In other words, they use the selective process. They do not strip the young trees. They take out the trees of a given size, so they have a new crop of trees continually coming on; that is, coming within the range of use from year to year. They have learned the lesson. I know that in a broad way the Senator is perfectly right about the slaughter of American forests and I had very much the same impression that he has expressed in regard to pulp. But when I came to look into it I found, in the first place, that the chemical pulp mills used only a very trifling amount of wood, and, in the second place, bitter experience has taught them that it is greatly to their interest to reforest and care for their forests very carefully and scrupulously, so they will have a permanent supply. I am sorry to have interrupted the Senator so long.

Mr. WALSH of Montana. Within recent years every public sentiment has been aroused with respect to the destruction of our forests. It is not necessary to go into a discussion of how essential, from every point of view, it is that they should be preserved. It is only within very recent years—10 or 15 years—that any concerted effort was made by private owners of timberland in the northwestern part of the country to guard against the destruction of the forests by fire. Our Forestry Service has been in existence only about 20 years. Prior to that time fires raged in those great forests, destroying hundreds and thousands of acres of them from time to time, without any consideration whatever of the losses. But sentiment has been aroused and efforts are going on in some sections of the country looking toward the reforestation of lands which have been denuded either in lumber operations or in the manufacture of the wood pulp.

But all these things are being taken into consideration, and yet the Tariff Commission tells us, and I have no doubt the information is accurate, that the supply in New England will be exhausted in 15 years and in New York within 10 years, as it has largely been exhausted in the States of Wisconsin and Michigan.

Mr. SIMMONS. Mr. President, will the Senator from Montana yield to me for a moment or two?

Mr. WALSH of Montana. I yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, we had some discussion between the Senator from Connecticut [Mr. McLEAN] and myself with reference to the attitude of the New York Herald. I did not at that time know of an editorial which appeared in that paper this morning. If I had, I certainly should have read it at that time. I am going to ask that the Secretary read the editorial now, because it is not long, and I ask that it be printed in connection with my remarks immediately before the various clippings from newspapers which I got permission to have printed in the RECORD this morning. The editorial is headed "Let the tariff wait."

The PRESIDENT pro tempore. Without objection, the editorial will be read as requested.

Mr. McCUMBER. Mr. President, before the article is read I want to know a little something about the length of it. Is it something that is long? Will it take some hours to read? Is it the desire of the Senator to take up the time between now and 6 o'clock?

Mr. SIMMONS. It will not take more than five or six minutes to read it. It is less than a column of the paper and is in big print.

Mr. McCUMBER. Very well; I shall not object, then; but I wish we could use our own judgment on these things.

The PRESIDENT pro tempore. The editorial will be read as requested.

The reading clerk read as follows:

[From the New York Herald, Tuesday, August 1, 1922.]

LET THE TARIFF WAIT.

The national scandal of an insufferably burdensome wool tariff made by sheepgrowing, wool-raising Senators for the benefit of their own private property has deeply stirred the people of the United States. American sentiment can comprehend men in high public office going to extremes, men going wrong and even badly wrong in their partisan or fanatic devotion to an impersonal cause. American sentiment can not comprehend and American sentiment will not countenance legislators making themselves responsible for, indeed creating and jamming through, laws that directly and heavily concern their own private pockets.

The tariff makers of the present Congress can not go before the voters of the United States next November on the issue of the Senate's monstrous wool schedule, the handiwork of sheep-raising, wool-growing Senators, without inviting political revolution by an aroused nation. But even if the wool-tariff scandal had not arisen to shock and outrage the fine American sense of conscience and propriety, the Fordney-McCumber tariff as a whole is so full of economic blunders, so fraught with public hardship, and so potentially dangerous to the country that it would not be good sense and it would not be safe to take it before the American people at the Congress elections now only about three months away.

If the crazy wool schedule were torn out of the tariff measure by the roots, if the sheepgrowing, wool-raising Senators never had startled and shaken the American public with the wool tariff they have tried to impose upon the country, still the Fordney-McCumber tariff is so bad, so unworthy of anybody's support, so incapable of meeting the test of popular approval, that to take it to the polls as the great national issue of the elections of 1922 might blow any political party so doing off the face of the earth.

There is no time left between now and November to make a good enough measure out of the Fordney-McCumber monstrosity to win public confidence. There is no time left to correct in a sound, scientific way even the schedules that are the most extravagant in their economic lunacy and the most hateful to the American public. There is no time left to extract half the wrong and evil of the measure. There is no time left to do much of anything but to run for shelter out of the storm.

A frightful economic botch has been made out of the whole tariff. Anybody in his senses knows that. It is beyond all hope of satisfactory repair in the next few months or several weeks. Anybody competent to do the job knows that. To go before the country with this tariff botch would be simply to commit, on the heels of the unparalleled economic blunder, a colossal, unexampled political blunder.

Let the tariff wait until after the November elections.

Mr. HARRISON. Mr. President, may I ask what is the article which has just been read from the Secretary's desk? I came into the Chamber while it was being read.

The PRESIDENT pro tempore. The Secretary advises the Chair that it is an editorial in the newspaper which is known as the New York Herald of this day.

Mr. McCUMBER. Mr. President, the Senator from Montana [Mr. WALSH] took his seat and I supposed that he had concluded.

Mr. WALSH of Montana. No; I yielded at the request of the Senator from North Carolina to secure unanimous consent to insert something in the RECORD. I now yield to the Senator

from North Dakota for a question, but, of course, I claim the floor.

Mr. McCUMBER. No; I desire to reply to the Senator from North Carolina [Mr. SIMMONS] very briefly, but I do not want to break in upon the argument of the Senator from Montana if he desires to go on.

Mr. WALSH of Montana. If the Senator prefers that I do so I shall, of course, be very glad to proceed; but if he desires to take the floor I shall be very glad to yield to him.

Mr. McCUMBER. Mr. President, I merely wish to occupy a few moments. Of course, there is no use of saying to the New York Herald or to any other representative of the importing interests that the pending tariff bill affords less protection on manufactured goods than any Republican tariff bill that has been before the country for a half century. I think it but fair, however, to remind the Senator from North Carolina that when the next day after he filed his minority report this same newspaper came out assuming an abusive and slurring attitude toward the report on the pending bill submitted by the Senator from North Carolina, the Senator from North Carolina was then as quiet as a clam at the bottom of the ocean. I did not hear him say one single word about this being a great Republican newspaper. Its greatness has come only as it veered from ridiculing and speaking in a despicable manner of the report of the Senator from North Carolina and began to advocate the views of those it represents.

Mr. President, I entirely agree with the Senator from North Carolina that the individual who wrote the article slurring and condemning the report submitted by the Senator from North Carolina did not know a single thing in reference to the subject of which he was writing.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. That writer did not know anything about it then and he does not know a confounded thing about it to-day. The Senator from North Carolina ought to agree with me upon that. When that newspaper began to see the light was when the importing interests of the country began to realize that at least a little portion of their enormous profits would have to be divided with the Government. Then this great Republican newspaper saw the matter just as its advertisers saw it.

Mr. SIMMONS. Mr. President——.

Mr. McCUMBER. The Senator may quote as much as he has a mind to from such newspapers, but they are the same newspapers that slurred and spoke in almost disgraceful terms of the report submitted by the Senator from North Carolina; and they have not any more intelligence on the subject of the tariff bill or upon the subject of the minority report or of the majority report now than they then had. It is easy to condemn.

Mr. SIMMONS. Will the Senator permit me to interrupt him?

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. McCUMBER. Certainly, Mr. President.

Mr. SIMMONS. The Senator from North Dakota was probably not in the Chamber this morning when the Senator from Connecticut [Mr. McLEAN] read an extract from the New York Herald, written the day after the minority report was filed, and criticizing that report, though not in the terms which the Senator from North Dakota has stated, but I thought rather mildly criticizing the report and characterizing me as a politician. When the Senator from Connecticut read that editorial I took the floor and stated, as I repeat now, that I think it was very natural that this great Republican newspaper, this great champion of protection, should, before it understood the pending bill and before it understood the report, when it thought the bill was a protection measure and framed upon the principles of the Republican Party and in order to carry out the theory of protection of that party, have criticized the minority report.

I would expect that from a Republican newspaper; I would expect that from a protectionist newspaper; but as soon as the Herald understood, as a result of the discussion in the Senate, what the bill contained it changed its attitude with reference to the bill altogether and denounced it as not only not being a protective measure at all but it went so far, as I now remember, as to characterize it as thievery—I may be a little mistaken about that.

Mr. McCUMBER. The Senator has made that statement before.

Mr. SIMMONS. The Senator says that the change of attitude was the result of the influence of the importers upon the New York Herald. Well, Mr. President, I have read in the Senate from a score of Republican newspapers that saw the light just as the New York Herald did, newspapers that at first thought the pending bill was a protection measure, written according to the principles of the Republican Party, but afterwards realized that it was a profiteer's tariff and not a protective tariff. Then they opened up on it just as the Herald has opened up on it. I secured this morning permission from the Senate to put into the RECORD of to-day another score of editorials from Republican newspapers which likewise have denounced this bill as soon as they discovered its iniquity. I have had this editorial read to-day because the Senator from Connecticut this morning referred to a Herald editorial; and I wanted to show how the Herald, when the light of the truth dawned upon it, changed its attitude toward this bill and denounced it as other Republican newspapers—and they constitute nearly a majority of the great outstanding Republican publications of this country—are to-day denouncing it as iniquitous and fraudulent in its purposes.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. The Senator from Montana [Mr. WALSH] has the floor. Does he yield to the Senator from North Dakota?

Mr. McCUMBER. I had no right to yield to the Senator from North Carolina and I did not yield to the Senator; but he simply took possession of the floor, and if I had proceeded there would have been two Senators talking at the same time.

Mr. SIMMONS. I understood the Senator from North Dakota to yield to me.

Mr. McCUMBER. If the Senator from Montana will let me finish, I will do so, and then he may discuss the bill.

Mr. WALSH of Montana. I will yield to the Senator from North Dakota upon the assurance that it will take him only about five minutes. I am quite willing that the Senator should continue his remarks.

Mr. McCUMBER. I do not need to take a great deal of time. The Senator from North Carolina does himself great injustice when he assumes that the writers of these articles in these newspapers know anything about the tariff bill. He knows as well as I do that they do not know a thing about it. He knows, further, that he has never read one sentence in any one of the newspapers indicating that the writer had any knowledge or had any information in reference to the schedules or a single item in the schedules. All the newspaper knows is that its advertisers—the great importers and the department stores—want to have a lower rate on their importations, and it uses its pen, scurrilously very often, but never intelligently, discussing a single one of the items.

Mr. SIMMONS. Will the Senator yield to me?

Mr. McCUMBER. I have no right to yield to the Senator from North Carolina. The Senator from Montana [Mr. WALSH] has the floor. He yielded to me, and I wanted to finish.

The PRESIDENT pro tempore. The Senator from North Dakota has the floor.

Mr. McCUMBER. I want to finish the sentence.

Mr. SIMMONS. Very well.

Mr. McCUMBER. The Senator from North Carolina knows these newspapers as well as I do, and there is no use of the Senator or anyone else trying to fool himself, to put it lightly.

Now, I want to say a word——

Mr. GOODING. Will the Senator yield to me for just a moment?

Mr. McCUMBER. I have no right to yield.

Mr. GOODING. Will the Senator from Montana yield? I will occupy but a moment of the time of the Senate.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Idaho?

Mr. McCUMBER. Not now, Mr. President. I do not think I can do so in justice to the Senator from Montana [Mr. WALSH].

I wanted to call the attention of the Senator from Montana to a matter in order that he may answer my question now. If I understood the Senator correctly, he stated that from some evidence—I do not remember now exactly where he got his information—we would about use up the supply of our timber for pulp wood in the United States in about 15 years?

Mr. WALSH of Montana. The source of my information does not seem to be in good standing on the other side of the Chamber, but it is the Tariff Commission.

Mr. McCUMBER. I simply wanted to know where it was from and whether I was correct in reference to the 15 years.

Mr. WALSH of Montana. The Senator is correct.

Mr. McCUMBER. I will say to the Senator that I have had a great deal of difficulty, because of the conflicting reports, in trying to arrive at a conclusion as to how long our coal supply, our iron supply, our timber supply for lumber, and our timber for pulp wood would last.

Mr. WALSH of Montana. If the Senator will permit me, I would prefer that he should defer a discussion of that particular feature of the matter until I get through presenting it. Then I shall be glad to yield.

Mr. McCUMBER. I wanted the Senator to answer that part because the evidence that was taken before the committee insists that we have enough to last forever; that the growth will more than equal the consumption if properly cared for; and that there are many millions of acres that can not produce anything but wood that is fit for pulp wood.

Mr. WALSH of Montana. Yes, Mr. President; I observe that some of the people who are asking for the duty on chemical wood pulp furnished such information as that to the committee, or, at least, made that estimate. I am giving the Senate the conclusion arrived at by the Tariff Commission.

I now yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, the Senator from North Dakota has said that the writer of this editorial in the Herald did not know what he was writing about, and I suppose he means to include in that category all these other great Republican newspapers—the Chicago Tribune, the Evening Post of New York, the Journal of Commerce of New York, and the scores of other papers which, though Republican and protectionists, have changed their attitude toward this bill and are now its severest critics.

I want to say to the Senator that the Washington correspondent of the New York Herald, Mr. Seibold, is one of the greatest writers in America. His letters to the Herald have discussed this bill very thoroughly and denounced it; and no discussions that have been made in this Chamber by Senators claiming to know something about this bill have been more enlightening and more valuable and have shown a greater understanding of the subject than Mr. Seibold's articles.

But the New York Herald, like the New York World, shortly after they discovered the outrages in this bill, designated each of them a gentleman of reputation who had some special training with reference to the tariff, and sent him to Washington with instructions to study this subject, to go to the bottom of it, and to write up these schedules from day to day; and there have appeared from the pens and under the names of these two great writers, Mr. Thurston and Mr. McGregor, from day to day articles discussing practically every schedule that we have discussed here, in a way that is as enlightened and as intelligent and that shows as much understanding of the subject as any Senator upon this floor has exhibited. To say that these newspapers under these circumstances do not know what they are talking about is to make an absurd and ridiculous statement in the United States Senate. Anybody who has been reading the articles of these gentlemen, upon which these editorials are partly predicated, must know that the statement of the Senator that these papers in printing these editorials are ignorant and know nothing about the subject which they are discussing does not require, under the circumstances, any denial.

Mr. President, I have in my hand one of the finest articles that I have seen written about the tariff by any editor in the United States or by any American writer. It is a clearer exposition than any that I have seen heretofore of what this wool schedule means to the American people and of its absurdities and its violation of every sane principle of economics and of tariff legislation. It is not surpassed. This article appears in the New York Evening Post. It is written by Mr. William G. Scott, and it shows him to be thoroughly familiar with the subject upon which he is writing.

Mr. President, I had intended to read this editorial and to comment upon it because of its strength, because of its forcefulness, because of its true understanding of the situation, and its powerful presentation of it. I shall not do that; but, on the other hand, I shall ask that it be printed in connection with the other newspaper articles and editorials that I received permission this morning to incorporate in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it will be printed according to the request of the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I wish to say that in having this editorial read I had no intention of myself participating in any attack upon any Senator in this Chamber, but I had it read because the Senator from Connecticut [Mr. McLEAN] this morning had relied upon the mild, not the scurrilous, criticism heretofore made by the same paper, because I imagine that he read this morning, although I never read the article, the strongest part of it, and there was nothing scurrilous about it and nothing that I object to. It was just a natural criticism by a Republican paper and a protectionist paper the day after this report had been made, before the writer of the article had had any opportunity to study the report, or before he had any opportunity or had availed himself of the opportunity of studying the bill.

As I said to the Senator from Connecticut this morning, that newspaper and the other newspapers, articles from which I have been putting into the RECORD, are Republican newspapers that originally and naturally would have been in favor of Republican tariff legislation and would be standing for this bill to-day if it were an exposition of Republican principles instead of being, as it is, an instrument for the robbery and the exploitation of the American people; but in good conscience and in the exercise of the independence of newspapers of the character of these great Republican journals that are fighting against this bill, they have wisely chosen in the interest of the people of the United States and of justice and right to powerfully attack this bill and to condemn and denounce it in terms so scathing and so bitter that I myself would hesitate to use them upon this floor.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. The Senator from Idaho.

Mr. GOODING. Will the Senator yield for just a minute?

Mr. WALSH of Montana. Does the Senator desire to comment on the editorial?

The PRESIDENT pro tempore. The Chair recognizes the Senator from Idaho in his own right.

Mr. SIMMONS. Mr. President, I wish to say to the Senator from Idaho that I hope he will not consider me discourteous in leaving the Chamber. I am obliged to do so.

Mr. WALSH of Montana. Mr. President, I yielded at the request of the Senator from North Dakota. I did not yield the floor. I held the floor and the Senator asked to interrupt, and he did so. That gave rise to the discussion which has now taken place. Apparently now the Chair is constrained or disposed, at least, to hold that I have lost the floor. He recognized the Senator from Idaho in his own right. I do not want to find fault with the ruling of the Chair, but Senators will understand in what position it will put me hereafter. I shall be unable to yield to anybody. I shall claim the floor when the Senator from Idaho gets through, and anyone who desires to interrupt me—and I am always willing to be interrupted to answer any questions that may be addressed to me when I am discussing a question—whoever interrupts me hereafter must have an understanding with the Chair that I do not lose the floor.

Mr. GOODING and Mr. HARRISON addressed the Chair.

The PRESIDENT pro tempore. The Senator from Idaho.

Mr. HARRISON. Will the Senator yield?

Mr. GOODING. Yes; I yield.

Mr. HARRISON. I submit that the whole Senate understood that the Senator from Montana had not yielded the floor.

Mr. WALSH of Montana. I take it that the Senator from North Dakota so understood.

The PRESIDENT pro tempore. The Chair feels constrained to say that it is impossible, under the rules of the Senate, for any Senator to yield for the speeches that have occurred since the Senator from Montana addressed the Senate and retain the floor. The Chair has no desire to take the Senator from Montana from the floor, but we must give some attention to the rules of the Senate.

Mr. WALSH of Montana. The Senator from Montana is not disposed to question the soundness of the ruling now made by the Chair. What he does desire to remark is that this is the first time that the rule has been applied in the discussion in connection with this bill. It has been practically disregarded to this time, and now it is invoked without even a warning from the Chair to the Senator from Montana that it would be applied.

The PRESIDENT pro tempore. The Chair is quite willing to concede that it has been practically disregarded.

Mr. HARRISON. Mr. President, I merely want to suggest that the Senator from North Dakota refused to yield once simply because he said that he was speaking through the courtesy of the Senator from Montana. I submit that this is a pretty dangerous precedent to establish. I am sure that the Senator from Idaho understood that the Senator from Montana had the floor and was going to yield to him for a question.

Mr. GOODING. Mr. President, if the Senator from Montana cares to continue the discussion at this time I am ready to yield the floor. I want to occupy only a few minutes of the time of the Senate this evening.

The editorial in the New York Herald is a direct attack on the agricultural interests of the country and live-stock industry. There is not any question of doubt about that; and the New York Herald and many of the other metropolitan papers of this country changed their minds about this tariff bill just as soon as they discovered that the agricultural inter-

ests of this country were to be treated fairly and given a square deal. I can understand why the Democratic Party, which never has given agriculture in this country a square deal in its tariff bills, the party that has always considered farm products raw material and put them on the free list, accepts the New York Herald's editorials with a great deal of satisfaction.

Mr. President, I am simply going to say, as I said the other day, that I am going to demand an investigation.

I want to know whether there are any exceptions to be made in this body, and whether the man who owns sheep has not a right to express his opinion and to vote on this schedule or any schedule in this tariff bill. If I have violated my oath of office, by the eternal gods I am going to resign.

The Senator from Nebraska stands on the floor and, because he owns a newspaper, is demanding free wood pulp. Where is the line to be drawn? I want to say, Mr. President, that if any Senator who knows anything about my actions in the Senate will say that I have not made just as great an effort in regard to many other schedules as for wool, if not greater, he will say it because he does not know the truth or does not understand it. The hardest fight I made was for a duty on vegetable oil—and I may have annoyed the committee by my efforts—and I never saw a cotton plant growing in all my life. It has not made any difference with me as to what the product was. I stand here for a principle, and if my mouth is to be closed and I am to be insulted and smirched simply because I am advocating the agricultural interests in the Senate, I want to know it. Agriculture is receiving a square deal in this bill. Simply because we have had a chairman of the Finance Committee who has been the best friend agriculture has had in this body for a quarter of a century, and because men have had courage enough to stand together and present in an intelligent way to the Senate Finance Committee the needs of agriculture, it is said that we have violated our oaths of office. There can not be any greater indictment against any man than for any paper or any Senator to intimate for a minute that he has violated his oath as a Senator in the greatest legislative body in all the world. I am going to pay my respects in due time to the New York Herald, and I am going to insist on this investigation all down the line, and I want that understood. By the eternal gods we are going to have it, too. If we do not have it, I will not be to blame.

Mr. HARRISON. Mr. President, will the Senator yield for a question?

Mr. GOODING. I yield.

Mr. HARRISON. The Senator, in a very manly and courageous way, because of these slurs in the editorials about him and others voting where they were interested, is demanding an investigation, and as one Member of the Senate I think he is entitled to the investigation. The thing I want to ask the Senator is, has he a resolution, or does he propose to have this resolution which was offered on Saturday voted upon? I am with the Senator in his contention.

Mr. GOODING. I will say very frankly to the Senator that I am preparing a resolution to be offered. But I want to say just a little more. Just as long as they could get Schedule K, which they knew was dishonest, no voice was lifted in the great metropolitan papers. Just as long as they could give the manufacturers in this country a schedule which destroyed an industry—and almost every Senator who has spoken upon the floor admits to-day that Schedule K was crooked—that was all right. But just as quickly as the committee is fair enough and strong enough to give the agricultural interests of this country a square deal, then all the great papers turn upon the committee and upon the Republican Party, and the Democratic Party laughs in glee.

Of course, the Democratic Party says that it is unconstitutional to give protection to any industry. I have no quarrel with them if they think so. Some Senators on the other side have had the courage to stand by the industries of their States and to vote for protection, and I want to congratulate them for it.

Mr. President, what a crime it is, when a country like this is suffering from the effects of the war, as we are to-day, that we have to stand here and plead for proper protection to great industries in order to give them a chance to live, the only legislative body in all the world where there is any division as to the needs of an industry. What a spectacle it is for a great, intelligent body like this and a great Nation that the very life of this country must be at stake while we haggle and quarrel over what protection an industry needs to let it live.

By the eternal gods, I have not violated my oath of office, nor has any other Senator, in voting for any schedule in this bill, and there is going to be a quarrel between myself and any newspaper or anyone else who makes such a charge.

If I can not vote for any agricultural industry simply because I am a farmer, then I want to know it. My conscience is clear, and I know that when I get through my work in the Senate I shall be able to lie down to peaceful dreams.

Mr. HITCHCOCK. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Nebraska?

Mr. WALSH of Montana. I find myself unable to do so. I am afraid the Chair would then invoke the rule on me that no man may talk more than twice on the same subject.

Mr. HITCHCOCK. Mr. President, I request the privilege of addressing an inquiry to the Senator from Idaho, who has just spoken, before the Senator from Montana resumes the floor.

Mr. WALSH of Montana. The Senator from Nebraska had better ask unanimous consent.

The PRESIDENT pro tempore. Senators understand the rule perfectly well. The rule has never been enforced with very much rigor, and a reasonable interruption would not, by the present occupant of the chair, be deemed sufficient to take the Senator addressing the Senate from the floor; but when the debate had continued for an hour or an hour and a half upon questions which are not concerned with the matter before the Senate the Chair felt constrained to rule that the Senator from Idaho had a right to recognition in his own right.

Mr. HITCHCOCK. I had endeavored to interrupt the Senator from Idaho before he had taken his seat. I was not aware that the Senator from Montana was upon his feet.

Mr. GOODING. I hope the Senator from Montana will yield a moment.

The PRESIDENT pro tempore. The Senator from Montana will not lose the floor on account of any reasonable interruption by the Senator from Nebraska.

Mr. HITCHCOCK. Then, Mr. President, I want to compliment the Senator from Idaho for the courageous and frank position which he takes, and to say to him that this side will support fully any effort he may make to secure the withdrawal of objections from the other side to an investigation of which he speaks, and I trust that if he draws another resolution, instead of supporting the resolution offered by the Senator from Arkansas [Mr. CARAWAY], it will not be any the less effective or strong.

Mr. GOODING. There will not be anybody left out when my resolution is offered. The Senator will discover that.

Mr. HITCHCOCK. Then I hope the Senator will not delay the introduction of his resolution.

Mr. GOODING. It will not be delayed, either. If we are going to have an investigation, we will all get into the game. I understand the intention here. There is not any question about it. It is to smirch a few Senators on this side, and the papers all over are busy doing it now. It is just politics, that is all; nothing more and nothing less.

I do not care to discuss it any more. I hope to be ready with the resolution to-morrow, and I trust it will be accepted.

Mr. HARRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Georgia?

Mr. WALSH of Montana. I have declined to yield to anyone. It does not seem to do any good, however.

Mr. McCUMBER. Mr. President, if it is agreeable to the Senator from Montana, I was about to move to recess until to-morrow at 11 o'clock. But the Senator from Missouri [Mr. SPENCER] states that he wants to have consideration of a bill on the calendar which will not require any debate, and the Senator from Georgia [Mr. HARRIS] seems to be waiting to present something. If it is agreeable to the Senator from Montana, I suggest to him that he let those two Senators present their matters, and then I will move a recess, and the Senator from Montana can go on in the morning.

Mr. WALSH of Montana. I desire to say before that action, which is quite satisfactory to me, is taken, that if I were able to satisfy myself that anything which might be said by me on the paragraphs under consideration would in the slightest degree affect any vote in this Chamber, I should regret very much indeed that whatever value there is to the continuity of my discussion should be so broken as it is; but inasmuch as I can not believe that it would, I have tolerated the discussion which has taken place in the last 45 minutes. I shall be very glad to resume on the reassembling of the Senate to-morrow.

Mr. HARRIS. Mr. President, I would like to say, as the Senator from Idaho [Mr. GOODING] has referred to the Senator from Nebraska [Mr. HITCHCOCK], that the Senator from North Carolina [Mr. SIMMONS] asked me to handle the chemical wood-

pulp item, and this morning I told the Senator from Nebraska that I would like to have him take an interest in it, and he told me he declined to do so because of the fact that he is the owner of a newspaper, and he said it would not be becoming in him to do so.

Mr. HARRISON. May I suggest that I notice by the RECORD that the late Senator Frye, while a Member of the House, declined to vote on a proposition touching a railroad because he had some interest in a railroad. The precedent has been long established.

EMPLOYEES OF THE INDIAN SERVICE.

Mr. SPENCER. Mr. President, the bill (H. R. 9814) amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service, is a bill extending the time in which men in the Indian Service may be given an educational leave during the summer from 15 days, as the law now is, to 30 days. The Indian Bureau think it is very essential that the bill, which is a House bill, should be passed, in order that they may avail themselves of it during this summer. I ask unanimous consent for the consideration of the bill.

The PRESIDENT pro tempore. The Secretary will report the bill for information.

The reading clerk read the bill.

The PRESIDENT pro tempore. The Senator from Missouri asks unanimous consent for the immediate consideration of the bill. Is there objection?

Mr. DIAL. Mr. President, it seems to me that would establish a bad precedent which might be extended, and I shall object for the present.

The PRESIDENT pro tempore. Objection is made.

MAHONING RIVER DAM.

Mr. WILLIS. I ask unanimous consent to report favorably from the Committee on Commerce, with amendments, the bill (S. 3733) granting the consent of Congress to the city of Warren, in the State of Ohio, its successors and assigns, to construct, maintain, and operate a dam across the Mahoning River in the State of Ohio, and I submit a report (No. 844) thereon.

The PRESIDENT pro tempore. Without objection, the report will be received.

Mr. WILLIS. I now ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The first amendment of the Committee on Commerce was, in section 1, page 1, line 7, after the name "Ohio," to strike out "in accordance with the provisions of the act entitled 'An act to regulate the construction of dams across navigable waters,' approved June 21, 1906, and amended by the act of June 23, 1910," and to insert a colon and the following proviso:

Provided, That the work shall not be commenced until the plans therefor have been filed with and approved by the Chief of Engineers, United States Army, and by the Secretary of War: *Provided further*, That this act shall not be construed to authorize the use of such dam to develop water power or generate electricity.

The amendment was agreed to.

The next amendment was, on page 1, to strike out section 2 in the following words:

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

And in lieu thereof to insert:

SEC. 2. That this act shall be null and void unless the actual construction of the dam hereby authorized is commenced within one year and completed within three years from the date hereof: *Provided*, That the consent hereby given shall terminate and be at an end from and after 30 days' notice from the Federal Power Commission or other authorized agency of the United States to said company or its successors that desirable water-power development will be interfered with by the existence of said dam; and any grantee or licensee of the United States proposing to develop a power project at or near said dam shall have authority to remove, submerge, or utilize said dam under such conditions as said commission or other agency may determine, but such conditions shall not include compensation for the removal, submergence, or utilization of said dam if the water level to be maintained in said power project is higher than the level of the crest of said dam.

The amendment was agreed to.

The next amendment was to add the following additional section:

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. BRANDEGEE. Mr. President, in section 2 of the bill there is a provision that the bridge shall be begun within one year and completed within three years "from the date hereof." What is the date hereof? Does it mean from the passage of the bill or what does it mean?

Mr. WILLIS. That is a matter of opinion, I suppose, but undoubtedly it would be the date of the enactment of the law and not the passage of the bill by the Senate.

Mr. BRANDEGEE. If the question of forfeiture came up, it would be absolutely vital to know.

Mr. WILLIS. I may say to the Senator from Connecticut that the language was suggested by the War Department. I think it is not very clear, but evidently it means the date of the passage of the act.

Mr. BRANDEGEE. If the Senator is satisfied with it as it reads, very well.

Mr. WILLIS. I am satisfied and the War Department is satisfied.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RECESS.

Mr. McCUMBER. I move that the Senate take a recess until to-morrow at 11 o'clock a. m.

The motion was agreed to; and (at 6 o'clock and 5 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, August 2, 1922, at 11 o'clock a. m.

SENATE.

WEDNESDAY, *August 2, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

VIEWS OF SENATOR KEY PITTMAN.

Mr. ROBINSON. Mr. President, I ask unanimous consent to have printed in the RECORD in 8-point type a brief interview with the able Senator from Nevada [Mr. PITTMAN], published in the Santa Fe New Mexican on July 15, 1922, presenting a forceful and interesting discussion of political topics.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[From the Santa Fe New Mexican, July 15, 1922.]

POVERTY, DISTRESS, DISORDER, VIOLENCE, FOUR HORSEMEN OF HARDING RÉGIME, SAYS PITTMAN—REPUBLICANS HAVE MADE MESS OF THE GOVERNMENT, DEMOCRATS TO BE SWEPT INTO POWER, SAYS NEVADA SENATOR; RAILROAD LEGISLATION COMPLETE FIZZLE, ALLEGES—BONUS A FIASCO.

ACHIEVEMENTS OF G. O. P. AS SEEN BY SENATOR PITTMAN.

Foreign relations left in chaotic condition.
Our foreign commerce—there is none.
Millionaires' taxes reduced; poor people pay.
The H. C. L. still is a terror.
Transportation charges increased.
Outrageous discriminations.
Perpetuation of long and short haul "outrage."
Destruction of all State control over intrastate commerce.
Producer and consumer are starving together.
Harding, Mellon, and Wall Street keep the soldier from bonus.
The four horsemen of the Harding administration are:
Poverty,
Distress,
Disorder,
Violence.

Republican management of the affairs of the Nation has been a failure, declared United States Senator KEY PITTMAN, of Nevada, in an interview to-day.

"I look for a Democratic House as the result of the coming fall election," he added, "as a rebuke to Mr. Harding and his administration; as a rebuke to the Republican Government in the saddle for two years before Harding took office; as a loud protest against the 'four horsemen' of the Harding administration: Poverty, distress, disorder, and violence."

Senator PITTMAN is up for reelection to the United States Senate this fall. He says that he expects to win, and he looks for a Democratic wave all over the country.

"These are bad days," he continued, "with coal walkouts, with railroad shopmen striking, with so much of the after-war misery, with so many hundreds of thousands out of work, with so many pledges broken, promises unfulfilled, and brilliant visions of happiness, progress, and prosperity changed into a mirage of plain chaos.

HINTS AT REVOLUTION.

"There may be a revolution in this country some day. But it will not come from present labor troubles and present poverty, in my opinion. If there ever is a revolution in this country, I think it will be brought about by the people and for the people who finally realize that they, the people, no longer rule; that men are put on the tickets and elected by money."

G. O. P. FOUND WANTING.

Senator PITTMAN said that he believes the coming fall elections will sweep enough Democrats into the lower House of Congress to make it Democratic "because the Republican Party and the Republican President have been tried and found wanting." He discussed the situation as follows:

"The Republican Party was placed in the control of both branches of Congress four years ago on certain definite pledges to the people. The members of this party excused themselves before the people for failure to fulfill these pledges for the first two years, saying: 'We could do nothing without a Republican President.'

"The Republicans pledged to the people that if put in complete power by the election of Harding they would reestablish our foreign relations and foreign commerce as they existed before the Great War.

"They have failed absolutely. Our foreign relations to-day are in a most chaotic condition—more chaotic than they ever were in peace times, and as for foreign commerce—we have none. We have no market for our surplus products.

TAXATION.

"The Republicans promised to reduce taxation. They have not even attempted to reduce taxes. They have reduced some of the higher taxes on millionaires' incomes and transferred these taxes to the poor people. So much for the fulfillment of Republican pledges on taxation.

REDUCING THE HIGH COST OF LIVING.

"Now for another pledge. The Republicans promised to reduce the high cost of living, and what have they done? They have not even attempted to carry out that pledge or promise. The wages of a man with a family to-day will hardly keep that family decently. The purchasing power of the dollar is still low. Ask the average clerk in a city like Washington, D. C. Many of the clerks there get $100 a month. They have to pay $50 a month rental for a small apartment of about three rooms and a bath. Consider for a moment the struggles of a married man with a family to pay board, clothes, doctor, and dentist bills on $50 a month. The high cost of living is still a terror to the poor man on a small salary—especially when he has a family."

THE TRANSPORTATION SYSTEM.

As regards the transportation system of the country and its reorganization Senator PITTMAN had a few words to say: "The promise was made by the Republicans that they would reorganize the transportation system of the country and bring about a reduction of transportation charges," he said. "But the Republicans since they have been in power have made no effort to reduce the transportation charges except through the Esch-Cummins bill. And let me add that that bill to-day is universally condemned except by its authors, and to them it has become a source of constant apology. What is its result? Increased transportation charges, most outrageous discrimination, and a perpetuation of the long-and-short-haul outrage; also the destruction of all State control over intrastate commerce and harassment and destruction of the morale of all railroad employees. Such is the way that promise of reducing the transportation charges has been fulfilled."

THE FARMER AND CONSUMER.

Senator PITTMAN then referred to the treatment of the farmer and consumer, saying: "The Republicans promised to help the farmer and the consumer through the reduction of transportation costs." They encouraged everyone to believe that through the reconstruction of transportation the producer and the consumer might live and prosper at the same time. The result really is this: The producer and the consumer are starving at the same time. They have seen no advantage of Mr. Harding's administration.

VICTIMS OF PROSPERITY.

The Senator from Nevada said that the Republican spellbinders and the Republican writers had enthused the American people with "visions of prosperity," but, he added, "The smoke of the election has blown away; the people see they have been deceived—at least I think they will say so in November. And now, instead of those visions of prosperity they are confronted with the 'four horsemen' of the Harding administration—poverty, distress, disorder, and violence. All four are the result of this new management of the Nation's affairs."

AS TO THE SOLDIER BONUS.

Senator PITTMAN was most sarcastic concerning the fulfillment of the pledge to the soldiers on the bonus question. He said, "The Republicans promised the ex-soldiers—they called them 'the soldier boys'—that if Harding was elected they would be taken care of by a readjustment of their compensation. This readjustment was to be worked out like that for civil Government employees who had their compensation increased and adjusted.

"Now, this is the way the bonus bill has been 'adjusted' for the soldier. Every time it has come out of committee it has come as a result of the force applied by the Democrats. Every time this bill arrived on the floor to start adjusting its workings to the tired ex-soldier it has been forced back into the committee room, there to be smothered in a dungeon by Republican votes. An extraordinary way of adjusting itself to the ex-soldier.

"Why has this been done? Why has the bill been smothered? Because of the demand of President Harding, back of whom is the demand of the Secretary of the Treasury Mellon, back of whom is the demand of Wall Street. That is the gist of the history of the bonus bill. The money power of the country does not desire to pay the bonus because of the taxes on that money power. It is simple enough. And so you see a Republican President is opposing this adjusted compensation and a Republican Secretary of the Treasury is opposing it and Wall Street is opposing it."

Senator PITTMAN said that the flood of money enveloping this country at the election of Mr. Harding explains why Wall Street's voice is heard and listened to.

SOUTHERN PACIFIC AND CENTRAL PACIFIC RAILWAYS.

Mr. WARREN. I present resolutions adopted by the Lions Club of Rawlins, Wyo., and the Community Club of Green River, Wyo., commending the Supreme Court finding in the case of the separation of the Central Pacific Railway from the Southern Pacific Co., and asking that Congress may not undertake to overturn that decision. I ask that the resolutions be referred to the Committee on Interstate Commerce and that the one from the Lions Club may be printed in the RECORD.

There being no objection, the resolutions were referred to the Committee on Interstate Commerce and the resolution of the Lions Club of Rawlins, Wyo., was ordered to be printed in the RECORD, as follows:

Resolutions passed by the Lions Club of Rawlins, Wyo.

Whereas the Sherman antitrust act was enacted to prevent monopolies and to prevent a carrier from interfering with commerce by acquiring and controlling its competitor; and

Whereas the Central Pacific is a necessary connecting link in that general system of transcontinental transportation which handles San Francisco traffic through the Ogden gateway and forms no part of the San Francisco-New Orleans-New York route; and

Whereas the Supreme Court has held that the control of the Central Pacific by the Southern Pacific Co. constitutes a violation of the Sherman antitrust law and that it is harmful to the public interest; and

Whereas it is unthinkable that an unlawful monopoly ordered by the Supreme Court to desist from its unlawful conduct shall by legislation be declared to be lawful and be granted permission to continue its unlawful conduct; and

Whereas the continued holding of the Central Pacific Co. will place in the hands of the Southern Pacific Co. both the power and the desire to hinder and impede transcontinental traffic moving to or from San Francisco through the Ogden gateway, and enable it thereby to increase the cost of transportation and supplies to the people of the great central communities of the United States: Therefore, be it

Resolved, That Rawlins Lions Club is opposed to any and all attempts to permit the Southern Pacific Co. to retain control of the Central Pacific, and that it believes that the public interest requires the dissolution of the Southern Pacific-Central Pacific monopoly; and be it further

Resolved, That the attention of our representatives in Congress be called to the efforts which are being made to place a permanent obstacle in the way of transcontinental traffic moving to or from San Francisco over the short direct route; and be it further

Resolved, That a copy of these resolutions be spread upon the minutes of this meeting; and be it further

Resolved, That a copy of these resolutions be sent to each of Wyoming's representatives in Congress.

Approved and adopted unanimously by Lions Club of Rawlins, Wyo., this 27th day of July, A. D. 1922.

LIONS CLUB OF RAWLINS, WYO.,
By GEO. A. RILEY, *Its President.*

Attest:
P. H. LEIMBACH, *Its Secretary.*

Mr. ODDIE presented communications, in the nature of memorials, of the Chamber of Commerce of Churchill County, of Fallon; the Pershing County Chamber of Commerce, of Lovelock; the Humboldt County Chamber of Commerce, of Winnemucca; and sundry citizens and business firms of Reno, Tonopah, Golconda, Battle Mountain, Hazen, Palisade, Carlin, Deeth, Beowawe, Wells, Wadsworth, Fernley, Sparks, Mina, Luning, Eureka, Dayton, Austin, Oreana, Rochester, Imlay, Hawthorne, Lovelock, and Goldfield, all in the State of Nevada, remonstrating against the separation of the Central Pacific Railway from the Southern Pacific Co., etc., which were referred to the Committee on Interstate Commerce.

REGISTRATION OF CERTAIN SEED.

Mr. CAPPER introduced a bill (S. 3880) to authorize the registration of certain seed, and for other purposes, which was read twice by its title and referred to the Committee on Agriculture and Forestry.

"A DEMOCRAT SPEAKS OUT."

Mr. HARRISON. Mr. President, I ask unanimous consent to have inserted in the RECORD, in 8-point type, an article which appeared in the New York Times of Sunday, headed "A Democrat speaks out." It is a very interesting article and ought to be read throughout the country.

Mr. BORAH. Mr. President, the article is very interesting; I read it, and I have been trying to find out ever since who it is that "speaks out." I do not think a gentleman speaks out when he writes an article to which he will not sign his name.

Mr. HARRISON. I may say to the Senator that I do not know who wrote the article, but there is much food for thought in it.

Mr. BORAH. There is a great deal of food for thought in it, and I should like very much to know who wrote it.

Mr. HARRISON. I can not give the Senator the information, but I am sure the Senator does not want to prevent its printing in the RECORD because I can not give him that information.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Mississippi?

There being no objection, the article was ordered printed in the RECORD, as follows:

[From the New York Times of July 30, 1922.]

A DEMOCRAT SPEAKS OUT—A SHARP ARRAIGNMENT OF REPUBLICAN ADMINISTRATION FOR SINS OF OMISSION AND COMMISSION—"SELF-REFUTING CLAIMS OF ECONOMIES"—COMPARISON WITH "GOOD OLD DAYS" OF HANNA.

(The author of this article is one of the leading Democrats of the country.)

At a well-known club the other evening they were talking about the Fordney-McCumber tariff bill. There were some derisive remarks about the recent puppet show in the Senate, in which advocates of the bill exhibited cuckoo clocks, razors, and sundry German baubles to support their argument. One man finally remarked, "Well, I gave $5,000 in 1920 to put the Republicans in office. I would now cheerfully give $10,000 to put them out." Then turning to me he said, "Why are you Democrats so reticent? You are giving the Republicans too much rope. They have been doing all the talking for a year, and rather tiresome talk at that."

There are reasons for this reticence. In the first place, Democratic politicians, who look upon the alternations of party control with the cynical philosophy of the professional politician of either party, are quite content with the spectacle of leaderless confusion, forgotten promises, unrealized expectations, conflicting purposes, subsiding popularity, and general deadlock which make up the Republican picture. When a Republican Congress is pronounced by a stalwart party organ like the Boston Transcript to be incomparably bad and is described in a public address by the Republican Secretary of War as revealing the lowest depths to which congressional government has ever sunk, a Democrat may well conclude that from a partisan standpoint things are proceeding quite satisfactorily. He might naturally prefer not to deflect Republican attention, by more criticism or a discussion of issues, from this intensive effort at party suicide.

There is, of course, also the conventional theory of the rôle of an opposition party to explain the Democratic attitude. When a party has been given so overwhelming a mandate as that which the Republicans received at the last election, with its accompanying ascendency in both Houses of Congress, effective opposition in the sense of frustrating the Republican program is out of the question. The Democratic Party may naturally conclude that its full duty as an opposition party is discharged by exposing the fallacies of Republican policy and then keeping a score card of Republican failures and mistakes. There is also a certain widely shared view that in the by-election which comes midway in the course of every national administration issues are determined largely with reference to local conditions. The reaction of the several communities to the course of Congress is not usually in accordance with broad national principles, but is rather the expression of local disappointment, or the reverse, with the course of a Senator or Representative.

In short, there is no general expectation that national issues will be broadly affirmed or clearly defined in such an election. Tendencies are revealed, of course. A state of popular feeling is disclosed, whether it be one of satisfaction or resentment, and the initial processes are set in motion which finally reveal public opinion in its decisive mood at the next national election.

NOT HAPPY OVER FAILURE.

I think it may fairly be said on the part of the Democrats throughout the country that they are not happy over the Republican failure. No man whose patriotism is worth its salt can have any feeling but one of depression, and even of alarm, at the course of the Republican administration. That President Harding and his unwieldly majority in Congress should stumble and fail in some important respects is not altogether surprising, considering the infirmities of human nature and the complexity of the problems confronting the Nation. Uniform success was too much to expect. But the Nation regardless of party did expect a sober, conscientious, dispassionate, and patriotic approach to the problems of the day. This expectation has been wholly disappointed. Instead of serious work on the part of Congress we have been regaled by interminable discussions of patronage, endless recriminations between individuals, vulgar diatribes, pettifogging speeches in praise of achievements that have not been achieved, and puerile and self-refuting claims of economies which have not happened, such as the speech of Senator MCCORMICK on Republican savings.

It is a pity that men who have enjoyed contact with educational processes and who presumably have a cultivated man's sense of the decencies of debate should be guilty of such studied distortion of the facts and descend to such banalities. But such is the corrosive effect of the disease called "party" that men like MCCORMICK and WATSON of Indiana, not to speak of LODGE and FRELINGHUYSEN and MCCUMBER and FESS and FORDNEY, will utter the inanities that constitute the staple of their congressional speeches, under the impression that their fellow countrymen are such gulls as to swallow them whole and smack their lips over the pleasing taste of insincerity and "bunk."

THE GOOD OLD DAYS.

If I were called upon to say what ails the Republican Party, I might reply in the language which Mr. H. G. Wells used in referring some time ago to the city of Boston. "Boston," said he, "reminds me of a community which reached a state of absolute repletion about the year 1875." And so with the Republican Party. It still thinks of government as the Standard Oil Co. regarded it in the eighties, when Mr. Archbold passed upon nominations for the Federal bench, or when the American Sugar Refining Co. relied upon the party's success for immunity in certain little matters of false weights and measures in their accountings with the Government; or when the consolidated banking power of the country could prevent any practical step toward a Federal banking system unless it were controlled by Wall Street and made subservient to speculative manipulations. Those were the good old days. Those were the days of "sterling Republicans." Hanna was their prophet; Aldrich was their vicar; Taft was their chore man; Roosevelt was their naughty but repentant boy who had his good points. And the men in Washington to-day who are impersonating "best minds" are the apprentices and office boys of the old system, reverently imitating the departed and legendary figures of the bygone times, but—like every second generation, whether it be in the Vanderbilt family or the Standard Oil Co. or the Harvester Trust—not in any way the equals of the men who designed and built the machine which they continue ineffectively to operate. And so they persist in the old ways. They not only fail to understand what has happened in the intervening years but they persist in the determination to act as if nothing had happened.

What is the result? Look in any direction. It is easily perceived. Scandals galore—the civil service assailed; the dismissals in the Printing Bureau; the aborted activities of Dover, the axman; the recalled appointment of Nat Goldstein; Daugherty, mum and undefended, riding out the storm; our pillbox brigadiers; our bootlegging national merchant marine, and so on indefinitely.

In the matter of broken pledges the administration no longer defends itself. As Artemus Ward said, "If a man calls you a liar, never make him prove it," and thus, floating with other jettisoned pledges, the grandiose promise of "an association of nations" which was to supersede the league is no longer mentioned.

INDIRECT PLUNDERING.

The Republican Party promised a reduction of our taxes, but it can not forego the old Republican habit of indirect plundering for the enrichment of the contributors to its campaign fund. Therefore we have promise of a tariff worse than the Payne-Aldrich bill of evil memory. Not protection but monopoly and extortion are its objects, and the puny abatements of our taxes, if any there shall be, will be lost in the overwhelming increase in the cost of all the necessaries of life. One is tempted to exclaim, in the words of the late Prof.

Thomas Davidson, once described as among the world's 12 most learned men, "Nay, man, if you believe in a protective tariff, you're in hell already, though you may not know it."

Congressional election approaches and votes are needed. What more natural than that votes should be bought? Accordingly, we have the McCumber bonus project, which contemplates laying a burden of $4,000,000,000 upon the already bowed backs of the taxpayers. Vote buying has always been a field in which the much-vaunted "efficiency" of the only party fit to govern has delighted to display itself. The transition from bribe to bonus is a simple one. Both have the same object—votes. They differ only in degree, or rather in amount. The hapless Senator NEWBERRY spent only $178,000, and his own money, for that matter. But there are about 400 Congressmen seeking reelection, and the bonus involves a distribution of $4,000,000,000, which practically means spending $10,000,000 per Congressman of other people's money. One might say of NEWBERRY, as Burke said of Clive, "One marvels at his moderation."

Turning to labor, the situation is grave and disheartening. The postwar deflation has struck wages. The Labor Board has been called upon to act and it functions in a strictly Republican way. Dividends upon watered stock must be maintained. They can not be maintained without great inroads upon the wage fund. But the principle of the minimum wage, Republicanized, becomes the principle of the minimum dividend. And now we have the shopmen of the railroads and other sympathetic crafts threatening to tie up the Nation's arteries. This is obviously a case for scientific and conciliatory approach, but the press of the moment carries the report that the Republican expedient is not solution but militia, not justice but force, not patient examination of facts and correction but the ultimatum. And what is worse, perhaps, an ultimatum which does not speak finality, a mere feint, to cover a wavering purpose and a feeble grasp. The end is not yet.

INVOLVEMENTS AND COMMITMENTS.

In the field of foreign relations we seem content to avoid everything that savors of "involvements" or "commitments." We are in favor of peace, but only where it already exists. We will not even discuss peace in Europe where our help is sorely needed, lest perchance we find ourselves "entangled," but in the Orient we ally ourselves with the two foremost imperialisms in the world against our protégé, China, and our traditional friend, Russia. Toward the 51 sovereign and enlightened peoples who compose the League of Nations we have not made a single friendly sign. No helpful action, no stanch and friendly word, no constructive decision or endeavor is allowed to qualify or disfigure our rigid aloofness. We have drawn the protective mantle of our barrier oceans around us, thankful that we only read of Europe's distress and can not hear its cries, and persist in a state of insensate political and commercial isolation, building up our fortunes by taking in each other's washing and collecting back rent from our allies.

And so the Republican picture might be painted with multiplying and unending detail. It is grisly enough without wasting canvas.

With these grave thoughts in mind, it is not to be wondered at that the country is pretty well fed up with Marion oratory, Columbus glee clubs, "normalcy," and the "founding fathers," to say nothing of the pretty legend of steak and onion dinners at the White House.

But the hour of retribution, although it approaches, has not struck. One does not reap until the crop is grown. The Democratic Party is waiting until Republicanism loses the last of its seven veils, until all men agree as to what it is and what its noxious fruits are, and then, with unity and precision, will proceed to strike it down.

One often hears the remark that there is little difference between the Republican and Democratic Parties. This is far from the truth. The Democratic Party is in a very different state of mind from that of the Republican Party. Its gaze is up, not down. It is looking forward, not back. It feels that it is the party which has had the privilege of collaborating with one of the greatest of American Presidents. It thinks it knows the difference between his distinction of mind, his scientific grasp of administration, his inflexible courage and austere purity in the public service, his social vision, his great conception of America's rôle as the guide and helper of humanity, and on the other hand the mental and moral mediocrity of the administration which is now in power. The Democrats of the country are proud of their part in sustaining and helping forward the great policies of Woodrow Wilson.

They think America acquitted itself well in the war and are proud of the country's record. They rather prefer this point of view to that of the Republican Party, which has sought to impugn their country's motives, to belittle its efforts, to smirch its leaders in the Great War effort, and to deprive the country of its well-earned consolations for its sacrifices by a methodized program of sneering and disparagement—all of which, of course, has its obvious motivation in a consuming jealousy.

HOPES OF DEMOCRATIC PARTY.

Some day the Democratic Party hopes that America will regain the moral leadership in the world which the Republican Party would not suffer it to retain. It proposes a more rational objective than the "isolation" which to-day has stranded the United States far above the currents of world interest, world sympathy, world trade, world influence, and world power.

The Democratic Party is also in sympathy with much of the deeper subsurface unrest which the people feel. Not that it approves the more violent manifestations of this unrest; not that it regards some forms of expression which it takes as either rational or just; but it senses the evils of rapacious competition. It recognizes that there are great inequalities in our social and industrial system which must be corrected, and to that end it hopes some day to bring to bear upon such problems a scientific method and a disinterested approach, of which thus far there is no suggestion either in the Republican mind or program.

I say the "Republican mind." Because, after all, the action of the electorate is an expression of hope, an effort to express the trend of life, to render articulate the people's sense of justice and of their interest. A party which is frankly skeptical of progress, ashamed of idealism, and elevates the "concrete" and the "practical" and the "limited objective" to the plane of ritual is a poor instrument for the fulfillment of aspirations. There is a vast difference between a brake and an accelerator, and a dead horse is a poor mount.

Some one wittily commenting on the atmosphere of the present administration said he would rather be charged with embezzlement than suspected of idealism in Washington, and even the Chief Justice, so recently the president of the League to Enforce Peace and the enthusiastic advocate of the League of Nations, now refers to the latter, with his somewhat overworked chuckle, as "the league which shall be nameless."

But all this will pass. The sordid apostasy of the Republicans to the true and abiding ideals of America will be swept away by the tide of moral earnestness, which has already turned and is seen everywhere to be rising and gaining in its onrush.

The earnest and thoughtful minds of the country are not in the Republican Party. They are not all in the Democratic Party, to be sure, but many of them are—enough to give tone, point, and character to the party. The economic illiteracy which makes the present Congress a veritable museum of blundering is preponderantly on the Republican side of both Houses. True, we have BORAH and NORRIS and now and then LENROOT and LA FOLLETTE in the Senate uttering warnings and sputtering protests. Their effectiveness, however, is destroyed by their organic adhesion to the majority which they denounce, but at the same time sustain in its control of the main currents of legislative policy.

The Democratic Party perceives that the country can not survive if business initiative is extinguished by unbridled taxation. It realizes the truth which every unprejudiced observer sees, that our industrial civilization can not live nor our agricultural interests prosper without overseas markets. It knows that our own recovery is conditioned upon the recovery of our sister nations. It is enlightened enough to appreciate the fact that Republican prejudices, provincialisms, illiteracies, and vote-ogling demagogy are not substitutes for a sound economic program, built upon actualities and supported by inexorable laws of universal application.

It knows that wealth and power have their responsibilities which can not be ignored even in the case of nations; that pride goeth before destruction, and the spirit of self-sufficiency and self-gratulation is the sure forerunner of humiliation and failure.

Soon the leaders of the Democratic Party will be heard again. It will be time. The season of reaction, the period of the country's relapse, draws to an end.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Committee on Finance inserting

paragraph 1300, chemical wood pulp, on which the Senator from Montana [Mr. WALSH] is entitled to the floor.

Mr. WALSH of Montana. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McCormick	Pomerene
Borah	France	McCumber	Ransdell
Brandegee	Gooding	McLean	Robinson
Bursum	Hale	McNary	Sheppard
Calder	Harreld	Moses	Simmons
Cameron	Harris	Myers	Smoot
Capper	Harrison	Nelson	Spencer
Caraway	Heflin	New	Stanfield
Culberson	Hitchcock	Newberry	Sterling
Cummins	Jones, N. Mex.	Nicholson	Trammell
Curtis	Jones, Wash.	Oddie	Walsh, Mass.
Dial	Kellogg	Overman	Walsh, Mont.
du Pont	Keyes	Pepper	Warren
Ernst	Ladd	Phipps	Watson, Ind.
Fernald	Lodge	Pittman	Willis

Mr. DIAL. I wish to announce that my colleague [Mr. SMITH] is absent on official business. I will let this notice continue through the day.

Mr. RANSDELL. I desire to announce that the Senator from Illinois [Mr. MCKINLEY] and the Senator from Wyoming [Mr. KENDRICK] are engaged in a hearing before the Committee on Agriculture and Forestry.

The PRESIDENT pro tempore. Sixty Senators have answered to their names. There is a quorum present.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from North Carolina?

Mr. WALSH of Montana. I yield.

Mr. SIMMONS. I wish to present and tender to the majority a proposition for fixing a time for a final vote upon the amendments of the committee and upon amendments offered on the floor and upon the whole bill.

We did not decide that it would be feasible to make this proposition until after the wool schedule, upon which the attention of the country was so largely focused, had been disposed of. But that being out of the way, the general principles of the bill and its character having been very generally discussed and probably thoroughly discussed on both sides, we see no reason why we can not now come to a unanimous-consent agreement fixing a time to vote on the amendments both of the committee and those offered upon the floor, and upon the whole bill. I therefore send to the Secretary's desk the following proposition.

The PRESIDENT pro tempore. The Senator from North Carolina presents a request for a unanimous-consent agreement, which the Secretary will read for information.

The reading clerk read as follows:

It is agreed by unanimous consent that on August 19, 1922, at 11 o'clock a. m., the Senate will proceed without further debate to vote upon H. R. 7456, to provide revenue, etc., and upon all motions and amendments thereto which may be pending or which may be offered and to the exclusion of all other business.

That not later than August 11, at 11 o'clock a. m., the Senate will proceed to vote without further debate upon all committee amendments that may be pending or that may be offered, and that immediately following the conclusion of the votes on committee amendments the Senate shall proceed to the consideration of other amendments, if any, which may be submitted.

That all time shall be divided as nearly equally as may be between the majority and the minority, and shall be controlled by the Senator from North Dakota [Mr. MCCUMBER], on behalf of the majority, and by the Senator from North Carolina [Mr. SIMMONS] on behalf of the minority.

Mr. BRANDEGEE. Mr. President, I ask that the proposed agreement may be read again.

The reading clerk again read the proposed unanimous-consent agreement.

The PRESIDENT pro tempore. Is there objection?

Mr. MCCORMICK. Mr. President, has the proposed agreement been submitted by the Senator from North Carolina [Mr. SIMMONS] to the Senator from North Dakota [Mr. MCCUMBER]?

Mr. SIMMONS. I will say to the Senator from Illinois that I have not consulted with the Senator from North Dakota in reference to the matter. I stated that I simply tendered the proposed unanimous-consent agreement to the majority.

Mr. SMOOT. Then the Senator from North Carolina does not desire the proposed unanimous consent now to be disposed of?

Mr. SIMMONS. I am willing that the matter shall take whatever course the majority may decide upon. If the majority are not now prepared to accept the proposition and desire to consider it, of course I would not suggest immediate action upon the request. I am simply tendering the proposition to the majority. I have been asked repeatedly if I would not consent to some time for a vote, and this is my response. I submit it to the majority.

Mr. MCCUMBER. Mr. President, this is somewhat of an unusual method, at least, of arriving at a unanimous-consent agreement. Ordinarily those in charge of a pending bill and those opposed to it have some conversation concerning the matter and try to get together before a request for an agreement to vote is presented to the Senate. In this instance the request has not followed that course. I am not, however, finding any fault at all with the course suggested by the Senator from North Carolina. The Senator is presenting the matter in this form to this side of the Chamber, and, while the time which he has suggested for a vote on the pending bill seems to me to be unnecessarily late, I desire to say that I should be glad to take up the proposition and talk with the Members on this side of the Chamber in reference to it and consider any proposal from our side. I am very glad to have this first step taken toward bringing the pending measure to a close. I think, however, all that can now be done is to give us time to look over and study the proposition. I am sure I shall give the Senator from North Carolina a response to his proposal within the day.

Mr. ROBINSON. Mr. President, the time has arrived when the Senate should agree to a time for final disposition of the pending bill. The Senator from North Dakota suggests that the agreement should, perhaps, provide for a final vote on the bill earlier than August 19. I have no objection whatever to that suggestion. As originally drafted the proposal contemplated a vote very much earlier. Some Senators, however, think that, inasmuch as a number of important provisions in the committee amendments remain undisposed of and no time so far has been devoted to individual amendments which are to come from the floor, the time fixed in the proposed unanimous-consent agreement is reasonable and the time provided is necessary for the intelligent determination of the issue involved.

The important point is to reach an agreement for a vote on the pending bill. The Republican press of the country contains declarations that it will be impossible to pass the pending tariff bill prior to the November election, and that Republican Senators are highly gratified and greatly relieved by that fact. Some time ago it was declared on the floor of the Senate that there was a growing disposition on the majority side of the Chamber to prolong this debate and to protract the consideration of the pending measure until such time as it will be a practical impossibility to accomplish its passage prior to the elections.

In view of the course that the measure has taken in the Senate, it is important and necessary that the people of the United States should be given an opportunity to know the policy of the Congress and the policy of the present administration touching this important subject. I express the hope that the agreement may be entered into as presented by the Senator from North Carolina, or, if possible, that a date for an earlier vote on the pending measure may be fixed.

Mr. LODGE. Mr. President, I have not seen the proposed agreement, having only just heard it read since I reached the Senate Chamber this morning. I am very anxious to secure a vote on the pending bill and to have it disposed of at the earliest possible moment. I had hoped we might reach an agreement to vote on an earlier day than the one proposed in the unanimous-consent agreement. I should like, however, to have an opportunity, as the Senator from North Dakota [Mr. MCCUMBER] has suggested he also would desire, to look the proposition over and to talk, at least, with some of the Republican Members of the Senate before giving assent to the agreement at this moment, which I do not now feel able to do. I think we ought to have an opportunity, at least, to consider the proposition as it has been presented to us without, so far as I am concerned, any notice at all.

The PRESIDENT pro tempore. Is there objection to the agreement proposed by the Senator from North Carolina [Mr. SIMMONS]?

Mr. JONES of Washington. Mr. President, I wish to ask the Senator from North Carolina a question. I wish to ask the Senator if it is his idea that after this agreement shall have been entered into any Senator who has an amendment which he desires to present must consult the leader on his side and arrange with him as to the amount of time that the Senator desiring to present the amendment will be allowed for the consideration of such amendment?

Mr. SIMMONS. I will state frankly to the Senator that we adopted that method because we recognized the fact that some amendments would require very little discussion while other amendments of very great importance would require more, and that it would therefore be better to allow some elasticity in the

FREE PUBLIC LIBRARY
NEW CASTLE, PA.

matter of debate, so that on important amendments a longer time would be allowed for presentation and more time might be accorded for reply. It was thought that would be a better method than to limit debate, especially where so many different propositions were involved which were of such varying importance.

Mr. JONES of Washington. That is the only feature of the proposal which I do not like.

Mr. SIMMONS. At first I, too, did not like it, but upon reflection it finally seemed to me that that was the only solution of the matter. This is not a case of dealing with one or two propositions, but these amendments deal with separate propositions of differing importance. One may be a very important matter, while another may be a matter of but trifling consequence. We therefore thought some elasticity in regard to the matter of time to be allowed in the discussion ought to be granted in order to accommodate the situation.

I think that that is a very happy solution of the difficulty.

Mr. HARRELD. Mr. President, I should like to ask the Senator a question. For instance, if I desire to submit an amendment does the proposed agreement contemplate that I must get the consent of the leader of my side in order that I may do so?

Mr. SIMMONS. After the time fixed has arrived, if the Senator should rise and announce that he desires to occupy so much time, the Senator in charge of the bill, the Senator from North Dakota [Mr. MCCUMBER], with the Senators on the majority side of the Chamber, could agree as to the length of time that it is necessary to enable him to discuss it, and accord him that time.

Mr. HARRELD. Mr. President, I should like to ask one further question. Is it proposed in the agreement to vote on all committee amendments on the 11th of August, and are they to be voted upon then without any further debate?

Mr. SIMMONS. It is provided they shall be voted upon then without further debate.

The PRESIDENT pro tempore. The Chair is unable to hear the colloquy, and is interested in knowing whether or not objection is made.

Mr. HARRELD. Mr. President, I desire to ask a further question.

Mr. WATSON of Indiana. Mr. President, we wish to discuss the matter.

Mr. HARRELD. Mr. President——

Mr. LODGE. Action will be taken when it is necessary, and in the meantime the request ought to go over.

Mr. WATSON of Indiana. Yes.

Mr. LODGE. The Senator from North Dakota has asked that it go over and I have made the same request. That is equivalent to an objection.

Mr. SIMMONS. I have no objection to that.

Mr. WATSON of Indiana. I desire to ascertain the present status. On account of the fact that the chairman of the committee and the leader on our side have not been notified that the agreement was going to be proposed at this time, would not the Senator from North Carolina be willing to wait, say, until 3 o'clock or 4 o'clock before he presents it?

Mr. SIMMONS. Probably the Senator was not here, but I said and I desire to repeat that this is merely a tender. I am not asking action upon it now. It is merely a tender on the part of the minority side of the Chamber to the majority side of the Chamber.

Mr. WATSON of Indiana. That is all right.

Mr. SIMMONS. The Senator from North Dakota has stated that during the day, after conference, he would indicate his position in the matter.

Mr. WATSON of Indiana. The reason I asked the Senator the question anew was because the President pro tempore insisted upon putting it up to the Senate.

Mr. SIMMONS. I agree that no action shall be taken at the present time, but later in the day I will call the matter up.

The PRESIDENT pro tempore. The question will be passed over until called up by the Senator from North Carolina.

The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. At the beginning of the paper schedule, the committee proposes to insert a new paragraph, as follows:

PAR. 1300. Chemical wood pulp, unbleached or bleached, 5 per cent ad valorem: *Provided*, That if any country, dependency, province, or other subdivision of government shall forbid or restrict in any way the exportation of (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly), or impose any export duty, export license fee, or other export charge of any kind whatever, either directly or indirectly (whether in the form of additional charge or license fee, or otherwise), upon printing paper, chemical wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon chemical wood pulp, when imported, either directly or indirectly, from such country, dependency, province, or other subdivision of government, an additional duty equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government, upon either an equal amount of chemical wood pulp or an amount of wood necessary to manufacture such wood pulp, or an amount of printing paper ordinarily manufactured from such chemical wood pulp.

Mr. WALSH of Montana. Mr. President, when the discussion of the pending amendment was interrupted on yesterday afternoon I was endeavoring to present the important public question involved, namely, as to whether, in view of the situation in which this country finds itself with reference to its timber supply, it was a wise thing to offer a premium upon the rapid consumption of our forests, and whether that policy was not in plain contravention of the wise policy of conservation which we believed we had entered upon some years ago.

The situation which confronts us, Mr. President, is very tersely set forth in a paper by Dr. Hugh P. Baker, the secretary of the American Paper & Pulp Association, published in the Paper Trade Journal on January 13, 1921, which was incorporated in the hearings upon this schedule before the House. In that he said:

The forests of America were the finest of the world when our forefathers first began the development of this country. No other continent within the memory of man has been so blessed with forests as America. The very abundance of forests caused us to become careless with them, and the years, almost centuries, of carelessness can not be overcome even with the aggressive agitation of a decade. In a way we must exhaust our virgin forests before our people will be convinced that it is a profitable undertaking to handle our forests as a crop as we have learned to handle agricultural crops. The future of the paper industry in this country is absolutely dependent upon a permanent supply of the right kind of wood from our forests. The disappearance of our forests over vast areas is going to have a serious influence upon the industry. For the next 25 to 50 years the problem of a permanent suppy of wood for our eastern paper mills is going to be a very difficult one to solve. It will mean our turning to the forests of the far West or Alaska or to the paying of a royalty of considerable amount to those who bring in wood or pulp from outside our boundaries. Should it be possible to secure proper legislation and make a beginning in a reasonably effective way in protection and reforestation, we may expect in the course of 40 to 60 years to begin to produce on the forest land east of the Mississippi all the wood we will need for the paper industry of the country. However, due to the carelessness of the past, the industry is facing fifty-odd lean years, with the problem of raw materials a difficult one to solve and a problem which some mills may be unable to solve.

But we are told, Mr. President, by the Senator from Maine [Mr. HALE] that they are solving the problem in the State of Maine by simply allowing to remain standing some of the trees in the forest that is cut down for pulp wood, allowing the area to become reseeded. That is a very optimistic view of the situation to take, and one which our great Forestry Service says is utterly futile. I want to submit the last we have on the subject from the Forestry Service. I read from the report of the forester in the Yearbook of the Department of Agriculture for the year 1920, as follows:

The average well-kept farm in the upper Mississippi Valley uses 2,000 board feet of lumber every year for repairs and improvements. This yearly use of lumber represents probably the minimum requirement of efficient twentieth century agriculture. Turn to our manufacturing communities. Industrial centers like Pittsburgh, Chicago, or St. Louis consume from two to four times as much lumber per capita as the country at large. To maintain our railway systems requires 125,000,000 wooden crossties every year, and the more railroads we build the larger does this permanent requirement become. And our use of paper, which is made largely from wood, has grown by leaps and bounds. In 1880 the average person in the United States used about 30 pounds of paper every year; to-day the average American uses 125 pounds every year.

* * * * * * *

Three-fifths of the forests which sheltered America's aboriginal inhabitants are gone. From the remnant we are now cutting yearly at least four times as much wood as is being grown. We are even cutting trees too small for the sawmill more rapidly than they are being produced. The American sawmill has moved over the face of the land, cleaning up one forest region after another. About 5 per cent of the virgin forests of the New England States is left. In 1850 New York held first rank among the States as a lumber producer; to-day she imports probably 90 per cent of the forest products required by her own people and industries. In 1860 Pennsylvania stood first in the cut of lumber and exported large quantities to her sister States. The lumber cut in Pennsylvania now is less than the requirements of the Pittsburgh territory alone. By 1892 the Lake States had become the great lumber camp of the country; to-day their cut has dropped to a single billion feet, and of their vast pine forests about 2 per cent is left.

There are not many more chapters in this story. The pine belt of the Southern States is now our greatest source of lumber, but that region has also passed its peak, and all the evidence goes to show that within another 10 or 12 years the Southern States will have little lumber for export. Fifty per cent of the timber yet standing is in three States bordering the Pacific Ocean. The westward movement of forest industries is becoming more accelerated every year; and every year constantly greater quantities of lumber are being hauled 2,000 or 3,000 miles from the sawmill to its consumer. The average freight charge on lumber to-day amounts to more than the lumber itself cost 30 years ago.

* * * The exhaustion of our timber supply is coming about not because we have used our forests freely but because we have failed to use our timber-growing land. The problem in a nutshell is the enormous area of forest land which has been so logged and so burned that it is producing little or nothing. We have over 80,000,000 acres, an area greater than all the forests of France, Belgium, Holland, Den-

mark, Germany, Switzerland, Spain, and Portugal, which has been denuded to the point of absolute idleness so far as the production of any timber of commercial value is concerned. We have other enormous areas of cut-over land now growing but a fraction of the amount of timber which they might produce. And we are adding to these areas of idle or largely idle land from 10,000,000 to 15,000,000 acres every year as destructive logging and still more destructive burning progress.

Now, how to remedy this situation.

After discussing the seriousness of it, the forester continues:

Nor can we solve this problem by the old economic theory of leave it alone. Considerable reforestation comes about by chance. Areas in the South Atlantic States are now yielding their third cut of saw timber in spite of the prevalence of fires and other destructive agencies. Considerable reforestation is coming about through the intelligent action of landowners—

The process referred to by the Senator from Maine [Mr. HALE]—

There are not a few holdings in our north woods which have produced yields of saw timber and pulp wood through three generations of owners.

I suppose that in the State of Massachusetts timber has been cut off probably three times since 1620. In visiting that State some time ago, I speculated upon whether the timber I saw was the original virgin growth or whether it had been cut off, and I was told at that time that that was the third growth. That is to say, in 300 years the timber had replaced itself three times.

Year after year the planting of denuded lands is increasing. It is safe to say that 12,000,000 or 15,000,000 young forest trees are planted annually in the New England States and probably as many more in the Middle Atlantic and Central States.

So it will be observed that due consideration has been given to the reforestation referred to by the Senator from Maine.

The forester continues:

Such instances of reforestation through private initiative are, indeed, encouraging and should receive every reasonable form of public assistance. But, weighed in the balance against our national needs for timber, the production of wood by voluntary private effort is hopelessly inadequate and will remain so for a long time to come.

Mr. WILLIS. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Ohio?

Mr. WALSH of Montana. I do.

Mr. WILLIS. Will the Senator state from what document or report he is reading?

Mr. WALSH of Montana. I read from the Yearbook of the Department of Agriculture for the year 1920.

It takes a long time to grow merchantable timber, and the vast public interests at stake can not, under a real national conception of the problem, be left to the turn of profit or loss or the business policy of the individual. We must devise some plan-wise system of reforestation, with enough public participation and assistance to make it effective, which will keep not an isolated spot here and there but hundreds of millions of acres of forest land at work growing timber.

Mr. WILLIS. Mr. President, before the Senator leaves that particular part of the discussion, does the report give any information, or has the Senator any information of his own, as to this point: I have heard much about reforestation. Does the Senator know whether the product of reforestation is entering to any considerable extent into our supply of pulp wood now?

Mr. WALSH of Montana. That was the subject of discussion yesterday.

Mr. WILLIS. I was unfortunate enough not to hear it.

Mr. WALSH of Montana. My information is that reforestation carried out as is here suggested is in its infancy, and that no timber grown by scientific reforestation has ever been used in this country in the manufacture of wood pulp. The fact is, however, that the forests have themselves by chance been reforested after having once been cut down, so that in the old settled portions of the country there is a second growth after a hundred years or so that has been cut down for timber; but nothing in the way of the cultivation of forests has gone on to such an extent as to make the timber available for wood pulp.

Mr. WILLIS. Does the Senator know practically whether that is true of spruce? That is the best pulp wood. Take the case of a forest of spruce which is cut off. Will it come up to spruce or jack pine, or what?

Mr. WALSH of Montana. Of course spruce rarely grows singly. In our country it is quite common and is interspersed with other timber—fir, pine, and that kind of thing.

Mr. WILLIS. The reason why I ask that question is that in the case of the only spruce forest that I have seen cut off that particular kind of tree did not seem to have the ability to reproduce itself. Some other trees came up—what they call in that country jack pine and stuff of that kind—but it was not spruce and not very good pulp wood. You could not make print paper out of it. You could make kraft and other stuff, but you could not make newsprint paper.

Mr. WALSH of Montana. My observation has been quite in keeping with that suggested by the Senator from Ohio. Out in our country, as a rule, the lodgepole pine first exhibits itself in areas that have been cut over. The other trees require some protection, and they would come in the course of time, after shelter is provided, as I take it, by the hardier varieties of pine.

So, Mr. President, we are squarely confronted with the proposition as to whether we shall go on encouraging the destruction of our forests by putting this duty upon the importations of wood pulp from abroad. I submit that it is an unwise policy.

But there are many other considerations which operate against the wisdom of the adoption of this amendment than that to which I have addressed my attention thus far.

I called attention yesterday to the very heavy importations of chemical wood pulp, of course very largely coming from Canada. Not only are the importations large, but it is conceded that chemical wood pulp, and ground wood pulp, for that matter, can be produced in Canada at a less cost than in this country, for two reasons. In the first place, the raw material, the pulp wood, is more abundant and less expensive; in the second place, the process of conversion is less expensive, very largely by reason of the fact that the Canadian mills as a rule are newer, more modern, operated more efficiently, and, in addition to that, power for the operation of them is obtainable at a less cost, generally, than in this country.

So that might appear to be a reason why a duty should be put upon wood pulp; but it is not a good reason, because the wood-pulp manufacturers of this country are making a very excellent profit at the present time, and the operation of the duty would be, not to enable them to operate more successfully, but simply to enable them to operate with a little more profit than they enjoy at the present time. I speak the conclusion of the Tariff Commission.

Mr. HALE. Can the Senator give some figures about the profits?

Mr. WALSH of Montana. I am going to give the figures given by the Tariff Commission. That presents another question of public policy, namely, if a product can be manufactured in a foreign country at a less cost than it can be manufactured in this country, and yet the American manufacturer is making a good profit under the law as it is, is it justifiable to impose a protective tariff in order that his profits may be increased? That is to say, in that kind of a case, should a tariff duty be imposed equalling the difference in the cost of production at home and abroad?

I read from page 28 of the pamphlet of the Tariff Commission on this subject, as follows:

The average cost of production of wood pulp in Canada is considerably less than in the United States. In 1915 the average cost for ground wood was 23.9 per cent lower and sulphite 14.6 per cent lower. In 1916 the percentages were 23.5 and 19.2, respectively. In spite of this difference in cost, Canadian competition is not at present a serious menace to American producers. This is because the strong demand maintains the price at a figure sufficient to give the American producers a profit, though, of course, the Canadian producer makes a greater profit. This condition is brought out clearly by the diagrams, figures 3–6. In all four diagrams, as may be seen, the average Canadian cost line is below the average American cost line, but both are below the average price line. It is simply a case where competitive manufacturers produce at different costs, and the marginal cost tends to equal the price. A strong demand calls for an output greater than the most efficient manufacturers can supply. The price rises, making it possible for less and less efficient producers to compete, until the "marginal producer" is reached, whose cost equals the price. The Federal Trade Commission Report (65th Cong., Doc. No. 49) segregates the American producers into classes. For ground wood, Class I, less than $10.50; Class II, $10.50 to $12.50; Class III, $12.50 to $15; Class IV, $15 to $17; Class V, $17 and over. For sulphite, Class I, less than $27; Class II, $27 to $30; Class III, $30 to $33; Class IV, $33 to $36; Class V, $36 and over. The output and average costs of each of these groups is shown by the steps in the diagram. If the Canadian producers were segregated, their costs also would be shown by steps. The American and Canadian producers could then be segregated into classes without reference to nationality, and there could be a single flight of steps. But the conclusions would be the same: The low-cost producers would make a large profit, the higher-cost producers progressively less and less profit until the marginal producer was reached, who would just "break even." The demand may be so strong that for a time at least there is no marginal producer—that is, the price rises to a point where even the highest cost producer makes a large profit. This condition is suggested in figures 4, 5, and 6, especially figure 6. Under free competition such a condition could not be permanent. If it does remain permanent, there is a suggestion of restriction of output and monopoly.

So the conclusion which I have announced is not only that of the Tariff Commission but it is that of the Federal Trade Commission—that the wood-pulp producers of this country do not need the protection which is accorded here in order to enable them to make a fair profit on their output. Nor are they menaced particularly by foreign competition, the demand being so great as to absorb the product.

There is still a further reason why this duty should not be imposed. There are a vast number of paper mills in this coun-

try which have been engaged in the manufacture of wood pulp. Quite a number of paper mills produce their own wood pulp and consume it in the manufacture of paper. Other mills produce wood pulp only and sell that wood pulp to other factories, which make paper of the wood pulp, the paper mills being obliged to buy either from the American wood-pulp producer or from the Canadian wood-pulp producer.

So it will be observed that the duty upon wood pulp is a burden upon the paper mills of the country, and necessarily so. But worse than that, the paper mills are obliged to sell their paper in a perfectly free market; that is, so far as newsprint is concerned, which, of course, is the great product. They get no compensatory duty whatever, newsprint being upon the free list. So they are obliged to buy in a protected market and sell in a free market.

There are about 16 mills in this country, according to the information given us by the Tariff Commission, engaged in the manufacture of wood pulp, and which sell their products to the paper mills. There are about 600 paper mills in the country which buy their wood pulp either from the American producer or from the foreign producer.

I give the information upon that point as it comes to us. I read from page 2979 of the House hearings on this schedule as follows:

> Out of the 146 mills manufacturing chemical pulps, such as bleached soda, bleached and unbleached sulphite and kraft pulp, not more than 15 mills manufacture pulp solely for sale; the other pulp mills manufacture pulp for their own requirements, and have more or less surplus quantities to offer for the trade from time to time, depending on their own needs. As against the 15 pulp mills manufacturing chemical pulp exclusively for the trade, there are approximately 600 paper mills in the United States which do not produce their own chemical pulp and are obliged to buy their pulp either from surplus production of their competitors or in the open market.

It need not be said, Mr. President, that under these circumstances the 600 paper mills in the United States are protesting loudly against the imposition of this duty.

Mr. HALE. The Senator does not mean that there are only 16 mills in the United States which manufacture chemical pulp? Surely he does not include the newsprint mills.

Mr. WALSH of Montana. There are 16 mills which manufacture pulp exclusively for sale. Other mills manufacture pulp and convert it themselves into paper. Some of them make more pulp than they actually consume themselves, and they sell their excess. They, of course, are not interested in the duty upon pulp, so far as they consume their own product. There are only 16 mills which manufacture wood pulp and do not use any portion of it.

Mr. HALE. The manufacturers of newsprint in this country make chemical pulp as well, and they make 50 per cent more chemical pulp than is used in the manufacture of newsprint in the entire country. So there is no lack of supply of the chemical pulp used in the manufacture of newsprint in this country.

Mr. WALSH of Montana. There are a large number of mills engaged in making newsprint which make their own pulp.

Mr. HALE. That is true.

Mr. WALSH of Montana. And some of them make more pulp than they actually need themselves in the manufacture of the paper which they produce, and they sell the excess to the other mills which do not produce any pulp.

Mr. LENROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Wisconsin?

Mr. WALSH of Montana. I yield.

Mr. LENROOT. Could the Senator tell us what the total amount of chemical pulp sold is of domestic production?

Mr. WALSH of Montana. The total production is 600,000 tons.

Mr. LENROOT. How much of that is sold?

Mr. WALSH of Montana. I am not able to give that information. Possibly I have it, but not at hand now.

Mr. WILLIS. I think I have the figures, if I understood the question of the Senator from Wisconsin. What was the question?

Mr. LENROOT. A part of this chemical pulp is used by the manufacturers themselves in the manufacture of paper, as I understand. My question was, how much chemical pulp of the domestic production is sold, by whomever made?

Mr. WILLIS. I think the figures I have are reliable, and they show that in 1921 there were produced of chemical pulp in the United States 1,526,000 tons. There were consumed of that amount by the mills manufacturing the pulp, who also manufacture paper, 1,114,000 tons. That is to say, 73 per cent was consumed by the mills which manufacture pulp and also manufacture paper. That leaves 407,000 tons sold to the converting mills, or, in percentages, 73 per cent consumed by the mills that manufacture the pulp, and the surplus, as pointed out by the Senator from Montana, 27 per cent only, sold to the converting mills.

Mr. HARRIS. With the permission of the Senator from Montana, I may state in reply to the Senator from Wisconsin that there is only 9 per cent of the chemical wood pulp made by the mills which manufacture newsprint paper themselves and 91 per cent of it is manufactured by others than the paper mills.

Mr. LENROOT. That does not tally with the figures given by the Senator from Ohio. The Senator from Ohio, if I understood him, stated there would be 27 per cent of the total domestic production of chemical pulp sold. Did the Senator from Montana understand the figures that way?

Mr. WALSH of Montana. I so understood the Senator from Ohio.

Mr. WILLIS. That was my statement, and I think it is absolutely correct. Is it challenged?

Mr. HARRIS. My understanding from reliable information, as I stated, is that only 9 per cent of the chemical wood pulp used in the manufacture of newsprint paper is made by the mills themselves and 91 per cent is not made by the mills which manufacture newsprint.

Mr. WALSH of Montana. That may be in entire harmony with the statement of the Senator from Ohio. The Senator from Georgia is referring to newsprint only. That is to say, in the manufacture of newsprint only 9 per cent of the pulp is purchased and the other 91 per cent is manufactured by the makers of the newsprint.

Mr. WILLIS. That is not necessarily contrary to the figures I gave.

Mr. LENROOT. Mr. President, will the Senator from Georgia make that statement again? I do not know that I quite followed it.

Mr. HARRIS. I stated that of the amount of newsprint manufactured by the factories in the country only 9 per cent of the chemical wood pulp they use is made by the mills themselves and the other 91 per cent is made by others.

Mr. LENROOT. In other words, 91 per cent is purchased?

Mr. HARRIS. That is true.

Mr. LENROOT. But that includes both chemical pulp and mechanical pulp?

Mr. HARRIS. This is only the chemical wood pulp.

Mr. LENROOT. That certainly does not tally with the figures given by the Senator from Ohio.

Mr. HARRIS. The Senator from Maine yesterday referred to the Great Northern Co. That company has about the lowest newsprint paper production cost in the country because of its magnificent forests and machinery. It has a lower cost even than the Berlin mills of New Hampshire and others, much lower than the International, the largest of all the companies manufacturing newsprint paper, which have a higher production cost because they have not the forests and they have to get the pulp from Canada, and some of their mill machinery is old and not up to date. There are only 21 mills which are favorably affected by the 5 per cent rate recommended by the committee. There are 215 mills that will be discriminated against, and some of them have the highest cost of production. I am referring to the mills in this country. Two-thirds of the newsprint paper is manufactured in Canada and about one-third manufactured in the United States. The Canadian mills have an advantage over ours in the low cost of wood and power, but this is offset by the high price they pay for coal.

I would like to say in passing that nearly all the other paper mills in this country and Canada put up their prices just before and during the war, but it was the Great Northern that held the prices down and did not take advantage of their customers. The majority of mills on this side of the Canadian line have not the forests and must buy the chemical wood pulp from Canada. It is proposed to give the 5 per cent to mills like the Great Northern, which do not need it. They can manufacture paper at a lower cost of production than the International or other mills that have not the forests and have to depend upon getting the pulp from Canada and other sources. This 5 per cent additional expense on chemical wood pulp would be a rank discrimination against a large majority of the paper mills in our country and a heavy tax on the people who buy papers. Nearly all the paper mills in Ohio and other States get their chemical wood pulp from Canada, and this extra duty on them would be an unjust discrimination. The paper mills in the United States have a difficult time competing with the Canadian mills without this additional tax, which will be a heavy burden on most of our mills.

Mr. HALE. The Senator is entirely wrong in stating that 90 per cent of the chemical pulp used in the manufacture of paper is purchased by the newsprint manufacturers.

Mr. HARRIS. That is my information.

Mr. HALE. I am going to talk upon the subject later, and I shall put in exact figures, which I shall have later.

Mr. HARRIS. I would like to have the Senator give the source of his information and his authority.

Mr. HALE. I got it from some of the companies themselves.

Mr. HARRIS. There are only 21 companies which have been here asking for this rate, or the representatives of 21 mills, and all the mills that have forests were included. There are 215 mills that have to buy the chemical wood pulp, and they are protesting against this and did not come down here to ask for it.

Mr. HALE. Those are the converting mills to which the Senator refers.

Mr. HARRIS. They are the mills which manufacture newsprint.

Mr. WALSH of Montana. Mr. President, I want to be as gracious as possible, but I trust that the Senators will defer further colloquy until I get through. I am pretty nearly through with what I have to say about the matter.

Another reason why this ought not to be done is that it is a perfectly manifest injustice to the American producer of paper and the American paper mill. It is really offering a premium to producers of print paper in Canada. The Canadian manufacturer gets his wood pulp in Canada, manufactures it into paper, and that paper is introduced into this country free, while the American print-paper manufacturer, who is obliged to buy his chemical wood pulp in the market, is obliged to pay, if he imports it, the additional 5 per cent, or if he buys it from the domestic producer is obliged to pay the equivalent amount. So that the American producer of print paper is burdened against his own interests and in favor of his Canadian competitor, who is nearer the source of supply and gets his wood pulp free and introduces his print paper into this country free.

Finally, Mr. President, this duty will give a monopoly, as far as a monopoly can be granted, to the American wood-pulp producer, and that is the very purpose of it, as frankly indicated by the testimony of the gentlemen who are asking it upon their behalf. I read from the House hearings, at page 2977.

Mr. HARRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Georgia?

Mr. WALSH of Montana. I yield.

Mr. HARRIS. I would like to give the Senator these figures: In 1920 we got from Canada 419,270 tons of chemical wood pulp, exported from Canada to the United States. In 1921 we got 308,981 tons of chemical wood pulp, which was exported from Canada to the United States.

Mr. HALE. From what is the Senator quoting?

Mr. HARRIS. I am quoting from statistics which the newspaper organization furnished.

Mr. WALSH of Montana. Mr. President, in support of the demand for a duty upon chemical wood pulp, the American Paper and Pulp Association submitted a brief to the House Committee on Ways and Means in which, among other things, they said as follows:

> Your attention is particularly invited to the very great increase both in manufacture and in import of pulp during the year 1920, when the entire paper industry was enjoying an abnormally large business. The fact that the United States produced in the year 1920, under these favorable circumstances, 3,800,000 tons of pulp of all kinds, and that the consumption of pulp during the years 1918 and 1919 (reasonably normal years) averaged 3,850,000 tons, it became self-evident that the United States actually possesses sufficient pulp-making capacity to very nearly meet its requirements in normal years, and that with very little encouragement production might be increased to a point where it could supply the entire demand and have a surplus. It is with a view of obtaining this encouragement that we are asking for a revision of the existing tariff, which places pulp upon the free list and that duties be imposed as follows:

	Per pound.
Mechanical pulp	$\frac{1}{10}$ of 1 cent
Unbleached chemical pulp	$\frac{1}{10}$ of 1 cent
Bleached chemical pulp	$\frac{1}{10}$ of 1 cent

In other words, they want a duty which will enable them to supply the entire American demand to the exclusion of all importations. So frank a demand of a purpose to have an embargo tariff is probably not found in any other place in the hearings.

The duty, in my judgment, Mr. President, is entirely unjustifiable. It would be clearly violative of the public interest. It is unjust and unfair to the American paper manufacturer, and I think ought to be universally condemned.

Mr. ROBINSON. Mr. President, the argument made by the Senator from Montana [Mr. WALSH], it seems to me, can not be answered. During the course of the debate on the bill a few days ago the Senator from North Dakota [Mr. MCCUMBER], chairman of the committee in charge of the bill, made an astonishing statement. He declared that the defeat of Mr. Taft for reelection in his second campaign in 1912 was due to the vindictiveness and revengeful action of American newspapers and magazines growing out of the refusal of the Finance Committee to place newsprint paper upon the free list more than from any other cause. That statement was supported in interesting and somewhat amusing declarations by the Senator from Utah [Mr. SMOOT] and the Senator from Indiana [Mr. WATSON]. The former recalled a threat which he said had been made by Mr. John I. Norris, representing the American Newspaper Publishers' Association, to a subcommittee of the Finance Committee, charged with the responsibility of considering the question of whether newsprint paper should be made dutiable or placed upon the free list, which subcommittee was composed of the then Senator from Rhode Island, Mr. Aldrich, and the Senator from Utah [Mr. SMOOT]. The Senator from Utah declared that Mr. Norris had asserted that there could be no compromise on the question, that the attitude of the American newspapers in favor of free newsprint paper and free wood pulp was unalterable and uncompromising, and that if the Republican Party persisted in refusing to yield to the demand for free wood pulp and free newsprint paper it would be visited with the political wrath of the entire press of the United States and the Republican Party would be driven from power.

The Senator from Indiana [Mr. WATSON] became reminiscent and related incidents and conversations which he said took place in 1908 and 1909 when he was a Member of the House of Representatives and actively engaged in guiding party affairs as the whip of the House. To recall definitely and accurately the statement of the Senator from Indiana, I read from the CONGRESSIONAL RECORD, July 26, 1922, at page 10662, at which point the Senator from Indiana said:

> Mr. President, I do not know that the recital of personal experiences is of very serious consequence in the debate that is now being engaged in by the Senate. Indeed, it throws no very great light upon the subject in hand. And yet, inasmuch as the newsprint paper question has been brought before the Senate, and the relation of Mr. Herman Ridder and Mr. Norris to that question in 1908 and 1909 has been discussed, I think perhaps it would not be out of order, as throwing some light upon the situation, if I were to relate what I personally know about it. I use the personal pronoun only that I may show my relation to the situation.
>
> At that time I happened to be the whip of the House of Representatives and had been for some time. I was likewise a member of the Ways and Means Committee of that body, which considered and formulated the Payne-Aldrich tariff law.
>
> At that particular time I happened to be living with the then Speaker, JOSEPH G. CANNON, who at that time lived on Vermont Avenue, and therefore I had first-hand knowledge of the matters concerning which I speak.

The Senator from Indiana in the same connection then proceeds to relate a conversation which he said occurred in his presence between the then Speaker of the House of Representatives, Mr. CANNON, and Mr. Herman Ridder, in which Mr. Ridder made violent threats of a political nature toward Mr. CANNON and the Republican Party. Having had occasion to look up the record, I want to point out some facts which show that the memory of the Senator from Indiana in this instance, as in some other instances, can not be relied on at this distant date. I do not wish to be understood as impeaching the integrity or the veracity of my friend the Senator from Indiana; but to show that in all probability he was mistaken, at least in some of his declarations, I point out the fact that in 1908 the Senator from Indiana was the Republican candidate for Governor of the State of Indiana. He was then a Member of the House of Representatives. His time during 1908 was, in large part, consumed in the primary and general election campaigns preceding the gubernatorial election in Indiana which, I believe, took place in November of 1908. His term of office as a Member of the House of Representatives expired March 4, 1909. So the Senator from Indiana was not a Member of Congress at the time the Payne-Aldrich bill was introduced and considered; he was not a Member of Congress during the first two years of the Taft administration, during which period the Payne-Aldrich bill was framed, considered, and enacted into law.

The Payne-Aldrich bill was introduced in the House of Representatives on March 17, 1909; it passed that body April 9, 1909; it came to the Senate and was referred to the Finance Committee on April 10, was subsequently reported, and passed the Senate on July 8, 1909, the President approving it on August 5, 1909. So whatever discussion the Senator from Indiana—then the gentleman from Indiana—may have heard between Speaker CANNON and Mr. Ridder must have taken place in 1908, prior to Mr. Taft's first election.

The important point in this connection is that the Senator from North Dakota [Mr. McCUMBER], the Senator from Utah [Mr. SMOOT], and the Senator from Indiana [Mr. WATSON] have all alleged that the failure of Mr. Taft's party to incorporate newsprint paper in the free list in the Payne-Aldrich tariff law and the refusal to permit consideration of a resolution, which it is alleged was pending in Congress in 1908, placing newsprint paper on the free list, resulted in the turning away from the Republican Party of many of the great Republican newspapers throughout the Nation and in the defeat of Mr. Taft when a second time he was a candidate for the Presidency.

I point out the fact that if the conversation which the Senator from Indiana states occurred while he was a Member of Congress in 1908 and 1909 it must have occurred in 1908, prior to the introduction of the Payne-Aldrich tariff bill and prior to Mr. Taft's first election.

Mr. LENROOT. Mr. President——

Mr. ROBINSON. I yield to the Senator from Wisconsin.

Mr. LENROOT. I do not care to get into the controversy, but I know that the Senator from Arkansas wishes to be accurate. The Senator from Arkansas was a Member of the House of Representatives at the time to which he refers, and he will remember that hearings were held on the Payne-Aldrich bill after Mr. Taft's election and before the 4th of March when he was inaugurated?

Mr. ROBINSON. That statement is not quite accurate. Hearings were held on the subject of the tariff after Mr. Taft's election in November, 1908, but the Payne-Aldrich tariff bill was not introduced in Congress until March 17, 1909.

Mr. LENROOT. But the framing of the bill was actually and practically begun before Mr. Taft's inauguration.

Mr. ROBINSON. Immediately following Mr. Taft's election the subject of the tariff was under consideration by the Ways and Means Committee of the House of Representatives; but the point that I am making is——

Mr. CALDER. Mr. President——

Mr. ROBINSON. I yield to the Senator from New York.

Mr. CALDER. It just occurred to me while the Senator from Arkansas was making his statement that the Senator from Indiana also referred to the consideration of some resolution which was pending during the year 1908, before the election of 1908, for if the Senator from Arkansas will recall reference was made to the candidacy of Mr. CANNON for the Presidency, which was to be in the election of 1908.

Mr. ROBINSON. I myself have spoken of that.

Mr. CALDER. Then I beg the Senator's pardon.

Mr. ROBINSON. I have mentioned it. However, an examination of the RECORD does not disclose that any such resolution as that mentioned by the Senator from Indiana in his remarks the other day ever was submitted by the Senator from Mississippi [Mr. WILLIAMS]; which is another illustration of the fact that Senators ought not to be too hasty to testify concerning incidents that have long since passed. The Senator from Mississippi, so far as my investigations go, did not present a resolution placing newsprint paper on the free list. The Senator from Mississippi, however, presented a resolution providing for an investigation of the subject of wood pulp and newsprint paper.

The Senator from Indiana has come in the Chamber during the course of my remarks, and I will say to him that I have pointed out, in connection with the statement that he made in the RECORD some days ago, that while he was a Member and whip of the House in 1908 and 1909 he had heard a conversation between the Speaker and Mr. Ridder—he was a candidate for Governor of Indiana in 1908, and that his term of office as a Member of the House of Representatives expired on March 4, 1909—and I make this statement not to impeach the honesty or the veracity of the Senator from Indiana but to show that his memory of the events is not accurate in detail—that whatever conversation the Senator may have heard while a Member of the House of Representatives occurred prior to Mr. Taft's election, because Mr. Taft was elected in the campaign of 1908; and, while the Ways and Means Committee of the House of Representatives did have hearings on the general subject of the tariff, the bill, which afterwards became the Payne-Aldrich tariff bill, was not introduced in the House of Representatives until March 17, 1909. Mr. Crumpacker became the Republican member from Indiana of the Ways and Means Committee when the now Senator from Indiana [Mr. WATSON] retired from that committee on March 4, 1909. So that any events of which he speaks must have occurred prior to March 4, 1909, and probably occurred during Mr. Taft's first campaign, because his election was in November, and Mr. Taft did not become President of the United States until March 4, 1909. If there had been a fixed purpose upon the part of the newspapers to resent the refusal of the Republican Party in its plan for a tariff to incorporate newsprint paper on the free list or to permit the passage of a resolution placing newsprint paper on the free list prior to March 4, 1909, it must appear to the Senate that the reaction should have occurred in the election immediately following the refusal.

Now, going further with the statement of the Senator from North Dakota, I bring to the attention of the Senate an editorial published in the New York World of July 26, 1922. I am going to read the editorial. It is entitled "Mr. McCUMBER's red herring," and reads as follows:

"The real cause of Mr. Taft's defeat in 1912," Senator McCUMBER charges, "was the refusal of the Republican Party to put newsprint paper on the free list." That this is an attempt to support a faked indictment by sheer mendacity can be proved by looking over the files of Republican papers printed during Taft's second campaign. He received well-nigh solid support from the leaders of the Republican press, a fact in itself remarkable considering the influence and prestige of Roosevelt.

I stated when this matter was under consideration by the Senate a few days ago that my recollection then was that the Republican press had as a whole supported Mr. Taft, thus completely repelling the declaration made by the Senator from North Dakota that the press of the Nation had turned against Mr. Taft because of the refusal of his administration to put newsprint paper on the free list.

Continuing, the New York World editorial says:

It is true that a committee of newspaper publishers went to Washington in 1909 to present the case of the newspapers, but it is obviously not true that this committee had authority to commit the editors of the country to any attitude toward the tariff, the administration, or Mr. Taft personally. It is true that this committee was fairly well satisfied with the newsprint schedule, but it is not true that threats were made to secure the agreement. The committee was not in a position to threaten. For that matter, the metropolitan papers mainly represented by the committee were not so vitally interested in the duty as were the more numerous small-town publications that might have been suspended by an increase in manufacturing costs.

Mr. McCUMBER'S attack on the newspapers is all too evidently a red-herring trail to divert attention from his own rapidly crumbling tariff defenses. Having perpetrated another Schedule K in full view of the public, he sets up a cry of "Stop thief!" and starts full tilt after passersby.

To show that this opinion concerning the censure which has been heaped upon the newspapers of the country by the Senator from Utah [Mr. SMOOT]——

Mr. SMOOT. I deny that.

Mr. ROBINSON (continuing). The Senator from Indiana [Mr. WATSON] and the Senator from North Dakota [Mr. McCUMBER] is not confined to the eastern press or to what may be termed the metropolitan press, to show the resentment at the attitude which those Senators take and the responsibility which they seek to place upon the press of the country for the defeat of Mr. Taft for vindictive reasons, I bring to the attention of the Senate an editorial published in the Portland Oregonian of July 28, 1922, the Portland Oregonian, according to my information, being one of the most prominent western Republican newspapers.

I beg the pardon of my friend the Senator from North Dakota for a word or two that is used in this editorial that perhaps is not in strict conformity to parliamentary rules and is not up to the standard of senatorial dignity, but I am going to read the editorial as a whole, because it is impossible to eliminate any part of the language without destroying the sense of it.

It is headed:

JUST A CLOAKROOM YARN.

The theory of Senator McCUMBER that the Republican Party was driven from power in 1912 through a conspiracy of the American press is as silly as it is novel. The motive of the newspapers, according to McCUMBER, was obviously revenge, for the Congress refused to put newsprint and wood pulp on the free list.

The late defeat of Senator McCUMBER has had a bad effect on him. He ignores the incontrovertible record and attempts to substitute for it a strange yarn emanating in the trifling gossip of the cloakroom. Two men representing the American Newspaper Publishers' Association threatened that the Republican Party would be "driven from power" if it did not accede to their demands, and one of them is said to have promised to make JOE CANNON President if he "stood in" or to destroy him if he did not. These two lobbyists are dead, and it appears opportune for the North Dakota Senator to tell his story.

Mr. CANNON was neither made President nor destroyed; the first could not have been done if it had been attempted, and the second did not occur.

The Republican Party was beaten in 1912 because the Republican Party was split wide open between progressives and regulars. The Roosevelt bolt beat Taft, and Colonel Roosevelt bolted as a consequence of a series of happenings within the party with which wood pulp and the tariff on newsprint had nothing whatever to do. Was Roosevelt the instrument that the American papers used to defeat Taft? Not even McCUMBER will say so. The newspapers which usually supported the Republican Party divided according to their inclinations—more of them, probably, staying with Taft than followed the banner of Roosevelt.

The Ballinger-Pinchot episode, the Payne-Aldrich tariff, the insurgent movement, the Roosevelt-Taft quarrel, and similar episodes split the Republican Party and caused its disastrous defeat in 1912. The truth is well known, and it is strange that anyone, even a Senator, should dispute it.

Mr. President, I think it is clear that notwithstanding the Senator from Indiana and the Senator from North Dakota have attributed the defeat of Mr. Taft to a revengeful spirit on the part of the American newspapers because wood pulp and newsprint paper were not placed on the free list, the elements which entered into and controlled the result in that campaign were entirely distinguishable from any vindictive spirit on the part of the American press. I have renewed this discussion this morning because I am not content to let the declarations of the Senator from Indiana and the Senator from North Dakota, made some days ago, rest without further contradiction.

The Senator from Utah has disclaimed any purpose to impute vindictiveness to the American press. He did, however, quote a declaration by Mr. Norris in implied support of the position taken by the Senator from North Dakota. I can not understand that the statement quoted by the Senator from Utah [Mr. SMOOT] could have been injected into the debate for any other purpose than to substantiate in part the theory of the Senator from North Dakota that in virtuous indignation the Finance Committee had refused to be bribed or intimidated by the representatives of the American Newspaper Publishers' Association, and that as a result of that virtuous act the newspapers had turned against the administration and encompassed the defeat of Mr. Taft in his second campaign. I have pointed out the fact that whatever threat was made, according to the statement of the Senator from Indiana, must probably have been made in the first campaign, and that no such results occurred then; and I have also pointed out the fact that notwithstanding the disappointment which American newspaper publishers experienced, and in my judgment rightly experienced, in the failure of Congress to place wood pulp and print paper upon the free list, the Republican newspapers of the Nation went forward as a whole and supported Mr. Taft, notwithstanding there were powerful political inducements and arguments which tended to lead them to the support of Mr. Wilson or Mr. Roosevelt. Mr. Taft, carrying only two States in that campaign—two of the smaller States—had practically the unanimous support of the Republican press of the Nation. Where he lost was that he had no support among the voters of the United States.

Mr. CARAWAY. In other words, Mr. President, everybody but the people was for him.

Mr. ROBINSON. Everybody but the people who voted was for him, and that is the reason he lost by such an overwhelming vote in his second campaign.

It is not just to the newspaper publishers of America to charge them with responsibility for the results which occurred in that campaign, and particularly to ascribe those results to a deliberate spirit of vindictiveness and a determined purpose to accomplish revenge.

The press of the Nation, like the public men of America, must have the confidence of the people of the country if it is to assist in improving the standards of American citizenship and of public service. Nothing is calculated more powerfully to undermine, discredit, and destroy the influence of the newspapers of the United States than to declare that for a corrupt purpose—a selfish purpose, at least—their columns may be used in encompassing the election or defeat of public men, in bringing about the overthrow or the triumph of political parties. The time has come in the United States when men who are interested in the maintenance and perpetuity of the fundamental institutions which underlie this Republic should seek to establish and maintain confidence in the agencies and instrumentalities which under our system of government and society are useful in the formation of public opinion and in the dissemination of information. If the time ever comes when the American people lose confidence in the press of the Nation, if the time ever comes when the people of this country regard the influence of the press as susceptible of purchase and sale it is the beginning of the end of free speech and free press. Charges of that character ought not to be lightly made and they ought not to be made for political purposes. Historical facts, well known, justify the conclusion that while the press of the country was then, as now, in favor of free wood pulp and free newsprint paper, it did not subordinate other issues to that consideration. It did not use its mighty power and overwhelming influence for the political overthrow of the men and the party responsible for the refusal to place wood pulp and print paper on the free list.

In my judgment, the argument of the Senator from Montana is unanswerable. The position of the newspaper publishers of America in favor of free wood pulp and free newsprint paper is grounded in sound economics. No theory has been advanced which justifies the imposition of a duty upon intelligence and the dissemination of information. The industry in this country can not supply the demand of the publishers. We must look to external sources for a large part of these products which we are consuming in ever-increasing quantities. We ought to recognize the right and the privilege of the men who are connected with this great publishing industry to express and assert, as others express and assert, their opinions on questions of public importance, including the one now under consideration. We ought not to attribute to them, on ill-considered evidence and trivial facts, motives unworthy of American citizenship and conduct sounding in dishonesty.

The time has come when those of us who want this Government to continue to enjoy the confidence of its citizens should build up rather than destroy the influences which made it great and glorious. Just as we are jealous of our own reputations we ought to be jealous of the reputation of the press of America. No consideration should impel the Senate of the United States or its Members to an attitude toward American newspapers such as that implied in the conduct and the statements of the Senator from Indiana [Mr. WATSON] and the Senator from North Dakota [Mr. MCCUMBER], impeaching the integrity, the good faith, and the honesty of purpose of the press of the United States, for in spite of all its mistakes, in spite of the passion and prejudice which sometimes control the pens of editors, in spite of the falsehood which sometimes underlies the news published, the press of the United States throughout the history of this country has been and still continues the greatest agency for the enlightenment and the uplifting of the American people. It is a sorry hour for this Government, a sad hour for her people, presaging the destruction of her best institutions, when the press of the Nation becomes corrupt.

I have taken occasion to assert in the most forceful way at my command my difference from the viewpoint expressed by the Senator from Indiana and the Senator from North Dakota.

Mr. WATSON of Indiana. Mr. President, I was considering the unanimous-consent agreement proposed by the Senator from North Carolina when apprised that the Senator from Arkansas was discussing again the wood pulp and print paper question of 1909. Therefore, I was deprived of the pleasure of hearing the first part of the remarks of my friend from Arkansas.

It is very easy, of course, for any of us to be mistaken as to dates. Events in a busy man's life crowd one another very rapidly, and things which occurred 12, 13, and 14 years ago may be somewhat jumbled together in the mind when it comes to making a narrative statement respecting their sequence. All I do know about it is that I did remain in the House until the 4th of March, 1909, and that the Payne bill was formulated before that time. A special session of Congress was called by the President, which met, my recollection is, within two weeks after that time, and the bill was introduced, having been formulated before the Congress convened. Whether or not Mr. Herman Ridder came to me during that discussion or before, I do not recall. I do remember that the Member from Mississippi then, now the Senator from Mississippi [Mr. WILLIAMS], did introduce a resolution about the paper business, and I remember that it came to the committee and was voted down. I remember that those gentlemen came here afterwards in great numbers, because they were very much interested in it. I never blamed them for coming. They came just as everybody else does who wants some proposition in a tariff bill or wants some proposition out of a tariff bill, and I think they have a right to come, like everybody else who wants to come and present his interests to the committee or to individual members of the committee.

All I said the previous day was in an effort to throw light on the statements which had been made by the Senator from North Dakota [Mr. MCCUMBER] and the Senator from Utah [Mr. SMOOT], and I did say that I took Mr. Ridder around to see the Speaker, which was true, and the conversation as I then narrated it, almost word for word, occurred. I do not know whether it was 9 o'clock in the morning or 4.30 in the afternoon, or whether it was on the 17th of the month or the 29th. I do not know about those details, but I do know that the conversation occurred, and that was the only proposition in which I was interested. I do know that those gentlemen were here, and I do know that they were red hot after free print paper and free wood pulp, and I do know they pursued us all relentlessly, seeking to get it. I never blamed them for that. It was to their interest to do it. They had a perfect right to come and try to get it, and they sought all of us out in the corridors, and talked to us about it repeatedly. That was proper. I did not object to it. They did not get me to vote for it, because I did not believe in it; but that does not make any difference.

It is all right for my friend to rise and defend the newspapers of the country. I do not need to do that. I could not help them if I wanted to, and I could not harm them if I attempted

to. We have here practically the same thing again to be voted on, I think possibly the next item in the tariff bill, chemical wood pulp, which enters very slightly into the manufacture of newsprint. That question is up again, and a lot of Senators will doubtless be guided by what their newspaper friends want to have done. I have no objection to anybody doing that who wants to do it. I am not blaming anybody who wants to do it. I am going to vote for the 5 per cent tariff duty on it because I think it is necessary to sustain that industry in the United States. That is my object in doing it. I am not seeking to injure any newspaper, or to wreak vengeance upon the head of any editor, and all that sort of thing.

Everybody knew at that time that our newspaper friends were anxious for free print paper and free wood pulp. They are just as anxious now for free chemical wood pulp. I do not blame them for that. They say it is to their interest, and I think possibly it would be to their interest if they could have free chemical pulp, because it does enter slightly into the manufacture of newsprint.

As to whether or not the newspapers beat Taft in 1912, I do not know. Many things helped to beat Taft in 1912. They were cumulative disasters. But of course the newspapers had a great deal to do with it, because East and West and North and South very great numbers of them were against him, and they were against him because of Canadian reciprocity, and of course against him because of the great split between Roosevelt and Taft. I am not going into all that.

I only rose for the purpose of saying that while I may be confused as to the time of the conversation between Mr. Ridder and the Speaker, that conversation occurred, and there are other witnesses who know about it. Anybody can go over and ask Mr. Busbey, who was then the Speaker's clerk, who himself used to be an Associated Press reporter, and then afterwards a reporter on some Chicago paper.

Mr. Busbey has been a member of the Gridiron Club for years, and he is a man who I am sure enjoys the confidence of all newspaper reporters. He knows all about that conversation, for he was present and heard it, and other people now living were present and heard it. That is precisely what I rose to narrate, and while I may be somewhat confused as to the time it occurred, I am not confused as to the fact that it did occur, nor am I confused as to what was said, nor am I confused as to what was attempted to be done when it was said. I have no further interest in it, I will say to my good friend from Arkansas.

Mr. HEFLIN. Mr. President, I recall an incident in connection with the presidential election of 1912. A story was told to the effect that the Senator from Indiana [Mr. WATSON] was calling upon Mr. Taft at the White House after the election, and that while he was discussing some matter with him word came in that Senator SMOOT was in the office of the secretary waiting to see the President, whereupon the Senator from Indiana remarked to the President, "Just think of it! There's REED SMOOT out there walking around with half of your electoral votes in his vest pocket." [Laughter.]

FEDERAL RESERVE BOARD GOVERNOR.

Mr. President, as the time is drawing near for the President of the United States to appoint a governor of the Federal Reserve Board, I desire to submit for the consideration of the Senate, the President, the press, and the country some additional reasons why Governor Harding should not be reappointed. I charged that the governor of the Federal Reserve Board had had the progressive interest rate applied to the agricultural sections of the South and West and had not applied it at all to the other sections of the country.

I hold in my hand a letter written by the governor of the Federal Reserve Bank of Atlanta, in which he acknowledges that they charged a bank in my State 8½ per cent interest. Former Comptroller of the Currency Williams furnished me this valuable document. I made that charge on this floor for more than a year, and I could not get any information on the subject from either the board or the bank of Atlanta as to the correctness or incorrectness of my charge. In the meantime the governor of the Federal Reserve Board was proclaiming that agriculture was in no way being discriminated against. He declared that agriculture had been aided in every way possible, when the real facts show that agriculture was stricken down and practically destroyed by the deflation-policy conduct of Governor Harding.

Mr. President, I have the proof now. A bank in my State furnishing money and credit to farmers at the crop-moving time had the progressive interest rate applied to it by the reserve bank of Atlanta and forced to pay 8½ per cent interest.

Does that look like a fair deal for agriculture? Does that look like aiding agriculture in every way possible?

Mr. ROBINSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator yield to the Senator from Arkansas?

Mr. HEFLIN. I gladly yield to my friend from Arkansas.

Mr. ROBINSON. Of course, everyone knows that an interest rate even approximating 8½ per cent is calculated to prevent rather than to promote business. What was the object of imposing such a rate?

Mr. HEFLIN. The object was to shut off loans, to prevent agriculture from getting money, to force the farmer to sell regardless of market conditions, because the edict had gone out, in a quiet way, to stop loaning money on cotton and live stock and other farm products.

Mr. ROBINSON. Was the rate actually collected or was it just sought to be imposed?

Mr. HEFLIN. It was actually collected, and I criticized the Federal Reserve Board for its brutal and inhuman conduct in this matter until I, with John Skelton Williams, forced the policy to be changed and the money to be refunded. The injury had been done, however, before the money was refunded.

Mr. ROBINSON. How could a bank continue in business and pay that exorbitant rate?

Mr. HEFLIN. It practically had to quit; barely lived through that trying time.

Mr. ROBINSON. What I can not understand is why anyone intrusted with the power of fixing interest rates would impose and justify such a high rate rather than refuse to engage in such a transaction.

Mr. HEFLIN. I set out in the CONGRESSIONAL RECORD on July 27, page 10687, a statement giving the figures on $691 of a $110,000 loan. They charged one-half per cent on the first $691, then 1 per cent on the next $691, then 1½ per cent on the next $691, and on the next $691, 2 per cent, and on up to 8½ per cent on the last $691 of that $110,000. That was the progressive interest rate, and John Skelton Williams tried to get the Federal Reserve Board to pass a resolution preventing the banks from charging more than 10 per cent, but Governor Harding and the board refused to do that and insisted on the progressive interest rate, and through its cruel application destroyed business in the South and West by the hundreds of millions of dollars.

Mr. SMOOT. Does the Senator know what was the capital stock of the bank?

Mr. HEFLIN. Twenty-five thousand dollars.

Mr. SMOOT. They were borrowing from the Government four times the amount of their capital stock?

Mr. HEFLIN. Some New York banks and other banks were borrowing ten times the amount of their stock.

Mr. SMOOT. What was the reason why the bank did not go and borrow the money outside? Nobody else was charging that rate.

Mr. HEFLIN. It could not borrow outside. It was already tied up to this bank, and was doing business with it. The Senator knows how that is. After you get tied up to a bank you can not go out somewhere else and borrow.

Mr. SMOOT. Oh, yes; if you have security you can.

Mr. HEFLIN. But their security was being destroyed every day by this deflation process. Cotton was 40 cents a pound, and in a few months it was 10. It was $200 a bale at the outset, and when the farmer could not get money with which to hold it off the market it went down to $50 a bale. The Senator can understand that they could not borrow on cotton when what they had was already tied up to that bank. Not only that, but the local banks were being called by the reserve banks and they were forced to sell their Government bonds.

Mr. SMOOT. They certainly did not advance $100,000 without security.

Mr. HEFLIN. They had good security and they never lost a dollar. They collected the debt and the 8½ per cent on a part of it, and we made them pay that back. The average rate charged was about 40 per cent.

The point is there was no excuse for the high and criminal rate that was charged. It was simply the inhuman execution of a plan deliberately laid to prevent the farmers of the South from getting the money and credit necessary to enable them to hold their cotton until the price would yield a profit.

Mr. SMOOT. I have heard the Senator make the statement a good many times and I have not questioned it at all. The only thing that seems very strange to me is that a bank with any kind of security should pay 8½ per cent interest. I do not understand it. I can not understand it. It must have been virtually in a bankrupt condition even to think of doing such a thing. It was done to save its life, do doubt, but I do not see how a bank could pay 8½ per cent, even to save its life.

Mr. HEFLIN. It must have been in pretty good condition to survive an interest charge of 87½ per cent.

Mr. SMOOT. It was a mighty strong bank if it paid that interest very long in order to live.

Mr. HEFLIN. It was charged long enough to shut this bank off of loans and to frighten other banks by this horrible example. Other banks were charged high and usurious interest rates, and loans on agricultural paper were practically stopped, as they intended they should be.

Now, Mr. President, I want to say on behalf of the governor of the Federal Reserve Bank of Atlanta that he did not at that time want to apply the progressive interest rate. He came here and went before Governor Harding and begged him in August, 1920, to permit the Atlanta bank to abandon the progressive interest rate. He realized how hurtful its application would be to the people in the agricultural section and he came here and requested the governor of the Federal Reserve Board on August 31, 1920, right at the beginning of the cotton picking and cotton marketing season, to allow the Federal Reserve Bank of Atlanta to refuse to apply the progressive interest rate on loans or discounts.

Governor Harding declined to do it. This information comes from the governor of the Federal Reserve Bank of Atlanta, Mr. Wellborn. He says in a letter to Hon. John Skelton Williams that he asked the Federal Reserve Board to let the reserve bank of Atlanta be excused from the application of the progressive interest rate and that the board refused to grant his request.

Mr. SMOOT. Governor Harding had to follow the law. The law requires that the rate of interest shall increase as the amount of borrowing increases based upon their capital.

Mr. HEFLIN. Is that so?

Mr. SMOOT. I think so.

Mr. HEFLIN. I can show to the Senator, as I have done a dozen times on this floor, that a bank in New York borrowed many, many times more than its capital, and they never applied the progressive interest rate to it at all. Six per cent in New York and an interest rate as high as 87½ per cent in Alabama! Is that compliance with the law?

Mr. SMOOT. It may have been on Liberty bonds in New York, I will say to the Senator.

Mr. HEFLIN. We could not borrow at all in Alabama on Liberty bonds.

Mr. SMOOT. Not from the Federal reserve bank?

Mr. HEFLIN. No. We could not get money on Liberty bonds. A gentleman at Eufaula, Ala., went to a bank with a $1,000 bond and tried to borrow $100. Ex-Congressman Dent told me that. That is his old home town. He said they stated that they could not loan money on bonds.

Mr. SMOOT. Not to individuals; of course, they could not do that, but I am speaking of the banks, and the Senator was speaking of the banks. They have no right whatever to loan to an individual on Liberty bonds, but they have a right and did loan money on Liberty bonds to the banks. If there is any fault to find with it, it is with the law.

Mr. HEFLIN. The man who had Liberty bonds and wanted to borrow money on them at the bank in order to get money so that he could prevent the forced sale of his cotton at prices below the cost of production simply could not get it. I am telling the Senate what actually occurred.

They refused to loan money on bonds, and bonds were forced out of the hands of people who had struggled hard to buy them and sold for $80 and $85 on the $100. They were forced to sell those bonds because they could not borrow the needed money on them.

Mr. SMOOT. Not banks.

Mr. HEFLIN. Yes; the banks. People in my section could not borrow money on bonds; they could not borrow it in the West; and they had to sacrifice their bonds. Wall Street got those bonds for $80 and $85 on the hundred, and on every bond thus forced upon the market they got out of the people of the South and West, under deflation, practically stole $15 or $20 on the hundred from patriotic people who bought bonds to help their country win the war.

Mr. President, I want the President of the United States and the country to know that this cruel progressive interest rate was employed in the agricultural sections of the South and West and nowhere else. Other sections suffered because the purchasing power and debt-paying power of the South and West was destroyed. When the governor of the bank that supplies my section cried out against the cruelties of the progressive interest rate, Governor Harding, himself hailing from my State, from that very section, refused to let them abandon that destructive interest rate.

Mr. President, the Senator from Connecticut [Mr. McLEAN] said that Governor Harding prepared this progressive interest amendment and brought it to him and asked him to introduce it. It was in accord with the deflation resolution passed later by the Republican Senate. The Senator from South Carolina [Mr. SMITH], who opposed the progressive interest rate, said that Governor Harding told him they did not intend to apply it to agriculture in the South and West, that they intended to apply it to New York and other cities getting money for speculative purposes. The measure passed. Governor Harding did not have it applied at all to New York and other big cities. I repeat, they applied it only to the agricultural sections of the South and West. When the governor of the bank in Atlanta cried out against its oppressive work, the governor of the Federal Reserve Board, Governor Harding, declined to let him stop applying it to the people of my State and my section. That deflation policy cost the people of my State millions and hundreds of millions of dollars. It cost the cotton producers of Alabama more than $100,000,000 in 1920. I estimate that it cost my State between $500,000,000 and $750,000,000. That is what deflation did in one year for the people that I in part represent. It is a serious matter, and now they are carrying on a propaganda to have Governor Harding reappointed. They started a campaign the other day in one State taking a straw vote on him, and the opposition said, "All right, we will take a straw vote also," and in a little while the suggestion came to the opposition, "Let's drop it." They do not want both sides to be heard. I owe it to the President and to the country to tell just exactly what I know about the disgusting and reprehensible tactics being used to deceive the President and the public about this thing.

Mr. President, I want to call attention to the fact that in the great State of Texas ex-Governor Ferguson ran for the United States Senate and advocated the abolishment of the Federal reserve banking system. Reading from my speech, I am told—I mean the long speech that I made replying to the Senator from Virginia [Mr. GLASS]—he asserted that I was right, but that I wanted it regulated and he wanted to destroy it, to do away with it. I think it is the greatest banking system in the world. I want it run honestly and efficiently so that it will do what we intended it should do—serve continuously the business needs of all the people all the time. He spoke in different places and asked the people in the audience, "How many of you have been ruined financially by deflation; stand up," and the audience was so unanimous in its view that they would stand up like they were receiving the benediction. That man ran second in the senatorial race in the great State of Texas, which has a Federal reserve bank at Dallas. Senators, we established the Federal reserve banking system over the opposition of Wall Street, and we should not permit Wall Street to control or destroy it. Now, Mr. President, there is another thing that I want to mention at this time. I have a newspaper here quoting Mr. Brookhart, the Republican nominee for the United States Senate in Iowa. He was denouncing in unmeasured terms the deadly work of the deflation policy conducted by the board presided over by Governor Harding and saying that Governor Strong, of the Federal Reserve Bank of New York, was the man who inspired it. This situation calls to my mind another matter that I feel justified in mentioning now. A Secretary of the Treasury told Governor Harding that he had a great mind to ask for the resignation of Governor Strong, and, strange to say, he did not. Listen, Senators: Governor Harding, the deflationist, said to that Secretary of the Treasury, "Do not do it. I practically have his resignation in my pocket." That is what Governor Harding told the then Secretary of the Treasury who wanted to call for the New York man's—Governor Strong—resignation. These awful conditions were produced after McAdoo resigned. The then governor of the board told the then Secretary of the Treasury, "Do not do it. I practically have Governor Strong's resignation in my pocket." Did he have it? No. What was he doing? From what has happened he was deliberately deceiving the Secretary of the Treasury. Did Strong resign? Why, certainly not. Who is now governor of the bank in New York, at a salary of $50,000 a year? This same Governor Strong that Governor Harding said was about to resign.

Why, Mr. Brookhart, the Republican nominee for the Senate in Iowa, the great State of Dolliver and Kenyon and Cummins, said Strong was the inspiring power back of deflation.

What have I said frequently here? I have said that Wall Street inspired and ordered deflation. Why? For the purpose of making hundreds of millions of dollars, even billions, which its speculators did make out of the deflation drive against the agricultural South and West. They did not do it simply to make us suffer. They had no feeling about that. They did it to make many hundreds of millions of dollars. Then those who

profited by deflation write up here and ask some Senators to indorse this man, Governor Harding, for reappointment.

Mr. President, I want to tell the Senate and the country an amusing incident. A State in the Northwest, where they had the bankers in convention assembled to indorse Governor Harding, selected a good old honest banker to bring the indorsement to the Capital and present it to the President. The old fellow brought it here. He called on his Senator. He said, "Here it is." The Senator said, "I will go with you to see the President, but I am not for him for governor of the Federal Reserve Board." The old man looked at him and said, "I am not either."

Is it my duty to disclose these things that the President may know what sort of hypocrisy is being practiced upon him? Bankers are coerced and intimidated into indorsing a man whom they despise, detest, and distrust. That is what is going on. Yet they have a man to journey to the Capital, smile, and present to the President a petition to retain a man whom they do not want reappointed. So I am letting the President know the truth.

Mr. President, outside of those who have made millions out of deflation, nobody wants Governor Harding reappointed. Wherever a man has indorsed him for reappointment, he has either profited by deflation or he has been influenced and coerced against his will by somebody to recommend him.

We have been told here by a Senator, just one, that agriculture was treated fairly. Agriculture is the corner stone on which all other industries rest. I want the President to know exactly how agriculture has been treated. I am going to read a statement from Congressman SWING, a Republican, from the State of California. Here is what he said in the House of Representatives not long ago:

> I can not understand how men can continue to deny that the deflation policy adopted by the Federal Reserve Board was not deliberately aimed at the farmers of this country.

I want you Republican Senators to get this statement:

> I was present at a meeting of the bankers of southern California, held at El Centro, in my district, in the middle of November, 1920, when W. A. Day, then deputy governor of the Federal Reserve Bank of San Francisco, spoke for the Federal reserve bank and delivered the message which he said he was sent there to deliver. He told the bankers there assembled that they were not to loan to any farmer any money for the purpose of enabling the farmer to hold any of his crops beyond harvest time. If they did he said the Federal reserve bank would refuse to rediscount a single piece of paper taken on such a transaction. He declared that all the farmers should sell all of their crops at harvest time, unless they had money of their own to finance them, as the Federal reserve bank would do nothing toward helping the farmers hold back any part of their crop, no matter what the conditions of the market.

Can you imagine a situation more cruel and desperate than that which confronted the farmers of the country in 1920 and 1921?

God forbid that another distressing time like it shall ever come upon our people.

Senators, do you get that statement from this Republican Member of Congress from the far West? Speaking of what the representative of the Reserve Bank of San Francisco said, Representative COOPER said:

> Did the gentleman from California hear that?
> Mr. SWING. I did. * * *

Then he goes on to say:

> The Federal reserve bank deliberately set out to "bear" the market. They succeeded so well that they broke the market; not only broke the market but broke the farmers as well. We there saw the strange spectacle of the farmer citizens of this country being ruined by being forced to sell their products on a glutted market at less than what it cost to grow them, as a direct result of a policy adopted by their own Government, a Government created to aid them, not to harass them. I say it was criminal; it was damnable for this all-powerful agency of our Government to deliberately crucify the farmers of this country. * * *

Mr. President, that is what I desired to say this morning. I shall give to the Senate and to the country from time to time other information and arguments upon the subject. Let me say, in conclusion, that Governor Harding brought the amendment providing for the progressive interest rate to the Senator from Connecticut [Mr. MCLEAN] and asked him to introduce it. Senator MCLEAN says that he did. The Senator from South Carolina [Mr. SMITH] and others opposed it, and Governor Harding told them that it would not be applied at all to agriculture; but the fact remains that when it became the law it was applied only to the agricultural sections. When the governor of the Federal reserve bank at Atlanta, serving my section of the country, cried out against it and said that he wanted to get rid of it, Governor Harding and his board refused to permit him to abandon it.

There is not anybody in the South who is in favor of his reappointment, except those who profited by his deadly deflation policy; there is not anybody in the West who is for him, except those who profited by that policy or those who have been coerced or induced somehow to indorse this man for reappointment. Mr. President, I do not want anyone to say, if by hook or crook this man's name be sent to the Senate for confirmation—and it will not—"You ought to have stated this beforehand; you ought to have let the President know." I am telling the President now; others also have let him know; I am letting him know from time to time in the CONGRESSIONAL RECORD. I have shown here to-day by the letter of the governor of the Federal Reserve Bank of Atlanta that they charged a little bank in my State in the very high tide of the deflation drive, when that little bank was struggling to serve its customers, 8½ per cent interest on a part of its needed loan.

Mr. President, I do not know of, and I challenge the governor of the Federal Reserve Board and every member of the Banking and Currency Committee of the Senate to cite an instance, in all the history of all the world where a Government bank ever charged such an interest rate as was charged a bank in my State which was trying to help the farmers get at least the cost of production for their crops. The Federal reserve banking system was intended to save the people of all sections from just such a situation. When it turned from the proper path, however, and created this condition, and ground these people down and took their substance away, it was changed from a helpful agency to an implement of torture and destruction. That is what we have witnessed. I am the firm friend of the system; I want it preserved; I am trying to help preserve it, to take it out of politics, and out of subserviency to Wall Street. I am taking the position that those who conducted that drastic and deadly deflation policy ought now to be condemned and repudiated and not indorsed and rewarded.

The PRESIDING OFFICER (Mr. KENDRICK in the chair). The question is on the committee amendment in paragraph 1300.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	France	Lodge	Pomerene
Brandegee	Glass	McCormick	Ransdell
Broussard	Gooding	McCumber	Robinson
Bursum	Hale	McKinley	Sheppard
Calder	Harreld	McNary	Simmons
Cameron	Harris	Moses	Smoot
Capper	Heflin	Nelson	Spencer
Caraway	Hitchcock	New	Stanfield
Curtis	Jones, Wash.	Newberry	Sterling
Dial	Kellogg	Nicholson	Trammell
du Pont	Kendrick	Norbeck	Walsh, Mont.
Ernst	Keyes	Oddie	Warren
Fernald	Ladd	Pepper	Watson, Ind.
Fletcher	Lenroot	Phipps	Willis

The PRESIDING OFFICER. Fifty-six Senators having answered to their names, there is a quorum present. The question is on the committee amendment inserting paragraph 1300.

Mr. SMOOT. I ask that paragraph 1300 be passed over until to-morrow, and that we take up paragraph 1301 for consideration at this time.

Mr. WALSH of Montana. I presume the Senator means in case no Senator is ready to speak on it at this time?

Mr. SMOOT. Certainly. I asked several Senators on the other side, and they did not know of anyone else who wished to speak. If any Senator does desire to speak at this time, I should be glad to have him proceed.

Mr. POMERENE. I did not understand the Senator's request. Was it with respect to paragraph 1300?

Mr. SMOOT. Paragraph 1300. If the Senator from Ohio desires to speak on it we shall be glad to have him do so.

Mr. POMERENE. I am going to speak on it very briefly in the morning, probably not more than five minutes.

Mr. SMOOT. The Senator does not want to proceed now?

Mr. POMERENE. I would a little rather not do so, because there are some matters that I want to get.

The PRESIDING OFFICER. Without objection, paragraph 1300 will be passed over until to-morrow.

The ASSISTANT SECRETARY. Paragraph 1301——

Mr. SMOOT. The committee has no amendment to offer to that paragraph. I thought we had one, but I see that there is not any.

The ASSISTANT SECRETARY. Paragraph 1302. Paper board——

Mr. WALSH of Montana. Mr. President, I should like to remark that I have recently been handed quite a long list of amendments which the committee now proposes to submit to the paragraphs comprising this schedule. I, of course, have had no opportunity to study the paragraphs in the light of the amendments now proposed. However, I observe that most of

them are reductions or eliminations, and I shall not offer any objection to proceeding with the consideration of the remaining paragraphs.

Mr. SMOOT. I want to say to the Senator that I think in every single case they are reductions.

Mr. WALSH of Montana. Before going into the consideration of these paragraphs in detail, however, I should like to say just a word or two.

Generally the duties proposed here are illustrative of what seems to be an idolatrous kind of sentiment touching these duties. As in the case of many of the paragraphs considered within recent days, there seems to be no occasion whatever for the imposition of duties upon most of the commodities referred to in the schedule—that is to say, the different forms of paper and the manufactures of paper. From anything that I have been able to learn from such study as I have been able to give it, the paper industry of this country is upon a perfectly safe basis, without any kind of menace whatever from foreign competition; so the Tariff Commission informs us with respect to practically every item in the schedule.

Take book paper, for instance, which is dealt with in the first paragraph succeeding that now under consideration—paragraph 1301—or printing paper, as it is called. There is no competition. Let me submit what information we have about that. I read from the tariff survey as follows:

The book-paper industry, being confronted with negligible foreign competition, has no tariff problem. In the calendar year 1920 our imports of book paper amounted only to one-fifth of 1 per cent of domestic production. In the fiscal year 1914, when imports were at their highest, they amounted only to one-third of 1 per cent of domestic production. On the other hand, a substantial export business in book paper was built up during the war. In the calendar year 1919 we exported 8.38 per cent of our domestic book-paper output, in comparison with 1.53 per cent in the fiscal year 1914. In the calendar year 1920 we exported 4.33 per cent of our output.

At page 43 of the same survey the following statement is made:

Inasmuch as our book-paper imports amounted in the calendar years 1918 and 1919 to one-hundredth of 1 per cent and in 1920 to one-fifth of 1 per cent of domestic production, there can hardly be said to be a pressing tariff problem in the book-paper industry. Even in the fiscal year 1914, when imports were at their highest, they amounted only to one-third of 1 per cent of domestic production.

This is characteristic of the reports made with respect to practically every item in the schedule. The paper industry as a whole is not menaced by competition from any source; so that in the consideration of the rates proposed I should like to have that situation understood.

Let me give a little more information concerning book paper, as it is the foundation of most of the rest of the schedule. The exports and imports are given in the summary as follows:

The production in 1914 was 934,979 short tons, valued at $73,000,000.

The production in 1919 was 1,001,000 short tons, valued at $153,368,000.

The imports were perfectly negligible and insignificant compared with the production.

In 1918 the total imports were only $44,445.

In 1919 they were $58,319.

In 1920, $493,411.

In 1921, $191,838.

The exports of book paper in 1914 were 14,301 short tons, valued at $1,612,370.

In 1918 they were 45,036 short tons, valued at $7,695,298.

In 1919 exports of book paper amounted to 8 per cent of the domestic production.

In 1920 the proportion fell to 4 per cent and the decrease continued in 1921.

At page 13 of the survey the following information is given—of course, the situation with respect to the principal raw material, wood pulp, has heretofore been discussed, but we are under no disadvantage with respect to the other component parts of book or printing paper. The survey tells us as follows:

Filler (in the form of china clay, talc, or agalite), alum, sizing (usually rosin), and color are the other materials entering into the actual composition of the paper. In 1910 the proportion of these secondary materials used by 38 newsprint mills in the United States amounted to only 5.5 per cent of all materials used; the remainder consisted of wood pulp. Filler is very little used for newsprint paper. A much greater proportion of subsidiary materials as well as a greater variety in the proportions of all materials used appears in book-paper manufacture. In 1916 three eastern book-paper companies used 40.1 per cent soda pulp; 34.9 per cent sulphite; 2.9 per cent waste paper; 19.4 per cent clay, agalite, and talc; 1.7 per cent alum; and 1 per cent rosin. In the same year five Michigan companies used 58.9 per cent waste paper, including a small proportion of rags; 5.7 per cent soda pulp; 21.7 per cent sulphite; 8.2 per cent clay, agalite, and talc; 4 per cent alum; and 1.5 per cent rosin. In the case of the eastern companies one-fifth by weight of the paper manufactured consisted of filler, while in the case of the Michigan companies this proportion was less than one-tenth.

In most cases no difficulty nor tariff problem is involved in securing these materials. Certain manufacturers prefer English china clay to domestic clay, saying that it is so much superior to the domestic clay as to be practically a different product. During the war there were periodic shortages of this commodity, but it is now easily obtainable from England. Our domestic color industry has been developed to a point where we are practically independent of the Germans, although before the war we used to import practically all our colors from Germany. The yellowish color of newspapers after the beginning of the war was due to the lack of German red and blue dyes, which removed the characteristic natural wood color of the unbleached pulp, making it appear white.

Printing paper carries under the bill as it came from the House, and no amendment is made, a duty of one-fourth of 1 cent per pound and 10 per cent ad valorem. The production of book paper has been developing, as shown by these figures. The production increased from 569,212 tons in 1899 to 1,511,968 tons in 1920, and the exports increased from 13,654 tons in 1911 to 76,691 tons in 1919 and 47,845 tons in 1920. Practically the same condition as I have indicated with reference to book or printing paper exists with reference to felt and building papers, with reference to tissue paper, with reference to wall paper, and with reference to paper board, these being the principal items in the schedule.

Mr. SMOOT. Mr. President, just a word in general about this paper schedule.

There is no schedule in the whole of the pending bill where labor cost is such a great percentage of the cost of the finished article as in the pending paper schedule. The raw material of paper, as everybody knows, is a very insignificant part of the cost of the paper. Even in the case of the wood in the forest the greater part of the value of it is in the labor, and every time it is handled from the tree to the finished product the labor is a great part of the cost of the paper. The finer the paper, the greater the percentage of labor cost; and if the Senate will notice when we read these schedules nearly all of them have been reduced, many of them even lower than the House provided, where the valuation was based upon the American price instead of the foreign price.

We passed over the first paragraph of the schedule, chemical wood pulp, and I will not have anything to say about that; I will let others discuss that question. The Senator referred to the great exports of book paper and quoted the exports for the year 1919 and the year 1920. I stood upon the floor of the Senate during those years and begged Senators not to burden the RECORD with extraneous matter. Upon several occasions I called the Senate's attention to the fact that unless we could get paper from somewhere the CONGRESSIONAL RECORD could not be printed. Your Committee on Printing scoured the country from one end to the other during those years for paper, bought it in small quantities, and paid exorbitant prices for it. There was a demand for paper in South America, in Canada, and everywhere else, and our manufacturers had taken contracts abroad, and they had to deliver. But if the Senator will notice, the exportations of the same paper for 1921 had fallen over 50 per cent, and in the 11 months ending in May, 1922, instead of being 159,000,000 pounds they had fallen to 19,170,000 pounds.

Mr. POMERENE. Mr. President, the Senator has just referred to the difficulty we had in getting the paper with which to print the CONGRESSIONAL RECORD. Would not the tariff on this pulp have just by that much increased the difficulty the committee had in securing the paper?

Mr. SMOOT. I was not discussing the pulp paragraph at all. That has gone over until to-morrow.

Mr. POMERENE. The Senator referred to that subject.

Mr. SMOOT. I simply announced that it was going over until to-morrow. The first amendment, in paragraph 1302, is simply for the purpose of including wall board in that paragraph, to be followed by another amendment in the paragraph which will take care of pulpboard in rolls for use in the manufacture of wall board, on which the rate will be 5 per cent ad valorem.

Mr. WILLIS. Mr. President, I think the Senator has in part answered what I wanted to inquire about. Paragraph 1302 provides a 10 per cent ad valorem duty upon wall board. But the committee has inserted the language, "except pulpboard in rolls, for use in the manufacture of wall board." What is the purpose of that exception?

Mr. SMOOT. I shall ask that that amendment be disagreed to, and then, following the words "ad valorem," in line 4, I shall ask to have inserted the words "pulpboard in rolls, for use in the manufacture of wall board, 5 per cent ad valorem." I think that is what the Senator from Ohio desires to have done, judging from what he has already said to me.

Mr. WILLIS. What reason does the Senator assign for suggesting different rates? The different types of board carry 10 per cent ad valorem. Now the Senator proposes to make the

duty on wall board 5 per cent. What is the reason for the difference?

Mr. SMOOT. The paragraph provides:

Paper board, wall board, and pulpboard, including cardboard, and leather board or compress leather, not laminated, glazed, coated, lined, embossed, printed, decorated, or ornamented in any manner, nor cut into shapes, * * * 10 per cent ad valorem.

That is that class of board, pulpboard. This other is pulpboard in rolls, for use in the manufacture of wall board, and a 5 per cent ad valorem is sufficient on that.

Mr. WILLIS. The Senator regards the other commodiites as more in the nature of finished products?

Mr. SMOOT. Yes.

Mr. LENROOT. Mr. President, I would like to ask the Senator the reason for the distinction. A 10 per cent duty is levied upon pulpboard if it is not laminated, and so forth, but if it happens to be in rolls, which is even more expensive, he proposes to reduce the rate to 5 per cent. In other words, pulpboard alone is to carry 10 per cent, but if it happens to be in rolls it is to bear only 5 per cent. Will the Senator explain how the committee arrive at that difference?

Mr. SMOOT. Whenever pulpboard comes in rolls it is not a finished product. It then has to be put into a finished product, and the other items named are virtually finished products, to be used just as they are manufactured, and not used as the pulpboard in rolls will be used.

Mr. LENROOT. That is not necessarily so, because the pulpboard, if not laminated, glazed, coated, lined, or embossed may take an advance or a further process of manufacture, just the same as the pulpboard in rolls.

Mr. SMOOT. It would be cut into lengths and used for a certain purpose. The rolls are rolled out just as fast as the machines can run them, and I have no doubt but that 5 per cent is ample protection for that class of products. I think also that a good many of them are a little finer than the ones used for pulp in rolls.

Mr. WILLIS. I desire to ask the Senator his opinion as to the administrative difficulties. I understand the amendment which he intends to propose provides for a rate on pulpboard in rolls "for use" along certain lines. How is that use to be determined? How are you going to follow it up? Will it not open up the way for rather indiscriminate imports? How is the Senator to tell? If an importer brings in so much, to be used for such and such a purpose, he gets it in under that rate. I do not see how it is workable.

Mr. SMOOT. I do not think there is any question about the administration of it because of the fact that in order to use this pulpboard for the purposes named it has to be thinner than the other board, which is used singly, and is cut into lengths for certain purposes. The question of the administration came up in the committee, and we were advised that there would be no difficulty whatever in the administration if these words were used.

Mr. LENROOT. If pulpboard in rolls is imported, but is not shown to be used for the manufacture of wall board, what rate would it bear?

Mr. SMOOT. Ten per cent; but that which comes in rolls is used for that purpose, and I can not see that there would be any difficulty in the administration of it.

Mr. LENROOT. I asked one of the manufacturers of wall board to give me some figures upon the cost of production in the different stages of manufacture, and I have before me a letter wherein it is stated that the total cost of production in the rolls is 82 per cent of the total cost, and only an additional 21 per cent to make it into the wall board from the rolls. If that were so, I figure out that it would require about 8 per cent relative duty.

Mr. SMOOT. That applies to the very cheapest article, which is pasted together to make the board, and it is the quantity and quality of it which would bring the labor cost up to that high percentage, because it is the very cheapest kind that is made.

Mr. LENROOT. When it goes from the rolls to the wall board, then you have a varying cost of production, of course.

Mr. SMOOT. The reason why the labor percentage is so great in that case is because that is a very cheap article, indeed. In my opening statement I called attention to the fact that in this paragraph the labor costs are higher in proportion to the cost of the goods than in any other schedule of this bill, and the reason is, as I stated, that when the raw material is first touched the labor becomes an exceedingly high percentage of the product that goes into the article manufactured.

Mr. LENROOT. I would like to ask if it is not also true that the Tariff Commission state that the total cost in Canada is considerably lower than in the United States?

Mr. SMOOT. It is in this particular case, because of the fact that their timber is right at the door.

Mr. WILLIS. I understand the Senator will request that the amendment in lines 3 and 4 shall be disagreed to?

Mr. SMOOT. Yes.

Mr. WILLIS. Then, what is the amendment which the Senator proposes?

Mr. SMOOT. After the words "ad valorem" on line 4, to insert the words "pulpboard in rolls, for use in the manufacture of wall board, 5 per cent ad valorem."

Mr. WALSH of Montana. I have not been able to get any satisfactory information about it, and perhaps the Senator from Utah will be able to tell us how pulpboard does come in except in rolls.

Mr. SMOOT. It comes in in sheets. The best quality has to come in in sheets, because of the fact that it is so thick that it can not be rolled.

Mr. WALSH of Montana. Can the Senator tell us what the imports of pulpboard not in rolls amount to?

Mr. SMOOT. I do not think the figures as to that are kept separate in the statistics.

Mr. WALSH of Montana. I find the returns on pulpboard in rolls, and that is all. Apparently that covers all the imports there are, so far as my information goes.

Mr. SMOOT. The pulpboards come in cut into lengths, and they can not be rolled; but where the pulpboard comes in and can be rolled, it is because of the fact that it is so much thinner than the other, and whenever used it is used and cemented together after it comes in in the rolls.

Mr. WALSH of Montana. What information has the Senator as to the imports of pulpboard not in rolls?

Mr. SMOOT. If the Senator will turn to the "Imports of merchandise entering for consumption in the United States" for 1921, on page 41, he will see that the quantity of pressed boards or pressed paper was 168,668 pounds. Then the importations of pulpboard in rolls, not laminated, are next given; then reinforced or cloth-lined paper; then sheathing paper, and so forth. Those are the imports.

Mr. WALSH of Montana. That is not pulpboard at all. I have exactly the same information before me, as to pulpboard in rolls, not laminated. The importations amounted to 1,113,577 pounds in 1921. Then there was also introduced reinforced and cloth-lined paper; there was introduced sheathing paper; but no pulpboard was introduced, so far as I can learn, except pulpboard in rolls.

Mr. SMOOT. If the Senator will refer to Schedule No. 15, prepared by the commission, he will find that the imports of paper board for the calendar year 1921 were 36,887 pounds and of wall board 10,287 pounds. The statistics as to pulpboard are not stated separately. Of leather board and embossed leather 163,240 pounds.

Mr. WALSH of Montana. This is what I find at page 32 of the survey:

Of our paper board imports, only our imports of pulp board in rolls not laminated (board made of wood pulp, not consisting of layers of paper or board pasted together) are of importance.

The rest is not important, whatever there is, if there is any at all.

Mr. SMOOT. If the Senator will look at page 1049 of the Summary of Tariff Information he will find that box board is exactly the same thing, and under the rate of 5 per cent in 1920 there were 5,527,205 pounds imported and in 1921 for nine months there were 4,043,746 pounds imported.

Mr. WALSH of Montana. Yes; there are various kinds of paper board, box board, press board, cardboard, leather board, and all that, and there is also pulpboard in rolls, but I have not any information at all about pulpboard not in rolls. However, it is a matter of no very great consequence and I do not care to consume further time on it. The paragraph as it stands is entirely meaningless to me.

Mr. LENROOT. I would like to call it to the attention of the Senator from Montana that on page 748 the Tariff Commission say that the terms paper board and pulpboard are synonymous. So when we come to the bracket it does cover pulpboard.

Mr. SMOOT. Not only that, but on page 30, where data with reference to consultation are given, it is said:

Box board, common paper, not coated—

And so forth. They are synonymous, of course.

Mr. SHEPPARD. Mr. President, paragraph 1302 of the pending bill subjects the various forms of paper board and building paper to a tariff tax of 10 per cent. The chief use of paper board is in making paper boxes and other containers, and this form of the board carries a rate of 5 per cent in the existing Democratic tariff law. On this item of general necessity, there-

fore, the pending bill doubles the existing duty. Furthermore, the Democratic tariff act now in force places an important type of building paper, to wit, sheathing felt for vessels, and an important type of paper board, to wit, leather board for trunks, suitcases, shoes of inexpensive character, and so forth, on the free list, whereas the pending bill transfers these articles to the taxed list. On one form of paper board, to wit, cardboard, the rate is reduced from the existing rate of 25 per cent to 10 per cent. Besides the purposes above mentioned, paper board is used in bookbinding and printing, in making tags, cartridges, advertising cards and placards, in roofing, in lining walls of buildings, and under carpets and floors to deaden sound.

Paper board is made principally from waste paper, about 80 per cent of its raw material coming from this source. The remainder is drawn from woolen, cotton, and jute waste, old gunny sacks, paper-board cuttings, old rags, cornstalks, straw, and practically anything of fibrous nature.

The value of the output of paper boards in 1914 was $39,493,174; in 1919, $124,090,000; of building paper in 1914, $9,475,733; in 1919, $17,737,000. Imports have been so small in comparison as hardly to be worth mentioning, totaling $2,313,940 in 1919, as against a home production of $141,827,000, or less than 2 per cent. Exports of paper board and strawboard exceeded four and one-half millions in 1919. Thus exports exceed imports, while the total home production outruns imports so far as to make an increase in duty entirely out of question from any standpoint of protection. Be it noted that the duty under discussion applies to paper board before it has been cut into shapes for boxes and other articles, and that additional duties are levied in succeeding stages of manufacture.

Mr. WALSH of Montana. Mr. President, I want to supplement what was said on the subject by the Senator from Texas with the following information on paper board from the Tariff Commission, page 31 of the survey:

The present and potential power of foreign producing nations as competitors in the domestic market is very small, except in the case of wood-pulp test boards made in Canada and strawboards made in Holland and Germany. As shown in the appended table of the world's production of paper boards and the number of mills in the year 1906–7, compiled from an Austrian commercial report, Germany was the only country that came near the United States in paper-board production, but even then German production amounted to only slightly more than a third of ours, the American and German production being, respectively, 685,000 and 247,083 short tons. Since 1907 our production has tripled. While Germany's production of paper board increased to 408,000 tons in 1912, it has been greatly affected by the war. At present there is a serious shortage of raw material in Germany.

I read now from page 17:

There is practically no tariff problem in the American paper-board industry, because this industry is conducted on such a large scale that the output of other nations is unimportant in comparison, and it can supply the domestic market at a price lower than that at which foreign producers can sell in America. The annual production of paper boards in this country is greater than that of any other branch of the paper industry. There are two reasons for the strong position and large scale of the industry. First, on account largely of our immense newspaper publication, we can secure waste paper, the main raw material of paper boards, in greater abundance and cheaper than can other nations. Our comparative independence of wood pulp as a raw material means that Canada has not the advantage of lower cost of production by reason of cheaper raw material that she has in making the wood-pulp papers, such as newsprint and wrapping paper. Second, our industries make use of paper-board boxes, and paper-packing material on a scale unknown to any other country.

Canada can produce paper board made of wood pulp, especially high-grade test board made from sulphate wood pulp, as advantageously as the United States, and exports to us an amount equal to nearly one-fourth our domestic production of wood-pulp boards. This is normally not an injuriously competitive trade, however, for it supplies a deficiency in domestic production. Moreover, wood-pulp boards represent a very small proportion of our total paper-board output. Holland and Germany send us a small amount of strawboard, but ordinarily do not offer serious competition.

Very recently, however, owing mainly to the industrial depression, some American manufacturers have begun to complain of the injurious effect of Canadian wood-pulp imports on the domestic market, and ask for a tariff which shall provide the same protection against Canadian paper board as the Canadian tariff provides against American paper board. Likewise there are complaints of the depressing effect Dutch and German strawboard offerings are exerting on American strawboard prices.

The American paper-board industry is, nevertheless, firmly and strongly established in a position where in normal times it need not fear the world's competition, and in times of depression competition only from boards made direct from such raw material as wood pulp and straw is likely to be disturbing.

Paper boards (as also newsprint paper) present a contrast to most other kinds of paper in that they do not face potential competition due to reconstruction of European pre-war industrial conditions and export trade. The war has had only a very indirect effect on conditions of competition in paper-board manufacture in this country.

The paper-board industry of the United States is highly organized. It is in the hands of comparatively few concerns, each one being necessarily large and highly capitalized, due to the great size and expense of machinery and plant involved.

We export probably somewhat more than 4 per cent and import about 2 per cent of domestic production.

At page 35 of the survey there is the following:

The American manufacturer normally stands unassailable in the production of almost all kinds of paper boards. The paper-board industry of the United States, on account of the immense supply of raw material available to it in the form of waste paper and the immense domestic market for its products, has been developed on a scale to which that of no other nation can even approach. Conditions are considerably different from those obtaining in the newsprint industry, where wood pulp, the raw material, is available cheaper and in greater quantities to Canada than to the United States. By reason partly of our large imports of newsprint from Canada, we are able to be practically independent of her and other countries for paper board, for our domestic supply of waste paper thereby becomes practically assured.

Yet in the face of these facts, as said by the Senator from Texas, it is proposed to increase the rate 100 per cent upon this commodity.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. On page 168, line 3, after the words "provided for," the committee proposes to insert "except pulpboard in rolls, for use in the manufacture of wall board."

Mr. SMOOT. I ask that the amendment be disagreed to.

The amendment was rejected.

Mr. SMOOT. I now offer the following amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 168, line 4, after the words "ad valorem," insert a semicolon and the following:

pulpboard in rolls, for use in the manufacture of wall board, 5 per cent ad valorem.

The amendment was agreed to.

Mr. LENROOT. I will ask the Senator from Utah whether he desires at this time to disagree to the amendment putting that item upon the free list?

Mr. SMOOT. I think perhaps we had better do it later.

Mr. LENROOT. We have been doing that at the time.

Mr. SMOOT. I wish that it may go over, because we have passed over chemical wood pulp. We can do it at the time we decide on chemical wood pulp.

Mr. LENROOT. Very well.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The READING CLERK. The next amendment is, on page 168, line 12, in paragraph 1303, where the committee proposes to strike out "15" and insert "25," so as to read "25 per cent ad valorem."

Mr. McCUMBER. I wish to withdraw the committee amendment in line 12.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

Mr. McCUMBER. I now move, on page 168, in line 12, to strike out "1½ cents per pound and 15," and to insert in lieu thereof "20," so as to read:

PAR. 1303. Filter masse of filter stock, composed wholly or in part of wood pulp, wood flour, cotton, or other vegetable fiber, 20 per cent ad valorem.

Mr. WALSH of Montana. Can the Senator advise us how that rate compares with the rate in the present law?

Mr. SMOOT. It is the same exactly.

Mr. WALSH of Montana. That relates to filter masse.

Mr. SMOOT. It makes the rate the same as at present.

Mr. WALSH of Montana. I have no objection to that.

Mr. SHEPPARD. What is the effect of that rate as compared with the existing rate?

Mr. McCUMBER. It is the existing rate.

Mr. SHEPPARD. In other words, the committee have decided to offer no increase in the existing rate on the article covered by this paragraph?

Mr. McCUMBER. That is correct.

Mr. SHEPPARD. I think the committee acted very wisely.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

Mr. McCUMBER. On page 168, in line 15, I move to substitute "25" for "30" as proposed by the committee.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 168, in line 15, in lieu of the amendment proposed by the committee which is withdrawn, insert "25," so as to read:

Indurated fiber ware, masks composed of paper, pulp or papier-mâché, manufactures of pulp, and manufactures of papier-mâché, not specially provided for, 25 per cent ad valorem.

Mr. SHEPPARD. Is that the existing rate?

Mr. McCUMBER. The amendment would leave it as provided in existing law.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the committee as modified.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was in paragraph 1304, on page 168, line 17, after the word "copying," to strike out "paper and all papers not specially provided for in this section," and to insert "paper, india and bible paper, condenser paper, carbon paper, coated or uncoated, bibulous paper, pottery paper, tissue paper for waxing, and all paper similar to any of the foregoing, not specially provided for, colored or uncolored, white or printed," so as to read:

PAR. 1304. Papers commonly known as tissue paper, stereotype paper, and copying paper, india and bible paper, condenser paper, carbon paper, coated or uncoated, bibulous paper, pottery paper, tissue paper for waxing, and all paper similar to any of the foregoing, not specially provided for, colored or uncolored, white or printed, weighing not over 8 pounds to the ream of 480 sheets on the basis of 20 by 30 inches, and whether in reams or any other form, 6 cents per pound and 15 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. WALSH of Montana. Mr. President, I should like to have some explanation of the amendment from the committee.

Mr. SMOOT. Mr. President, there are several amendments which are to be offered by the committee to this paragraph. The first amendment is simply for the purpose of designating the different kinds of paper referred to so that hereafter we may have the statistics relative thereto in better form than we have them to-day. The amendment which is to be proposed by the committee on page 168, line 23, striking out the word "eight" before the word "pounds" and inserting in lieu thereof the word "six" will have the effect of eliminating paper which weighs over 6 pounds from the bracket which imposes a duty of 6 cents per pound and 15 per cent ad valorem. The House of Representatives inserted 8 pounds with no other purpose than to include coarser or heavier weight paper at the higher specific duty. Almost all the tissue and other light-weight papers—that is, the real fine papers—weigh less than 6 pounds to the ream. If the weight to be included in this rate of duty be increased from 6 pounds to 8 pounds, then it would let in a large quantity of paper weighing between 6 pounds and 8 pounds, and make necessary the imposition of the higher rate of duty. The committee thought that that was unwise.

The weight fixed in the Payne-Aldrich law was only 6 pounds. The effect of the proposed amendment, of course, will be to decrease the rate of duty on certain kinds of paper.

In the next clause the House of Representatives fixed the weight between 8 pounds and 12½ pounds and provided a rate of duty of 5 cents per pound and 15 per cent ad valorem. The Committee on Finance propose to amend that by reducing the maximum weight to 10 pounds. If the House provision fixing the maximum weight at 12½ pounds a ream be adopted instead of the Senate committee amendment proposing to fix the weight at 10 pounds, there are large quantities of paper that would fall within the 5-cent specific rate instead of the 4-cent bracket below. Therefore your committee has felt that 10 pounds should be the limit of weight in the second bracket, therefore reducing the rate of duty in that case.

As to the next provision, I will say to the Senator that will be stricken out and there will be a new provision proposed in the way of an amendment to take care of bibulous paper, which the House has not inserted here, but intended should fall under a very *high* rate, making the equivalent ad valorem duty on it, according to to-day's prices, about 42 per cent. The committee has decided to insert a special bracket for that particular class of paper, on account of its being cheap as compared with the other high-priced papers which I have mentioned.

If the Senator from Montana so desires, I will call his attention to the amendment now—I think he has a copy of it before him—or I will wait until we get to it, and then I can tell the Senator just what it proposes.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee.

Mr. WALSH of Montana. My understanding now is that the changes proposed by the committee throw a greater quantity of material into the low dutiable brackets.

Mr. SMOOT. That is the result of the changes proposed.

Mr. WALSH of Montana. That is very gratifying; indeed, the action of the committee with respect to this entire paragraph is pleasing. From the information I have before me tissue paper bears a rate of 30 per cent under the present law, and the rate proposed in the bill is a slight reduction of the rate in the present law. The rate in the Underwood law was altogether too high, as shown by its actual operation. The imports of tissue paper into this country in 1919 amounted only to $316,263, while our exports amounted to $2,056,670, with a production in this country of $40,696,000.

Mr. SMOOT. Mr. President, I want to call the Senator's attention to the fact that these changes are made for several reasons, one reason, which I did not mention, being that the price of paper has decreased 33⅓ per cent in the last few months, and, of course, the ad valorem duties upon those papers would not afford the protection which they would have afforded three or four months ago. Yet we have cut the rates here in some cases even below the existing law.

Mr. WALSH of Montana. But the importations seem to be constantly diminishing. As I have advised the Senate, the importations in 1919 amounted to $316,263; in 1920 to $377,222; and for the nine months of 1921 the importations were only $34,977; so that it may be said that there are practically no importations at all under existing law and consequently the duty ought to be reduced.

Mr. SMOOT. I thought that we had really arranged this paragraph in such a way that not even a Democrat would object to it; I did not anticipate anyone would object to it.

Mr. WALSH of Montana. I am much gratified at the action the committee has taken.

Mr. SHEPPARD. Mr. President, is it not a fact that the paragraph represents an increase in the rate on crêpe paper and filtering paper?

Mr. SMOOT. We have taken filtering paper out of this paragraph and put it in paragraph 1309.

Mr. SHEPPARD. What about crêpe papers? In line 8, page 169, a duty of 6 cents a pound and 15 per cent ad valorem is proposed. Does not that represent a distinct increase over the existing rate of 30 per cent ad valorem?

Mr. SMOOT. As to some types of paper it does represent an increase, but as to others it does not represent an increase.

Mr. SHEPPARD. From the figures handed me by one of the experts it appears that the ad valorem increase represented by the duties on crêpe paper and filtering paper is from 42 to 56 per cent over the existing rates.

Mr. SMOOT. We have taken filtering paper out of paragraph 1304, so that, instead of falling under the bracket requiring a rate of 6 cents a pound, it will fall in paragraph 1309. As I have already said as to crêpe paper, we can not tell just what the importations have been, because the statistics have covered not only crêpe paper but also filtering paper. So far as filtering paper is concerned, however, it makes very little difference as to what rate is imposed, because the duty is levied entirely for revenue. France makes the filtering paper that is generally used and ships it all over the world. We have been unable to make it. The only other country which makes it at all, so far as I know, is England, which produces a small quantity of it, and yet England imports filtering paper from France, for the French have some process of manufacturing that no one else has been able to perfect, and the French filtering paper is better than that manufactured anywhere else in the world. No matter whether the duty were 1 cent or whether it were 5 cents, the paper would be imported into this country.

Mr. SHEPPARD. I am not speaking of filtering paper now; I am referring to crêpe paper. The proposed increase in the rates on crêpe paper is without justification. It is to be regretted that the committee did not restore the rates on crêpe paper when they restored the existing rates on the other qualities of paper covered by this paragraph. The imports of all kinds of paper covered by this paragraph are insignificantly small, being exceeded many times by the exports. Canada relies upon us for a large portion of her supply, and we continue to furnish an ample supply for all our domestic needs and to export substantial quantities all over the world.

Mr. SMOOT. Mr. President, just for the record, I wish to say to the Senator that crêpe paper is an ordinary paper with a rather strong fiber and it is run through rolls to crimp it and it is used entirely for decorative purposes. So I can not see any harm in the rate which we have provided upon crêpe paper.

Mr. WALSH of Montana. Mr. President, let me inquire of the Senator, inasmuch as these two qualities of paper have always been combined, are combined in the reports, and have been thrown together in previous tariff acts, why does not the Senator transfer crêpe paper to another paragraph, as has been done in the case of filtering paper?

Mr. SMOOT. The House separated the two, and the committee thought that it was just as well for statistical purposes to have them separated. Filtering paper is hardly the class of paper that falls in this bracket. So the House took it out and put it in paragraph 1309, with a rate of 5 cents instead of 6 cents. Those interested in the manufacture, such as it is, of filtering paper in this country asked that it be put in this para-

graph with no other purpose than to have a duty of 6 cents a pound imposed instead of 5 cents.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

Mr. McCUMBER. In line 23 the committee proposes to strike out "8" and insert "6."

The PRESIDENT pro tempore. The amendment proposed by the Senator from North Dakota in behalf of the committee will be stated.

The READING CLERK. On page 168, line 23, it is proposed to strike out "8" and insert "6," so that it will read "not over 6 pounds to the ream."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from North Dakota on behalf of the committee.

The amendment was agreed to.

Mr. McCUMBER. On line 2, page 169, I move, on behalf of the committee, to strike out "8" and insert "6."

The PRESIDENT pro tempore. The Chair calls the attention of the Senator from North Dakota to the fact that there is an amendment preceding that point. The Secretary will state the amendment.

The READING CLERK. On page 169, line 2, before the word "weighing" it is proposed to strike out "if."

The amendment was agreed to.

The READING CLERK. It is now proposed by the Senator from North Dakota, on page 169, line 2, after the word "over," to strike out "8" and insert "6," so as to read "weighing over 6 pounds."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota on behalf of the committee.

The amendment was agreed to.

The READING CLERK. On the same page, line 4, after the words "ad valorem"——

Mr. McCUMBER. On page 169, line 3, I move to strike out "12½" and insert in lieu thereof "10."

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 169, line 3, it is proposed to strike out "12½" and insert "10," so as to read:

Weighing over 6 pounds and less than 10 pounds to the ream—

And so forth.

The amendment was agreed to.

Mr. McCUMBER. As there have been some changes here, I will substitute for the first part of the next amendment as printed in the bill the following:

On page 169, lines 4 and 5, strike out "weighing over 12½" and insert in lieu thereof "india and bible paper weighing over 10."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The READING CLERK. On page 169, lines 4 and 5, in the committee amendment, it is proposed to strike out "weighing over 12½" and to insert in lieu thereof "india and bible paper weighing over 10," so that, if amended, the committee amendment will read:

India and bible paper weighing over 10 pounds and less than 18 pounds to the ream, 4 cents per pound and 15 per cent ad valorem.

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

Mr. McCUMBER. On page 169, line 7, I ask that the committee amendment be rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 169, line 7, after the words "crêpe paper," it is proposed to insert "and filtering paper."

The amendment was rejected.

Mr. McCUMBER. On line 14, after the word "pound," I move to add "and 15 per cent ad valorem."

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. In paragraph 1305, page 169, line 14, after the word "pound" and before the semicolon, it is proposed to insert "and 15 per cent ad valorem," so as to read:

Papers with coated surface or surfaces, not specially provided for, 5 cents per pound and 15 per cent ad valorem.

The amendment was agreed to.

The READING CLERK. On line 18 the committee proposes to strike out "gelatin" and insert "gelatin, linseed-oil cement."

Mr. SHEPPARD. Mr. President, what is that amendment?

The PRESIDENT pro tempore. The amendment is in line 18 on page 169.

Mr. SHEPPARD. But what is the amendment?

The READING CLERK. On line 18 it is proposed to strike out "gelatin" and insert "gelatin, linseed-oil cement," so as to read:

And papers wholly or partly covered with metal or its solutions (except as herein provided), or with gelatin, linseed-oil cement, or flock, 5 cents per pound—

And so forth.

Mr. SMOOT. It is simply adding linseed-oil cement; that is all.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. McCUMBER. I ask that the Senate reject the committee amendment on line 19.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 169, line 19, the committee proposes to strike out "15" and insert "20," so as to read:

Five cents per pound and 20 per cent ad valorem.

The amendment was rejected.

Mr. McCUMBER. On page 170, line 3, I move to strike out "20" and insert in lieu thereof "15."

The PRESIDENT pro tempore. The amendment as modified will be stated.

The READING CLERK. On page 170, line 3, it is proposed to strike out "17" and insert "15," so as to read:

Papers, including wrapping paper, with the surface or surfaces wholly or partly decorated or covered with a design, fancy effect, pattern, or character, except designs, fancy effects, patterns, or characters produced on a paper machine without attachments, or produced by lithographic process, 4½ cents per pound, and in addition thereto, if embossed, or printed otherwise than lithographically, or wholly or partly covered with metal or its solutions, or with gelatin or flock, 15 per cent ad valorem.

The amendment as modified was agreed to.

The READING CLERK. On page 170, line 8, it is proposed to strike out "17" and insert "25."

Mr. McCUMBER. I move to substitute "15" for "25."

The READING CLERK. It is proposed to strike out "17" and to insert "15," so as to read:

Provided, That paper wholly or partly covered with metal or its solutions, and weighing less than 15 pounds per ream of 480 sheets, on the basis of 20 by 25 inches, shall pay a duty of 5 cents per pound and 15 per cent ad valorem.

Mr. LENROOT. Mr. President, I want to ask the chairman of the committee a question. I have no familiarity with this schedule, and I am just curious to know how it came about that the rate of 25 per cent was reported by the committee, and now it is reduced to 15 per cent.

Mr. SMOOT. I will say to the Senator that these papers have already been reduced in price 33⅓ per cent since the bill was reported to the Senate.

Mr. LENROOT. I wanted that information.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The READING CLERK. On the same page, line 9, it is proposed to strike out "including decalcomania paper not printed" and to insert "not specially provided for," so as to read:

Gummed papers, not specially provided for, 5 cents per pound.

Mr. McCUMBER. I wish to modify that amendment by inserting on line 10, after the word "for" and the comma, the words "including simplex decalcomania paper not printed."

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The READING CLERK. On line 11 it is proposed to strike out "17" and insert "20," so as to read:

Cloth lined or reinforced paper, 5 cents per pound and 20 per cent ad valorem.

Mr. McCUMBER. I wish to substitute "15" for "20," on line 11.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The READING CLERK. On line 18 it is proposed to strike out "13" and insert "25," so as to read:

Papers with paraffin or wax-coated surface or surfaces, vegetable parchment paper, grease-proof and imitation parchment papers which have been supercalendered and rendered transparent or partially so, by whatever name known, all other grease-proof and imitation parchment paper, not specially provided for, by whatever name known, 3 cents per pound and 25 per cent ad valorem.

Mr. McCUMBER. I ask to strike out "25" and insert in lieu thereof "15."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment as modified.

The amendment as modified was agreed to.

The READING CLERK. On page 171, line 1, it is proposed to strike out "20" and insert "35," so as to read:

Bags, printed matter other than lithographic, and all other articles, composed wholly or in chief value of any of the foregoing papers, not specially provided for, and all boxes of paper or papier-mâché or wood covered or lined with any of the foregoing papers or lithographed paper or covered or lined with cotton or other vegetable fiber, 5 cents per pound and 35 per cent ad valorem.

Mr. McCUMBER. I ask that the Senate reject the committee amendment on line 1.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The READING CLERK. On lines 3 and 4 it is proposed to strike out "or solar printing processes" and insert "processes by using solar or artificial light," so as to read:

Plain basic paper for albumenizing, sensitizing, baryta coating, or for photographic processes by using solar or artificial light—

And so forth.

The amendment was agreed to.

The READING CLERK. On line 5 it is proposed to strike out "15" and insert "20," so as to read:

Three cents per pound and 20 per cent ad valorem.

Mr. McCUMBER. I ask that the Senate reject the committee amendment on line 5.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. I also ask that the Senate reject the committee amendment on line 7.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 171, line 7, it is proposed to strike out "20" and insert "25," so as to read:

Albumenized or sensitized paper or paper otherwise surface coated for photographic purposes, 3 cents per pound and 25 per cent ad valorem.

The amendment was rejected.

The READING CLERK. In line 10, it is proposed to strike out "plates, 30" and insert "plates or stones, 65," so as to read:

Wet transfer paper or paper prepared wholly with glycerin or glycerin combined with other materials, containing the imprints taken from lithographic plates or stones, 65 per cent ad valorem.

Mr. WALSH of Montana. Mr. President, I should like to learn from the committee why they felt justified in proposing an increase of over 100 per cent in this duty.

Mr. McCUMBER. This relates to wet transfer paper. The stones are cut in Germany. The transfer papers are made therefrom and brought over to this country. The reports show a requirement of about double the amount of duty which we have placed upon them. They take the place of the stonecutting which is done in this country; and therefore the committee, after a very full hearing, considered that 65 per cent was the least it could give as a protective duty.

Mr. SHEPPARD. Mr. President, paragraph 1305 of the Fordney-McCumber bill deals with surface-coated, lined, waxed, gummed, and decorated papers.

Surface-coated papers are used for printing half tones, for covering boxes, and for a number of fancy and decorative purposes.

Gummed paper is used in making stickers, labels, stamps, seals, and so forth.

Waxed paper is used for wrapping and preserving bread, cake, pie, food products in general, drugs, flowers, and so forth.

One form of gummed paper is called decalcomania paper and is used in placing colored designs on glassware, porcelain, marble, and so forth.

Reinforced paper is lined with cloth or string and is used for covering cases of goods shipped on flat cars, machinery shipped in crates, lining cases, and in merchandise shipments of many kinds. This reinforced paper makes a durable drawing paper for draftsmen and for children's books of various types.

Vegetable parchment paper is also included in the paragraph and is made from pulp treated with sulphuric acid. It is grease proof, waterproof, translucent, slightly transparent, and is used for drawing, bookbinding, cork covers for medicine bottles, filtering sugar, refining gutta-percha, covering for greasy substances, and wrapping for various food products.

Vulcanized paper is also embraced in this paragraph. It is a form of vegetable parchment but is treated with zinc chloride instead of sulphuric acid and is used in making trunks, tubs, waste baskets, trucks, and so forth.

An imitation parchment, semigrease proof but not waterproof, is also embodied in this paragraph. It has many of the characteristics of the real parchment and is used as a wrapper for bottles and boxes through which the label may be seen, the transparent material for window envelopes, and sanitary protectors for telephone receivers.

Photographic and blue-print paper and wet transfer paper, a coated paper used in placing designs on lithographic plates, are also covered by this paragraph.

Exports of these articles amounted to more than $16,000,000 in 1920, while imports did not reach more than one-seventh or one-eighth of that figure. While exact figures of home production are not available, it is certain that they run into the tens of millions. Evidently the home industry is permanently buttressed against outside attack, and the raise in the tariff rates on these articles in paragraph 1305 is without justification. This paragraph increases the duty on autographic transfer paper, for instance, from 25 per cent, the rate fixed by the present law, to 65 per cent ad valorem. The existing Democratic rates for all these articles range from 25 to 40 per cent. The pending paragraph changes these to rates partly specific and partly ad valorem, an increase ranging from 12 to 100 per cent, with the exception of coated-surface papers not specially provided for and papers containing decorations, fancy effects, patterns, designs, and so forth, not produced on a paper machine or lithographed. On these last-named articles there is a reduction from 35 per cent in the existing tariff law to 17 or 18 per cent. On the whole, the paragraph makes increases which are entirely without any basis in fact or in ethics.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

Mr. WALSH of Montana. Mr. President, the argument made by the Senator from Texas may be illustrated by the case of parchment paper, on which the rate of 25 per cent under the existing law is increased to the equivalent of 34.6 per cent in the bill before us.

Mr. SMOOT. Is the Senator speaking of wet transfer paper?

Mr. WALSH of Montana. No; I am talking about the paragraph generally, and illustrating its tendencies by the item of parchment paper. On parchment paper, as I have indicated, the duty is increased from 25 per cent to 34.6 per cent, yet the Tariff Commission tells us that imports of parchment paper in the calendar year 1920 amounted to only seventy-seven one-hundredths of 1 per cent of the domestic production. In other words, the present rate of 25 per cent is an embargo rate, and yet the rate is proposed to be increased by something like 33⅓ per cent.

Mr. SMOOT. Just for the record, Mr. President, I want to say to the Senator that that rate has been reduced from 3 cents a pound and 25 per cent ad valorem to 3 cents a pound and 15 per cent ad valorem. The remarks of the Senator are based on the rate reported to the Senate committee in the first place, which would be reduced by 10 per cent.

Mr. SHEPPARD. It still involves an increase, however.

Mr. SMOOT. Not with the 3 cents a pound and 15 per cent ad valorem. Figured on the prices of to-day that makes it the same as the existing law.

Mr. SHEPPARD. As I figure it, while the amendment suggested does reduce the rate in the bill as reported, the new rate still represents in the main a substantial increase over the existing rate.

Mr. SMOOT. I can not agree with the Senator. The only increase is in the case of the wet transfer paper. There is an increase in that, and I am quite sure the Senator will not object to that, for this reason: Let us take any large firm in the United States which issues, we will say, Christmas calendars. They have the stone cut in Germany, and all the artistic work is done in Germany. In Germany they take a wet transfer sheet from that stone and send that wet transfer sheet to the United States, where they can print a million copies, if they want to, from that transfer sheet. I think the figures of importations show that the value of those was only $16,000. Every artist in the United States, either plate or stone, is at a disadvantage in every way, because the labor is done over there against his labor here. All they have to do is to get a wet transfer sheet and ship it over here and the whole work is done. It is to protect the high, skilled labor which cuts the lithographic stone or the steel plate that this rate is imposed.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

DEATH OF SENATOR CROW.

Mr. PEPPER. Mr. President, I rise to announce to the Senate the death of Hon. WILLIAM E. CROW, late the senior Senator from Pennsylvania. Senator CROW died at his home in Uniontown, in that State, at 10 minutes of 11 this morning.

I venture to believe, Mr. President, that by no Senator was membership in this body more highly prized than by Senator CROW. His long and tragic illness prevented him from rendering to the country and to the Senate the service which he was so well qualified to render. He fought manfully, sir, to regain his health and strength to the end that he might return to his post of duty. It was decreed otherwise, and he has entered into his rest.

I accordingly submit, sir, the following resolutions and ask for their immediate consideration.

The PRESIDENT pro tempore. The Secretary will read the resolutions.

The resolutions (S. Res. 329) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. WILLIAM E. CROW, late a Senator from the State of Pennsylvania.

Resolved, That a committee of eight Senators be appointed by the President pro tempore to attend the funeral.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

The PRESIDENT pro tempore appointed as the committee under the second resolution Mr. PEPPER, Mr. ROBINSON, Mr. SPENCER, Mr. TRAMMELL, Mr. DIAL, Mr. HARRIS, Mr. ERNST, and Mr. NORBECK.

Mr. PEPPER. Mr. President, as a further mark of respect to the memory of the deceased Senator, I move that the Senate do now adjourn.

The motion was unanimously agreed to, and (at 2 o'clock and 53 minutes p. m.) the Senate adjourned until to-morrow, Thursday, August 3, 1922, at 12 o'clock meridian.

SENATE.

THURSDAY, *August 3, 1922.*

The Chaplain, Rev. J. J, Muir, D. D., offered the following prayer:

Our Father and our God, in Thee we live and move and have our being. We would bear before Thee this morning a thrice grief-stricken State, and ask Thee to look upon that great Commonwealth in its present sorrow, but especially bear, we beseech Thee, upon Thy gracious heart the widow and the orphan. Be the widow's God and the Father of the fatherless. So help us each to understand that as the days multiply and the duties come and go we are under supreme obligation to the God who continues us in health and strength. May we bear nobly and faithfully the tasks committed to us. May we serve Thee with full purpose of soul. To our land in its present complexities of anxiety we beseech Thine own guidance and that righteousness may exalt the Nation. To our President and all related to him as his official family may Thy blessings be imparted. Hear and help us till the day is done and the shadows flee away. We ask in Jesus Christ's name. Amen.

THE JOURNAL.

On request of Mr. LODGE, and by unanimous consent, the reading of the Journal of the proceedings of the legislative day of Thursday, April 20, 1922, was dispensed with and the Journal was approved.

ABANDONED COTTON ACREAGE AND BOLL-WEEVIL RAVAGES (S. DOC. NO. 237).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of Agriculture, transmitting, pursuant to Senate Resolutions 319 and 320, the supplementary cotton report published by the department in connection with its August 1 cotton condition report, showing the opinion of the State commissioners of agriculture and agricultural agents of the various counties in the cotton-growing States of the percentage of abandoned cotton acreage up to July 1, 1922, and the percentage of cotton acreage infested by the boll weevil and the estimated damage to the crop caused by the weevil up to July 25, by States, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

LABOR UNIONS AND THE TARIFF.

Mr. CALDER. Mr. President, I ask unanimous consent to have printed in the RECORD, in the usual RECORD type, and referred to the Committee on Finance a brief statement recently published in the press, prepared by the Senator from Connecticut [Mr. MCLEAN], which contains a list of labor organizations and representatives of the American Federation of Labor which have petitioned the President and Congress in support of the pending tariff measure.

There being no objection, the statement was referred to the Committee on Finance and ordered to be printed in the RECORD in 8-point type, as follows:

* * * * * * *

"Ten international labor unions and over 300 individual labor unions from all parts of the United States have petitioned Congress to speed the enactment of the pending tariff bill. This does not include the thousands of petitions which individual Members of the Senate have received from employees of factories or shop committees. This is almost entirely the voice of union labor.

"Despite the statements made and constantly repeated that there is no sentiment in the country for the passage of a tariff bill at this time, the following partial list of labor organizations which have petitioned Congress will prove to anyone who wishes to be fair and face the facts that the great majority of workers in the United States, men and women producers, want this tariff bill.

"In a recent letter to President Harding and members of the Senate Finance Committee 10 international brotherhoods said:

"'Representing thousands of skilled American wage earners, a large percentage of whom served their country on the blood-stained fields of Europe, and who on their return to their homes have found it impossible to obtain employment, we again reiterate our desire for the enactment of laws by Congress that will adequately protect all wage earners of our country against the loss of employment through any industrial invasion on the part of the products of any other nation. We believe that any fair-minded person will admit that thousands of our American workmen are idle to-day solely because of the increase in the importations of merchandise from foreign countries.'

"This petition was signed by the—

"International Brotherhood of Bookbinders.
"American Flint Glass Workers' Union.
"United Hatters of North America.
"United Textile Workers of America.
"American Wire Weavers' Protective Association.
"International Union of Steam and Operating Engineers.
"International Union of Leather Workers.
"National Print Cutters' Association.
"Painters, Paper Hangers, and Decorators.
"Steel and Copper Plate Engravers.

"The Republican majority in the Senate has been struggling since April to pass a protective tariff in the interest of American workers, but progress has been slow because of a protracted Democratic filibuster and a campaign of misrepresentation by the importing interests, who are flooding the country with false statements about the tariff and the cost of living.

"The Republican majority, however, intends to fight the opposition no matter how long it takes, because we are determined to pass the Fordney-McCumber bill before Congress adjourns. The United States can not be prosperous unless the producers have work and can prosper, and the petitions which have been received from labor shows that the working men and women of the country are aroused to the danger and demand a protective tariff. If Congress legislates to make it possible for the people of this country who want to work to find profitable employment against any kind of foreign competition, every consumer will benefit by a wide distribution of prosperity.

"According to reports from many sections of the country the tariff delay here is holding up a return to prosperity. No one recognizes this more than I do, and for this reason I wish to state to the people of Connecticut and the country that the Republican Party is not responsible for the protracted debates in the Senate by those Democrats who think that by talking they can pull the wool over the eyes of the workers of the country and make them think they do not need a tariff.

"The following partial list of labor organizations shows that labor has not been fooled by the Democratic filibuster:

"IS THIS THE BEGINNING?"

Mr. HARRISON. Mr. President, I ask unanimous consent to have printed in the RECORD in 8-point type, following the statement just referred to by the Senator from New York, an editorial which appeared in the home city of one of the leaders on the tariff question, Salt Lake City, Utah, in the Salt Lake Telegram, entitled "Is this the beginning?" It is an article against the tariff bill.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Salt Lake Telegram of July 13, 1922.]

IS THIS THE BEGINNING?

Food prices record a general increase for the period from May 15 to June 15, according to figures compiled by the United States Department of Labor. There seems to be no good and sufficient reason for this tendency, unless it be found in the fact that passage of the tariff bill, designed to protect abnormal profits, is already being discounted. Generally speaking, this is the season of the year when the consumer looks for a little relief in his food budget.

In the natural operation of the laws of supply and demand the season should provide lower rather than higher prices. We do not know how the Congressmen who are supporting the tariff measure in its present form explain the figures, but it seems certain to us that they reflect anticipatory glee over the new tariff. It is not the last increase the people will have to pay if the tariff bill is enacted in its present form.

The tariff, as contemplated, can have no other effect. It is not content to protect the American manufacturer from the cheap labor to be had in Europe. By monopoly it would protect the American manufacturer in all of his undertakings, even to that of gouging the public for abnormal profits. The main purpose of a tariff is to protect the workingman, who can not compete with the labor of Europe, and the majority of our people believe in this principle.

They are not agreed that the tariff is intended to protect the manufacturer against all forms of competition at the expense of the purchasing public. And yet this is precisely the effect of the pending measure. It automatically creates a monopoly which shuts out all foreign competition and legalizes and protects American profits, no matter how unreasonable they may be. Congress, it seems, will insist that the measure be enacted without material change and the people may expect further discouraging reports from the Department of Labor. Congressmen, apparently, will not realize the effect of their action until they are confronted with it in future campaigns.

THE SOAP BLOC VERSUS THE FARM BLOC.

Mr. LADD. Mr. President, I ask unanimous consent to have printed in the RECORD, in 8-point type, and referred to the Committee on Finance an editorial appearing in Wallace's Farmer of July 28, 1922, entitled "The Soap Bloc Versus the Farm Bloc," together with two telegrams protesting against the proposed rates on certain oils.

There being no objection, the matter was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

[Editorial from Wallace's Farmer, July 28, 1922.]

THE SOAP BLOC VERSUS THE FARM BLOC—IS SECTION 50 (A) OF THE NEW TARIFF BILL TO BE ANOTHER SCHEDULE K?

With the tariff as it stands to-day, coconut oil and soya-bean oil will come into the United States from the Orient in quantities at least four times as large as before the war. True it is that there is provision for a duty of 4 cents a pound on coconut oil and 3 cents a pound on soya-bean oil when these products are to be used for edible purposes. However, copra (from which coconut oil is pressed) is allowed to come in free and soya beans are allowed to come in free, no matter for what purpose they may be used. The vegetable-oil provisions of the permanent tariff as they stand to-day are absolutely worthless to the farmer.

SOAP BLOC WINS SENATE FIGHT.

The farm-minded Senators made a strong fight against the soap bloc the second week of July but were defeated by a vote of 33 to 24, the vote on section 50 (a), which provides that the tariff on soya-bean oil shall be 3 cents a pound and on coconut oil 4 cents a pound when these oils are used for edible purposes, but that the duty shall be remitted in case it is shown within three years that the oils have been used in the manufacture of substances which can not be used for food.

Senator GOODING, of Idaho, moved to strike out of section 50 (a) the provision for remitting the duty on the vegetable oils when they are used for industrial purposes. This precipitated at once a strictly nonpartisan fight between the soap bloc on the one hand and the farm bloc on the other. Nine Democrats voted with the soap bloc and seven with the farm bloc. Twenty-four Republicans voted with the soap bloc and 17 with the farm bloc. Senator CUMMINS, of Iowa, voted with the soap bloc and Senator RAWSON, of Iowa, with the farm bloc. Generally speaking, the voting divided on purely sectional lines,

not a single Senator from an eastern industrial State voting in favor of a tariff on vegetable oils used in the making of soap.

It is a decidedly curious situation to find high-protectionist eastern Republicans voting in favor of free trade in vegetable oils for soap-making purposes when soap as a finished product is protected by a tariff of from 5 per cent to 50 per cent ad valorem. The Senators leading the fight for the soap bloc marshaled their arguments very cleverly and misled the following western Senators: BORAH, of Idaho; BURSUM, of New Mexico; CUMMINS, of Iowa; CURTIS, of Kansas; MCCUMBER, of North Dakota; NELSON, of Minnesota; KING, of Utah; SMOOT, of Utah; SPENCER, of Missouri; and WARREN, of Wyoming. Inasmuch as the oriental oils have in recent years displaced tremendous quantities of the lower grades of animal fats for soap-making purposes, it is hard to see how these western Senators can explain their vote to their farmer constituents.

Before the war about two-thirds of the oil used in the making of soap came from home-grown animal fats and a large part of the remaining third from home-grown vegetable oils. During the war, when Europe temporarily was forced out of the oriental oil trade, our soap manufacturers learned to use soya-bean oil and coconut oil in ever-increasing quantity, replacing large quantities of home-grown cottonseed oil, corn oil, and the lower grades of animal fats.

DANGER IN OILS ON FREE LIST.

The most forceful argument of the soap bloc was that a tariff on coconut and soya-bean oil used for soap purposes would result in large quantities of these oils being diverted to Europe, and that Europe would, therefore, buy less lard and cottonseed oil from the United States, thus harming the hog farmer of the Corn Belt and the cotton farmer of the South. This is largely bunk, for the reason that both lard and cottonseed oil fulfill a somewhat different function in the oil trade than coconut oil and soya-bean oil. No matter how much coconut oil and soya-bean oil Europe gets from the Orient, she will still be in the market for our lard and cottonseed oil. And so far as coconut oil is concerned, a tariff in the United States will not make so very much difference, because most of the coconut oil imported into the United States comes from the Philippines.

The great advantage of a tariff on coconut oil to farmers of the United States is that it will shut out just enough of the coconut oil so there will not be so much danger of coconut oil being used for both soap-making purposes and for the making of butter substitutes. Under section 50 (a) there is very real reason to fear that much of the coconut oil imported supposedly for soap-making purposes will find its way into butter substitutes.

CHANCE TO AMEND IN CONFERENCE.

The soya-bean tariff is really far more important than the coconut-oil tariff as long as the Philippines are a part of the United States and Philippine coconut oil can come in free. Soya beans and soya-bean oil are largely produced in China, and a tariff against them is really effective. Moreover, it is justified on the ancient Republican plea of building up infant industries. Soya-bean acreage has been growing by leaps and bounds and will continue to grow rapidly if our soap industry continues to be willing to pay a price for soya-bean oil on a parity with the price paid for corn oil and cottonseed oil, as is the case at the present time.

When the House and Senate take up the bill in conference there will be another chance to straighten out this matter of an equitable tariff on vegetable oils. So far the soap bloc has been victorious in both Houses because so many Representatives and Senators from Western States have not gone into the vegetable-oil problem in the great detail which the matter deserves. In the Philippine Islands and in the United States we can produce all of the vegetable fats which the soap and margarine manufacturers of the United States need. A tariff to keep out the soya beans and soya-bean oil from Manchuria and the coconut oil and copra produced outside of the Philippines will in the long run do far more good than harm to the soap maker, the Corn Belt farmer, and the cotton farmer.

The farm bloc should make a final determined effort to straighten out section 50 (a) when the tariff bill goes to conference.

—

SEATTLE, WASH., *July 29, 1922.*

Senator LADD, *Washington, D. C.:*

Protective tariff on fish and vegetable oils essential for preservation and further developing of Pacific coast fish-oil industries, particularly that of Alaska, where herring oil is produced in connection with the Scotch cure pickled herring industry. Most strongly protest on behalf of coast fish-oil producers against proposed tariff legislation putting fish and vegetable oil on free list for nonedible purposes, and urge that duties proposed in Senate committee bill be made effective on all oils imported for any purpose.

A. BUNZEN,
Secretary Pacific Cured Fish Association,
Representing Fish-Oil Producers of Alaska.

—

SEATTLE, WASH., *July 29, 1922.*

Senator LADD, *Washington, D. C.:*

I understand that the contemplated legislation anticipates permitting oriental oils to be imported into this country duty free for nonedible purposes, and as president of the Franklin Packing Co., of Port Ashton, Alaska, and Baranof Packing Co., Red Bluff Bay, Alaska, both of which are producing fish oil, I want to protest against the admission of oriental oils duty free for any purpose whatsoever, as it would mean practically the annihilation of the fish-oil industry of Alaska, which we have at great expense gone into in connection with the development of the pickled-herring industry within the last few years. If we are not protected on the oil, which is a by-product, and enabled to get a fair price for the same, it will not only annihilate the oil industry but will cripple very seriously the herring industry as well, which bids fair to become the greatest industry in Alaska. I would like to urge upon you the necessity of taking a firm stand in this matter that we may have the protection we are rightfully entitled to.

LEE H. WAKEFIELD.

FEDERAL RESERVE BANK BUILDING AT DENVER.

Mr. PHIPPS. From the Committee on Banking and Currency I report back favorably the joint resolution (S. J. Res. 223) authorizing the Federal Reserve Bank of Kansas City to enter into contracts for the erection of a building for its branch office at Denver, Colo. I ask unanimous consent for the present consideration of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Whereas the act of Congress approved June 3, 1922, abridged the right of Federal reserve banks to enter into contracts by providing that no Federal reserve bank should have authority thereafter to enter into any contract or contracts for the erection of any building of any kind or character or to authorize the erection of any building in excess of $250,000, without the consent of Congress having previously been given therefor in express terms, which, however, did not apply to buildings under construction on June 3, 1922; and

Whereas many of the Federal reserve banks were not affected by this provision, since they had already completed or commenced construction of buildings for their head offices and branches; and

Whereas the Federal Reserve Bank of Kansas City had not on June 3, 1922, actually commenced the construction of any building for its branch at Denver, Colo., but had acquired the site therefor; and

Whereas the act of June 3, 1922, operates inequitably on said Federal Reserve Bank of Kansas City: Now, therefore, be it

Resolved, etc., That the Federal Reserve Bank of Kansas City be, and it is hereby, authorized to enter into contracts for the erection of a building for its branch bank at Denver, Colo., on a lot previously acquired: *Provided*, That the total investment in such buildings shall not exceed an amount equal to 5 per cent of its paid-in capital stock and surplus.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

PENSIONS AND INCREASE OF PENSIONS.

Mr. BURSUM. Mr. President, I ask unanimous consent for the present consideration of the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses.

The bill increases the pension of widows of the Spanish War from $12 to $20. It increases the pensions of dependent children from $2 to $4. The bill has passed the House and has been in the Senate for a long time. I do not think there is any opposition to it. The Spanish War veterans, who are to have their national encampment in a few days at San Francisco, are very anxious that the bill shall be passed at this time.

The PRESIDENT pro tempore. The Senator from New Mexico asks unanimous consent for the present consideration of House bill 4. Is there objection?

Mr. DIAL. Mr. President, I object.

The PRESIDENT pro tempore. The Senator from South Carolina objects.

Mr. BURSUM. I move that the Senate proceed to the consideration of the bill.

Mr. BORAH. Mr. President, is that motion in order at this time?

The PRESIDENT pro tempore. The Chair is of the opinion that the motion is not in order at this time. Does the Senator from Idaho make the point of order?

Mr. BORAH. I think we ought to finish the morning business. There will be some time after morning business is concluded to call up the bill.

The PRESIDENT pro tempore. Objection is made.

Mr. BURSUM. I give notice that I shall make a motion at 1 o'clock to take up the bill.

DISABLED AMERICAN VETERANS OF THE WORLD WAR.

Mr. POMERENE. Mr. President, on April 12, 1921, I introduced the bill (S. 406) to incorporate the Disabled American Veterans of the World War. The bill was on that day referred to the Committee on the Judiciary. An identical bill passed the House unanimously. I realize that under present conditions it is impossible to have the bill brought up at this particular time, but I think the Senate, as well as myself, a Member of the Senate, is entitled to a report on the bill.

The bill which passed the House is also pending before the Committee on the Judiciary. No report has been made on either bill. I feel, notwithstanding the objection which exists on the part of certain members of the Judiciary Committee to a favorable report, that we are entitled either to a favorable report or an adverse report or to have the bill reported back without recommendation.

A month ago I submitted a motion to discharge the Judiciary Committee from the further consideration of the bill. There has not been an opportune time to bring that motion up because of the pendency of the tariff bill, and I knew, of course, that under the existing circumstances it was not worth while to occupy the time of the Senate in bringing it up. But I serve notice now, this being the first morning hour we have had since that time, that I intend to bring up the motion to discharge the committee and get favorable action upon it if possible.

Mr. WALSH of Montana. To what bill does the Senator refer?

Mr. POMERENE. The bill to incorporate the Disabled American Veterans of the World War.

Mr. ROBINSON. What is the calendar number of the bill?

Mr. POMERENE. It is not on the calendar. It was introduced April 12, 1921, and has been in committee ever since.

RIVER AND HARBOR PROJECTS.

Mr. SIMMONS obtained the floor.

Mr. JONES of Washington. Mr. President, will the Senator from North Carolina yield to me for just a moment?

Mr. SIMMONS. I rose to call up the unanimous-consent agreement which I offered on yesterday, but I yield to the Senator.

Mr. JONES of Washington. I understood that the Senator was going to call up the unanimous-consent proposal. If that should be agreed to, as I hope it will be, then we would have no opportunity to call up other measures. A few days ago we had up House bill 10766, the legislative river and harbor bill, and disposed of all amendments to it except two committee amendments and one or two amendments which are to be offered. I think the two amendments will take no time. I think we can dispose of the bill probably in five minutes or such a matter. I had hoped we might get it through so that we might be allowed to vote upon it before the House convenes. I ask unanimous consent that the bill be considered at this time.

Mr. BORAH. Mr. President, I am under obligation to object to unanimous consent for the present consideration of the bill. My attention has been called to two or three items. I did not expect it to come up this morning, and I am not prepared to take them up. If I had known we were to have a morning hour and that it was expected to call up the bill, I perhaps could have been ready, but I am not ready to do so now.

The PRESIDENT pro tempore. Objection is made.

THE TARIFF.

Mr. SIMMONS. Then, Mr. President, I ask that the unanimous-consent proposal made by myself on yesterday may be laid before the Senate.

Mr. McCUMBER. Although the unanimous-consent agreement offered by the Senator from North Carolina was read yesterday, I think perhaps it had better be read again, and after it is read I shall offer a substitute.

The PRESIDENT pro tempore. The Secretary will read the proposed unanimous-consent agreement presented by the Senator from North Carolina on yesterday.

The reading clerk read as follows:

It is agreed by unanimous consent that on August 19, 1922, at 11 o'clock a. m., the Senate will proceed without further debate to vote upon H. R. 7456, to provide revenue, etc., and upon all motions and amendments thereto which may be pending or which may be offered and to the exclusion of all other business.

That not later than August 11, at 11 o'clock a. m., the Senate will proceed to vote without further debate upon all committee amendments that may be pending or that may be offered, and that immediately following the conclusion of the votes on committee amendments the Senate shall proceed to the consideration of other amendments, if any, which may be submitted.

That all time shall be divided as nearly equally as may be between the majority and the minority and shall be controlled by the Senator from North Dakota [Mr. McCUMBER] on behalf of the majority and by the Senator from North Carolina [Mr. SIMMONS] on behalf of the minority.

The PRESIDENT pro tempore. Is there objection?

Mr. McCUMBER. I send to the desk and ask that the Secretary may read a substitute for the unanimous-consent agreement just submitted by the Senator from North Carolina [Mr. SIMMONS].

The PRESIDENT pro tempore. The Chair understands that the Senator from North Dakota offers a paper which he has sent to the desk as a substitute for or an amendment to the request as presented by the Senator from North Carolina.

Mr. LODGE. As a substitute.

The PRESIDENT pro tempore. The Chair does not understand that a request for unanimous-consent agreement is subject to amendment.

Mr. SIMMONS. Mr. President——

Mr. LENROOT. In order to simplify the situation I now object to the request of the Senator from North Carolina. That will permit the Senator from North Dakota to offer his request for unanimous consent.

Mr. ROBINSON. If the Senator from Wisconsin objects to the request for unanimous consent which has been presented by the Senator from North Carolina [Mr. SIMMONS], then I will object to the suggestion of the Senator from North Dakota [Mr. McCUMBER].

The PRESIDENT pro tempore. The Senator from Wisconsin objects to the request for unanimous consent submitted by the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I think the matter may be adjusted very easily. Upon reflection, I think the Chair is entirely right in holding that the proposition of the Senator from North Dakota may not be offered as a substitute for my request for a unanimous-consent agreement, but the only differences between the proposition of the Senator from North Dakota and the proposition made by myself are, first, as to the time of final voting, the Senator from North Dakota fixing the time as the 17th of August, and my proposition fixing it as the 19th of August. I am perfectly willing to agree to the Senator's suggestion as an amendment to my proposition, fixing the 17th of August instead of the 19th of August as the time for voting. I am perfectly willing to write that date into my request for unanimous consent.

Mr. ROBINSON. Let the request submitted by the Senator from North Dakota be stated.

The PRESIDENT pro tempore. The Chair was about to direct that the proposal of the Senator from North Dakota be read.

Mr. SIMMONS. Mr. President, if I may finish what I was saying, I desire to further state that the other difference between the proposition of the Senator from North Dakota and mine is the provision that no Senator shall be compelled to confine himself to the discussion of the bill while it is pending. That proposition was originally in my request, but by inadvertence was stricken out. I am perfectly willing to accept that also, so that we may, by way of amendment, perfect the proposition which I have offered so as to embrace the suggestions embodied in the request of the Senator from North Dakota.

The PRESIDENT pro tempore. The Secretary will state the proposal of the Senator from North Dakota.

The reading clerk read as follows:

It is agreed by unanimous consent that at 10 o'clock a. m. on the calendar day of Thursday, August 17, 1922, the Senate will proceed to vote, without further debate and to the exclusion of all other business, upon any amendment that may be pending, any amendment that may be offered, any motion that may be made relative thereto, and immediately thereafter upon the bill (H. R. 7456), an act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, through the regular parliamentary stages to its final disposition.

That from this time forward until the final vote is reached debate shall be confined to the question before the Senate or to the bill itself, and the presiding officer shall strictly enforce this provision of the agreement.

That at not later than 11 o'clock a. m. on the calendar day of Friday, August 11, 1922, the Senate will proceed to vote, without further debate, on any committee amendment that may be pending; that following the disposition of committee amendments the Senate will proceed to consider other amendments that may be offered.

That the time remaining after committee amendments are disposed of shall be evenly divided, as nearly as may be, between the majority and minority sides of the Senate and shall be controlled by the

Senator from North Dakota [Mr. MCCUMBER] on behalf of the majority and by the Senator from North Carolina [Mr. SIMMONS] on behalf of the minority.

The PRESIDENT pro tempore. Is there objection?

Mr. LENROOT and Mr. STERLING addressed the Chair.

The PRESIDENT pro tempore. The Senator from Wisconsin.

Mr. LENROOT. I should like to ask the Senator from North Dakota or the Senator from North Carolina this question, among others. Will it be in order after Friday, August 11, for the Committee on Finance to offer any amendment to the bill, even though there be no debate upon it?

Mr. McCUMBER. It is my understanding that any Senator may offer amendments, but committee amendments are by that time supposed to be concluded.

Mr. LENROOT. That is, the Committee on Finance itself could not offer any amendment to the bill after August 11?

Mr. SIMMONS. Not as a committee amendment, but any individual member of the committee might offer an amendment.

Mr. LENROOT. I understand; but the committee itself could not offer any amendment to the bill after August 11?

Mr. McCUMBER. Not as a committee.

Mr. LENROOT. Well, Mr. President, for the present I am going to object to this unanimous-consent agreement, and when I have the opportunity I should like to state my reason for doing so. If I may have it now, I will proceed.

Mr. McCUMBER. Very well, Mr. President.

Mr. LENROOT. Mr. President——

Mr. SIMMONS. I think I have the floor, but I yield to the Senator from Wisconsin.

Mr. LENROOT. I thank the Senator.

I am as anxious as is any Senator to dispose of the pending bill, but, Mr. President, if the unanimous-consent agreement be entered into in the form in which it is now proposed, upon August 19, no matter what committee amendments may be pending, and on August 11, no matter what committee amendments may be pending or may be proposed, there will be no opportunity for one single word of discussion concerning such amendments. On the 11th day of August, under the proposed unanimous-consent agreement, the committee might offer an amendment of the very greatest importance changing the character of the bill, and yet there would not be opportunity for one single word of protest.

Mr. ROBINSON. Mr. President, will the Senator yield to an interruption?

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Arkansas?

Mr. LENROOT. Yes.

Mr. ROBINSON. The Senator from North Carolina [Mr. SIMMONS] has the floor.

Mr. SIMMONS. I yield to the Senator from Arkansas.

Mr. ROBINSON. I call the attention of the Senator from Wisconsin [Mr. LENROOT] to the language of the proposed agreement, which provides that after 11 o'clock on August 11 the committee can not propose any amendment. All amendments which have been proposed prior to that time by the committee must be voted on without further debate. The object, of course, of that provision is to give time for debate on the individual amendments. Individual amendments can not under the unanimous-consent agreement under which the Senate is now proceeding be presented until after all committee amendments have been disposed of. Prior to August 11 the Finance Committee may offer amendments, and until the Senate convenes at 11 o'clock on August 11 those amendments are subject to debate.

This arrangement or some arrangement similar to it is absolutely necessary in order to arrive at any unanimous-consent agreement. If Senators imagine that the minority are willing to submit to an agreement which would shut off debate on minority amendments, after having permitted four or more months of debate on committee amendments, they are mistaken. Such a suggestion would appear to me to be unreasonable.

Under the agreement as proposed, until 11 o'clock on August 11 the committee may continue to offer amendments, and until that hour arrives any amendment which the committee has offered may be debated. Technically, of course, the pending amendment must be considered, but, under the practice of the Senate, we may debate any amendment that we desire to debate. In order to secure time for the discussion of amendments to come from the floor, it is necessary at some time to shut off committee amendments and to shut off the debate on committee amendments; but, since committee amendments can not be proposed after the Senate convenes on the 11th of August and are subject to debate until that date, I see nothing unfair in discontinuing debate on committee amendments and requiring votes on them, in order that they may be disposed of and some time may be left prior to the final vote for the discussion and determination of individual amendments. Unless this arrangement or something very like it is effected there can not be any unanimous agreement entered into.

Mr. LENROOT. I have no objection whatever to a limitation—a drastic limitation—of debate upon committee amendments and upon individual amendments; but under the proposed unanimous-consent agreement the committee might offer an amendment or a series of amendments or 50 amendments at 10 o'clock on August 11, if we shall convene at that hour, or at 6 o'clock on the night of August 10, and there would be no opportunity to utter one single word with reference to them.

Mr. SIMMONS. Mr. President, will the Senator allow me to interrupt him?

Mr. LENROOT. I am occupying the floor by the grace of the Senator from North Carolina.

Mr. SIMMONS. I understand that; but I interrupt the Senator to say that I think I see the point of the Senator, and I should like to ask him if it can not be met in this way: We agree that we shall begin on the 11th of August at 11 o'clock to vote upon committee amendments without further debate, and then on the 19th we are to vote, without further debate, on other amendments than committee amendments which may be pending or offered. Would it not meet the Senator's objection if a provision were incorporated that after the 9th, which would be one day before we begin to vote on committee amendments, during which no additional amendment shall be offered by the committee, and that on the 17th—if we adopt the 19th as the date for the final vote—we will foreclose further amendments? Might not that meet the objection of the Senator? I can readily see what the Senator has in mind.

Mr. LENROOT. I appreciate that in part that would reach one of the objections which I have, but I now want to state another. Under the proposed agreement, when we reach the 11th day of August it is just as certain as that the sun will rise that there will be scores upon scores of committee amendments which will not have been acted upon and will not have been debated. I wish to give one illustration of a committee amendment which I understand will be proposed when we arrive at the proper place, and that is to pay a bounty in lieu of a tariff rate upon a certain commodity. It is certain that that will not be reached before the 11th day of August, and is the Senate of the United States to pass upon a policy of granting bounties to an American producer without one single word of debate concerning it?

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. LENROOT. I yield.

Mr. WATSON of Indiana. I should like to ask my friend a question.

Mr. ROBINSON. The Senator from Wisconsin has yielded to me.

Mr. WATSON of Indiana. I beg the Senator's pardon.

The PRESIDENT pro tempore. To whom does the Senator from Wisconsin yield?

Mr. ROBINSON. If the Senator from Indiana wishes to proceed at this time, I will wait until he concludes.

Mr. WATSON of Indiana. I desire to ask the Senator from Wisconsin a question. Some three weeks ago the Senator, along with me and other Senators, proposed that the cloture rule now in existence should be put into operation. That would have given each Senator one hour for debate and would have closed all debate after that. That would have left hundreds of amendments undebated, would it not?

Mr. LENROOT. No; not necessarily. Of course, there will be hundreds of amendments that we do not need or care to debate; but I would infinitely prefer that cloture rule, because then I individually would have that hour reserved for my discussion of such subjects as I saw fit to address myself to. Under this proposition I will have no such opportunity, unless I choose to discuss something a week before it is acted upon by the Senate, and that is not the way to legislate.

Mr. ROBINSON. Mr. President, will the Senator yield to me now? If the Finance Committee, after having reported this bill on the 10th day of April, 1922, and having had until the 11th day of August, 1922, to present and have considered its amendments, chooses to pursue the course which the Senator from Wisconsin fears it will pursue—namely, at the last moment before the debate on the committee amendments is concluded to present to the Senate a large number of important and new amendments to be acted upon—there is no way to prevent that in practical effect except to preclude members of the committee from offering amendments after a fixed date, and I will state why. The Senator, of course, being a great parliamentarian, realizes it already, in advance of my statement.

Mr. SIMMONS. That is just what I suggested awhile ago.

Mr. ROBINSON. The Senator from North Dakota [Mr. McCUMBER], for instance, under this rule and any other rule likely to be adopted, can rise and present an amendment, and say that under the unanimous-consent agreement entered into the committee can not offer an amendment, but that the committee has considered the amendment, is in favor of it, and as an individual he presents the amendment or amendments to the Senate in his individual right, and if he can secure the floor to offer the amendment or amendments, in practical effect he can have the Senate consider amendments favored by the committee. The only reason that can exist for shutting off absolutely committee amendments after the 11th of August is that under the procedure here it is frequently discovered that amendments are necessary to reflect the known intent or policy of those in charge of a bill. They could only be made at the instance of the committee, if this rule were agreed to, by unanimous consent. Any Senator under this rule could prevent the committee from formally presenting an amendment, but no Senator could prevent the Senator from North Dakota [Mr. McCUMBER] or the Senator from Utah [Mr. SMOOT] or any other member of the Finance Committee who chose to pursue that course from rising on the floor and saying as an individual Senator: "I present an amendment which I know the Finance Committee is in favor of, because that committee has discussed it and considered it."

I agree with the Senator from Wisconsin [Mr. LENROOT] in the necessary implication from his statement that it would be unfair and unjust and unreasonable for the Finance Committee, after having had exclusive control of the procedure of the Senate in the consideration of this tariff bill from the 10th day of April until the 11th day of August, 1922, to come into the Senate and violate the spirit of this agreement by presenting to the Senate a large number of amendments, such as that suggested by the Senator from Wisconsin, at the last moment, when no opportunity will be given to discuss them and when the Senate under the rule must take a vote upon them. I am not disposed, however, to think that the Finance Committee would resort to that extremity, and, so far as I am concerned, I am willing to see written into the agreement a provision that the committee shall not do it.

The committee has been slow in presenting its revised amendments. We all agree to that. The committee presented 2,087 amendments when the bill was first reported to the Senate. Then, as each schedule has been reached it has been the policy of the committee to come in with such a revision of the rates first reported by the committee as to make entirely new issues. That has been true as to every schedule that the Senate has considered since this bill was first brought before it. The time has been entirely consumed by the consideration of committee amendments, and the committee in good faith, in fairness to the Senate and the country, ought to present immediately all the amendments it intends or proposes to present and give the Senate a chance to consider them; but there must be some arrangement made whereby those who want to present individual amendments may have the opportunity of doing so and having them considered without the remaining time taken up by members of the committee in the presentation of committee amendments. The committee ought to be able, between now and the 11th of August, to present and have fairly discussed any amendment which it thinks material.

Mr. LENROOT. Mr. President, will the Senator yield to me there?

Mr. ROBINSON. Yes; certainly.

Mr. LENROOT. The Senator admits that with perfectly legitimate discussion, without any time being wasted, it will be impossible to reach all other pending committee amendments prior to the 11th day of August.

Mr. ROBINSON. I am not sure of that.

Mr. WATSON of Indiana. Mr. President, if the Senator will permit me, there are between two and three hundred committee amendments now pending. Let me say to my friend from Arkansas that the committee meets every morning at 9.30 to keep ahead of the Senate's work and take up the schedule which we are to consider next. That is to say, we come down to sundries and take up sundries, and the committee itself doubtless will propose a number of amendments to that schedule. It is utterly impossible for us to be up here and down there at the same time. We can not comply with the provisions of the Senator's suggestion to bring in all these amendments in one day. That can not be done, because we can not go over them and determine what they shall be. We aim to keep one day ahead of the Senate and bring in these amendments so that we shall have them as the schedule is presented. It can not be done in any other way.

Mr. ROBINSON. That is a very remarkable statement. We have now, substantially, a leading member of the committee pleading for more time than either proposal contemplates. After having taken from the 10th day of April until, in prospect, the 11th day of August, several months, to consider its amendments, the committee now says that it is a physical impossibility for it to report to the Senate, in advance of the time for action in the Senate, just what its proposals shall be.

The committee has had ample opportunity to study this bill. The presumption was, when the bill was reported, that the 2,087 amendments which the committee then suggested reflected the conclusions of the committee; but, marvelous beyond expression, the committee has elected to withdraw amendment after amendment and present others as substitutes for them, and now the Senator from Indiana tells us in effect that any agreement which anybody is contemplating on this bill really means that the committee can not have ample time to formulate and have its proposals considered.

Mr. WATSON of Indiana. No.

Mr. ROBINSON. It really means that there can be no agreement, and that this debate must go on and on and on until this session dies and until the fall elections have been held.

Mr. WATSON of Indiana. No; I think——

Mr. ROBINSON. With the indulgence of the Senator from Wisconsin, I will yield to the Senator.

Mr. WATSON of Indiana. Will the Senator from Wisconsin yield?

Mr. LENROOT. The Senator from North Carolina has the floor.

Mr. WATSON of Indiana. Will whoever has the floor yield?

Mr. SIMMONS. Mr. President, I have the floor, and I do not desire to lose it, I will say to the Senator.

Mr. WATSON of Indiana. The Senator will not lose it, so far as I am concerned; but I want to ask the Senator from Arkansas a question.

Mr. SIMMONS. I have no objection to that.

Mr. ROBINSON. Certainly; I yield with pleasure to my friend the Senator from Indiana.

Mr. WATSON of Indiana. I thank the Senator. He evidently misunderstood my statement. We have come now to the last schedule. We shall meet again to-morrow morning at 9.30 to take up that schedule. I do not know what amendments the committee may see fit to adopt, but I understood the Senator to say that either to-day or to-morrow we ought to bring in all the amendments we intend to bring in at any time, and I tell him that is a physical impossibility. The members of the committee must be here on the floor—at least the two leaders of the committee—and we can not tell just how many amendments that schedule will bring about.

Mr. ROBINSON. Mr. President, the Senator proceeds upon the theory that the committee shall formulate its policy while this bill is being discussed and determined by the Senate. Under the rules and practice, as everybody knows, the committee's policy presumably is formed while the bill is in the committee, and changes are made only to meet obvious mistakes made by the committee. What the Senator from Indiana is now insisting upon is that as the rates presented by the committee are assaulted and disclosed to be unreasonable, unjust, and unfair, the committee shall have unlimited opportunity to retreat, prepare a new line of combat, and then advance again to the attack.

Mr. WATSON of Indiana. Now will the Senator yield?

Mr. ROBINSON. Yes; I yield in the time of the Senator from North Carolina, through the courtesy of both the Senator from North Carolina and the Senator from Wisconsin.

Mr. WATSON of Indiana. The Senator has entirely misconstrued my remarks, unintentionally, of course. The committee now is on the sundries schedule, and we consider amendments going through the schedule seriatum, taking up one of these items after another, and going into the merits of the propositions. These items have not been discussed at all on the floor. Nothing has been said about them; but in the committee, before they come to the floor, we determine whether or not these particular rates should be left in the bill.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. WATSON of Indiana. Yes.

Mr. ROBINSON. The Senator's committee reported this bill several months ago with 2,087 amendments.

Mr. WATSON of Indiana. Yes.

Mr. ROBINSON. Why did not the committee then report such amendments as it was willing to stand upon? Why did the committee elect to pursue a course that will make necessary the constant revision by the committee of its own work?

Mr. WATSON of Indiana. To meet new facts and new conditions as those conditions have constantly arisen.

Mr. ROBINSON. Oh!

Mr. WATSON of Indiana. The Senator understands about the chaotic conditions of the world and all industry and commerce, and this is done to meet new facts and to adjust these rates as we think they ought to be adjusted from time to time. We squarely announced in the beginning that these changes would be made, and that the committee would meet every day for the express purpose of doing precisely what we have done; and in a general way we have carried out that policy from beginning to end.

Mr. POMERENE. Mr. President, will the Senator yield?

Mr. SIMMONS. I yield to the Senator from Ohio.

Mr. POMERENE. I should like to ask a question of the Senator from Indiana, if I may. I have been very much interested in the statement just made by my distinguished friend from Indiana to the effect that the committee has to meet constantly, every day, to consider changes in this bill. I should like to ask him what the position of the committee would have been if it had succeeded in adopting the cloture rule, which would have ended all debate, and which would have compelled, in the ordinary process under the cloture rule, a final vote on this bill long before this?

Mr. ROBINSON. And which would have shut off all amendments.

Mr. POMERENE. And would have shut off all amendments.

Mr. WATSON of Indiana. Mr. President, I can answer that question if the Senator wants me to. It may be that some of these rates would have been a little too high; it may be that some of them would have been a little too low; but, after all, wherever there was any doubt, the benefit of that doubt would have been given to the American manufacturer and the American producer and not to his foreign rival and competitor; and, so far as I am concerned, I would have been entirely willing to run the risk in the forum of public opinion, as we shall shortly appeal to it.

Mr. SIMMONS. Mr. President, before further yielding to the Senator from Wisconsin, I want to say for myself, and I think I speak for this side of the Chamber, we are very anxious that some unanimous-consent agreement fixing an early day for final action upon the bill shall be entered into. I have offered my proposition in good faith. I am perfectly willing to amend it in any particular which may seem just and proper in order to secure a legitimate and adequate discussion of the measure. Feeling that way about it, I am disposed to yield to anyone on the other side who wishes to discuss this matter, because I am anxious to find out whether or not the majority really want a unanimous-consent arrangement.

Mr. LENROOT. Does the Senator yield the floor?

Mr. SIMMONS. I yield to the Senator all the time he wants.

Mr. LENROOT. I wanted to say something which I would not like to say through the courtesy of the Senator from North Carolina.

Mr. SIMMONS. I yield to the Senator, but I desire to hold the floor.

Mr. LENROOT. Very well; I shall have an opportunity later, then.

Mr. SIMMONS. The Senator can say now anything he desires about the matter.

Mr. LENROOT. I want to make this observation——

Mr. HARRISON. Before the Senator proceeds, may I ask what the Senator has to suggest? Does he want a vote on this proposition at a definite date, or does he want to modify the proposed agreement?

Mr. LENROOT. I want to have the proposed agreement modified. I am perfectly willing to agree now to a limitation of debate of 10 minutes, if you choose, upon each amendment, and that debate shall be confined to the amendment pending, and then proceed until we reach the final disposition of the bill.

Mr. HARRISON. Without fixing a definite time for a vote?

Mr. LENROOT. Without fixing a definite time.

Mr. HARRISON. With the sugar proposition coming on, which is filled with iniquities, and such other propositions as leather and hides and boots and shoes, does the Senator think it is fair that Senators should be confined to 10 minutes to debate those important questions?

Mr. LENROOT. Under the unanimous-consent agreement proposed it would be perfectly possible to take from now until the 11th day of August without reaching sugar or hides.

Mr. HARRISON. If the Senator thinks that is not time enough and wants a limitation of debate, why does he not suggest a definite time for a vote at a later date and get somewhere?

Mr. LENROOT. Now, I am going to say what I did not like to say with the courtesy of the Senator from North Carolina——

Mr. SIMMONS. Will the Senator let me say one thing first?

Mr. LENROOT. Certainly.

Mr. SIMMONS. I want to say to the Senator that every change from my proposition which is embodied in the majority proposition I am willing to accept as an amendment. I want to say to the Senator, furthermore, and I think myself it would be better to provide in this unanimous-consent agreement that at a certain time the committee should stop offering amendments, leaving a margin for the discussion of new amendments.

Mr. LENROOT. I am perfectly willing to agree to that.

Mr. SIMMONS. And I am perfectly willing also to provide that at a certain time the offering of amendments from the floor shall stop, leaving a margin for discussion of new amendments which may have been offered. I want an agreement, and in good faith I am asking for one.

Mr. LENROOT. I am very anxious to have an agreement for the limitation of debate, and which will confine the debate to the particular question before the Senate, and if we do that we can dispose of this bill within a reasonable time. But I rose to call attention to the effect of this unanimous-consent agreement. Before doing so, I want to ask the Senator from North Carolina if he, representing the other side of the aisle, is willing to have the question of a bounty to American producers voted upon by the Senate without any opportunity to discuss it?

Mr. SIMMONS. I will state very frankly to the Senator from Wisconsin that I am not.

Mr. LENROOT. Yet the Senator himself has offered a unanimous-consent agreement which would have exactly that result.

Mr. SIMMONS. If I had thought it would have that effect I would not have offered it.

Mr. LENROOT. I mean to say, if the committee offers that proposition.

Mr. SIMMONS. I think, with the control of the time which is accorded to the Senator from North Dakota, representing the majority, and myself, representing the minority, we shall be able, within the time we have fixed for the discussion of new amendments offered from the floor, to cover the major questions.

Mr. LENROOT. But amendments can not be voted upon before they are reached in regular order. The Senator knows that, and the Senator knows the futility of the discussion of some particular subject a week before it is voted upon.

Mr. President, I want to call attention to another result of this unanimous-consent agreement. Section 315 of the bill is the section known as the elastic tariff provision. It is absolutely certain that under this unanimous-consent agreement that section would not be reached before August 11, because, under the unanimous-consent agreement, there is no incentive whatever upon the part of anyone who does not want debate limited to expedite consideration of the amendments, and this important provision, one of the most important that has ever come before Congress in a tariff bill, delegating to the President the power to fix and change duties under certain conditions, under this unanimous-consent agreement would have to be voted upon without one single word of debate.

I want to say a word now with reference to the attitude of the other side of the aisle. I appreciate that Senators on the other side of the aisle have changed their views very materially concerning their tactics with reference to this bill. In the beginning of the debate, and up to a very recent period, they believed it was to their political advantage to postpone the bill just as long as possible, because they wanted it to go to the people just before the election, without an opportunity to have it tried out. But the other side of the aisle has observed from day to day and from week to week that the bill has been improved; that excessive rates have been lowered; that the committee itself has acted and is acting every day in reducing exorbitant rates; and there is not nearly so much political advantage to the Democratic Party if we pass a good bill as there is if we pass a bad one. That is plain talk, but I do not happen to occupy a position where I am in sympathy with the Democratic side of the aisle, nor have I been in sympathy, as the Senate well knows, with the excessive rates which have been found throughout the bill.

That brings me to another proposition. I think it is without precedent in the Senate of the United States for a unanimous-consent agreement to be made or proposed whereby the control of the time shall be wholly in the chairman of the committee and the ranking minority member. Even in the House, with its drastic rules, that is never done when they come to the consideration of amendments.

All Senators are upon an equality here. Although I am not a member of the committee, I have the same right to discuss any amendment or proposition that any other Senator has, and if I am not in accord with the view of the chairman, or in accord with the view of the Senator from North Carolina, I do not propose to be put in the position of having to ask either of those gentlemen for time in order to explain an amendment or oppose one.

If we really want to get down to business on the bill, let us enter into a unanimous-consent agreement confining debate to the amendment pending before the Senate; let us confine debate to 10 minutes on amendments; and, if you choose, on sugar and hides you may enlarge the time, or on any other important item—on this elastic section, for instance—and then we shall have a unanimous-consent agreement which will permit legitimate and proper discussion without any waste of time. I am as anxious for the early disposition of the bill, as I said, as any Senator is, but I am not so anxious that I am willing to take the responsibility, as any Senator must take it if he refuses to object, of allowing important amendments, vital to the welfare of the country, to be voted on without a single word of discussion.

Mr. SIMMONS, Mr. GOODING, and Mr. McCUMBER addressed the Chair.

Mr. SIMMONS. I yield to the Senator from Idaho.

Mr. GOODING. Mr. President, I offer a resolution, and ask to have it read.

The PRESIDENT pro tempore. The Chair is of the opinion that with a request for a unanimous-consent agreement pending, there can not be brought forward another request for unanimous consent.

Mr. LENROOT. I objected to the request for unanimous consent.

The PRESIDENT pro tempore. The Chair understands that the Senator from Wisconsin objected to the proposal made by the Senator from North Carolina. The Chair has not understood, as yet, that the Senator from Wisconsin objected to the proposal made by the Senator from North Dakota.

Mr. LENROOT. I do object now; and I desire to make a statement, if I may have the floor.

Mr. SIMMONS. I think I have the floor. I have not yielded the floor.

The PRESIDENT pro tempore. The Chair doubts whether the Senator from North Carolina has the floor. Both these requests have been disposed of, and the order of business is the introduction of bills and joint resolutions.

Mr. SIMMONS. It is true that both the requests have been disposed of by the objections which were made as an interruption in my time, but that does not take me off my feet.

The PRESIDENT pro tempore. The Senator from North Carolina has no right to the floor except to introduce a bill or a joint resolution.

Mr. SIMMONS. I presume the Chair bases his ruling on the theory that there is nothing pending before the body?

The PRESIDENT pro tempore. There is nothing pending except the introduction of bills and joint resolutions.

Mr. ASHURST. I introduce a bill, and ask for its appropriate reference.

Mr. SIMMONS. I simply want to understand the ruling of the Chair. The Chair rules that this being in the morning hour I have not the floor because there is nothing pending before the Senate?

Mr. LODGE and Mr. GOODING addressed the Chair.

The PRESIDENT pro tempore. If Senators will permit the Chair to make a statement, it may clarify the situation. We are in the stage of the introduction of bills and joint resolutions, which is routine morning business. That was interrupted by the presentation by the Senator from North Carolina of a request for unanimous consent. That has been disposed of.

Mr. LODGE. Mr. President, I rise to a question of order. I believe I am in order now.

The PRESIDENT pro tempore. The Senator from Massachusetts will state his point of order.

Mr. LODGE. We are now at the stage of the introduction of bills and joint resolutions, under the morning-hour rule. Pending that, the Senator from North Carolina offered a request for unanimous consent, which I take to be privileged. That has been objected to. Objection has also been made by the Senator from Wisconsin to a similar request for unanimous consent offered by the Senator from North Dakota, and that disposes of both those requests for unanimous consent, as far as their parliamentary position is concerned. The Senator from Idaho, as I understand it, has risen to offer a Senate resolution, and we have not yet reached that order of business.

The PRESIDENT pro tempore. The Chair was about to state that the resolution offered by the Senator from Idaho could not be received until we reach that order of business.

Mr. HARRISON. Mr. President, I desire to propound a request for unanimous consent. In view of the fact that the Senator from Wisconsin has just made a speech giving his position touching this very important question, I desire to ask unanimous consent to proceed to reply to him at this time.

Mr. McCUMBER rose.

Mr. LODGE. I think we had better have the regular order, and finish that first.

Mr. McCUMBER. That is what I was going to ask for.

Mr. SIMMONS. That is what I wanted the floor for.

The PRESIDENT pro tempore. The introduction of bills and joint resolutions is in order.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Montana:

A bill (S. 3881) for the relief of Irvin Bird Above; to the Committee on Public Lands and Surveys.

By Mr. CURTIS:

A bill (S. 3882) granting a pension to David Mitchell; to the Committee on Pensions.

A bill (S. 3883) for the relief of James R. Gristy (with accompanying papers); to the Committee on Military Affairs.

By Mr. ASHURST:

A bill (S. 3884) granting a pension to Ross W. Brooks; to the Committee on Pensions.

By Mr. HITCHCOCK:

A joint resolution (S. J. Res. 235) authorizing the Federal Reserve Bank of Kansas City to enter into contracts for the erection of a new building for its branch office in Omaha, Nebr.; to the Committee on Banking and Currency.

TARIFF BILL AMENDMENTS.

Mr. CALDER submitted two amendments intended to be proposed by him to House bill 7456, the tariff bill, which were referred to the Committee on Finance and ordered to be printed.

INVESTIGATION OF INTERESTS IN TARIFF LEGISLATION.

The PRESIDENT pro tempore. Concurrent and other resolutions are in order. The Chair recognizes the Senator from Idaho.

Mr. GOODING. I ask that the resolution I have sent to the desk may be read.

The PRESIDENT pro tempore. The resolution will be read for the information of the Senate.

The Assistant Secretary read the resolution (S. Res. 330), as follows:

Whereas charges have been made by the New York Herald that Members of the Senate engaged in the sheep industry have thereby been financially interested in the wool schedule of the pending tariff bill; and

Whereas a resolution has been introduced in the Senate to investigate the financial interests affected by the proposed protective rates of the pending tariff bill; and

Whereas these charges originated in the New York Herald, which is owned by Mr. Frank A. Munsey; and

Whereas these and similar charges against the honesty and integrity of Members of the Senate have appeared in other newspapers: Therefore be it

Resolved, That a special committee of five Members of the Senate be authorized to investigate and report to the Senate the results of its investigations of—

1. The financial interests of Senators in the wool and sheep industries.

2. The financial interests of Mr. Frank A. Munsey in European industries which compete with American industries; the amount and percentage of his income derived from advertisements placed in his newspapers by the importing department stores which have financed a campaign of defamation against the pending tariff bill and which will profit by the defeat of the bill.

3. The number of Senators owning or controlling or financially interested in newspapers, the amount of revenue obtained by these newspapers from importing department stores, which will benefit financially by the defeat of the pending tariff bill.

4. The financial interests of all Members of the Senate or their immediate relatives in any American industry or in any property in any community in the United States which may be affected directly or indirectly either by the passage or defeat of any proposed schedule in the pending tariff bill.

Resolved further, That the investigating committee be empowered to summon witnesses and examine them under oath, including Mr. Frank A. Munsey and officials and attorneys for or representatives of the General Real Estate & Trust Co., or any other company or companies which may have been organized to operate other foreign mills, mines, and factories engaged in competition with American producers and workers and which will benefit financially by the defeat of tariff legislation by this Congress; also that the committee be empowered to summon witnesses and examine them under oath, including the publishers, editors, and business managers of newspapers which will benefit financially by advertisements or subsidies from importers and importing department stores which will benefit by the defeat or delay of tariff legislation; also officials of importing houses and department stores which will benefit financially by the defeat of tariff legislation; and all other

witnesses who can testify as to the interests and individuals who will reap fortunes if the pending tariff bill is not passed by Congress.

The committee is authorized to employ stenographers and to pay for the services therefor not to exceed $1.25 per printed page of said testimony, all expenses of said investigation to be paid out of the contingent fund of the Senate.

Mr. GOODING. I ask that the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. HARRISON. I ask unanimous consent for the immediate consideration of the resolution.

Mr. SMOOT. Under the rules it has to go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. HARRISON. Then I desire to move that the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to report back the resolution immediately.

Mr. GOODING. I accept the motion and hope it will prevail.

Mr. HARRISON. May I ask the Senator a question before he takes his seat? If I understood the second proposition to investigate, it was to investigate Frank A. Munsey. Does the Senator propose to investigate the other papers which have made similar accusations, notably the Chicago Tribune?

Mr. GOODING. That is the purpose of the resolution.

Mr. HARRISON. But it is confined to just one paper.

Mr. GOODING. It includes all other papers which have been undertaking to attack the tariff bill, those which we know receive large sums of money for advertising from importers and wholesale houses and department stores.

Mr. HARRISON. May I ask for a rereading of that part of the resolution? I understood that it merely applied to Frank A. Munsey.

Mr. GOODING. No; it is very general. I do not think there is anybody left out.

The PRESIDENT pro tempore. The Chair directs the Secretary to reread that part of the resolution, but suggests at the same time that debate upon the resolution is not in order.

The Assisant Secretary read as follows:

2. The financial interests of Mr. Frank A. Munsey in European industries which compete with American industries; the amount and percentage of his income derived from advertisements placed in his newspapers by the importing department stores which have financed a campaign of defamation against the pending tariff bill and which will profit by the defeat of the bill.

Mr. HARRISON. That does not include any other paper. Does not the Senator think other papers should be included?

The PRESIDENT pro tempore. Debate is not in order upon the resolution.

Mr. HARRISON. I ask unanimous consent to make the inquiry of the Senator from Idaho.

Mr. GOODING. If I may be permitted, I think the resolution covers all newspapers which have made an attack upon the name and honor of Senators who have been supporting the tariff bill. I think it covers several things.

Mr. SIMMONS. I suggest that no doubt ought to be left as to that. I am very much afraid it does not include anybody but Mr. Munsey and his publications. If there is any doubt about it, it ought to be broad enough to include all the Republican newspapers which have been opposing the bill.

The PRESIDENT pro tempore. The Senator from North Carolina is aware of the fact that under the rule, when the resolution is considered, it is open to amendment. At the present time it will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. HARRISON. I made a motion that the Committee to Audit and Control the Contingent Expenses of the Senate be directed to report the resolution back to the Senate immediately.

The PRESIDENT pro tempore. The Senator from Mississippi moves that the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, with instructions to report back to the Senate immediately the resolution.

The motion was agreed to.

Mr. HARRISON. Now I offer the resolution which I send to the desk, and I ask unanimous consent for its immediate consideration.

Mr. LENROOT. Mr. President, a parliamentary inquiry. What is the status of the resolution introduced by the Senator from Idaho?

The PRESIDENT pro tempore. It has been referred to the Committee to Audit and Control the Contingent Expenses of the Senate. The Secretary will report the resolution offered by the Senator from Mississippi.

The Assistant Secretary read the resolution (S. Res. 331), as follows:

Whereas paragraph 21 of section 17 of Jefferson's Manual provides: "Where the private interests of a Member are concerned in a bill or question he is to withdraw. And when such an interest has appeared his voice has been disallowed."

Resolved, That it is the sense of the Senate that the principle enunciated in the rule is proper and wise.

Resolved further, That it is the sense of the Senate that Senators, not only in the consideration of the pending bill (H. R. 7456), but on all other questions that may arise in the Senate, should adhere to the rule.

Mr. HARRISON. I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDENT pro tempore. Is there objection?

Mr. McCUMBER. I think it should follow the other resolution, and I therefore object.

The PRESIDENT pro tempore. The Senator from North Dakota objects.

Mr. LODGE. It goes over under the rule.

Mr. HARRISON. Do I understand that objection has been made?

Mr. McCUBMER. I ask that the resolution may go over under the rule, and then it can go in company with the resolution of the Senator from Idaho.

Mr. HARRISON. In other words, when that resolution is adopted this one may be adopted.

Mr. LODGE. Mr. President, I rise to a question of order. The Senator from North Dakota asked that the resolution of the Senator from Mississippi lie over under the rule, and, of course, that sends it over under the rule.

The PRESIDENT pro tempore. The Senator from North Dakota did not ask that it lie over under the rule.

Mr. LODGE. Yes; he asked it in so many words, standing within 2 feet of where I stand.

The PRESIDENT pro tempore. He asked that it follow the resolution of the Senator from Idaho.

Mr. McCUMBER. To settle the matter I ask that it may go over under the rule.

The PRESIDENT pro tempore. Objection is made, and the resolution will lie over under the rule.

Mr. HARRISON subsequently said: A parliamentary inquiry.

The PRESIDING OFFICER (Mr. McNARY in the chair). The Senator will state his inquiry.

Mr. HARRISON. There is a chance that the Senate might recess this afternoon and not have a morning hour to-morrow. In view of the fact that the Senate adopted a motion referring the Gooding resolution to the Committee to Audit and Control the Contingent Expenses of the Senate, with instructions that they should report back immediately, should they not report back during this morning hour? Should the resolution not now be reported back to the Senate?

Mr. SMOOT. Do I understand the Senator to say that the motion carried?

Mr. HARRISON. Yes; it carried. I do not want to lose any rights.

The PRESIDING OFFICER. The present occupant of the chair is informed by the Secretary that the motion obtained.

Mr. HARRISON. Then it should be reported this morning, should it not?

Mr. SMOOT. Just as soon as the chairman can get his committee together and report it. They would have to get the committee together.

Mr. HARRISON. I ask unanimous consent that that resolution and the resolution which I presented be taken up for consideration to-morrow, notwithstanding the fact that we might recess instead of adjourning.

Mr. SMOOT. As the chairman of the committee is out of the Chamber, I shall have to object until he comes back into the Chamber.

Mr. HARRISON. I did not want to lose my rights.

The PRESIDING OFFICER. The Senator from Utah objects to the request for unanimous consent.

THE TARIFF.

Mr. McCUMBER. Mr. President, I ask unanimous consent to discuss for a very few moments the proposal for a unanimous-consent agreement.

The PRESIDENT pro tempore. Is there objection?

Mr. LENROOT. Mr. President, will the Senator yield? Is the Senator willing that I should present a unanimous-consent request and let it be read in connection with the Senator's statement?

Mr. McCUMBER. Certainly.

Mr. LENROOT. I send to the desk a proposed unanimous-consent agreement.

The PRESIDENT pro tempore. The Secretary will read the proposed agreement.

The ASSISTANT SECRETARY. The Senator from Wisconsin [Mr. LENROOT] asks unanimous consent for the adoption of the following:

It is agreed by unanimous consent that when the tariff bill is before the Senate debate shall be confined to the question before the Senate, and that after 11 o'clock a. m. on August 11 no Senator shall speak

longer than 10 minutes upon any amendment or upon the bill. All questions of order under this agreement shall be decided by the Chair without debate.

Mr. LODGE. As I understand the proposed unanimous-consent agreement, it fixes no time for taking a final vote.

The PRESIDENT pro tempore. It does not.

Mr. LODGE. I ask that it may go over. I object to it now.

The PRESIDENT pro tempore. Objection is made, and the request will go over. The Chair now understands that the Senator from North Dakota has unanimous consent of the Senate to address the Senate upon the subject of the former proposed unanimous-consent agreement. The Senator from North Dakota will proceed.

Mr. McCUMBER. Mr. President, we have been discussing the tariff measure for an exceedingly long time, and so many other matters and discussions have crept into the debate that each side of the Chamber has accused the other of delay. Now both sides of the Chamber seem desirous of bringing the debate to a close. The Senator from North Carolina [Mr. SIMMONS] yesterday presented for consideration by this side a proposed unanimous-consent agreement. As we had had no time to consider it then, as it had not been presented to this side of the Chamber previously, and as we desired to have time to know just exactly what it meant and to see that it was agreeable to this side of the Chamber, I suggested to the Senator from North Carolina that I would take the matter up immediately and we would try to get an agreement during the day, if possible.

In accordance with that suggestion, Mr. President, a number of the Democratic Senators and a number of Republican Senators, including the whip on this side of the Chamber, the Senator from Kansas [Mr. CURTIS], and the ranking minority member of the Committee on Finance and others on the Democratic side whom he asked to join with him, went over this matter quite thoroughly and finally agreed upon the proposal which I offered this morning. I think it is fair; I think it is just to both sides. I am perfectly willing to concede that if either side should attempt to be unfair in the matter of the consideration of amendments or in presenting amendments, some complaint might lie. Those possibilities were discussed by those who formulated this proposed agreement.

I can say that every Republican member of the Committee on Finance is satisfied with the proposed agreement. I think every member of the Finance Committee on the other side who is present in Washington to-day is equally satisfied with it.

It is true that the limit on time does not begin until the 11th of August. To-day is the 3d of August. That gives seven days, excluding Sunday. If the committee, or those in charge of the bill, shall act with absolute fairness and in a spirit that would indicate an intention to bring questions before the Senate in such manner that every subject shall receive full and fair consideration, I think ample opportunity will be afforded for legitimate debate. I think we should take up the important, the great debatable, questions which have been suggested by the Senator from Wisconsin [Mr. LENROOT] between now and the 11th of August. We have gone from one schedule to another all through this debate in order to accommodate Senators. I think the sugar schedule, which presents practically but one question, could be taken up and disposed of before the 11th of August; I think the question of the duty on hides, which presents but one important question, could be taken up and disposed of before that time, as might also other important matters on which there is likely to be debate, including the one that has already been debated at considerable length by the Senator from Montana [Mr. WALSH], the provision giving special power to the President of the United States to increase or lower tariff rates.

Mr. POMERENE. Mr. President——

Mr. McCUMBER. I yield to the Senator from Ohio.

Mr. POMERENE. I want to make this suggestion: There are several of those questions which are coming up, such as the one just mentioned by the Senator from North Dakota, conferring certain powers upon the President, the sugar schedule, perhaps the leather-goods schedule, and so forth, that are of paramount importance. Why could not the agreement be modified in some way so as to give a little longer time in the discussion of those matters and then limit the debate as to the other items?

Mr. McCUMBER. That was the very purpose the Senator from North Carolina [Mr. SIMMONS] had in mind in drafting the proposition which he presented. The Senator from Ohio can see the almost impossibility of drawing a hard and fast line upon the exact number of minutes to which any amendment is entitled. On some of them we do not need to take five minutes; the object of many of them is so apparent upon their face that we may vote upon them without any discussion whatever and fully understand them; but when it comes to questions such as those that are involved in the sugar schedule and the matter of giving the President the extraordinary powers which are proposed in a provision of the bill, I think it is pretty difficult for us to say in advance that a Senator may have an hour or two hours or three hours for discussion. I think, however, on a subject of the character of the last which I have mentioned probably not more than two or three Senators would care about debating it; and there would be no difficulty in saying that the discussion on it shall occupy four hours or five hours, or whatever number of hours may be necessary. While I would not want to take the responsibility, I am certain the responsibility could be taken and exercised in a manner that would be absolutely agreeable to those who desire to speak at length upon those subjects.

Mr. BORAH. Mr. President——

Mr. McCUMBER. I yield to the Senator from Idaho.

Mr. BORAH. Does the Senator from North Dakota regard the clause of the suggested agreement proposing to divide up the time amongst Senators, and so forth, as of importance?

Mr. McCUMBER. I regard it as important that the power therein conferred should be exercised with absolute fairness, and I have not the slightest question in the world that if any two Senators were so to divide the time they would first ascertain which Senators desired to speak, and how long each Senator desired to speak, and then give those Senators that time. Undoubtedly that would be done; and if it becomes necessary to extend our daily sessions an hour or two longer or at some time during the week that we should hold a night session in order to accommodate Senators who wish to make more extended addresses, I have no doubt that it could be arranged satisfactorily. I myself certainly would not expect to agree to carry it out unless I felt I could carry it out to the absolute satisfaction of the Senator who desired to speak upon the subject.

Mr. BORAH. Mr. President, it is not so much a question as to the ability of some Senator to carry it out fairly or unfairly, but the principle itself. I did not suppose the time would ever come when the right of a Senator to speak in this Chamber would be determined by anybody.

Mr. McCUMBER. Mr. President, I think if the wording is not agreeable we could agree that upon a given subject some one at least should fix the number of hours or days that one subject should be under consideration, and that we could leave it to the good faith of the Senators themselves as to what portion of the time each Senator should take. That is, in effect, what it really amounts to.

The committee would have to do another thing. If it acted in entire good faith the committee ought to present every amendment it proposes to present before the 11th of August; and, if this agreement is carried out, I would expect to ask the committee to sit during the evenings and finish the proposed amendments and report them at a sufficiently early date before the 11th of August to allow Senators to give them fair consideration.

Mr. POMERENE. Mr. President, that is a fair suggestion; but it seems to me that all of those amendments ought to be presented not later than next Monday morning, so that several days would be given to Senators to investigate them. Some of the rates necessarily will not be intelligible unless they are considered in connection with other kindred rates, and so forth. It takes some time for Senators who are not members of the committee to take up a subject and study it so as to get a fairly intelligent idea as to what the effect may be.

Mr. McCUMBER. I believe, Mr. President, that all of this can be done within the time suggested by the Senator; that is, in sufficient time to give each Senator before the 11th of August an opportunity to investigate any proposed amendment.

What we are seeking is to get a final vote and to get it just as soon as possible. Undoubtedly, if we put the date off even to the 15th of August or the 19th of August, there will be many amendments which will be offered on which an opportunity for debate will not be afforded; but that is one of the conditions with which we have to contend in making every unanimous-consent agreement. There are always a number of amendments offered, some of them being very important, which can not be debated; but, in view of the length of time we have taken in the discussion of this measure and in view of the fact that such amendments as will be offered by the committee will in the main merely change the rates, I do not think that it is necessary to extend the time.

If any Senator can conceive of some method by which we may in a unanimous-consent agreement take care of those questions which will require extended debate and at the same time close

the prolonged debates upon the unimportant questions, I think we can adopt a suggestion of that character; but, Mr. President, I hope that the Senator from Wisconsin will meet with us to-day again and see if we can not arrive at an agreement in accordance mainly with the provisions of the agreement which has been proposed. Senators should remember that the very first paragraph in the proposed agreement which compels Senators to speak to the subject will gain not only hours but days in the discussion of the pending measure.

PENSIONS AND INCREASE OF PENSIONS.

Mr. BURSUM and Mr. BROUSSARD addressed the Chair.

The PRESIDENT pro tempore. The Senator from New Mexico.

Mr. BURSUM. I now move that the Senate take up for consideration the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses.

The PRESIDENT pro tempore. The question is on the motion of the Senator from New Mexico.

Mr. DIAL. Mr. President, a parliamentary inquiry. Is that motion in order?

Mr. BURSUM. It is in order after 1 o'clock.

The PRESIDENT pro tempore. The motion is in order.

Mr. DIAL. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Glass	McKinley	Sheppard
Ball	Gooding	McLean	Shortridge
Borah	Hale	McNary	Simmons
Broussard	Harris	Moses	Smoot
Bursum	Harrison	Nelson	Spencer
Calder	Heflin	New	Stanfield
Capper	Hitchcock	Nicholson	Stanley
Caraway	Jones, N. Mex.	Norbeck	Sterling
Culberson	Jones, Wash.	Oddie	Trammell
Cummins	Kendrick	Overman	Walsh, Mass.
Curtis	Keyes	Pepper	Walsh, Mont.
Dial	Ladd	Phipps	Watson, Ind.
Ernst	Lenroot	Pittman	Willis
Fernald	Lodge	Pomerene	
Fletcher	McCormick	Ransdell	
France	McCumber	Robinson	

The PRESIDENT pro tempore. Sixty-one Senators have answered to their names. There is a quorum present. The question is upon the motion of the Senator from New Mexico [Mr. BURSUM].

The motion was agreed to; and the Senate, as in Committee of the Whole proceeded to consider the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion compaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses, which had been reported from the Committee on Pensions, with amendments.

The amendments were, in section 2, page 3, line 14, to strike out:

SEC. 2. That all women employed by the Surgeon General of the Army as nurses, under contract or otherwise, during the War with Spain, the Philippine insurrection, or the Chinese Roxer rebellion, or who were employed as nurses during such period by authority which is recognized by the War Department, and who rendered actual service as nurses in attendance upon the sick or wounded in any regimental, post, camp, or general hospital of the armies of the United States for a period of 90 days or more, and who were honorably relieved from such service, and who are now or who may hereafter be unable to earn a support, shall, upon making due proof of the fact according to such rules and regulatons as the Secretary of the Interior may provide, be placed upon the list of pensioners of the United States and be entitled to receive a pension of $20 per month, and such pension shall commence from the date of filing of the application in the Pension Office after the passage of this act.

And to insert:

That the benefits of the act of Congress approved June 5, 1920, entitled "An act to pension soldiers and sailors of the War with Spain, the Philippine insurrection, and the China relief expedition," be, and are hereby, extended to include any woman who served honorably as an Army nurse, chief nurse, or superintendent of the Nurse Corps, under contract for 90 days or more between the beginning of the War with Spain and February 2, 1901, when the Nurse Corps (female) was declared by law a component part of the Army, and any such nurse who was released from service before the expiraton of 90 days because of disability contracted in line of duty in said service: *Provided*, That the release from service of any nurse, chief nurse, or superintendent shall operate as if she had received an honorable discharge, it being the intent and purpose to give to said nurses, chief nurses, and superintendents of the Nurse Corps (female) the same status in all respects as members of said corps who served after February 2, 1901.

So as to make the bill read:

Be it enacted, etc., That the widow of any officer or enlisted man who served 90 days or more in the Army, Navy, or Marine Corps of the United States during the War with Spain, the Chinese Boxer rebellion, or the Philippine insurrection, between April 21, 1898, and July 4, 1902, inclusive, service to be computed from date of enlistment to date of discharge, and was honorably discharged from such service, or, regardless of the length of service, was discharged for a disability incurred in the service and line of duty, such widow having married such soldier, sailor, or marine prior to the passage of this act shall, upon due proof of her husband's death, without proving his death to be the result of his Army or Navy service, be placed upon the pension roll from the date of the filing of her application therefor under this act, at the rate of $20 per month during her widowhood. And this section shall apply to a former widow of any officer or enlisted man who rendered service as hereinbefore described, and who were honorably discharged, such widow having remarried either once or more than once after the death of the soldier, sailor, or marine, if it be shown that such subsequent or successive marriage has or have been dissolved, either by the death of the husband or husbands, or by divorce without fault on the part of the wife; and any such former widow shall be entitled to and be paid a pension at the rate of $20 per month; and any widow or former widow as mentioned in this section shall also be paid $4 per month for each child of such officer or enlisted man under the age of 16 years, and in case of the death or remarriage of the widow leaving a child or children of such officer or enlisted man under the age of 16 years, such pension shall be paid such child or children until the age of 16 years: *Provided*, That in case a minor child is insane, idiotic, or otherwise mentally or physically helpless, the pension shall continue during the life of such child, or during the period of such disability; and this proviso shall apply to all pensions heretofore granted or hereafter to be granted under this or any former statute: *Provided further*, That in case of any widow whose name has been dropped from the pension roll because of her remarriage, if the pension has been granted to an insane, idiotic, or otherwise helpless child, or to a child or children under the age of 16 years, she shall not be entitled to renewal of pension under this act until the pension to such child or children terminates, unless such child or children be a member or members of her family and cared for by her, and upon renewal of pension to such widow, payment of pension to such child or children shall cease.

That the benefits of the act of Congress approved June 5, 1920, entitled "An act to pension soldiers and sailors of the War with Spain, the Philippine insurrection, and the China relief expedition," be, and are hereby, extended to include any woman who served honorably as an Army nurse, chief nurse, or superintendent of the Nurse Corps, under contract for 90 days or more between the beginning of the War with Spain and February 2, 1901, when the Nurse Corps (female) was declared by law a component part of the Army, and any such nurse who was released from service before the expiration of 90 days because of disability contracted in line of duty in said service: *Provided*, That the release from service of any nurse, chief nurse, or superintendent shall operate as if she had received an honorable discharge, it being the intent and purpose to give to said nurses, chief nurses, and superintendents of the Nurse Corps (female) the same status in all respects as members of said corps who served after February 2, 1901: *Provided*, That no person shall receive more than one pension for the same period: *Provided further*, That all dependent parents of any officer or enlisted man who served in the War with Spain, the Philippine insurrection, or the Chinese Boxer rebellion, whose names are now on the pension roll, or who are now entitled to pension under any existing law, shall be entitled to and shall be paid a pension at the rate of $20 per month.

SEC. 3. That from and after the approval of this act, all persons whose names are on the pension roll and all persons hereafter granted a pension, who while in the military or naval service of the United States under the provisions of this act and all other acts relating to pensions of soldiers who served in the War with Spain, the Philippine insurrection, or the Chinese Boxer rebellion and in line of duty shall have lost both hands or both feet or been totally disabled therein, or who while in such service and in like manner sustained injuries that proved the direct cause of the subsequent total disability of both hands or both feet, shall receive a pension at the rate of $100 per month.

SEC. 4. That the pension or increase of pension herein provided for, as to all persons whose names are now on the pension roll, or who are now in receipt of a pension under existing law, shall commence at the rates herein provided from the date of the approval of this act; and as to persons whose names are not now on the pension roll, or who are not now in receipt of pension under existing law, but who may be entitled to pension under the provisions of this act, such pensions shall commence from the date of filing application therefor in the Bureau of Pensions in such form as may be prescribed by the Secretary of the Interior.

SEC. 5. That in the adjudication of claims arising under section 1 of this act, and claims arising under the provisions of the act entitled "An act to pension soldiers and sailors of the War with Spain, the Philippine insurrection, and the China relief expedition," approved June 5, 1920, all leaves of absence and furloughs under General Orders, No. 130, August 29, 1898, War Department, shall be included in determining the period of pensionable service: *Provided*, That as to any claimant who filed an application for pension under the act of July 16, 1918, or the act of June 5, 1920, and whose application is still pending in the Bureau of Pensions or has been rejected on the ground that 90 days' service was not shown exclusive of the leave of absence or furlough under the order herein referred to, the pension shall commence from the date when the original application was filed in the Bureau of Pensions, and as to claims under the act of July 16, 1918, the pension shall be at the rate provided in that act, with increase at the rate provided herein from the date of the approval of this act: *Provided further*, That persons who are now receiving pensions under existing laws, or whose claims are pending in the Bureau of Pensions, may, by application to the Commissioner of Pensions, in such form as he may prescribe, showing themselves entitled thereto, receive the benefits of this act; and nothing herein shall be so construed as to prevent any pensioner thereunder from prosecuting his claim under any other general or special act: *And provided further*, That this act shall not be so construed as to reduce any pension under any act, public or private: *Provided, however*, That no person shall receive more than one pension for the same period.

SEC. 6. That no claim agent or attorney or other person shall be recognized in the adjustment of claims under this act except in claims for original pension, and in such cases no more than the sum of $10 shall be allowed for services in preparing, presenting, or prosecuting any such claim, which sum shall be payable only on the order of the Commissioner of Pensions; and any person who shall violate any of the provisions of this section, or shall wrongfully withhold from the pensioner or claimant the whole or any part of a pension allowed or due to such pensioner or claimant under this act, shall be deemed guilty

of a misdemeanor, and upon conviction thereof shall, for each and every such offense, be fined not exceeding $500 or be imprisoned not exceeding one year, or both, in the discretion of the court.

Mr. OVERMAN. Mr. President, I should like to inquire of the Senator from New Mexico if he has any estimate from the department of how much money this will take?

Mr. BURSUM. Yes; about $1,800,000.

Mr. OVERMAN. There are no pensions now, except private pensions, to Spanish War veterans' widows, are there?

Mr. BURSUM. Yes; they get $12 a month. This will increase their pensions from $12 to $20.

Mr. POMERENE. Mr. President, does the Senator mean that it will increase the total amount $1,800,000?

Mr. BURSUM. Yes; the total amount. The pensions of dependent children are increased from $2 a month to $4 a month; and in this connection I think it is fair and due to the Spanish War veterans to say that they have been the most lenient of all of the soldiers' organizations with reference to making claims for increases, and this allowance of $20 is less than is allowed to any other widows of veterans.

Mr. FLETCHER. Mr. President, the Senator refers to the increase of $1,800,000. That does not mean the total, does it?

Mr. BURSUM. Oh, no.

Mr. FLETCHER. That is the annual increase?

Mr. BURSUM. The total amount of pensions to Spanish War veterans is something like $12,000,000.

Mr. POMERENE. To the widows?

Mr. BURSUM. Oh, no; to all of them.

Mr. FLETCHER. This means an annual increase of that amount, does it?

Mr. BURSUM. An annual increase of $1,800,000. That is the estimated expense for the first year, and it will very likely be less after the first year.

Mr. OVERMAN. What do the widows of Civil War pensioners get?

Mr. BURSUM. The regular pension is $30. In some cases, by special act, they get more; but the law provides for $30.

The PRESIDING OFFICER (Mr. McNARY in the chair). The question is upon the committee amendment.

Mr. DIAL. Mr. President, I was opposed to taking up this bill because I felt it was my duty to call the matter to the attention of the Senate, and it seems to me that now is an inopportune time to increase the taxes upon the people of this country. I, of course, realize how futile it is to object to any bill or even undertake to oppose any bill that is labeled "pension." I imagine that if the person claiming the pension had not been in the service more than 24 hours, if you just named it "pension" it would have a fascination for all legislators and would pass with very great speed.

This bill undertakes to increase the amounts of these pensions irrespective of whether or not the soldier was disabled in the war, irrespective of his means, or anything of that kind. I have great sympathy for maimed soldiers, of course, and I would not raise my voice in opposition to compensation for them, even if it were in the nature of a pension; but when it comes to including soldiers who were in the service only a short time—I believe this takes them in irrespective of time of service—when they may have been furloughed, or not in any battle or in any danger, and granting pensions to their widows or to their children or to their parents and nurses simply because these soldiers were enlisted for a little while, seems to me to be carrying the principle of pensions to an unreasonable extent.

I do not know when it is ever going to stop. I have been amazed, since I have been in the Senate, to see the ease with which these matters pass and the little attention they get. No one seems to want to object, and they just come in and put their hands into the Treasury and help themselves.

I was told by a Senator not long ago that a company in his State during the Spanish-American War was furloughed, and they went out to some State and had a great picnic time for a few months, and then were discharged. They did not go to the battle line or anything of that sort. Under this bill their dependents, their parents, and their widows would receive a pension. I can not see how that kind of service is so sacred and why it has such great preference.

But as I said at the beginning, I know it is futile to undertake to defeat this kind of legislation. I simply rose to enter my protest. I had thought of talking until after the morning hour had expired, but I do not believe in filibustering, and if the majority party in the Senate, which has the responsibility of looking after the taxes of the people of this country, is going to let it pass, the burden must be with it. I would be glad to join with them and use my vote in trying to reduce expenses, but I think all the promises which they made to the people that they would reduce expenses have simply been mockeries. I do not see any great effort being made by anybody along that line, I am sorry to say.

So I will content myself with raising my protest. Eventually the people of this country will wake up, and they will certainly hold legislators to a greater accountability than seems to be done at the present time.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. BURSUM. Mr. President, I move to amend, on page 1, line 10, after the word "for," by inserting the words "or died in the service of." That is to clarify the bill. In other words, it is necessary, in order for a soldier to obtain a pension, to have an honorable discharge. If a man died in the service, of course, it might be impossible to grant him that discharge, and there might be some question. The legal department of the Pension Bureau brought this to my attention, and for that reason I am offering the amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 1, line 10, after the words "discharged for," to insert the words "or died in service of."

The amendment was agreed to.

Mr. BURSUM. I offer a similar amendment on line 10, page 2, after the word "discharged," to insert the following words: "or died in service due to disability in the service."

The amendment was agreed to.

Mr. SMOOT. I offer the following amendment as section 6. This is Senate bill 451, a bill to amend the act approved March 4, 1917. I think the Senator will remember well that in 1917 we undertook to gather in all of the Indian war veterans in the United States, and we covered, in that act of March 4, 1917, the different Indian war veterans who had not been taken care of up until that date. At that time it was provided that certain testimony should be given before they could be allowed pensions, and it has developed that in some cases, through the carelessness of those who kept the muster rolls, there are a few who can not get pensions because of that fact. This amendment was prepared by the Pension Committee in order to take care of the Indian war veterans who fought during the early years of our country, and where the muster rolls have been lost or destroyed. It has a favorable report from the committee, and was prepared by the department to take care of that class of veterans. They are nearly all dead now.

The PRESIDENT pro tempore. The Secretary will report the next amendment of the committee.

The READING CLERK. On page 6, line 9 of the reported bill, it is proposed to insert a comma after the word "absence."

The amendment was agreed to.

Mr. SMOOT. I ask that the pending amendment be reported.

The PRESIDING OFFICER. The Secretary will report the next committee amendment.

The READING CLERK. On page 2, line 10, after the word "discharged," insert the words "or died in service due to disability in the service."

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the amendment offered by the Senator from Utah [Mr. SMOOT].

The READING CLERK. The Senator from Utah offers the following amendment, to be numbered section 6:

SEC. 6. That the second section of the act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917, be so amended as to read as follows:

"SEC. 2. That the period of service performed by beneficiaries under this act shall be determined: First, by reports from the records of the War Department, where there are such records; second, by reports from the records of the Treasury Department showing payment by the United States, where there is no record of regular enlistment or muster into the United States military service; and third, when there is no record of service or payment for same in the War Department or the Treasury Department, by satisfactory evidence from muster rolls on file in the several State or Territorial archives, or by congressional documents embodying memorials from States or Territories to Congress or furnished by States or Territories or by executive departments of the Government at the request of Congress, or by records compiled under State authority duly accepted by such States as a basis for appropriations or reimbursement to Indian war survivors and their widows: *Provided*, That the want of a certificate of discharge shall not deprive any applicant of the benefits of this act."

Mr. BURSUM. That has been included in a bill reported by the Committee on Pensions. There are only a few of those veterans who would come under that, and they are very advanced in age and very deserving. It is not a matter of a large amount. It will not involve any great expenditure. Probably less than 50 men would be affected by the amendment; and I therefore accept the amendment.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The READING CLERK. On page 7, line 9, to renumber "Section 6" to read "Section 7."

The amendment was agreed to.

Mr. SMOOT. I would also like to have the title amended so as to include the amendment offered by me.

Mr. DIAL. Mr. President, on page 4, line 25, I move to strike out the language beginning with the word "*Provided,*" down to and including line 5, on page 5.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On page 4, line 25, the Senator from South Carolina moves to strike out, after the word "period" and the colon, the following words:

Provided further, That all dependent parents of any officer or enlisted man who served in the war with Spain, the Philippine insurrection, or the Chinese Boxer rebellion, whose names are now on the pension roll, or who are now entitled to pension under any existing law, shall be entitled to and shall be paid a pension at the rate of $20 per month.

Mr. DIAL. I understand that extends the scope of the bill, and I think it is unnecessary.

Mr. ROBINSON. I would like to understand the effect of the amendment proposed by the Senator from South Carolina. I have just come into the Chamber.

Mr. DIAL. I move to strike out the provision for dependent parents. I think that increases the expenditures beyond the necessities. It is the last line on page 4, extending through line 5, page 5. I think that extends the parties to whom the pensions should be allowed beyond what is necessary.

Mr. ROBINSON. The language provides that "all dependent parents of any officer or enlisted man who served in the war with Spain, the Philippine insurrection, or the Chinese Boxer rebellion, whose names are now on the pension roll, or who are now entitled to pensions under any existing law, shall be entitled to and shall be paid a pension at the rate of $20 per month."

Mr. WALSH of Massachusetts. Can the Senator from Arkansas state what he believes would be the effect of that?

Mr. ROBINSON. The provision would give to the dependent parents of officers and enlisted men who served in the three wars mentioned—the War with Spain, the Philippine insurrection, and the Chinese Boxer rebellion—$20 per month. The effect of it, of course, would be to increase the pensions of the dependent parents of soldiers of those wars. I am inclined to think that the provision is a just one.

Mr. BURSUM. It increases it only from $12 to $20, the same that a widow would get.

Mr. ROBINSON. The effect of the amendment is to increase the allowance of the dependent parents of the soldiers or officers of the three wars mentioned. The allowance is a small one, in any event.

Mr. BURSUM. The allowance is very small, and I hope the amendment will not prevail.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. SMOOT. I ask unanimous consent that the unfinished business be temporarily laid aside, as I am quite sure the pending bill will only take a few moments now to dispose of.

Mr. ROBINSON. I do not intend to object to the request of the Senator from Utah, but I want to inquire whether it is the purpose to go on with the tariff bill when the bill now under consideration is disposed of?

Mr. SMOOT. Yes; just as soon as the pending bill is out of the way.

Mr. ROBINSON. And other bills on the calendar will not then be considered to-day?

Mr. SMOOT. Not to-day.

The PRESIDING OFFICER. The Senator from Utah asks unanimous consent that the unfinished business may be temporarily laid aside for the purpose of continuing the consideration of House bill 4. Is there objection? The Chair hears none, and it is so ordered.

Mr. DIAL. Mr. President, I want to say that the interpretation placed upon my amendment by the Senator from Arkansas [Mr. ROBINSON] is in error. A soldier would not be drawing $20 a month. As I understand it, the provision increases the number of persons to whom pensions should be paid and it gives a pension to dependent parents of any officers or enlisted men who served in the War with Spain. It seems to me that is carrying the number of persons too far. It is not a question of whether the soldier was injured or whether he is dependent or anything of that sort, but it goes to include dependent parents.

Mr. ROBINSON. I may have been misled by a suggestion of the Senator from New Mexico. The language proposed to be stricken out by the amendment of the Senator from South Carolina is:

That all dependent parents of any officer or enlisted man who served in the War with Spain, the Philippine insurrection, or the Chinese Boxer rebellion, whose names are now on the pension roll, or who are entitled to pension under any existing law, shall be entitled to and shall be paid a pension at the rate of $20 per month.

The way I understood it from a casual reading was correct. It increases the pensions of the dependent parents of persons who served in the three wars referred to. It pays that dependent parent now on the rolls a pension of $20 a month instead of $12. The principle underlying it is, in my judgment, meritorious. I see no objection to paying an increased pension to the dependent parent. In fact, I do not see how the Government can avoid it if it is to make effective its purpose in providing a pension to the soldier.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on agreeing to the amendment offered by the Senator from South Carolina.

The amendment was rejected.

Mr. WALSH of Massachusetts. Mr. President, I hope the bill will be passed without delay. It is a very meritorious measure. The Committee on Pensions are of a practically unanimous opinion that the bill ought to be enacted speedily into law.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "A bill granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses; and to amend section 2 of an act entitled 'An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes,' approved March 4, 1917."

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. SMOOT. I ask that the Senate return to paragraph 1300, chemical wood pulp.

The PRESIDING OFFICER. The pending amendment will be stated.

The READING CLERK. On page 165, after line 23, insert a new paragraph, as follows:

PAR. 1300. Chemical wood pulp, unbleached or bleached, 5 per cent ad valorem: *Provided,* That if any country, dependency, province, or other subdivision of government shall forbid or restrict in any way the exportation of (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) or impose any export duty, export license fee, or other export charge of any kind whatever, either directly or indirectly (whether in the form of additional charge or license fee, or otherwise), upon printing paper, chemical wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon chemical wood pulp, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government, an additional duty equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government upon either an equal amount of chemical wood pulp or an amount of wood necessary to manufacture such wood pulp, or an amount of printing paper ordinarily manufactured from such chemical wood pulp.

Mr. LENROOT. Mr. President, I desire to occupy only two or three minutes with reference to the unanimous-consent agreement which I presented to the Senate and which I did not have an opportunity to discuss because it was submitted in the time of the Senator from North Dakota [Mr. MCCUMBER].

The agreement which I presented and which was objected to by the Senator from Massachusetts [Mr. LODGE] has just two propositions: First, that hereafter whenever the tariff bill is before the Senate debate shall be confined to the question before the Senate; and second, that after 11 o'clock a. m. on August 11, in addition to debate being confined to the question before the Senate, no Senator shall speak longer than 10 min-

utes upon any amendment or upon the bill. In other words, it gives the same opportunity up to August 11 for unlimited debate as does the unanimous-consent agreement proposed by the Senator from North Dakota. The distinction between the two is that the unanimous-consent agreement to which I objected cuts off all debate on committee amendments on August 11. My proposal permits debate to the extent of 10 minutes upon each amendment.

If the unanimous-consent agreement which I proposed had been accepted we would have begun to-day proceeding in the consideration of the bill with every speech confined to the amendment before the Senate. As the Senator from North Dakota said, that in itself would have saved days and days of the time of the Senate. In addition, on August 11 speeches would have been limited to 10 minutes where the unanimous-consent agreement approved by the Senator from Massachusetts would have cut off all debate.

So we are in a situation now where, because the chairman of the committee and the Senator from Massachusetts could not get as drastic a proposition as they desired, objection was made to a proposition which would really expedite consideration of the bill. That is all I care to say upon it. I want to say in this connection, however, that at least until all important amendments are disposed of there will be no unanimous-consent agreement made for a final vote upon the bill. I am ready at any time to consent to drastic limitation upon debate.

Mr. LODGE. Mr. President, I agree with both propositions made by the Senator from Wisconsin. In fact, the first one was included in our unanimous-consent agreement. I endeavored, when we were discussing it yesterday, to insert an arrangement for limiting debate on the amendments. But I wish to bring the debate to a close. Unless we set a day and a time at which the final vote shall be taken we shall make comparatively little progress in reaching a conclusion. I am ready to go very far in yielding on any agreement that will fix a day for a final vote; but I have had sufficient experience in the Senate to know that unless we fix a day for the final vote, no matter what subordinate agreements we make, we do not materially expedite the final result. I am very anxious to make an agreement to take a final vote, but I see nothing to be gained unless we can have that included in the agreement.

Mr. SIMMONS. Mr. President, I want to say to the majority that I regret that we did not succeed in reaching the unanimous-consent agreement upon the basis of the two propositions made this morning. I regard them as practically one and the same. The difference between them is utterly immaterial. But we failed on account of objection from the Republican side, and I want to say to the majority now, and I do it for the purpose of showing my good faith in the matter, that I am ready again to meet with them or the members of the committee and discuss the matter of adjusting the question of when we shall vote upon the bill and the conditions of debate in the Senate. Anything that tends to curtail debate and confine it to the question before the Senate and to fix a reasonable limitation upon the time for voting would be satisfactory to me.

Mr. President, on yesterday, after I had presented my unanimous-consent proposition, we met in the Finance Committee room, there being present the chairman of the Finance Committee, the Senator from North Dakota [Mr. McCUMBER]; the whip of the majority, the Senator from Kansas [Mr. CURTIS]; the Senator from Indiana [Mr. WATSON]; and other members of the committee whose names I do not now recall, as well as the leader of the majority, the Senator from Massachusetts [Mr. LODGE]. After going over the matter fully we came to an agreement. It might as well be stated here that while I insisted upon presenting my proposition, I stated that when the Senator from North Dakota introduced his substitute I would accept it as satisfactory. It was satisfactory to Senators on this side of the Chamber.

I was very much surprised this morning when objection to the proposition came from the other side of the Chamber. Of course, I know that the members of the committee and other Senators who met yesterday afternoon could not bind individual Senators, but I had assumed that they had canvassed the matter on their side of the Chamber, and that their action in the matter would meet the approval of the entire membership on their side of the Chamber. Especially did I think that, in view of the fact that the Senators representing the majority have from the beginning insisted upon haste and speedy consideration of the measure. I thought that they would hail with delight any proposition that provided for a very early vote upon the bill. I think the 17th of August, which was agreed upon, was a much earlier date than Senators on either side of the Chamber until yesterday expected could be agreed upon and much earlier than the country expected action upon the measure.

But, Mr. President, objection is made, and that objection is put upon specific grounds. I recognize that there is some force in the objection; but I think the suggestion which I made with reference to fixing a time when further amendments should not be offered to the bill would probably have met the most serious aspect of that objection.

I did not submit the proposal for unanimous consent on yesterday without very thorough investigation as to the time that would be reasonably necessary to discuss the remaining portions of the bill and such committee amendments as might be pending or that might hereafter be offered by the committee from the floor of the Senate. I have from the very beginning maintained that there ought to be reasonable discussion of all of the important items of the pending bill to which objection was made.

I offered the proposition in the light of that position taken by myself as the ranking Democratic member of the Finance Committee and concurred in by the Members of this side of the Chamber. Therefore, before I presented the proposal I made a pretty thorough canvass, so far as this side of the Chamber was concerned, with a view to ascertaining about how much time would be required for further discussion of the committee amendments and of amendments offered from the floor. I conferred with those Senators who have been aiding me in the discussion and management of the various schedules of the bill. Especially did we consider the time that would probably be required in the consideration of the more important matters that have not been acted upon, such as sugar, leather, hides, and shoes, and the elastic tariff provision reported by the Committee on Finance. I had a very definite idea of how long Senators on this side of the Chamber would desire for the proper discussion of those very important questions. Having canvassed the matter both with reference to amendments that are now pending and those that are expected to be offered, I became satisfied that if the Senate would devote its whole time to the bill to the exclusion of other matters we could reasonably discuss these various propositions.

The question was also discussed in the conference as to whether, in case it appeared that we should not have sufficient time by holding daily sessions, it would not be feasible to hold evening sessions, and it was agreed that that might be done in case the time should run short, and that we could practically double the time of consideration by resorting, as we once before did in connection with the bill, to evening sessions.

Mr. President, it has been said that we on this side of the Chamber have changed our policy with reference to the bill. Not at all. I think, however, that at least some of the Senators on the other side of the Chamber have changed their policy. They are now loud and persistent in their demand for longer time in which to discuss the items of the bill. They now think we ought to have very thorough discussion of the matters remaining undisposed of, and that ample time should be devoted to that purpose. Mr. President, we proceeded with the bill for six weeks before Senators on the other side of the Chamber would admit that its paragraphs needed any discussion at all. For six weeks it was stated, when Senators on this side of the Chamber discussed those paragraphs, that we were wasting time and were filibustering. There was during that time practically no discussion of those paragraphs on the other side of the Chamber.

The Senator from Wisconsin [Mr. LENROOT], who now objects to this proposed unanimous-consent agreement upon the ground that ample and adequate time is needed for discussion, as I remember, did not enter into the discussion until very late in the course of the consideration of the bill. I understood his policy was the policy of mum. I do not now recall when the Senator did enter into the discussion of the bill, but it was tolerably late in the proceedings.

Mr. LENROOT. Mr. President, will the Senator yield to me?

Mr. SIMMONS. Yes.

Mr. LENROOT. Inasmuch as the Senator has made that statement, I am sure he will permit me to say that the Senator from Wisconsin entered into the discussion of the bill on the chemical schedule, but he did not spend hours and hours, as did Senators upon the other side of the Chamber, upon trivial amendments that meant little or nothing to the country. In such discussion as the Senator from Wisconsin has indulged he has confined himself to the point and has been brief, and his remarks have been upon important items. The Senator from North Carolina can not say as much for Senators on his side of the aisle.

Mr. SIMMONS. I did not mean to say that the Senator did not speak at all until we had the bill under consideration for six weeks; I think he did; but I do not remember that he participated to any considerable extent in the discussions until we were nearly halfway through. The Senator is right, however, when he says that whenever he has entered into the discussion he has confined himself to the bill and has been brief. I want to say—and I say it with pleasure—the Senator from Wisconsin always does confine himself closely to the discussion of the question before the Senate, and there is no Senator in the Chamber who expresses himself and his views with more forcefulness and clearness and succinctness than does the Senator from Wisconsin. He has discussed nothing connected with this bill without doing so very effectively from his standpoint.

But, Mr. President, we have not changed our policy of adequate discussion by offering the proposed unanimous-consent agreement. We have sought to discuss this bill all through; we have told the country that we proposed to discuss the important questions, to the end that their meaning might be made clear to the people who have got to pay these taxes. That course we thought we would be able to pursue to the end, and under the unanimous-consent agreement proposed I think we could, although we might probably be compelled to hold night sessions. I had supposed that the Senate, like the country, was anxious that there should be action upon this measure, and I was willing to enter into this agreement.

The Senator from Wisconsin can not say that it was an afterthought on my part or on the part of the minority to offer this proposition. The whip on the Republican side [Mr. CURTIS], who is always diligent in looking after detail matters on the other side of the Chamber, has repeatedly spoken to me about securing some sort of an agreement for the purpose of limiting discussion and bringing about speedy action, and I have uniformly said to him that after we had disposed of the more important schedules, as to which nearly all the amendments offered by the committee were of great importance as affecting the rates, I would be willing to enter into an agreement.

I especially have laid stress upon the position that, until we had acted upon the amendments to the textile schedules, embracing cottons, wools, silks, and hemp and jute, four schedules in this bill which I have regarded from the beginning as of almost paramount importance, schedules in which the people of the whole country are deeply interested, schedules imposing taxes which affect practically every man, woman, and child in the country, raising the rates, as I thought, as this side of the Chamber thought, and, as I think, the country thought, beyond all reason, I naturally felt that until we had disposed of those schedules we could not with safety enter into any unanimous-consent arrangement; but as soon as they were disposed of, Mr. President, I felt that it might be done.

It has also been suggested that we have changed our policy with reference to this bill because it has been made so much better that it has become palatable by reason of the enforced amendments which the committee have made from day to day. Mr. President, the rates in the chemical schedule are just as bad as any in this bill, and they have remained practically unchanged to this day. To the earthenware schedule, a very important one in which the rates were very high, as high as in any schedule in the bill, the committee has not proposed reductions. We had not in the beginning aroused the country and the press, and Senators on the other side had not begun to see the excessive character of these rates, and to bring pressure upon the committee, under threat of defeating the bill, to cut them down. We were in the educative stages of this debate. We were preparing and disseminating information that finally brought about this reaction and this revolt that resulted in some cuts.

There were practically no cuts in the metal schedule, and there is not a schedule in this bill upon which the rates imposed are more unjustified than those in the metal schedule. They have not been reduced. In fact, we did not begin to have any serious cuts until we reached the cotton schedule. Then we had objections and we had amendments. The Senator from Wisconsin [Mr. LENROOT] offered some of those amendments. He offered amendments to other schedules, but I think most of the amendments which the Senator from Wisconsin offered were voted down by his side of the Chamber. The cuts that have been made were made by the committee. They are as a rule little, trivial amendments. Some of them, however, were very substantial, especially those made on the cotton schedule.

Some amendments were made on the hemp and flax and jute schedule, I think, slightly cutting down the rates, most of them immaterial, and most of them confined to one or two schedules right in the middle of the bill; but when we got through the cotton and flax schedule and reached the woolen schedule, does anybody say that any amendments were offered to the wool schedule that made that schedule satisfactory to the country or to anybody outside of somebody interested in raw wool or in the manufactures of wool? It remains practically as it was before.

The same is true of the silk schedule, which, like the wool schedule, imposed duties beyond all reason, beyond all possibility of justification. There were practically no changes there. The committee stopped making changes. It made them only for a while, and chiefly when we were on cotton and hemp and things like that. There may have been one or two little, small schedules before that to which amendments were made; but in the important schedules in this bill the committee amendments are of no consequence, and in many of them there have been practically no committee amendments.

So that if the bill is better—of course these little amendments have somewhat improved it—its improvement has been absolutely inconsequential. The suggestion that we have changed our policy because of that, of course, is absurd. We have not changed our policy, but we have reached a point in these discussions where we feel that we can proceed with rapidity. The things that we have gone over have developed the arguments which will necessarily apply to all the items in the sundries schedule—quite a good-sized schedule, dealing with specific articles—and there is no necessity of discussing all of those paragraphs, and it is not our purpose to discuss all of them. In many of them we shall permit a vote without any discussion at all. We shall select the important ones and confine ourselves to a very brief discussion of those. We do not think it will take long. I have assigned those paragraphs to four Senators, and in discussion with them we think it will require only a very short time for us to finish up the schedule.

Nothing remains except the free list and the administrative clauses of this measure. So far as the free list is concerned, I think there need be and will be very little discussion upon that, certainly from the standpoint of this side of the Chamber; and then I want to say to the Senator from North Dakota, who I know sympathizes with me in wishing to reach a conclusion by which we may have an early vote, that when we get to the administrative features, outside of the elastic tariff provisions, delegation of power, and things of that sort, there is going to be mighty little discussion of the provisions of that schedule. Most of them—I think a large part of them—are merely Treasury recommendations and require no particular discussion.

I want to say further to the Senator, with reference to the powers given to the President, that it is not expected that there will be any prolonged discussion on this side of the Chamber. The Senator from Montana [Mr. WALSH] in the great speech that he delivered here early in these discussions, very completely covered the arguments from the standpoint of this side of the Chamber, and with slight additional discussion on his part I doubt whether there will be any further discussion of the matter on this side of the Chamber.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. Yes; I yield.

Mr. McCUMBER. The Senator from North Carolina and myself are in absolute accord upon one thing in reference to this bill, and that is that we desire to get action as early as possible. I think he realizes as well as I do, however, that we have to meet the desires and wishes of every Senator with respect to a unanimous-consent agreement——

Mr. SIMMONS. I do.

Mr. McCUMBER. And therefore it is a matter of compromise——

Mr. SIMMONS. That is true.

Mr. McCUMBER. And the compromise must be broad enough to cover the wishes of every Senator in the Chamber. I am going to suggest to the Senator—and that is the reason why I am making this preliminary statement—that we might meet the objections of the Senator from Wisconsin [Mr. LENROOT] in this way:

We can do anything by unanimous consent, and I would propose that we enter into a unanimous-consent agreement that immediately after we get through with the paper schedule, for instance, we would take up the several items or paragraphs of which the Senator has spoken, on which Senators will require more than the 10 minutes, and which will require rather full debate. I am willing to say that we will take up the sugar schedule, although there is no amendment to it; but we can by unanimous consent say that we will discuss that schedule and allow amendments to be offered and take it right up to-morrow or the next day.

Mr. SIMMONS. And then take up hides and shoes and so on.

Mr. McCUMBER. My idea was to select, with the cooperation of the Senator from Wisconsin and the Senator from North Carolina and other Senators, those important features which would require more debate and say that in the discussion of those a Senator may speak an hour or an hour and a quarter or whatever time we may agree upon, and take them up and dispose of them before we get to the 11th of August, and that will leave only the minor questions that will come up after that time. I think we ought to be able to agree.

Mr. SIMMONS. That is a very splendid thought of the Senator. I am glad he has made that suggestion. As I understand the Senator, he is willing now to take up these matters and get them out of the way.

Mr. McCUMBER. Yes; that is, just as soon as we get through with the paper schedule, and dispose of them before we reach them in regular order.

Mr. SIMMONS. I think that is a very good idea. Of course, there may be some Senator who expects to speak on those important matters who is not quite ready, who is not expecting the subject to come up right away; but I think we can get ready on this side of the Chamber to take them up, and I think that would be a very good way of expediting the matter and would lead ultimately to a satisfactory unanimous-consent agreement.

Mr. FLETCHER. Mr. President, will the Senator allow me to suggest that we are not making any progress in the disposition of the bill by this open discussion, exchanging views about what is possible in the way of an agreement, and so forth, and that those are matters as to which the Senator from North Carolina, the Senator from North Dakota, the Senator from Wisconsin, and others can get around a table, consider the details, and figure out a plan whereby they can come in with a proposed unanimous-consent agreement that will be agreeable to all? I think we really ought to have this discussion in the cloakroom and let the Senate go on with the bill. That is my impression about it. I believe the Senator from North Carolina has about finished and a continued interchange of views on that subject might well take place in a conference and that would permit the Senate to proceed with the bill.

Mr. SIMMONS. I want to say to the Senator, however, inasmuch as he has referred to me, that I thought the discussion of this matter here in the open would lead to an agreement, whereas otherwise we might make an agreement to come back here and find somebody throwing a monkey wrench into the whole scheme.

Mr. FLETCHER. I do not mean to intimate that the Senator's remarks thus far have not been very helpful, but I was suggesting that this discussion might come to a close between Senators on the other side and Senators on this side about the details of an agreement. I hope Senators can come to some agreement that will facilitate final action on this measure. Of course, if the suggestion of the Senator from Indiana [Mr. WATSON] is to obtain—that is, that we must wait until conditions are stabilized all over the world and until we have reached a state of normalcy—then we might as well adjourn now, because conditions are continuing to change. Many of us have contended from the start that this is not a time to undertake to write a permanent tariff law; and the Senator from Indiana confirms that, because he suggested this morning that although this bill has been in the Senate ever since July 21, 1921, over a year, and the committee reported it on April 10 of this year, still the committee now say that they have to meet from day to day to proceed just a little in advance of the work of the Senate in revising these schedules and reconsidering and readjusting these rates to meet the changing conditions.

Mr. ROBINSON. Will the Senator yield?

Mr. FLETCHER. I yield.

Mr. ROBINSON. If that procedure is to be followed to the end, if the Committee on Finance finds itself compelled to do all of its work over, the best thing we can do is to recommit the bill to the committee and let the committee have it.

Mr. FLETCHER. That is a very excellent suggestion, I think entirely appropriate and timely. I do not know but that may be a way out of this difficulty, just to send the bill back to the committee and let them finish their work and report it to the Senate in order that the Senate may have the result of their study and consideration when they report their conclusions. I thought we had that when the bill was reported last April, but it seems we got only a premature reaction of the committee on these various schedules and that the committee reserved to itself the privilege of reconsidering all the schedules from day to day and coming in with different amendments changing those reported. There is no end to that, and the only logical way out is, as the Senator from Arkansas has suggested, for us to send the bill back to the committee and ask them to finish their work. Then we will be in a position to go on with consideration of the bill in a serious and proper and regular way. I do not know when they would finish it. As I have said, if they are going to wait until conditions become normal or stable, then I think they might as well keep it under advisement for something like a year, or six or eight months longer, anyhow, because while we have been proceeding on this road toward normalcy we have evidently reached the forks and have got on the wrong fork.

Mr. SIMMONS. Mr. President, I respectfully suggest to the Senator that these matters he is talking about now might be deferred until some other time and that we take the bill up and go on considering that.

Mr. FLETCHER. I venture to say, in reply, that my remarks are quite as relevant to the bill as any remarks that have been made to-day, and quite as practical.

The PRESIDING OFFICER. Did the Senator from North Carolina yield the floor? The Chair understood the Senator yielded to the Senator from Florida.

Mr. SIMMONS. I interrupted the Senator from Florida to make a suggestion which I thought was very pertinent, in view of the suggestion he made a little while ago about some other Senators.

Mr. FLETCHER. I did not mean to take the Senator off the floor, but I supposed he had concluded, and that is the reason I was proceeding in this sort of way by way of developing the situation.

Mr. SIMMONS. I withdraw my remark, if the Senator does not see the point.

Mr. FLETCHER. I do not know that there is any point. I think I would see it if it existed. However, I appreciate the Senator intended to respond to my interruption rather as a bit of pleasantry, and I so accept it and concede its justness.

I will now proceed to offer something that bears directly on the bill, in pursuance of the hint of the Senator from North Carolina. It is not applicable to this particular schedule, but it bears on the bill. It is a communication from the Fair Tariff League, which discusses some of the paragraphs in this bill. I ask to have it printed in the RECORD without reading.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

FAIR TARIFF LEAGUE,
Racine, Wis., August 2, 1922.

CONGRESS BUTTRESSING ANOTHER TRUST IN THE PENDING TARIFF BILL.

DEAR SIR: The inclosed facts are of public concern.

Is it possible that you didn't know when the vote was taken on terra-cotta and earthenware that the Senate was voting everybody's money into a trust's pocket, according to the findings of a Federal grand jury?

Very truly yours, H. E. MILES, *Chairman.*

—

FAIR TARIFF LEAGUE,
Racine, Wis.

AT IT AGAIN—CONGRESS BUTTRESSING ANOTHER TRUST—THE PROPOSED TARIFF ON BRICK AND TILE, TERRA-COTTA AND FIRE-CLAY PRODUCTS.

Congress offers this industry, indicted for conspiracy and price fixing, $30,000,000, costing consumers about $70,000,000. According to the United States Tariff Commission *no protection is necessary.*

Possible revenue, $150,000.

Present duty, 11.8 per cent. Proposed duty, 50 per cent.

Wages, 37.5 per cent.

These products are a universal necessity—for the farmer's drains, for conveying water and subsurface electric cables, for fireproofing, as substitutes for brick or concrete in walls and floors.

It is made of mud—just mud, burned clay, forced through dies at the discharge end of an automatic mixing or plug mill.

Congress says it should have 50 per cent protection. The Tariff Commission clearly indicates that it should have none. It says, "The cost of these articles per unit of weight is small, and the careful packing necessary when long-distance shipments are to be made restricts the market of the domestic plants and *practically prohibits international shipments.*" The following table confirms the commission's statements:

Exports and imports by years.

Year.	Exports.	Imports.	Per cent exports to 1919 (Census) production.	Per cent imports to 1919 production.	Exports exceed imports by "number of times."
			Per cent.	*Per cent.*	
1914	$2,378,773	$282,687	1.7	0.2	8.4
1919	3,625,038	195,640	1.7	0.09	18.6
1920	5,608,163	419,964	2.7	0.2	13.4
1921	3,544,769	301,059	1.7	0.1	11.8

Production, in 1914, was $136,915,644; in 1919, $210,085,972.

As above shown, exports were nothing as compared with production, and yet, says the grand jury, *the manufacturers, since 1911, "have, in pursuance of an understanding and agreement among themselves," carried on their trade "without any competition between any of said*

defendants," and sold "at arbitrary, noncompetitive, and excessive prices fixed by agreement."

If imports were possible under any conditions, under a tariff like the present of 11.8 per cent, they would have been made so as to share in these excessive prices. Yet the Senate tariff bill, with this information on file in the Federal court since September 21, 1921, 10 months ago, and the above information, and more, given it by the Tariff Commission, puts a duty of 50 per cent on these products.

METHODS OF PRODUCTION.

The report of the Tariff Commission says, "The domestic industry manufactures practically the entire domestic supply of these products. *All machinery and equipment are produced and manufactured in the United States, and the domestic processes are at least as efficient as those used in any foreign country.*" The product is made by semi-automatic or automatic processes, the shape being given the product by forcing the clay through dies.

WAGES 37.5 PER CENT.

As the material is almost worthless, wages are relatively high, being 37.5 per cent of the mill selling price. With importations virtually prohibited now, because of freight costs and our unrivaled methods, it is evident to whom the increase in duty will go.

COST OF PROTECTION AND REVENUE DERIVED.

The present duty of 11.8 per cent helped these manufacturers to form the trade conspiracy, with which they are charged, and to add $32,000,000 to their prices at a cost to consumers at retail of twice this sum, or $64,000,000. It seems that they could not resist the temptation. What right had Congress thus to *tempt them? What right thus to endanger the public interest?*

The proposed duty invites them to add $70,000,000 to their prices at a cost to consumers at retail of $140,000,000.

Congress is offering as great temptation to every industry. Is not this kind of a Congress, "the mother of the trusts," as some one said?

PRICES.

The Senate Finance Committee's experts showed from Government records that fire brick costing $28.92 in England pays $27 freight to the United States, giving nearly 100 per cent of "national" protection. It sold here for $65 against domestic brick $67.50. Canadian brick costing $39.55 paid $15 freight—40 per cent—and (probably superior quality) sold here for $72.50 against domestic $65.

The English importer had 8.8 per cent gross margin on landed cost; the Canadian, 14 per cent.

Why do Americans pay $65 to $72.50 for what costs English and Canadians from $28.92 to $39.55?

In the face of all these facts *why has the Senate just voted 25 per cent duty on fire brick, and on tiles for drainage and all else duties running up to 60 per cent?*

The answer has no relation to protection nor to revenue, for there is no revenue worth noticing.

CORSETS.

A present excessive tax of $23,000,000 to be raised to $29,000,000, costing American women up to $58,000,000 if they will endure it. Possible revenue, $10,000.

PRODUCTION, IMPORTS, AND EXPORTS.

Imports of corsets pre-war, 1914, were $52,711, only one-tenth of 1 per cent of domestic production, which was $40,550,702.

Exports in 1914 were $2,220,739, or 5.5 per cent of production. *Exports were forty-two times greater than imports.*

In 1919, with a production of $75,541,959, we imported $37,422, or five one-hundredths of 1 per cent. We exported $2,880,858, or 3.8 per cent of production. *Exports were seventy-seven times greater than imports.*

In 1920 exports were $3,583,767, or 4.7 per cent of 1919 production. *Imports were $9,408, or one one-hundredth of 1 per cent. Exports were three hundred and eighty times imports.*

In 1921 *exports, $1,695,555, were sixty-two times imports, which were $27,511, or four one-hundredths of 1 per cent of (census) 1919 production.* Had the higher prices of 1920 held, these 1921 exports would have been charged out at $2,508,828.

IMPORTS IMPOSSIBLE.

Women dress humanely now. Corsets are fitted to the person. She is no longer incased in a form-made steel compress. Distance alone is sufficient protection, as says an American corset manufacturer, unless his European competitors send fitters here. *He has 5,000 saleswomen in Europe.*

This corset tax is because women haven't known and haven't voted.

WAGES AND TARIFF.

(Present duty, 30 per cent to 60 per cent; proposed duty, 64 per cent; wages, 17.3 per cent.)

The total wages in the corset industry in pre-war 1914 *were only 19.7 per cent of factory selling prices; and in 1919 still less, 17.3 per cent. Our production methods are the best in the world.*

The Payne duty, 1908–1914, was 50 per cent, or over two and one-half times the wage cost. Was this for the girl wage earners, as honest protection requires, or was all above 19.7 per cent for the manufacturers?

The present duty is 30 per cent on plain cotton corsets, or nearly twice the present wage cost of 17.3 per cent. If there is 5 cents or more of lace on the imported corset, the duty is doubled—60 per cent. No luxuries allowed, women! Not 5 cents' worth of lace.

The proposed duty is 64 per cent on all qualities, or three and seven-tenths times the wage cost.

It shuts out imports. It compels women to buy from domestic manufacturers at any prices they dare charge. "It's an outrage," says a domestic manufacturer.

COST OF PROPOSED DUTY.

The present duty invites manufacturers to combine and to add $23,000,000 to the prices at which they meet foreign competition on their exports.

The proposed duty would be a possible tax of $29,000,000 for the manufacturers and cost women, at retail, twice this, or $58,000,000.

REVENUE COLLECTED.

This tax is for manufacturers—not for revenue. Congress knows that the Government collected in customs duties on corsets, *in 1919, only $10,000; in 1920, $4,000; in 1921, $10,000.* It can't collect more.

Why this $58,000,000 possible increase in corset prices? Does Congress think women stupid?

Some corset factories are hard up. So are some women.

Women are rebelling against old-fashioned caisson clamps. Up to date corset makers are prospering. They are getting whatever trade our women have to offer.

THE FAIR TARIFF LEAGUE.

The Fair Tariff League is a protectionist organization.

Honest protection represents "the difference in the cost of production here and abroad."

Such protection safeguards American wages and ideals. *It protects the consumer from excessive prices.*

Dishonest protection fattens trusts. It enslaves Congress to moneyed interests and weakens the foundations of government.

The Fair Tariff League includes representatives of 2,500,000 farmers and 500,000 wage earners, women's organizations, manufacturers, merchants, and others.

Your support desired. Join now.

Mr. HALE obtained the floor.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maine yield to the Senator from North Carolina?

Mr. HALE. I yield.

Mr. SIMMONS. Mr. President, on August 1 the Senator from North Dakota [Mr. MCCUMBER] and myself had a pleasant sort of colloquy over certain articles which had appeared in the New York Herald. The Senator from North Dakota spoke as follows:

Mr. President, I merely wish to occupy a few moments. Of course, there is no use of saying to the New York Herald or to any other representative of the importing interests that the pending tariff bill affords less protection on manufactured goods than any Republican tariff bill that has been before the country for a half century. I think it but fair, however, to remind the Senator from North Carolina that when the next day after he filed his minority report this same newspaper came out assuming an abusive and slurring attitude toward the report on the pending bill submitted by the Senator from North Carolina the Senator from North Carolina was then as quiet as a clam at the bottom of the ocean. I did not hear him say one single word about this being a great Republican newspaper. Its greatness has come only as it veered from ridiculing and speaking in a despicable manner of the report of the Senator from North Carolina and began to advocate the views of those it represents.

I believe that is the pertinent part of the Senator's remarks. In the New York Herald of to-day, August 3, 1922, is an article prominently displayed with these headlines:

Congress and the tariff—The New York Herald's editorial article which inspired Senator SIMMONS's tribute to this newspaper's consistency.

Then follow some comments upon what transpired here in the Senate on August 1. Then follows the editorial about the minority report, which the Senator from North Dakota thought was so critical of me and my report. I thought he used the word "scurrilous" in commenting on the observations in the Herald as to me, but I see it is not in the RECORD. Anyhow, according to the Senator from North Dakota, it was a villainous article about me and my report. I observe upon reading the editorial that, while it does speak of my report as a political report and does state that some parts of the report might have been dictated by partisan bias, it is rather commendatory of part of it, and very, very uncomplimentary to the Fordney-McCumber bill. I ask that the Secretary read the editorial.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina? The Chair hears none, and the Secretary will read.

The Assistant Secretary read as follows:

The United States Senate paid the New York Herald the compliment on Tuesday of debating and discussing for a good part of the day editorial articles which have appeared in this newspaper since the Fordney-McCumber tariff monstrosity has been before Congress. Among the New York Herald editorial articles referred to especially by Senator MCCUMBER, of North Dakota, and Senator MCLEAN, of Connecticut, was one published by the New York Herald on May 9, regarding the minority (Democratic) report on the McCumber monstrosity.

It seemed to be the idea of Senator MCCUMBER and Senator MCLEAN on Tuesday that if that Herald editorial article of May 9 did not indicate approval of the Republican measure at that time, it did at least strongly condemn and thoroughly discredit the Democratic position against the McCumber tariff monstrosity.

It gives the New York Herald some satisfaction, therefore, to reprint here its editorial article of May 9, and if any protectionist extremist gone tariff mad, or any antiprotectionist extremist gone free-trade mad, can get any comfort out of it he is welcome to it. The editorial article, which reflects, in our opinion, the sane, sound tariff views of the American people of all parts of the country, both Republicans and Democrats, follows.

Mr. SIMMONS. Now comes the editorial cited with gusto by the Senator from North Dakota.

The PRESIDING OFFICER. The Senator desires to have that read, too?

Mr. SIMMONS. I desire to have the editorial read, especially.

The Assistant Secretary continued the reading, as follows:

[From the New York Herald of May 9.]

DEMOCRATS AND THE TARIFF.

Senator SIMMONS's minority report against the Fordney-McCumber tariff proposals has been carefully prepared as a Democratic electioneering dodger rather than an economic treatise. In respect of that fact it does some shooting that is as wild as some of its truths are bitter.

The Democratic Party by and large would no more welcome to-day the complete exposure of American industries to the cheap-labor competition of aggressive foreign producers than would the Republican Party. Louisiana is as rabid a protectionist in behalf of cane sugar as Michigan or Nebraska is in behalf of beet sugar. North and South Carolina have come to have as big a stake in preserving their textile manufactures as New England. Georgia, Alabama, and Tennessee would welcome unrestricted imports of British, German, and French steel products with as much enthusiasm as Pennsylvania, Illinois, and Indiana.

Tariff or no tariff, the great staple cotton industry of Texas is secure. In the whole world there is nobody that can raise cheaper cotton than our own American crops. But there have been no stronger protests against throwing any industry to the free-trade wolves than those from the Lone Star State against the sacrifice of its rice business, while the Texan voice has been clamorous for a duty on oil, which never ought to be. And the agricultural interests of the Democratic South yoked up joyously a year ago with the agricultural interests of the Republican West to haul through the emergency tariff on farm products—and pulling together they got just what they wanted.

But while a reasonable protective policy has become more and more acceptable to the Democratic industrial States as they have steadily built up their great industries under such a national policy, Democratic statesmen like UNDERWOOD and SIMMONS and GLASS are quick to see the advantage they can gain for their party in the approaching elections out of an assault upon extravagant Fordney tariff schedules and McCumber tariff amendments that, from the point of view of both economics and politics, are nothing less than irrational.

So the Democratic minority in Congress puts it up to the American people that the sky-high Fordney duties and the sky-high McCumber duties alike would drive up the public's cost of living; and that is the fact. They put it up to the American people that the excessive duties and higher costs would kill off still more of our export business; and that, too, is the fact.

But it is not the fact that the country needs or that the country could stand an extreme national policy of holding our tariff doors wide open to cheap labor competition from abroad while our own labor costs continue, many of them, at the war peak. The Democratic statesmen, putting out their minority tariff report, know it is not the fact. But if the Republican tariff framers in Congress can not make themselves realize that what the country needs and what the country must have is the mean of sane protection and not the extreme of a prohibitive Chinese tariff wall, then so much the worse for their own political careers and so much the worse for the future of their party.

Mr. SIMMONS. All this speaks for itself. But may I not call the attention of the Senator from North Dakota [Mr. MCCUMBER] and of the Senator from Connecticut [Mr. MCLEAN], who also, on August 1, referred with much bombast to this editorial, to the fact that they did not see proper to advise the Senate that even in that editorial of May 9 the New York Herald was severely criticizing the pending tariff bill, and that almost as much of praise as of condemnation was spoken of my report by this great Republican newspaper?

Mr. HALE. Mr. President, am I to understand that section 1300 of the tariff bill is now under consideration?

The PRESIDING OFFICER. It is.

Mr. HALE. The committee amendment to section 1300 provides for an ad valorem duty of 5 per cent on chemical wood pulp—not a very exorbitant duty when compared with some of the duties which have been levied in the bill. The chemical-pulp industry is one of the principal industries in my State. Our daily production of chemical pulp of all kinds, including sulphite, sulphate, and soda pulp, is between 1,400 and 1,500 tons. We produce a good deal of soda pulp relatively to the production throughout the country, very nearly one-third of the total production. We produce about 800 tons daily of sulphite and 200 tons daily of sulphate. As it takes the labor of three men to produce one ton of chemical pulp, and we produce between 1,400 and 1,500 tons, that means that we employ in this industry in my State between 4,000 and 5,000 operatives in the mills. Aside from these are an equal number of men who are employed in the woods getting out and preparing the wood necessary in the process of manufacture. Further than that, a good deal of pulp is bought from the farmers of the State. They pick up small consignments of the wood and bring them to the mills, and many of the farmers get a winter's livelihood through this means.

In the country at large the production of chemical wood pulp is about 6,000 tons—6,200, I think, to be more exact—of sulphite and sulphate, and about 1,000 tons of soda pulp. We, therefore, produce in my State about one-fifth of all the chemical pulp that is produced in the country. Where we employ between 4,000 and 5,000 men in the mills, there are throughout the country between 20,000 and 25,000 men employed.

The production of chemical pulp in 1921, the year just passed, was 623,493 tons of news-grade pulp and 630,577 tons of the finer grades than news, making a total production of 1,254,070 tons of sulphite and sulphate. Aside from that, we produced in this country 279,000 tons of soda pulp. This was not a great year for production.

It has been estimated that to produce one ton of chemical pulp an investment of capital of $20,000 is required. The smallest chemical-pulp mill that can be operated successfully is a $1,000,000 mill, which produces 50 tons of pulp daily. Besides that, it requires another $1,000,000 of working capital with which to operate. Based on those figures of $2,000,000 for every 50 tons of output, there is invested in this country between $250,000,000 and $260,000,000, or possibly a little more. In my State, where, as I said, we have one-fifth of the industry, we have invested between $50,000,000 and $60,000,000. I call attention to this to show the importance of the industry not only in my State but in the country at large.

The statement has been made that chemical wood pulp is not in itself a finished product but is in the nature of a raw material. I have already stated that it takes the labor of three men one day to produce a ton of the chemical pulp. The people who are fighting the duty, the principal ones who are fighting it, are the converting mills of the country, and they have enlisted the aid of the newspaper publishers.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Maine yield to the Senator from Massachusetts?

Mr. HALE. I yield.

Mr. WALSH of Massachusetts. Looking through my correspondence from some of the paper mills in my city of Fitchburgh, Mass., I find several communications in which it is stated that there is not produced in America sulphite pulp such as they need and must have to make certain kinds of paper. Is that the fact?

Mr. HALE. Certain kinds of newspaper or certain other paper?

Mr. WALSH of Massachusetts. I had in mind outside or other paper.

Mr. HALE. I think we need some foreign sulphite pulp in this country without any question.

Mr. WALSH of Massachusetts. It is absolutely indispensable, is it not, in the making of certain grades of paper?

Mr. HALE. In making certain grades of paper I believe it is absolutely indispensable.

Mr. WALSH of Massachusetts. I am glad to have the Senator confirm what they say.

Mr. WALSH of Montana. Mr. President, I should like to inquire about what this means. I can not comprehend it myself. They make sulphite pulp in Maine and they make sulphite pulp in Canada.

Mr. HALE. There are all sorts of grades of sulphite pulp. Some of the foreign grades are better than we produce in this country or than we find it profitable to produce here.

Mr. WALSH of Massachusetts. May I interrupt the Senator to read just a paragraph from a letter? I am reading a letter from the firm of Crocker, Burbank & Co., of Fitchburgh, Mass. This is a concern that makes the paper used by the Saturday Evening Post and the Ladies Home Journal, and is one of the largest white-paper mills in America. They say:

It is not a question altogether of the protection of American industries manufacturing chemical pulp. There has always been a large importation of foreign pulp, which is cleaner and stronger than the domestic article. There are a good many papers used in this country which can not be made out of domestic pulp and made of the proper quality. We have always enjoyed a good reputation for our machine finish and supercalendered papers, which for many years have been made with foreign bleached sulphite. During the war we had to substitute domestic pulp for foreign. Our product suffered accordingly.

That statement is confirmed by a letter from the Strathmore Paper Co., of Massachusetts, another very large company. They state:

This company is probably one of the largest companies in the world making strictly high-grade papers. It uses all of the American-made pulp that it can, but has found that for certain kinds of papers the foreign pulp produces goods which American pulp can not produce.

They say that the question of price is practically on a parity and that it does not enter into the proposition. They state that it is absolutely necessary for them to import certain grades of foreign pulp in order to make the kind of papers they want.

Mr. WALSH of Montana. Will the Senator from Maine tell us why we can not make just as good pulp in this country as they can anywhere else?

Mr. HALE. I think we can; but it is a question of the wood that is used and the profits. Our mills do not take up certain kinds that are manufactured in other countries.

Mr. WALSH of Montana. Certain woods will make a higher quality of pulp than certain other woods?

Mr. HALE. Yes. As I said, the people who are fighting this duty are principally the converting mills, with the assistance of some of the newspaper publishers.

Mr. HARRIS. I think there are about five mills fighting it where there is one favoring it.

Mr. HALE. I shall go into that later. I think I can disprove that. The Senator may be right so far as the number of mills is concerned, but so far as the volume of product is concerned he is absolutely wrong. There are many of the conversion mills which are simply 10 or 20 ton mills, very small in size.

Mr. ROBINSON. The last statement of the Senator from Maine would imply that the smaller organizations favor the placing of this product on the free list.

Mr. HALE. If the Senator will bear with me, I shall try to explain that. I am speaking of converting mills which are not producers at all of chemical pulp. The conversion mills simply get the chemical pulp and other ingredients and assemble them and make their products out of the assembled ingredients, but they do not manufacture them originally at all. What the conversion mills want naturally is to have the product on the free list so that they can have what they call the raw material free, and then they want a duty on their manufactured product, and in fact have it already; it has already been provided for.

As I have already said, it takes the labor of three men one day to make a ton of chemical pulp. It takes the labor of only two men one day in the converting paper mills to make a ton of their paper. It is a very much more expensive process to make the chemical pulp than it is to make the paper where they use the chemical pulp as one of the ingredients, as the converting mills do.

A short time ago I wrote to Mr. John S. Parker, of New York. He is counsel for the chemical pulp committee. I asked him to explain the process of the manufacture of chemical pulp to me, and I wish to read what he wrote in reply:

The process of making chemical pulp may be described briefly as follows:

"The wood is brought to the mill usually in its rough state in logs 4 feet in length. Every pulp mill attempts to keep on hand at its mill, or at places in the woods near railroad stations, at least a year's supply of wood. The first step in the treatment of the wood is to remove the bark. This is usually done in barking machines which either cut or rub the bark from the log. It is necessary to remove every trace of the bark as it is unaffected by the later cooking process to which the chips of wood are subjected, and if allowed to remain spoils the pulp for paper-making purposes. After the bark is removed the logs are conveyed to chipping machines which cut them into small chips. These machines must be so designed and operated as to preserve so far as possible the fibers lengthwise. From the chipping machines the chips are conveyed to a digester. Thus it is seen that the preparation of the wood alone is an elaborate manufacturing process requiring much labor and equipment.

"The digester is a large boiler lined with some substance which will not be affected by the chemical used. In the sulphite process the chips are mixed in the digester with bisulphite of lime or lime liquor and cooked by steam under pressure for 8 to 15 hours. This liquor is prepared at the pulp mill in a special plant known as the acid plant. In this plant the raw materials used for the sulphite process are sulphur, lime, and limestone."

"The cooking is done by steam under pressure. The liquor dissolves and removes all the constituents of the wood chips except the cellulose, leaving the unbleached fiber free. When bleached this fiber is practically pure cellulose—the structural material of all vegetable matter.

"When the cooking is finished the stock, containing the fiber and the other constituents of the wood, is blown from the digester into a blow pit. This is a large vertical tank of wood or concrete construction. The stock is then mixed with water and thoroughly washed. From the blow pit the stock is pumped into tanks, where it is again washed and the cellulose fibers separated from the other constituents of the wood, so far as possible. The pulp then flows by gravitation or is pumped to knotter screens, where knots or lumps of uncooked fiber are removed. From the knotter screens the stock passes through a riffler, a shallow wooden sluice about 6 or 8 feet wide. It is then pumped or allowed to flow by gravitation to screens by which the fibers suitable for use are separated. After going through several other processes, the purpose of which is to remove all foreign matter, the pulp is put in vats and thickened and bleached, if bleached pulp is desired, and either kept in stock chests for use in the paper mill, if there is a paper mill connected with the pulp mill, or else run through machines, dried, and pressed into rolls or sheets of fiber.

"In addition to the special equipment required for each of the processes mentioned it is also necessary to have auxiliary plants to furnish the necessary steam and power, and usually it is necessary to have a filtration plant for the water, of which enormous quantities are used; and in the manufacture of some kinds of pulp it is necessary to have a recovery system, so that the chemicals employed may be recovered and again used in the plant.

"The above description is necessarily brief, but is sufficient to show that the process of making chemical pulp is a most elaborate one, and completely rebuts the claim frequently made by opponents of this duty that chemical pulp is a raw material."

I think the Senator on yesterday referred to the process as one of maceration. It is really a process of cooking. The wood is chipped up first, then it is put into the digesters, and cooked, partly by the use of acid but largely by heating. It has been estimated that it takes 2 tons of coal to produce 1 ton of chemical pulp.

Mr. President, I think this letter proves that chemical pulp is not in any wise a raw material, but is in itself a very finished and expensive product. I think everyone will admit that. If it is a finished and expensive product; if the industry is one in which between 20,000 and 25,000 men are employed in the mills and an equal number in the forests to get out the wood; if it is an industry in which we have an investment of $250,000,000 or more; then, if it meets with competition from outside, under the terms of the pending bill is it not entitled to a fair amount of protection, such as is accorded to other products which are embraced in the bill?

In 1920 the annual production of sulphite and sulphate—I have left out soda pulp in this table—amounted to 1,789,564 tons. That was a large year in the business. In the same year the imports were 673,185 tons. In 1921 the production dropped from 1,789,564 tons to 1,254,000 and odd tons, and the imports dropped from 673,185 tons to 507,025 tons. But while the imports declined they did not decrease proportionately to the decrease of production. On the contrary, the imports that year of 507,000 and odd tons were the largest imports that we have ever had in this country, with the exception of the year 1920, which, as I have said, was a very exceptional year.

Furthermore, for the first five months of this year the imports amounted to 327,254 tons. Based on those figures, if the importations for the other seven months run in like proportion, the importations for the entire year will be over 700,000 tons, which is more than we have ever before had, and greater than the imports for the year 1920, which year, as I have said, was an exceptional year.

These figures indicate that we are meeting with more and more competition all the time. This competition is not by any means all Canadian competition. During the last five months the imports have been about half and half Canadian and European, and we have every reason to believe that the European imports will increase as time goes on.

A great deal has been said about the interest of the newspapers in opposition to the tariff duty proposed on this commodity. There are 43 newsprint manufacturers in the United States. Through the chemical committee, to which I have referred, an attempt was made to secure information about the production of these newsprint manufacturers. A questionnaire was sent to every manufacturer of newsprint paper in the United States, including all the manufacturers who in the trade directories were stated to manufacture newsprint with other grades of paper. The questionnaire asked for the total production of newsprint before the 18 months ending June 30, 1922, the total production of sulphite pulp for the same period, and the amount of imported sulphite pulp used during the same period. Thirty-four manufacturers replied, giving all of the figures requested; nine either failed to reply or declined to give their figures or replied that they had not produced any newsprint paper during the period. The 34 who gave their complete figures gave a total production of newsprint for the 18 months' period of 1,517,742 tons, and the total production of sulphite pulp during the same period of 526,850 tons. These 34 manufacturers also reported that during the same period they had used only 25,487 tons of imported sulphite. As I have said, nine of those to whom letters were written did not reply. Some of them did not produce their own chemical pulp and others have been in the habit of buying a certain amount in the past. It was not possible to get the exact figures, but allowing a purchase of imported chemical pulp of one-fifth of their production—and I think that is a fair basis, because one-fifth only of the chemical pulp is used in the manufacture of newsprint paper—the total that these 43 companies could have bought from outside sources—and in many cases they did not buy any—could not have amounted to over 40,000 or perhaps 45,000 tons at the most. It is estimated that 375,000 tons of chemical pulp are used in the manufacture of newsprint paper. Very little more than one-tenth, then, by any possibility could have been purchased out of the foreign imports. That does not look as though the newspapers are very vitally interested in this matter.

The manufacturers of newsprint, as I have shown, produce more than 200,000 tons of chemical wood pulp in excess of what they use in their business, so that there is always a supply on hand which the manufacturers of print paper can secure. There is never any difficulty in obtaining that.

I wish to insert in the RECORD at this point a letter from John S. Parker, to whom I have already referred, addressed to the committee on Federal legislation of the American Newspaper Publishers' Association, in which he speaks about the attitude of the publishers toward this tariff rate. I quote from the letter as follows:

During the period January 1, 1921, to June 30, 1922, of 18 months, 1,878,942 tons of standard newsprint were produced in the United States and 1,274,431 tons were imported.

I think the Senator from Georgia [Mr. HARRIS] yesterday stated that two-thirds of the newsprint used in this country was imported. Am I not right?

Mr. HARRIS. I did not hear the Senator's statement.

Mr. HALE. I think such a statement was made yesterday and I think the figures I have given correct that statement.

Mr. HARRIS. What is the statement, please?

Mr. HALE. It is stated in a letter to which I have referred that—

During the period January 1, 1921, to June 30, 1922, of 18 months, 1,878,942 tons of standard newsprint were produced in the United States and 1,274,431 tons were imported, making a total of newsprint consumed during that period of 3,153,373 tons.

Mr. HARRIS. I am not sure about that. The Senator, however, made a statement a moment ago that 200,000 tons of chemical wood pulp are produced by the paper mills here in excess of the quantity they use.

Mr. HALE. Yes.

Mr. HARRIS. We imported from Canada last year 308,981 tons of chemical wood pulp and during the previous year 419,270 tons.

Mr. HALE. There is no doubt about that; but it did not go into the manufacture of newsprint paper.

Mr. HARRIS. Most of it does go into newsprint, according to my understanding.

Mr. HALE. I have just shown that only 34,000 tons, or at the most 40,000 tons, can go into newsprint.

Mr. HARRIS. I think the Senator's information probably is not the same as that which was given to us.

Mr. HALE. Oh, I think it is. I do not think there is any question about my information. The newsprint manufacturers do produce 200,000 tons more than they need, and this overproduction goes out on the market and is sold to the converting mills and others in the country.

During the same period the American manufacturers of newsprint alone produced 645,986 tons of unbleached sulphite pulp, the only kind of chemical wood pulp which enters into the manufacture of newsprint. As you know, newsprint paper contains 20 per cent by weight of sulphite pulp. The amount of sulphite required, therefore, to manufacture the above-mentioned 1,878,942 tons of newsprint was 375,788 tons. Thus it will be seen that the newsprint manufacturers produced a surplus of sulphite amounting to over 270,000 tons, which was sold and used for other purposes. During the same period the total amount of imported sulphite pulp used in the United States in the manufacture of newsprint paper was 36,138 tons—

I am allowing for a slight increase—

being less than 10 per cent of the whole amount of sulphite used in the manufacture of newsprint. Most of this imported sulphite came from Canada. For the month of May the import value, as found by the customs, of unbleached sulphite was $47.66 per ton.

That is to say, if you get your pulp at $47.66 a ton, a 5 per cent duty would be $2.38, and all that the newspapers would have to pay with this tax on, in addition to what they now pay, would be one-fifth of $2.38, or 48 cents a ton of newspaper; and as there have only been about 40,000 tons of chemical pulp imported into this country, the tax on those 40,000 tons at $2.38 a ton would be somewhere around $100,000—the total tax paid on all the imports that came in and that were used in the manufacture of newsprint.

A duty of 5 per cent would be $2.38 per ton, or 48 cents on the amount of sulphite used in one ton of newsprint. On the whole amount of 36,138 tons used, therefore, the total duty would be $86,008.44. When it is considered that during the past 18 months newsprint sold for at least $70 per ton, it will be seen that the entire amount paid by publishers for the newsprint consumed was over $220,000,000. To say that a total duty of $86,000 would have any effect whatsoever upon the price of a commodity sold in such great volume as newsprint is, of course, absurd. The figures given above have been obtained direct from the manufacturers of newsprint and from the published reports of the Department of Commerce.

During the year 1920 the total production of sulphite (other than news grade) and sulphate pulp in the United States was 946,050 tons. The total imports of chemical wood pulp during the year were 673,185 tons. In 1920 the production and consumption were, of course, the highest ever attained. During the first five months of 1922, however, the total production (other than news grade and soda) was 336,449 tons and the imports were 327,254 tons. This large proportionate increase of imports has caused the shutting down of many American mills and a large decrease in output of those which have been able to run.

I think that disposes, or ought to dispose, of the talk that the newspapers of the country are greatly interested in this suggested duty. I do not believe that they are.

Another argument that has been brought up against protection for this industry was the argument that we ought to save our forests; that we can not afford to put on a duty that will tend to use up the lumber of the country. In the course of the debate day before yesterday I made the statement that all the wood used in the manufacture of chemical and mechanical pulp together amounted to only 3.1 per cent of the annual cut of lumber in the United States; and including, as this does, mechanical pulp, it leaves something under 2 per cent for chemical pulp. That is to say, something less than 2 per cent of our annual cut goes into chemical wood pulp; and that, of course, is a very small fraction. Furthermore, I stated—and the Senator from Montana [Mr. WALSH] took exception to the statement—that through the use of scientific forestry methods we managed to take care of our timber so that the supply does not give out. The Senator objected to my statement, as he said that we did not replant, and his idea was that that was necessary in scientific forestry.

We do not do that in my State. It is, however, done in some States of the country. I have here some photographs, which I shall be very glad to show any Senator, of the operations of the Bogalusa Pulp Co. in Louisiana.

The first of these pictures shows a territory that has been cut over, with the tops and cuttings lying around.

The second picture shows the same land after they have taken off the pulp wood, and that includes practically all of the wood that was in those tops and cuttings.

The third picture shows some of the timber in the country that has been marked for a cut, and it also shows certain trees that have been notched with a mark to indicate that they are to be left standing to reproduce.

The fourth picture shows a portion of this same territory where the young trees are beginning to come up that have seeded themselves automatically from these other trees that have been left for reproduction.

If any Senator cares to see these pictures, I shall be very glad to show them to him.

As a matter of fact, Mr. President, so much money is invested in my State and throughout the country in these various chemical pulp plants that it is necessary for them to look after their supply of wood for future use. Part of the wood that is used we get from Canada. Canadian pulp wood comes into this country free. Last year we brought in 1,000,000 cords of Canadian pulp wood. Out of one cord of pulp wood you can manufacture two-thirds of a ton of ground wood pulp and one-half of a ton of chemical pulp; but if anything should happen to this Canadian supply it will still be necessary for our mills to get their own supply in this country. They realize that, and they have more and more been taking care of the lands which they own near the mills, so that they could depend on their own supply of lumber should the Canadian supply give out, or should they not be able to get it in any other way. It is vital to them that they protect their land against storm and against fire and against insects that bore in and destroy the trees, and that is exactly what our pulp people are doing in my State, and I believe also in other States in the country.

The Great Northern Paper Co., which perhaps uses the most scientific system of forestry used in my State, has a regular plan of putting lanes through its timber, so that the wind has a chance to sweep through. Further, where the timber is too thick, where it is so thick that it would oppose a wall in case of storm, they thin it out. On the sides of mountains, when they are making their cuttings, where they would ordinarily leave enough timber so that they could cut again in 20 years, they strip entirely, because if you thin out timber on the side of a mountain, and the winds come along, the whole timber blows down.

They use the most scientific methods that are known to them to take care of this timber, and they are the very people who ought to be helped out in this work that they are doing to preserve the forests of the country. Whether they are doing it for their own purposes or for the general good of the country, they are preserving the wood of the country.

Anyone would think, from the bitterness that seems to have been manifested toward this duty—not in this Chamber, but outside—that it was a disgraceful sort of a duty; that we have not any business to put it on. I maintain that this is a perfectly legitimate business, as legitimate a business as you can possibly have in this country; that it needs protection against foreign importations, both from Canada and from other countries; that the figures show that we are meeting with more and more competition all the time; and that instead of asking for this small duty we really should be entitled to a much larger duty. That, however, we have not asked for.

I very much hope the Senate will see the matter as I do, and that this committee amendment will be approved.

I ask unanimous consent to insert in the RECORD a table giving the production in this country and in other countries for the last few years.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Pulp—domestic production, shipments, and stocks (net tons) by grades, 1917–1921, inclusive.

Grade and year.	On hand Jan. 1.	Production for year.	Used during year.	Shipped during year.	On hand Dec. 31.
Ground wood pulp:					
1921	129,626	1,268,012	1,176,899	97,659	123,080
1920	139,304	1,578,300	1,456,198	131,495	129,626
1919	131,170	1,449,799	1,312,335	135,579	139,961
1918	145,567	1,303,403	1,229,288	88,512	131,170
1917	112,145	1,447,068	1,314,773	98,873	145,567
Sulphite, news grade:					
1921	17,984	623,493	530,644	89,593	21,240
1920	20,046	843,514	717,986	126,261	17,984
1919	17,905	723,991	606,984	116,164	20,373
1918	21,546	744,944	645,794	102,841	17,905
1917	13,634	744,470	636,858	99,700	21,546
Sulphite, bleached:					
1921	6,661	360,063	215,323	144,653	6,748
1920	6,810	578,081	316,037	262,213	6,661
1919	4,240	515,897	271,276	241,673	6,810
1918	12,180	484,525	256,407	236,058	4,240
1917	4,130	497,085	269,347	219,688	12,180
Sulphite, easb bleaching:					
1921	1,134	62,344	39,017	23,593	868
1920	1,314	72,394	45,309	27,159	1,134
1919	2,212	66,465	40,950	26,740	1,314
1918	1,451	80,730	58,897	21,072	2,212
1917	438	85,081	55,156	28,912	1,451
Sulphite, mitscherlich:					
1921	2,768	60,005	41,365	20,280	1,128
1920	1,809	82,687	50,404	31,479	2,768
1919	1,489	79,353	47,895	30,571	1,809
1918	1,752	74,799	45,966	29,096	1,489
1917	1,147	78,751	50,441	27,705	1,752
Sulphate pulp:					
1921	7,850	148,165	114,164	34,194	7,657
1920	5,753	212,888	144,926	65,601	7,850
1919	4,490	161,887	104,214	53,670	7,647
1918	1,284	167,438	100,552	63,680	4,490
1917	421	108,431	86,770	20,798	1,284
Soda pulp:					
1921	6,507	272,287	174,102	95,668	9,024
1920	5,672	431,971	235,808	195,296	6,507
1919	3,395	377,473	217,351	158,002	5,672
1918	6,586	343,611	204,411	142,391	3,395

NOTE.—The pulp used and shipped during each year represents pulp produced in the establishment using or shipping same.
The annual totals do not always balance owing to corrections, received from the mills, affecting stocks on hand from month to month.

Mr. POMERENE. Mr. President, I am advised that the senior Senator from Maine [Mr. FERNALD] is suffering from a severe cold, which makes it impossible for him to speak audibly, and that he has committed his views to writing and desires to have the paper read from the desk. I ask that that may be done, and I yield the floor for that purpose.

The PRESIDENT pro tempore. The Secretary will read as requested.

The reading clerk read as follows:

Mr. FERNALD. Mr. President, I regret that a slight hoarseness prevents me from speaking on the question of a duty on chemical pulp.

But I wish to say that this industry is of paramount importance to the people of my State. Millions of dollars are invested in it and thousands of people engaged in carrying on the work. There is scarcely an industry of so much importance to the farmers, as well as the laborers and operators, and I hope that the duty suggested in the amendment may be accepted.

I want to say that not all of the papers in the country are opposed to this. There appeared in the Bangor Daily Commercial, a Democratic paper, published at Bangor, Me., an editorial on July 31, 1922, so comprehensive and fair that I shall ask that it be made a part of my remarks and that it be printed in 8-point type.

I can not express my disappointment at not being able to go into this question at greater length, but this slight indisposition, which came upon me a few days since, makes it impossible for me to speak at any length for the present, and for possibly two or three weeks longer.

[From the Bangor Daily Commercial, July 31, 1922.]

SHOULD BE RETAINED.

"Among the schedules of the tariff measure as now proposed that are of vital importance to the people of Maine is that which proposes a 5 per cent duty upon bleached chemical fibers. This matter was thoroughly considered by the Finance Committee, which, after contemplating the question from all angles, reported in favor of the duty. It now appears that there will be an effort to overthrow this report and eliminate the duty upon bleached chemical fibers from the tariff measure.

"The proposed tariff is a necessary one not only to the American manufacturers of bleached pulp, a number being located in this State, but to the lumber industry as well, and in this connection this includes the many Maine farmers who own or operate wood lots, small or of considerable size, and who have been able in the recent meager years of farm production to eke out their income by the sale of pulp wood. This industry has been no inconsiderable one for the farmers of this State, especially in northern and eastern Maine, and many of these farmers have made preparations for the continuation of the industry by the purchase of wood lots.

"We do not understand there is any material objection to the proposed duty on the part of the mills that produce newsprint. As we understand it, the proposed duty applies only to bleached pulp, which is not used in the manufacture of newspaper, and the effect of this small duty upon newsprint would be practically nothing. There might be a slight sentimental effect if it resulted in reducing the importations of high grade foreign pulp, but that must be so small as to be negligible.

"There would be some effect, perhaps, upon the manufacture of writing paper, and it is reported that one publisher, who loses no opportunity to express his devotion to the cause of American labor, but who is reported to have been purchasing his supply of print paper in Germany to a considerable extent for the past year, is attempting to stir up newspaper publishers to oppose the proposed duty, but we do not understand that the publishers are joining in the effort to any considerable degree.

"To our mind the newspaper publishers should in this connection regard the greatest good of the greatest number and not seek to be especially favored regardless of the effect upon other industries. Here in Maine the matter is vital. Next to farming, the most important industry in this State is lumbering, and the most important side of lumbering has come to be pulp making. We are, in this respect, competing with European pulp, which can be sold here at a profit to-day at rather more than the cost of wood to a mill in Maine. Already the movement to abandon pulp mills in the United States has begun, and if the industry is to continue being an important one there must be some kind of protection from the present unfair competition. Certainly if there is any excuse for protective tariff for American labor in any industry that applies to the manufacture of chemical pulp.

"This is the position that is taken by the Maine Senators and, we think, by the Maine Representatives in Congress. They are alive to the interests of the State, and realize that its industries must be protected from unfair foreign competition. To-day large quantities of bleached chemical fibers are being brought into this country, especially from Germany and Norway. And if this is continued the effect will speedily be felt not only by the pulp manufacturers but very directly by the farmers and small and large operators who are engaged in the cutting of pulp wood."

The PRESIDENT pro tempore. The editorial will be printed in regular RECORD type, as requested by the Senator from Maine.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Montana?

Mr. POMERENE. I yield.

Mr. WALSH of Montana. The value of the editorial just read is disclosed by the statement made in it to the effect that great importations of chemical wood pulp are coming into this country from Norway. I have before me the Monthly Summary of Foreign Commerce of the United States for the month of May, 1922, which gives the importations of chemical wood pulp for the preceding 11 months, including that month, from which it appears that Norway is not a country of any particular consequence when it comes to the matter of importations of wood pulp. That country sent us during that 11 months' period chemical wood pulp to the amount of $819,881, while Sweden sent us $10.000.000 worth, Canada $14,000,000 worth, and all other countries $3,000,000 worth.

While I am giving these figures, I want to submit some more which show some misinformation about this matter on the

part of some of the Senators who have spoken. Our importations for 1922 were very decidedly less than for 1921; that is, for the 11 months' period.

Mr. HALE. How does the Senator get 11 months in 1922?

Mr. WALSH of Montana. It is the fiscal year, dating from the 1st day of July. The Department of Commerce reports run from July to July, and this includes the five months of 1922, including the month of May, and the last six months of 1921.

Mr. HALE. The Senator will recall that I mentioned specifically that during the six months the importations were very much larger than we had ever had before.

Mr. WALSH of Montana. I can not see how that——

Mr. POMERENE. I would like to know how long this colloquy is going on in my time.

Mr. WALSH of Montana. It is not going on any longer from me. I submit that during that period, for the 11 months ending May, 1921, our importations were $44,132,670, and that during a similar period ending May, 1922, they were $28,144,310.

Mr. POMERENE. Mr. President, a statement has just been made by one of the speakers, and possibly by two of them, to the effect that there was not very much opposition to this duty among the newspapers. I have been hearing from time to time from the newspapers of my own State—the cosmopolitan papers, the local country papers, and the papers in the smaller cities—and if there is a single paper in the State of Ohio that is not opposed to it I am not advised of that fact.

The junior Senator from Maine [Mr. HALE] talks about the vast value of this paper pulp industry to his State. I assume he is correct in the figures he has given, but when my distinguished friend suggests that the paper pulp mills are not denuding our forests I beg to differ with him.

I do not think he quite appreciated the effect of what he himself said when he referred to the fact that pulp timber was allowed to come into this country, aye, even into Maine, free of duty, and that the paper pulp mills were so very careful in the protection of their forests that they were treating them in a very husbandlike way. Why bring this timber in from Canada if they are not needing it? Does that not demonstrate the fact that the forests in Maine are suffering by reason of this policy? Does not the fact that the mills there, according to the Senator's own statement, are carefully reforesting, indicate that there is grave need of protection to the forests? To my mind, one of the strongest reasons which can be urged for free pulp is the fact that the constant cutting of the timber is denuding our forests. It may be that if we were to stop cutting timber for lumber and building purposes, and leave the pulp mills as the only source of danger to our forests, the Senator would be right, but when the Senator speaks of the wonderful importance of this industry to his State, I want to remind him and other Senators of the vast importance to my own State of not having any duty on pulp.

The Senator from Maine suggests that it takes at least a million dollars to build and equip a pulp mill. In my State we have 55 paper mills. I am not prepared to say what their value is.

Mr. HALE. Will the Senator tell me what their production is?

Mr. POMERENE. I have not those figures, but I can give the Senator some idea about it. The people who write me about it say that they employ in those 55 mills from 30,000 to 40,000 men, and all of those mills, save one, are converting mills. They have to buy their pulp. Part of it they get from abroad, part of it they get from the pulp mills of this country, possibly some of it from the pulp mills in the great State of Maine. Only one of those mills is a chemical-pulp mill, and that is a small mill at Chillicothe, which is a soda-pulp mill.

Mr. LODGE. Are those mills in Ohio of which the Senator speaks newsprint mills or general paper mills?

Mr. POMERENE. Both, I think.

Mr. LODGE. Some of them are general paper mills?

Mr. POMERENE. I think so.

Mr. LODGE. I notice that their product is pretty well protected.

Mr. POMERENE. Possibly some of these others are protected, I am not prepared to say about that; but I do know that this 5 per cent is going to be a very great burden upon them, and I think I will be able to show it by some of the figures I have before me.

Mr. LODGE. The attitude is a familiar one. We have cases everywhere of people who want everything they buy that comes into their mill, which is the finished product of some other man, on the free list, but they want everything that goes out of their mill protected.

Mr. POMERENE. I think that is true, and I think there are some of that class of people in the State represented by the distinguished leader on the other side of the Chamber.

Mr. LODGE. I do not know of any State where they are not to be found.

Mr. POMERENE. I think the Senator is right about that. He and I can not have any quarrel on that point.

Mr. LODGE. I only wanted to bring out the fact that there was protection.

Mr. POMERENE. Very well, sir; I am not afraid of facts.

Mr. HALE. Mr. President——

Mr. POMERENE. I yield to the Senator from Maine.

Mr. HALE. The Senator is not a protectionist, of course, and does not believe in the theory of protection.

Mr. POMERENE. The Senator must define what he means by "protectionist." If he means to insinuate that because I am more moderate in my views that, therefore, I am one of the free traders who must be anathematized every time the subject comes up, then I differ from him.

Mr. HALE. I did not intend to insult the Senator. I only wanted to propound a question to the Senator.

Mr. POMERENE. I freely admit that on the subject of the tariff I am more liberal in my views than is the Senator from Maine. I am not willing, as has been urged on the floor of the Senate, that there shall be a Chinese wall built around the country, as some would have it done.

Mr. HALE. But I would like to ask the Senator a question. Granting that we are going to have some protection, does not the Senator think an industry that has $250,000,000 invested in it is entitled to more protection if it is meeting competition and can not keep going unless it has that protection?

Mr. POMERENE. In view of the present situation and the effect it is going to have——

Mr. HALE. The Senator means the effect on those who are opposing the protection?

Mr. POMERENE. I mean the effect it is going to have upon the forests. I mean the effect it is going to have upon the newsprint paper industry as well as the general paper industry. I mean the effect it is going to have upon the entire country. I am willing, if the bill is to be constructed along reasonable lines, to say that I would not object to some of the tariff duties on some of the schedules.

Mr. HALE. May I ask the Senator just one more question?

Mr. POMERENE. Yes.

Mr. HALE. Does the Senator realize that if the competition becomes too great and we are driven out of business, as we will be driven out of business, we shall have to give up our mills and move them away, and if the mills are given up we shall naturally be the losers to that extent?

Mr. POMERENE. Oh, Mr. President, the difficulty with the friends of the school of thought of the Senator from Maine is that they are always seeing things at night. Labor in Canada is paid as much as labor in Maine.

Mr. HALE. Not quite as much.

Mr. POMERENE. About the same. It costs about as much to cut timber in Canada as it does in Maine. It is a little farther away; I daresay that is so, and there may be an item of difference in the transportation. But I have not heard, while the Senator is talking about the duty on the pulp, that he is asking for a duty upon the pulp wood that comes in.

Mr. HALE. Why should we? That is not a manufactured product.

Mr. POMERENE. It is not? Why, the very moment that the tree is cut down and it is cut into shipping length it is a manufactured product.

Mr. HALE. Very slightly manufactured.

Mr. POMERENE. Very slight; but it is none the less a manufactured product. Is there any particular reason why 55 paper mills——

Mr. WALSH of Montana. Mr. President, will the Senator from Ohio permit me to interrupt him?

Mr. POMERENE. Certainly.

Mr. WALSH of Montana. It is always easy to say that an industry is going to fail. Upon what basis does the Senator from Maine assert to the Senate that this tariff is needed in order that the business may live?

Mr. HALE. I did not hear the Senator's question.

Mr. WALSH of Montana. Upon what basis does the Senator from Maine assert that the tariff is necessary in order that the wood-pulp industry may live?

Mr. HALE. Because production is decreasing in this country and because the imports are increasing.

Mr. WALSH of Montana. Production is decreasing simply because the supply of wood is decreasing. The Tariff Com-

mission reports, as I have stated, that wood-pulp manufacturers in the country do not need this tariff, that they make a good profit as it is.

Mr. HALE. As a matter of fact, during the last six months production has been increasing over what it was last year.

Mr. POMERENE. That is very true. I remember very distinctly a report made on this subject by the Tariff Board during the Taft administration. I talked with one of the members of that board and he told me that they discovered after a thorough investigation that many of the pulp mills were taking their profits and investing them in timberlands and that this did not appear upon the books of the companies—another effort to conceal their profits. I do not think anyone has heard of any of the pulp mills going into the hands of receivers. I have not heard of it.

Mr. President, I have before me some figures which have been sent to me and which, as I understand, have been taken from some reports of the Federal Trade Commission. The figures, I am told, have been presented to the Finance Committee. As indicating the extent of the industry the memorandum says that there are 838 paper mills and 323 pulp-paper mills in the United States; that there are less than 10 chemical pulp mills of small tonnage which do not make paper; that all the other pulp mills are essentially paper mills which make pulp for their own consumption and whose surplus, when there is any, is available to converting mills.

I have a table which gives the chemical pulp produced in the United States for each year from 1917 to 1921, the amount consumed by the mills manufacturing pulp for each of those years, the percentage of their product which they consumed, and the percentage of their product which is sold to converting mills of the type existing in Ohio. I ask permission to incorporate this table in the RECORD in connection with my remarks, without reading.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table referred to is as follows:

	Tons of chemical pulp produced in United States.	Consumed by mills manufacturing pulp.		Sold to converting paper mills.	
		Tons.	Per cent.	Tons.	Per cent.
1917	1,912,502	1,323,811	70	569,750	30
1918	1,896,047	1,312,027	69	595,138	31
1919	1,925,066	1,288,670	67	626,820	33
1920	2,221,535	1,510,470	68	708,009	32
1921	1,526,357	1,114,615	73	407,981	27

Mr. POMERENE. Suffice it to say that the chemical pulp mills consumed during the years referred to, 1917 to 1921, inclusive, from 67 per cent to 73 per cent of their output. They sold to other converting mills during the same years from 27 per cent to 33 per cent of their output. Many of the converting mills buy their pulp partly from domestic producers of pulp and partly from abroad.

I have here another table which was prepared and presented to me from the same source, which shows the pulp consumed in the United States by the paper mills making pulp for each of the years 1917 to 1921, inclusive, and the amount of the domestic production of pulp which is consumed by paper mills as by-products. I ask permission to insert this table in the RECORD without reading.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table referred to is as follows:

Pulp consumed in the United States.

	By paper mills making pulp.		By paper mills who buy pulp.	
	Tons.	Per cent of total United States consumption.	Tons.	Per cent of total United States consumption.
1917	1,323,811	58	968,119	42
1918	1,312,027	57	987,829	43
1919	1,288,670	55	1,060,627	45
1920	1,510,470	52	1,381,570	48
1921	1,114,615	55	915,452	45

Pulp consumed by paper mills who buy pulp.

	Bought from domestic mills.		Bought from foreign mills.	
	Tons.	Per cent.	Tons.	Per cent.
1917	569,750	59	398,369	41
1918	595,138	60	392,691	40
1919	626,820	59	433,807	41
1920	708,009	51	673,561	49
1921	407,981	45	507,471	55

(Figures given are taken from the Federal Trade Commission summaries and Department of Commerce reports.)

Mr. POMERENE. The domestic pulp mills during each of the years referred to, 1917 to 1921, inclusive, consumed from 52 to 58 per cent of their total production. They sold from 42 to 48 per cent of their production during the same years, and this was consumed by the United States converting mills.

I also call attention to the table which shows the pulp consumed by the paper mills which bought pulp during the same years, 1917 to 1921, inclusive. The domestic paper mills during those years bought from the domestic pulp mills from 45 per cent to 60 per cent of their total consumption. They bought from foreign mills during the same years from 40 per cent to 55 per cent of their total consumption. So that, assuming that all of the domestic mills consumed the same proportion of domestic product and foreign product that is consumed by the mills in Ohio, then the 55 mills in Ohio are obliged to depend upon the foreign market during each year for from 40 to 55 per cent of their total pulp, and they would be compelled to pay, if the amendment shall be adopted, the 5 per cent ad valorem duty.

Mr. President, I might take time to go into these matters more in detail, but I think I have presented in concrete form the problem as it presents itself to me. My belief is that in whatever way we look at the subject, we must be convinced that if we are to look at it from a national standpoint and not from the standpoint of the individual investor, we ought to provide for free pulp, and to that extent relieve the industry from this tax and preserve our forests.

Everyone, I think, knows that for several years one of the difficulties which confronted every consumer of paper was to get his necessary supply. The senior Senator from Utah [Mr. SMOOT] was constantly telling us during the war and after the war that it was very necessary that we conserve our supply of paper, even in the printing of the CONGRESSIONAL RECORD. I know that the newspapers of my own State were occasionally writing or wiring me making appeals for relief and suggesting that if they did not get any print paper within the next week or 10 days they could not go to press with their newspapers. When we have the manufacturers of paper appealing for the raw material, and when I remember that in my own State our forests are so denuded that it is utterly impossible to get the necessary pulp wood, I ask why should these mills be burdened with this tax for the benefit of some favored individuals?

Mr. RANSDELL obtained the floor.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Louisiana yield to the Senator from Montana?

Mr. RANSDELL. I do.

Mr. WALSH of Montana. Before the Senator from Louisiana proceeds with the discussion generally, I should like to submit a few observations here in connection with the statement made by the Senator from Massachusetts [Mr. LODGE] in the course of a colloquy with the Senator from Ohio [Mr. POMERENE], namely, that the paper manufacturers of Ohio are protected in this bill. It is true, Mr. President, that the remaining paragraphs of the bill dealing with manufactures of paper generally carry rather high and in some cases quite unjustifiable duties; in some instances the House rates have been increased by the Senate committee.

Recently amendments have been introduced generally lowering the rates proposed by the Senate committee to the level of the House rates, at least, reducing them to a considerable extent; but I am unable to observe that any change in the rates made by the Senate Finance Committee was by way of compensation for the duty imposed upon chemical wood pulp. The rates are all fixed upon the manufactured products upon the basis that the paper manufacturers get their pulp free.

Mr. POMERENE. And may I suggest that, as I understand, newsprint paper is made free, and the manufacturers of paper, if this amendment goes through, will have to be penalized by this 5 per cent duty.

Mr. WALSH of Montana. Undoubtedly. The American manufacturer of newsprint paper must buy his raw product in a protected market and sell in competition with a free product from abroad.

Mr. HALE. Does the Senator from Montana think that this chemical wood pulp is a raw product?

Mr. WALSH of Montana. I did not say it was a raw product.

Mr. HALE. I thought the Senator said that the manufacturer could buy the raw product in a free market?

Mr. WALSH of Montana. Of course, the chemical wood pulp is the raw material of the manufacturer of paper.

Mr. HALE. I understand what the Senator means.

Mr. RANSDELL. Mr. President, in part answer, at least, to what has just been said by the Senator from Montana [Mr. WALSH], I will suggest that newsprint paper comes in absolutely free, as we all know, and ground pulp, out of which newsprint paper is principally manufactured, also comes in free. Newsprint paper is made of ground pulp to the extent of 80 per cent, while to the extent of 20 per cent chemical pulp is used in its manufacture. There is a great deal more of the chemical unbleached pulp manufactured in the United States than there is used in the manufacture of newsprint paper. I have the exact figures here as furnished me by Mr. John S. Parker, of New York, and I assume they are correct. He says this:

During the period January 1, 1921, to June 30, 1922, of 18 months, 1,878,942 tons of standard newsprint were produced in the United States and 1,274,431 tons were imported, making a total of newsprint consumed during that period of 3,153,373 tons.

Now, listen to this:

During the same period the American manufacturers of newsprint alone produced 645,906 tons of unbleached sulphite pulp, the only kind of chemical wood pulp which enters into the manufacture of newsprint. As you know, newsprint paper contains 20 per cent by weight of sulphite pulp. The amount of sulphite required, therefore, to manufacture the above-mentioned 1,878,942 tons of newsprint was 375,788 tons. Thus it will be seen that the newsprint manufacturers produced a surplus of sulphite amounting to over 270,000 tons, which was sold and used for other purposes.

In other words, Mr. President, it was not necessary for our newsprint paper manufacturers to import one pound of unbleached sulphite or chemical wood pulp from Canada or elsewhere. A great deal more was made in this country than there was any necessity for them to use. They had a surplus, so far as the newsprint paper was concerned, or 270,000 tons, if the figures of Mr. Parker are correct. He goes on:

During the same period the total amount of imported sulphite pulp used in the United States in the manufacture of newsprint paper was 36,138 tons, being less than 10 per cent of the whole amount of sulphite used in the manufacture of newsprint. Most of this imported sulphite came from Canada. For the month of May the import value, as found by the customs, of unbleached sulphite was $47.66 per ton. A duty of 5 per cent would be $2.38 per ton, or 48 cents on the amount of sulphite used in 1 ton of newsprint. On the whole amount of 36,138 tons used, therefore, the total duty would be $86,008.44. When it is considered that during the past 18 months newsprint sold for at least $70 per ton, it will be seen that the entire amount paid by publishers for the newsprint consumed was over $220,000,000. To say that a total duty of $86,000 would have any effect whatsoever upon the price of a commodity sold in such great volume as newsprint is, of course, absurd. The figures given above have been obtained direct from the manufacturers of newsprint and from the published reports of the Department of Commerce.

Mr. President, I am as strongly in favor as any Senator can be of the free importation of newsprint and of the necessary pulp to make newsprint. I do not wish any duty whatsoever on the paper that is used for the newspapers of the land in giving us the news of the day. I want those newspapers to be just as cheap as it is possible for them to be; but the paper which they use comes in free, and at least 80 per cent of all the pulp used in the manufacture of newsprint in this country comes in free. As I have just shown, we manufacture in this country a great deal more of the unbleached pulp which goes into combinations with the ground pulp of the United States and of Canada and other countries than is needed to supply all the demands of our newspapers. So we are making a mountain out of a molehill when talking about the newspapers being interested in this proposition. If they are interested at all, their interest is so infinitesimal that they ought to be willing to set it aside, in order that the general principles on which this bill is being framed may be applied to other very great interests in this country. It is as to those other interests particularly that I propose to speak.

I wish to speak briefly about the interest in this duty of the great Southland where I live. I admit that the manufacture of wood pulp in the United States is not an infant industry, but I contend that the manufacture of wood pulp in the South is an infant industry. There are only a few States in the South where there is any wood pulp manufactured, namely, Tennessee, Georgia, Louisiana, Texas, and perhaps to some extent in North Carolina. My own State is probably in the lead in that respect, but it is only in the past five or six years, sir, that we have been manufacturing wood pulp in Louisiana. In connection with the manufacture of wood pulp what are we doing? We are undertaking the most intelligent reforestation of any State of the Union. We are there setting a pace for the Nation to follow in the intelligent reforestation of our cut-over pine lands.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Louisiana yield to the Senator from Arkansas?

Mr. RANSDELL. I will be delighted to yield.

Mr. CARAWAY. The industry is growing in Louisiana, is it not?

Mr. RANSDELL. I hope it is; it has not been tried out long enough as yet to be tested thoroughly.

Mr. CARAWAY. It has been born and raised without any duty, has it not?

Mr. RANSDELL. Yes; I believe it was born, but it has not been raised as yet, I will say to the Senator. It was born, however, without any duty; it was born out of necessity.

Mr. CARAWAY. I thought the Senator said it was a very large and growing industry in his State.

Mr. RANSDELL. I did not say that it was a large and growing industry.

Mr. CARAWAY. The Senator said his State was the largest manufacturer of wood pulp of any State in the South.

Mr. RANSDELL. I did say that the wood-pulp industry was larger in my State than in any State in the South, but it is a very small industry all over the South. If the Senator can construe that statement to mean that it is a big industry in Louisiana, when it is small everywhere in the South, he is welcome to that construction. The industry has just started in my State, I will say; it has not got fairly going as yet, but we are very hopeful that it is going to amount to something after a while.

Mr. WALSH of Montana. Mr. President——

Mr. RANSDELL. I yield to the Senator from Montana.

Mr. WALSH of Montana. I want to ask the Senator if he can give us the information as to the percentage of chemical wood pulp produced south of Mason and Dixon's line?

Mr. RANSDELL. It is impossible for me to do that, I will say to the Senator, but I have a letter here from Mr. W. H. Sullivan, head of the Great Southern Lumber Co., at Bogalusa, La.——

Mr. WALSH of Montana. Let me ask the Senator——

Mr. RANSDELL. Just a moment, please—where a great sawmill is being operated. He tells me in this letter, which is dated April 13, that there are a few plants in Louisiana that are manufacturing chemical pulp—at Bastrop, La., in the northern part of the State, at Braithwaite, La., 7 miles south of New Orleans, and at Bogalusa, in the southeast corner. Bastrop manufactures about 40 tons a day, Braithwaite about 30 tons, and Bogalusa 70 tons. In addition to this, there is a plant at Orange, Tex., and one at Moss Point, Miss., and there are other plants in the eastern portion of the Southern States.

I will say that in my State, according to these figures, about 140 tons a day are produced. As I make the calculation, roughly, this represents an annual production of around 40,000 tons. So that it is a very small affair, when one considers that in the country at large we produce nearly 4,000,000 tons of wood pulp. The industry is very small in the South; we are just getting started. Does that answer the question of the Senator from Montana?

Mr. WALSH of Montana. In a way it answers the question, but down to 1921 the Tariff Commission did not even designate a single southern State as a producer of wood pulp.

Mr. RANSDELL. I understand that.

Mr. WALSH of Montana. They came in under the head of "all others."

Mr. RANSDELL. Mr. President, we are just getting started in the South, but we hope to be heard from after a while, and we believe that this little duty of 5 per cent ad valorem will help us to be heard from.

I spoke briefly a day or two ago about the mill at Bogalusa, La., where we have the greatest sawmill on earth. It actually cuts about 750,000 feet of pine timber per day and has a capacity of 1,000,000 feet. The forests are being denuded there so rapidly, at the rate of about 65 acres per day, to supply that great mill with saw logs, that about five years ago the owners determined to attempt intelligent reforestation. They realized if they did not do something of that kind that in about 15 to 20 years, or at the outside 25 years, they would have completely exhausted their forests, and the beautiful city of Bogalusa, with its 15,000 to 20,000 souls, one of the finest cities

in my State, would no longer be able to exist, because it was built by that sawmill and is maintained by it. So they said, "We will take time by the forelock. We will replant these vast denuded acres in the kind of growth which Almighty God intended should grow on them"; for the God of Hosts never intended that anything but trees should grow on an immense area in the Southland. He never intended that crops of cotton and corn and wheat and oats and soya beans and other crops should grow on millions and millions of our acres. He intended that trees should be produced there; and they said, "After denuding these forests of timber for the sawmill we will replant trees. We do not expect, perhaps, in our day, to get valuable sawmill timber, but in from 15 to 30 years we can get the most valuable kind of trees for pulp wood, and fine saw logs in 30 to 50 years." Trees grow very fast in that country, and the men behind the Great Southern Lumber Co. have undertaken reforestation in a very intelligent manner. For five years they have been working at it, and they feel that if they can get reasonable encouragement by this small duty they can go ahead and make a success of their industry. The leading spirit and live wire of the enterprise, one of the most progressive and intelligent men of the South, is Mr. W. H. Sullivan, the vice president and general manager of the company.

Mr. Sullivan sent me two pieces of wood, which I should like to pass around among the Senators. Growing trees indicate their age in an infallible manner. Every year produces a ring in a tree. There [exhibiting] is a piece of long-leaf pine coming from a tree 70 years old. You can examine the rings on it. You can count them. There are 70 rings there. Here [exhibiting] is a piece of a tree of another species of pine, known as short-leaf or loblolly. There are 11 rings on it, indicating that this tree was 11 years old. You can see that the two are practically the same size—one of 70 years, one of 11 years.

I should like to have Senators look at this piece of the short-leaf pine and see how far apart the rings are and how porous the wood is. If you examined it with a microscope you would find that it is full of pores. Those pores are very valuable in a way. This wood left alone, not treated chemically, will decay rapidly when exposed to the weather, but the railroads have found that if this loblolly or short-leaf pine, this porous, open-pore pine, is treated with creosote, or some similar chemical, it will last about twice as long as this splendid pine of the other variety if the latter is not creosoted. The long-leaf pine will not take the creosote as well. The pores are so close, the timber is so very dense, that the creosote will not penearate. It will penetrate all through the loblolly pine, so they find that this is very valuable for crossties and for other purposes in railroading where the timber is exposed. It is also extremely valuable without being creosoted for interior work in houses, such as joists, beams, rafters, boards, and things of that kind, where the timber is not exposed to the weather. When creosoted it is valuable anywhere and everywhere.

This tree was only 11 years old. The part I exhibit is a quarter of it. You can see that that was a pretty respectable piece of timber. Suppose you had let that tree acquire an age of 30 to 35 years. It would have been a pretty good piece of commercial saw timber.

Mr. President and Senators, the Bogalusa people think they have demonstrated that this variety of the short-leaf or loblolly pine, and still another variety called slash pine, will become a commercially valuable tree for lumber purposes in 30 to 40 years and will be very valuable for pulp purposes in 15 to 25 years.

Mr. WALSH of Montana. Mr. President——

Mr. RANSDELL. I yield to the Senator.

Mr. WALSH of Montana. I inquire of the Senator if either of these specimens was grown by any species of cultivation or whether they just grew naturally?

Mr. RANSDELL. My friend Mr. Sullivan did not say as to that; hence I can not answer that question. I will read the Senator his exact statement. He says in a letter of October 28, 1921:

> I am sending you under separate cover a piece of long-leaf pine, which shows slow growth, and a piece of loblolly or short-leaf pine, which shows rapid growth. You will notice these pieces are about the same size. One of them grew in 70 years and one in 11 years. It is this type of quick-growing pine that the great Southern Lumber Co. is going to plant. Some of it is to be used in perpetuating the lumber business and a large part of it is to be used in the manufacture of pulp. We have already started this work on an extensive scale.
>
> This quick-growing wood is suitable for all purposes for railroad construction when creosoted, and most railroads now prefer it to the long-leaf pine, because the creosote gets a more extensive penetration; while for building houses, such as studding, boards, and joists, it is also suitable, but not for any class of work where it comes in contact with the ground, cement, or brick walls, unless it is creosoted.

Mr. WALSH of Montana. Mr. President, I was inquiring simply for the purpose of endeavoring to get some kind of an idea about how long it would take to produce pulp wood. Of course, the Senator will realize that the same variety of tree will make very rapid growth in certain soils and under certain conditions, and very slow growth under different conditions and in different soils; likewise, that all growth is highly stimulated by cultivation; so I was simply desirous of knowing to what extent this was cultivated, and what kind of soil it was grown upon.

Mr. BROUSSARD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Louisiana yield to his colleague?

Mr. RANSDELL. I will yield to the Senator in just a moment. I will say to the Senator from Montana that it is estimated that there are in the South something like 66,000,000 acres of pine land, from the greater portion of which—all but about 11,000,000 acres, as I understand—the timber has been denuded. When the timber is cut from that land, if you can keep forest fires away from it and keep razor-back hogs from grazing on it, the trees spring up everywhere like magic, and in a few years produce a new forest. Several times, when I used to campaign for the House some years ago, I have traveled through the pine sections of my State and have gone through young forests with well-defined corn or cotton ridges on the ground, and the trees would be as large as my body, sir—25 to 30 years old, evidently—a very thick growth and just as vigorous as anything could be.

In my own State—and I will explain this more fully in a moment—they are practicing intelligent reforestation by planting trees, although not as the Senator saw in Germany, where they are planted in rows and thinned out like a regular orchard. They do not do it in that way, sir. They leave anywhere from one to two or three seed trees per acre. The cones fall from those trees, nature spreads the seed around. Strong fences are built around those forests to keep out trespassers and to keep the hogs away from the young trees, and forest rangers go around and prevent fires. That system has been practiced by Mr. Henry Hardtner at Urania, La., for the last 15 or 20 years, and he has been very, very successful in it.

I now yield to my colleague.

Mr. BROUSSARD. Mr. President, I merely wanted to answer the question propounded by the Senator from Montana [Mr. WALSH]. No doubt my colleague will cover the particular thought I had in mind, but I wish to do it now, because it is within my own knowledge and information.

When the trees are protected from the hogs, which destroy the seed, there spring up trees as numerous as the hairs on a man's head. These trees can not grow and thrive when they are so thick. The theory that the people of Louisiana have advanced is a thoroughly practical one. At the end, say, of 10 years they go in and select the weaker trees and cut them out and make pulp of them, so as to give air and sunshine to the other trees. At the end of 20 years they go in again and thin out these trees, so that they are adding to the opportunity of the tree to develop, just the same as they would do if they cultivated the tree. They do not cultivate it, except that they permit it to grow; and I dare say that in a forest that is tended in that manner the rings around the tree will show a very decided increase in size; the tree will develop more rapidly and become more porous. For certain purposes the tree that has to fight for a living is a more durable tree; but the other tree, if treated with chemicals, absorbs the creosote, because it is porous, and then becomes practically impervious to weather and to time.

While taking care of these forests we are converting what was absolutely a waste product heretofore into a very useful thing. I wish to say to my colleague that within the last year two paper factories have been established in my town, a town of less than 12,000 people.

The last factory put up there cost over $2,000,000, and they now are beginning to operate. They propose to use other things than wood in the manufacture of paper. They propose to use rice straw and cotton stalks and cornstalks, but they have invested that money because they know that they can fall back on the willows and the other trees that grow in the forests there. We have a wonderfully intelligent conservation commission, which has been responsible for the conservation not only of timber but of all other things which nature affords; and we feel certain that while using some of this timber we can make it useful to civilization, and at the same time afford an opportunity for the trees to produce more timber in a given time than they did under nature, through natural causes, without assistance.

Mr. RANSDELL. May I ask how rapid is the growth of the willow that the Senator speaks of? Is not that a very rapid growth also?

Mr. BROUSSARD. That can be cut down every year and used the following year for paper pulp. The William Boldt

Co. established a mill in my town, which is just completed, just beginning operations now, with the idea of using other things than wood pulp, but knowing that they have an unlimited quantity of raw material if they should fail in that line.

Mr. RANSDELL. Mr. President, I thank the Senator for his remarks. I firmly believe that we are doing a wise thing in encouraging the manufacture of wood pulp in the United States. This is a very low rate of duty which is proposed—only 5 per cent ad valorem—it does not amount to much, and it would encourage our people greatly. Certainly we have to import an immense quantity of paper of every kind and sort, and wood pulp of every kind and sort, from abroad, and if we can impose a reasonable duty like this, which will give from two and a quarter to three million dollars a year in revenue and at the same time will not hurt any industry in the Union, but will greatly encourage many big industries, why not do it? It is along the general principles of this bill. It is both a duty for revenue and for protection, or, for those who do not like the word "protection," then let us say "incidental protection," along with a very considerable revenue.

In my judgment, we ought to encourage the growth of forests in America. If we can believe what the foresters tell us, we will have exhausted our national forests in a very few years if we do not do something to restore them. If we can by this measure encourage people to plant forests, induce them to make all the pulp wood we need, and, incidentally, a great deal of lumber, will we not have acted as statesmen—as wise, far-seeing men?

The people abroad replant their forests. The wise people of France and Germany plant forests. It is said that they produce practically enough timber for their own consumption. I do not know that that is true, but they certainly produce a very large percentage of it. If we could do anything in this country, by legislation or otherwise, to encourage reforestation of the vast area in the Southland of over 50,000,000 acres and a much greater area in other States which has been denuded of forests, we will certainly have acted wisely.

Just a word more. I hold in my hand a page of the New Orleans Daily States of Sunday, July 30, in which there is an intensely interesting article, entitled "Louisiana man is international figure in forest conservation and preservation." It describes in a most vivid and readable way how Mr. Henry Hardtner started his conservation work at the little town of Urania, in the center of the State, and how he was assisted in that work by Mr. Alexander, head of the Louisiana Conservation Commission. Let me say, sirs, that Henry Hardtner and M. L. Alexander are wise, far-seeing men, of whom Louisiana is justly proud. They have been working together for a long time and have succeeded so well that they have set the pace for America. The great Yale University Forestry School has for years been sending its boys to far-away Urania to be taught forestry right on the ground, under the leadership of Henry Hardtner and M. L. Alexander. It is a splendid illustration of what can be done.

Mr. Hardtner is now cutting trees for his mills which were very small when he began this plan 20 to 25 years ago. The State of Louisiana, through the conservation commission, has made special arrangements with him by which he pays only nominal taxes on that land until the trees have attained sufficient size to be cut into timber, and then the lumber is taxed enough to compensate for the exemption.

Following the example set by Mr. Hardtner, the Great Southern Lumber Co. has also been acting vigorously in reforesting its section of Louisiana. We are anxious to encourage these people. We believe they will be encouraged by the passage of this bill and that it will give decided impetus to reforestation throughout the Nation.

Mr. President, I ask leave to publish this article as an appendix to my remarks, in 8-point type, without reading, and I call it to the attention of every Senator, who will find it to be intensely interesting.

There being no objection, the matter referred to was ordered to be printed in the RECORD in 8-point type, as follows:

[From the New Orleans States, Sunday, July 30, 1922.]

LOUISIANA MAN IS INTERNATIONAL FIGURE IN FOREST CONSERVATION AND PRESERVATION—HARDTNER TRACT MODEL PRESERVE—LITTLE TOWN OF URANIA SCENE OF PUBLIC-SPIRITED ENTERPRISE—LOUISIANA TRAINS YALE'S FORESTERS.

"For several years the eyes and thoughts of conservationists, especially foresters, throughout the United States have been directed toward the little town of Urania, in La Salle Parish, La. This village is more widely known than many towns of the State with ten times its population or more, and its fame is based almost entirely on the vision and public spirit of one of its citizens—Henry E. Hardtner.

"With the cooperation of Commissioner M. L. Alexander, of the Louisiana Department of Conservation, Mr. Hardtner has furnished a lesson in forest conservation for the entire country.

"Toward the close of the last century foresighted men began to take alarm at the rapid destruction of the forests of the country. Writers in magazines and public speakers called attention to the danger. But they were addressing a people who had an inherited belief in the inexhaustible timber resources of the country. The facts presented generally fell on the barren soil, but slowly the idea grew that something must be done to replace the waste.

"Finally President Roosevelt called a conference of the governors of States to meet at the White House to consider means for the conservation of the natural resources of the country. By virtue of its personnel this conference attracted attention throughout the country, and the conservation movement received an impetus that has carried it forward until now it has thousands of advocates where less than two decades ago it had a single one.

HISTORY HAS ITS LESSONS.

"It dawned upon the more wide-awake class of people that the forests must be protected. The finger of history pointed at evils that were to follow the continued destruction of the forests, which had proceeded to such an extent that the effect was already visible in the world's greatest and richest valley and in innumerable other smaller valleys throughout the country.

"The Mississippi River reached an elevation this year higher than ever before known, and other streams in various sections in recent years have overflowed their banks, causing great destruction and in cases desolation of the surrounding country. These disasters are directly attributable to the destruction of the forests, which held back the rainfall in former years, permitting the water to enter the streams only in such quantity as could be provided for without overflowing their banks.

"Efforts to restore the forests of this country have just begun, and so far have been isolated. The most conspicuous example in the country is the Urania Forest Reserve, under the direction of Henry E. Hardtner. In Europe forestry has been generally practiced for a century or more, with the result that Europe is approaching restoration of its wooded lands. But, at best, Europe can never become an exporter of lumber. It can never hope to go beyond the point of supplying its own needs.

"The most important trees to be restored are the conifers, or softwoods. In data compiled for the peace conference at Paris it was shown that there are about 2,800,000 acres of forests in temperate regions and 3,000,000,000 acres in the Tropics. Approximately 1,400,000,000 acres of softwoods (needle leaf) are in temperate regions, while the amount in the Tropics is negligible. For purposes of world supply softwood growth is centered in the United States, Canada, Europe, Siberia, and Japan. While there is three times as much hardwood in the world as softwood, the world consumes twice as much softwood as hardwood. It may be held that when the softwood forests are depleted hardwood will take the place of the more acceptable growth. It will, no doubt, to some extent, but softwood can never be fully or acceptably replaced.

SOFTWOOD FORESTS VANISHING.

"The world's softwood forests are rapidly disappearing and the necessity for reproduction has become acute. The forestry problem of the day is to increase the production of softwood timber, because it is far superior to hardwood for most commercial purposes. Europe long ago awoke to the fact, and under the wise practice of forestry there the needle-leaf trees are replacing the broadleafs in nearly all cultivated areas. Although in this country there will be constantly increasing importation of tropical hardwoods to take the place of southern pine, fast becoming scarce, these tropical hardwoods can not be expected to supply the place of pine. No nation may expect to destroy its own forests and hope to economically or satisfactorily supply its needs from other countries. Lumber is so bulky a commodity that its transportation increases the cost enormously.

"There are two prime essentials in the problem of reforestation. First, fires must be prevented, for pines, being highly inflammable, suffer more from fires than any other trees; second, regrowth must be provided for on a scale equal to the annual cut of the mills. Prof. J. W. Toumey, of the Yale forest school, has this to say on the subject of regrowth:

"'The goal toward which this Nation should move is 200,000,000 acres of softwoods fully stocked, protected, and organ-

ized for sustained yield. The goal toward which the South should move is 50,000,000 acres of softwoods, fully stocked, protected, and organized for sustained yield. This movement definitely planned and effectively carried out will assure an annual cut of softwoods 100 years hence at least as large as we cut to-day.'

"America must either grow its softwood timber or, after a few years, do without it. When it is considered that Louisiana is the only State from Virginia to Texas that has even begun the movement toward reforestation, the serious nature of the situation is apparent. The University of Georgia has a forestry school, but that is the only nucleus of the practice of forestry in the vast territory mentioned, a territory that for the last two decades has been drawn upon by the civilized world for its lumber.

COMPARISON IN ACREAGE.

"In her history the United States had nearly one-half of her area in forest growth. The original area of southern pine is placed by the United States Forest Service at 125,000,000 to 130,000,000 acres. Of this area there is left about 20,000,000 acres of virgin timber. Louisiana originally had 11,000,000 acres of pine lands and now has left not much over 2,000,000 acres. The Capper report places the total area of southern pine both of virgin and second growth at 60,000,000 acres. If the South should adopt the program of Professor Toumey, of Yale, she can secure for all time an annual yield of 10,000,000,000 board feet a year, or nearly as much as the present cut.

"It is usually calculated that 100 years is required for the growth of trees of saw-log size. Mr. Hardtner has shown that in Louisiana, under the more favorable conditions of soil and climate, the necessary growth only occupied 35 to 40 years. There is no guesswork about growth on the Urania tracts. Trees are numbered and are measured periodically, so that the rate of growth is known absolutely.

"Five years ago the writer was conducted over experimental tracts by Mr. Hardtner, and was shown on this most important privately owned forest tract in the country that the destruction of the forests has been caused not by the necessities but by the shortsightedness of man. Mr. Hardtner's vast holding around Urania is an object lesson for the whole country in the matter of reforestation. The conservation department of the State has cooperated with him in his public-spirited work, and M. L. Alexander, its chief, was foresighted and broadminded enough a decade ago to enter into a contract on the part of the State with Mr. Hardtner by which his success has been made possible. The attention of the Federal Government was also attracted to his work, and it has assisted him by furnishing experts who demonstrated scientifically the correctness of Mr. Hardtner's theory and practice.

"Years ago lumbermen learned it was unprofitable to mill the smaller trees, but they did not agree as to the limit of profitable size. Economists figured that the loss grew in arithmetical progression every half inch below an 8-inch diameter. Twenty-five years ago, while other lumbermen were cutting the forest bare, Mr. Hardtner reached the conclusion that it was economical to leave trees of 12-inch diameter standing. The result proved the wisdom of the plan, for the tracts so treated have not only been reforested but the trees left standing, having plenty of sunlight, grew three or four times as fast as they had previously grown. His practice showed that land so treated would produce 5,000 feet of lumber per acre every 20 years, or 250 board feet annually, no inconsiderable yield with the present and continually advancing price of lumber.

RAPID GROWTH DEVELOPED.

"Leaving aside the reforestation of the cut-over land, the plan was economical. The growth of the trees has been checked by crowding, and trees over a century old put on rapid growth. One of these trees, when cut down, showed by its annual rings an astonishing and apparently eccentric rate of growth. In the center of the cross section the rings showed each year's growth were so close as to be mere threads. The annual rings developed after thinning out of the trees were broad, showing rapid growth. When the tree was 150 years old, as shown by its rings, its diameter was 9.5 inches. Seventeen years later the diameter was 15.8 inches. In the first 150 years of its existence it had grown 1 inch in 17 years and in its old age it had developed an inch in 2.7 years. The difference in area of cross section was 196 square inches as against 72. In other words, two and three-quarters as much wood was produced in the 17 years of the tree's old age as in the century and one-half of the first period.

"A resurvey of several experimental tracts last week only accentuated the conclusion reached by the visitors five years before. There was still to be noted the difference of growth on areas protected from fire and those burned over annually. Five years ago this difference was apparent only in the number of seedlings left on each plot. Now the same difference is even more apparent, and the rate of growth of the two plots is striking.

"The protected plot is thick in growth of trees 7 feet high, while in the plot exposed to fire only an occasional 2-foot tree is seen, showing that even the few trees that survived the fire were stunted in their growth.

"The older growths in the plots that were protected from fire 20 years ago, and when cut over were left with some trees to reseed the land, showed well-grown trees, some of them nearly ready for the saw, while others had attained great height and considerable diameter of bole. In one plot can be seen side by side the difference in the rate of growth between trees crowded together by nature and those thinned out by man. The thinned area, with one-half the number of trees, showed double the number of cubic feet of timber area.

"The John M. Parker tract along the Pelican Highway is a demonstration of the natural reforestation of the pine woods when a few seed trees are left standing. The tract is growing up in vigorous young long-leaf pines. The only attention paid it is the guarding against fires and fencing against hogs. The growth along the highway outside the fences on both sides and that within the inclosure are striking examples of the truth of the theory advanced by Mr. Hardtner six or eight years ago, and since proved by a demonstration, that long-leaf pine would not reproduce where hogs were allowed to roam.

HOG PROVES AN ENEMY.

"The hog is the all-sufficient reason for the 'second-growth pine' throughout the South being short leaf or 'loblolly.' On the highway, alongside the John M. Parker tract, there is a dense growth of worthless scrub oak, but no pines. A foot or so distant on the other side of the seedling of the long-leaf pine that grew outside the inclosure were eaten by hogs, while those within the fenced area could not be reached. The hog eats the root of the long-leaf pine because it is fleshy and sweet, while the bitter root of the short-leaf and loblolly are left untouched.

"The most striking feature of the 70,000 acres of the Urania Co.'s holdings is that there is no idle land. What is not planted in agricultural crops is growing trees. There is probably no land of equal extent in the United States of which every acre is producing some form of wealth. The desolation often seen on cut-over lands throughout the South is visible nowhere. Freshly cut-over tracts have sufficient standing trees to lend color to the scene, and the prevention of fires allows a thick carpet of grazing grass everywhere.

"Considering the success that Mr. Hardtner has had in perpetuating forest growth and his standing throughout the country as a forest conservationist, it is not astonishing that some years ago Yale University established on his land a summer school of forestry for its graduating class, distant though the spot is from the seat of learning. Here the youth of the university may study forestry in the woods, the proper spot for such study; and, moreover, they can study reforestation and forest conservation in the best-conducted reservation within the limits of the country.

"Similar considerations induced the department of conservation of Louisiana to hold the present year's session of the summer forestry school it organized and is conducting in conjunction with the Louisiana State University in a beech grove, in the game-reserve section of the forest, where roam herds of elk and Louisiana deer, and where all forms of wild life find safe refuge.

"Under giant beech trees bordering a little creek have been pitched 13 large tents, 10 of them for sleeping quarters and 3 for administration purposes and storerooms. A short distance away, along a path in the woods, is a large mess hall and kitchen, well screened against insects, and provided with all the appurtenances of an up-to-date eating house. The 10 sleeping tents will house comfortably 8 persons each, while the mess hall will accommodate all of the campers at one time.

SCHOOL HAS DOUBLE MISSION.

"The department of conservation had a twofold purpose in the establishment of this school, the first of its kind in the country. In the first place it recognized the need of educating its own rangers in forestry work, it being impossible in selecting these rangers to secure in all cases educated foresters. In the second place there was the need of educating the youth of the State in forestry, that the conservation movement, so auspiciously begun, might be continued indefinitely. Mr. Alexander recognized also that to interest the youth of the State in forestry meant the gathering of the older generation into the fold,

for the parent naturally takes interest in that which interests his child.

"The forest school opened this summer with 65 students in attendance on a site lent to the school by Mr. Hardtner and situated near the site of the Yale school. The school was established in the summer of 1921, with 25 students, and was the first forestry practice school ever conducted in the South. The fact that its attendance more than doubled in a single year gives promise of satisfactory growth and an increasing interest in forestry in consequence.

"The present session began June 19 and closed yesterday. The curriculum was composed of four courses: One advanced course for college students, a course for high-school graduates and college students, a high-school course, and a ranger's course.

"Every Wednesday afternoon lectures were delivered to the students by forestry experts or prominent citizens from all parts of the State on the subject of conservation. The students have been enthusiastic in their work, and it is believed that the establishment of this educational institute will be of great benefit in furthering the forestry movement throughout the State."

Mr. LODGE. Mr. President, as the hour is late, I have no intention of delaying the Senate beyond a few moments. I do not propose to go over all the details and figures of this question of wood pulp, which have been very thoroughly covered by the Senator from Maine and other Senators.

I approached this question with my opinion very much against the continuance of the duty. I believed that wood pulp was a great source of forest destruction, and I was not willing to vote for anything that would stimulate the destruction of our forests. I took the matter up in that sense with the Finance Committee, and I found that they took a different view and that they thought it wise that there should be a small duty placed on chemical wood pulp.

That led me to look into the question. It is not one affecting my own State. In my own State I suppose the opinions of those interested in it are against the position I take, but I could not escape the convictions which came to me when I examined into the subject.

The first thing which interested me was the effect of a duty in helping in the destruction of the forests. I found that all the pulp that was used, both mechanical and chemical, consumed about 3 per cent of the annual cut in this country. I am sorry to differ with my friend from Ohio [Mr. POMERENE] in anything, but I can not believe that 3 per cent is larger than 97 per cent, or that the 97 per cent is not that portion of the cut which is fatal to the American forests.

I was surprised, I confess, to find how small it was. But I also discovered that the comparatively small extent of the cut rose from the fact that wood pulp was made to a very large extent from the waste of the sawmills and the natural wastes of the forests. I also found, wherever I inquired, that the makers of chemical wood pulp were engaged in preserving their forests, because it was their absolute means of subsistence; that they were engaged in reforestation, or in the preservation of the forests by selective and scientific cutting. That, I know, is especially the case of the Great Northern Co. in Maine, and I found the same condition in a very small mill in my State, the only one we have, I think, which is purely a pulp mill.

Having proceeded as far as that, it seemed to me that there was no reason why a legitimate industry should be extinguished. I quite agree with the Senator from Montana [Mr. WALSH] that where the final, finished product is free, the manufacturers have a right to demand that their basic material shall also be free, which I think is very well illustrated in the case of hides, and the newsprint manufacturers no doubt would have a good claim that the pulp they use should be free, if they chose to assert it, because their finished product is on the free list. I can not find that the demand for free wood pulp comes from the newsprint manufacturers. It comes from those who use newsprint, which is a different proposition economically.

The wood pulp is largely made by mills which are also conversion mills, which use it for newsprint or other papers, and a large part of the hostility to the duty on wood pulp, I think, comes from a very natural feeling that the mill which makes its own pulp, and is also a conversion mill, has some advantage. Whatever a tariff is intended to be, it certainly is not intended to regulate competition between American industries.

The last source of objection is from the people who use wood pulp who are not manufacturers of newsprint, which is on the free list, where we are very glad to put it, and very glad to keep it. Those are the makers of all sorts of paper other than newsprint. My State is one of the leading States in the production of paper, and there are many mills in Massachusetts. All that is made in those mills is protected, and properly so, in my judgment, as a protectionist. I have been very glad to support the protection for those mills, but I can not help having the feeling—in fact, it has been a conviction with me for many years—that those who are protected in their own highest finished product ought to be willing to let the basic material which comes into their mill, and which is some other man's finished product, have protection also.

It seems to me, after a consideration of the general conditions, that the manufacture of wood pulp is a thoroughly legitimate business, employing some 70,000 men, I believe. The duty asked is very moderate. I do not think it will be hurtful to any of the makers of paper, and I think the business ought to be preserved and not extinguished.

I have been informed, I think with perfect correctness, that if this question were referred to the Tariff Commission and a comparison were made between the Swedish wood pulp, for example, and ours, the Tariff Commission, or any scientific board which examined it, and examined into the costs, would say that our wood pulp, if there was to be any protection of American industries, would be entitled to about 15 per cent, instead of 5. Five per cent is all that is asked. It seems to me moderate; the industry seems to me a legitimate one, and it seems to me that this is in accordance with all the principles of protection, and although I know very well that perhaps the other view is the more popular one, and what the feeling is in many States, including my own, I can not with any sense of justice oppose this moderate duty on wood pulp, and I shall therefore give my vote to it.

Mr. LENROOT. Mr. President, I want to say just a word in explanation of the vote I shall cast on this amendment. I have been very greatly troubled, in coming to a conclusion upon this subject, by a consideration of forest preservation. The Tariff Commission has reported that the difference in cost of production of this pulp between Canada and the United States is greater than the duty proposed, and is certainly very much greater between the United States and European countries, which are now importing in large quantities. It seems to me the only question for any Republican, at least, to ask himself is whether or not the imposition of the duty, although it is not as great as is the difference in the cost of production, will tend more rapidly to devastate our own forests.

But, Mr. President, when we come to a consideration of that question it seems to me we can not stop with chemical pulp if that principle is to control our action. Chemical pulp is not a raw material. Pulp wood is imported in large quantities into this country. Chemical pulp is a highly intricate process of advanced manufacture. If we are to say that chemical pulp shall be admitted free of duty upon the ground of conservation of our forests, must we not also logically say that all kinds of paper shall likewise be admitted free of duty, and for the same reason? Can we stop there? If that is to be the controlling principle, must we not say that all furniture shall be admitted into this country free of duty because it will tend to conserve our forests? Where are we going to stop if that is to be the principle which controls our action?

Mr. WALSH of Montana. Mr. President——

Mr. LENROOT. I yield to the Senator from Montana.

Mr. WALSH of Montana. I have not been able quite to understand the question which the Senator is now presenting. We will assume that the manufacturers of the high-class paper get all of their pulp abroad. What difference does it make, so far as conservation of our timber is concerned, whether there is a duty on their product or not?

Mr. LENROOT. The Senator makes an impossible assumption.

Mr. WALSH of Montana. Let us assume the other thing, then—that they do not.

Mr. LENROOT. Then, just so far as they do not, they use our own forests, do they not?

Mr. WALSH of Montana. Undoubtedly.

Mr. LENROOT. And if the controlling principle is to conserve our forests, then, if we let all paper come in free, we will conserve our forests just to that extent.

Mr. WALSH of Montana. But if we let all paper in free our forests would be devastated in some other manner anyway. That would not meet the situation entirely.

Mr. LENROOT. But the Senator is making a strong argument that the admission of chemical pulp free does tend to conserve our own forests. Now, I say if that is to be the controlling principle, the admission of all papers free would also and likewise and for the same reason tend further to conserve our forests.

Mr. WALSH of Montana. Only in a very remote degree, however.

Mr. LENROOT. I do not know, nor do I care to argue the question of the remoteness of the degree.

Mr. SMOOT. It could not be any more remote than the amount of paper made out of wood, if we go to that extent. Of course, if it is made of rags, that is another question.

Mr. LENROOT. To my mind there is a very clear distinction, so far as conservation of our forests is concerned, between the pulp wood or timber of which pulp may be made and lumber. The wood from which pulp is made attains a growth in from 15 to 20 or 25 years, while the timber from which lumber is made requires anywhere from 50 to 100 years.

In the matter of the conservation of our forests, a subject in which I am very keenly interested, the fact is that it is exceedingly difficult for Americans to look ahead 50 or 100 years, looking toward the conservation of our forests, while the time is at hand where, as a business proposition, corporations will look ahead 15 or 20 years. So there is very much more opportunity and very much more likelihood of forest conservation of the product that can mature in from 15 to 20 years than of the product which requires from 50 to 100 years to mature.

Upon the question of forest conservation I think this is a matter which should be considered. If all of our pulp mills are to remove to Canada, so that Canada or Sweden or Finland or Norway is to be looked upon to produce all of the pulp that is used in the United States, we must look forward to the time when Canada will face a timber shortage exactly as the United States faces it to-day. The only remedy, the only hope for the future of America in the use of wood, is the conservation of our own forests.

Mr. SMOOT. Even to-day, in at least two of the Provinces of Canada, they are facing that very situation.

Mr. LENROOT. If all of our pulp mills are to remove to Canada, what can we look for in the conservation of our own forests, in reforestation, in growing this class of wood, if we have not any mills here to offer any inducement to Americans to conserve our own forests and do reforesting?

So, Mr. President, from the standpoint of reforestation, from the standpoint of conservation of our forests, I think that upon this particular product which may mature in 20 years or less we are really and truly conserving our own forests by providing a moderate duty such as is here proposed, which will give some incentive and some inducement to our own manufacturers to conserve and reforest in the United States so that we may have a permanent supply.

The Tariff Commission reports that that is the attitude of the American Paper & Pulp Association now. On page 32 of their survey they say:

> (4) The course that is most approved by the trade, as represented by the American Paper & Pulp Association, is that of continuing to operate in the present location and of securing a permanent supply of pulp wood through the practice of scientific forestry and reforestation.

That can not be done unless there is an incentive for these people to maintain their establishments here in the United States and induce them to enter upon the practice of forest conservation and reforestation.

I appreciate the opposition of most of the newspapers and I well realize the force of that opposition, but here is a proposition that is fairly established that there is a difference in the cost of production greater than the duty proposed. If it be admitted that it is in the interest of permanent forests in this country and a permanent supply of wood that the pulp mills shall continue to exist in America, then it seems to me as a Republican, as a protectionist, as one who does not wish to discriminate either in favor of or against any industry, but upon sound principles of protection, that the committee was fully justified in the amendment proposed.

Mr. WALSH of Montana. Mr. President, before the Senator takes his seat I should like to ask him a question. I should like to understand, on the matter of principle involved, if he assumed that the American pulp manufacturers were now making a fair profit upon their product, whether the Senator would still insist upon levying a tariff?

Mr. LENROOT. No, I would say, if they were making a fair profit; but I happen to know that mills in my own State are closed down. I know that mills in my State making chemical pulp are not making any profit at all. That is not a matter of assumption; it is a matter of fact.

Mr. WALSH of Montana. Of course, the Senator may know that, but the Senate is obliged to know the situation generally and to know all the facts, if it is to act intelligently.

Mr. LENROOT. What information has the Senator that the pulp mills are making any profits?

Mr. WALSH of Montana. I have only the Tariff Commission report.

Mr. LENROOT. As of what date?

Mr. WALSH of Montana. Nineteen hundred and twenty-one.

Mr. LENROOT. The importations have increased.

Mr. WALSH of Montana. I called attention a moment ago to the fact that the importations for 1922 are less than they were for 1921.

Mr. LENROOT. That may be, but they have increased in proportion to the total consumption. Our domestic production has increased in greater proportion than the imports have increased.

Mr. WALSH of Montana. The Tariff Commission gives us this information, which I shall be obliged to offset against the statement of the Senator from Wisconsin:

> The average cost of production of wood pulp in Canada is considerably less than in the United States. In 1915 the average cost for ground wood was 23.9 per cent lower and sulphite 14.6 per cent lower. In 1916 the percentages were 23.5 and 19.2, respectively. In spite of this difference in cost, Canadian competition is not at present a serious menace to American producers. This is because the strong demand maintains the price at a figure sufficient to give the American producers a profit, though, of course, the Canadian producer makes a greater profit.

Mr. LENROOT. Will the Senator give me the date of the report from which he is quoting?

Mr. WALSH of Montana. Nineteen hundred and twenty-one.

Mr. LENROOT. But what date in 1921? I think if the Senator will investigate, he will find that the report was made in 1921, but that it covers a time previous. So far as the investigation made is concerned, it could not have been with reference to the situation now. It could not have been with reference to the situation in the latter part of 1921, because the Senator must know that the demand was not such as that during the time stated in the report.

Mr. WALSH of Montana. I am able to give the Senator some information on the matter.

Mr. LENROOT. I am informed by the Senator from Utah [Mr. SMOOT] that the report gives the business of 1920.

Mr. WALSH of Montana. I was going to call the attention of the Senator to the fact that the report gives us statistics for the month of March, 1921.

Mr. SMOOT. That is, as to importations.

Mr. WALSH of Montana. No; it gives statistics concerning March, 1921, so that the report must necessarily have been made at some time later than March, 1921.

Mr. SMOOT. The business spoken of must have taken place in March, 1921. They could not write a report until after the business had taken place.

Mr. WALSH of Montana. Of course, if such an important matter as this report of the Tariff Commission is regarded as worthless and a mere statement of a Senator upon the floor that mills in his State are not making a profit is to displace it, I do not see why we want the Tariff Commission report.

Mr. LENROOT. I insist there is nothing in the report to substantiate the Senator's statement, because the last year they give as to the difference in the cost of production is 1916.

Mr. SMOOT. And the mills of the Senator's State were not closed down in 1920.

Mr. LENROOT. They were not, nor were they closed down for six months in 1921.

Mr. WALSH of Montana. No. It is quite likely, because the early part of 1921 the price of print paper was out of the reach of any ordinary institution of the country.

Mr. SMOOT. That is what the Tariff Commission reports, and the very fact that there was such a demand for it made it possible to keep the mills running in this country.

Mr. LENROOT. I think the Senator from Montana must agree with me that the situation which he quoted, that the strong demand maintained the price, is not true to-day. He must know there is no such demand to-day as there was a year and a half ago.

Mr. WALSH of Montana. Why is there not?

Mr. LENROOT. Because of the general depression.

Mr. WALSH of Montana. Exactly, the general depression. The general depression exists in Canada just as it does here.

Mr. LENROOT. But the commission reported that it was the strong demand that kept up the price. When that demand goes down, of course it must follow that the price is not kept up because of the strong demand, and the difference in the cost of production applies.

Mr. WALSH of Montana. Oh, Mr. President, the Tariff Commission was not reporting about the condition that existed just at that particular time or in that particular year. The commission was reporting upon the general condition that exists from year to year. They were not speaking about the specific conditions that existed at that particular time, because, Mr. President, they look to the future; they are advising the Congress of the United States with respect to this matter as a guide for legislation which is to take effect in the future.

They tell us not the particular condition which existed at that time, but generally that the demand for print paper is very great, and that it is increasing by such leaps and bounds that the demand is sure to go.

Reference is made in their report to the fact that in 1895 the average consumption in the United States was something like 50 pounds while to-day it is 125 pounds. The demand is constantly increasing. It is idle to imagine that the present depression is going permanently to affect the consumption. Beyond a doubt the consumption is going to grow in the future as it has in the past.

Mr. LENROOT. Does the Senator from Montana want the Senate to understand that either he or the Senate would accept the statement that there is a strong demand to-day that keeps up the price, because the Tariff Commission says so, when he and I know that there is no such demand?

Mr. WALSH of Montana. I do not know that there is not a strong demand. I know there is a strong demand.

Mr. LENROOT. Then, I can not argue with the Senator.

Mr. WALSH of Montana. I know that the demand is not so great as it was in 1920, but the demand for paper and the consumption of paper continues and is increasing. Everybody knows that the demand is great.

Mr. LENROOT. I do not know of a plant in the United States producing wood pulp which is to-day running to capacity. Does the Senator from Montana think there are any such?

Mr. WALSH of Montana. I have no information one way or the other as to that, and I have not been able to secure any to-day.

I want to supplement what has been said by saying in this connection that the Tariff Commission with respect to the particular matter under consideration is giving not only its own conclusions, and not with respect to the particular condition that existed at the time the report was made, but it is giving us the conclusions of the Federal Trade Commission, which made an exhaustive inquiry into this matter stretching over a period of years, and upon the conclusions of the Federal Trade Commission concerning this matter the Tariff Commission states that the constantly increasing demand in this country gives the American producer a fair profit without any tariff at all.

Mr. LENROOT. Mr. President, I was a member of the Commission on Agricultural Inquiry. Our commission could have taken figures year after year, and if we had stopped at a certain point, we could have shown that the farmer was fairly prosperous during certain years. In 1919 and 1920 there was a strong demand for everything which the farmer produced. When, however, we brought our information down to date, we found that the farmer was worse off than he had been in all his history. Certainly the Senate must take into account existing conditions. Indeed, Mr. President, that is one reason for revising the tariff at all. Must we not take into consideration conditions exactly as they exist? Must we assume that conditions are normal when they are not normal? Apparently the Senator from Montana would so assume, I am very frank to say, that, if we had normal conditions, we would have a very different tariff bill here.

The rates might be very much lower; I know they would be very much lower in many cases if we had normal conditions here and abroad; but in considering these rates we ought to consider conditions as they exist to-day, and that is what I have been trying to do in this discussion.

Mr. HALE. Mr. President——

Mr. LENROOT. I yield to the Senator from Maine.

Mr. HALE. I have here the figures for the first five months of this year showing the importations of chemical wood pulp into this country. For the month of January they were 95,636 tons; for February they were 66,441 tons; for March they were 48,376 tons; for April they were 65,144 tons; for May they were 51,657 tons; aggregating for the five months 327,254 tons. If the importations shall continue at the same rate for the remaining months of the year, they will aggregate 760,000 tons. That is almost 100,000 tons more than has ever before been imported into this country.

Mr. SPENCER. Will the Senator from Maine yield for a question?

Mr. HALE. Yes.

Mr. SPENCER. What relation does that bear to the amount of pulp which is manufactured in the United States?

Mr. HALE. I do not know what the domestic production of pulp was for those five months.

Mr. SPENCER. I mean generally what is the annual amount of chemical pulp manufactured in the United States?

Mr. LENROOT. It is 1,700,000 tons.

Mr. HALE. Those figures represent the production in an exceptionally high year, but the importations are less than one-third of the domestic production. I may say the statement I have made is gathered from information taken from the Monthly Summary of Foreign Commerce, which is issued by the Department of Commerce. I ask that the tables may be inserted in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

Imports of chemical wood pulp for the month of January, 1922.

[From the Monthly Summary of Foreign Commerce, issued by the Department of Commerce.]

	Short tons.	
Unbleached sulphate	24,527	
Unbleached sulphite	44,675	
		69,202
Imported from:		
Norway	1,353	
Sweden	37,830	
Canada	23,352	
Other countries	6,667	
	69,202	
Bleached sulphate	1,586	
Bleached sulphite	24,848	
		26,434
Imported from:		
Norway	5,513	
Sweden	2,727	
Canada	10,878	
Other countries	7,316	
	26,434	
Total		95,636

Imports of chemical wood pulp for the month of February, 1922.

[From the Monthly Summary of Foreign Commerce, issued by the Department of Commerce.]

	Short tons.	
Unbleached sulphate	19,042	
Unbleached sulphite	32,954	
		51,996
Imported from:		
Norway	2,055	
Sweden	25,931	
Canada	20,982	
Other countries	3,028	
	51,996	
Bleached sulphate	258	
Bleached sulphite	14,187	
		14,445
Imported from:		
Norway	4,845	
Sweden	2,329	
Canada	6,813	
Other countries	458	
	14,445	
Total		66,441

Imports of chemical wood pulp for the month of March, 1922.

[From the Monthly Summary of Foreign Commerce, issued by the Department of Commerce.]

	Short tons.	
Unbleached sulphate	14,548	
Unbleached sulphite	20,153	
		34,701
Imported from:		
Canada	22,873	
Europe	11,828	
Bleached sulphate	197	
Bleached sulphite	13,478	
		13,675
Imported from:		
Canada	9,746	
Europe	3,929	
Total		48,376

Imports of chemical wood pulp for the month of April, 1922.

[From the Monthly Summary of Foreign Commerce, issued by the Department of Commerce.]

	Short tons.	
Unbleached sulphate	17,530	
Unbleached sulphite	28,660	
		46,190

Sweden	1,240	
Canada	9,856	
Other countries	169	
	15,703	
Total		51,657

Mr. WILLIS. Mr. President, the inquiry has developed just now as it did yesterday as to the facts concerning the amount of pulp produced in this country, the amount consumed by the mills that manufacture pulp, and the amount which is sold to converting mills. I believe that those facts are of some importance, and I have taken the pains to prepare some data in reference to them. I ask unanimous consent that they may be inserted in the RECORD at this point.

The PRESIDENT pro tempore. Without objection, it will be so ordered.

The matter is as follows:

There are 838 paper mills and 323 pulp-paper mills in the United States. There are less than 10 chemical-pulp mills of small tonnage that do not make paper. All the other pulp mills are essentially paper mills that make pulp for their own consumption and whose surplus, when there is any, is available to converting mills.

	Tons of chemical pulp produced in United States.	Consumed by mills manufacturing pulp.		Sold to converting paper mills.	
		Tons.	Per cent.	Tons.	Per cent.
1917	1,912,502	1,323,811	70	569,750	30
1918	1,896,047	1,312,027	69	595,138	31
1919	1,925,066	1,288,670	67	626,820	33
1920	2,221,535	1,510,470	68	708,009	32
1921	1,526,357	1,114,615	73	407,981	27

(Figures given are taken from Federal Trade Commission summaries.)

As indicated above, approximately 70 per cent of the total pulp production in the United States is made by and for the consumption of the domestic mills which produce said pulp.

The converting paper mills, which use about 45 per cent of the total chemical pulp consumed in the United States, are, therefore, absolutely dependent on foreign sources for about one-half of their supply.

Pulp consumed in the United States.

	By paper mills making pulp.		By paper mills who buy pulp.	
	Tons.	Per cent of total United States consumption.	Tons.	Per cent of total United States consumption.
1917	1,323,811	58	968,119	42
1918	1,312,027	57	987,829	43
1919	1,288,670	55	1,060,627	45
1920	1,510,470	52	1,381,570	48
1921	1,114,615	55	915,452	45

Pulp consumed by paper mills who buy pulp.

	Bought from domestic mills.		Bought from foreign mills.	
	Tons.	Per cent	Tons.	Per cent.
1917	569,750	59	398,369	41
1918	595,138	60	392,691	40
1919	626,820	59	433,807	41
1920	708,009	51	673,561	49
1921	407,981	45	507,471	55

(Figures given are taken from the Federal Trade Commission summaries and Department of Commerce reports.)

If the above comparisons were limited to chemical pulp, "exclusive of news grade sulphite and soda pulp, which are not imported into this country," it would be found that—

(a) Approximately 60 per cent of the total production in the United States is made solely for the consumption of the establishments which produce said pulp.

(b) The converting paper mills, which use about 60 per cent of these chemical pulps consumed in the United States, are, therefore, absolutely dependent on foreign sources for more than one-half of their supply.

The inevitable result, therefore, of the proposed duty on pulp would be to give to those mills which manufacture both pulp and paper an unfair advantage over the converting mills. Since approximately only 27 per cent of the pulp produced in the United States is available for sale to converting mills, while 73 per cent is made into paper by the very mills that produce the pulp, a duty on imported pulp would inevitably tend to give to one class of paper mills an unfair control over the supply of raw material used by their competitors.

Mr. WALSH of Massachusetts. Mr. President, aside from the interest which the consumers of paper have in this amendment, I find that there are three classes of the paper industry interested: First, the domestic manufacturers of chemical wood pulp, few in number; second, the manufacturers of paper who also manufacture their own chemical wood pulp; and, third, the manufacturers of paper who have to buy in the open market the chemical wood pulp which they need.

The manufacturers of paper who produce their own chemical pulp have a distinct advantage over the manufacturers of paper who do not produce their own chemical pulp. Thus it is apparent that these two branches of the paper industry are competing at a considerable disadvantage to the latter. It is proposed by this committee amendment to add to that disadvantage by providing a duty of 5 per cent upon the chemical pulp which they must buy either by importations into this country or at an increase in cost, if they can get it from the domestic wood-pulp manufacturers.

Information which I have from the manufacturers of paper in my State is to the effect that this duty will seriously interfere with the progress of their business. I do not know that I can state their position better than by quoting from a statement recently made by one of the leading manufacturers of my State. He says:

Sufficient prime-bleached sulphite is not obtainable in United States converting mills. Pulp taken as a whole—ground wood, soda kraft, and second and third rate sulphite, bleached—might be obtained, but 80 per cent of Massachusetts mills want prime bleached sulphite and can not get it in the domestic market. We are offered lower grades, not consumed by those pulp mills making paper competing with us, * * * but can not make our high grades of paper from such stuff. We must buy in Canada fully half our needs.

In other words, the independent manufacturers of paper must go into the foreign market to buy their chemical pulp, and of course pay the foreign price plus the duty. There is not a sufficient amount of chemical pulp produced in this country to meet the demands of the manufacturers of paper. It does not seem to me that the levying of this duty can be justified, in view of that situation. These manufacturers ought to be allowed to buy their chemical pulp without any extra cost. There is not a situation here where the domestic pulp industry can grow to such an extent that it can take care of the domestic demand; it is admitted it does not and that it can not take care of the demand. It seems to me that is simply permitting those industries which are manufacturing paper and which supply themselves with their own chemical pulp to increase their prices for paper and increase their profits so that they can compete more favorably with the paper mills that do not make their own pulp, and these mills constitute the largest part of the paper industry. In addition, the Senator from Ohio [Mr. POMERENE] very properly suggests to me, the greater the efforts of the domestic pulp manufacturers to meet the domestic demand the more they will deplete our forests.

There is another factor which I brought out in this debate and admitted by the Senator from Maine, namely, that the chemical wood pulp produced in this country does not meet the demands and requirements in quality of certain of our paper manufacturers. Why should these industries that must import this product be penalized? I read extracts from two letters sent me by two establishments, one the largest manufacturer of high-class paper in the country, and the other one of the most reputable and best-known paper concerns in the country, and they both state that they are absolutely obliged to go into foreign markets to get their chemical wood pulp—what they need is not obtainable in America.

We are once more confronted with the situation which has faced us again and again and constitutes a serious drawback to this tariff legislation—we are again adding duties upon the materials which go into the finished product of our manufacturers; we are again piling up duties to impair and restrict the paper manufacturers from producing at reasonable costs. One of the letters which I have received called attention to the fact that we were doing considerable of an export business in the sale of high-class paper manufactured in this country. The pro-

posed duty, they assert, will help to increase the price of our paper and will tend to injure our foreign market.

Mr. WALSH of Montana. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator.

Mr. WALSH of Montana. Let me say to the Senator that we are doing a very substantial export business in practically every line of paper manufacture.

Mr. WALSH of Massachusetts. I am very glad to have the Senator confirm what I have said. I have not had the time to review the figures; but I knew that we were doing quite an export business in the higher grades of paper. I am glad to know we are doing an export business in all grades of paper.

Mr. WALSH of Montana. And, of course, that trade will be embarrassed by the imposition of this duty upon the chemical wood pulp.

Mr. POMERENE. Mr. President, would it interfere with the Senator if I should read a paragraph or two from a letter?

Mr. WALSH of Massachusetts. I shall be glad to have the Senator do so.

Mr. POMERENE. I was very greatly surprised a little while ago to have the distinguished Senator from Massachusetts [Mr. LODGE] and perhaps some others say that there was little or no opposition to this duty on the part of the newspapers. I have here a letter under date of June 16, 1922, from Mr. W. F. Wiley, the general manager of the Cincinnati Enquirer, which is recognized as one of the great newspapers of the country; and only two paragraphs will I read:

> The newspapers of America unanimously oppose the imposition of the 5 per cent duty on chemical wood pulp.
>
> Pulp, as you know, at present comes into the United States without duty thereon. With the proposed measure enacted into law, the cost of newsprint will be very materially increased in a period when publishers generally are attempting to reduce costs.

Mr. WALSH of Massachusetts. Mr. President, I want to call attention to the fact that the protests against this duty that have come to me have come from an exceptionally conservative class of citizens in my State. Nearly all of them have declared their belief in the principle of protection, and are in favor of reasonable protection that can be justified; but they point out that this duty is not justified under the circumstances. They call attention to the fact that five times as many persons are employed in these converting mills, that do not make their own chemical pulp, as compared with the pulp mills. The larger branch of the industries of the country manufacturing paper are very strongly opposed to this duty. They do not hesitate to declare that it will injure them and not expand the pulp industry, which does not supply the demand.

I do not believe we should levy a duty that is certain to add further to the very serious handicap which a large group of our paper manufacturers now experience by reason of the fact that they must compete with paper manufacturers who make their own chemical pulp, and I shall vote against the proposed duty.

Mr. President, I send to the desk a letter, which I ask to have read, from a leading citizen of Massachusetts, Mr. John T. Wheelwright, whose family have been engaged in the manufacture of paper for years. He expresses very clearly and very directly the opposition of the paper manufacturers. I will ask to have the letter read from the desk, and then I will ask that other letters and telegrams which I have here may be inserted in the RECORD.

The PRESIDENT pro tempore. Is there objection?

Mr. SMOOT. Mr. President, I have no objection to the reading of the letter, but at this time I desire to ask unanimous consent that when the Senate closes its session to-day it recess until 11 o'clock to-morrow.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah? The Chair hears none, and it is so ordered. Without objection, the Secretary will read the letter referred to by the Senator from Massachusetts.

The Assistant Secretary read as follows:

MAY 3, 1922.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR WALSH: The proposed changes in the tariff, so far as they affect the manufacturers of paper, impose burdens upon them by duties upon the materials which they must use greater than the burdens of the existing tariff. These increases affect all paper makers wherever situated, including the manufacturers of "standard newsprint paper," which both the Senate and the House bills put upon the free list, and, as shown in the tabulation hereto annexed, add burdens which must necessarily increase the cost of manufacturing paper and therefore its cost to the consumer.

A duty of 5 per cent ad valorem has been placed by the Senate upon chemical wood pulp, though the House has placed this article upon the free list. It has for a long while been considered wise not to put a duty on chemical wood pulp for the reasons that, owing to its failing resources of wood, this country can not supply the demand, and that pulp must be imported, whether from Canada or Europe, and that importations of pulp will of necessity continue in order to conserve our own rapidly diminishing supply of pulp wood. These broad general considerations doubtless led the House to retain chemical wood pulp upon the free list, and the Senate Finance Committee put the duty of 5 per cent ad valorem on this article in order to recognize in their tariff a manufacturing industry.

But it must be remembered that many of the mills converting old papers, thus conserving waste material and making it into paper, have no pulp mills, and must buy such chemical pulp as they need in the open market. Many other paper mills have pulp mills of their own, and the natural advantage which they possess over the converting mills is obvious. It does not seem proper to enhance this natural advantage by a duty on chemical wood pulp, for it is not claimed that any such duty is necessary for the protection or prosperity of the chemical pulp makers. If, however, any duty is put upon chemical wood pulp it should be a very small specific duty.

The paper makers have never been to Congress asking a high protective tariff. Indeed, when the last tariff was framed representatives of the printing-paper manufacturers informed those making the tariff that they were far more anxious to have the duties which enhanced the cost of their products removed or reduced than they were to have a large tariff upon the finished articles, since modern conditions pointed to the necessity of establishing foreign markets for their products, and that therefore low costs of production were essential to prosperity. Foreign markets have been established during the last 10 or 15 years for American paper.

Yours respectfully, JOHN T. WHEELWRIGHT.

PROPOSED ADVANCES IN TARIFF RATES ON MATERIALS.

The rates of the existing tariff upon colors and dyes are substantially increased by both House and Senate reports, the present rates being in section 52 of the present tariff: Blue, 15 per cent; 53 blacks, etc., 5 per cent; 54 chromes, yellow, green, etc., 10 per cent; ochres, 20 per cent; browns and reds, 10 per cent. The House, in dealing with the question of colors and dyes, put upon all colors, dyes, etc., a duty of 35 per cent ad valorem and 7 cents per pound, while the Senate in dealing with the subject increased the 35 per cent to 60 per cent, leaving on the 7 cents per pound. The Senate further puts other restrictions on the importation of these articles. The embargo on the importation of such articles was not renewed at its expiration in November, 1921.

On all the principal chemicals used in paper making the rates and suggested rates are as follows:

	Existing rate.	House.	Senate.
Soda ash	¼ cent per pound	¼ cent per pound	¼ cent per pound.
Bleaching powder	1/20 cent per pound.	⅓ cent per pound	⅓ cent per pound.
Caustic soda	¼ cent per pound	¼ cent per pound	¼ cent per pound.
China clay (kaolin)	$1.25 per ton	$2.50 per ton	$2.50 per ton.
Woven wires	15 per cent	According to mesh, 20 per cent, 30 per cent, 40 per cent, ad valorem.	According to mesh, 25 per cent, 40 per cent, 45 per cent, ad valorem.
Paper makers' felts	35 per cent		

Woven fabrics, House paragraph 1109, according to their value per pound, valued at not more than 75 cents a pound, 20 cents a pound and 18 per cent ad valorem; valued at more than 75 cents a pound but not more than $1.25, 25 cents a pound and in addition thereto 21 per cent ad valorem; valued at more than $1.25 but not more than $2.50, 30 cents a pound and in addition thereto 24 per cent ad valorem; valued at more than $2.50, 36 cents a pound and in addition thereto 27½ per cent ad valorem.

Senate: Valued at not more than 60 cents, 26 cents a pound and 40 per cent ad valorem; more than 60 cents but not more than 80 cents, 40 cents a pound and 50 per cent ad valorem; valued at 80 cents but not more than $1.50, 49 cents a pound and 50 per cent ad valorem; valued at more than $1.50, 49 cents a pound and 55 per cent ad valorem.

Wood, existing tariff: Logs, timber, hewn and sawed; sided or squared, pulp wood, boards, planks, deals, and other lumber not further manufactured than sawed, planed, or tongued and grooved, clapboards, laths, pickets, palings, staves, shingles—free.

House paragraph 401. Timber: Hewn, sided, squared otherwise than by sawing (not less than 2 inches square) and round timber used for spars or in building wharves, one-half of 1 cent per cubic foot.

House paragraph 402. Logs of spruce, cedar, or western hemlock, $1 per thousand feet, board measure.

Paragraph 407. Pickets, palings, props, and staves of wood of all kinds, 10 per cent ad valorem.

Paragraph 408. Shingles, 50 cents per thousand.

Paragraph 409. Packing box, shooks of wood, 15 per cent ad valorem.

Senate report:

Paragraph 401. House, deleted.

Paragraph 402. Unchanged.

Paragraph 407. Unchanged.

Paragraph 408. Deleted.

In both committee reports of 1922 coal is to be retained on the free list, and wood pulp, except chemical pulp, which has a duty of 5 per cent by Senate bill and is free in House bill.

Standard newsprint is free.

Senate paragraph 1641. Rag pulp; paper stock, crude, of every description, including all grasses, fibers, rags, waste, including jute, hemp, and flax waste, shavings, clippings, old paper, rope ends, waste rope and waste bagging, and all other waste not specially provided for, including old gunny cloth and old gunny bags, used chiefly for paper making and no longer suitable for bags—free.

DUTIES ON PAPER.

By paragraph 1659 of the Senate report both House and Senate give printing paper not specially provided for a rate of a quarter of a cent per pound and 10 per cent ad valorem; the existing duty on this is 12 per cent. The present tariff, section 324, gives for paper valued at about 2½ cents per pound 12 per cent ad valorem, and section 324 provides all other papers with coated surfaces or other surfaces not specially provided for in this section 25 per cent ad valorem.

The House report gives writing, letter, note, drawing, etc., Bristol board of the kind made on Fourdrinier machines, and ledger, bond, record, tablet, typewriter, manifolding, and onion skin and imitation onion skin, calendered and uncalendered(3 cents per pound and 15 per cent ad valorem.

The Senate gives the same duty, but puts it in the following order: After imitation Japaned paper by whatever name known, Bristol board of the kinds made on Fourdrinier machines, ledger, bond, record, tablet, typewriter, manifolding, onion skin and imitation onion skin, calendered or uncalendered, weighing 8 pounds or over per ream, and paper similar to any of the foregoing, 3 cents per pound and 15 per cent ad valorem.

The PRESIDENT pro tempore. Without objection, the request of the Senator from Massachusetts to have further letters and telegrams printed in the RECORD is granted.

The matter referred to is as follows:

HOUSATONIC, MASS., *March 15, 1922.*

Hon. DAVID I. WALSH,
Washington, D. C.

DEAR MR. WALSH: We are advised that there is a movement on foot to put an import duty on wood pulp, bleached and unbleached, and kraft pulp.

We hope that, as representing the large industry in Massachusetts, you will use every possible endeavor to prevent such action. Wood pulp, as you know, is a raw material, of which there is not sufficient quantity produced in this country, and has been on the free list for a good many years. It would be a very serious hardship to the paper men to have a duty put on pulp, and would oblige us to raise our prices, a thing which we would be very reluctant to do under the present circumstances.

As a general proposition, we believe in a moderate tariff, but paper men are not asking for any increased tariff at the present time but simply suggesting that the present status of affairs be maintained, and in line with this policy we hope there will be no change in the matter of pulp.

We would be glad to have your assurance that you will protect us in this matter to the best of your ability, and remain,

Very truly yours,

B. D. RISING PAPER CO.,
CHARLES MCKERNON, *President.*

—

THE SPRINGFIELD UNION,
Springfield, Mass., June 22, 1922.

DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR MR. WALSH: I am taking the liberty of sending you a copy of the statement of Mr. S. E. Thomason, chairman of the committee on Federal laws of the American Newspaper Publishers' Association, on the subject of duty on chemical wood pulp.

Assuming that the intent of the proposed tariff law is to equalize manufacturing costs at home and abroad, it would seem to me that Mr. Thomason's argument shows conclusively that the imposing of this tax is not necessary. The fact that it would place our paper manufacturers at a disadvantage, to say nothing of the added burden placed upon the various publications, should also be considered.

I will not attempt to go into the details of this situation, as I believe the pamphlets cover it most thoroughly, but will say that I am in hearty accord with the statement as printed and that my experience as a newspaper publisher leads me to support unreservedly the position Mr. Thomason has taken.

I trust that you will give this careful consideration when this phase of the tariff bill is up for discussion.

Sincerely yours,

J. D. PLUMMER,
Publisher the Springfield Union.

—

FITCHBURG, MASS., *March 14, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: We beg herewith to confirm the following telegram which we sent you to-day:

"If a duty is put on foreign bleached and unbleached sulphite pulp it will directly injure the business of a large number of independent paper makers of this country who buy foreign pulp on account of its superior quality. Result will be increased cost for paper to many consumers. We object to the imposition of these duties."

Yours very truly,

CROCKER, BURBANK & CO.

—

FITCHBURG, MASS., *March 20, 1922.*

Senator DAVID I. WALSH,
Washington, D. C.:

Any duty placed on chemical wood pulp would injure the United States mills making book papers. Little sulphite fabric manufactured in the United States is of quality suitable for such mills, and such mills must depend on fibers from Canada and Scandinavia.

FITCHBURG PAPER CO.,
By GEO. R. WALLACE.

Result will be increased cost for paper to many consumers. We object to the imposition of the duty.

CROCKER-BURBANK.

—

CROCKER, BURBANK & CO.,
Fitchburg, Mass., March 21, 1922.

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.

DEAR MR. WALSH: Recently I had occasion to telegraph to you, registering the objection of this company to the imposition of a duty upon foreign chemical pulp.

I am informed that the committee has practically decided to put a duty of 10 per cent on foreign pulp. This will have the effect of raising the price of papers made from foreign sulphite to a considerable percentage. I should say that the advance to home consumers on account of this duty in many instances would vary from 3 to 5 per cent.

It is not a question altogether of the protection of American industries manufacturing chemical pulp. There has always been a large importation of foreign pulp, which is cleaner and stronger than the domestic article. There are a good many papers used in this country which can not be made out of domestic pulp and made of the proper quality. We have always enjoyed a good reputation for our machine-finish and supercalendered papers, which for many years have been made with foreign bleached sulphite. During the war we had to substitute domestic pulp for foreign. Our product suffered accordingly.

We are writing this letter simply to confirm our telegram to you and to urge that no duty be put upon foreign chemical pulp if the country can possibly get along without it. We do not believe that the domestic manufacturers really need this protection. There are only a small number of manufacturers in this country making papers out of foreign sulphite, because many of these concerns are interested directly or indirectly in domestic sulphite mills. We presume, therefore, the objections to such a duty will come from only a very limited number of people. We urge, however, that the consumers of paper in this country will suffer without knowing the reasons. We remain,

Very respectfully yours,

ALVAH CROCKER, *President.*

—

MITTINEAGUE, MASS., *June 24, 1922.*

Senator D. I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: You no doubt have appeals in the matter of tariff from every source in the United States, and yet, no doubt, also, you are very willing to get different views.

The Strathmore Paper Co. is interested very much in having no duty on foreign pulp.

This company is probably one of the largest paper companies in the world making strictly high-grade papers.

It uses all of the American-made pulp that it can but has found that for certain kinds of papers the foreign pulp produces goods which American pulp can not produce.

It therefore buys foreign pulp not because of price.

Its use of foreign and domestic pulp, therefore, is based entirely on the fact that certain papers are made better out of American pulp and certain others are made better out of foreign pulp, and the question of price, which is practically on a parity, does not enter into the proposition.

With us pulp is a raw material, and we understand the general policy is to make raw materials entering this country as free as possible and keep out finished products which make for devastated competition.

It is, therefore, distinctly on the basis that at least, as far as we are concerned, and no doubt this applies to a very considerable number of paper mills, the use of foreign pulp is not because of the price but because of the character, that we ask that pulp be left on the free list.

We understand that about 45 per cent of the pulp used in this country within a reasonably recent period is foreign pulp, probably including Canadian pulp, of course.

On the other hand, the experience of the last few years has shown—and we believe this can be verified—that pulp manufacturers in this country have been continuously busy and profitably so, so that a duty on pulp will not be of any material assistance to them but will tend to increase the cost of papers using this foreign pulp.

We, therefore, request your earnest consideration of the proposition to put pulp on the free list.

Very truly yours,

STRATHMORE PAPER CO.,
B. A. FRANKLIN, *Vice President.*

—

BOSTON, *April 28, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I am informed that in the tariff measure which is now before the Senate there is a duty of 5 per cent ad valorem on chemical wood pulp. As a considerable user of pulp imported from Scandinavia, we earnestly ask that this duty be not imposed. We do this not because of the increase in price which the duty would bring about but as users of pulp we are keenly alive to the rapid disappearance of our forests and are anxious that they should not be further destroyed, so long as we can draw on the almost limitless supplies of Scandinavia, Finland, and Russia.

Should the Senate decide that a tariff on chemical wood pulp should be imposed, we beg that you will give careful consideration to the desirability of having such duty specific rather than ad valorem. An ad valorem duty, owing to the conditions of importation, would add an unnecessary burden to the cost of pulp for paper makers, since the importers would feel obliged to cover themselves by adding greatly to the price to American consumers, whereas were a specific duty to be imposed both importer and manufacturer would know exactly where we stand.

We earnestly hope, however, that the Senate will see the wisdom of imposing no duty on wood pulp.

Yours very truly,

MUNROE FELT & PAPER CO.,
JAMES P. MUNROE,
President and Treasurer.

—

HAVERHILL, MASS., *May 4, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR: As a friend of the newspaper men in Massachusetts I feel sure you will not need to be asked to do what you can to prevent the imposition of the proposed 5 per cent duty on chemical pulp in the pending tariff bill. It seems to us that we have about all the burdens we can carry in the newspaper business right now, and I earnestly urge you to prevent as far as you can any legislation that will surely add to the cost of newsprint.

Very sincerely,

RECORD PUBLISHING CO.,
LEWIS R. HOREY, *Treasurer.*

—

WORCESTER, MASS., *March 22, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.:

For the 67 daily newspapers comprising the New England Daily Newspaper Association, of which I am president, I desire to protest against placing duties on sulphite pulp, which I learn is imminent. Such duty would be harmful to newspapers already overburdened with expense.

BENJAMIN H. ANTHONY,
Publisher New Bedford (Mass.) Standard

EAST PEPPERELL, MASS., *March 28, 1922.*

Senator DAVID I. WALSH,
Washington, D. C.:

As manufacturers of 100 tons of paper daily, all out of imported pulp, would respectfully submit Massachusetts paper manufacturers are fighting for existence. Any duty on imported pulp would be disastrous.

NASHUA RIVER PAPER CO.

—

ERVING, MASS., *March 22, 1922.*

Hon. DAVID I. WALSH,
Washington, D. C.

DEAR SIR: Knowing that the tariff question is being studied by you now, we wish to express our hope that there will not be any duty on pulp imported from abroad or Canada.

The manufacture of wood pulp in the United States is becoming more limited year by year as there is less wood, so that it is conserving our wood to bring in pulp free.

Then, again, we are especially interested as a mill buying all our wood pulp and having to compete with more or less paper that is made by mills producing their own wood pulp. Without a tariff we are in much better shape to compete.

Yours very truly,

ERVING PAPER MILLS,
C. H. WAITE, *Treasurer.*

—

NATICK, MASS., *March 16, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR: Our attention is called to the fact that at the present tariff conference there is a great deal of pressure being brought to bear toward having an "import duty" placed upon wood pulp, bleached and unbleached sulphite, also kraft sulphate.

Having in mind that the aforesaid pulps are a raw material and that there is not a sufficient supply produced in this country for the requirements of the paper mills, and inasmuch as many paper companies in this country manufacture their own pulp, a tariff placed upon this raw material means higher prices and the forcing out of business of those mills not manufacturing their own pulps.

We therefore most vigorously protest against the levying of an import duty on this material. May we count upon your most valued assistance?

Very truly yours,

NATICK BOX & BOARD CO.,
C. A. COOMBS, *Treasurer.*

—

BOSTON, *June 26, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: The proposed tariff bill now under discussion carries, as no doubt you know, a duty of 5 per cent on chemical wood pulp; yet newsprint, made in part of chemical wood pulp, is on the free list.

The writer is a Democrat and does not believe that this accords with Democratic doctrine; moreover, from careful study of the forestry situation in this country, we believe that it is essential for the protection of our dwindling forestry sources to put no barriers in the way of using lumber and forest products generally coming from countries outside our border.

We hope, at the proper time, that you will make as effective a fight against this duty as you possibly can. We believe there is considerable sentiment in the Republican ranks also against this particular schedule.

Very truly yours,

GEO. W. WHEELWRIGHT PAPER CO.,
GEO. W. WHEELWRIGHT, Jr.,
President.

—

A TARIFF ON PULP IS UNFAIR DISCRIMINATION.

CHEMICAL WOOD PULP.

(Schedule 15, par. 1610, H. R. 7456.)

MARCH 31, 1922.

To the COMMITTEE ON FINANCE,
United States Senate, Washington, D. C.

DEAR SIR: In reply to the statement filed by the Committee of Chemical Wood Pulp Manufacturers, 200 Fifth Avenue, New York, N. Y., under date of March 25, 1922, we wish to bring forth the following points:

1. There are 838 paper mills and 323 combined pulp-paper mills in the United States. There are less than 10 chemical-pulp mills of small tonnage who do not make paper. All the other pulp mills are essentially paper mills who make pulp for their own consumption and whose surplus, when there is any, is available to converting mills.

2.—

	Tons of chemical pulp produced in United States.	Consumed by mills manufacturing pulp.		Sold to converting paper mills.	
		Tons.	Per cent.	Tons.	Per cent.
1917	1,912,502	1,323,811	70	569,750	30
1918	1,896,047	1,312,027	69	595,138	31
1919	1,925,066	1,288,670	67	626,820	33
1920	2,221,535	1,510,470	68	708,009	32
1921	1,526,357	1,114,615	73	407,981	27

(Figures given are taken from Federal Trade Commission summaries.)

The statement filed by the Committee of Chemical Wood Pulp Manufacturers compares production in the United States with imports into the United States. They fail to state that the largest part of their total production is not for sale. As indicated above, approximately 70 per cent of the total pulp production in the United States is made by and for the consumption of the domestic mills which produce said pulp.

3. The converting paper mills, which use about 45 per cent of the total chemical pulp consumed in the United States, are therefore absolutely dependent on foreign sources for about one-half of their supply.

Pulp consumed in the United States.

	By paper mills making pulp.		By paper mills who buy pulp.	
	Tons.	Per cent of total United States consumption.	Tons.	Per cent of total United States consumption.
1917	1,323,811	58	908,119	42
1918	1,312,027	57	987,829	43
1919	1,288,670	55	1,000,627	45
1920	1,510,470	52	1,381,570	48
1921	1,114,615	55	915,452	45

Pulp consumed by paper mills which buy pulp.

	Bought from domestic mills.		Bought from foreign mills.	
	Tons.	Per cent.	Tons.	Per cent.
1917	569,750	59	398,369	41
1918	595,138	60	392,691	40
1919	626,820	59	433,807	41
1920	708,009	51	673,561	49
1921	407,981	45	507,471	55

(Figures given are taken from the Federal Trade Commission summaries and Department of Commerce reports.)

4. If the above comparisons were limited to chemical pulp, "exclusive of news-grade sulphite and soda pulp, which are not imported into this country," it would be found that—

a. Approximately 60 per cent of the total production in the United States is made solely for the consumption of the establishments which produce said pulp.

b. The converting paper mills, which use about 60 per cent of these chemical pulps consumed in the United States, are, therefore, absolutely dependent on foreign sources for more than one-half of their supply.

5. Any duty on pulp is, therefore, no incentive to domestic purchases or protection to domestic producers of pulp. It is a discrimination between mills making their own pulp and those who must buy their pulp.

Respectfully submitted.

Mr. SHEPPARD. Mr. President, about 54 per cent of the domestic consumption of wood pulp comes from spruce wood, the rest coming from hemlock, balsam fir, poplar, jack pine, and yellow pine.

The principal use of wood pulp is in the making of paper. Newsprint paper requires the ground wood pulp and the sulphite form of chemical wood pulp in the proportion of about four of the former to one of the latter. Book paper is of a better quality and requires a larger amount of the sulphite form. The finer grades of book paper require a pulp made from rags, and sometimes from other substances. The higher types of paper, such as bond and ledger, often contain sulphite, although the rag pulp is to be preferred. The sulphate form of chemical wood pulp is used mainly for wrapping paper.

Wood pulp is also employed to some extent in making certain kinds of laces, yarns, and textiles, as well as artificial silk, paper clothing, and papier-mâché. It is used in making vulcanized paper, out of which may be fashioned pails, tubs, and other containers.

The Tariff Commission warns us that on account of the depletion of the pulpwood forests it is becoming more and more difficult to secure an adequate supply of that fundamental of modern civilization—wood pulp. Already the home demand has outgrown the home production. During the last 10 years we have been compelled to import from 17 to 23 per cent of the raw material of newsprint and book paper, and the outlook suggests a growing dependence on the foreign supply. While the chief source of outside supply is Canada, we have begun to draw on Norway, Sweden, Finland, and Germany.

The existing Democratic tariff law puts wood pulp of all types on the free list, and there it should remain. It is true that the proposed duty on chemical wood pulp is small, but it marks a departure and a principle freighted with sinister possibilities. On the broad ground of conservation of what material resources are left in this Republic after more than a century of riotous and wanton waste, no tariff tax should be imposed on wood pulp or on print paper.

Newspapers, books, and magazines are the universities of the people. They constitute a supreme educational force in this Nation. Their successful continuance depends on a steady and reasonably priced supply of newsprint and book paper. Make their existence more difficult and you imperil the general distribution of knowledge—one of the basic supports of American liberty and American progress.

Francis Bacon uttered one of the most significant sentences in human literature when he said:

Human knowledge and human power meet in one.

The power of the American people over their Government will decline as information of conditions and events becomes harder to secure, as the circulation of the printed word becomes more expensive both to producer and to reader; and let me digress here to say that the men engaged in newspaper, magazine, and book work are of primary importance to democracy. The newspaper men who occupy seats in the press galleries of the American Congress are in effect a third house, a factor in American life of far-reaching influence. The reports which they transmit to the American people are in large degree the foundation of public judgment and public action. Their estimates become to no small extent the people's estimates, not in the way of mere echo or imitation but because they convey to the country a conscientious and impartial analysis of governmental affairs. Years of contact with officials of every type, of observation of human conduct in emergencies of every proportion, of devotion to the highest conceptions of their profession, have qualified them for the unmasking of pretense, the penetration of fraud, the revealment of truth for the sake of truth, and the maintenance of loyalty to fact which no blandishment can shake, no temptation destroy.

Let Congress do nothing which may add to the economic difficulties of the press. Already costs of material and operation have risen to such a degree as to cause the most serious apprehension for the future. A press with almost prohibitive cost of operation, or with constantly increasing cost of operation, can not be justly termed a free and untrammeled press.

Mr. WALSH of Montana. Mr. President, I desire to submit one or two observations before the vote is taken.

My esteemed friend the Senator from Louisiana [Mr. RANSDELL] made a very passionate appeal to the Senate to encourage the reforestation of our denuded forest lands. That is the basis of the argument that we make, Mr. President. That is what we ought to do. We ought to aid in every possible way that we can toward the development of some plan by which reforestation shall go on systematically; but is it not rather startling that a Senator should get up and argue in favor of reforestation of our denuded forest lands and then insist upon putting a duty upon lumber, for instance, or upon wood pulp, or upon other forest products, the natural and necessary and inevitable consequence of which will be to stimulate and hurry the destruction of our forests?

They are carrying on some work of reforestation down in Louisiana. Success to them! The Bogalusa Co. is engaged primarily in the manufacture of lumber. It is consuming the forests very rapidly in the production of its lumber supply, and is doing something toward reforestation of those denuded lands. But how is the thing going to be stimulated by putting a duty upon the importation of wood pulp?

The senior Senator from Massachusetts [Mr. LODGE], the leader on the Republican side, is in favor of this duty, because, he tells us, as a basic proposition, only 3 per cent of the total annual cut of timber for all purposes goes into chemical wood pulp. Very good. Let us see what that amounts to. That looks small, does it not? But I called attention yesterday to the fact that, as reported by the Forest Service, we are denuding our forest lands to the extent of 15,000,000 acres a year, and 3 per cent of that is 450,000 acres of timberland denuded annually in order to produce wood pulp.

The Senator suggests that, inasmuch as the manufacturers of paper have a protective rate, they ought not to complain about a duty upon the basic product out of which their product is made, namely, chemical wood pulp. Mechanical wood pulp is also used in the manufacture of these higher grades of paper to a relatively small percentage. There should then likewise be a duty upon ground wood pulp, according to the argument of the Senator. But I call attention to the fact that the manufacturers of paper are given no compensatory duty at all on account of this duty which it is proposed to put upon chemical wood pulp.

Then the Senator from Louisiana tells us that the newspapers of this country are not interested in this particular duty at all, because, forsooth, the manufacturers of print paper in this country manufacture wood pulp enough to supply their own demands, and to sell a considerable quantity upon the open market. But there are mills in this country manufacturing paper which do not produce their own wood pulp, and they are obliged to buy wood pulp and pay the duty, if they import it from abroad, or pay the higher rate to the manufacturers of wood pulp and print paper who have an excess supply, and they are obliged to put their product upon the market manufactured from a protected wood pulp, and, accordingly, they are obliged to demand from newspapers throughout the country a higher price for their product. Likewise the mills which produce their own wood pulp and their paper will boost their prices in order to meet the level fixed by those who are obliged to buy either the foreign wood pulp and pay the duty upon it, or buy the domestic wood pulp, enhanced in price as it is contemplated the price will be enhanced by this. So the newspapers of the country are the ones who are obliged to pay this duty, and to pay the enhanced price of the domestic product occasioned by it, and of course they will, so far as they are able, transfer the burden to the great body of the people, where the burden of this law, if it becomes a law, will eventually rest, to a very large extent.

Now, to review: I insist that this duty ought not to be put upon this commodity, because it will accelerate and aid in the rapid destruction of our forests. No one controverts that proposition.

Next, it ought not to be put on because the manufacturers of wood pulp in this country are now making a fair and reasonable profit upon their enterprise, and ought not to be permitted to raise their prices by reason of the duty which is imposed.

Third. It is an unjust burden to put upon the paper mills of this country, which have already developed a fine export business, which will be seriously menaced by the imposition of this additional burden upon their raw product.

Finally, it is a discrimination against the American paper mills. It is practically a premium upon the paper mills of Canada, which are able to introduce into this country their chief product—newsprint—without any duty or tariff at all. So the American producer is burdened in the interest of the Canadian producer, a policy, I undertake to say, that has never crept into our legislation until now.

Mr. STANLEY. Mr. President, this subject has been so fully and so thoroughly covered that at this hour I hesitate to trespass further upon the patience of the Senate. These paper mills are admittedly prosperous without this duty. The fact that this business has been organized, this baby has been born, this infant industry has learned to walk without any duty is conclusive proof that the duty is not essential.

When you impose a duty on hides, a duty on long-staple cotton, a duty on short-staple wool, a duty upon everything which is necessary to the physical existence of a people, it does seem that you might make some exception and exempt from a duty the mental and spiritual development of a community. This is a duty upon information; this is a duty upon knowledge, a duty upon mental development, a duty upon print paper, a duty upon schoolbooks and upon magazines. This duty falls at every crossroads. There is not a schoolhouse nor a country newspaper which does not pay its quantum of the duty. But under this system it appears that there is only one thing which needs development, and that is a mill or a factory or some other industrial enterprise, and, moving by a strange and perverse formula, the less profitable the business the greater the duty. The greater the difference between the cost of production abroad and at home, the greater should be the onus upon the consumer. The less indigenous to the soil of this country a business is, the greater should be your effort to foster it. If it costs twice as much to produce a thing here as it does to produce it abroad, then give us 100 per cent duty, and if it costs five times as much give us 500 per cent duty.

Wood pulp and print paper come to us from Canada. All the arguments, the learned and labored arguments, which have been made, all the bugaboos about Germany and pauper labor and depreciated currency, fall to the ground when you erect that Canadian wall. The truth is that this country owes its industrial power, its industrial development, its commercial and financial supremacy, to free trade, absolute, unhampered free trade among the States more than to any other one thing except the beneficence of God and the intelligence and enterprise of our citizens.

A short time ago, and 13 small Colonies were extended along the Atlantic coast. A military camp on Lake Champlain, another at Detroit, and one on the Mississippi River marked our outer border, and then we were told that if we crossed the Mississippi, if we went beyond Detroit, if we went south into Florida, we must have a barrier against Mexico, a barrier against Spain, a barrier against France, or industrial development was impossible.

We broke down those barriers. We wiped out Spain's dominions. We took possession of the mouth of the Mississippi and of the Father of Waters. We extended our dominion into Texas, into the Louisiana purchase, over the serried tops of the Rockies, to the Pacific, until a great empire was opened to freedom of trade, and our growth went with it.

Mr. President, industrially, what difference does it make in the exchange of commodities whether we trade with Florida in the possession of Spain or in the possession of the United States? What difference does it make whether we have the privilege of purchasing free the products of Louisiana or the products of California when under the dominion of Mexico, the dominion of Spain, the dominion of France, or our own? Our prosperity is due to the fact that this country is industrially one unit, not politically one unit.

The fact that Canada happens to have a governor general and we have a President, a slight difference in our fiscal systems, makes no difference in the great fundamental economic law which developed both countries. The freer the trade is across that border the more mutually beneficial it is.

To-day our exports to Canada are nearly a billion dollars; our imports from Canada are less than half a billion dollars. To-day we export to Canada more than twice as much of the produce of the soil as we import, and to-day our imports from Canada are more essential to our industrial development than our exports to Canada.

Were it not for this fool policy of a tariff wall along the Canadian border Canada would not have 300 per cent greater per capita railroad mileage than we have. She has spanned great estuaries; she has crossed the wilderness; she has crossed mountain ranges in an effort to unite industrially her widespread dominions. Her furs, her timber, her hides, her wood pulp, her raw materials of every character and description have been transported 3,000 miles because we refuse to allow those raw materials to be converted at our door, because we closed our mines, our mills, our factories, and our smelters to her ore, her timber, and her wool. Some day perhaps this will all be one country—I am not intimating that it is in the near future or that I expect it—and then men will admit, if that does occur, that free trade with that country is as essential as free trade with the Dakotas or free trade with California or free and unimpeded trade with Texas.

The other day I received a letter from the Carolina Stock Farms with reference to this same wood pulp which I ask to incorporate in the RECORD, together with my reply thereto, in the same type in which this address will be printed.

There being no objection, the matter referred to was ordered to be printed in the RECORD, in 8-point type, as follows.

CAROLINA STOCK FARMS,
Foreston, S. C., July 27, 1922.

Hon. A. OWSLEY STANLEY,
United States Senate, Washington, D. C.

MY DEAR SENATOR: The members of our association of southern pulp-wood producers are in pretty desperate circumstances as a result of the inability of southern pulp mills to use pulp wood because the paper mills that normally buy from them are buying foreign pulp instead. Foreign pulp can be purchased in New York at less than the cost of southern manufacture. As a result the only source of income of many of your constituents is cut off, while the product of foreign labor rules our only market and our own labor is hungry and without employment.

The Finance Committee, in a spirit of simple fairness to a southern industry, placed a 5 per cent duty on chemical pulp (against the protest of New England converting mills), at the same time refusing to put any duty on mechanical pulp (ground wood), from which newspaper is made.

Rumor now has it that some Democrats, you among them, will join certain Republicans in fighting this duty on the floor of the Senate, your vote being thus made to count against home interests and for the benefit of New England converting mills and foreign pulp producers, who sell in this market without paying anything into the United States Treasury for the privilege which is given them, while American mills which do pay taxes are jostled out of the way in their own market, the only one open to them in the world, as even Canada, which sells hundreds of thousands of tons of pulp in America, bars the American product from Canada by a 25 per cent duty.

We hope most sincerely that this is not true and that you will advise us that you can and will support this very small duty for revenue only either by voting for the duty or by refraining from voting against it.

Very truly yours,

COURTNEY CAMPBELL.

—

JULY 28, 1922.

Mr. COURTNEY CAMPBELL,
Carolina Stock Farms, Foreston, S. C.

MY DEAR MR. CAMPBELL: It affords me genuine pleasure to assure you that the rumor to the effect that I am among certain Democrats who are opposed to a duty on chemical pulp is well founded.

Let me suggest, my dear Mr. Campbell, that you have the cart before the horse in your suggestion that I am about to "join certain Republicans" in fighting this duty upon the floor of the Senate. I entertain the hope that certain Republicans, goaded by an outraged public, in their shame may be induced to join orthodox Democrats in their determined opposition to this indefensible duty.

Your letter when analyzed is one of the best arguments I have ever seen against the duty you suggest. You assert that this duty is essential to the life of your business; that this material can be purchased in the open market much more cheaply than it can be made. Your profits, if any, in that case are necessarily derived not from the prosecution of a business indigenous to the soil, southern or otherwise, but from the operation of law. In order that you may continue in this business, you propose to levy a tax upon every newspaper, every book and magazine, upon every crossroads schoolhouse, upon the industry and upon the intelligence of your countrymen. It matters not whether your industry is located in the East, West, North, or South, I will never give my consent to the hot-housing of an industry which you admit is not and can not be profitable without the privilege or supplementing your revenues by a bonus from a tax-burdened public and by an added increase to the cost of living and thinking to the American people.

I hear so much of this twaddle in the Senate about levying taxes to foster industries in one section of the country against industries in another that I am not surprised at the implied threat in your recent communication.

I shall be delighted to cooperate with Democrats, mugwumps, Republicans, New Englanders, westerners, southerners, or anybody else in taking every cent of duty off print paper and chemical pulp and of every other instrumentality designed to make culture, education, and progress easier and cheaper to the American people.

I regret that I can not more strongly express my unalterable abhorrence of this duty. I trust that your fears will be realized and that this duty on wood pulp may be forever removed from the tariff schedules of the country.

Very truly yours, ——— ———.

Chemoca wood pulp.
[Fiscal year ended June 30, 1922.]

Imported (long tons)	695,008
Value	$44,123,054

Used principally in making book paper.

Some of it mixed with ground wood pulp and used to make newspaper.

Total production in United States for year ended May, 1922, 1,713,840 short tons.

Mr. HARRIS. Mr. President, I do not wish to take the time of the Senate to discuss the matter further. I merely wish to remind Senators that the 5 per cent duty would benefit 21 paper manufacturers and tax 215 paper manufacturers of our country who have to compete with Canadian mills.

Mr. FLETCHER. Mr. President, I do not propose to discuss the amendment, but, inasmuch as I shall feel obliged to differ with some of my colleagues on the matter, I feel that I ought to make this statement:

I do not think we can raise by direct taxation all the revenue necessary in this country to administer the affairs of Government. I believe we are under the necessity of raising a certain amount of revenue needed for the Government through the customhouse and by levying reasonable duties for that purpose. The duty here proposed is only 5 per cent ad valorem. It seems to me it is as low a rate of duty as can be offered for the purpose of raising revenue, and, inasmuch as it will produce some $3,000,000 of revenue for the Government, I can not believe that we ought to estimate the patriotism of the newspapers of the country on such a basis as that they would oppose a strictly revenue duty, a low rate of 5 per cent ad valorem, that would bring to the Treasury something like $3,000,000. Therefore I shall vote for the committee amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee to insert a new section as section 1300.

Mr. SMOOT. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). I am paired with the Senator from Michigan [Mr. TOWNSEND]. I am unable to obtain a transfer and therefore withhold my vote. If permitted to vote I would vote "nay."

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM]. I release my pair on this question and refrain from voting.

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER], and vote "yea."

Mr. HARRISON (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Montana [Mr. MYERS], and vote "nay."

Mr. HITCHCOCK (when his name was called). Under the circumstances I decline to vote.

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the junior Senator from Arizona [Mr. CAMERON], and vote "yea."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER], and vote "yea."

Mr. McNARY (when his name was called). On this amendment I have a pair with the junior Senator from Minnesota [Mr. KELLOGG] who, if present, would vote "nay." I transfer that pair to the senior Senator from Vermont [Mr. DILLINGHAM] and vote "yea."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. McKELLER] to the junior Senator from Vermont [Mr. PAGE], and vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN], who is absent on account of illness in his family. Being unable to obtain a transfer, I withhold my vote.

Mr. ROBINSON (when his name was called). Transferring my pair with the senior Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED], I vote "nay."

Mr. DIAL (when Mr. SMITH's name was called). My colleague [Mr. SMITH] is detained on official business. He is paired with the Senator from South Dakota [Mr. STERLING].

Mr. STERLING (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Iowa [Mr. RAWSON], and vote "nay."

Mr. TRAMMELL (when his name was called). I have a pair with the senior Senator from Rhode Island [Mr. COLT]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON], and vote "nay."

Mr. WALSH of Montana (when his name was called). I have a general pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN]. Being unable to secure a transfer, I am obliged to withhold my vote. If at liberty to vote, I would vote "nay."

The roll call was concluded.

Mr. KENDRICK (after having voted in the negative). I have a general pair with the Senator from Illinois [Mr. McCORMICK]. I am informed that he would vote as I have voted. So I allow my vote to stand.

Mr. JONES of Washington (after having voted in the affirmative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I have a pair with him for the afternoon, but find that I can transfer the pair to the junior Senator from Oklahoma [Mr. HARRELD], which I do, and allow my vote to stand.

The result was announced—yeas 22, nays 30, as follows:

YEAS—22.

Ball	Fletcher	McCumber	Phipps
Broussard	Gooding	McLean	Ransdell
Curtis	Hale	McNary	Smoot
du Pont	Jones, Wash.	New	Stanfield
Ernst	Lenroot	Newberry	
Fernald	Lodge	Pepper	

NAYS—30.

Ashurst	Harrison	Nicholson	Spencer
Borah	Heflin	Norbeck	Stanley
Bursum	Jones, N. Mex.	Oddie	Sterling
Calder	Kendrick	Pittman	Trammell
Caraway	Keyes	Pomerene	Walsh, Mass.
Cummins	McKinley	Robinson	Willis
France	Moses	Sheppard	
Harris	Nelson	Simmons	

NOT VOTING—43.

Brandegee	Glass	Norris	Swanson
Cameron	Harreld	Overman	Townsend
Capper	Hitchcock	Owen	Underwood
Colt	Johnson	Page	Wadsworth
Culberson	Kellogg	Poindexter	Walsh, Mont.
Dial	King	Rawson	Warren
Dillingham	Ladd	Reed	Watson, Ga.
Edge	La Follette	Shields	Watson, Ind.
Elkins	McCormick	Shortridge	Weller
Frelinghuysen	McKellar	Smith	Williams
Gerry	Myers	Sutherland	

So the amendment of the committee was rejected.

Mr. McCUMBER. The vote just taken will necessitate a disagreement to certain committee amendments upon the free list, and also in the title of this schedule.

I therefore ask that the Senate reconsider the vote by which the committee amendment was agreed to inserting the word "Pulp" and the comma on line 23, page 165.

The PRESIDENT pro tempore. The Senator from North Dakota asks unanimous consent that the Senate reconsider the vote by which the amendment on line 23, page 165, was agreed to. Is there objection? The Chair hears none, and the vote is reconsidered.

Mr. McCUMBER. I now ask that the Senate disagree to that amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. Now, turning to the free list, on page 225, I ask that the committee amendment in lines 17 to 19, inclusive, be rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 225, line 17, after the words "wood pulp" and the comma, the committee propose to strike out the words "chemical wood pulp, unbleached or bleached," and to insert "including pulpboard in rolls, for use in the manufacture of wall board."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was rejected.

Mr. McCUMBER. On line 4, page 226, I ask that the committee amendment be rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On line 4, page 226, after the word "paper" and the comma, the committee propose to insert the words "mechanically ground."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. I also ask that the committee amendment in lines 9 and 10 of the same page be rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On the same page, page 226, lines 9 and 10, the committee propose to strike out the words "and chemical wood pulp, unbleached or bleached."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. Also, on line 16, I ask that the committee amendment be rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On line 16, before the words "wood pulp," the committee propose to insert the words "mechanically ground."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. That completes it.

FEDERAL RESERVE BRANCH BANK AT JACKSONVILLE, FLA.

Mr. FLETCHER. I ask unanimous consent to report Senate Joint Resolution 234 and have it acted on at this time. It is unanimously reported from the Committee on Banking and Currency and is recommended by the Federal Reserve Board. It proposes to authorize the construction of a building for the Jacksonville branch of the Atlanta Federal Reserve Bank, at a cost exceeding the amount of $250,000, which was limited under the recent amendment of the Federal reserve act. It is recommended by the board and the building is very much needed. A lot has already been acquired, and it is just a question now of putting up an adequate building.

I ask unanimous consent to make the report and to have the joint resolution considered.

The PRESIDENT pro tempore. The Senator from Florida asks unanimous consent to submit a report upon Senate Joint Resolution 234 and requests its immediate consideration. Is there objection? The Chair hears none.

Mr. OVERMAN. Mr. President, what is to be the limit of cost?

Mr. FLETCHER. The joint resolution provides that the cost shall not exceed an amount equal to 3 per cent of the paid-in capital stock and surplus of the Atlanta bank, which would amount to about $400,000 for the building.

There is one amendment to the preamble, Mr. President.

The PRESIDENT pro tempore. The amendment will be considered after the passage of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. J. Res. 234) authorizing the Federal Reserve Bank of Atlanta to enter into contracts for the erection of a building for its branch office in Jacksonville, Fla., which was read, as follows:

Whereas the act of Congress approved June 3, 1922, abridged the right of Federal reserve banks to enter into contracts by providing that no Federal reserve bank should have authority thereafter to enter into any contract or contracts for the erection of any building of any kind or character or to authorize the erection of any building in excess of $250,000 without the consent of Congress having previously been given therefor in express terms, which, however, did not apply to buildings under construction on June 3, 1922; and

Whereas many of the Federal reserve banks were not affected by this provision, since they had already completed or commenced construction of buildings for their head offices and branches; and

Whereas the Federal Reserve Bank of Chicago had not on June 3, 1922, actually commenced the construction of any building for its branch at Jacksonville, Fla., but had acquired the site therefor; and

Whereas the act of June 3, 1922, operates inequitably on said Federal Reserve Bank of Atlanta: Now, therefore, be it

Resolved, etc., That the Federal Reserve Bank of Atlanta be, and it is hereby, authorized to enter into contracts for the erection of a building for its branch bank at Jacksonville, Fla., on a lot previously acquired: *Provided*, That the total investment in such building shall not exceed an amount equal to 3 per cent of its paid-up capital stock and surplus.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. FLETCHER. I move to amend the preamble by striking out the word "Chicago," at the top of page 2, and inserting "Atlanta."

The amendment was agreed to.

The preamble as amended was agreed to.

Mr. FLETCHER. I ask to have printed in the RECORD the letter from the Federal Reserve Board with reference to the joint resolution.

There being no objection, the letter referred to was ordered to be printed in the RECORD, as follows:

FEDERAL RESERVE BOARD,
Washington, August 3, 1922.

MY DEAR MR. CHAIRMAN: I have received your letter of the 2d instant, inclosing a copy of S. J. Res. 234 on which you request the views of the board. There is a typographical error in the preamble in the first line on page 2 where the word "Chicago" should be "Atlanta."

A reference to page 54 of the board's annual report for the year 1921 will show that in October, 1921, the Federal Reserve Bank of Atlanta purchased in Jacksonville a plot of ground covering 4,770 square feet for the sum of $45,826.96. The officials of the bank are now having plans prepared by an architect with a view of obtaining estimates to ascertain whether it will be possible to construct a suitable building and adequate vaults on this lot for the sum of $200,000, thus keeping the total investment within the limit of $250,000 prescribed by the amendment of June 3, 1922, to the Federal reserve act.

When the normal growth of the territory served by the Jacksonville branch is considered, it seems probable that even in case a building and vaults can be constructed for a sum which will keep the entire investment, including ground, within the limit of $250,000, the business of the branch will soon outgrow its new quarters, and it would seem that good business judgment would call for the investment of a somewhat larger sum in order to insure adequate accommodation for a reasonable period of time.

The capital and surplus of the Federal Reserve Bank of Atlanta amount to almost $13,400,000, and an investment of 3 per cent of that amount in a building at Jacksonville would amount to a little more than $400,000. There seems to be no doubt that this amount would be sufficient for the construction of a suitable building and adequate vaults.

The branch at Jacksonville, Fla., has added importance because of its proximity to Cuba. As you know, the circulating medium of Cuba consists almost entirely of United States currency. As this currency becomes absolutely unfit for circulation, it is sent to the United States for redemption. By reason of the geographical location of Jacksonville, at least two days' time can be saved by having redemptions made at the branch there. During the year 1921 (page 80, board's annual report) currency received at the Jacksonville branch amounted to $50,620,000 and the payments to $38,375,000. A large amount of Federal reserve notes and United States currency is always kept on hand at the Jacksonville branch, and in the board's opinion better facilities than those now available are necessary.

Very truly yours,

W. P. G. HARDING, *Governor.*

Hon. GEORGE P. MCLEAN,
Chairman Committee on Banking and Currency,
United States Senate.

THE TARIFF—SUGAR SCHEDULE.

Mr. HARRISON. I give notice that on Saturday morning, immediately upon the convening of the Senate, if I can get the attention of the Chair and permission to speak, I desire to submit some remarks on the sugar schedule of the tariff bill.

EDUCATIONAL LEAVE OF EMPLOYEES OF INDIAN SERVICE.

Mr. SPENCER. Mr. President, the other night I asked unanimous consent for the passage of House bill 9814, which the Indian Department wanted passed, extending from 15 days to 30 days the educational leave of men in its employ. The Senator from South Carolina [Mr. DIAL] objected because he wanted to look into it a little. He stated to-day that he has no objection to the bill, and I ask for its present consfderation. It is House bill 9814.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9814) amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service, which was read, as follows:

Be it enacted, etc., That the proviso of the act approved August 24, 1912 (37 Stat. L. 519), allowing educational leave to employees of the Indian Service, is hereby amended by striking out the word "fifteen" in the sixth line of the sixth paragraph of said act and inserting in lieu thereof the word "thirty," so that the proviso shall read: "*Provided*, That hereafter employees of the Indian schools may be allowed, in addition to annual leave, educational leave not to exceed 30 days per calendar year for attendance at educational gatherings, conventions, institutions, or training schools, if the interest of the service require, and under such regulations as the Secretary of the Interior may prescribe, and no additional salary or expense on account of this leave of absence shall be incurred."

Mr. HEFLIN. Mr. President, the Senator from Arkansas [Mr. ROBINSON] wanted time to look into this bill the other day. I desire to ask the Senator from Missouri if he has satisfied the Senator from Arkansas?

Mr. SPENCER. I have. I saw the Senator from Arkansas, and he said he thought the measure a good one. I think there is no objection to it.

The PRESIDENT pro tempore. If there be no amendment to be proposed as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INVESTIGATION OF INTEREST IN TARIFF LEGISLATION.

Mr. McCUMBER. Mr. President, I move that the Senate take a recess.

Mr. HARRISON. Mr. President, will the Senator withhold that motion one moment?

Mr. McCUMBER. I will.

Mr. HARRISON. Two important resolutions were presented to-day, one of which probably will be reported to-morrow by the Committee to Audit and Control the Contingent Expenses of the Senate. The one that I offered is on the table. I want to take it up to-morrow for consideration. If we have a recess,

I can not do so unless by unanimous consent. Will not the Senator move an adjournment, so that we can have a morning hour to-morrow?

Mr. McCUMBER. A good many Senators left the Chamber after unanimous consent was obtained that we would take a recess. That agreement has already been entered into; and having been entered into, and many Senators having left, there would not be a quorum at this time.

Mr. HARRISON. I have been staying around here very closely, so that if a request for unanimous consent was made I could object to it, unless I could get unanimous consent to take up this matter to-morrow.

Mr. McCUMBER. Unanimous consent to take a recess was granted.

Mr. HARRISON. Will the Senator allow me to propose now a unanimous-consent request which will settle the proposition? I did so awhile ago, and the Senator from Utah [Mr. SMOOT] asked me to withhold the request until the Senator from North Dakota could be present. I made it some time during the afternoon.

I ask unanimous consent that on to-morrow, if the Committee to Audit and Control the Contingent Expenses of the Senate under the order of the Senate reports out the Gooding resolution, it shall be in order to be considered; and I couple with that the request that the resolution which I presented to-day and that is on the table may be considered to-morrow.

The PRESIDENT pro tempore. Is there objection?

Mr. McCUMBER. Mr. President, I hope the Senator will not make that request now, with only a few Senators present. I think there will be no disposition to interfere with either of those resolutions; but with the general understanding that there was upon this side and I think upon both sides of the Chamber that we were to take a recess, a great many Senators came to me and asked if anything further would come up, and I replied in the negative. I hope, therefore, that the Senator will not insist upon that request to-night but will present it to-morrow, if necessary, when more Senators can be present.

The PRESIDENT pro tempore. Is there objection?

Mr. HARRISON. Of course, I am powerless to make a motion, because there is not a quorum present, and it would accomplish nothing if a unanimous-consent agreement to take a recess has been entered into; but I made that request to-day. I thought the Senator from North Dakota was on the floor at the time. There was quite a large attendance here; and the Senator from Utah [Mr. SMOOT] said that while he did not think there would be any objection, he hoped I would wait until the Senator from North Dakota could be present. Of course, the Senator will aid me to-morrow in getting up the resolution, and I shall therefore desist.

Mr. McCUMBER. I certainly shall not object to their being brought up if they can be disposed of.

I now move that the Senate take a recess, the recess being under the unanimous-consent agreement, until to-morrow at 11 o'clock.

The motion was agreed to, and (at 6 o'clock and 30 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Friday, August 4, 1922, at 11 o'clock a. m.

SENATE.

FRIDAY, *August 4, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. GOODING obtained the floor.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Heflin	Nelson
Ball	Dial	Hitchcock	New
Borah	Dillingham	Jones, N. Mex.	Newberry
Brandegee	du Pont	Jones, Wash.	Nicholson
Bursum	Ernst	Keyes	Norbeck
Calder	Fletcher	Ladd	Oddie
Cameron	Glass	Lenroot	Overman
Capper	Gooding	Lodge	Pepper
Caraway	Hale	McCumber	Phipps
Culberson	Harris	McLean	Pomerene
Cummins	Harrison	McNary	Ransdell
Robinson	Smoot	Sterling	Watson, Ind.
Sheppard	Spencer	Trammell	Willis
Shortridge	Stanfield	Walsh, Mass.	
Simmons	Stanley	Walsh, Mont.	

Mr. DIAL. I wish to announce that my colleague [Mr. SMITH] is detained on official business. I ask that this notice may continue through the day.

Mr. LADD. I was requested to announce that the Senator from Illinois [Mr. McKINLEY] and the Senator from Wyoming [Mr. KENDRICK] are detained in a hearing before the Committee on Agriculture and Forestry.

The PRESIDENT pro tempore. Fifty-eight Senators have answered to their names. There is a quorum present.

THE MUSCLE SHOALS PROJECT.

Mr. LADD. Mr. President, will the Senator from Idaho yield to me a moment?

Mr. GOODING. I yield.

Mr. LADD. I desire to submit the views of a minority of the Committee on Agriculture and Forestry on the joint resolution (S. J. Res. 227) rejecting bids for the acquisition of Muscle Shoals, which I ask may be printed.

The PRESIDENT pro tempore. Without objection, it is so ordered. The views of the minority will be printed as part 2 of Report No. 831.

Mr. LADD. The report I have submitted also gives the views of the minority on the bill (S. 3802) authorizing the acceptance of the proposal of Henry Ford for the completion and leasing of the dams and hydroelectric plants at Muscle Shoals, and for the purchase of nitrate plant No. 1, nitrate plant No. 2, the Waco quarry, and the interest of the Government in the Gorgas Warrior River steam plant, all in the State of Alabama, dated May 31, 1922, being the Henry Ford offer for the lease of Muscle Shoals; and the views of the majority of the committee on the bill (S. 3420) to provide for the manufacture of explosives for the use of the Army and Navy, to provide for the manufacture of fertilizer for agricultural purposes, to incorporate the Federal Chemical Corporation, and for other purposes, the so-called Norris Government ownership and operation proposal bill.

Mr. ROBINSON. Mr. President, I inquire what was the order just made respecting the report from the Committee on Agriculture and Forestry made by the Senator from North Dakota [Mr. LADD]. There was so much confusion in the Chamber that in this part of the Chamber we were unable to hear what he said.

Mr. LADD. I submitted the report for the minority of the committee on Senate bill 3802 with reference to leasing the Muscle Shoals property to Henry Ford and the majority report on the so-called Norris bill for the completion and operation of Muscle Shoals by the Government. This I did in accordance with permission which was granted a few days ago. I ask that the reports may be printed.

Mr. ROBINSON. I inquire of the Senator if he asked leave to have his report printed separately? That action was taken with respect to the report presented by the chairman of the committee. Several Senators on this side of the Chamber have suggested that the report of the Senator from North Dakota ought also to be printed separately, so that those Senators who desire to circulate that report or make use of it separately from the majority report may have the opportunity to do so.

Mr. LADD. I did not ask it, but I shall make that request at the present time. I ask that unanimous consent be given to print the minority report as a separate document.

The PRESIDENT pro tempore. The Chair desires to state that he is informed the RECORD shows that an order has already been entered for printing both reports.

Mr. ROBINSON. And there was also an order made subsequently for printing the majority report separately. A number of Senators desire that the minority report submitted by the Senator from North Dakota have the same privilege that the majority report had. I called attention, at the time the Senator from Oregon [Mr. McNARY] requested the privilege of having the majority report printed separately, to the fact that an order had already been made authorizing the printing of the two reports, the majority and the minority, in conjunction with each other. I now ask, if the Senator from North Dakota has not done so, that the report submitted by the Senator from North Dakota be printed separately.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

PETITIONS AND MEMORIALS.

Mr. MYERS presented a memorial of sundry citizens of Pablo, Mont., remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of

Columbia, which was referred to the Committee on the District of Columbia.

Mr. WILLIS presented a petition of sundry citizens of Toledo, Ohio, praying for the passage of a protective tariff act based upon American valuations, which was referred to the Committee on Finance.

Mr. ASHURST presented resolutions adopted by the joint convention of the Arizona Cattle Growers' Association and the Arizona Wool Growers' Association, which were referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Resolved by the Arizona Cattle Growers' Association and the Arizona Wool Growers' Association, in joint convention assembled at Prescott, Ariz., on July 7, 1922, That we advocate the passage by Congress of a bill looking to the establishing of a nonpartisan scientific tariff board, based on American production and conversion costs.

Resolved further, That a copy hereof be sent to each member of our delegation in Congress and to the National Wool Growers' Association.

The foregoing resolution was unanimously adopted at the joint meeting of both associations and also at the annual meeting of the Arizona Wool Growers' Association.

F. W. PERKINS,
Secretary of the Arizona Wool Growers' Association.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAMERON:

A bill (S. 3885) granting an increase of pension to Mathew Cavaness; to the Committee on Pensions.

By Mr. BALL:

A bill (S. 3886) to authorize the closing of a part of Thirty-fourth Place NW., and to change the permanent system of highways plan of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. MYERS:

A bill (S. 3887) to amend the act of April 16, 1906, relating to the disposition of the proceeds of sales of town lots on reclamation projects; to the Committee on Public Lands and Surveys.

By Mr. JONES of Washington:

A bill (S. 3888) to provide for the organization and establishment of stock corporations to engage in foreign trade or commerce, and for other purposes; to the Committee on Commerce.

TARIFF BILL AMENDMENTS.

Mr. SIMMONS (for Mr. KING) submitted two amendments intended to be proposed by Mr. KING to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

FOREIGN-TRADE ZONES IN UNITED STATES PORTS.

Mr. MCNARY submitted an amendment intended to be proposed by him to the bill (S. 2391) to provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

FUNERAL EXPENSES OF THE LATE SENATOR CROW.

Mr. PEPPER submitted the following resolution (S. Res. 332), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, from the miscellaneous items of the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. WILLIAM E. CROW, late a Senator from the State of Pennsylvania, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

INVESTIGATION OF INTERESTS IN TARIFF LEGISLATION.

Mr. HARRISON. Mr. President, will the Senator from Idaho yield to me for an inquiry?

Mr. GOODING. Will it lead to debate?

Mr. HARRISON. It will lead to no debate. I am merely trying to ascertain the status of Senate Resolution 330. On yesterday the Senator from Idaho [Mr. GOODING] very courageously offered a resolution which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate with instructions to report it back immediately. It has been some 24 hours since that was done, and the resolution has not yet been reported back. I notice that the chairman of the committee is here, and it may be that he wants to present the report the first thing this morning. It seems to me that under the order of the Senate he should do so before the Senator from Idaho proceeds, if he has the report ready.

Mr. GOODING. Mr. President, I shall refuse to yield any further or for a report on my resolution. I am quite within my rights.

The PRESIDENT pro tempore. The Senator from Idaho has the floor and will proceed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. GOODING. Mr. President, speaking to the resolution which I introduced yesterday, first I want to say that no man in this country has a higher regard for the press than I have. No citizens have rendered a greater service to the American people than those who edit and control our newspapers.

As a rule, it may be said that the newspaper men of the country are fearless in discussing public questions, keenly interested in advocating those principles which they believe are for the best interests of the people, always ready to safeguard the rights of the people and to protect and defend our principles of government.

I have known cases of heroic service on the part of the press in my own State. During the great murder trials of Haywood, Moyer, and Pettibone the Idaho Statesman courageously and fearlessly defended the State. It will be remembered that ex-Governor Steunenberg was assassinated for his enforcement of law and order when he was Governor of Idaho. Bill Haywood, the greatest criminal this country has ever produced, Moyer, and Pettibone would have paid the full penalty for the assassination of ex-Governor Steunenberg if others connected with the case had shown equal courage during those great murder trials. So I hope that anything I may say at this time will not be construed as a lack of appreciation of the great public press of America.

No citizen in this country, in my judgment, gives so much and gets so little in return as the editor of the country newspaper. I have seen him struggle along for years, making barely a living, and always defending the rights of the community and standing for those things that are for the best interests of the State and the Nation.

I have no quarrel, Mr. President, with the Democratic newspapers that believe that protection is unconstitutional and immoral. The platforms of the Democratic Party for nearly a hundred years have declared protection unconstitutional. They have a right to condemn this tariff bill and say anything they please, of course, so long as they tell the truth about it from their viewpoint. But in all lines of business and all classes of trade, and in society everywhere, there are those who do not measure up to the high standard of their profession, and I care not whether that be the humble and lowly profession of the farmer or what some people call the high profession of journalism. In other words, there are crooks in every trade and in every line of business, and I am convinced that journalism is no exception, although I am going to say that it is only found to a limited extent in journalism, for which the American people are truly thankful.

Mr. President, at first it was hard for me to understand why some of the great newspapers of this country should make such a vicious attack upon some of the members of the so-called agricultural tariff bloc. I was at a loss to understand why the New York Herald should be so bitter in its denunciation and quite willing to destroy a Senator's good name in order to create a prejudice against the tariff bill that is now before the Senate. Their viciousness excited my curiosity, and I concluded to investigate this man Munsey, who has been posing as a great American for so many years.

Mr. Munsey's attitude toward the Republican Party and the present tariff bill and the agricultural bloc is easily understood when his great interest in foreign countries is unmasked, and it will be easy for the Republicans of this country to understand why Mr. Munsey has turned a Democrat and a free trader when the mask is torn off.

Mr. President, last September there was organized in Paris a concern known as the General Real Estate & Trust Co., which was to take over and liquidate the $400,000,000 estate of Archduke Frederick of Austria and his family.

I ask, Mr. President, that the Secretary may read the following articles, clipped from the New York Herald and cabled from its Paris bureau under date of September 11, 1921, and four articles which appeared in the New York Times on September 12, 13, 14, and 27, 1921, respectively.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read as requested.

The reading clerk read as follows:

AMERICANS ACQUIRE $200,000,000 ESTATE OF ROYAL AUSTRIANS—ARCHDUKE AND SYNDICATE AGREE ON PLAN TO SAVE VAST HOLDINGS IN EUROPE—STATES TO BE SUED—THEY CONFISCATE VALUABLE PROPERTIES IN DEFIANCE OF TREATIES, SAY INVESTORS—FACTORIES TO BE OPENED—UNITED STATES METHODS TO BE APPLIED TO GREAT PROPERTY, INCLUDING STEEL MILLS, PALACES, AND ART MUSEUMS.

(Special cable to the New York Herald. Copyright, 1921, by the New York Herald.)

NEW YORK HERALD BUREAU,
Paris, September 11.

Another chapter of one of the most dramatic and extraordinary episodes arising from the war was closed at a meeting in the drawing room of Samuel Untermyer, of New York, at the Ritz Hotel here yesterday.

What happened at this gathering was a culmination of negotiations between parties which have been meeting for two months in various places in Germany and Austria and in Paris. These were on one part Archduke Frederick, of Austria, and Archduke Albrecht, his son; Archduchess Isabella, his wife, who was Princess Croy, and the six daughters of the archducal family, with their counsel, Dr. Wilhelm Rosenberg, of Vienna, and Dr. Aurel Egry, of Budapest.

On the other side was an American syndicate, represented by Samuel Untermyer, and including such men as Charles H. Sabin, J. Leonard Replogle, Frank A. Munsey, Thomas J. Felder, William R. Honnald, Louis Chevrillon, and their associates.

$200,000,000 ESTATE INVOLVED.

The story concerns the vast estates of the Archduke Frederick, who throughout the war was field marshal and commander in chief of the Austro-Hungarian armies and whose wealth generally was estimated before the war as well above $200,000,000. From reports current for a year and accentuated in the last few months by meetings at Carlsbad, Kissingen, Vienna, and Paris, but which could not be verified, the facts are:

While the archduke is a member of the Hapsburg family, his lineage and connections extend back still further; also he is uncle of the present King of Spain, Alfonso XIII, whose mother is his sister. Another sister formerly was Queen of Bavaria.

The line goes back to Marie Therese, who reigned from 1740 to 1780. Her eldest daughter, the Archduchess Marie Christine, was married to Duke Albrecht of Save Teschen, who was a member of the Saxonian house. Not having children, they adopted their nephew, Archduke Charles, a brother of Emperor Francis I, who was a grandson of Marie Therese, and who reigned from 1792 to 1835 and who himself had no children.

Charles was commander in chief of the Austrian Army in Austria's wars against Napoleon. It was he who won the Battle of Aspern-Essling in 1819. Archduke Albrecht was the eldest son of Charles, and was born in 1819 and died in 1893. He won the Battle of Kustozza in 1866 in the Austrian war against Sardinia. Albrecht had no children.

The present Archduke Frederick is the son of Albrecht's brother, Charles Ferdinand. The fortune inherited by the present archduke, largely from his uncle Albrecht, was increased by wise investments and returns from new enterprises.

ARCHDUKE'S HOLDINGS VARIED.

Prior to the war Archduke Frederick was generally regarded as one of the richest land and industrial owners in Europe. His holdings were distributed throughout Austria-Hungary, Czechoslovakia, Yugoslavia, Poland, Rumania, and Italy. They included the world-renowned steel works and mines at Teschen, which is now partly in Czechoslovakia and partly in Poland; vast working forest lands, amounting to hundreds of thousands of acres, scattered over several countries; and numerous other industries, including dairies which supply milk and butter to Vienna; sugar plantations and factories, palaces, apartment houses, and other private properties in Vienna and elsewhere, historic castles in various parts of the Continent, and the great Albertina Museum in Vienna, which is said to contain more valuable art treasures of its kind than any in the world, there being nearly 1,000,000 objects in the collection.

All his properties and art objects were acquired by private enterprise, and the funds of the archducal family were accumulated largely in industries. Its fortune was built essentially on saving and business sagacity. None of it was based on royal gifts or concessions. Before the war it yielded a yearly income in the millions.

At the close of the war the archduke found himself excluded from all of his properties in the countries for which he had fought. Some had been sequestrated; others were alleged to have been confiscated, some by the reconstituted old governments and others by new states in whose jurisdiction they were put by peace treaties. This action was based solely on the archduke's almost unrecognizable and untraceable kinship to the ex-sovereign.

In none of these cases, except a small estate in Italy, could it be said that the archduke was the enemy of the country in which his property had been situated. On the contrary, he was the head of armies whose countries are now endeavoring to take away his property.

GETS AID OF AMERICANS.

In the summer of 1919 the archduke and his family were living in Switzerland, where he made the acquaintance of Thomas J. Felder, an American living in Paris. The bulk of the archduke's properties were mainly his own, although use of part of them had been for a time impracticable and the operation of various industries was paralyzed by the disorganization of the war.

An arrangement was made in October, 1919, whereby the archduke transferred his various properties and interests, except those in New Hungary, to a corporation organized in Switzerland to take over their administration. Mr. Felder was to form a syndicate in America to acquire substantial interests in the new company. He obtained the required capital, and interested some of the most prominent men in America in the enterprise.

When various governments enacted laws and took other measures to confiscate the properties internal differences arose between the archducal family and the American syndicate, and litigation in the Swiss courts followed. All of these differences have been adjusted by an agreement executed at the Ritz.

The American syndicate will proceed to enforce its rights against several governments which are withholding possession of the estate from the Swiss corporation. The syndicate is particularly anxious to get prompt return of the Teschen works and various lands and other industries, so as to resume their operation and introduce American methods.

DEFIANCE OF TREATIES.

Since the territory constituting Czechoslovakia, Yugolavia, Poland, and Rumania was taken from the Austro-Hungarian Empire on the distinct treaty stipulations that private properties of citizens and subjects of the one-time Austro-Hungarian Empire could not be confiscated, it is explained by the syndicate and the archducal family that attempted action and laws enacted in these new countries to validate such action are a flagrant violation and defiance of the treaties.

Complaint accordingly is about to be lodged before tribunals established under the peace treaties. The new sovereign states will be required to appear, and the question of the right to confiscate these vast estates will be contested aggressively.

The new states seek to justify their action solely on the ground that the archduke is a member of the royal Hapsburg family, and that confiscation of his property therefore is sanctioned by the treaties. This construction is disputed by the archduke and the syndicate, who contend that the right of confiscation applies only to the state property of the former reigning family and not to the fortunes privately accumulated in industrial enterprises by citizens of the old empire merely because they happen to be members of the Hapsburg family.

NEW LAW AFFECTS PALACES.

Attempted confiscation of the Albertina Museum and of the palaces in Vienna likewise will be contested, although the attempted confiscation was based on a new law passed by the Austrian Parliament and predicated on the ground that the Archduke Frederick is a Hapsburg and that these estates are entailed.

Properties in Poland, regarding which that Government has taken no action, and in Rumania doubtless will be retained by the family without litigation in view of recently established precedents in the courts of those countries.

In connection with these contentions and actions of the new states it was pointed out that if they were permitted to confiscate private property put under their jurisdiction, although treaties creating their sovereignty said the owners should not be molested in their property rights, there was no reason why they should not with impunity disregard all the other conditions of the treaties. It is not believed any such action will be sanctioned or tolerated.

Archduke Albrecht refused to confirm, deny, or comment on the story, nor would any of the parties or counsel say anything, except that Mr. Felder admitted the substantial accuracy of the account. He declined to say anything further than that before the syndicate undertook the business it had communicated with the American Department of State and the French authorities and was assured that there was no possible objection to its proposed investment.

New and interesting questions regarding treaty rights and obligations of the new states are involved in the litigations about to be instituted, and developments may be expected soon.

—

[Special cable to New York Times.]

PARIS, September 11, 1921.—At the Ritz Hotel here yesterday an agreement was signed between representatives of a big American syndicate and the Archduke Frederick of Austria and his family, by which the American syndicate took over the whole of the archduke's estates in the dismembered Austrian Empire.

These estates include the rich steel works and mines at Teschen, vast forests, lands stretching across many miles of several new central European Republics, farms, factories, apartment houses, palaces, castles, and even the celebrated Albertina Museum, in Vienna, in which are housed about 1,000,000 articles of artistic and historical interest. The value of the property is conservatively estimated at $200,000,000.

In the syndicate which is taking the control of this great and varied property are, it is understood, Charles H. Sabin, J. Leonard Replogle, Frank A. Munsey, Thomas J. Felder, William A. Honnald, and Louis Cheverillon. Their representative here, in whose suite at the Ritz the agreement was signed yesterday, is Samuel Untermyer, of New York.

The negotiations began in the summer of 1919, when Thomas J. Felder, an American whose home is in Paris, approached the archduke, who was then living in Switzerland, to see if any purchase could be made out of his large estates. During the war, it will be remembered, Archduke Frederick was for a time commander in chief of the Austro-Hungarian armies. He is a member of the Hapsburg family, but belongs to a branch which has been for centuries distinct from the reigning house. One of his sisters is the Queen Dowager of Spain and another was the Queen of Bavaria. The archduke himself married Princess Croy, and she, with her son, Archduke Albrecht, and six daughters, were present yesterday at the Ritz Hotel to witness the agreement as to the disposal of the family property.

When Mr. Felder began the negotiations with the archduke the property was mainly in his possession, though some had been sequestrated. Between the two an agreement was made in October, 1919, whereby the archduke was to transfer his various properties and interests, except those in Hungary, to a corporation to be organized and which was then organized in Switzerland to take over, and which did take over, the administration of the estates. Mr. Felder further undertook to form a syndicate in America which would acquire substantial interest in the new corporation; and this he succeeded in doing, interesting the men whose names have been mentioned.

A period of trouble, however, shortly afterwards set in for the corporation. On the ground that the archduke was a Hapsburg, the Governments of some of the new Republics in which his properties were located legislated for their confiscation. This action raised difficulties between the archducal family and the American syndicate, which culminated in litigation in the Swiss courts. It was these difficulties and the differences which were ended by the agreement which was signed here yesterday.

The American syndicate has been freed from complications and ambiguities, and its directors now propose to proceed to enforce their rights against the several Governments which are withholding possession of the estates from the Swiss corporation. Especially they are anxious to secure prompt return of the Teschen works and the forests and farm properties so as to resume their operation on American lines.

The ground on which they will claim restoration of the lands is the stipulation in the treaties of peace concerning the dismemberment of the Austro-Hungarian Empire that the private property of citizens and subjects of the former Empire could not be confiscated by the new States. Under an interpretation of the treaties that will be advanced, it will be claimed that the Governments of the new States are violating their treaties in legislating for the confiscation of the former archduke's estates on the ground that the archduke is a member of the royal family and that his property is therefore liable to confiscation. The interpretation of the treaty in this respect which will be advanced by the syndicate and the archduke is that the right of

confiscation applies only to the State property of the former reigning family and not to private fortunes, such as the estates of the archduke are represented to be.

This legal contest, involving a discussion of the peace treaties between the Governments of the new central European States and the representatives of this purely American syndicate, will be the next step in this interesting attempt by American interests to secure so large a measure of industrial control of central Europe.

—

SEPTEMBER 13, 1921.

The management of the estate of the Archduke Frederick of Austria and his family, in which a group of American capitalists has obtained an interest, will be operated by the General Real Estate & Trust Co., recently incorporated in Geneva, Switzerland, with a capitalization of $500,000. Two-thirds of the stock of this company is owned by the Hapsburg family, while one-third is owned by the American syndicate. Rene Viviani, former premier of France, has been retained to obtain a release of the properties which have been confiscated by the various Governments. These details were divulged yesterday by J. Leonard Replogle, who heads the American interests.

Mr. Viviani has been intrusted with the task of bringing the matter before the mixed tribunal of the League of Nations on the ground that the confiscation of some of the estates was a violation of the treaty of St. Germain.

Negotiations for the control of this vast estate started two years ago, when Mr. Replogle, on one of his visits abroad, negotiated with Eugene Schneider, the French steel manufacturer, to obtain an interest in the Bergunhutten steel plant, located at Teschen, Czechoslovakia. This deal went through, and Mr. Replogle is one of the directors of this company. Following this, the parties interested were approached on the matter of taking over additional properties, and finally the deal reached such large proportions that the assistance of other Americans was solicited.

The Teschen steel plant is said to be modern in every detail. It employs approximately 20,000 men at the present time, according to Mr. Replogle, and is operating at about 85 per cent of capacity. It has its own by-product coke ovens, coal mines, bar and plate mills, and, besides, is one of the lowest-cost producers of steel compared with any of the large plants in this country in equipment. Mr. Schneider will continue to operate the plant.

The properties of the Hapsburg family taken over by the General Real Estate & Trust Co. include approximately 1,200,000 acres of land, of which 60,000 acres are in Italy, 120,000 in Rumania, 290,000 in Hungary, 200,000 in Austria, and 200,000 in Czechoslovakia. It includes from 12 to 14 beet-sugar factories, several coal mines, apartment houses in the larger cities of Austria and Hungary, palaces, and the Albertine Museum in Vienna. The value of the art objects in this museum alone is estimated at $100,000,000. The Hapsburg family before the war was considered among the wealthiest in Europe, comparing with the Czar of Russia and the Rothschilds.

It is the intention of the trust company, which is headed by H. S. Endsley as president, to liquidate the landholdings and other property as soon as possible, but as about 50 per cent of this property has been confiscated by various countries it is believed that realization on them will be a long drawn-out affair. The manufacturing plants, however, will be operated as heretofore by the trust company, which is to be managed by Charles H. Sabin, president of the Guaranty Trust Co. of this city; Mr. Replogle, president of the Vanadium Steel Co.; and Frank A. Munsey. Mr. Endsley was president of the Replogle Steel Co. during its period of reorganization. Rene Viviani is general counsel of the General Real Estate & Trust Co., and Samuel Untermyer represents the American interests.

Associated with Messrs. Sabin, Replogle, and Munsey are Thomas J. Felder, William A. Honnald, Louis Chevrillon, and Dr. Hugh Young, of Johns Hopkins University. Mr. Felder has been interested in the negotiations from the start and was associated with Mr. Replogle in securing an interest in the Bergunhutten steel plant. He is a son-in-law of the late Milton Smith, president of the Louisville & Nashville Railroad.

The investment in the General Real Estate & Trust Co. has been completely financed and there will be no offering of securities either in this country or abroad. The investment is a personal one on behalf of the individuals in the American group. As the holdings of the Hapsburg estate are liquidated by the trust company, dividends will be distributed in proportion to the holdings of the Hapsburg family, which is two-thirds, and to the American syndicate, which is one-third.

Mr. Replogle has made two visits abroad investigating the property, one last year and one this year. The plans call for Mr. Replogle making an annual visit to Europe in behalf of the local syndicate.

—

SEPTEMBER 14, 1921.

Charles H. Sabin, president of the Guaranty Trust Co., will not be one of the managers of the General Real Estate & Trust Co., which was organized in Geneva, Switzerland, to liquidate the $400,000,000 estate of the Archduke Frederick of Austria and his family. Mr. Sabin will be one of the partners of the American syndicate associated with J. Leonard Replogle and Frank Munsey.

—

NEW YORK, *September 27, 1921.*

Samuel Untermyer, counsel for the American syndicate which obtained a one-third interest in the $400,000,000 estate of the Archduke Frederick of Austria, branded as false yesterday reports that the archduke and archduchess were dissatisfied with the agreement and had started proceedings to withdraw. The estate is scattered over seven countries and consists of more than 1,000,000 acres of lands, coal mines, steel plants, sugar-beet factories, much improved real estate, including modern apartment houses, and the famous Albertina Museum in Vienna. The American syndicate, which is being managed by J. Leonard Replogle, Charles H. Sabin, and Frank A. Munsey, undertook to liquidate the estate. Mr. Untermyer said, in connection with the report:

"The story is a silly fabrication from beginning to end. There is perfect harmony, sympathy, and understanding between the archducal family and the syndicate. Since I left there, and within the last 10 days, the directors of the trust company that holds the property met in Geneva, and by unanimous vote ratified the contracts that were executed in Paris the day before my departure. The interests are now together working out the many complicated problems involved in the administration of the vast estate, and are in constant and harmonious communication and cooperation to that end. Somebody has fooled Mr. Von Weigand, for whom I have a high personal regard, and whose good faith in cabling this foolish yarn I do not doubt."

Mr. GOODING. Mr. President, these articles show very plainly why Mr. Munsey has turned his hounds loose on those Senators who are trying to protect American industries and American labor.

With Mr. Munsey's interest in one of the greatest steel plants in the world, employing from twenty to thirty thousand men and running 85 per cent capacity, owning its own iron mines, its own coal mines, and all the rest of the by-products that go into the making of steel, his interest in one and a quarter million acres of forest and fertile lands, his interest in glass factories, pottery plants, 12 or 14 sugar-beet factories, and other industrial institutions in foreign lands, it is not hard to understand why Mr. Munsey has turned his hounds loose on those Senators who are trying to protect American industries and American labor, nor is it strange that he has singled out the members of the tariff bloc of the Senate; for without the steadying influence of the tariff bloc this propaganda that has been going on by Munsey, Goldman, and the international bankers and their kind would have defeated any attempt to pass a protective tariff measure at this session. So I say again to Mr. Munsey and his hounds, let them come on. I will take my chances with the American farmer, the American manufacturer, the American laborer, and the American people, regardless of what occupation they follow, while he hobnobs with royalty and exploits the poorly paid labor of Europe.

No reason is ascribed in any of these articles as to why Mr. Munsey, owner and publisher of these New York papers, should have been selected as one of those to become engaged as a member of this syndicate which holds such vast properties, many of which are producing tremendous quantities of goods which enter into competition of like products of American industries. It may be, in this connection, that it would be well to investigate the well-defined rumors which circulated in Washington, Baltimore, and New York during the years immediately prior to the outbreak of the European War and during the early period of that war.

It was commonly reported in banking circles in those cities, so I am reliably informed, that Mr. Munsey had tremendous holdings of bonds and securities of the Austrian Government. It is a matter of common public knowledge that every year for a number of years previous to the outbreak of the war in Europe Mr. Munsey spent several months at the famous watering places located in the Austrian Empire. In fact, he was marooned in the Austrian Empire when the war suddenly burst over Europe on August 1, 1914. His automobile was confiscated by the Austrian Government, and other personal property which he had with him was held up. He had considerable difficulty, as did hundreds of other Americans traveling abroad that year, in getting out of Europe, and was put to many inconveniences in so doing.

Although he eventually arrived in this country with a safe skin, Mr. Munsey's Americanism, even at that time, was of such a thin veneer that when he returned home, instead of being thankful for his safe arrival he proceeded to use the editorial columns of his papers to denounce the American Government for being so grossly negligent as to permit so great an American as he to have been inconvenienced and discommoded by a world-wide upheaval.

It was commonly reported in banking circles in 1912, 1913, and 1914 that upon his return from Europe each of those years Mr. Munsey brought with him hundreds of thousands of dollars' worth of Austrian Government bonds, part of which he attempted to sell to his friends and part of which he attempted to market to the public through his trust companies located in Washington and Baltimore. A greater part, however, he was supposed to have kept because he regarded them as gilt-edge investments.

Mr. President, I will leave the people to pass upon the action of an American who invested vast sums in foreign properties; who takes the money he earns from American people and places it in factories, mines, farms, and other industries abroad for the purpose of building up foreign countries and adding to their prosperity, while at the same time through exploiting their poorly paid labor he is able to reap extortionate profits; but it is certainly in poor grace for such a one to criticize, through columns of newspapers which he owns, those Americans who have accumulated properties in this country and who have invested what properties they have legitimately earned in American enterprises which build up America.

Mr. President, in view of Mr. Munsey's great newspaper holdings in America and his effort to prejudice public opinion against American legislation in the interest of his foreign investments, the people of the United States have a right to know all the facts relating to Mr. Munsey's foreign holdings in European industries, stocks, bonds, and other securities.

If the Senators who have stood for protection to American industries and American labor are to be blackmailed in the in-

terest of Mr. Munsey's foreign investments, then I want to know about it.

Let us examine further the attitude of the New York Herald. This newspaper is frequently referred to as a Republican newspaper. It has consistently and persistently fought any legislation by this Congress which was in the interests of this country whenever American interests came into conflict with foreign interests. The managing editor of the New York Herald is a Democrat. He was trained and educated in the principles of the Democratic Party by the late Joseph Pulitzer. He spent the greater part of his newspaper career as the managing editor of the New York World. About two years ago Mr. Charles M. Lincoln left the World to direct the policy of the New York Herald for Mr. Munsey. He is now the managing editor of that newspaper. The Washington correspondent of the New York Herald, Mr. Louis Seibold, was, like Mr. Lincoln, schooled in the principles of the Democratic Party by the late Joseph Pulitzer. He was for many years the Washington representative of the New York World. During the past two years he has been in charge of the Washington bureau of the New York Herald.

Thus the two responsible officials of the New York Herald who are in charge of its political news and policies are dyed-in-the-wool Democrats, who have always been and always will be the willing agents of the Democratic Party. I heard with more than passing interest the eulogy passed upon Mr. Seibold on the floor of the Senate the other day by the distinguished Senator from North Carolina, who pronounced Mr. Seibold one of the greatest writers in America. This is the opinion of all Democrats. Under the direction of Mr. Seibold and Mr. Lincoln the New York Herald has been definitely aligned against the Republican Party and the Republican administration for more than a year. The tariff is not the only administrative policy which the New York Herald is opposing or has opposed. Through its news and its editorial columns it has persistently, consistently, and most bitterly taken issue with the Republican administration upon all policies. It has not had a Republican impulse since this administration began to exert its influence in public affairs. Senators who quote from the New York Herald, and ascribe to it Republicanism, offer an insult to public intelligence and make a laughing stock of themselves among newspaper men.

The New York Herald is not the only newspaper which is frequently quoted upon the floor as Republican. The record of the Senate proceedings of August 1 shows that the Senator from North Carolina [Mr. SIMMONS] had inserted a large number of editorials from papers which he labeled Republican. Among them was the New York Evening Post. It is well known that the New York Evening Post for at least a generation has been Democratic. It gained national reputation by its support of Cleveland. It has been critical to a degree of every Republican administration for the last quarter of a century. Under its ownership by Mr. Thomas W. Lamont, of the Morgan banking house, in 1920, it was conspicuous for its support of Mr. Cox, Democratic candidate for President. Since that time Mr. Lamont has disposed of his interest to a syndicate, among which are such distinguished and well-known Democrats as Cleveland H. Dodge, who financed President Wilson's first campaign; Frank Polk, who was Undersecretary of State under the Wilson régime; and other leading Democrats.

Other newspapers are quoted and credited as being Republican which are no more Republican than the New York Evening Post and the New York Herald. A paper's policy is determined not by its ancestry but by the utterances of its editorial columns and the slant of its news columns. In this connection I ask that the Secretary read the following article which appeared in the Boston Herald of July 29, 1922. It was written by Mr. Whiting, the Washington correspondent of the Boston Herald, who contributes to that paper one column of editorial matter a day under his own signature.

The PRESIDENT pro tempore. The Secretary will read, without objection.

The reading clerk read as follows:

KNUTE NELSON, United States Senator from Minnesota, who has been one of the supporting members of IRVINE LENROOT'S tariff rebellion in the Senate, could hardly be classed as a rebel by nature. He has had a long political career, in which irregularity has not been conspicuous. He is convinced that the Finance Committee's ideas on the wool tariff, or the ideas which the Finance Committee is supporting, are not good from any reasonable point of view. Thus he joins his voice and vote to those of LENROOT, and thus finds himself one of an aggressive minority among the majority Members of the Senate. NELSON is one of the veterans, both in service and in years, in the Senate. LENROOT is one of the youngsters. NELSON'S support of LENROOT'S position now removes from it any suspicion of brashness. NELSON is a cautious man.

KNUTE NELSON looks so much like a Yankee he ought to be one. Visitors to the Senate gallery often pick him out as a "typical New England Senator." He is short of stature, a trifle roly-poly but not too much so; he wears a short, white chin beard and he shaves his upper lip. It is this method of treating his whiskerial equipment which gives him his Yankee appearance. He is no Yankee, not even an ex-Yankee, of whom the Middle West and West have many. He has no claim to New England residence or association. He was born in Norway in 1843, but as he came to this country when he was 6 years old he is native enough for all practical purposes. He is a very good American. He went to Chicago first, but by the time he was 7½ years old he reformed and went to Wisconsin. He stuck it out there until 1871, when he moved to Minnesota, thus escaping future political association with BOB LA FOLLETTE; but maybe Wisconsin memories operate to incline him to friendship now with LENROOT, the better exhibit of Wisconsin politics.

New England interest is now drawn, but with little promise of a thrill, to another western Senator, FRANK R. GOODING, of Idaho, also foreign born. Local interest in GOODING is stirred by a letter he wrote to Conrad Hobbs, of Boston, in which he expressed a low opinion of those who import wool. As we interpret the easily interpreted cerebral spasms of the junior Senator from Idaho he believes that those who grow wool on the backs of sheep are of a much higher moral character than those who import it from sheep born, reared, and sheared in an alien country. It is probably the Gooding idea that there is something in the placid and moderate intellectual equipment of sheep which subtly imparts to its human associates an incapacity for evil, a disinclination to sordidness, and a fitness for service in the United States Senate. Thus far Mr. GOODING has not founded a bloc on this basis, but when the sheep are enfranchised he will have it.

FRANK GOODING is a new Senator, who takes himself with an intense seriousness. He was born in England, but left that country in 1867, his parents coming to America and young Frank deeming it expedient to accompany them, being in youth. We do not know what England lost by his migration. Over here we gained a Senator. Young Mr. GOODING was educated in the public schools of that succulently named place, Paw Paw, Mich., thus imbibing through the avenues of scholasticism a sweet regard for the appealing voice of native sheep, whose cry in joy and sorrow manifests an alliteration not dissimilar to that of the Michigan town. At the age of 15, or by other accounts 17, he moved to California, but soon moved again, to Idaho, where he was for many years a contractor for mining companies and where during the past 20 years he has been engaged in the stock and farming business, with the emphasis on the woolies. Few, if any, in Idaho own more sheep than FRANK GOODING. For his sheep, and the hair upon their backs, he would sacrifice every wool merchant in Boston and surrounding territory. Judging by his letter to Mr. Hobbs, he would even sacrifice courtesy.

As accurately as our judgment will allow us to estimate the representation from Idaho in the United States Senate, there is enough statesmanship therein to provide two high-grade Senators. The division, however, is uneven, which is unfortunate for the junior Senator.

The Senate and the wool tariff, however, are not the only things in life. We are reminded by a reader, apropos our recent publication of what has been called the oldest story in the world, that Wendell Phillips in his lecture on the "Lost arts," first delivered in 1837 (Speeches of Wendell Phillips, 1892, p. 371), says:

"There is one story which it is said Washington has related, of a man who went to an inn and asked for a drink from the landlord, who pushed forward a wine glass about half the usual size, and said, 'That glass out of which you are drinking is 40 years old.' 'Well,' said the thirsty traveler, contemplating its diminutive proportions, 'I think it is the smallest thing of its age I ever saw.'

"That story as told is given as a story of Athens 375 years before Christ was born."

Or, we might add, possessing later information than that available to Wendell Phillips, 2,294 years before the adoption of our own eighteenth amendment.

Mr. GOODING. Mr. President, I admit the charge contained in this article that I was born in a foreign country under the British flag. The publisher and responsible editor of the Boston Herald is Robert J. O'Brien, a very distinguished and honorable gentleman, but who, as his name indicates, came from foreign-born ancestry of the same country which gave me birth. I now ask the Secretary to read the following article, which appeared in the Boston Herald of June 13, 1922.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

PAPERS TO AID FOREIGN TRADE—AMERICAN NEWSPAPERS COMBINE TO ASSIST FIRMS TO "SELL AMERICA"—OPEN OFFICES IN LONDON AND PARIS.

Announcement of the organization of the Associated American Newspapers brings to public notice the newest and one of the most comprehensive plans yet devised to assist European manufacturers and merchants to develop their business in America through the mediumship of newspaper advertising.

The association has been formed as a result of a constant and growing demand in the American market for European merchandise to make an intensive effort to assist in this market development, and success is assured in advance, as each newspaper member of the association is a tremendous force in its market or selling zone, and the field covered by these newspapers comprises the wealthiest, most populous, most concentrated, and most easily developed markets in the United States.

The Associated American Newspapers comprises the following widely known newspapers: The Boston Herald and Traveler, the Chicago Tribune, the New York Times, the Cleveland Plain Dealer, the Philadelphia Evening Bulletin, the Washington Star, the Pittsburgh Post and Sun, the St. Louis Globe-Democrat, and the Minneapolis Tribune.

Through this association of representative newspapers is placed at the disposal of European advertisers and advertising agents the highest development of newspaper merchandising service to assist European firms in planning to "sell America."

Two European offices already have been established and are now functioning—the London office at 125 Pall Mall SW., in charge of Mortimer Bryands, as representative for Great Britain, and the Paris office at 5 Rue Lamartine, with R. A. Washburn in charge, as representative on the Continent. Both offices are equipped with telephone and cable connections and with every other facility to aid the prospective advertiser in properly preparing his publicity message to the American public.

Mr. GOODING. Mr. President, evidently the main distinction between Mr. O'Brien and myself is that, although both of

us are of foreign-born ancestry, I am devoting myself to American interests and the protection and development of American industry, while Mr. O'Brien is using his publication, to quote from his paper, "to assist European manufacturers and merchants to develop their business in America," which, of course, must be done, and will be done, at the expense of American manufacturers and American labor.

When the Senate committee undertakes this investigation I shall insist that all the facts relating to Mr. Munsey's foreign investments be probed to the bottom in order that the American people may learn why Mr. Munsey is to-day the champion of foreign industries and the enemy of American industry and labor. The charge of the New York Herald against Members of the Senate is a poor camouflage for the concealment of Mr. Munsey's exploitation of the workers of central Europe and his investments in other foreign industries.

While we are investigating Mr. Munsey, Mr. President, we should also investigate the financial interests of other newspapers, such as the Boston Herald and those which it advertises as its associates in the plan to sell America to European manufacturers and merchants. The newspapers which it lists as engaged in selling America to foreign manufacturers and merchants compose those which have been most critical of the pending protective tariff bill, namely, the Chicago Tribune, the New York Times, the Cleveland Plain Dealer, the St. Louis Globe-Democrat, and the Minneapolis Tribune. Let us ascertain, Mr. President, why these publications are so interested in the defeat of a protective tariff.

Let us settle for all time whether it is a crime to stand for the protection of American industries, but a virtue and an exhibition of patriotism to work for the destruction of American industry.

Mr. LODGE. Mr. President, will the Senator allow me to say a word?

Mr. GOODING. Certainly.

Mr. LODGE. I happened to hear what the Senator said in regard to Mr. O'Brien, editor of the Boston Herald. I merely wish to say, in justice to Mr. O'Brien, that he was born in this country and is a graduate of Harvard. He was educated here and is as good an American as I know, although I differ with him on some tariff points, no doubt.

Mr. GOODING. My statement was that he was of foreign ancestry, the same as myself.

Mr. LODGE. We are all of foreign ancestry if we go back far enough.

Mr. GOODING. I understand that.

Continual reference is made upon the floor of the Senate that manufacturers, farmers, and others who have investments have no right to advocate a measure which would afford protection to those investments. A great deal has been said regarding the selfishness of those who are interested in the passage of a protective tariff bill as a whole. What I propose to do by my resolution is to investigate the selfishness of those who would profit by the defeat of proposed schedules and who would put large sums of mony into their pocket by the defeat of the tariff bill as a whole. I do not make the charge that Members of this body have voted for the defeat of rates proposed by the Senate Finance Committee because by defeating the rates they would profit greatly thereby. But I ask the question whether or not Members of this body have not voted against protective rates because they were stockholders in corporations that wished the defeat of such rates? I ask the question whether there are not Members of this body who are heavily interested in newspapers who have indicated their opposition to proposed tariff rates on print paper and wood pulp because it is to their financial interests to do so?

If it is a crime for a United States Senator to vote for protection because he might safeguard his own investments it is also a crime for a United States Senator to vote for free trade or a smaller measure of protection in order that he may protect his investments. You can not make fish of one and fowl of the other.

I am willing to be judged by the same standard by which other Senators are judged. If it has become a crime in the United States for a man with property and investments in this country to seek public office and sit in legislative halls, then we have reached the level of Russia. If it is a misdemeanor and a violation of public ethics and morals for those who have accumulated something to assist in framing legislation, then I am willing, along with other Senators in this body who own property and have investments, to resign.

Let us walk out together who are in that class and leave the Senate in the hands of those who are without property. That is what happened in Russia. One of the provisions of the Bolshevik constitution is that in the Soviet government no man who owns property is permitted to vote or hold office. The whole world is witnessing the result of such a policy. But if it is the judgment of this Senate that a man can not legislate honestly because he has property that may be favorably affected by such legislation I am willing, along with all other Senators who have property and investments, to step down and out and let the people send those who are without property to legislate for them.

But, Mr. President, whether I remain in the United States Senate or depart from it, I for one intend to continue for the rest of my life to fight for the protection of American people, for the protection of American industry and American labor, for the men and women of this country who believe that our prosperity depends upon our ability as a people and a nation to secure and protect the rights of property and to maintain a living wage and constant employment for the working people of the United States. Mr. Munsey and his associates may continue to be the enemies of American manufacture, the American farmer, and American labor. He and his mouthpiece upon the floor of this Senate may continue to denounce those of us who own property, but that will not deter me from continuing my fight for American rights, American standards, and the American Nation.

Mr. President, I have here a statement of the investment of American bankers in foreign government bonds, foreign railroads, and other foreign industries. It shows that the American bankers have invested in Europe since the World War $1,530,400,000. This statement gives the rate of interest, it being in some cases 8 per cent. Such loans have been made in practically every country on earth. I ask that the statement may be printed as a part of my remarks.

The PRESIDENT pro tempore. Without objection, the statement will be printed in the RECORD.

The statement referred to is as follows:

Partial list of loans to foreign governments; foreign municipal bonds; industrial, steamship, and railway bonds, made by American bankers and floated in the United States since the war.

(Totals by years.)

FOREIGN GOVERNMENT LOANS.

European countries:		
1919	$305,000,000	
1920	254,600,000

[1] Approximately.

Mr. GOODING. Mr. President, for more than two years now the international bankers of this country, who have loaned a billion and a half dollars to foreign countries have, through public speakers and the press, been making a campaign against the pending tariff bill. Statements have been made to the effect that this is no time to enact a new tariff act; that economic and industrial conditions throughout the world are upset. For that reason they have indulged, all over this country, in a propaganda of denunciation of the pending tariff bill and opposed its passage at this time as a protective tariff measure. The time will never come when these international bankers will favor a protective tariff measure. They are internationalists and have lost interest in America.

I am wondering, Mr. President, if Senators on this side of the Chamber have forgotten how bitterly the Democrats denounced the emergency tariff bill. How well I remember the statements of the Senator from Nebraska [Mr. HITCHCOCK]. He insisted that we were handing the farmer "a gold brick." In a voice full of throbs, with crocodile tears apparently streaming down his cheeks, he said, "The farmer asked you for bread, and you gave him a stone." The little Senator from North Carolina [Mr. SIMMONS]—little in stature only, but a giant in intellect—followed a day or two afterwards with exactly the same words. After working himself up to a pitch of excitement, as he does when he is in earnest, of course, he said, "The farmer asked you for bread, and you gave him a stone."

Now, Mr. President, all at once that stone is turned into gold. For the first time, to my knowledge at least, we have had the admission by the Democratic Party that a protective tariff law has benefited the American farmer. Through their hypocritical policy on the tariff they have always denounced every protective tariff measure. The junior Senator from Mississippi [Mr. HARRISON] only a few weeks ago was so sure that no farmer had been benefited by the emergency tariff law that he introduced a resolution demanding a report from the Tariff Commission as to the benefits accruing from the operation of the emergency tariff act. That report, like almost every other report that comes from the Tariff Commission, did not announce any definite conclusion except along certain lines.

Now, Mr. President, after ridiculing and almost insulting the Senators on this side who voted for the emergency tariff bill, Democratic Senators propose to investigate in order to ascertain how many millions of dollars certain Senators may have made out of it.

It is true, Mr. President, that the emergency tariff law has proven a blessing to the American farmer. Every protective tariff law has always brought prosperity and happiness to the American people, while every free trade measure which has ever been passed by the Democratic Party has brought ruin, disaster, poverty, suffering, and distress, and soup houses in all the great cities, and even the farmers have not escaped the universal cataclysm.

Let us see about this. Who may vote for a protective tariff measure under the doctrine now promulgated? I agree with the great Jeffersonian principle that a man should not vote for any measure from which he is to be benefited if it be special legislation; but protection has been a great principle of the American people from the very foundation of this Government.

The first law to be enacted by our Congress was a protective tariff measure. Jefferson lived and died a great protectionist. Who may properly vote for a protective tariff measure or for any measure, if you please, or for any revenue law? Every man is benefited in some way or other; it can not be otherwise. There can not be any legislation if Senators are to be debarred from voting for legislation which means prosperity to the American people. Under that policy a farmer could not sit in this body and vote for an appropriation for agriculture, for he might be growing cotton, and the Government spends millions of dollars in trying to destroy the boll weevil. If a Senator owned live stock he could not vote for an appropriation for agriculture, for the Government spends millions of dollars in eradicating contagious diseases among live stock.

I have here a list of agricultural products which our Democratic friends put on the free list for the farmer. I will read the list and I will ask Senators on the other side how they are going to vote on the pending bill?

First, however, let me say that the Democratic Senator from Nebraska [Mr. HITCHCOCK] and the junior Senator from Virginia [Mr. GLASS] yesterday refused to vote on the question of wood pulp; but in looking up their record I find that they did not hesitate to vote for the bill of 1913. It is not on the schedule which may be under consideration or which finally becomes a part of the law where a Senator's vote counts so much, but it is the final vote that he casts on the bill. That is what Mr. Jefferson had reference to. Yet these Senators, though they were interested in newspapers, voted for the tariff bill of 1913, which put wood pulp on the free list. Oh, they almost made hypocrites out of themselves in the eyes of every honest man.

When was this new-found virtue called to their attention? Not until the junior Senator from Arkansas [Mr. CARAWAY] introduced a resolution to investigate a few woolgrowers be-

cause they had voted for a duty—an honest duty—on the product of the woolgrowers of this country. I presume those Senators, in order to be consistent, will vote against the pending bill before they get through. They are two great Senators, I may say, too. But it is strange, Mr. President, when great men such as we have in this body—and I say that in all seriousness and earnestness—can permit themselves to be carried so far and to do such ridiculous things in the interest of dirty politics. Dirty politics never won anything for any political party. That is all there is to this matter.

Here is the article of wheat. The Underwood-Simmons law put wheat on the free list, while the rate of duty proposed to be imposed on wheat in the pending Senate committee bill is 30 cents per bushel, and the equivalent ad valorem duty is 28 per cent. Of course, the doctrine which is sought to be invoked is an attack on the American farmer, and the American farmer accepts it as an attack on him. No farmer can sit in this body and, I think, no property holder can sit in this body and vote for any revenue law, I care not what that law may be, whether it is a tariff law or an internal-tax law or any other kind of law, if the doctrine now promulgated shall be upheld.

But let me proceed with the wheat story. If there is a Senator here who owns land and grows wheat he can not vote for the proposed duty on wheat, if the Democratic position is correct. If there is a Senator who eats bread, he can not vote for the duty on wheat or vote against it, because he would be voting in his own interest and in favor of cheaper bread. So the interest is both ways. Senators vote against protection because they believe at times, at least, such action will tend to make food products cheaper. They tell the laboring man——

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. GOODING. I do not think I desire to be interrupted at this point. They tell the American laboring man in this country how much the articles that go on the breakfast table are going to be increased in price, and then they go to the American farmer and tell him that the tariff was a gold brick; that it never did benefit him; that protection is of no benefit to him at all. Years in the past when there was no communication in this country, they always played a double tariff game; they advocated free trade in the South and protection in the North. They have never been honest in discussing the question before the American people. That is why I was so keenly interested in having the minority leader fairly and squarely—and he is always fair and square—say that he believed protection was unconstitutional and that he would go further and say it is immoral or morally wrong. I want to see this issue squarely drawn. Let us go before the American people and fight it out, because it is the greatest crime possible to conceive of or to think of that the great business interests of the American people must continue to be made the football for the selfishness of political parties. I ask again, how is any Senator going to vote for free wheat, if he eats bread?

Mr. HARRISON. Mr. President, does the Senator ask that as a question?

Mr. GOODING. No; not at this point. There will be plenty to follow, and the Senator will have an ample chance before I get through to express his views.

I wish to read from the free list under the present Democratic tariff law and show what a friend the Democratic Party is to the farmer.

Under the Underwood law corn is on the free list. The Republican Party have imposed a duty of 20 cents a bushel on corn, which is equivalent to an ad valorem duty of 25 per cent. Under the Underwood law eggs are on the free list, while in the bill pending before the Senate a duty of 8 cents a dozen is imposed, the equivalent ad valorem duty being 33 per cent. Buckwheat is on the free list under the present law, while a duty of 10 cents a hundred pounds is provided in the bill as reported to the Senate. Cotton is on the free list in the present law, while on long-staple cotton a duty of 7 cents a pound is provided in the Senate committee bill. Beef is on the free list in the Underwood law, but in the bill now pending before the Senate there is a duty proposed of 3½ cents a pound. Veal is on the free list in the Underwood law, but the pending bill provides for a duty of 3½ cents a pound. Mutton is on the free list in the Underwood law, and is to bear a rate of 2½ cents a pound under the pending bill. Lamb is on the free list under the Underwood law, but bears a duty of 5 cents a pound under the pending bill. Pork is on the free list under the Underwood law, while a duty of three-fourths of 1 cent a pound is provided in the pending measure. Bacon is on the free list in the Underwood law, while in the bill now pending a duty of 2 cents a pound is provided. Ham is on the free list in the Underwood law, while under the pending bill a protective duty of 2 cents a pound is imposed. In the Underwood-Simmons law wool is on the free list, while under the pending bill a duty of 33 cents a pound on the scoured content has been provided. Milk was on the free list in the Underwood law, while the pending bill proposes a duty of 2½ cents a pound. Potatoes are on the free list in the Underwood law, while a protective duty of 58 cents a hundred is given in the bill now pending before the Senate. Cream is on the free list in the Underwood law, and a duty of 22½ cents a gallon is provided by the pending bill. Flax is on the free list in the Underwood law, while a duty of a cent a pound is imposed in the Finance Committee bill. Hides are on the free list in the Underwood law. We have not as yet reached the paragraph dealing with hides in the pending bill, but it is to be hoped that the Republicans on this side of the Chamber will, as they have all the way through so far as agriculture interests are concerned, provide a sufficient duty on hides. Let us try to develop the several branches of agriculture which are not developed up to the requirements of the American people. Unless we do develop them, unless we pick out and seek out all of those industries which are not developed up to the requirements of this country, we will never find employment for the three and a half million men who are now out of employment, although it is midsummer with the harvest in full swing.

Let Mr. Munsey and his people have their way and defeat this tariff measure and you will have six or eight million people out of employment when the winter comes, and nothing can save us.

Lard is on the free list in the Underwood bill. It carries a duty of 1 cent a pound in the Senate bill.

Rye is on the free list in the Underwood bill. It carries a duty of 15 cents a bushel in the Senate bill.

Swine are on the free list in the Underwood bill. In the Senate bill they have a duty of one-half cent a pound.

Sheep are on the free list in the Underwood bill. They are dutiable at $2 a head in the Republican protective tariff measure.

Soya beans are free in the Underwood bill. There is a very small duty, I am sorry to say, on soya beans in the Finance Committee bill—four-tenths of a cent a pound. I have some information that I want to turn in to the committee with the hope that they will reconsider that duty. The raising of soya beans is becoming a great industry in America, and it is vitally needed in the interest of bringing back the fertility of the soil.

When we get down to rice, we find that the Underwood bill has a duty of three-eighths of a cent a pound on rough rice, equal to 4 per cent ad valorem duty. The Republican protective tariff bill has a duty of a cent a pound on rough rice.

Straw has a duty of 50 cents a ton in the Underwood bill, an equivalent ad valorem duty of 5 per cent. In the Senate Finance Committee bill it has a duty of $1.50 a ton.

Oats have a duty of 6 cents a bushel in the Underwood bill, an equivalent ad valorem duty of 16 per cent. In the Senate bill they have a duty of 15 cents a bushel, an equivalent ad valorem duty of 39 per cent.

Flaxseed carries a duty of 20 cents a bushel in the Underwood bill, an equivalent ad valorem duty of 11 per cent. In the Finance Committee bill flaxseed has a duty of 40 cents a bushel, an ad valorem duty of 22 per cent.

Honey has a duty of 10 cents a gallon in the Underwood bill, an equivalent ad valorem duty of 8 per cent. In the Finance Committee bill it carries a duty of 3 cents a pound, or 27 per cent ad valorem duty.

Hops are dutiable at 16 cents a pound in the Underwood bill; 24 cents a pound in the Finance Committee bill.

Peanuts are dutiable at three-eighths of 1 cent a pound in the Underwood bill; 3 cents a pound in the bill before the Senate.

Barley carries a duty of 15 cents a bushel in the Underwood bill, an equivalent ad valorem duty of 30 per cent. This is the highest duty given to any farm product in the Underwood bill.

I am not going to take up the time of the Senate by reviewing at greater length this remarkable showing of the generous impulse that the Democratic Party must have felt toward agriculture when they gave it the magnificent protection of a little better than 4 per cent ad valorem duty on farm products, 250 per cent lower than any Democratic free-trade measure ever gave to the farmers of the country.

I ask to have printed as a part of my remarks the table to which I have referred.

There being no objection, the table referred to was ordered to be printed in the RECORD, as follows:

Article.	Rate in Underwood law.	Equivalent ad valorem.	Rate in Senate bill.	Equivalent ad valorem.	Rate in Fordney bill.
				Per ct.	
Wheat	Free	Free	30 cents bushel	28	25 cents bushel.
Corn	do	do	20 cents bushel	25	15 cents bushel.

Eggs, frozen	2 cents pound.	7 per cent	6 cents pound	17	4 cents pound.
Grapes	25 cents cubic foot.	2 per cent	25 cents cubic foot.	2	25 cents cubic foot.
Raisins	2 cents pound.	11 per cent	2½ cents pound	17	2 cents pound

Mr. GOODING. Mr. President, the cardinal principle of the Republican Party has been protection to American industry. If there is one thing that we have advocated more than any other, it is a tariff which shall represent the honest difference in the cost of production at home and abroad. Experts of the Tariff Commission have found that 33 cents is not the honest difference in the cost of producing a pound of scoured wool in America and a pound of scoured wool in the Argentine, and yet I am to be blackmailed and denounced as a criminal for voting for a principle that the Republican Party has advocated since its birth. The experts of the Tariff Commission find that it costs 34.4 cents a pound more to grow a pound of wool in America than it does in the Argentine. There are 700,000 woolgrowers in America; and if a Senator from an agricultural State can not come here and vote and plead for protection for the American farmer, we may as well have a soviet government, and then we will have nothing better than they have over in Russia to-day, where they are destroying womanhood and motherhood and Christianity—everything that is worth living for, everything that is worth fighting for, and everything that is worth dying for.

Come on with your investigations. I want the report of the Committee to Audit and Control the Contingent Expenses of the Senate. No honest man in the Senate ought to fear an investigation, and I think they are all honest. I have not found any crooks in the United States Senate. I have a very high regard for the Members of this body; but I do think it is unfortunate, just for the dirty politics that is played to too great an extent in this country, that Senators will go so far as to question the honesty of Members of this body in charging that they have not any right to vote for protection to the industries of their States.

If I had done anything less than I have done in this body in the way of fighting for protection for the industries of my State, I would not be worthy of representing the great Commonwealth of Idaho. I think every member of the Finance Committee will bear me out in the statement that I have said less and done less for protection on wool before the Finance Committee than for any other one of the important agricultural industries. Again, I want to say that the hardest fight I have made before the committee—and I am still fighting for it—is for protection to vegetable oils, of vital interest to the cotton growers of the South, and I never saw a cotton plant growing in my life. Not only have I fought for protection for vegetable oils, but for protection for the dairy interests of this country. I have taken up a great deal more of the time of the committee in pleading and asking for protection to that great industry than for protection to any other. So I ask for the report, Mr. President, on my resolution.

Mr. HARRISON obtained the floor.

Mr. CALDER. Mr. President——

Mr. HARRISON. I yield to the Senator from New York.

Mr. CALDER. The Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution No. 330, which provided for an investigation of certain charges appearing in the press reflecting upon Members of of this body, reports the same back adversely and recommends that it do not pass.

The majority of the committee believes that the Senators referred to in these publications are men of integrity, whose votes in this body have never been influenced by any improper motive. All of them have frankly stated on the floor of the Senate their interest in the tariff bill under consideration, and the committee is of the opinion that the investigation would fail in bringing to light any additional information. The inquiry would take the time of Members of this body, and would cost a large sum of money, resulting in no benefit to the country.

Speaking for myself, I regret the intimation in the resolution that Frank A. Munsey, the owner of the New York Herald, was influenced in his opposition to the tariff bill because of some personal interest he may have in its defeat. I do not agree with Mr. Munsey in his position on this measure, but I am confident that his opposition to it is based upon what he believes to be in the best interest of the country. Mr. Munsey is one of the Nation's representative citizens, and I trust when the bill is finally passed, and all of its provisions are understood, he will come to believe that he was mistaken in his position toward it.

Mr. HARRISON. Mr. President, may I ask the Senator a question before he takes his seat? I understand, then, in view of the utterances of the Senator, that the committee in making an unfavorable report upon this resolution repudiates the charges that were made by the Senator from Idaho as to the allegations of the Herald and other newspapers of the country?

Mr. CALDER. Mr. President, the Senator from New York is not going into that question. The majority of the committee reports the resolution adversely. The Senate can do as it wishes with it.

Mr. HARRISON. But I understood the Senator to say that the committee to which this resolution was referred does not believe that there is any foundation for the charges that were made in the Gooding resolution.

Mr. CALDER. Mr. President, the committee does not go into that at all. The committee reports the resolution adversely.

The PRESIDENT pro tempore. The report will be received.

Mr. HARRISON. Mr. President——

The PRESIDENT pro tempore. The Senator from Mississippi.

Mr. GOODING. Mr. President, I suggest the absence of a quorum.

Mr. HARRISON. I have the floor, I believe.

Mr. GOODING. Will the Senator yield to permit me to suggest the absence of a quorum?

The PRESIDENT pro tempore. Does the Senator from Mississippi yield?

Mr. HARRISON. I think the Senator from Idaho is entitled to a quorum while this matter is being discussed. I yield for that purpose, but I do not want to lose my right to continue.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McCormick	Ransdell
Ball	Glass	McCumber	Robinson
Borah	Gooding	McKinley	Sheppard
Broussard	Hale	McLean	Shortridge
Bursum	Harreld	McNary	Simmons
Calder	Harrison	Myers	Smoot
Cameron	Heflin	Nelson	Spencer
Capper	Hitchcock	New	Stanfield
Caraway	Jones, N. Mex.	Newberry	Stanley
Culberson	Jones, Wash.	Nicholson	Sterling
Cummins	Kendrick	Oddie	Trammell
Curtis	Keyes	Overman	Walsh, Mass.
Dial	Ladd	Pepper	Walsh, Mont.
Dillingham	Lenroot	Phipps	Watson, Ind.
Ernst	Lodge	Pomerene	Willis

The PRESIDENT pro tempore. Sixty Senators have answered to their names. A quorum is present.

Mr. HARRISON. The action of the Committee to Audit and Control the Contingent Expenses of the Senate in making an unfavorable report on this Gooding resolution is perhaps without precedent in this body. I am quite sure that not only did it stun the Senator from Idaho, whose integrity has been challenged, but it no doubt bewildered other Senators, even those on the other side of the aisle.

A Member of this body says, in his capacity as a Senator, that certain charges against him and his colleagues are false, charges which have been published in the public print from one end of this country to the other, to the effect that they are interested in wool, interested in sheep, interested in chemicals, interested in mines, interested in oils, and because of their interest in those investments and various things which are manufactured or produced in this country that they are championing high rates against the interests of the American people.

So the Senator from Idaho, in order at least to remove that stain upon his character and the fair name of his State, and the names of other States whose Senators have been likewise charged, offers this resolution, and asks simply that five of his colleagues be appointed to make an investigation of the matter. Now, we find the chairman of the Committee to Audit and Control the Contingent Expenses of the Senate reporting unfavorably upon the resolution and asking the Senate to adopt that report which would deny the investigation, and in the same report the chairman defends a certain publisher of his own city. That is strange politics, indeed.

What is there behind all this that moves Senators? The resolution of the Senator from Idaho in simple language makes this charge, which a committee composed of his colleagues, for the most part of the same political faith he holds, turns down. The resolution reads:

> Whereas charges have been made by the New York Herald that Members of the Senate engaged in the sheep industry have thereby been financially interested in the wool schedule of the pending tariff bill—

Then there are other whereases, and it continues:

> *Resolved*, That the financial interests of Senators in the wool and sheep industries be investigated.

For what purpose? So that they can lay the facts on the table and remove whatever impression may have been wrongly created, and which has been charged in the public press. It has not been confined to any one paper. The New York Herald is not alone in saying, in its editorial columns, that Senators, in order to promote their own private welfare—add to their own pocketbooks—entered into this agreement to have their colleagues unite in the imposition of these high rates on wool.

I have before me a paper from even as far away as the mountains of the "Volunteer" State, an editorial in which makes similar charges. With such charges as these made, which no doubt the Senator from Idaho has read, I submit that he and his colleagues are entitled to an investigation that the country may know the real facts. Perhaps the committee which considered this resolution, from which the Senator from Idaho pleads for a favorable report thereon, did not see even in a Nashville paper such charges as this:

> Under a Salt Lake City date line appeared this item:
> "The Shoshone, Idaho, wool clip has been sold by a pool, headed by Senator FRANK R. GOODING and his brother, at an average price of 30 cents a pound, to the B. Harris Wool Co., of St. Louis and Salt Lake City. The clip consisted of 1,000,000 pounds. The prices paid are more than 100 per cent higher than last year, it was stated."

Last year was when the emergency tariff bill was passed by the Congress. With such allegations as that in the public press, confined to no city or no State, which people by the millions have read, not only about the Senator from Idaho but other Senators; with common rumor afloat in every hamlet and village in this land, I submit that the Senator from Idaho is entitled to a favorable report on this resolution.

Mr. BURSUM. Mr. President——

Mr. HARRISON. I will not yield just for the present. I want to get through with this proposition. Then, when I have finished, I will be glad to yield for any question.

The Senator from New York submitted this report; and my information is that only a majority of the committee joined in this unfavorable report. The Democratic member of that committee is the Senator from New Mexico [Mr. JONES]. I will ask the Senator from New York if the Senator from New Mexico did not vote to report the resolution favorably?

Mr. CALDER. The Senator from New Mexico indicated his willingness to have it reported favorably.

Mr. HARRISON. The two Republican members of that committee, or all the Republican members of the committee who were consulted, agreed to report it out unfavorably; in other words, to quash it, to smother it, to kill it, so that the reports which are rampant throughout the country can not be verified or disproved to the people, and the fair names of the Senator from Idaho and others, as well as of the States they represent in part, can not be cleansed.

So the Republican members of this committee, to which the resolution was referred, ask the other side of the Chamber, as well as this side, to kill the resolution, to strangle it, not to let this investigation come about. I say it is unprecedented in the whole history of the United States Senate.

Of course the resolution was not exactly fair to all parties concerned. It did ask for an investigation as to charges touching certain Senators having interests in wool and sheep who have voted for these high rates, which necessarily impose greater burdens upon every person in the country who uses or needs woolen clothes or woolen blankets. But there would have been many modifications to the resolution proposed, in the form of amendments, and will be, if we can vote down this unfavorable report and have the Senate consider the resolution. There will be amendments offered to it which will provide that the investigating committee shall go into an investigation such as the American people would desire, and which we should have.

Let me point out a few things left out of the resolution. It may be that the Senator from Idaho left these out inadvertently, it may be that he intentionally left them out, or it may be that because he wanted to draw the resolution quickly and get it in, so that at the earliest possible moment his skirts might be cleared, he omitted some things, and took it for granted that certainly the Senate would amend the resolution.

The first resolve indicates that one of the things to be investigated is the financial interests of Senators in the wool and sheep industries. Of course charges have been made in regard to the chemical schedule, and mining, and sugar, and other industries, which should be added to this resolution; and if this report of the committee is voted down I assure Senators that we will have an opportunity to vote on an amendment to this investigation resolution which will permit an investigation into the activities of certain sugar interests, chemical interests, mining interests, and manufacturers who are receiving benefits from the high rates imposed in this bill. Now, why the Senator should restrict it to such an extent I know not.

Mr. GOODING. Mr. President, will the Senator yield? I merely want to say to the Senator that if he will read it all——

Mr. HARRISON. I am going to read it all.

Mr. GOODING. He will find there is nobody left out.

Mr. HARRISON. I am going to read it all and I am going to show the Senator that persons who should be included were left out. I take it from the remarks of the Senator that he omitted them through oversight and not intentionally. I am glad to have the interruption, because I would dislike to think, indeed it would be humiliating to me as one who has a very strong and warm affection for the Senator from Idaho to think that he would draft the resolution and intentionally and deliberately leave out so many other interests that should be investigated.

Now, let us go further. I am going to analyze the entire resolution. Second, the Senator from Idaho wants to investigate "the financial interests of Mr. Frank A. Munsey in European industries which compete with American industries, the amount and percentage of his income derived from advertisements placed in his newspapers by the importing department stores," and so forth. That is the part to which the Senator from New York objects. Well, we can not blame the Senator for objecting. He has on his hands now one of the hardest political fights of his long and eventful political career. Mr. Frank A. Munsey is a political strong arm in his State. He wields an influence hardly second to any in that State. The Herald, I imagine, is friendly to the distinguished Senator from New York, and he does not want to bruise the feelings of either Mr. Munsey or the New York Herald. So it is good politics,

and I congratulate the Senator from New York on being candid about it and so frankly stating as his reasons for his action his selfish political instinct. But it is so illogical, so unreasonable, so unfair, and unjust to the Senator from Idaho and other Senators against whom charges have been made. Rumors are floating thick and fast all over the country, which will be handed down to their children and their children's children, blotting the escutcheon of the States which they represent, simply because the Senator from New York was a friend of Frank A. Munsey and the New York Herald and should, therefore, deny the right of the Senate to investigate all the other allegations.

The Senator from New York and his committee could have stricken from the resolution the second paragraph, if you please, which applies to Frank A. Munsey and the New York Herald. The Senator would receive just as much warm approbation from Mr. Munsey and the New York Herald by performing that gracious act as he probably will receive by reporting unfavorably upon the resolution. Indeed, Frank A. Munsey is a man of wisdom. He is a patriot and has a reputation of being fair and just. The Herald is a great newspaper with a reputation all over the country. If the Herald should indorse editorially the action of the Senator from New York and the procedure he has taken here to-day, that simply in order to help Mr. Munsey and retain his political friendship he would smother all the other investigations that are sought in the other provisions of the resolution, the people would say in New York that the Senator from New York is not the kind of man that New York is entitled to have representing her in part upon the floor of the United States Senate. They would say, "Indeed, we need a bigger man than he." They would say, "We want one who will overlook his little selfish political interests for the common good and general welfare of all the people. We will want one there who, when the fair name of the Senate of the United States is dragged in the mud will help to raise it and provide the opportunity to blot out those accusations, if untrue, which the Senator from Idaho alleges certain interests have brought against Senators upon this floor."

Now, let me go further. I would offer an amendment to strike out the name of Frank A. Munsey. I would not employ all of my guns against him. He is not the only one in this fair land who has brought these charges. Why should he be sought after and picked out among all the editorial writers of the country and publishers who own Republican papers? Was it simply because his editorials may have been stronger than others, simply because he may have put it perhaps more clearly than others?

But from Massachusetts, the home of the leader of the Republican Party in this Chamber, away out to the golden West, where my distinguished and handsome and dignified friend from California [Mr. SHORTRIDGE] resides, the Republican papers have denounced editorially this infamous bill, and they have charged that Senators upon the floor were voting these high rates, pressing down upon the people, in order to promote their own private good. So I say it would have been fair and more in keeping with the practice and wisdom of this august body if we would strike out the name of Frank A. Munsey and merely let him be investigated with all the other Republican papers and Democratic and independent papers throughout the country with reference to the charges which have been made against certain Senators and Members here.

Mr. LENROOT. Mr. President——

Mr. HARRISON. I would rather not yield now. I shall yield presently when I get through.

Mr. LENROOT. I merely want to make a parliamentary inquiry.

Mr. HARRISON. I can not yield for that just at present.

That is the second subdivision of the resolution, and I would amend it in that respect. The committee of the Senator from New York could have amended it or they could have reported it back favorably and asked that certain amendments be adopted. But now, if the Senator's motion prevails, if Senators on the other side of the Chamber stand by the side of the Senator from New York and vote with him for his motion, they will vote to smother this investigation that is rife from one end of the country to the other. When they do it they know the investigation is dead; they know that the "fair name" of the Senator from Idaho and the names of other Senators will retain the blemish that certain papers are alleged to have placed upon them. It is unfair, Senators. I am in hopes that before I shall have finished the Senator from New York, hard-hearted though he is, will yield, will see the error of his way, and I shall yield for the privilege of the Senator, upon his own motion, moving to have the resolution referred back to his committee to take favorable action upon it.

Mr. CALDER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from New York?

Mr. HARRISON. I yield for that purpose.

Mr. CALDER. The Senator from New York has made no motion. The Senator's committee reported the resolution unfavorably, and that is all.

Mr. HARRISON. Does not the Senator propose to make the motion?

Mr. CALDER. No; I do not.

Mr. HARRISON. Then the motion will be made, and I am going to ask unanimous consent, when I finish, that immediate consideration of the resolution be entered into, and I shall make the motion that the Senator's unfavorable report be turned down. After that is done, if the Senate so decide, we can change the many erroneous statements and incorrect assumptions contained in the resolution.

Mr. LODGE. Mr. President——

Mr. HARRISON. I do not care to yield now.

Mr. LODGE. I rose to the parliamentary question which the Senator himself has raised.

Mr. HARRISON. I did not raise it.

Mr. LODGE. I simply make the point that under the rule the report has to go over for one day in any event.

Mr. HARRISON. Oh, yes; the Senator can employ all the little parliamentary technicalities he wants in order to delay action, in order to assist in smothering the proposition. But I say to him, and I say to his party on the other side of the aisle, that the American people will never stand for the employment of technicalities to sidetrack this resolution, because he knows, adroit and long-experienced legislator that he is, that unanimous consent can be entered into here for the immediate consideration of the proposition. If the Senator wants to object, I am going to give the Senator from Massachusetts an opportunity to do so. The country is entitled to action upon the Gooding resolution. They are going to have it to-day if there is any way to have it. If it is defeated, the defeat will come from the other side of the aisle and not from this side.

Now, let me go further with the resolution. The Senator from Idaho wants to investigate—

3. The number of Senators owning or controlling or financially interested in newspapers, the amount of revenue obtained by these newspapers from importing department stores—

And then he uses this significant language:

which will benefit financially by the defeat of the pending tariff bill.

Assuming that the newspapers will be benefited by the defeat of the pending tariff bill! Nowhere in the resolution does the Senator ask for investigation of any interest or any person who will be benefited by the increased tariff rates proposed in the bill. Ah, but he wants to take up three certain Senators on this floor—the Senator from Kansas [Mr. CAPPER], the Senator from Nebraska [Mr. HITCHCOCK], and the Senator from Virginia [Mr. GLASS]—because, forsooth, they are interested in newspapers, and because of that interest he has asked that they be investigated. God bless you, if some of you on the other side of the Chamber would follow in the footsteps of those distinguished Senators, who, because of their interests, on yesterday demanded the right not to vote on the paper schedule, you would be vastly better off. I congratulate the splendid Senator from the great State of Nebraska; I congratulate my colleague, the junior Senator from Virginia [Mr. GLASS], as well as the distinguished Senator from the progressive State of Kansas [Mr. CAPPER] on excusing themselves when an item was voted upon in which they felt they might be financially benefited.

They thought well enough of themselves, in the interests of the American people, not to vote upon that paragraph, rather than have their skirts tainted and smeared, even though the American people who want to read were crying out for cheap paper and their position was in thorough accord with the views of the American people. Oh, that their virtuous example might be followed by some other Senators on the other side of the aisle! And yet because of the way they acted yesterday, which will meet the approval not only of their constituents but fair and right thinking people throughout this country, they must be brought before the committee and investigated, while all the sugar and chemical and mining and manufacturing interests, and those here who might stand for them, demanding increased rates that will bear down upon the American people—and yet they are not to be heard. Senators who may control stock in great manufacturing interests, who will reap untold and unlimited benefits from the increased tariff rates here proposed, can do likewise, but the resolution of the Senator from Idaho does not provide how they shall be investigated. But the Senators

from Nebraska and Kansas and Virginia, who said they did not think it was proper and right to vote when the rules of the Senate and the precedents of both bodies provide that when a Senator is interested in the question or the measure coming before the Senate for consideration they may be excused from voting upon the proposition, are nevertheless to be investigated under the resolution of the Senator from Idaho. They shelter themselves behind that provision; yet under the Gooding resolution they are to be investigated, and others who are voting for the increased rates to benefit so many interests, at the expense of the great masses of the American people, may sit over in their offices, and they will not be bothered by the investigation.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. HARRISON. Yes; I yield.

Mr. BURSUM. Mr. President——

Mr. HARRISON. I will yield to both Senators. However, I first yielded to the Senator from Idaho.

Mr. GOODING. The Senator from Mississippi spoke so beautifully of the high position taken by the Senator from Nebraska [Mr. HITCHCOCK] in reference to wood pulp in refraining from voting on the proposition to place a duty on that article that I was wondering if he knew that the Senator from Nebraska used his great influence upon the floor for free pulp when the schedule was under consideration. I will read this for the Senator's information——

Mr. HARRISON. No; I do not want it read in my time. The Senator has made his statement. I thought he desired to ask me a question.

Mr. GOODING. I shall be very glad to read it to show that the Senator from Nebraska said that wood pulp should be on the free list.

Mr. HARRISON. But the Senator from Nebraska on yesterday refused to vote upon the proposition; and that is the statement I made. I will take long enough now—for the Senator from Idaho would not yield to me; he was not so courteous to me when he was on the floor when I asked to interrupt him with a question as I am to him—I shall take this opportunity——

Mr. GOODING. I am sure the Senator wants to be right and not to make any mistake.

Mr. HARRISON. I have not made any mistake, because all I have said is that the Senators to whom I have referred, on yesterday, when the wood-pulp provision came up, refused to vote because they said they were interested in newspapers in this country. I want to ask the Senator from Idaho now does he indorse their action or does he disapprove it?

Mr. GOODING. I do not indorse it.

Mr. HARRISON. Then that is enough.

Mr. GOODING. When they voted for it in 1913, as they did, and when they refused to vote for it yesterday, after the part that was taken by the Senator from Nebraska [Mr. HITCHCOCK], they were very inconsistent, to say the least.

Mr. HARRISON. Mr. President, here I am trying to defend the Senator, and he is being uncomplimentary to my colleagues.

Now let us see about this. A part of clause 4 of the Gooding resolution provides for the investigation of:

Resolved further, That the investigating committee be empowered to summon witnesses and examine them under oath, including Mr. Frank A. Munsey and officials and attorneys for or representatives of the General Real Estate & Trust Co., or any other company or companies which may have been organized to operate other foreign mills, mines, and factories engaged in competition with American producers and workers and which will benefit financially by the defeat of tariff legislation by this Congress.

The Senator from Idaho wants to investigate witnesses whose interests will be affected beneficially by the defeat of the pending bill; in other words, he does not want to investigate those whose interests will be promoted by the passage of the bill. So throughout are these little discrepancies that were mere oversights on the part of the Senator from Idaho.

Mr. BURSUM. Mr. President——

Mr. HARRISON. When the motion is made for the consideration of this resolution by the Senate, amendments will be offered to cure those defects, so that not only those who are interested in wool and sheep may be investigated but those who are interested in chemicals and sugar and mines and also manufacturers will be investigated, and those who will benefit by the passage of the bill carrying increased rates, the same as those who will be benefited by the defeat of the bill. Now I yield to my distinguished and pleasant friend from New Mexico.

Mr. BURSUM. I simply desire to say, for the enlightenment of the Senator from Mississippi, that if those who are to be benefited by the passage of the pending tariff bill are to be investigated it will be necessary to investigate the whole Nation, the whole American people, for they will all be better off as the result of the passage of this measure.

Mr. HARRISON. Mr. President, I heard when I was a tiny boy that when the hunters began to pursue the she bear and they got close with their hounds the bear was accustomed to throw down the little cub in order to distract their attention in order that she might escape. Senators may apply that to suit themselves. Mr. President, let me proceed, now, along one other line.

Mr. LENROOT. Before the Senator from Mississippi does that, will he yield to me?

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Wisconsin?

Mr. HARRISON. I yield.

Mr. LENROOT. Will the Senator from Mississippi state why he says that the resolution of the Senator from Idaho does not provide for the investigation of those who are interested in manufactures and industries who are affected by the passage of the bill, but only provides for an investigation of those who are affected by the defeat of the bill?

Mr. HARRISON. The Senator from Wisconsin will understand that paragraph 4 of the resolution applies to Members of the Senate; that it does not apply to any special interest of the country, such as the mining interest or the manufacturing interest or the wool interest or to Frank A. Munsey, who is in the newspaper business. The Senator's resolution merely proposes to investigate the newspaper interest, Frank A. Munsey particularly, who, it says, will benefit by the defeat of the tariff bill; but the resolution says nothing about these great manufacturers whose lobbyists have swarmed around the Capitol to such an extent that a Senator could not get in or out of his office.

Mr. LENROOT. Is the Senator from Mississippi in favor of an investigation by the Senate in order to ascertain what industries in the United States will be benefited by the passage of the tariff bill?

Mr. HARRISON. Oh, I will tell the Senator what I think. I think that every Senator upon this floor ought to consult his own conscience when he casts a vote here upon a paragraph in the pending bill in which he is personally interested, and if his conscience tells him that it is wrong to vote on the proposition he should recuse himself. I do not think investigations get anywhere, so far as that is concerned. I know, with the temper on the other side of the aisle, and from the way Senators on that side have voted on the pending tariff bill, that they are going to protect every special interest in the country in the committee investigation the same as they have done in the pages of the bill. Of course, nothing will come out of it, because they will stack the cards.

Mr. GOODING. Mr. President——

Mr. HARRISON. But the Senator has asked for an investigation, and I am willing to give to him that which he seeks. I hope it will be fair. The Senator does not provide for any Democratic Senators on the committee; he merely provides for the appointment of five Senators; but I hope that the Presiding Officer—and I know that if the distinguished Senator from Iowa [Mr. CUMMINS], who now occupies the chair, has a hand in it, that will be done—will appoint at least two Senators from this side of the aisle on the committee. If that shall be done, the dome of this Capitol is not secure.

The distinguished Senator from Wisconsin [Mr. LENROOT] yesterday performed a curious stunt. I recall that for almost three months under the assaults from this side of the aisle and under the eloquent pleas of Members over here to him personally to get into this scrap over the tariff bill he even got cotton and closed up his ears, so that he could not hear the appeals; his voice was as silent as the tomb; but when the American people became aroused under the splendid fight made by the Senator from North Carolina [Mr. SIMMONS] and others on this side who took care of the different schedules the Senator from Wisconsin almost overnight woke up, turned a somersault, and began to fight certain paragraphs of the bill——

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. HARRISON. Not only that but the Senator was so interested in holding the phalanx over there that I remember several times when we were trying to expose the iniquities of the paragraphs the Senator would ask, "Well, why do you not permit us to vote on this bill?" I remember on one occasion he told us how many hours and how many days it would take to pass the bill at the rate at which we were then going, and I think he said the bill would hardly be passed until doomsday at the rate at which we were then traveling. I have the many statements of the Senator here in the RECORD before me. I do not want to trespass at too great length on the patience of Senators or the time of the Senate, but if my assertions are contra-

dicted I shall read from the Senator's remarks. Yet, despite that position of the Senator, when this side yesterday submitted a request for unanimous consent, which was agreeable to every other Senator, I dare say, in this body, to vote upon the pending bill not later than the 17th of the present month, the Senator objected to it. I do not want to keep the Senator standing and I will yield to him presently; I will tell him when I want to yield, so that if the Senator will bide his time in patience he will have an opportunity later on——

Mr. LENROOT. Very well.

Mr. HARRISON. So yesterday when the Senator made that objection, and the Senator from Indiana [Mr. WATSON] made certain utterances which were significant to me, there was borne out what some of us charged two months ago, that the majority party had no idea of enacting this bill into a law before the November election.

The Senator from North Dakota [Mr. MCCUMBER], whose political existence is soon to pass into history, does not care now, and he is sincerely interested in the passage of the bill; he wants to go down into history—God knows why—as the co-author of a tariff bill, although I would rather have my name attached to an indictment in the criminal courts of the District of Columbia than to have the proud honor which apparently the Senator from North Dakota desires. So the Senator from North Dakota evidently is ready for us to pass the bill; but that astute and shrewd manipulator—and I do not say that offensively, for, God bless him, I like him—the Senator from Indiana [Mr. WATSON] knows what he is about. The only trouble yesterday was that he showed his hand a little bit too much. Ordinarily he does not make such tracks as he walks along, and yet——

Mr. BURSUM. Mr. President——

Mr. HARRISON. I will not yield just yet, but I will be very glad to yield when I finish; I do not want the Senator from New Mexico to spoil the little figure of speech which I was about to utter or to interrupt the statement of facts.

Mr. BURSUM. I merely desired to ask the Senator a question.

Mr. HARRISON. I do not yield at this time to my friend from New Mexico, although he is the most pleasant gentleman in the world.

The PRESIDENT pro tempore. The Senator from Mississippi declines to yield.

Mr. HARRISON. I do not yield yet; I will reach wool presently, and then I will yield to the Senator.

Mr. President, the Senator from Indiana, I say, made tracks yesterday a little plainer than ordinarily. He said yesterday that there would be committee amendments offered up to the last minute on August 11, when, under the proposed unanimous-consent agreement, no further committee amendments could be offered; that the committee were meeting every morning. I will read just what he said:

> Let me say to my friend from Arkansas—
>
> Says the Senator from Indiana—
>
> that the committee meets every morning at 9.30 to keep ahead of the Senate's work and take up the schedule which we are to consider next. That is to say, we come down to sundries and take up sundries, and the committee itself doubtless will propose a number of amendments to that schedule.

That is an admission upon the part of one of the distinguished leaders of the other side, one of the smartest and ablest members of the Finance Committee, that the provisions covering sundries are all wrong or many of them are wrong, because he says, "*doubtless* the committee will be meeting right up to the last minute and changes and modifications and alterations will be made in it." He goes further and says:

> It is utterly impossible for us to be up here and down there at the same time.

Why have they not acted like the Finance Committees of the Senate throughout the history of this Government? Heretofore when they finished framing tariff bills they brought them here and made them their handiwork. Goodness knows in this instance the Finance Committee were a long time in framing the bill, for it took them 12 months or more, and yet they are not satisfied with it. By the utterances of the Senator from Indiana and the action of the Finance Committee they admit their incompetency to write a tariff bill, and they are forced to resort to bringing in changes up to the last minute.

There are no two men on the other side of the Chamber more closely allied and who understand each other better than the Senator from Wisconsin [Mr. LENROOT] and the Senator from Indiana [Mr. WATSON]. They walk arm in arm; they think alike on many matters; they politically conspire together; they ofttimes try, and too frequently succeed, in "putting over" their political schemes together. They never are found at cross-purposes; and so the Senator from Wisconsin on yesterday was playing one end, the Senator from Indiana the other, but unfortunately the Senator from Indiana let the cat out of the bag.

Ah, the Senator from Wisconsin was wise. He was doing that which we feared might be done. We have believed, some of us, that you did not want the bill to pass; that you would come to your senses after a while and recognize that the American people would condemn you in the election if you did.

The Senator from Wisconsin realizes it, and the Senator from Idaho [Mr. BORAH] realizes it, and for that reason they are trying to save the Republican Party from itself. Yes, they know, and I hope the Senator will tell me when he follows me that he knows, because he has said it in his speeches, that if this bill passes in its present form the Republican Party will go the way that it has always gone following the passage of its iniquitous tariff measures—to defeat. So the Senator from Wisconsin and the Senator from Idaho [Mr. BORAH] are working in behalf of the Republican Party when they seek to prolong this discussion, to withhold from the statute books the enactment of this bill, so that the American people can not get such a good whack at them in November. The Senator from Indiana [Mr. WATSON] understands it, and he comes to the Senator's rescue, and he says, "Why, the Senate Committee on Finance are working every morning and every night. We can not be up here and down there at the same time, and we are bringing in amendments up to the last moment."

I am through, Mr. President. In a moment I shall ask unanimous consent for the immediate consideration of the resolution reported by the Senator from New York. Before making that motion, I yield for interruptions. I promised to yield to some of these distinguished Senators.

Mr. GOODING. Mr. President, at this point in the Senator's remarks I want to call his attention to the words of the Senator from Nebraska [Mr. HITCHCOCK] upon the floor when the wood-pulp schedule was under consideration.

Mr. HARRISON. I prefer that the Senator put that in in his own time. I will yield for any question.

I now ask unanimous consent for the immediate consideration of the resolution reported by the Senator from New York [Mr. CALDER].

The PRESIDENT pro tempore. Is there objection?

Mr. LODGE. I think the resolution ought to go over under the rule.

Mr. HARRISON. Then there is objection?

The PRESIDENT pro tempore. Objection is made.

Mr. HARRISON. I move that the Senate proceed to the consideration of the resolution.

Mr. LODGE. That is out of order, of course.

The PRESIDENT pro tempore. The Chair is of the opinion that the motion is not in order.

Mr. CALDER. Mr. President, just a word.

This resolution was introduced yesterday by the Senator from Idaho [Mr. GOODING]. Then, on motion of the Senator from Mississippi [Mr. HARRISON], it was referred to the Committee to Audit and Control the Contingent Expenses of the Senate; and a further motion was made by the Senator from Mississippi, and agreed to, directing the committee to report the resolution forthwith.

The committee, during my chairmanship of it, has followed the practice, believing that that was the rule under which we were operating, that it was our business to report resolutions of this character without change, either for them or against them. After deliberation the majority members of the committee determined, because of the way in which the resolution was drawn and the fact that it referred to an individual not a member of this body, to report the resolution as we did. That is the reason for our action. We have not believed that we had any right to alter or amend a resolution of this kind.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Mississippi?

Mr. CALDER. I have concluded my statement.

Mr. HARRISON. I desire to ask a question of the Senator. The Senator would be willing, then, to vote down this report, would he not, so that we can amend the resolution in such respects as may be thought desirable and pass it?

Mr. CALDER. If a vote is taken, I shall vote against the consideration of the resolution.

Mr. LENROOT. Mr. President, the Senator from Mississippi [Mr. HARRISON] and I have been very close and intimate friends for a great many years. We are still, and shall continue to be; but I want to say in defense of the Senator from Mississippi that his many inaccuracies of statement are excusable from the

fact that his eloquent voice is in demand all over this country; wherever there is a Democratic political convention of any kind, the Senator from Mississippi is appealed to. There is a demand for him upon the Chautauqua platform; and the Senator from Mississippi must be excused in his inaccuracies from the fact that he has been absent from the Senate for so great a portion of the time during which this bill has been under discussion.

I want to say, however, that during the early consideration of this bill, until the Senator from Mississippi absented himself for so long a period of time, 99 per cent of the discussion of this bill on the other side of the Chamber was piffling discussion, without any endeavor upon the other side of the aisle to discuss rates in this bill that were of importance to the people of the country.

Senators on the other side of the aisle occupied hour after hour, and sometimes days, with the discussion of amendments in the chemical schedule relating to articles the names of which they could not pronounce, and the importance of which to the country amounted to practically nothing. The Senator from Mississippi may not have been here, so he may be excused for not knowing that fact; and so it went on until it was clearly a filibuster against this bill upon the other side of the aisle. Finally, however, we came to some important items in the bill. The Senator may not have been here, so he does not know, but my first discussion of this bill happened to be in connection with the first schedule of the bill, the chemical schedule; but it happened to be upon an item that was of importance to the country. That is the attitude that the Senator from Wisconsin has occupied from the first consideration of the first schedule of the bill to the present time, and that is the attitude that the Senator from Wisconsin proposes to occupy until the bill is concluded.

However, when we came to important schedules of the bill this filibuster upon the Democratic side suddenly ceased. Why? Because the Committee on Finance day after day brings in amendments reducing the excessive rates in this bill, and in the cotton schedule the Senate was successful in lowering excessive rates where the committee had not agreed to do so. We had the support of the Democrats, but I am very sure that the action of the Senate was not to the liking of the Senator from Mississippi. The Senator from Mississippi would like to have the rates in this bill even higher than they are. He would rather have an issue with his eloquent appeal to the American people concerning the enormities of this tariff bill than to have a bill which the American people would approve, and what is true of the Senator from Mississippi is true of many other Senators upon the other side of the aisle.

Mr. President, I am a Republican. I wish to go with the organization, but I propose to exercise my independent judgment. I have done so in the past. I have not been playing cheap politics, as the Senator from Mississippi is doing to-day; but I have tried to have in mind the interest of the American people in the consideration of these questions.

What were we confronted with yesterday, Mr. President? This sudden change of attitude on the Democratic side. They saw that this bill was being improved from day to day. They came to the conclusion that it would be to their political advantage not to have further reductions in this bill; that it would be to their political advantage to have high rates, so-called bounties, voted in on an important schedule without a word of discussion. They believed that without discussion those rates would be voted into the bill; and so we suddenly find the Democratic side, after all they have been saying about the freedom of discussion and all the discussion they have been giving on unimportant items of the bill, suddenly willing to forego any discussion whatever upon the most important items in this bill remaining undisposed of.

The country will not be deceived by the attitude of the Democratic side. The country will understand that the Democratic side of this aisle would rather have a political issue for the November elections than to legislate for the welfare of the American people.

Mr. President, I exercise a right which I have, and which I propose to exercise, to object to any unanimous-consent agreement which will not accord an opportunity of at least uttering a protest over any rate which may be before the Senate that is of importance to the American people. The Democratic side is willing to forego that. The Democratic side is willing now that any rate shall be written into this bill, no matter how high, content with voting against it; but they do not want any further discussion, because they fear that discussion will improve the bill.

Now, a word with relation to this resolution. The Senator from Mississippi waxes eloquent about Senators not voting upon schedules or upon items in which they have a personal interest. We very shortly will have up the question of free hides, and I wonder if the other side of the aisle will take the position which the Senator from Mississippi insists ought to be taken by this side of the aisle? I wonder if every Senator on the other side of the aisle who is interested in cattle will refrain from voting upon the question of free hides? When the time comes for a vote on that item I do not believe we will hear my genial friend from Mississippi condemning his Democratic colleagues for voting upon the question of free hides, although some of them may be interested in cattle.

Then there will be the question of tobacco. Will the Senator as eloquently condemn any Democratic Senator who may be interested in tobacco who votes upon that question?

Upon this question of a Senator voting upon a matter in which he has a personal interest, it so happens that I am free to vote upon any question, because I have no financial interest, so far as I know, in any schedule or any item in this bill. But it seems to me that the line of demarcation is very clearly drawn as to where the duty of a Senator lies in voting upon a matter in which he has a personal interest. In regard to the question of free pulp, I think it eminently proper that Senators who own papers should not vote upon that question, because their interest is a special interest, distinguished from the general interest of the States which they are here to represent.

If a Senator owns a mine producing a rare mineral, and there are only a few other such in the country, and his interest is not the common interest of his State, I do not believe such a Senator ought to vote upon a question involving the products of that mine.

But when we come to the question of sheep, which is really the subject matter of this resolution, I very sharply disagree with the Senator from Idaho and the other Senators from the woolgrowing States. I have done my best to secure lower duties and been defeated; but I want to repeat here what I said during that debate, that, sharply as I disagree with the Senator from Idaho, I do not believe that his personal interest in wool affected one iota his position upon this bill. The same applies to the Senator from New Mexico and other Senators. This is how I believe the line should be drawn. Does anybody question that the Senator from Idaho or that the Senator from New Mexico, in the attitude they took upon wool, reflected the attitude of the people of their States? The answer must be that of course they reflected the attitude of the people of their States. The people of their States were entitled to representation upon that all-important subject, and therefore, in my judgment, where the interest of the Senator is exactly the interest of his State, there is no duty and no obligation upon his part to refrain from voting upon any duty that is the subject of controversy.

On the other hand, if a Senator's interest be special and not the interest of his State, I say, without hesitation, that I do not believe he ought to vote upon any question which affects his own pocketbook.

With regard to this resolution, what do we find the Senator from Mississippi insisting upon? While he criticizes the committee for not making a favorable report upon the resolution, knowing that the Committee to Audit and Control the Contingent Expenses of the Senate never do consider the merits of a resolution with reference to amendments of the same, except as it affects expense, he would not vote for this resolution to-day as it was reported from the committee, would he?

Mr. HARRISON. Yes; I would vote for it in its present form. I would rather amend it, however.

Mr. LENROOT. Then let us see what the Senator from Mississippi is willing to do, and let us see how consistent the Senator from Mississippi is. The Senator from Mississippi then indorses this allegation in the resolution——

Mr. HARRISON. No; I do not indorse allegations——

Mr. LENROOT. If he would vote for it, of course he indorses it.

Mr. HARRISON. The Senator is too smart to say that.

Mr. LENROOT. I am not, and the Senator is too smart to say otherwise.

Mr. HARRISON. The Senator does not indorse anything in the resolution, but a Senator on the other side says he wants an investigation of charges which have been made against him and his colleagues; he states it in his allegation, and he is entitled to it. The whereases, of course, do not amount to anything, but I think the resolution ought to be changed on the floor of the Senate.

Mr. LENROOT. I do not yield for any such purpose. I am going to hold the Senator to his statement. He said that he was willing to vote for this resolution as reported by the committee.

Mr. HARRISON. The Senator reiterates that.

Mr. LENROOT. When he is willing to do that, he indorses everything in the resolution, and let us see what he is willing to vote for, then, and how it squares with the professions which the Senator from Mississippi has been making. He says he is willing to vote for this declaration, that "the importing department stores have financed a campaign of defamation against the pending tariff bill." That is what the Senator from Mississippi says he is willing to vote as true; that the department stores have financed a campaign of misrepresentation against the pending tariff bill.

The Senator from Mississippi can crawl out of that hole as best he can, but he can not in a thousand years, if he should live that long, square that declaration with the other assertions he has made upon this floor.

The Senator from Mississippi says that the fourth paragraph is not sufficiently strong, because it does not call for an investigation of every factory, of every industry, in the United States which would be benefited by the passage of the bill or injured or benefited by its defeat. Does the Senator think that anyone will take him seriously, that he would have the Senate enter upon an investigation of every manufacturing industry in the United States, of the cotton industry, of every other industry in the United States, a committee of five Senators to ascertain how those industries, separately and in the aggregate, are going to be affected by the passage of a tariff bill?

I wonder if the Senator from Mississippi wants this investigation made and concluded before we vote upon the tariff bill? If he does, how does that square with his position in criticizing me for preventing a vote on the final passage on August 19?

The Senator knows that the investigation which he proposes for political purposes could not be completed by the Senate inside of two years, and would cost millions of dollars. Oh, the Senator from Mississippi is not entirely sincere. I do not wish to reflect upon him in making that statement; I mean that he is thinking of politics when he makes that statement. He is not thinking of legislation, he is not thinking of his position as a Senator of the United States; he is thinking of himself only as a Democratic politician—and he is one of the best they have in their party.

I am not going to discuss this matter further, but while I am on my feet I am going to propose a unanimous-consent agreement—and I want to say, in that connection, that we will test the sincerity of the other side of the aisle—as to whether they are willing to agree to a limitation of debate which will permit of some discussion of every amendment.

Mr. HARRISON. May I suggest to the Senator that he wait until the Senator from North Carolina may be notified?

Mr. LENROOT. I am not going to ask for immediate action upon it. We will test the sincerity of the other side as to whether they are willing to vote for a limitation of debate which will permit of some debate upon every question, or whether they stand upon the proposition made by the Senator from North Carolina, that he now wants the most important items in this bill to be voted upon without one single word of debate.

I send to the desk, and ask unanimous consent to have read, this proposed agreement, and I will ask then that it temporarily lie upon the table.

The PRESIDING OFFICER (Mr. SPENCER in the chair). If there is no objection, the Secretary will read the proposed agreement.

The reading clerk read as follows:

PROPOSED UNANIMOUS-CONSENT AGREEMENT.

It is agreed by unanimous consent that whenever the bill H. R. 7456, "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States," is before the Senate until the final vote is reached, debate shall be confined to the bill before the Senate, and no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

That from and after the hour of 11 o'clock a. m. of the calendar day of Friday, August 11, 1922, no Senator shall speak in the aggregate more than one hour upon the bill and any amendment or amendments offered thereto and motion or motions that may be made respecting the same.

That the Senate shall immediately proceed to the consideration of committee amendments to paragraphs 1427a and 1582 relating to hides and 1431 relating to leather and manufactures thereof. That upon the disposition of said amendments the Senate shall next consider committee and individual amendments to Schedule 5 relating to sugar, molasses, and manufactures thereof.

The Senate shall next consider committee amendments to paragraph 1636 relating to potassium nitrate, and when disposed of the Senate shall consider the committee amendment designated as section 315.

After the disposition of the foregoing the Senate shall next proceed to the consideration of remaining committee amendments, and after the same have been disposed of individual amendments to the bill shall be considered and disposed of.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

The PRESIDING OFFICER. Without objection, the proposed unanimous-consent agreement will be printed and lie upon the table.

Mr. STANLEY obtained the floor.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from North Carolina?

Mr. STANLEY. I yield.

Mr. SIMMONS. I was not in the Chamber when the Senator from Wisconsin presented the unanimous-consent proposal. I do not understand that he desires immediate action on it.

Mr. LENROOT. No; I asked that it be printed and lie on the table.

Mr. SIMMONS. I desire to say that I shall be very glad, together with my associates on this side of the Chamber, to give consideration to the proposition presented by the Senator, and some time during the day I hope to be able to answer, if we do not agree to his proposition, by the presentation of a counterproposition.

Mr. STANLEY. Mr. President, I have been somewhat surprised at the nature of the reply to the Senator from Mississippi [Mr. HARRISON]. The charge that he has been absent from the Chamber or was an absentee from the Chamber is, in the face of the record, in my humble opinion, unwarranted, if not gratuitous. The yeas and nays of this body, the CONGRESSIONAL RECORD, and the knowledge of Members of the body, all bear evidence to the fact that few men have given the same personal attention to public affairs or have participated more actively or more effectively in the deliberations of this body than the accomplished and diligent Senator from Mississippi. It is true that at times his talents have been demanded by the national committee. He has served his party, both in and outside of the Chamber, with signal ability.

Mr. President, it is an odd sort of a claim that one must believe everything, all the whereases and every other loose statement contained in a resolution of inquiry, before he can vote to report it favorably. If all the surplusage and irrelevant matters contained in such a resolution of inquiry are to be taken as absolutely true, there would be no necessity for the inquiry. What is the use of having an inquiry to investigate into the truth of certain statements if the statements are to be taken in advance as true? The votes of the Senate, not the investigation of the committee, would establish the truth or falsity of the assertions. The Senate does not propose, by reporting the resolution, to say whether or not the various and sundry statements of the Senator from Idaho [Mr. GOODING] are true. It votes to give the Senator from Idaho and others a chance to establish the truth or falsity of those statements. That is all there is in the resolution of inquiry.

Mr. President, nothing has occurred in the last few months, no sign so propitious, as the very significant statement of the Senator from Wisconsin [Mr. LENROOT]. It will be remembered that the junior Senator from Wisconsin but a few months ago stood here and led the fight for cloture, stood here and led an unprecedented fight to gag and tie the Senate of the United States in the discussion of the schedules of this very bill, voted to make us take that nauseous dose like a sugar-coated pill, voted to deny the Senators the right to discuss the amendment. At that time the Senator believed that the bill would be stomached by the American people. At that time he did not dream that the integrity and the intelligence of an outraged Republic would anathematize the bill, that the great organs of known Republican leaning and which had been a tower of strength in the party for 20 years would join with the Democratic press of the country in a practically unanimous denunciation of its abominations and of its indefensible rates.

Now the same Senator, who but a few months ago proposed to shut off debate, makes the startling statement that if the bill should now be passed under a unanimous-consent agreement, which would have the effect of the very cloture he sought—preventing debate or the improvement of the bill—that if what is left of it should pass unchanged, it would damn the Republican Party. If what is left of the bill untouched is so iniquitous that it would ruin the Republican Party unless the patriotism and the wisdom of the Senator from Wisconsin and others were called instantly to the relief of this bungling thing, what, oh what, would have been the fate of the party and the country if this agglomeration of blunders and abomination had been passed at the time the Senator from Wisconsin demanded cloture?

I am surprised that this self-constituted expert, who lectures the Senator from Mississippi about his absence from the Senate, should have hurled this challenge at this side of the Chamber, "Where, oh where, will the tobacco Senator stand, where will

the southern Senators and the Democratic Senators stand when we propose to vote for a duty on tobacco?"

My State produces more tobacco than the same area anywhere, so far as I know, on the habitable globe. At one time, and until very recently, we produced one-third of all the tobacco by weight produced in the United States. I will say to the Senator that he may introduce an amendment to put tobacco on the free list—with the exception of a few high-priced tobaccos that are used for cigars and the like and which are not produced in my State and which ought to bear a duty because they are luxuries—and I will vote for it. There is not a Senator from Virginia or South Carolina or North Carolina or Tennessee or Kentucky who knows enough to tell a tobacco plant from a head of cabbage that cares a bawbee about a duty on tobacco. A duty of $1,000 an ounce on all the tobacco raised in Kentucky, Tennessee, Virginia, North Carolina, and South Carolina would not benefit the tobacco growers one one-thousandth of a red cent. It might all be put on the free list and it would not reduce the price of those tobaccos by the price of a red herring.

Mr. President, I had hoped that the resolution introduced by the Senator from Idaho [Mr. GOODING] would be reported and acted upon notwithstanding its absurdity. It is true that the resolution provides for a most rigorous investigation of every concern, of every Senator, of every newspaper, of every broker, of every merchant, who has a direct or a special interest in the reduction of rates or in lifting any character of ban or embargo from the commerce of the United States.

Now, Mr. President, the junior Senator from Idaho is a man of ability. He is a thoughtful and serious man. Like all of that illustrious race, the Englishmen, he is not inclined either to tell or see or hear a joke. He is nothing if not serious. He is not inclined to frivolities or to satire. When he proposes to spend the thousands and tens of thousands of dollars which the Senator from Wisconsin says must be spent to probe into these iniquities and find out whether or not Frank A. Munsey has a material interest in opening the ports of the United States to the importations of manufactures abroad in which he was interested—when he proposes to spend the money of the United States to find out how much the debit and credit sides of the great ledgers of the department stores would show of direct benefit from the opportunity to buy abroad as cheaply as they bought at home, he admits or charges that to use the taxing power of this country, to use the strong arm of the law, to use the collection of revenues, for the purpose of benefiting a special interest, instead of collecting revenue for the discharge of public duties and the conduct of the Government economically administered, is a serious offense.

And yet by some strange oversight, with the exception of the woolgrowers, there is not a hole in that resolution big enough to hide a gnat. There is not a sentence, not a word providing for a like investigation of the enormous concerns whose profits will be multiplied a hundredfold by a tariff and by an embargo. If it is a crime to enrich Frank A. Munsey by lowering the tariff, it is a crime to enrich some Munsey by raising the tariff. If it is an offense for a newspaper, because it has a direct interest in the price of newsprint paper, to advocate the placing of that commodity upon the free list, what will we say of the offense of a Senator who advocates a duty, not as a publisher, not as a citizen, but by the exercise of his high prerogative as a Senator in the United States of America?

Ah, I do not mean to intimate that the Senator from Idaho or any other Senator on the floor of this body has a direct and pecuniary interest in the price of wool; that he is either a vast owner of sheep and expects to profit thereby or that he has been a purchaser or broker in that commodity whose value is affected by these schedules; but it is a shame, it is a scandal; it is a piece of indefensible and purblind political cowardice, when the charge is made from one end of this country to the other that Senators are investors, that Senators are speculators, that Senators are personally profiting by the schedules they manipulate, to place some Maxim silencer upon that charge and snuff it out and to sneer at the press which has discharged a great and wholesome public duty.

Senators can not in this matter muzzle or censor the press; they can not stop it with a solemn sneer; they can not turn their hardened faces from the wrath, not of the press but of public sentiment that finds voice in that press, without finding a day of judgment on the Ides of November. Already every living human soul upon whom responsibility may be placed for this iniquitous thing has the seal of death upon his face or lies stark upon the field of political conflict. No man can proclaim his authorship of it or his approval of it in its entirety and not be pilloried by an intelligent and outraged press now and by an intelligent and outraged public in the near future.

Mr. GOODING. My thought or my hope, at least, in submitting the resolution is to learn whether I can remain in the United States Senate from the State of Idaho without the violation of my oath of office and without violation of my own conscience. Has the Senator from Kentucky concluded?

Mr. STANLEY. I yield for a question.

Mr. GOODING. I thought the Senator had concluded. I beg pardon.

Mr. STANLEY. No; I am just getting a good start.

The PRESIDING OFFICER. The Senator from Kentucky has the floor.

Mr. GOODING. I will listen to the Senator with much interest.

Mr. STANLEY. I thank the Senator. Mr. President, I can say for the Senator from Idaho that he is the best Republican on the face of the earth. He runs truer to form, truer to all the evil traditions of his party, than any known exemplar of that organization now alive.

Mr. GOODING. Mr. President——

Mr. STANLEY. I am as proud of my poverty as the Senator is of his wool.

Mr. GOODING. Mr. President, will the Senator from Kentucky let me correct him? I did not cast any reflections on the Senator from Kentucky.

Mr. STANLEY. I will not yield for corrections. When I am through the Senator may make corrections. I yield now only for questions.

Mr. GOODING. I did not make any reflections on the Senator because he was without money.

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Idaho?

Mr. STANLEY. I will yield for questions, but for corrections it would be almost too long a job. The RECORD shows what the Senator from Idaho said. Underlying it all was that fine scorn of the man who speaks of property rights here but who has no property. That has been reflected by any number of Senators upon the other side of the Chamber. The Senator from Idaho is not personally to be blamed for that; that is not his personal opinion; he acquired that sentiment in the atmosphere he breathes over there on the other side of the Chamber. That is a Federalistic tradition, as dear to the heart of Republicanism as is plunder under a tariff. The great father of Republicanism was Alexander Hamilton; the greatest Republican organization on this continent bears his name. There is nothing in common to-day between the humanity and the democracy and the love of personal liberty and the idealizing of mere man that characterized and glorified the life and thought of Abraham Lincoln and the present-day Hamiltonian organization of the Republican Party. You have abandoned Lincoln. Down with Lincoln and up with Hamilton! Down with moneyless men and up with the gray wolves of the Senate.

Hamilton argued and Hamilton fought all his life, until he fell before the revolver of Burr at Weehawken, for a property qualification. Under him the Senate was to sit in secret session; no man was to occupy a place here and no man was to vote for a Senator who did not have $1,000 in fee simple in real estate or its equivalent; and to-day his dutiful followers would impose a like qualification if they dared.

Mr. President, there is a close psychological relation between that mental attitude and the protective tariff. Senators speak here of men voting in their own interests as if it were a light matter. It has been argued on the floor of the Senate that, while a judge, as the Senator from Arkansas [Mr. CARAWAY] has well said, is disqualified by a material interest or a direct interest, and while a juror is disqualified by a material interest or a direct interest, a Senator is under no such disqualification in acting upon matters that materially affect his purse, that the material interests of a legislative body can not possibly affect legislation. Why, Mr. President, the material interests of judges have here and there perverted justice; the material interests and the special interests of jurors have here and there secured a conviction of the innocent or an acquittal of the guilty; but the history of oppression, the history of greed, the history of the most polluted despotisms that the world ever saw reek with the same old story of legislative bodies enacting laws in the interest of a particular and privileged class of which they were a part.

More than 2,000 years ago Tiberius Gracchus raised his voice against a landed aristocracy, against special privileges to men holding vast estates—and the great majority of them, by the way, were woolgrowers—and they tore up the benches in the forum, they beat him to death, they mangled his body, they burned it, and hurled his ashes to the winds, and from the ashes of the Gracchi sprang Marius and Sulla.

Mr. President, there was a time in France, as in the Roman Empire, when one justice was meted out to the man without money and another justice was meted out to the man with wealth. For a thousand years men were forced to come before a court, and the first question asked was, "Are you one of the wealthy or one of the poor?" If he was a man of property, he could not be put to the torture; he could not be crucified; the lash could not be laid upon his proud body; but if he were a moneyless man, if he were one of the poor, they could break his bones and stretch his tendons, and crucify his quivering body because he was a "free-trade hobo," because he was a moneyless man.

Mr. President, for 500 years in France a poor man could not own a pigeon; he had to wear a certain dress; he could not hunt in the woods or fields; meat was practically denied him, and yet he bore the entire burden of the expenses of the State. Three-fourths of the property of France under the Bourbons was in the hands of a king and a nobility; one-fourth was owned by the remainder of the people, and they bore all the taxes, in humiliation, in ignorance, in destitution, until at last the mob took fire and the tattered flag became a banner; in fury they rose and destroyed their oppressors in blood and horror. It was because the Chamber of Deputies were landed aristocrats and there was no place until they heard the thunders of Mirabeau for a moneyless man in the French Parliament.

Mr. BURSUM. Mr. President, does the Senator imply that we ought to have a revolution in this country and divide up the property between all of the people of the country—take away from those who may have too much that which they have and divide it up? Is that the attitude of the Senator?

Mr. STANLEY. Is the Senator through?

Mr. BURSUM. Yes.

Mr. STANLEY. Mr. President, I am as much of an individualist as the Senator from New Mexico is a Federalist. I believe that the right of personal liberty and the right to personal property never came from any government on earth; that they are the inestimable blessings of God. I believe, with old Thomas Jefferson, that all men are created equal and have an equal right to life, liberty, and happiness, and that they are endowed by their Creator with these rights. I believe with him that this is self-evident. I believe that every man in the world is entitled to be the master of his own home, to have all the property he can acquire honestly, and I believe that the rate of taxation should be in proportion to his ability to pay. I would be the last man on earth to give one jot or tittle to those who would turn over to the Federal Government the right to invade a home by search and seizure, the right to lay your hands upon my person, my papers, my property, my house, without due warrant of law. I believe that it is no part of this Government's business to regulate how I make money if I make it honestly, to regulate my diet, to regulate my food, or to interfere with my right to a free market.

Your protective idea that every business is entitled to be coddled and milk-fed by the Government, to come like a beggar whenever it thinks it is a loser in a game it can not play, for every improvident business, whether it be farming or manufacturing or what not, to come here with a sick mouth and a crippled leg and to say, "I want the privilege of plundering some prosperous business in order to insure me the cost of production and a fixed income"—that is socialism. That is the nose of the camel. That ends at last in Lenin and Trotski, or it ends in a Bourbon despotism. The democracy of Thomas Jefferson believes that it matters no more about a man's wealth than the color of his eyes; he has the same rights whether he is a millionaire or whether he is a pauper, and among those rights is his right to see that this Government is economically administered, and that we are not hounded to death by spies and informers, and that money taken by the process of taxation is not used surreptitiously to enrich you or anybody else.

Mr. BURSUM. Mr. President, will the Senator yield?

Mr. STANLEY. Certainly.

Mr. BURSUM. I suggest that the Senator from Kentucky is entitled to his views as to free trade; he is evidently a free trader; but notwithstanding the so-called despicable policy of protection which this country has had a good part of the time during its existence for more than a hundred years, it has not resulted in the destruction of the country. It has not resulted in depriving the citizens of their liberty. It has not resulted in lawlessness. It has not resulted in impoverishing the country. On the contrary, during all of these years under a system of protection this country has been built up until it is the greatest country, the most powerful country, the most wealthy country, the most idealistic Nation, on the face of the earth.

Mr. STANLEY. Mr. President, I have heard that argument so often that I can repeat it backwards. We have had protection; we have had a prosperous country; therefore the prosperity of the country is due to protection. We have had protection; we have had a great number of twins born during that time; therefore the prosperity of the country is due to the twins.

Why, Mr. President, that argument has been made in favor of every political heresy and every religious heresy that ever cursed mankind. For a thousand years, because Christianity had increased, because every day there were more converts to religion, because vast domains of barbarians had been brought to the cross, and vast regions once peopled only by the savage and tainted by the smoke of human sacrifice were now filled with populous communities, and church spires were everywhere, they said that civilization demanded union of church and state; and when men arose to denounce it, they said: "Will you deny that France and England and Italy have emerged from the poverty and the destitution of the Dark Ages until to-day they are the beacon lights of the prosperity of the world? They advanced as they did advance under a union of church and state." But they forgot that the union of church and state had made of sweet religion a rhapsody of words. They forgot that the union of church and state had changed temples of holiness into chambers of horror. They forgot that the union of church and state had put a ban upon human intelligence. They forgot that the thumbscrew and the rack and the auto-de-fé were resorted to by Protestant and Catholic alike when a king was the head of a church.

Mr. President, that argument has been advanced in favor of other things. The Senator forgets that the greatest progress this country ever knew was in the 20 years just preceding the Civil War, when there was no iniquitous protective tariff, when duties were reduced to a minimum. The Senator forgets that under Jefferson and Jackson and Madison and Monroe, for 50 years and over, between the inauguration of Thomas Jefferson and the inauguration of Abraham Lincoln, the Democratic Party never lost but three elections, and lost no two in succession. He forgets the progress that the country made then by leaps and bounds. Yes; this country has advanced—advanced notwithstanding a protective tariff. In the language of another, it has been the march of a giant, but a giant manacled. It has been the flight of an eagle, but an eagle weighted and trammeled. I would break the shackles from the puissant limbs of American industry; I would take the trammels from the eyes of the American eagle, and allow her to renew again her eternal sight in the effulgence of the noonday sun. Give me an America with its intelligence, with its industries, with its resources, and an intelligent Democratic administration like that of Woodrow Wilson, and America will dominate and direct the destinies of a distracted world.

Mr. BURSUM. Mr. President, I will say to the Senator from Kentucky that there were 7,000,000 majority in this country in 1920 who disagreed with the views of the Senator from Kentucky.

Mr. STANLEY. Yes; that is true. Christ was crucified, and the majority was all against Him. Oh, that is the beauty of the Democratic Party! You could no more stand a defeat like that than a tallow dog could penetrate the labyrinth of hell. That would be the end of him.

Mr. BURSUM. I suggest that that is to be seen. The day has not yet arrived when the Republicans have failed to rally after defeat. They have been defeated a great many times through the demagogism and misrepresentation of the Democrats, but they have always come back.

Mr. STANLEY. Yes; and we suffered accordingly; but I do not believe that the Lord, in His mercy, is ever going to inflict it on us again. Why, you talk about coming back. The Republican Party is a mere babe compared with the Democratic Party. We were alive, kicking, and dominant and ruled the country longer before this country ever politically turned away from the Lord and the Republican Party was born than it has been in existence since. Your party has been in existence only about 60 years, and we have been here nearly a century and a half, and to-day, notwithstanding your extreme youth, you show all the signs of infantile paralysis.

Mr. BURSUM. Mr. President, I suggest to the Senator from Kentucky that the Democratic Party which the Senator mentions and of which he feels so proud has long ago ceased to exist. It is no longer the party of Jefferson or the party of Jackson. We now have a new party still masquerading under the name of the Democratic Party, which is more of a socialistic party than the Democratic Party of Jefferson or of Jackson.

Mr. STANLEY. Mr. President, if socialism is not evidenced by the attitude of the Republican Party upon the tariff, what is socialism? What is the state socialism of Germany to-day?

The socialist maintains that the Government should insure the prosperity of great industrial concerns by operating them and owning them for the benefit of all the people. The Republican Party maintains that it is incumbent upon the Government to subsidize and fatten and regulate markets for the benefit of great organized enterprises, not for the benefit of all the people but for the benefit of a few fat-frying beneficiaries. Why, protectionism is the first cousin of socialism. The only thing that is eternally abhorrent to it is individualism, democracy, and a tariff for revenue only.

Mr. President, as indicative of the attitude of the press on this important subject, I wish to have incorporated in the RECORD, in the same type in which my remarks will be printed, a number of editorials commenting favorably upon the resolution of the Senator from Arkansas [Mr. CARAWAY].

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[From the Washington Daily News.]

SETTING AN EXAMPLE.

Senators CAPPER, Kansas; HITCHCOCK, Nebraska; and GLASS, Virginia, have set an example which it would be well for the six wool Senators—WARREN and KENDRICK, Wyoming; BURSUM, New Mexico; STANFIELD, Oregon; GOODING, Idaho; and CAMERON, Arizona—to emulate when the individual amendments are offered to the wool schedule.

CAPPER, HITCHCOCK, and GLASS are all newspaper publishers, and as such purchase the product of wood pulp. While they have no direct interest in paper manufacture, they feel their indirect interest is great enough to justify them to decline to vote on that schedule of the tariff.

These three Senators announced they will observe the rule in Jefferson's Manual, which provides:

"When the private interests of a Member are concerned in a bill or question, he is to withdraw, and where such an interest has appeared his voice has been disallowed, even after division. In a case so contrary not only to the laws of decency but to the fundamental principles of the social compact which denies to any man to be a judge in his own cause, it is for the honor of the House that this rule of immemorial observance should be strictly adhered to."

The fact that CAPPER is a Republican and a supporter of the bill and the other two are Democrats and opponents to it shows that there is no politics in the move, but an intelligent respect for political ethics.

—

[From the Philadelphia Record.]

In view of the Caraway resolution for an investigation of the wool Senators, Mr. GOODING, of Idaho, offers to resign. That would be an empty form; just a "gesture," as our French friends say. The opulent flockmasters would reelect him quick enough; it is quite worth while for them to keep him in the Senate. The wool duty is no worse than several other things in the tariff. But the spectacle of all the Senators from the very limited woolgrowing regions supporting unprecedentedly high duties on wool can hardly fail to afford the people considerable education in the way tariff laws are made. There is a Tariff Commission, created by the Republicans, but it was invited to mind its own business and keep its hands off the wool tariff; the wool Senators would see to that.

—

[From the New York Times of July 31, 1922.]

JUDGES IN THEIR OWN CAUSE.

The indignation stirred in the Senate by Senator CARAWAY'S resolution to inquire whether any Senators have a direct pecuniary interest in the tariff rates they are voting for is natural. If there has been any impropriety, Senators have not been aware of it. Long years of tariff legislation have destroyed any delicate sensitiveness on that subject. The protective system being frankly one of logrolling duties so as to put money in various favored pockets, why should a Senator hesitate simply because he finds some of it going into his own? That anybody should be squeamish about it came evidently as a great surprise to the sheep-raising Senators. To them in their innocence it seemed that the fact that they stood to gain by higher duties on wool simply showed that they were skilled experts in advising what the duties should be. If they were satisfied, from the accounts of their own flocks, that 33 cents a pound would be profitable, the argument was strong that other growers would also make money. What could there be wrong about that? The idea that some fastidious persons might blame him was so startling to Senator GOODING, of Idaho, that he nearly resigned on the spot.

Ordinarily, a public man would shrink from even appearing to act as a judge in his own cause. There are parliamentary rules against doing so. There are, in some cases, statutes forbidding it. Legal and judicial precedents are heavily opposed to it. Some of the Senators, touched on the raw, resented the comparison between them and judges. Yet, as Daniel Webster when a Senator clearly pointed out, there is a sense in which a Senator ought to think of himself as a judge. He is to think not merely of what is good for his constituents or his section, but of what is good for the whole country. He must decide judicially between local claims and the interest of the entire people. This principle, if carried out, would be the death of most protective tariffs; and if it should be fatal to the present friendless and unloved bill, popular grief would be able to contain itself.

—

[From the Baltimore Sun of July 31, 1922.]

"BAA, BAA, BLACK SHEEP, HAVE YOU ANY WOOL," AND WHOSE IS IT TO BE?

The United States Senate became really interesting Saturday, and it became so because one of its Members introduced a resolution implying that Senators might actually be influenced in tariff or other legislation by their personal financial interests. Senator CARAWAY'S proposal to probe the personal relation of senatorial votes to tariff schedules created an angry hubbub at once, and its prompt adoption was barred by the sympathetic objection of Senator WADSWORTH, of New York.

The Senate heretofore has never shown any reluctance to investigate anything that might come up. In fact, investigation has been its long suit, and nothing has been so rare as a day in June or in any other month in which the Senate has not had one or two committees at work trying to show up the deviltry of somebody or something.

But when it comes to investigating Senators the gods on this legislative Mount Olympus become horror-stricken and indignant. The suggestion that a Senator could commit any wrong is almost blasphemous; the insinuation that a Senator could be influenced in his attitude toward the tariff or any other public question by sordid considerations of gain is inexpressibly shocking and preposterous. When a man gets into the Senate he is immediately purged of all human weaknesses, of all human prejudices and influences. His mind at once assumes a judicial impartiality beyond the reach of hot or cold waves of human passion or human selfishness. Such a divinity doth hedge a Senator around that it is profane to question him. That's the way, at least, that some of the Senators seem to regard themselves, if we take Saturday's debate on the Caraway resolution as a key to their self-appraisal.

Unfortunately for this view of senatorial impeccability, there have been quite a number of incidents in recent years which have shaken public faith in this theory. Most persons at an earlier period did believe that Senators were what it was said Caesar's wife should have been, and most of us would like to believe it now if we could prevail on ourselves to shut our eyes to facts. We hate to recall the case of Senator Lorimer, of Illinois, who was finally expelled because of gross misconduct, and we hate to remember how many of his colleagues defended him and tried to persuade the country that he had been guilty of no serious offense. And it is painful to remember that most of those who are now so vehemently protesting against the insult contained in the Caraway resolution were among those who voted to add NEWBERRY to the senatorial family.

In these circumstances it would seem that the opponents of the investigation do protest too much. Their assumption of outraged virtue is not likely to produce a very strong impression upon the public. Indeed, quite the contrary impression will be produced if they continue to oppose the investigation and put themselves in the position of appearing to want to hide the facts. Some of those mentioned as being large sheep raisers, and therefore interested in a high tariff on wool, deny that they own any sheep. Others admit it, but impudently ask what has that got to do with it? Senator WARREN, of Wyoming, who during the debate on the Payne-Aldrich bill in 1909 was referred to, says the New York Times correspondent, as "the greatest shepherd since Abraham," was especially wroth at CARAWAY'S presumptuous reflection upon the 100 per cent purity of high-tariff Senators and denounced it as "a damn fool resolution."

Very likely it will be made "a damn fool resolution" by any investigation the Senate may hold, if those interested in the Fordney-McCumber bill can make it so. But no stalling, no evasion, no finespun arguments can break the force of Saturday's debate in the Senate. What was revealed on the part of some of the participants in that debate was the curious lack of

a sense of delicate honor, a strange failure to perceive the relation between their official action and personal profit, which ninety-nine ordinary men out a hundred would perceive at once. Senator GOODING, of Idaho, in "denouncing" the Caraway resolution as "politics" declared that if it could be shown that he had violated any law, "by the eternal gods" he would resign his seat. But no one supposes he has violated any written statute by supporting an unprecedentedly high tariff on a commodity in the production of which he is engaged. The question is whether he has violated a higher unwritten code of ethics which would control men of sensitive feelings. That is the moral point involved. Ought senatorial sensibilities to be blunted and more callous than those of the man on the street?

This is the situation presented: A high tariff bill is evolved from somewhere which offers to woolgrowers the highest bonus ever proposed. Certain Senators who are engaged in sheep raising are among the strongest supporters of that bonus. Senator SMOOT says that when Grover Cleveland was elected he (Senator SMOOT) sold all his sheep and has not owned a head since—which, by the way, is rather a tribute to old Grover as an admission that special interests could expect no favors from him. Now, if the sheep Senators who voted for the present wool bonus had sold or offered to sell their flocks and herds, they would have proved they were not voting for their own pocketbooks. But have they done so, or are they going to do so? And what do they stand to make out of this wool deal if it goes through?

The question involved is not a question of Republicanism or of Democracy, of wealth or poverty. No Senator can be expected to divest himself of every business interest. But the size of the interest and its direct connection with proposed legislation are important factors in determining the proper course for a Representative or a Senator. The following rule from Jefferson's Manual, quoted by Senator CARAWAY, seems to furnish a guide for any man who wants one:

"When the private interests of a Member are concerned in a bill or question, he is to withdraw, and where such an interest has appeared his voice has been disallowed even after division. In a case so contrary not only to the laws of decency but to the fundamental principles of the social compact which denies to any man to be a judge in his own cause, it is for the honor of the House that this rule of immemorial observance should be strictly adhered to."

Senator CARAWAY'S resolution declares that the charges made are "hurtful to the honor of the Senate." The question to be determined is how much honor the Senate has left.

—

[From the New York Tribune of July 31, 1922.]

STRAINING PATIENCE.

In so far as the Caraway resolution implies that a Senator may not participate in the making of a tariff if financially interested to any degree in any of its schedules, the resolution is, of course, absurd.

Senators do not exist in vacuums any more than other persons. They are human beings, like the rest of us, and as such are touched in their several businesses by fiscal legislation of universal effect. Farmers are not expected to be inactively neutral when measures of consequence to their class are under consideration, nor may supineness be demanded of manufacturers or wageworkers or other elements of the population.

The rule that a man may not be a judge or determiner when his own interests are at stake is to be applied with common sense and not pressed to an illogical extreme. Impropriety enters only when the interest is special, direct, and so preponderating as to cloud perception of and regard for the general welfare. The issue sensationally thrust on the Senate thus boils down to the practical question whether the so-called "wool" Senators are honestly pursuing what they deem a public end or are controlled by thoughts of personal profit. The matter is not whether they own sheep, but how many; not whether they are woolmen, but whether they are wool kings.

As to this the information as far as it goes is gravely disturbing. In the Congressional Directory Senator STANFIELD, of Oregon, describes himself as "America's largest producer of wool and mutton." Senator GOODING, of Idaho, the leader of the so-called agricultural bloc, says that the raising of sheep has been his life work—acknowledges that his flocks cover many hills. Senator BURSUM, of New Mexico, is also a shepherd, but the extent of his fold he does not state. Senator SMOOT, who probably has had more to do with writing the wool schedule than any other man, is no longer an owner, although formerly he was one.

The conclusion that the average person, dismissing thought of the extreme virtue that Senator CARAWAY emphasizes for obvious political ends, is that the wool Senators have been rather indecently conspicuous in behalf of Schedule K. A 60 cents per pound duty is obviously high. Their activity has not lessened public suspicion of the tariff bill. Protection will be in danger, as Senator WADSWORTH remarked the other day, when the public becomes convinced that a measure embodying it represents successful grabbings. The members of the agricultural bloc have strained the patience of the country, which has 100 buyers of wool to each producer. Not because they are corrupt but because they should show more sense the wool Senators may be asked to take a seat further in the rear.

—

[From the Fort Wayne, Ind., Gazette of August 1, 1922.]

WHAT DO YOU THINK ABOUT IT?

Once in a while a dynamic thought is let loose in the Senate Chamber. One was given wing the other day when the courageous and honest CARAWAY, of Arkansas, took cognizance of the everyday comment of the American press on the financial benefits to fall to certain Senators personally interested in the woolen industry by the criminally high tariff proposed on woolens.

He seemed to feel that the facts should be known.

Thus his resolution calling for an investigation of the relation of Senators to industries being given astonishing tariff rates that will greatly increase cost to the consumers and put money in the private purse of Senators who are financially interested.

When he asked for immediate consideration for the resolution it was refused—the son-in-law of John Hay objecting. This worthy was quite sure that it is not permissible to permit the public to know such things.

The debate was interesting.

Senator GOODING, who is charged as being one of the men to financially profit by the increase in the price of woolens this winter, and who has devoted his statesmanship to this one topic, was outraged. He declared dramatically, "By the gods" that if he had "violated any law" he would resign. He meant any statute. Sometimes there is a law of propriety that ought to be, and is not, the law of the land.

Senator WARREN, dubbed by Dolliver "the greatest shepherd since Abraham," said it was a "damn fool resolution." Any resolution that would prevent special interests, Senators or no Senators, from "getting theirs" would be a "damn fool resolution" to this incurable reactionary.

Senator BURSUM, of New Mexico, who will also gain financially, was sure the resolution is "ridiculous."

It is interesting to note that the Senators who are personally interested in the wool rate in the tariff have been in the front rank of the fighting on this one schedule—and in the rear ranks on all else.

This is explained by Senator STANFIELD, of Oregon, who describes himself in his autobiography as "America's greatest producer of wool," on the ground that a personal interest in the subject makes these men just the men to say what the American people shall pay for woolens.

Senator CARAWAY put the other side forcibly enough in the following:

"If I believed that the laws were bought and sold, I would owe no allegiance to that kind of law or the kind of government in which that thing could happen. It would become the duty of every self-respecting citizen to rise up, not only in protest, but if necessary in rebellion, against a government where the laws were bought and sold.

"This is a charge made by reputable Republican papers; it has been reiterated here on the floor of the Senate; it was charged yesterday afternoon by a Member on your side, whose honor and whose acute sense of honor nobody questions, that it was an outrage.

"Is it wise to let the impression go abroad that legislation is being framed by selfish interests, by men directly profiting by the legislation?"

The Senate will not permit that investigation.

Why?

The Senate is not impressed—but what about the people who pay the piper?

Once upon a time one Henry Lippitt became the master lobbyist of the cotton industry. That was his principal work for years. He did his work well. Later he became a Member of the Senate—and as a Senator he remained as he had been, a lobbyist—active on cotton.

These are matters that may amuse Senators, but how do you feel about it?

Would you want a judge financially interested in the result of a suit to sit on a case in which your interests were on the other side? We believe that a judge thus sitting would be open to impeachment. He would feel disgraced.

What is the moral difference between a judge financially interested in a case sitting as judge, and a Senator financially interested in the making of a tariff rate voting on the making of the tariff?

Perhaps there is a difference that escapes us—and we put it up to you. What do you think about it?

We submit that if there is no hard and fast law prohibiting Senators and Congressmen from voting taxes out of the people's pockets into their own there ought to be.

—

[From the Springfield Republican of July 31, 1922.]

"ROBBER TARIFFS."

The resolution of Senator CARAWAY calling for an investigation of the financial and business connections of Senators in their relation to the pending tariff bill is not so partisan as it may seem. There are Democrats as well as Republicans in that body who might be discredited by the disclosures of the inquiry.

Repeatedly while this tariff bill has been pending Democrats have voted for high duties in opposition to the majority on their own side, and among their number some may have been influenced by their personal interests as well as by the pressure from their own constituents. If Senator CARAWAY planned his stroke for party advantage, he might not be entirely satisfied with the outcome of an investigation.

It is no new thing to find in the Senate men who are deeply interested financially in certain tariff schedules. Senator GOODING, of Idaho, who owns great flocks of sheep, has become notorious mainly because of his aggressive insistence in the Senate upon wool duties that seem outrageous in their effect on the prices of clothing, but even his brutal disregard of the consumer's interest and his cave man's theory of protection as synonymous with embargoes and absolute monopoly are by no means unprecedented. We had the "Senators from Havemeyer" when the sugar schedule was fought over in Mr. Cleveland's second administration. Only a very few years ago Rhode Island had one of the largest textile manufacturers in the country, Mr. Lippitt, as one of its Senators. There has not been a time in 50 years when the Pennsylvania iron and steel makers did not virtually own the Senators from the Keystone State when tariff duties on iron and steel were under consideration, whether or not those Senators personally owned shares in steel companies.

Moral standards in legislation have risen in some directions, but not in others. It is no longer "ethical," in the public view, for legislators to own stock in a railroad that is the subject matter of a pending bill. A selfish interest in a franchise can not safely be exposed to popular scrutiny by a member of the body that grants it. The late Senator Foraker was driven out of public life after it had been shown that as a lawyer he had acted as counsel for the Standard Oil Co. Not so many "railroad attorneys," actually under retainers, now sit in our lawmaking bodies. Senator Bailey, of Texas, expired as an influence in politics after his connection with Southwestern oil companies became known. When President Roosevelt wished to embarrass Senator Tillman, of South Carolina, who had been attacking him, he made public the fact that Mr. Tillman had had some connection with certain investments in the far Northwest and might be trying to make money out of the public lands.

It is singular that the public conscience has not grown equally sensitive to the personal interests of Members of Congress in tariff legislation. It is absurd to brand a Foraker or a Bailey and then virtually license FRANK GOODING, of Idaho, a woolgrower, to fix in the United States Senate the prices of the clothes we buy through his dictation of the duties on raw wool. Possibly the people are now waking up to this iniquitous aspect of tariff legislation, which gives reality to "robber tariffs." If they really are, a "scientific tariff" may not be so far away as the higher cynics have believed.

—

[From the Boston Globe of July 31, 1922.]

MUCKRAKING AGAIN.

Senator CARAWAY, of Arkansas, is earning a name as "the bad little brother" of the Senate. It is the little brother who really gives the bride away by spilling awkward words just when the festivities are at their height.

The Caraway resolution for an investigation of the charges that certain Members of the National Upper House are interested financially in the pending tariff bill was outlawed by the objection of a single Senator. Mr. CARAWAY is a Democrat, of course; but it is the feeling of many on the Republican side that his allegiance to another party is not an excuse for giving currency to such horrid charges as those which have been made, especially those against wool-growing Senators, who are patriotically trying to do their bit to cover the backs of their fellow citizens with fleeces from home-bred sheep.

It is small wonder that Senator WARREN, who was called by the late Senator Dolliver "the greatest shepherd since Abraham," should have been driven to strong language, or that Senator STANFIELD, of Oregon, described in the Congressional Directory as "America's largest producer of wool and mutton," should have argued that the very fact that he is interested in wool enables him "to vote more intelligently."

Even though the Senate has shut off the investigation by its system of senatorial courtesy, the public has been made to believe that the cat is out of the bag, the sheep out of the pen. The result will be many unofficial investigations. This Caraway resolution has opened the gates to muckraking of the sort which was so popular a dozen years ago, when a man's public conduct was judged in the light of his private interests. Even now an army with rakes is threatening the sanctity of the most expensive club in the world.

—

[From the New York Globe.]

SENATORS FROM THE WOOL RANCHES.

Senator CARAWAY has proposed an investigation of what every Senator and everyone familiar with Washington affairs already knows, namely, the relations between certain Senators and the wool industry. Neither Senator GOODING, nor Senator WARREN, nor Senator STANFIELD, nor Senator BURSUM has made any secret of their peculiar interest in the wool schedules. The case of Senator SMOOT is superficially different, for although he is a prominent banker and investor in a State in which sheep raising is important, he has not owned sheep directly for some 30 years.

Still other Senators are bound by personal, political, or business affiliations to support this or other schedules in which they have not a direct pecuniary interest. The whole tariff bill has been written primarily on the showing of those who expect to benefit by it, for although there was a public hearing on most of the items the producers who wanted the tariff were always better organized and more adroitly represented than the consumers who stood to lose by it. There is an element of corruption in every protective tariff made as protective tariffs have always been made in this country.

There are, however, degrees of corruption which public opinion can not tolerate. One of these is reached when a business man in Congress takes an active part in forwarding legislation which will put money into his own pocket. This is exactly what several of the wool Senators have been doing, and their action can not be excused by the specious argument of Senator STANFIELD that their personal interest in wool fits them "to vote intelligently; more intelligently, perhaps, than many others who are opposed to the principle of a protective tariff." The political experience of mankind showed long ago just how untrustworthy "intelligence" of this kind is. The principle is firmly established with regard to judges; it ought to be established with equal firmness with regard to legislators. The wool Senators know, and everyone else knows, that they are taking the Federal pay for serving their own interests. An ordinary sense of decency would lead them to withdraw from the debate. In the present condition of American politics it is too much to expect that they should abstain from voting on schedules in which they have a financial concern, but a high sense of honor—an honor to which American legislators may yet attain—would demand even that.

Senator CARAWAY is to be thanked for turning the spot light upon the Senate at the very moment when the spectacle it revealed was most instructive. If other legislators would more frequently forget "senatorial courtesy" the upper House might be purged of some Members who have no moral right to sit there.

—

[From the New York World of July 31, 1922.]

THE WOOL-TARIFF SCANDAL.

The scandal of the wool schedule can not be suppressed by shelving the Caraway resolution. It can not be brushed aside as of no importance. It can not be dismissed as being inspired by partisan politics. For it goes to the root of the system of tariff making for which the Republican majority in the Senate stands responsible.

The issue is as plain as it can be. It is a question of common honesty. If individual Republican Senators or a group of Republican Senators as woolgrowers are financially interested in the rates of the pending tariff bill, in decency they should be barred from voting. No protests of rectitude and no specious pleas of service to industries of their sections can be made to justify their using their official position to vote money into their own pockets. Men in places of trust are regularly sent to

jail for doing that very thing. The Senator who does not hesitate to m suse his power to raise money from the public not for the public but for himself must be wholly insensitive to the moral quality of his acts or defiant of public opinion.

The audacity of the woolgrowing Senators of the West during the debate on the Caraway resolution was astounding. They have gone too far to be capable of showing any shame. They are too sure of the profits of tariff legislation to give up anything that they have been promised. In the bargaining in duties with other Senators who have special interests to care for they have obtained advantages which they intend to hold; otherwise the whole tariff bill would go to smash.

So Senator WARREN, a Wyoming woolgrower, denounces "these damn-fool, nonsensical investigations." And Senator STANFIELD, of Oregon, who boasts in the Congressional Directory of being "America's largest producer of wool and mutton," professes indignation that any Senator, "because he happens to be interested in wool," should be criticized for "voting for this woolen schedule." And Senator BURSUM, of New Mexico, a woolgrower, complains that "this whole proceeding seems to me an undue capitalization of a matter which is unimportant for the reason that it is of daily occurrence." And Senator GOODING, of Idaho, another woolgrower, who wrote the wool rates, explains that if every Senator followed the rule of not voting where he had invested in something, "there would not be a quorum on the tariff question at all." And Senator WADSWORTH, of New York, farmer and live-stock grower by profession, trails along with the remark that the Caraway resolution is uncalled for and objects to its consideration.

It is a revealing picture of the methods by which a Republican tariff bill, not merely the woolen schedule, is prepared and put through the Senate. It exposes the party of moral ideas at its highest point of efficiency. And not a Republican voice from the side of the high protectionists is raised in condemnation.

It was shown in the Newberry case that with the approval of the Republican majority seats in the Senate may go to the highest bidder. Is it now to be a matter of record that with the approval of the Republican majority Republicans holding seats in the Senate may without dishonor use their official position and power for their personal enrichment; that it is their private privilege to lay an outrageous tax on the American people for their own immediate profit?

Mr. GOODING. Mr. President, I understand that under the rules of the Senate the resolution goes over until to-morrow. Is that correct?

The PRESIDING OFFICER. There is no resolution before the Senate at this time. The tariff bill is before the Senate.

Mr. GOODING. My understanding is that the chairman of the Committee to Audit and Control the Contingent Expenses of the Senate reported unfavorably the resolution which was submitted yesterday.

The PRESIDING OFFICER. The report of the committee has gone to the calendar in accordance with the rule.

Mr. GOODING. Mr. President, in view of the fact that a wool pool has been referred to in which it was said that I was interested, I want to say that I never bought a pound of wool in my life. It has become the custom in this country to organize wool pools. That custom exists not only in the Western States but in practically all the Eastern States. This has been brought about by the fact that those who buy wool divided up the territory, and there was no longer any competition between those who were in the wool trade. The woolgrowers of the West were at the mercy, if you please, of men in the business who combined together, as I have said, and divided the territory so that there was no competition at all in the wool market; and for that purpose they organized these wool pools, sometimes having wool auctions, gathering the wool into large warehouses, and trying to get somewhere near the market price.

The wool pool that was organized at Shoshone, Idaho, and in which the press say that I was financially interested, was a wool pool that I understand covered about a million pounds of wool of the different woolgrowers. I likely was one of the very smallest sheep owners in that pool. I knew nothing about it. The wool sold for 30 cents a pound, and the next day another pool was formed in the neighborhood where the few flocks I had were feeding, and that wool was sold for 31 cents a pound.

I made this statement before, but, in view of the fact that I have been referred to as being interested in making so many millions out of this wool business, I wanted to repeat it—that the wool pool in which I was interested got the smallest price paid for wool in the West this year; that through the pooling they finally succeeded in receiving as high a price as 38 cents a pound on wool, and I was unfortunate, through the kindness of a brother who thought he was doing me a good turn, to have my wool go in with his pool in a neighborhood practically 50 miles away from where my sheep were being ranged, and I lost something like $700 or $800.

For two years I was out of the sheep business. I thought I was through owning any live stock, as far as that is concerned. Then came the great crisis which swept over the country, brought about largely by free wool and a Democratic administration, who never made an effort to bring the country down by stages, as England did her agricultural interests and as was done over in Australia; but with a smash and a bang they took off all control they had of farm products, and did everything they could to deflate the farm prices, with the result that it practically broke and paralyzed the live-stock industry of the country. I was unfortunate enough to have to take back the sheep in which I am now interested. I am charged with having sheep on a thousand hills. I have a half interest in 8,000 sheep, which ranks me as a small live-stock grower in the West.

I am not offering this as an excuse for having voted for a duty on wool that is less than the difference in the cost of production between this country and foreign countries. I want to say to the Senator that my conscience is not hurt at all by the charges which have been made. I am not so sensitive or ignorant that I do not know that I have only done my duty in a manly way, and I am going to continue to do it and fight to protect the industries of my State as long as I have a seat in the United States Senate.

I want to say that, as far as the present duty on wool of 33 cents on the scoured basis is concerned, the cost of production to-day is even greater than 33 cents on the pound of scoured wool. The freight charges alone, the commission charges, and the scouring charges, after the wool leaves the farm in the West, all of which the woolgrower must pay, amount to 8½ cents on a pound of clean wool. The cost of handling and running sheep to-day is a dollar a head more than it was before the war. The sheep of the West shear somewhere near 2½ pounds of clean wool. It is going to cost something like 48¾ cents a pound more to lay a pound of clean wool down in Boston than it did before the war. So, unless there is an increase in the price of wool, the industry can not live even with a duty of 33 cents on the scoured basis. That is the lowest duty that has been placed on wool by the Republican Party, or as low a duty, for a half a century, and the only difference, if you please, is the fact that the duty is placed on the clean content of a pound of wool. It is possible for the woolgrower to come nearer getting the full duty on wool than he did when it was based on the grease content of the wool, but there is nothing certain about it, for to-day, with 45 cents on the scoured basis, some classes of wool are selling in Boston for less than the duty of 45 cents a pound. The American manufacturer is the only market for American wool. He is the sole master and he beats the price down to the lowest point. Just how much the duty would benefit the woolgrower nobody knows, but if the Finance Committee had accepted Schedule K, something which gave the manufacturers a hidden duty, I would not have been attacked as I have been by the Boston newspapers and other newspapers of the country and charged with having violated my oath of office.

I am not going to take up any more time of the Senate. I merely say that when my resolution comes up I am at least going to speak upon it, and I hope the resolution I have introduced will be accepted, because I know it covers in a very fair way all that everybody who is interested in the pending tariff bill wants, and I have confidence that the Presiding Officer will appoint a committee consisting of men of judgment, integrity, and honesty, and he will not have any trouble finding that kind of men on both sides of the Chamber in the United States Senate.

Mr. CARAWAY. Mr. President, on last Saturday I introduced a resolution which sought to ascertain what, if any, financial or professional interest Senators had in rates of the various schedules of either the pending tariff bill or the emergency tariff law. Quite a number of Senators, who elected to imagine they were being accused, entered denials that they were interested, and others undertook to justify their votes in the interest of their people's interest.

As I said before, and say again, it is not my province to determine whether they had a right to cast such votes. I think, following the interpretation of others who have discussed the provision of Jefferson's Manual, that if one's personal interest is large, if it is the main thing in his life, if it is of such predominance that it might lead people who are not familiar with his high character to suspect he may have been influenced by his private interests and not the public good, he ought to refrain from voting. After all, it may be that it is a question for each individual Senator to determine for himself.

I sometimes can not tell whether the mannerisms of the Senator from Idaho indicate anger or intensity of interest and purpose, but he was deeply stirred, and, using his own swear words, "by the eternal gods," he announced he was going to have an investigation. He repeated that declaration on at least two occasions on the floor, and I have also read similar statements in print, and I thought that "by the eternal gods" he meant it.

Yesterday there was a chance to introduce a resolution. I refrained from reintroducing the one I had previously introduced, and which had been objected to by the Senator from New York [Mr. WADSWORTH], because I presumed that a man who was the self-selected head of the farmers' tariff bloc would do whatever he said he would, and I necessarily presumed we would have an investigation. I feared I could not get it. I knew, or at least I was told, that if the Senator from New York [Mr. WADSWORTH] were absent from the Chamber, other Republican Senators had been posted to object to any resolution I might offer. But a powerful Senator, or a Senator who is credited, whether rightly or wrongly, with having written the whole schedule dealing with wool, having said so confidently that "by the eternal gods" he would have an investigation, I naturally refrained from offering any resolution, content that the mighty Senator from Idaho [Mr. GOODING] should take the laboring oar and bring about an investigation.

The mountain labored and brought forth a mouse, according to the opinion of the Republican colleagues of this great Senator from Idaho. The Committee to Audit and Control the Contingent Expenses of the Senate, to which his resolution was referred, promptly reported it back with this statement, if I may be permitted to translate it, without giving offense: "There is nothing in the Gooding resolution but foolishness, and we are not going to help the Senator from Idaho make a fool of the Senate, and therefore we report his resolution adversely."

The Senator from Wisconsin [Mr. LENROOT] said it would take two years and hundreds of thousands of dollars to carry out the investigation suggested by the Senator from Idaho; and the Senator from Wisconsin, who I understand from the Senator from Kentucky [Mr. STANLEY], represents practically the entire unadulterated intelligence of the Republican Party, took the Senator from Mississippi [Mr. HARRISON] to task for admitting he would vote for that resolution.

That is the view which the "intelligent" Members of the Senate on the Republican side entertain of the resolution offered by the great Senator from Idaho. I will not charge it, because I do not know, but it may be that it was intended to be a joke, and be laughed out of court. That is what has happened to it, anyway.

The only real charge in the resolution of the Senator from Idaho dealt with Mr. Munsey and the New York Herald, and the Senator from New York [Mr. CALDER], who is the chairman of the Committee to Audit and Control the Contingent Expenses of the Senate, took occasion in his report to say that the charge was unfounded and unjustified.

The committee prejudged the case and said there was nothing in the charge; that Mr. Munsey and his paper were guilty of no wrongdoing nor of any impropriety, as charged by the Senator from Idaho.

The Senator from Idaho protests his innocence, and I am going to permit him to do it. It is nothing to me; I have never made a charge against him. I never knew he had 8,000 sheep until to-day. I had never heard the number mentioned. But the Senator thinks it is reprehensible—and in that opinion the Senator from North Dakota [Mr. MCCUMBER] and the Senator from Utah [Mr. SMOOT] concur—for a newspaper to accept an advertisement from an importer, and that if it does, that importer will influence its editorials, will control the editorial policy of the paper. The Senator from North Dakota so charged, and the Senator from Indiana [Mr. WATSON] agreed, that papers which accepted these advertisements were controlled by their advertisers; that, in other words, they sold their editorials to their advertisers.

Mr. SMOOT. Mr. President, I want the Senator to correct his statement so far as the Senator from Utah is concerned. The Senator from Utah has never stood upon this floor and said one word about the advertisements in papers in any part of the United States.

Mr. CARAWAY. I am awfully glad to know that.

Mr. SMOOT. Not one word.

Mr. CARAWAY. The Senator does not believe they were controlled by their advertising columns?

Mr. SMOOT. The only question that was ever asked was by Senator ROBINSON——

Mr. CARAWAY. I say, the Senator does not believe that they were controlled by their advertising columns?

Mr. SMOOT. I could not say the papers were. I do not know a thing about it.

Mr. CARAWAY. Has the Senator any opinion?

Mr. SMOOT. No; I have not; because some may be and others not. I could not say a word about it. I know nothing about it.

Mr. CARAWAY. And yet the Senator knows as much about it——

Mr. SMOOT. I do not propose to stand upon the floor of the Senate and make a statement about something I know nothing about.

Mr. CARAWAY. I commend the Senator for that. I have for him a very high opinion. Evidently, with all the facts the Senator from North Dakota and the Senator from Indiana together had, he does not believe there was evidence to convict the newspapers.

The Senator from Idaho, who wants to investigate the newspapers, especially to investigate Frank Munsey, does believe that private interests control the great dailies in the discharge of their public duty, because we all know that a newspaper owes a public duty to report correctly the news and, as far as possible, reflect in their editorials a high moral sentiment. He believes those papers were controlled against the Republican Party by the importing houses that advertised in their columns. Now is it any wonder that the papers say that Senators who are directly financially interested in the production of articles on which unjustifiable duties have been levied were influenced by their private interests? One is no more reasonable than the other. When he makes the charge in his resolution and in his statement, the Senator admits that people are influenced and controlled by their private interests, and that is what the newspapers said about Senators, that they were interested and, therefore, were controlled by their private interests.

Of course I am perfectly willing for the Senator to turn State's evidence. That seems to have been his intention. He seems to admit that he and those who had been charged by the New York Herald were guilty, but seeks by his resolution to show that all other Republicans are no better than they. If that is all he expects to disclose, there is not much use, I think, in spending several thousand dollars in investigations to ascertain that fact. It will be admitted that he is correct about it.

But, Mr. President, it is amusing to watch the Senator from Wisconsin [Mr. LENROOT], for whose intelligence I have a very high regard, differentiate. He would not do what the Senator from Idaho did. He would not charge the Senator from Kansas [Mr. CAPPER] with being a hypocrite because he did not vote for a reduction of the rate on pulp. He did not charge that the Senator from Nebraska [Mr. HITCHCOCK] and the Senator from Virginia [Mr. GLASS] were hypocrites. He said they were to be commended for their course, that it was proper that they should refrain from voting because they were the owners of newspapers, and therefore directly interested in the price of newsprint paper. But, on the other hand, it was entirely proper, he said, for Senators to vote for matters in which they had an overwhelming financial interest if other people in their States were likewise interested. In other words, the Senator from Wisconsin laid down the rule, Mr. President, that we have a right as Senators to advocate anything the people in our States wish. That is what it reduces itself to, that we have a right to violate the oath of office we took when we were sworn into the Senate of these United States and justify it by saying that it is the wish of the people we represent.

How, then, could any man be held to any course of propriety? He could say that he spoke for the interests and opinions of his people. He could advocate the repeal of the Constitution and be entirely within his right by saying that the people of his State wanted it done. John C. Calhoun and those Senators who believed with him in State rights and nullification ought never to have been condemned by any Senator on the other side of this Chamber, if they accept the statement of the Senator from Wisconsin, because those Senators evidently spoke the sentiment of the people of their States. A Senator from the State of Kentucky was driven out of this Senate during the war, not because he did not speak the sentiments of his people but because he did not speak the sentiments of the people who lived north of the Mason and Dixon line. Senators expelled him from the Senate. Now, the Senator from Wisconsin would condemn every Senator who voted that way because, he has said, we have a right to advocate anything and cast any kind of vote, however corrupt, if we can show that

the people in our State wanted us to cast that vote or that they would be benefited by it.

Mr. STANLEY. Mr. President——

Mr. CARAWAY. I yield to the Senator from Kentucky.

Mr. STANLEY. At that point may I say that we have this anomalous situation: The people in my State are admittedly for free wool. The people in the State of Idaho are not for free wool. A woolgrower from Kentucky, if he were in the Senate, could not vote for the duty if he had a material interest, because his people do not agree with him, while a woolgrower in Idaho could vote for it.

Mr. CARAWAY. I think the Senator's statement—the Senator from Wisconsin—will be interesting reading in New Jersey, for instance. The Senator from New Jersey [Mr. FRELINGHUYSEN] wants to stay here. That is a laudable ambition. The people of his State evidently believe in light wines and beer, because they elected a governor on that platform by an overwhelming majority when the other State officers were Republican and the governor a Democrat. I suggest, according to the Senator from Wisconsin, that the Senator from New Jersey had no right to cast a dry vote here, if the Senator from Wisconsin is correct.

Oh, the idea that the question of whether an act is right or wrong could be determined by whether your people agree with you is so absurd that any Senator who could lay that down as a touchstone of right or wrong has not any conception of what right or wrong really is. On the contrary, Mr. President, it is a principle; it is a question of honor; it is a question of that finer sense that gentlemen feel should guide them in dealing with all questions, public or private, and not whether their State would be financially interested or bettered.

Now, may I say one further thing and then I am through. I realize that the resolution of the Senator from Idaho was not urged very strenuously. I rather imagine he expected the thing to happen to it that did happen to it. I suspect he wanted it that way. It strikes me, if I may say so without being critical, that it was such an absurd resolution that I did not presume anybody was going to seriously press it. I do not presume it was expected to be pressed. The country is permitted to make up its mind as to whether Senators on the floor of the Senate of the United States have been influenced by their private interests in piling up rates on schedules that are to cost the other part of the country hundreds of millions of dollars by the attitude of the Republican Party which by its act says, "We are not going to permit you, the people who are to pay the taxes, to have any information as to the motives which impelled us to levy these outrageous rates of duty upon you, if we by any parliamentary tactics can keep you from knowing them."

There is a rule of evidence, as old as the common law, that where a witness is in possession of information and he alone has it and refuses to reveal it, it must be presumed that his testimony would hurt his cause. Applying that rule to the present situation, the country would be justified in deciding, and will decide, that there is information in the possession of the Senate which, if made known, would be hurtful to the Senators who wrote these schedules, and therefore that information is denied.

Mr. CURTIS. Mr. President, I ask unanimous consent to have printed in the RECORD a decision rendered by the Speaker of the House of Representatives a good many years ago on the question of the right of a Member of the House or the Senate to vote upon a question in which he is interested. I am not going to take the time to read it, but I ask that it may be printed in the RECORD in 8-point type, because it covers the question fully, and I think every Senator ought to read it before he casts his vote.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

[From vol. 5, par. 5952, pp. 503–504, of Hinds' Precedents of the House of Representatives.]

"On April 11, 1874, the House was considering the bill of the House (No. 1572) to amend the several acts providing a national currency and to establish free banking, and for other purposes.

"During the proceedings Mr. Robert M. Speer, of Pennsylvania, made the point of order that certain Members holding stock in national banks were not entitled to vote, being personally interested in the pending question. Mr. Speer mentioned three Members—Messrs. Poland, of Vermont, and Hamilton and Phelps, of New Jersey—who were officers of national banks, and therefore, as he held, not entitled to vote on the pending question, which included the following proposition:

"'That in lieu of the tax of 1 per cent per annum now imposed on the outstanding circulation of national banks, a tax of 3 per cent per annum, payable semiannually in gold, shall be collected upon the circulation which has been issued to each national bank which has not been returned for cancellation.'

"The Speaker, in ruling, said:

"'The Chair will say that the question in fact lies somewhat back of the rules of the House, and while the Chair is going to give his opinion upon the rule and construe it, he begs to make a remark that goes somewhat deeper than the rule. When a very distinguished predecessor in this chair, Mr. Nathaniel Macon, of North Carolina, occupied it, as is familiar to the House, a question arose upon the amendment to the Constitution changing the mode of counting the votes for the election of President and Vice President. The rule at that time was peremptory that the Speaker should not vote except in the case of a tie. It has since been changed. The vote, if the Chair remembers correctly, as handed up to Mr. Macon was 83 in favor of the amendment and 42 opposed to it. The amendment did not have the necessary two-thirds and the rule absolutely forbade the Speaker to vote, and yet he did vote, and the amendment became engrafted in the Constitution of the United States upon that vote; and he voted upon the distinct declaration that the House had no right to adopt any rule abridging the right of a Member to vote; that he voted upon his responsibility to his conscience and to his constituents; that although that rule was positive and peremptory it did not have any effect upon his right. He voted, and, if the Chair remembers correctly, it was attempted to contest afterwards by some judicial process whether the amendment was legally adopted. But the movement proved abortive, and the amendment is now a part of the Constitution. Now, the question comes back whether or not the House has a right to say to any Member that he shall not vote upon any question, and especially if the House has a right to say if 147 Members come here, each owning one share of national-bank stock—which there is no law to prohibit them from holding—they shall by reason of that very fact be incapacitated from legislating on this whole question.

"'If there is a majority of one in the House that holds each a single share of stock, and it incapacitates the Members from voting, then, of course, the House can not approach that legislation; it stops right there. * * * Now, it has always been held that where legislation affected a class as distinct from individuals, a Member might vote. Of course, everyone will see the impropriety of a sitting Member, in the case of a contest, voting on his own case. That is so palpably an individual personal interest that there can be no question about it. It comes right down to that single man. There is no class in the matter at all. But where a man does not stand in any way distinct from a class the uniform rule of the American House of Representatives and of the British Parliament, from which we derive our rulings, have been one way. In the year 1871—the Chair is indebted for the suggestion to the gentleman from Massachusetts [Mr. G. F. Hoar], but he remembers the case himself—when a bill was pending in the British House of Commons to abolish the right to sell commissions in the army, which officers had always heretofore enjoyed, and to give a specific sum of money to each army officer in lieu thereof, there were many officers of the army members of the British House of Commons, as there always are, and the point was made that those members could not vote on that bill because they had immediate and direct pecuniary interest in it. The House of Commons did not sustain that point, because the officers referred to only had that interest which was in common with the entire class of army officers outside of the House, many thousands in number.

"'Since I have had the honor of being a Member of this House, on the floor and in the chair, many bills giving bounty to soldiers have been voted on here. We have the honor of the presence on this floor of many gentlemen distinguished in the military service who had the benefit of those bounties directly and indirectly. It never could be made a point that they were incapacitated from voting on those bills. They did not enjoy the benefit arising from the legislation distinct and separate from thousands of men in the country who had held similar positions. It was not an interest distinct from the public interest in any way. * * * And the same with pensions. * * * And further, as the gentleman from Massachusetts, the chairman of the Committee on Ways and Means [Mr. Henry L. Dawes], has well said, if it should be decided to-day that a Member who holds a share of national-bank stock shall not vote on a question relating to national banks, then the question might come up whether a Member interested in the manufacture of cotton shall have the right to vote upon the tariff on cotton goods, or whether a Member representing a cotton State shall vote upon the question whether cotton shall be taxed, for

that interest is largely represented here by gentlemen engaged in the planting of cotton. And so you can go through the whole round of business and find upon this floor gentlemen who, in common with many citizens outside of this House, have an interest in questions before the House. But they do not have that interest separate and distinct from a class, and, within the meaning of the rule, distinct from the public interest. The Chair, therefore, has no hesitation in saying that he does not sustain the point of order presented by the gentleman from Pennsylvania [Mr. Speer].'

"Mr. William S. Holman, of Indiana, having appealed from this decision, the appeal was laid on the table, and so the decision of the Chair was sustained."

Mr. McCUMBER obtained the floor.

Mr. SIMMONS. Mr. President, will the Senator yield to me to send to the desk and have read on behalf of the minority a proposition with reference to a unanimous-consent agreement for a time to vote upon the bill?

Mr. McCUMBER. I yield for that purpose.

Mr. SMOOT. The Senator does not want to have it considered at this time?

Mr. SIMMONS. I simply want it read, and then to have it lie on the table.

Mr. McCUMBER. I was in hopes the Senator would prepare something and present it to this side of the Chamber so that we would have a little time to consider it, and possibly agree upon it, and settle the matter right now.

Mr. SIMMONS. I am not going to ask that.

Mr. McCUMBER. I said that I wish the Senator had presented it to us before he sent it to the desk; but if that is the channel through which we are to receive it, I am glad to receive it from any source. I have no objection.

Mr. SIMMONS. I send to the desk a proposition on behalf of the minority looking to an agreement on a time to vote upon the pending bill. I ask that it may be read and lie upon the table.

The PRESIDENT pro tempore. The Secretary will read the proposed unanimous-consent agreement.

The reading clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT.

It is agreed by unanimous consent that not later than 10 o'clock a. m. on the calendar day of Thursday, August 17, 1922, the Senate shall proceed to vote, without further debate and to the exclusion of all other business upon any amendment that may be pending, any amendment that may be offered, any motion that may be made relative thereto, and immediately thereafter upon the bill H. R. 7456, an act to provide revenue, etc., through the regular parliamentary stages to its final disposition.

That hereafter debate shall be confined to the question before the Senate or the bill itself, and no other business or irrelevant question or motion shall be entertained except by unanimous consent.

That upon the conclusion of the consideration of amendments to the schedule now before the Senate the Senate shall proceed to the consideration of amendments pending or hereafter to be offered to the following paragraphs in the order named, the agreement heretofore made that committee amendments shall be first disposed of being hereby modified so far as such agreement affects those particular paragraphs and amendments offered thereto, namely:

Paragraphs relating to sugar (Schedule 5).

Paragraphs relating to potash and bounty thereon (paragraphs 1635 and 1636) and white arsenic (paragraph 1).

Paragraphs relating to presidential powers (sections 315, 316, 317).

Amendments to tariff commission act.

Paragraphs relating to hides, leather, boots, shoes, and leather goods (paragraphs 1427a, 1431, 1432, 1433, and 1435a).

That upon the conclusion of amendments to said paragraphs, or if the amendments to said paragraphs shall not be concluded prior to that time, after the hour of 11 o'clock a. m., Saturday, August 12, 1922, no Senator shall speak more than once nor longer than 15 minutes on any amendment or motion nor longer than 30 minutes upon the bill.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

Mr. SIMMONS. I did not ask for immediate action. I ask that it may lie on the table.

The PRESIDENT pro tempore. The proposed agreement will lie on the table for the present.

Mr. McCUMBER. Mr. President, I simply desire to say in respect to the proposal just submitted by the Senator from North Carolina that I think, with a very slight amendment, it will be entirely satisfactory; and I think the amendment which I shall propose will also be satisfactory to Senators on the other side of the Chamber. Inasmuch, however, as the proposed agreement is not to be acted upon just now, I should like to go over it a little with the Senator from North Carolina [Mr. SIMMONS] in order to understand just exactly what particular provisions come within the matters which are proposed first to be considered.

Mr. President, having spent four and a quarter hours of the day on matters outside the pending tariff bill, I hope we may now get to the bill and make some real progress upon it.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the Committee on Finance.

The next amendment of the Committee on Finance was, on page 171, line 22, before the word "cents," to strike out the figures "20" and to insert "30," so as to read:

PAR. 1306. Pictures, calendars, cards, labels, flaps, cigar bands, placards, and other articles, composed wholly or in chief value of paper lithographically printed in whole or in part from stone, gelatin, metal, or other material (except boxes, views of American scenery or objects, and music, and illustrations when forming part of a periodical or newspaper, or of bound or unbound books, accompanying the same), not specially provided for, shall pay duty at the following rates: Labels and flaps, printed in less than eight colors (bronze printing to be counted as two colors), but not printed in whole or in part in metal leaf, 30 cents per pound.

Mr. SMOOT. Mr. President, on page 171, line 22, before the words "per pound," I desire, on behalf of the committee, to modify the amendment by substituting the numeral "25" for the numeral "30."

The PRESIDENT pro tempore. The question is on agreeing to the amendment as modified.

Mr. BURSUM. Mr. President, I have endeavored to get the floor several times. I merely wish to make a short statement with reference to the much-discussed wool schedule and the statement made by the junior Senator from Arkansas [Mr. CARAWAY]. The Senator from Arkansas seems to be very much disturbed about the moral integrity of the Senate; he pretends to be very seriously affected thereby. It is evident to my mind that there has never been any such exemplification of curbstone politics displayed in the Senate in all its history as has been indulged in within the last day or two with reference to the wool schedule.

There is no dispute as to the main facts relative to this matter. The Senator from Arkansas introduced his resolution pursuant to an article which appeared in the New York Herald charging that certain Senators were interested in the growing of wool. Mr. President, suppose they are. There is no denial that some Senators in this body are interested in the growing of wool. I, for one, am frank to say that I was interested in the growing of wool before I became a Senator, and I have been so interested since I have become a Senator. I have always believed in the doctrine of protection and in a tariff on wool.

The question of a duty on wool was brought up in my State in the State convention and it was made an issue in the election of 1921. The convention platform adopted specifically a duty of 33 cents a pound upon wool upon the scoured basis, and upon that platform I was elected a Senator from that State. I publicly pledged the people of my State to support a duty of 33 cents on clean wool, and, therefore, was charged with the duty of carrying out the mandate of the people of my State. If I did not do so, I would be failing in my duty.

I submit, Mr. President, that the fact that a Senator may have an interest or ownership in an industry which is national in its character is only an incident and can not be construed as an individual or personal question. The Senator from Arkansas assumes the position of a moral disinfector or a censor of what he imagines to be the morals of some of the Members of the Senate.

Mr. President, it is my view that a person who assumes that there is a lack of honesty as to questions of this kind and who would challenge the honesty of any Senator or his good faith or that he is not acting in accordance with the dictates of his conscience is pursuing the tactics of a demagogue. There is nothing else to the whole proposition. It is cheap politics—the cheapest kind of politics.

Mr. President, one of the fundamentals of the organization of this Government is the right of sovereign States to have representation in this body; and I deny the right of any Senator, of any committee, or even the Senate itself, to disfranchise any State from representation on all questions before the Senate upon grounds similar to those advanced in this resolution.

Mr. President, what is there to investigate? There is nothing to investigate. If any Senator has violated any rule of the Senate, let that fact be known; let the point of order be made to the Presiding Officer; and let the Presiding Officer decide the question. If any Senator is not satisfied with the decision of the Presiding Officer, let him take an appeal to the Senate on the floor of the Senate. We have our rules; there is no question about the rules; and there is no question about the application of the rules. In the matter suggested by the resolution of the Senator from Arkansas [Mr. CARAWAY] there is no question on earth that the rules in no way apply in any shape, manner, or form. It is simply a case of bidding and obtaining cheap notoriety on the first pages of the newspapers of the country in order to carry on propaganda for political purposes.

My prediction is that this tempest in a teapot resolution or investigation will amount to nothing. I do not care anything about this investigation; I have no objection to committees and Senators investigating until they are black and blue in the face; but I say now that nothing constructive or helpful to the public will come of it. It will only be a farce; we may waste a large sum of public money for which no useful purpose will have been subserved. I am thoroughly satisfied with the righteousness of my vote on wool. It is fair, just, reasonable, and right. It is an honest duty due an honorable and essential industry, necessary and vital to its preservation, and vital to the welfare and security of the Nation.

Mr. HEFLIN. Mr. President, it ought to be the ambition and the desire of every Senator in this body to keep untarnished the good name of the Senate; it ought to be the desire of every Senator to do everything in his power to prevent anything from transpiring here that will reflect upon its honor and integrity. This body ought not to be the rendezvous of special privilege or the clearing house for tradesmen. It ought to remain the Senate of the United States, filled with men coming from the sovereign States who will live up to the oath which they took when they entered this body to support and defend free institutions. It looks as if some Senators would like to get away from that idea and make the Senate a trafficking institution whereby special interests can send their special agents here, and under the guise of United States Senators vote to tax the whole American people to build up the fortunes of those whose agents they are. That is not my conception of the duty of a Senator.

Mr. President, every State in the Union safeguards the principle that is involved here. We elect officers for a given term, and we throw restraints around those officers, in order to do what? To keep them from raising their own salaries during the term for which they were elected. A Senator should not vote to raise his salary during his term. When he is elected for a term of six years at $7,500 per year, it would be wrong for him to vote to increase his salary to $15,000 a year as soon as he gets in the Senate. What is the difference between that and a wool king taking his seat here as a United States Senator, when his business is worth a half million dollars, and then immediately vote to increase his wealth to three-quarters of a million dollars by taxing me and everybody else in the country upon wool? What right has he to do that? Senators resent the idea that some of us have of protecting this Chamber and the people against such trafficking.

The Senator from New Mexico invites the Senator from Arkansas [Mr. CARAWAY] to submit his proposition to the Presiding Officer as to whether these men interested financially in the question before the Senate should be allowed to vote, and then, if he rules against them, to appeal to the Senate. I suggest an amendment to that suggestion, and that is that we then appeal to the judgment bar of the American people. We have got that right, and we will take advantage of it. Mr. President, the American people are not going to permit anybody to come here and simply vote to put money in his own pocket or to represent special interests against the interests of the great mass of the American people. That was not the intention the founders had when they builded this Republic, and those of us who are here ought to safeguard it from just such things as that. Instead of that we are being scolded and criticized by Senators on the other side for undertaking to hold the Senate true to the course the founders intended it should follow.

The Senator from Idaho [Mr. GOODING] has introduced a resolution which is pretty broad in its scope, to investigate who is who in this body with regard to these big interests. Let the investigation proceed; it is high time that the American people were finding out just what hold the money power has upon this great Government of ours. Turn on the light and let the truth be known.

What do they say here to-day? The Senator from Idaho [Mr. GOODING]—himself accused, with a number of other wool kings, of voting in this body to put money into his own pockets by taxing the men and women of America—rises in his place and asks to have an investigation conducted; and here comes the Senator from New York [Mr. CALDER], chairman of a committee, sitting right in a place where he can use his power to protect these people who ought to be investigated; he rises immediately; he does not wait for the resolution to get cold until he comes in and tells the Senate and the country that his committee has reported it adversely, therefore shutting the door in the face of his Republican colleague from Idaho and saying, "There will be no investigation had just now."

Mr. President, that will be pleasing news to the Senator's friends in New York. My good friend [Mr. CALDER] has a race on up there now, running pretty lively, in New York State. Some of those big buccaneers in Wall Street will laugh when they hear what he has done for them to-day.

"What about that resolution of investigation?"

"How is that?"

"What about the investigation resolution?"

"There will be no investigation."

"Good for you," they will say.

Oh, Mr. President, these revels of greed and avarice have been had before in history. They flourish for a time, but they pass away. The American people are not going to submit to this sort of thing, Senators. I do not think they will.

The Senator from New Mexico [Mr. BURSUM] says he has always believed in protection, and therefore, because that is his belief, he should be excused from a rule that would prevent a man from voting where his private interests were involved. A burglar might say, "What business have you to arrest me? I have always believed in burglary. That is one of my cardinal principles. Pillage and plunder is what I live on. What right have you to interfere with my pleasant pastime?" [Laughter.] So one of these pillaging and plundering fellows comes in and says, "Yes; I voted to put this money in my pocket by laying a tax on wool and taxing all the men, women, and children in America; but what right have you to say anything about it? I have believed in that doctrine from my youth up."

Mr. President, when I used to practice law, many years ago, I would see a judge sitting on the bench trying cases, and after a while he would reach a certain case and then he would rise and say, "Gentlemen," speaking to the lawyers and the people present, "I am interested in the next case that is to be tried, and I do not think I am competent to sit in it, and I ought not to sit in it because of the interest I have in it. I therefore vacate the bench and ask one of you lawyers to come up and preside in this case"; and another lawyer would go and relieve the judge in the trial of a case, maybe, where the amount of $50 or $100 or more was involved. So careful is a judge to safeguard this principle of eternal right and justice that he will not sit in a case where he is even remotely interested. Every time one of these cases is tried and a jury is impaneled to sit in it and to make its judgment upon it the lawyers on both sides of the case sit there and they will have this question asked of the juror: "Are you personally interested in this case? Are you interested in the outcome of this litigation? Are you related by blood or marriage to either one of the parties litigant here?" He says: "I am not." All right; he is qualified so far as that goes and they either accept him or reject him; but the minute he says, "I am interested in a financial way," the judge says, "You are incompetent; stand aside." But in the great Senate of the United States a Senator who has millions of dollars invested in wool can stand in this body and vote to put upon it a sky-high tax rate that increases his fortune, and then those of us who say that that is wrong, that it is immoral to do it, are criticized, and they say we are old fogies in our ideas.

Mr. President, when a Senator stands in this lawmaking body and a great trust concern like the Woolen Trust is up for consideration and a measure is pending that will put money in his pocket by the thousands and hundreds of thousands of dollars, when his name is called he ought to stand up like a real American and say, "If this amendment is adopted it means hundreds of thousands of dollars to me. If I vote for it I am voting to take money out of the pockets of other people to put into my own. Under the circumstances I do not feel that I should vote upon this particular item."

Mr. President, that has been done before in both branches of Congress.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The PRESIDENT pro tempore. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On line 23, page 171, the committee proposes to strike out "30" and insert "45," so as to read:

Cigar bands of the same number of colors and printings, 45 cents per pound.

Mr. SHEPPARD. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Cummins	Frelinghuysen	Harrison
Ball	Curtis	Glass	Heflin
Broussard	Dillingham	Gooding	Jones, Wash.
Calder	du Pont	Hale	Kendrick
Capper	Ernst	Harris	Keyes

Ladd	Nelson	Ransdell	Sterling
Lenroot	Newberry	Rawson	Trammell
Lodge	Oddie	Robinson	Walsh, Mass.
McCormick	Overman	Sheppard	Walsh, Mont.
McCumber	Pepper	Simmons	Watson, Ind.
McKinley	Phipps	Smoot	Willis
McLean	Pittman	Spencer	
McNary	Pomerene	Stanfield	

The PRESIDENT pro tempore. Fifty Senators have answered to their names. There is a quorum present. The question is upon agreeing to the amendment of the committee on page 171, line 23, where the committee proposes to strike out "30" and to insert "45."

Mr. SMOOT. I desire that the Senate shall substitute "35" for "45."

Mr. WALSH of Montana. Mr. President, the action of the committee in receding from the outrageously high rate proposed by them in the first place is to be commended, but the reduction proposed is comparatively insignificant. Possibly the Senate might be interested in learning just exactly what these specific rates in this particular paragraph mean when converted into ad valorem rates and compared with the rates in existing law.

This paragraph includes a large number of commodities made of paper. Thus, cigar bands, labels, and flaps of less than eight colors are included. The present law subjects those to a duty of 28.08 per cent, and that is raised to 73.4 per cent. If those come from Cuba they bear a rate under the present law of 6.55 per cent, which becomes 14.7 per cent under the pending bill.

Mr. SMOOT. What rate is the Senator speaking of?

Mr. WALSH of Montana. I am speaking of cigar bands, labels, and flaps, if they are of less than eight colors. The present rate is 7.31 and that is raised to 17.5 per cent; 14.86 per cent on another variety is raised to 35.8 per cent; 24.01 per cent to 54.2 per cent; 11.08 per cent to 25 per cent; and 14.78 per cent to 28.6 per cent. Cigar labels, flaps, and so on, in whole or in part printed upon metal leaf, are subjected, under the present law, to a rate of 34.05 per cent, and that is increased to 73.5 per cent. I am not particularly interested in this commodity, but I dare say that the manufacturers of cigars throughout the country will find this no small burden.

Mr. SMOOT. Will the Senator tell me to what year he refers in giving the equivalent ad valorems to which he has referred?

Mr. WALSH of Montana. They are based upon current prices, as shown in the Reynolds report, figures prepared for me by the expert on paper for the Tariff Commission.

Mr. SMOOT. I think the figures of the Senator are wrong, or I misunderstand them.

Mr. WALSH of Montana. I do not pretend to know myself. I am giving the information which comes from the expert of the Tariff Commission.

Mr. SHEPPARD. They are based on values for 1921.

Mr. SMOOT. Were those equivalents based upon the rates which were first proposed by the committee?

Mr. WALSH of Montana. They were based on the rates proposed. I invite the Senator's attention to the reductions. For instance, by the change just made the rate is reduced from 32 to 25 cents a pound, which is a reduction of 16⅔ per cent, so 73.4 per cent will be reduced to practically 54.4 per cent, as against 28.8 per cent, and so on down the line. In other words, these figures I have given now must be reduced, by virtue of the reductions proposed by the committee, somewhere from 10 to 20 per cent. The Senate will understand that.

Let me give some other items which are included in this paragraph. A great many of our young women are interested in pottery decoration and that kind of thing. Decalcomanias are used in that interesting work, which is artistic and educative in character. The rate on decalcomanias under existing law is 11.6 per cent, and that is increased to 28.5 per cent. Another variety, of a different style, is increased from 11.78 per cent to 31.4 per cent. Souvenir post cards are raised from 12.11 per cent to 40 per cent. I am not going to spend any time upon these matters. I just wanted to indicate to the Senate what they were doing in adopting these rates.

Mr. CALDER. Mr. President, this relates to the art of lithographing, and men serve years to learn the trade. There are engaged in it about 20,000 men in New York, New Jersey, and Pennsylvania, where this work is very largely done.

The Tariff Commission have taken the trouble to inquire into the wages paid to men in this industry. They tell me that in America, in and about the centers I have indicated, they pay the men an average wage running from $39 to $42 a week, and men doing the same sort of work in Germany are receiving in the neighborhood of $2.35 a week. So, of course, if we hope to check what appears to be a rush of these imports into this country during the past few months, we must increase the duty as the committee has recommended.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment as modified.

The amendment as modified was agreed to.

The next amendment was, on page 172, line 2, to strike out "30" and insert in lieu thereof "45," so as to read:

Labels and flaps printed in eight or more colors (bronze printing to be counted as two colors), but not printed in whole or in part in metal leaf, 45 cents per pound.

Mr. SMOOT. I move to substitute "35" for "45."

The amendment as modified was agreed to.

The next amendment was, on page 172, line 3, to strike out "40" and insert in lieu thereof "60," so as to read:

Cigar bands of the same number of colors and printings, 60 cents per pound.

Mr. SMOOT. I move to insert "50" for "60."

The amendment as modified was agreed to.

The next amendment was, on page 172, line 5, to strike out "50" and insert in lieu thereof "75," so as to read:

Labels and flaps, printed in whole or in part in metal leaf, 75 cents per pound.

Mr. SMOOT. I move that "60" be substituted for "75."

The amendment as modified was agreed to.

The next amendment was, on page 172, line 6, to strike out "55" and insert in lieu thereof "82½," so as to read:

Cigar bands, printed in whole or in part in metal leaf, 82½ cents per pound.

Mr. SMOOT. I move that "65" be substituted for "82½."

The amendment as modified was agreed to.

The next amendment was, on page 172, line 14, to strike out "8" and insert in lieu thereof "12," so as to read:

Fashion magazines or periodicals, printed in whole or in part by lithographic process, or decorated by hand, 12 cents per pound.

Mr. SMOOT. I ask that that amendment be disagreed to.

Mr. SHEPPARD. Would that leave the existing rate in operation?

Mr. SMOOT. No; the existing rate is 6 cents, but it reduces the rate one-third from what the House fixed it.

The amendment was rejected.

The next amendment was, on page 173, line 2, to strike out "20" and insert "30," so as to read:

All other articles than those hereinbefore specifically provided for in this paragraph, not exceeding eight one-thousandths of an inch in thickness, 30 cents per pound.

Mr. SMOOT. As to that, I move that "25" be substituted for "30."

Mr. WILLIS. I desire to ask the Senator whether the committee did not intend to propose an amendment in line 17, page 172. I was advised that an amendment was contemplated there.

Mr. SMOOT. That refers to decalcomanias, and the committee thought there was no necessity for making a change under the conditions existing to-day.

Mr. WILLIS. I wish the Senator would give me some information about that item. I have sought information unsuccessfully.

Mr. SMOOT. I think what the Senator is interested in, because it refers to the pottery business, is found on page 170, where the duplex and the simplex decalcomanias are enumerated. We passed those the other day, and put the duplex on the free list and the simplex was made dutiable at 5 cents a pound.

Mr. WILLIS. I was interested in that item, but I am also interested in this one. I have sought in the hearings and in the Summary of Information to find what justification there is for the increase in the rates. As the Senator will see, there is a very considerable increase. The rate in the present law on decalcomanias is 60 cents a pound. This proposes to make it 70 cents a pound and 15 per cent ad valorem. That would figure out, under the rate in the present law, for the year 1920, 13.8, or nearly 14 per cent. Now there is 15 per cent ad valorem added. It is not a large industry, of course, and it is not a large item of expense, yet it is of a good deal of interest to our people. As the Senator knows, we have in the State of Ohio the largest pottery industry there is to be found in the country. There are perhaps 45 or 50 great potteries in that State, and I have had a great deal of correspondence with persons interested in that business, complaining about this very rate. I shall not object to it if some good reason can be given for the increase of 100 per cent. That is what it amounts to, because it is now 13 or 14 per cent, and it is proposed to add 15 per cent ad valorem. Why should it be increased?

Mr. SMOOT. On these decalcomanias in ceramic colors weighing not over a hundred pounds for 1,000 sheets, on the

basis of 20 by 30 inches in dimensions—because those are the dimensions these rates are based upon—we give 70 cents a pound and 15 per cent ad valorem. The equivalent ad valorem on all the imports for 1921 was but 29 per cent.

Mr. WILLIS. If the Senator will refer to the Summary of Tariff Information, page 1069, he will find that the rate is a little lower than that. The figures are given as 13.8 per cent.

Mr. SMOOT. The equivalent ad valorem on imports for the full year of 1921 is 29 per cent. That is the amount of duty that is put upon these decalcomanias in ceramic colors, and that is all.

Mr. WILLIS. I can not quite see why there should be that apparent doubling in a year. At all events, this makes a very considerable increase in price.

Mr. SMOOT. The present rate is 60 cents a pound and the proposed rate is 70 cents a pound.

Mr. WILLIS. And 15 per cent ad valorem. That is where the tremendous increase comes in.

It is shown in the Summary of Tariff Information that our annual production in this country is only 100 tons and that our annual consumption is 600 tons. Of course, if an industry can develop here, as the Senator knows, I am in favor of it, but it does seem to me it is a heavy burden upon the potters of the country to increase their rate 100 per cent unless some perfectly good reason should be given for it, which I have not yet heard.

Mr. SMOOT. I will say to the Senator that the potters are more interested in the duplex decalcomania than they are in the ceramic colors.

Mr. WILLIS. They are interested in both.

Mr. SMOOT. They are used so slightly, I will say to the Senator, that it would cut no figure at all in the case of pottery.

Mr. WILLIS. The Senator understands, of course, that we can use our own product here, but where we have to come in competition with the foreign market, and we do export some pottery, of course, if we are to compete with the foreign product we must have as good designs as they have, and it is a matter of a good deal of importance.

Mr. SMOOT. So far as designs are concerned, I think the American is equal to that of any foreign country.

Mr. WILLIS. We are equal in our view but we are not in their view.

Mr. SMOOT. We know what we want in this country better than anybody else does.

Mr. WILLIS. I shall not quarrel with the Senator. I hope that this will succeed in establishing a new industry.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The PRESIDENT pro tempore. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 173, in line 4, the committee proposes to strike out the numeral "35" and insert the words "thirty-five."

The amendment was agreed to.

The next amendment of the committee was, on page 173, in line 5, to strike out "8½" and insert "12¾," so as to read:

exceeding eight and not exceeding twenty one-thousandths of an inch in thickness, and less than 35 square inches cutting size in dimensions, 12¾ cents per pound.

Mr. SMOOT. To make this equivalent to the amendments we have already agreed to, I move that "10" be substituted for "12¾."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The next amendment of the committee was, on page 173, in line 6, to strike out "8" and insert in lieu thereof "12," so as to read:

exceeding 35 square inches cutting size in dimensions, 12 cents per pound.

Mr. SMOOT. I move that "9½" be substituted for "12."

The amendment as modified was agreed to.

The next amendment of the committee was, on page 173, in line 9, to strike out "one-half" and insert "three-fourths," so as to read:

and in addition thereto, on all of said articles exceeding eight and not exceeding twenty one-thousandths of an inch in thickness, if either die cut or embossed, three-fourths of 1 cent per pound.

Mr. SMOOT. I ask that the amendment be disagreed to.

The amendment was rejected.

The next amendment of the committee was, on page 173, in line 10, to strike out "1 cent" and insert "1½ cents," so as to read:

if both die cut and embossed, 1½ cents per pound.

Mr. SMOOT. I ask that the amendment be disagreed to.

The amendment was rejected.

The next amendment of the committee was, on page 173, in line 12, to strike out "6" and insert "9," so as to read:

exceeding twenty one-thousandths of an inch in thickness, 9 cents per pound.

Mr. SMOOT. I move to substitute "7½" for "9."

Mr. SHEPPARD. Mr. President, this paragraph has for its subject matter pictures, calendars, cards, labels, cigar bands, placards, and other articles composed wholly or in chief value of paper lithographically printed, and increases substantially the existing rates on these articles. Many of these articles, such as lithographic calendars, pictures, and cards, are the only means of adornment and beautification within the reach of thousands of humble homes, while the cards and pictures may serve as appropriate but inexpensive souvenirs and presents on many occasions where large expenditure may be neither practicable nor desirable. These articles for the most part contribute to the pleasure and instruction of the masses. Certainly the advance proposed is without basis in reason or foundation in fact. Imports totaled about $600,000 in 1920. Production figures for this country I am unable to obtain, but the spectacle of great numbers of these articles on sale in every city, town, and hamlet in the land evidences a domestic output beside which these importations fade into unimportance. Certainly no profound consideration of material defense or national economy justifies a high tariff tax in behalf of picture cards, art calendars, advertising placards, and cheap souvenirs of pictured paper.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The next amendment of the committee was, on page 174, in line 4, to insert "Bristol board of the kinds made on a Fourdrinier machine," so as to read:

PAR. 1307. Writing, letter, note, drawing, handmade paper and paper commercially known as handmade paper and machine handmade paper, japan paper, and imitation japan paper by whatever name known, Bristol board of the kinds made on a Fourdrinier machine, and ledger, bond, record—

And so forth.

Mr. WALSH of Montana. Mr. President, paragraph 1307 deals with writing paper, letter paper, and note paper and that kind of thing used for ordinary correspondence. Under the present law it all bears a rate of 25 per cent. The changes made operate as a reduction in the case of a number of the articles.

Mr. SMOOT. Even from the existing law.

Mr. WALSH of Montana. Yes; from existing law; but in the case of drawing paper and not paper that is ruled, bordered, or embossed an increase occurs, 27.9 per cent in the one case and about 32.3 per cent in the other case, without apparently any justification whatever for it. I read from the summary as follows:

Production: The production of fine paper increased from 248,000 tons, valued at $34,055,000, in 1914 to 325,000 tons, valued at $87,741,000, in 1919. Massachusetts is the principal seat of the fine-paper industry; the other States of importance are New York, Pennsylvania, Wisconsin, and Ohio. The domestic production is sufficient to supply practically the whole of the demand for domestic consumption and to export a surplus.

Imports of writing paper in 1914 were 2,163,432 pounds, valued at $203,171.

The survey of the subject tells us as follows:

Before the war Germany, France, the United Kingdom, and, to some extent, Italy sent high-grade writing paper to the United States. The tariff, however, was comparatively high, averaging nearly 45 per cent in ad valorem equivalent under the tariff act of 1909, although reduced to 25 per cent in 1913. Hence the quantities imported were not large, the greatest amount entering in any year being a thousand tons in the fiscal year 1914, which was less than one-half of 1 per cent of domestic production.

Accordingly the rates, wherever there is an increase, are prohibitive rates.

Mr. SMOOT. Mr. President, in this whole paragraph the only increase is in writing paper, calendered or uncalendered, weighing 7 pounds or over per ream, and paper similar to any of the foregoing. The committee asked that the "8" be stricken out and "7" inserted. That is to follow out the plan adopted in the first paragraph of the paper schedule where the rate was changed from 8 cents to 6 cents. The weight of these papers over and above the tissue paper is about 1½ pounds and, therefore, there ought to be a difference between the 6 pounds and the other to make the weight equivalent to the tissue paper. That being the case, it is a little less than 7 pounds, but the committee decided that they did not want any fractions, so they put it at 7 pounds instead of 8.

The ad valorem equivalents of these compound rates based on the 1921 report are 21 to 32 per cent. The rates on writing

papers are the only ones higher than existing law to-day. The straight rate of 25 per cent to-day applies to all, and some of the papers are 21 per cent equivalent ad valorem, which is lower than the rate to-day. It is true that the rates on certain kinds of the high-priced writing papers are a little higher than the existing rates to-day. I will say to the Senator from Montana that all our imports, nearly every pound of them, are of that kind of paper.

Mr. WALSH of Montana. I wish to give just a little additional information. I read:

The Crane Co., of Dalton, Mass., and the Crocker-McElwain Co., of Holyoke, Mass., however, do not believe that our paper industry is in danger of serious competition from Europe. These concerns say that the best American writing paper is equal to any produced abroad and that where there is competition between the American and imported grades we can hold our own. Mr. C. A. Crocker, president of Crocker-McElwain, says that on account of the fact that high-grade writing paper is sold principally by trade-mark, each consumer having a definite preference for one or another brand, the foreign product is hardly the same article, as far as buying conditions are concerned, and comes very little into competition with the domestic product.

Mr. SMOOT. I want to say that the Crane Paper Co. make the paper for our money, and not only for this country, but for foreign countries. They make the best paper used for currency in all the world. The high-priced papers to which the commission refers in that statement must be made from all new linen rags. It can not be made from anything else. I have been in the Crane factory and have seen them unload carload after carload of new linen rags. We have to pay a duty upon linen. Therefore, the rate here is none too high. I say again that the importations all fall within that class.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 174, in lines 7 and 8, to strike out "Bristol board of the kinds made on a Fourdrinier machine."

The amendment was agreed to.

The next amendment was, on page 174, in line 8, after the word "uncalendered," to insert the words "weighing 8 pounds or over per ream, and paper similar to any of the foregoing."

Mr. SMOOT. I move that "7" be substituted for "8."

The amendment as modified was agreed to.

The next amendment was, on page 174, line 14, after the word "rate," to insert a colon and the following proviso:

Provided, That in computing the duty on such paper every 187,000 square inches shall be taken to be a ream.

The amendment was agreed to.

The next amendment was, on page 174, in lines 18 and 19, to strike out "for, folded or flat, if plain," and insert "for," so as to read:

PAR. 1308. Paper envelopes not specially provided for shall pay the same rate of duty, etc.

Mr. WALSH of Montana. Mr. President, envelopes bear, under the present law, 15 per cent. These envelopes, of course, are made of the fine paper provided for in the paragraph which we have just passed, which carries a duty of from 21 to 30 per cent. In addition to that the envelopes bear 5 per cent additional if plain, 10 per cent if bordered, embossed, and so forth, and 30 per cent if lithographed.

The Summary of the Tariff Commission says:

Production: The production of envelopes in the United States increased from $18,481,000 in 1914 to $39,664,000 in 1919 and the number of establishments making envelopes from 90 in 1914 to 106 in 1919. Domestic production supplies practically the whole of the demand for domestic consumption. The capitalization of the 90 envelope establishments in the United States in 1914 was $15,830,000.

Imports in 1914 were valued at $29,350. Later statistics follow:

Calendar year.	Value.	Duty.	Ad valorem rate.
			Per cent.
1918	$5,122	$768	15
1919	14,291	2,144	15
1920	[1] 48,742	7,288	15
1921 (9 months)	31,387	.....	.....

[1] In addition to the figure given ($48,742) envelopes to the value of $152 were imported free of duty from the Philippine Islands.

There are, one might very properly say, no imports at all even under the present rate. The duty, therefore, upon this commodity is prohibitive. It might as well be an embargo on the importation of envelopes of foreign manufacture, giving the American producer in the State of Massachusetts and a couple of other States an opportunity to boost his prices.

Mr. SMOOT. Mr. President, the rate of 30 per cent on lithographed envelopes is provided in this case to take care of a condition which has arisen in the trade. In many cases envelopes now used as containers are lithographed exactly the same as to the character of the work as are cigar-box flaps. They bear advertisements, pictures of ladies, and all kinds of scenery, and the work is executed with a high degree of artistic skill. The use of such envelopes is growing in the United States, and, indeed, all over the world; and it is upon those articles that we put a duty of 30 per cent ad valorem.

The Tariff Commission experts claim that the industry making that class of envelopes in the United States may be able to get along with the 30 per cent duty. The committee, however, was told by men who manufactured them that they needed a 60 per cent duty in order to keep foreign goods out of the United States, based upon the actual invoices of goods coming into this country. I think, however, Mr. President, that they can get along with this rate; the committee felt so; and therefore we have reported it.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment of the Committee on Finance was, on page 174, line 20, after the word "made," to strike out "and 5 per cent ad valorem; if bordered, embossed, printed, tinted, decorated, or lined, 10 per cent ad valorem in addition to the foregoing rates," and in lieu thereof to insert "and in addition thereto, if plain, 5 per cent ad valorem; if bordered, embossed, printed, tinted, decorated, or lined, 10 per cent ad valorem; if lithographed, 30 per cent ad valorem."

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 175, paragraph 1309, line 4, before the words "per cent," to strike out the figures "23" and to insert "35," so as to read:

PAR. 1309. Jacquard designs on ruled paper, or cut on Jacquard cards, and parts of such designs, 35 per cent ad valorem; hanging paper, not printed, lithographed, dyed, or colored, 10 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 175, in line 6, after the words "ad valorem," to strike out "paper hangings with paper back or composed wholly or in chief value of paper, not printed, lithographed, dyed, or colored, 5 cents per pound."

The PRESIDING OFFICER. The question is on the amendment proposed by the Committee on Finance.

Mr. WALSH of Montana. I have not been able to follow the statement of the amendment.

Mr. SMOOT. The amendment just stated is on page 175, in paragraph 1309, line 6, where the committee proposes to strike out the words "paper hanging with paper back or composed wholly or in chief value of paper, not printed, lithographed, dyed, or colored, 5 cents per pound," so that the clause will read:

Printed, lithographed, dyed, or colored—

The committee have also reported an amendment in line 10, inserting "3 cents per pound and," so as to read "3 cents per pound and 20 per cent ad valorem." That is a reduction. I will say to the Senator from Montana, but it may be that the committee will want to reduce it still further, and I ask that the amendment in line 10 go over for the present.

Mr. WALSH of Montana. I am very glad that the committee will again take this matter under consideration, because it is a very important item.

Mr. SMOOT. I know it is.

Mr. WALSH of Montana. This is the ordinary wall paper that is used in every house, and it ought to be made as reasonable to the purchaser as it can be.

Mr. SMOOT. I will assure the Senator that the committee will act upon the matter to-morrow, and, whatever we agree on, we shall then ask to return to this paragraph and suggest the amendment; but I am quite sure the rate will be less than the committee has reported.

Mr. SHEPPARD. Mr. President, I wish to suggest to the Senator that the committee should restore the two classifications of wall paper. One class of wall paper is unfinished paper, which is used by manufacturers in making the finished wall paper; but the committee has reported the same rate on both the unfinished and the finished paper.

Mr. SMOOT. I think that if we are going to have a specific rate of 3 cents per pound, the Senator's suggestion would be absolutely correct; but if we materially reduce the rate, then it will not make so very much difference; and a straight ad valorem rate will really be a protective rate.

Mr. SHEPPARD. Does the Senator mean to impose the same duty on both types of wall paper, the unfinished and the finished?

Mr. SMOOT. Yes; where an ad valorem rate is applied it makes but very little difference, I will say to the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment striking out after the words "ad valorem" in line 6 down to and including the word "pound" in line 9.

The amendment was agreed to.

The PRESIDING OFFICER. Without objection, the amendment in line 10, page 175, will be passed over.

The next amendment proposed by the Committee on Finance will be stated.

The next amendment of the Committee on Finance was, on page 175, line 11, before the words "per centum," to strike out the numerals "23" and to insert the numerals "30," so as to read:

Wrapping paper not specially provided for, 30 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. WALSH of Montana. That is the ordinary wrapping paper, I presume, used in grocery stores and other mercantile establishments and for express packages and all that kind of things. The duty is raised 5 per cent, the present law imposing a duty of 25 per cent on that article. There are no substantial importations, so far as I can learn, and I should like to inquire of the Senator from Utah why it is deemed advisable to put a higher duty on wrapping paper.

Mr. SMOOT. Of all of the papers included in this paragraph there is the strongest competition in wrapping paper. It is imported from Sweden, Norway, and Germany, but more particularly from Sweden and Norway. The importations for the last year, as I remember, were 11,000,000 pounds under the rate of duty of the present law, 25 per cent. The invoices which have been shown to the committee and other facts indicate that the importations of wrapping paper will be greater than ever in the past. So the committee felt that 30 per cent was the lowest rate that they could provide and afford the industry in the United States a chance to live.

Mr. WALSH of Montana. Mr. President, the Tariff Commission says that the exports in 1914 of paper hangings were valued at $453,412; exports of wrapping paper were 14,133,097 pounds, valued at $532,667.

Mr. SMOOT. Let me call the Senator's attention to a fact which will show where we are drifting. In May, 1921, we imported of wrapping paper 1,111,909 pounds, and in May, 1922, of this year, we imported 6,066,041 pounds. That shows how the imports are increasing under the 25 per cent rate of duty, and we are only increasing it 5 per cent up to 30 per cent. The House rate was 23 per cent, based on American valuation.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 175, in line 12, it is proposed to strike out "2 cents per pound and 10" and insert "30," so as to read:

Blotting paper, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 175, line 13, after the words "ad valorem," to strike out "filtering paper, 5 cents per pound and 15 per cent ad valorem," and the semicolon.

Mr. SMOOT. Mr. President, I ask that that amendment be disagreed to. The Senate will remember that filtering paper was taken out of this paragraph and put into paragraph 1304 under a higher rate of duty. I asked that the amendment in paragraph 1304 be disagreed to, and gave notice at that time that when we reached paragraph 1309 I would also ask that the amendment in that paragraph be disagreed to, which will reduce the duty on filtering paper from 6 cents a pound and 15 per cent ad valorem to 5 cents a pound and 15 per cent ad valorem, as the House bill provided.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 175, line 14, after the word "for," to strike out "23," and in lieu thereof to insert "30," so as to read:

Paper not specially provided for, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 175, line 20, after the word "for," to strike out the figure "20" and to insert "if of bona fide foreign authorship, 15 per cent ad valorem; all other 25"; in line 23, after the word "for," to strike out the figures "33⅓" and to insert "45."

Mr. SMOOT. Mr. President, I desire to modify the committee amendments just stated by inserting a substitute for that portion of paragraph 1310, from the word "Books," in line 16, to and including the words "ad valorem" in line 24.

The PRESIDING OFFICER. The amendment as proposed to be modified by the Senator from Utah on behalf of the committee will be stated.

The ASSISTANT SECRETARY. On page 175 it is proposed to strike out all beginning with the word "Books," in line 16, down to and including the words "ad valorem," in line 24, and to insert in lieu thereof the following:

Unbound books of all kinds, sheets or printed pages of books bound wholly or in part in leather, bound books of all kinds except those bound wholly or in part in leather, including blank books, slate books, and pamphlets, engravings, photographs, etchings, maps, charts, music in books or sheets, and printed matter, all the foregoing not specially provided for, if of bona fide foreign authorship, 15 per cent ad valorem; all other, 25 per cent ad valorem; book bindings or covers wholly or in part of leather, not specially provided for, 30 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified by the Senator from Utah on behalf of the committee.

Mr. WALSH of Montana. Mr. President, I do not understand the amendment.

Mr. LODGE. Mr. President, I do not wish to interrupt the Senator, but I think I can explain it if the Senator will give me a moment.

Mr. WALSH of Montana. I will be very glad to hear the Senator from Massachusetts.

Mr. LODGE. Mr. President, this is a paragraph in which I take a great deal of interest, and the amendment which has been proposed I offered some time ago and had printed. I will say to the Senator, as, of course, he is perfectly aware, that the printer and the compositor are entirely protected under the copyright laws, because no book can be copyrighted in this country that is not printed in this country. The House had so arranged the paragraph as to put books in foreign languages on the dutiable list, where they have never been and never ought to be, and they also eliminated the provision that all books more than 20 years old shall be on the free list.

I was very anxious to have them restored to the free list. What I desired to do, in the draft I made of this amendment—and it is merely a redraft of what is here in print—was to make sure that the duty which it was desired to impose on the binding should fall on the binding alone, and not upon the book—that is, the book more than 20 years old.

Some of those books, as the Senator well knows, first editions—take the first folio of Shakespeare as an extreme example—are of enormous value. They may have been bound within the 20 years. To tax the whole book on the full value of the book would be monstrous, of course. They really ought to come in free; and the purpose of this amendment, with which I had something to do, was to make sure that the tariff duty should be confined to the binding, and I think it achieves that purpose. It must be taken in connection with an amendment to the free list which will be offered in a moment.

Mr. WALSH of Montana. The proposed amendment also affects the importation of books, does it?

Mr. SMOOT. Yes. That refers to the free list.

Mr. LODGE. Yes. The free-list provision is as follows. These are on the free list:

Books, maps, music, engravings, photographs, etchings, lithographic prints, bound or unbound, and charts, which have been printed more than 20 years at the time of importation: *Provided*, That where any such books have been rebound wholly or in part in leather within such period, the binding so placed upon such books shall be dutiable as provided in paragraph 1310.

Mr. WALSH of Montana. I should like to follow this amendment of the Senator from Massachusetts and the Senator from Utah, the proposed substitute for paragraph 1310. This reads:

Unbound books of all kinds—

That is to say, if they have bindings they do not fall under this paragraph. That is the first clause. The second clause is:

Sheets or printed pages of books bound wholly or in part in leather—

Unbound books of all kinds bear a duty of 15 per cent under this provision. Now, why should a bound book come in free and an unbound book bear a duty of 15 per cent? I understood the Senator from Massachusetts to say that the sole purpose was to reach the binding.

Mr. LODGE. Yes; on books over 20 years old. The books over 20 years old come in free. All books less than 20 years old, bound or unbound, bear a duty.

Mr. WALSH of Montana. But this says "unbound books of all kinds." That would include, of course, books over 20 years of age.

Mr. LODGE. I think not.

Mr. WALSH of Montana. Unless you add "except as herein otherwise provided."

Mr. SMOOT. It says here:

Printed matter, all the foregoing not specially provided for, if of bona fide foreign authorship, 15 per cent ad valorem; all other, 25 per cent ad valorem; bookbindings or covers wholly or in part of leather, not specially provided for, 30 per cent ad valorem.

Mr. LODGE. "All the foregoing not specially provided for."

Mr. WALSH of Montana. That is carried clear through?

Mr. SMOOT. Then I will say to the Senator that in the amendment that we propose to offer on page 215, line 22, it is provided that they shall come in free if they are 20 years old or more. In other words, "books, maps, music, engravings, photographs, etchings, lithographic prints, bound or unbound, and charts, which have been printed more than 20 years at the time of importation," come in free. Paragraph 1310 applies only to the dutiable books.

Mr. WALSH of Montana. But it will be observed that after that provision you have "unbound books of all kinds, * * * not specially provided for."

Mr. LODGE. That is specially provided for in the free list.

Mr. WALSH of Montana. Yes; exactly—

If of bona fide foreign authorship, 15 per cent ad valorem—

Now, you provide—

All other, 25 per cent ad valorem.

Mr. SMOOT. Yes.

Mr. WALSH of Montana. I suppose "all other" must mean "all other books, pamphlets, engravings, photographs, etchings, maps," and so forth.

Mr. LODGE. "Not specially provided for."

Mr. SMOOT. Not of foreign authorship.

Mr. WALSH of Montana. No; excuse me. That is not the case. The "not specially provided for" does not qualify that.

Mr. LODGE. Oh, yes; I beg the Senator's pardon—

All other, 25 per cent ad valorem; books bound wholly or in part in leather, the chief value of which is in the binding, not specially provided for.

Mr. WALSH of Montana. Yes; but the Senator will observe that there is a semicolon after "ad valorem" in the fourth line from the bottom.

Mr. SMOOT. It is a comma. It goes back to that "not specially provided for." There is not a semicolon there.

Mr. LODGE. The "15 per cent ad valorem" covers all from line 16 to line 21.

Mr. WALSH of Montana. Yes. If the Senator will pardon me, then follows:

All other, 25 per cent ad valorem—

And a semicolon.

Mr. LODGE. Oh! I see what the Senator means.

Mr. WALSH of Montana. And then it says:

Book bindings or covers wholly or in part of leather, not specially provided for.

Mr. LODGE. I see. I think the Senator is right.

Mr. SMOOT. Yes; there is a semicolon there.

Mr. LODGE. It should read:

All other, not specially provided for, 25 per cent ad valorem.

Mr. SMOOT. That ought to be repeated, because of the semicolon.

The ASSISTANT SECRETARY. After the words "all other," insert the words "not specially provided for."

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

Mr. WALSH of Montana. Mr. President, before we agree to that, I want to inquire where provision is made for textbooks, if at all.

Mr. LODGE. I do not think there is any provision for textbooks as such.

Mr. SMOOT. I do not, either.

Mr. LODGE. Unless it is under one of the educational paragraphs; but I was going to ask, when we take up, as the Senator from Utah is about to take up, the free list——

Mr. SIMMONS. Sundries; not the free list.

Mr. LODGE. No; this is the free list.

Mr. SMOOT. If the Senator will turn to page 216, paragraph 1531, he will see that it reads:

Any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or any college, academy, school, or seminary of learning in the United States, or any State or public library, may import free of duty any book, map, music, engraving, photograph, etching, lithographic print, or chart, for its own use or for the encouragement of the fine arts, and not for sale, under such rules and regulations as the Secretary of the Treasury may prescribe.

Mr. WALSH of Montana. Yes; but that is not the idea I have in mind.

Mr. SMOOT. That is the textbook provision. That is the paragraph under which these institutions will import them.

Mr. WALSH of Montana. Oh, yes; but what I want to know about is the ordinary textbooks that are purchased by students for use in colleges.

Mr. LODGE. They come under the duty, of course.

Mr. SMOOT. They are dutiable under existing law, and always have been, and will be under this law.

Mr. LODGE. The ordinary schoolbook, of course, is printed in this country, and ought to be.

Mr. WALSH of Montana. But I am speaking about those printed in foreign languages.

Mr. SMOOT. They are free.

Mr. LODGE. No; they are not. I was going to offer that amendment about books printed in foreign languages, because I see that that is not specifically stated.

Mr. SMOOT. They are in paragraph 1530.

Books and pamphlets printed wholly or chiefly in languages other than English; books, pamphlets—

And so forth.

Mr. LODGE. I was misled. I did not know there was another paragraph dealing with this subject. It is scattered about in a bad way. We ought to have one paragraph embracing the whole of it.

Mr. WALSH of Montana. That is all right, then.

Mr. LODGE. I have brought it back as nearly as possible, I think, to the existing law. This is all right, then, on page 215, line 22, after the word "Governments"?

Mr. SMOOT. Yes.

Mr. LODGE. The Senator is going to dispose of that?

Mr. SMOOT. Yes; just as soon as we get paragraph 1310 disposed of.

Mr. WALSH of Montana. Will the Senator suggest the amendment?

Mr. LODGE. I do not think it is necessary, since the Senator has shown me that books in foreign languages are covered in paragraph 1530.

Mr. WALSH of Montana. I refer to the absence of the words "otherwise specially provided for."

Mr. LODGE. That has been put in.

Mr. SMOOT. We have agreed to that.

Mr. LODGE. That has been agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The ASSISTANT SECRETARY. On page 176, line 3, it is proposed to strike out "20" and insert "25."

Mr. LODGE. We were going to dispose first of the free list in regard to books.

Mr. SMOOT. I want to dispose of the free list now. On page 215, the first word in paragraph 1529, where the committee struck out "Hydrographic," I desire that that shall be rejected, and then I desire to strike out the balance of that line down to and including the word "hydrographic" on line 17, so that it will read:

Hydrographic charts and publications issued for their subscribers or exchanges by scientific or literary associations—

And so on, down to the word "Governments" on line 22; and then I offer, to follow the word "Governments" in line 22, the amendment that I send to the desk.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee beginning on line 12, page 215, striking out "hydrographic" and inserting certain other words.

The amendment was rejected.

Mr. WALSH of Montana. Mr. President, let me inquire of the Senator from Utah what is the meaning of this? That practically restores the paragraph to the condition in which it was when it came from the House, does it not?

Mr. LODGE. Oh, no.

Mr. SMOOT. Not when we get through with the other amendment.

Mr. LODGE. We are going to insert what will be read from the desk.

Mr. SMOOT. If the Senator will follow me I will read it just as it will be, with the exception of the insertion, and then I will ask the Secretary to read the insertion. It will read now:

Hydrographic charts and publications issued for their subscribers or exchanges by scientific or literary associations or academies, and publications of individuals for gratuitous private circulation, not advertising matter, and public documents issued by foreign governments.

Then, after "Governments," I move to insert the matter which I ask to have read from the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The Assistant Secretary read as follows:

Books, maps, music, engravings, photographs, etchings, lithographic prints, bound or unbound, and charts, which have been printed more than 20 years at the time of importation: *Provided*, That where any such books have been rebound wholly or in part in leather within such period, the binding so placed upon such books shall be dutiable as provided in paragraph 1310.

The PRESIDING OFFICER. The question is on the amendment.

The ASSISTANT SECRETARY. There is one amendment in line 19 that proposes to strike out the word "and" and insert the word "or."

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the amendment as read.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, at this time I ask unanimous consent that when the Senate concludes its business on this calendar day it recess until to-morrow at 11 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. McCUMBER. Mr. President, I send to the desk a proposed substitute for the unanimous-consent agreement proposed this morning by the Senator from North Carolina [Mr. SIMMONS]; and in order that we may be able to take them up in the morning, I ask that both the proposed unanimous-consent agreement offered by the Senator from North Carolina and this substitute may be printed as separate sheets.

Mr. CURTIS. Mr. President, I want to ask the Senator if he does not think it would be wise to print also the proposition submitted by the Senator from Wisconsin [Mr. LENROOT]?

Mr. McCUMBER. I will include that in the request for printing.

Mr. POMERENE. Mr. President, I ask, for the information of Senators who are here, that the unanimous-consent agreement which has just been submitted by the chairman of the committee be read.

Mr. McCUMBER. Very well, Mr. President, if the Senator desires.

The PRESIDING OFFICER. The Secretary will read.

The Assistant Secretary read as follows:

It is agreed by unanimous consent that not later than 10 o'clock a. m. on the calendar day of Thursday, August 17, 1922, the Senate shall proceed to vote without further debate and to the exclusion of all other business upon any amendment that may be pending, any amendment that may be offered, any amendment that may be made relative thereto, and immediately thereafter upon the bill H. R. 7456, an act to provide revenue, etc., through the regular parliamentary stages to its final disposition.

That hereafter debate shall be confined to the question before the Senate or to the bill itself, and no other business or irrelevant question or motion shall be entertained except by unanimous consent.

That upon the conclusion of the consideration of amendments to the schedule now before the Senate the Senate shall proceed to the consideration of amendments pending or hereafter to be offered to the following paragraphs in the order named (the agreement heretofore made that committee amendments shall be first disposed of being hereby modified so far as such agreement affects these particular paragraphs and amendments thereto), namely:

"Paragraphs relative to sugar, Schedule 5.

"Paragraphs relative to potash and bounty thereon, being paragraphs 1635 and 1636, and white arsenic, paragraph 1.

"Paragraphs relating to presidential powers (sections 315, 316, 317).

"Amendments to Tariff Commission act.

"Paragraphs relating to hides, leather, boots, shoes, and leather goods (paragraphs 1427–a, 1431, 1432, 1433, and 1435–a)."

That during the consideration of the aforementioned paragraphs no Senator shall speak more than once nor longer than one hour upon any one of such paragraphs or more than once nor longer than one hour upon any amendment thereto.

That upon the conclusion of amendments to said paragraphs or if the amendments to said paragraphs shall not be concluded prior to that time, after the hour of 11 o'clock a. m., Saturday, August 12, 1922, no Senator shall speak more than once nor longer than 15 minutes on any amendment or motion nor more than 10 minutes upon the bill.

All questions of order under this agreement shall be decided by the presiding officer without debate.

Mr. McCUMBER. I call the attention of the Senator from North Carolina to the fact that this is exactly the same as written by the Senator, with the exception of the first paragraph on the second page, which seeks to limit the debate upon those several paragraphs and amendments thereto, so that no Senator can speak longer than one hour on any one of the amendments, or longer than one hour upon the bill itself. I submitted that because I thought we should take it into consideration to the end, if possible, of agreeing so that we might not run over to the 12th before we had finished those paragraphs.

Mr. SIMMONS. Mr. President, I want to say to the Senator from North Dakota that it does not require consideration on my part; I accept it at once. I am glad the Senator made that limitation. I think it very proper, and it will be helpful. Certainly no Senator will want more than an hour to discuss these preferential amendments, and certainly will not want more than an hour to discuss any amendment.

Mr. McCUMBER. I hope the Senator from Wisconsin will find that agreeable.

Mr. LENROOT. I understand the matter is not up for action?

Mr. McCUMBER. No; it is not.

Mr. BROUSSARD. Will the Senator from North Dakota yield?

Mr. McCUMBER. I yield.

Mr. BROUSSARD. I merely desire to inquire whether the clause with reference to Schedule 5 is understood to cover paragraph 503?

Mr. McCUMBER. It covers everything that pertains to sugar and molasses.

The PRESIDING OFFICER. The Chair will state that these various propositions have been read to-day and will appear in the RECORD. Is there objection to the request of the Senator from North Dakota that this unanimous-consent agreement be printed as a separate sheet?

Mr. LENROOT. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. LENROOT. Did the Senator request that all the proposed requests for unanimous consent be printed as separate sheets?

Mr. McCUMBER. I make that request. There are only three of them.

Mr. LENROOT. That is all right.

Mr. SIMMONS. On behalf of the junior Senator from Utah [Mr. KING] I desire to offer and have pending for consideration several amendments to the pending bill, which I send to the desk.

The PRESIDING OFFICER. They will be received and lie on the table.

Mr. POMERENE. Mr. President, it so happens that I have a very important engagement on the 18th of August, and I would a little have preferred if, instead of fixing the 17th, it had been one day earlier, or perhaps after the 18th; but I am not going to make any objection on that score.

Mr. McCUMBER. I made it one day earlier; that is, on the 17th.

Mr. POMERENE. I will have to leave on the evening of the 17th, but I am not going to make any objection on that score.

Mr. LODGE. If we enter into the agreement, the vote may be taken before the Senator has to leave.

Mr. POMERENE. There may be a great many amendments and roll calls, and it may not be possible to get through by that time.

OATHS OF NATIONAL BANK DIRECTORS.

Mr. McLEAN. Mr. President, I ask unanimous consent for the immediate consideration of the bill (S. 3840) to amend section 5147 of the Revised Statutes.

Mr. SMOOT. Will it lead to any discussion?

Mr. McLEAN. If it does, I will certainly not press its consideration.

The PRESIDING OFFICER. Is there objection?

Mr. WALSH of Montana. Reserving the right to object, I ask that the bill be read.

Mr. McLEAN. I will explain the bill. Section 5147 of the Revised Statutes provides that the directors of national banks shall be sworn, but it does not provide any officer before whom the oath can be taken. Consequently, the director of a national bank who makes a false statement can not be held responsible, and the Comptroller of the Currency is very anxious for that to be remedied. This bill is reported unanimously from the Committee on Banking and Currency. It provides only that the oaths may be taken before a notary public, or other officer authorized to administer oaths, and that a record shall be kept.

Mr. HEFLIN. Is that the bill the Senator from Connecticut spoke to me about yesterday?

Mr. McLEAN. That is the bill.

Mr. HEFLIN. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut for the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole, and it was read as follows:

Be it enacted, etc., That section 5147 of the Revised Statutes is amended to read as follows:

"SEC. 5147. Each director, when appointed or elected, shall take an oath that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such association, and will not

knowingly violate or willingly permit to be violated, any of the provisions of this title, and that he is the owner in good faith, and in his own right, of the number of shares of stock required by this title, subscribed by him, or standing in his name on the books of the association, and that the same is not hypothecated, or in any way pledged, as security for any loan or debt. The oath shall be taken before a notary public, properly authorized and commissioned by the State in which he resides, or before any other officer having an official seal and authorized by the State to administer oaths, except that the oath shall not be taken before any such notary public or other officer who is an officer of the director's bank. The oath, subscribed by the director making it, and certified by the notary public or other officer before whom it is taken, shall be immediately transmitted to the Comptroller of the Currency and shall be filed and preserved in his office for a period of 10 years."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The next amendment was, on page 176, line 3, to strike out "20" and insert in lieu thereof "25," so as to read:

Books of paper or other material for children's use, printed lithographically or otherwise, not exceeding in weight 24 ounces each, with more reading matter than letters, numerals, or descriptive words, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 176, line 8, at the beginning of the line, to insert the words "not specially provided for," so as to read:

Booklets, wholly or in chief value of paper, decorated in whole or in part by hand or by spraying, whether or not printed, not specially provided for, 15 cents per pound.

The amendment was agreed to.

The next amendment was, on page 176, line 10, to strike out "26" and to insert in lieu thereof "40," so as to read:

All post cards (not including American views), plain, decorated, or printed, except by lithographic process, 40 per cent ad valorem.

Mr. SMOOT. I move that "30" be substituted for "40."

The amendment as modified was agreed to.

The next amendment was, on page 176, line 18, to strike out "20" and insert in lieu thereof "25," so as to read:

views of any landscape, scene, building, place, or locality in the United States, on cardboard or paper, not thinner than eight one-thousandths of 1 inch, by whatever process printed or produced, including those wholly or in part produced by either lithographic or photogelatin process (except show cards), occupying 35 square inches or less of surface per view, bound or unbound, or in any other form, 15 cents per pound and 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 176, line 20, to strike out the following: "Christmas and other greeting cards, printed lithographically or otherwise, or decorated in whole or in part by hand or by spraying, 30 per cent ad valorem," and to insert:

greeting cards, and all other social and gift cards, including those in the form of folders and booklets, wholly or partly manufactured, with text or greeting, 45 per cent ad valorem; without text or greeting, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 177, line 5, before the words "per cent," to strike out the figures "23" and to insert "35," so as to make the paragraph read:

PAR. 1311. Photograph, autograph, scrap, post-card, and postage-stamp albums, and albums for phonograph records, wholly or partly manufactured, 35 per cent ad valorem.

Mr. SMOOT. I move that "30" be substituted for "35."

The amendment as modified was agreed to.

The next amendment was, on page 177, line 7, to strike out "60" and to insert "10 cents per pack and 20," so as to read:

PAR. 1312. Playing cards, 10 cents per pack and 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 1313, page 177, line 18, to strike out "23" and to insert "all the foregoing, 35," so as to read:

Press boards and press paper, all the foregoing, 35 per cent ad valorem.

Mr. SMOOT. I move to substitute "30" for "35."

The amendment as modified was agreed to.

The next amendment was, on page 177, line 21, to strike out "15" and insert "25."

Mr. SMOOT. I move to substitute "20" for "25."

The amendment as modified was agreed to.

The next amendment was, on page 177, line 22, to strike out "28" and insert in lieu thereof "35."

Mr. WALSH of Montana. This is quite a controversial item. The wisdom of the amendment proposed offers a very grave question, and I shall endeavor to state what it is about.

The stereotype mat or board is a paper product that is used in printing newspapers. Instead of the regular stereotype plate, which is taken from the type as it is set and from which the newspapers are printed, a paper board of peculiar structure is used, and the impression taken from the type, and that is used instead of the stereotype plate.

It is extensively used by the newspapers of the country, chiefly the newspapers of the smaller cities running in population from 5,000 to 50,000. It is not very extensively used by the metropolitan papers because it would not stand taking as many imprints as it is necessary to take for their use. It is used in towns of the size of Billings, in my State, for instance, and, as I said, in towns of from 5,000 to 25,000 or 30,000 people.

It was a German product. The method of producing the board from which a matrix is made was originated in Germany, and that country had a monopoly upon the manufacture of this particular product until some time during the war, when either the process which was in use in Germany was by some means or other learned, or another process perhaps equally effective was discovered and devised by an American institution, which is likewise a monopoly. There is just one company in the United States that produces this product. Its representatives told the committee that it is a secret process. That is the situation which presents itself. The question is whether the one American institution shall be given a monopoly of the sale of this particular product.

Newspaper associations throughout the country quite generally have protested against the imposition of this duty.

Mr. CALDER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New York?

Mr. WALSH of Montana. I yield.

Mr. CALDER. The Senator said that this is a monopoly. Do I understand that the process under discussion is covered by patent rights?

Mr. WALSH of Montana. No; my understanding is that it is not patented, but it is manufactured by what representatives of the company say is a secret process. For a long time the American manufacturers have been endeavoring to determine the process of manufacture in Germany in the past, but without success. These people in some way or other, as I said, have either appropriated the German process or have devised a process of their own which is as effective as the German process.

Mr. CALDER. My understanding is that it is not a patented process, but that anyone can engage in the business if they learn how to do it. I have had letters from numerous publications in my State, newspapers which use this commodity, stating that they think the duty ought to be allowed.

Mr. WALSH of Montana. I have before me letters or copies of letters sent by various papers throughout the country; but of course things of that kind do not deceive the Senator from New York any more than they deceive me. We know how those things are secured. The newspaper associations are against it. Individual newspapers say that they would like to see the duty imposed. Some papers say so. The American Newspaper Association, for instance, have filed a protest against this particular duty, from which I read as follows:

The flong, or dry mat, employed by many small newspapers but seldom by the larger publications, is a sheet, composed largely of wood products, used to convey the impression of the type to the stereotype metal used on the printing press.

The Underwood tariff provides a duty of 25 per cent ad valorem on dry mats, or $0.019275 per mat.

The Fordney Act, paragraph 1313, Schedule 13, provides a duty of 28 per cent ad valorem, American valuation, of $0.0504.

There is but one American manufacturer of dry mats, the Wood Flong Corporation, of New York, whose present price is 18 cents per mat to all newspapers which use its mats exclusively in lots of 500 or more. Its price to occasional users is higher. During June, 1921, its price to occasional users in lots of 500 was 30 cents each, and in lots of 100, 35 cents each.

All dry mats used in this country other than those of the Wood Flong Corporation are imported from Germany, which enforces an export price of 25 cents per square meter, or $0.0771 per mat.

We are informed there are but two importers of dry mats, the W. B. Wheeler Corporation and H. Reeve Angel & Co., both of New York.

The former states its cost, delivered in the warehouse, is $0.1046, or, including selling cost, $0.1433, exclusive of overhead; the latter states its cost, under the present 25 per cent ad valorem duty, delivered New York, is approximately 11 cents, or, including overhead and selling cost, approximately 14 cents.

We are informed by these importers that they are unable to secure the price of 18 cents now paid for the American mat, and that therefore they must operate on a very close margin of profit to secure sales, and that only by largely increasing such sales, and thus decreasing the overhead average, may they secure even a fair profit under the present tariff.

Should the present duty of approximately 2 cents per mat be increased as provided by paragraph 1313, Schedule 13, of the Fordney Act to $0.0504, increasing the present cost by 3 cents, or should the present duty of approximately 2 cents be replaced by 4 cents, imports would cease, and the smaller newspapers, the main users of such mats, would be forced to purchase from the one domestic source of supply.

It is obvious that the present duty results in the 18-cent price now charged for the domestic mat. It is also obvious that every argument in favor of the free entry of newsprint and wood pulp applies equally to the free entry of dry mats.

The question presented is one of policy. What policy is to be represented in this particular duty? Are we going to give a monopoly by the imposition of this duty to the American producer of this commodity? Of course, if it were open to production anywhere—that is to say, if others might go into the business and produce a competing article—the price might be reduced, but the situation is as I have presented it. I can not understand that there is any reason why a duty as high as this should be imposed upon this mat. I propose accordingly what I think will give these people ample protection against foreign competitors and give the newspapers of the country an opportunity to get the thing at a fair price. I move that the rate in the amendment proposed by the committee of "35," in line 22, be reduced to "15."

Mr. FRELINGHUYSEN. Mr. President, this schedule relates to a duty on dry mats, sometimes called the flong. It is a species of pasteboard upon which the imprint of the type is taken and then it is stereotyped and forms a very efficient method for use by the smaller newspapers of the country for printing their papers.

There is in this country an industry called the Wood Flong Co. I believe it is the only industry making these mats or matrices, as they are called. The bill as it passed the House gave them 28 per cent on the American valuation. I asked the committee to increase that duty to 50 per cent, because as to the two importers in this country importing these matrices from Germany the price was 11 cents as against 18 cents, the lowest manufacturing sale cost of the Wood Flong Co. That rate was placed in the bill. Then I received a protest from certain of the newspapers in my State, who said that they thought the duty was too high. I asked then that it be reduced to 35 per cent, although I felt that if German importers were allowed to have full swing at the market it would simply mean that the American industry would be destroyed.

The president of this company called to see me and told me that the newspapers in my State did not understand the situation; that if the industry was not properly protected it would simply mean that the smaller American newspapers would be at the mercy of the importers, and that they could not afford to make these mats in this country for that price. I get my figures as to the imported cost from the process made by the American Newspaper Publishers' Association.

Mr. SIMMONS. Mr. President——

Mr. FRELINGHUYSEN. I shall be very glad to yield to the Senator when I finish my speech, unless the Senator wishes to ask a question.

Mr. SIMMONS. I simply wish to ask the Senator if he has any information which he could furnish the Senate as to the capitalization and profits made by the corporation. I am advised that they are making great profits.

Mr. FRELINGHUYSEN. I have not. I am interested in the principle of protecting an American industry and I have not looked into the question of profits. I have looked into the question of the production costs of the two articles, the German article and the American article.

I told the president of this corporation that if he could satisfy his customers that it was proper to have a duty of this character and would succeed in inducing those who purchase his products to support the duty, I, too, would support it. I have heard from one paper that was very vigorous in its protests against the 50 per cent rate. I have received from New Jersey a number of letters, a dozen or more from newspapers, all of the same purport. I have one from the Courier News, of Plainfield, N. J., a very prosperous paper. The letter comes from the owner, and in it he says:

On further consideration and consultation with others on the dry-mat schedule, concerning which we have previously written you, we think it only fair to you and the manufacturers of dry mats that we notify you of a change in our viewpoint. The Wood Flong Co. is the only maker of these mats in the United States at present. With a tariff providing sufficient protection to encourage profitable manufacture there would be others in this field. The mat—matrix or flong—is a peculiar composition of wood pulp, tissues, and various other substances united by a process which has taken many years to devise and to perfect. This is not a cardboard product, which is the cheapest form of paper making, but is the result of a complex and expensive process and is produced for one purpose only. The dry mat is the only real advance in the process of stereotyping made since stereotyping was invented in the early fifties. If, therefore, the Wood Flong Co. can not produce a mat at the very cheap rate at which German labor can produce a stereotype mat, we would think it only fair that sufficient protection be given the Wood Flong Co. until they have attained such economy of production as they feel will enable them to successfully hold their home trade.

Theirs is a new industry in our country. It will always employ a good class of skilled labor. It is a productive and essential enterprise making a necessity of daily life.

We were strongly opposed to making a prohibitive tariff in their favor and have so written you. We are not, however, opposed to a tariff giving the Wood Flong Co. sufficient protection, and we gladly withdraw our previous statement, as it has been shown that a higher rate is necessary and that a higher rate will not work a hardship upon their customers, the daily papers of the United States.

With kindest personal regards to yourself, I am,

Yours very truly,

CHARLES H. FROST.

I have another letter from the Bergen Record; also one from the Perth Amboy Evening News and several others which I shall not read. I understand the price which the Wood Flong Co. has been charging has been from 18 to 20 cents. I will read an excerpt from a letter from the Waterbury Republican:

I have never complained about dry mats. I found that when we started to use them in September, 1917, the former discrepancy in price between wet mats and finished dry mats had disappeared because, while tissues and matrix paper had jumped very much in price, your price on dry mats had apparently remained the same. From 1917 to the peak of the price you raised the price of dry mats from about 14 to about 20 cents, an increase of approximately 40 per cent. I do not know of any material or service used in the making of a newspaper which advanced in price less than this, with the possible exception of printing ink.

I find that the latest bill we have from you, dated November 2, is at 18 cents a mat, which represents an increase of less than 30 per cent over the price of the summer of 1917. I regard this as reasonable in view of the moderate increase that you made during the war and postarmistice period, which was undoubtedly necessary.

Here is another bit of testimony from the Paterson (N. J.) Call, which was the first paper in the United States to use dry mats, and with many others paid 25 cents each for them:

Our records show that our first shipment of dry mats was made on May 3, 1911, and the price paid was 25 cents each. At that time the Call began the use of dry mats, and since then has never used wet mats.

In view of the present price of the Wood dry mat, the 25-cent price which we paid in 1911 seems high, but the fact that the Call never discontinued the dry mat since the start proves that we considered it profitable to use, even at 25 cents.

Our present price is, therefore, 7 cents lower than the price charged by the Germans when in sole control of the American market.

In other words, when the Germans had an absolute monopoly of this market they charged 7 cents higher for mats than this American industry which has been established here and which is furnishing the newspapers with this necessity: The price of 25 cents which the Call paid when the Germans had a monopoly was 7 cents higher than the price now paid.

Mr. WALSH of Montana. Mr. President——

Mr. FRELINGHUYSEN. I yield to the Senator from Montana.

Mr. WALSH of Montana. The Senator from New Jersey has called our attention to what the Germans did when they had a monopoly of the market. Of course, it illustrates the evils of monopoly. Does not the Senator think that the American manufacturer will do exactly the same thing if he secures a monopoly?

Mr. FRELINGHUYSEN. I do not, Mr. President.

Mr. WALSH of Montana. I am glad to find such sublime confidence in the American producer as that exhibited by the Senator from New Jersey.

Mr. FRELINGHUYSEN. I have always sublime confidence in the fairness of American industry; and I also have confidence in the fact that if we furnish protection, establish an American industry, and control the market competition will exist here; and it will be a healthy American competition and not an unhealthy European competition.

The Senate may reduce this rate if it so wishes, but 35 per cent is an equalization between the import price and the present domestic selling price, which is lower by about 7 cents than the price which the Germans formerly charged. I asked for a 50 per cent duty, but the committee reduced it to 35 per cent. These newspapers using this product support the 50 per cent ad valorem rate; but the committee saw fit not to raise it, although I appealed to them to do so on the basis of the figures; but most certainly it will not be fair to this American corporation to reduce the rate below 35 per cent. That rate is fair; it will protect an American industry; and it has not been shown that it will create a monopoly. Most certainly if there is such great profit in this business other concerns will spring up under this protection, but surely it is not an argument to say that we are protecting an American monopoly against a German monopoly.

Mr. HARRIS. Mr. President, the Senator from New Jersey has stated that a German monopoly controlled this commodity before one American company entered upon its manufacture. That is true, but the American company, which is a monopoly, has under the existing 25 per cent rate been able to drive the German monopoly practically out of business in this country. Now, this one corporation, a monopoly, supplies 350 newspapers, which have gone to considerable expense on the promise that they may have dry mats at a certain price; 350 newspapers have gone to that expense, and the one American company has

practically shut out the German competition. Now, after getting these 350 papers to go to that expense, this company wants to get the present rate increased and then increase the price to the publishers.

I had a letter from Mr. Wood, the president of the company, as other Senators did, which was misleading. Evidently he tried to deceive us. I quote from his letter as follows:

It will be necessary for upward of 350 newspapers that now use our dry mats exclusively for all work to entirely reequip their plants at great expense and to largely increase their consumption of print paper by returning to the old wet-mat process.

The following are Georgia newspapers which already depend upon dry mats and will suffer—

Notice the word "suffer"—

if the altogether inadequate 35 per cent rate recommended by the Finance Committee is not increased to 50 per cent—

Although he has built up a complete monopoly on a 25 per cent duty.

Then he names the Georgia newspapers which will be injured if the rate is not increased.

Mr. President, the Georgia newspapers, without my writing them, heard of the propaganda of this corporation, and many of them wrote me. I will quote from the letters of some of the editors and owners of papers which this man had already written me were very much interested and would suffer if the rate was not increased. The first is from Mr. R. L. McKenney, owner and editor of the Macon News, one of the papers mentioned by Mr. Wood:

THE MACON NEWS,
Macon, Ga., July 5, 1922.

Hon. W. J. HARRIS,
United States Senate, Washington, D. C.

DEAR SENATOR HARRIS: It has been called to my attention that the Wood-Flong Corporation are still pursuing their efforts to get a high tariff placed on imported mats, and that a communication has been addressed to the United States Senators, naming a number of newspapers who are using their product, and that the importance of the high tariff being placed on foreign mats was "in the interest of these newspapers."

This letter is simply written for the purpose of reiterating my former position regarding tariff on foreign mats, as I feel that they should be placed on the free list, if possible.

I also quote from the letter of the editor of the Macon Telegraph, another paper which Mr. Wood said would suffer if the rate of duty was not increased:

I feel that the Wood Flong people are endeavoring to build up a monopoly in this country, and if they can protect their industry with the tariff that is already prohibitive, as a newspaper publisher I am in favor of going out of business, as far as dry mats are concerned. The Wood Flong product is no better than the imported mat, and if we afford them the protection they want, it means the newspapers in this country will be compelled to pay from 4 cents to 6 cents more than these mats are actually worth. I desire to enter my protest against any additional tariff on these mats.

In addition to the efforts these people have made to influence Congress in giving them undue protection, they have actually written to the stereotypers in the various newspapers asking that they refuse to handle any imported mats. I feel that this part of their propaganda is entirely out of order and seeks to destroy the newspaper business itself, rather than to protect their industry.

I quote next from a letter addressed to me by the owner and editor of the Daily Herald, of Albany, Ga., that newspaper being one of those mentioned by Mr. Wood and which he said was very much interested in the proposed increase in the rate of duty. Here is part of what the editor of the Albany Herald says:

This corporation induced newspaper publishers to put in the necessary equipment for using their mats, representing to us that it would be a permanent saving. Now that they have 350 or more of us hooked they seek a tariff protection that would enable them to increase the cost of their mats to more than what that of the wet-mat system was. It is unfair to those of us who have gone to the expense of equipping our plants for the use of the dry mats, and is in keeping with the general policy of monopolies in this country that are fostered by the iniquitous protective tariff system.

This is a simple proposition; one company has built up a monopoly under the 25 per cent duty; it has practically shut out foreign competition, as well as domestic, and this monopoly comes here and asks us to put a tax on the readers of 350 daily papers in order to pay additional dividends to this one company, a trust. If all Senators were present, instead of a very few in the Chamber at this time, and could hear the facts presented, there would be little doubt of the defeat of this proposal to increase the duty.

Mr. FRELINGHUYSEN. Mr. President, I do not think that the Senate wants to waste much time on this discussion. If Senators want to abandon the principle of protecting American industry they may vote for a reduction of the rate proposed. The rate should be 50 per cent in order to provide an adequate rate to cover the difference between the production costs here and in Germany.

The argument of the newspaper publishers in the South is a free-trade argument; but what does the Reynolds report show? The Reynolds report has been the textbook for both sides in the controversy over the tariff. I have here an item, 1313, representing a shipment of 1,000 sheets of stereotype matrices or boards. The figures show a foreign cost of $82.60; landing charges, $1.50; selling price of the imported article, $120. The selling price of the comparable domestic article is $200. So 108 per cent would be required to equalize the difference; and yet I have shown by the testimony of the Paterson, N. J., Call that the Wood Flong Co., this great monopoly, employing American labor, asking for protection against German competition, are selling their mats to the Paterson Call at 7 cents less than Germany sold them for when they had control of the market, and 15 cents less than Germany is willing to sell them for now.

On the basis of the record, on the basis of the comparative production costs, a rate of 50 per cent is justified, and 35 per cent is too low. The committee, however, has made that rate, and of course it has been reported to the Senate. It should not be reduced below that figure in all fairness to this American industry.

Mr. SIMMONS. Mr. President, I want to say to the Senator from New Jersey [Mr. FRELINGHUYSEN] and to other Senators that if we want further to strengthen and fortify the monopolies that have grown up under the present tariff rate, and to allow them further to advance their prices, the way to do it is to vote for this committee amendment.

SEVERAL SENATORS. Question!

The PRESIDING OFFICER. The question is on the amendment——

Mr. SIMMONS. Mr. President, I have not quite finished.

The PRESIDING OFFICER. The Chair was under the impression that the Senator had concluded.

Mr. SIMMONS. It does seem to be out of order for anybody to oppose protection asked by the distinguished Senator from New Jersey for industries in his State. It was out of order in the committee, I understand; and while the Senator got on the committee rather late, he succeeded in getting on the protected list about every industry in his State that was not already on it, and practically every one that was on it got its protection increased. He is a very industrious and a very persistent Senator. Next to the Senator from Idaho [Mr. GOODING] he is probably the rankest protectionist in this body. I think the Committee on Finance found that out after he became a member of it. We have been protecting practically everything in New Jersey; and I think right here, at the close of the protective provisions of this bill, we might give some little consideration to the question of whether we should further advance the rate in favor of this admitted monopoly—a monopoly that we can not find out anything about. It is about the closest-mouthed monopoly in the United States. The Tariff Commission does not seem to have been able to ascertain anything about it. It discusses what dry mat is; it tells us how it is made and how the newspapers use it; but when it comes to the production and the importations the commission was unable to get any information. The Senator from New Jersey seems to think that unless we give this concern in his State an increase in its protection it will go out of business altogether, and that the newspapers of the country will suffer by losing the opportunity to buy its products; and yet, when I asked him what were the profits of that institution, that monopoly, that closely owned, closely controlled, secretly controlled monopoly in his State, he could not tell me anything about them. No member of the committee can tell us anything about them. What the cost of production in this country is, nobody knows. Nobody is going to be allowed to know. What the capital of the concern is, nobody knows. The sponsor for this increase in the duty, the Senator from New Jersey, does not know. It is a secretly controlled, secretly operated monopoly.

Is there anybody upon this floor who will get up here and say that these people are not the sole producers of this product in the United States, that they do not enjoy an absolute and a complete monopoly under the 25 per cent duty in the present law, that they are not able now to dictate to every newspaper in this country what it shall pay, and, whenever they see fit to do so, that they are not able, under the present duty, to increase the price of their product? If there are any importations into this country, I have not heard of them. My information is that there are practically no importations into this country at this time, and that these people are holding up the newspapers of the country.

The Senator from Georgia [Mr. HARRIS] is not the only Senator who has had letters from newspaper men protesting against this increase in duty, protesting against the manner in which this monopoly treats them, protesting against the fact that by this duty they are made absolutely subservient to the wishes and the will and the avarice and the greed of this monopoly. Now, this man who will not tell what his profits are, who has

the newspapers in his power, who can advance his prices whenever he pleases, and who does advance them whenever he pleases and imposes such conditions upon his customers as he desires, comes here and tells us that unless he is permitted to increase his prices through the instrumentality of an advance in his protection, and still be secure from foreign competition, the newspapers will suffer. That is the same character of letter he wrote me. That is the same character of letter he has been writing to the newspapers, intimating that unless they helped him get this duty he would go out of business, and they would have to go back to the old wet-mat process.

Why will he have to go out of business, Mr. President, if we do not increase this rate? Has he not built up his business upon this rate? Has he not been able to maintain his monopoly upon this rate? Is he at present troubled with competition under this rate? I do not believe, so far as my information goes, that there is any monopoly in this country which has conducted a more insolent propaganda than this particular company has. I regard this man's statement to the newspapers of this country that unless they helped him, unless they withdrew their protests, and all that sort of thing, he would go out of business and leave them helpless, as insolent. Let him go out of business if he wants to. Nobody is asking him to stay in business; but, Mr. President, he will not go out of business as long as he has the present 25 per cent protective duty. He will continue in business. This corporation will continue a monopoly, controlling the trade in this country and fixing its prices as it has in the past.

Mr. President, we have given the newspapers of this country free print paper. On yesterday we voted to take off of chemically prepared wood pulp the duty proposed by the committee. The manufacturers of wood pulp in this country were demanding that duty. They were insisting upon that protection; and yet, Mr. President, what we did yesterday was to say that the newspapers of this country are performing a great public service; that they are the agents for the dissemination of information in this country; that they are the greatest single educational force in the United States to-day; and that they ought not to be fettered with high costs of their raw materials or their necessary equipment. That has been the policy of this Congress and of every former Congress of which I have been a Member. It is a policy to which I largely subscribe. If there is one thing in this world upon which I would not impose a protective duty, it is the instrumentalities of information and intelligence and the dissemination of thought.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from New Jersey?

Mr. SIMMONS. I shall be through in one second.

Mr. FRELINGHUYSEN. I want to ask the Senator a question.

Mr. SIMMONS. Mr. President, while refusing protection to the many manufacturers of pulp in this country, to the many manufacturers of chemical pulp in this country, to the manufacturers of paper in this country, in the interest of the press of the country and in the interest of cheaper news and cheaper distribution of intelligence, shall we finally bow the knee to a single corporation located in the great State of New Jersey, the breeding place of the trusts of the United States? Shall we bow the knee to that corporation and say: "We will make you the single and only exception to the general policy of the Congress"?

Mr. FRELINGHUYSEN. Mr. President, I should like to ask the Senator a question.

Mr. SIMMONS. The Senator can ask it.

Mr. FRELINGHUYSEN. The Senator spoke of the great benefit to the public of these newspapers, and stated that newsprint paper was free and wood pulp was free. Did the Senator vote for the 25 per cent duty imposed on this product in the Underwood tariff bill?

Mr. SIMMONS. I presume I did, Mr. President; and when I did it I made a very great mistake, as I have discovered now. It was not a monopoly then, as it is now; and I will say, with the consent of the Senator, another thing. There are a great many duties in the Underwood bill that experience has shown were very much too high. They were higher than were necessary, and this is one that was higher than necessary, because in 13 years it has bred a trust and a monopoly in this country.

Mr. FRELINGHUYSEN. Mr. President, when the Senator voted for that duty, recognizing that an industry in this country should be protected, the mark in Germany was worth 23.8 cents. To-day it is worth one-seventh of 1 cent. That would seemingly justify a 10 per cent advance in the ad valorem duty imposed in this bill.

As far as New Jersey being the home of trusts is concerned, I think that is amply taken care of in the laws which have been placed upon the Federal statute books. New Jersey is proud of her industries and proud of the fact that she has a million wage earners; and I want to say that I stand here for their protection and a continuance of their employment, notwithstanding the free-trade theories of the Senator from North Carolina.

Mr. SIMMONS. I have no doubt that the Senator from New Jersey is proud of his trusts and proud of his monopolies. He has already told us that many times and he has especially emphasized it to-day.

Mr. WALSH of Montana. Mr. President, I want it perfectly understood that, so far as the case for the duty asked on this particular commodity is concerned, it rests entirely with the statement of Mr. Wood, who owns the corporation which produces this product, and if Mr. Wood is to be believed, his industry is gone now if you impose the duty that is proposed by the committee of 35 per cent. He said in a letter to the senior Senator from North Carolina [Mr. SIMMONS] under date of June 21, 1922, as follows:

> Unless stereotype dry mats, included in paragraph 1313 of the tariff bill now under consideration, are granted a rate of at least 50 per cent this company will be compelled to immediately go out of business, and the industry will be totally destroyed in the United States.

If that is the case, if Mr. Wood is entirely truthful and accurate in this statement, his industry is gone.

But upon what basis does he make any such statement as that? I have called the attention of the Senate to the fact that there is not an item in this paper schedule with reference to which American producers are in the slightest danger from any European competition, as shown by the actual figures, wherever there are any imports at all. We have not any information whatever with respect to the imports of this particular commodity, whether they are increasing or whether they are decreasing, whether they even exist or do not exist. Upon what basis does the Senator assert, as he has asserted upon this floor, that this industry must perish unless it gets a duty of 50 per cent? The manufacture of this particular paper product is practically the same as the manufacture of other paper products, of cardboard, of box paper, of wall board, and of all the various kinds of paper, with reference to which the American producer seems to have no difficulty whatever in competing with the German producer or with the producer anywhere in the world. What does he say about it? Let me call your attention to his brief. Mr. Wood appeared before the committee but practically submitted a brief in which he said as follows:

> The selling price of our dry mat to newspapers is 20 cents per mat, or sheet, and with present costs of labor and materials it has been most difficult for us to maintain this price.

That is all he said about what it cost him to produce a mat which he sells for 20 cents. But he gives us this further information:

> An investigation recently made in Germany shows that the export value of dry mats or flongs is placed at the equivalent of 25 cents United States money per square meter under the German law. A square meter of this material provides three flongs of newspaper page size.

He said further:

> The Germans have offered and are offering in their efforts to destroy us dry mats for as low as 8 cents each, with the result that unless proper protection is afforded us under the tariff measure now under consideration we will soon be forced out of business.

Bear in mind, the export price of the mat in Germany is 25 cents, and he sells the mat in this country for 20 cents, but he says the Germans are dumping this product on the market and selling it for less than the German cost of production. But, of course, that is a case which should be taken care of by a dumping clause.

Mr. FRELINGHUYSEN. The statement the Senator has made is in conflict with the brief of the American Newspaper Publishers' Association, who oppose this duty.

Mr. WALSH of Montana. I can not help that.

Mr. FRELINGHUYSEN. The American Newspaper Publishers' Association say that the selling cost in this country, plus the duty, is 14 cents.

Mr. WALSH of Montana. I am reading from Mr. Wood's brief.

Mr. FRELINGHUYSEN. I am reading from the brief of the American Newspaper Publishers' Association dated March 16, 1922.

Mr. WALSH of Montana. I am trying to tell the Senator of the evidence offered by those who are seeking this particular duty. It may be true, and it may be untrue. I am giving it to the Senate for what it is worth.

Mr. POMERENE. Mr. President, it has been stated on the one side that the newspapers generally were opposed to this increase in the duty on mats. On the other side of the Chamber it has been urged that the newspapers insist upon it. I can only speak for the newspapers in my own State from which I have heard, and without exception they are protesting against this increase in this rate, and I have had no communications to the contrary from that State. Every one of them is insisting, just as the Senator from Montana and the Senator from North Carolina have been urging, that this one firm at the present time has a complete monopoly of the production of these mats in this country, and it seems to me that anyone coming here and asking a gratuity from the Congress of the United States ought to be a little more liberal in the giving of information with respect to his business to the Congress so that they can act intelligently upon it.

Mr. WALSH of Montana. I have given the Senate practically all the information that was given to us by Mr. Wood.

In order to be entirely fair about the matter, I am going to withdraw the amendment which I proposed and substitute therefor "25 per cent," the present rate.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on agreeing to the amendment offered by the Senator from Montana to the committee amendment.

Mr. WALSH of Montana. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from New York [Mr. WADSWORTH], and vote "nay."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER], and vote "nay."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. McKELLAR] to the junior Senator from Vermont [Mr. PAGE], and vote "nay."

Mr. OVERMAN (when his name was called). I transfer my pair with the senior Senator from Wyoming [Mr. WARREN], who is absent on account of sickness in his family, to the senior Senator from Virginia [Mr. SWANSON], and vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED], and vote "yea."

Mr. SIMMONS (when his name was called). I transfer my pair with the junior Senator from Minnesota [Mr. KELLOGG] to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

The roll call was concluded.

Mr. KENDRICK. I have a general pair with the Senator from Illinois [Mr. McCORMICK], which I transfer to the Senator from Montana [Mr. MYERS], and vote "yea."

Mr. HARRISON. I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. STERLING. I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Maryland [Mr. FRANCE], and vote "yea."

Mr. TRAMMELL. My pair, the senior Senator from Rhode Island [Mr. COLT], is absent, and being unable to obtain a transfer, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. JONES of New Mexico (after having voted in the affirmative). The Senator from Maine [Mr. FERNALD] has not voted. I transfer my general pair with that Senator to the Senator from Nebraska [Mr. HITCHCOCK] and allow my vote to stand.

The roll call resulted—yeas 16, nays 27, as follows:

YEAS—16.

Ashurst	Jones, N. Mex.	Pittman	Sheppard
Harris	Jones, Wash.	Pomerene	Simmons
Harrison	Kendrick	Ransdell	Walsh, Mass.
Heflin	Overman	Robinson	Walsh, Mont.

NAYS—27.

Broussard	Gooding	New	Shortridge
Bursum	Hale	Nicholson	Smoot
Calder	Keyes	Norbeck	Spencer
Cameron	Lenroot	Oddie	Stanfield
Cummins	Lodge	Pepper	Sterling
Curtis	McCumber	Phipps	Willis
Frelinghuysen	McNary	Rawson	

NOT VOTING—52.

Ball	Fernald	McKellar	Smith
Borah	Fletcher	McKinley	Stanley
Brandegee	France	McLean	Sutherland
Capper	Gerry	Moses	Swanson
Caraway	Glass	Myers	Townsend
Colt	Harreld	Nelson	Trammell
Culberson	Hitchcock	Newberry	Underwood
Dial	Johnson	Norris	Wadsworth
Dillingham	Kellogg	Owen	Warren
du Pont	King	Page	Watson, Ga.
Edge	Ladd	Poindexter	Watson, Ind.
Elkins	La Follette	Reed	Weller
Ernst	McCormick	Shields	Williams

The PRESIDING OFFICER. On this question the yeas are 16, and the nays are 27. There is not a quorum present. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harrison	Norbeck	Simmons
Broussard	Heflin	Oddie	Smoot
Bursum	Jones, N. Mex.	Overman	Spencer
Calder	Jones, Wash.	Pepper	Stanfield
Cameron	Kendrick	Phipps	Sterling
Cummins	Keyes	Pittman	Trammell
Curtis	Lenroot	Pomerene	Walsh, Mass.
Fernald	Lodge	Ransdell	Walsh, Mont.
Frelinghuysen	McCumber	Rawson	Willis
Gooding	McNary	Robinson	
Hale	New	Sheppard	
Harris	Nicholson	Shortridge	

The PRESIDING OFFICER. Forty-five Senators have answered to their names. A quorum is not present. The Secretary will call the roll of absentees.

The reading clerk called the names of absent Senators, and Mr. BORAH answered to his name when called.

Mr. FLETCHER and Mr. CAPPER entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-eight Senators have answered to their names. A quorum is present. The Secretary will call the roll on the question of agreeing to the amendment of the Senator from Montana [Mr. WALSH] to the amendment of the committee.

The reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. BALL], who is absent at this time. I am unable to obtain a transfer and therefore unable to vote. If privileged to vote, I would vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. KENDRICK (when his name was called). Making the same announcement as to the transfer of my pair, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as on the last vote, I vote "nay."

Mr. McCUMBER (when his name was called). Making the same transfer of my pair as before, I vote "nay."

Mr. NEW (when his name was called). Repeating the announcement of the transfer of my pair, I vote "nay."

Mr. OVERMAN (when his name was called) Announcing as before my pair and transfer, I vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as before, I vote "nay."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

The roll call was concluded.

Mr. ROBINSON. Announcing the same transfer of my pair as on the last vote, I vote "nay."

Mr. SIMMONS (after having voted in the affirmative). I wish to announce the transfer of my pair with the Senator from Minnesota [Mr. KELLOGG] to the Senator from Rhode Island [Mr. GERRY] and allow my vote to stand.

Mr. CARAWAY. I have a general pair with the junior Senator from Illinois [Mr. McKINLEY]. He is absent. I am unable to obtain a transfer and therefore refrain from voting.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from South Carolina [Mr. DIAL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The roll call resulted—yeas 18, nays 28, as follows:

YEAS—18.

Ashurst	Jones, N. Mex.	Pomerene	Trammell
Borah	Jones, Wash.	Ransdell	Walsh, Mass.
Harris	Kendrick	Robinson	Walsh, Mont.
Harrison	Overman	Sheppard	
Heflin	Pittman	Simmons	

NAYS—28.

Broussard	Frelinghuysen	McNary	Rawson
Bursum	Gooding	New	Shortridge
Calder	Hale	Nicholson	Smoot
Cameron	Keyes	Norbeck	Spencer
Capper	Lenroot	Oddie	Stanfield
Curtis	Lodge	Pepper	Sterling
Fernald	McCumber	Phipps	Willis

NOT VOTING—49.

Ball	France	McLean	Sutherland
Brandegee	Gerry	Moses	Swanson
Caraway	Glass	Myers	Townsend
Colt	Harreld	Nelson	Underwood
Culberson	Hitchcock	Newberry	Wadsworth
Cummins	Johnson	Norris	Warren
Dial	Kellogg	Owen	Watson, Ga.
Dillingham	King	Page	Watson, Ind.
du Pont	Ladd	Poindexter	Weller
Edge	La Follette	Reed	Williams
Elkins	McCormick	Shields	
Ernst	McKellar	Smith	
Fletcher	McKinley	Stanley	

The PRESIDING OFFICER. On the question the yeas are 18 and the nays are 28. There are present the Senator from Florida [Mr. FLETCHER] and the Senator from Arkansas [Mr. CARAWAY], who are paired but not voting. A quorum being present, the amendment of the Senator from Montana [Mr. WALSH] to the amendment of the committee is rejected. The question recurs on the amendment of the committee.

The amendment of the committee was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The READING CLERK. The next amendment of the Committee on Finance is, on page 177, line 23, where the committee proposes to strike out "part" and insert "value," so as to read:

Wall pockets, composed wholly or in chief value of papers, etc.

The amendment was agreed to.

The next amendment of the committee was, on page 178, line 4, where the committee proposed to strike out "26" and insert "all the foregoing, 40," so as to read:

Manufactures of paper, or of which paper is the component material of chief value, not specially provided for, all the foregoing, 40 per cent ad valorem.

Mr. SMOOT. I move to substitute "35" for "40."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

Mr. SIMMONS. I wish the Senator from Utah would permit me merely to correct a statement which I made in some remarks previously delivered.

Mr. SMOOT. Certainly.

Mr. SIMMONS. I wish to state that I am advised I was mistaken in having said that the corporation controlling the dry-mat product of this country was a New Jersey corporation. I am told that it is a New York corporation, just across the border, and probably infected with the vices of New Jersey corporations.

FEDERAL COURT OF CONCILIATION.

Mr. SPENCER. Mr. President, I have drafted a bill to establish the Federal court of conciliation.

In this Government of ours we have the necessary tribunals to determine every controversy between individuals and between States; and yet the wonder of it is that when there come controversies or disputes between capital and labor or between the employer and the employee that may affect the very life of the Nation and of the Nation's industries we have absolutely no tribunal to act upon them.

I am very clear in my mind that every effort at voluntary arbitration, conciliation, and conference ought first to be tried; but when all these have been tried and there exist still disputes whose settlement can not be made by voluntary means, there ought to be some commission, or some tribunal, or some court, which, in the name of all the people, can determine the dispute when it reaches a point that threatens the very welfare of the Nation.

I ask unanimous consent to introduce that bill and to have it printed in the RECORD in 8-point type for the consideration of my colleagues in the Senate.

The bill (S. 3889) to establish the Federal court of conciliation was read twice by its title and referred to the Committee on the Judiciary; and it was ordered to be printed in the RECORD in 8-point type, as follows:

Be it enacted, etc., That there is hereby established a Federal court of conciliation (hereafter referred to as the court), to consist of three judges, to be appointed by the President by and with the advice and consent of the Senate; one of whom shall be designated by the President as presiding judge; each of whom shall possess the same qualifications as are or may be required by law of judges of the United States district court, except as to residence; hold their office during good behavior and receive the same compensation.

SEC. 2. The court shall sit at such places in the United States as may by it be determined or at which the court may be called to sit by the President of the United States.

SEC. 3. The court shall have jurisdiction to hear and determine controversies or disputes affecting the operation of interstate commerce as may be brought before it in the manner herein provided, and to enforce its decisions and findings as the judgment of other Federal courts are enforced.

SEC. 4. Whenever it shall be made to appear to the court by petition or otherwise, under such regulations and rules as may by the court be adopted and with power in the court to secure on its own motion or on the application of either side such expert advice in open hearing concerning the matters under consideration as it may desire, that there exists a controversy or dispute between employers and employees or between employees or between employers in connection with the transportation of commodities in interstate commerce or in connection with any industry whose product directly or immediately is essential to such transportation, and that in good faith, efforts have been made by one or both sides of such controversies to settle the same by conference, conciliation, voluntary arbitration, or otherwise, and such efforts have been unavailing, and that the disputes and controversies are of such a character and extent as to endanger the general welfare of the people of the United States, the court shall on its own motion or on the application of either side of such dispute or controversy, hear and determine the same and render such interlocutory orders or final decrees or judgment as the evidence may require and shall possess all necessary powers equitable or legal to adjudicate the dispute and to protect the interest of the parties thereto and to secure the continuity and efficiency of interstate commerce: *Provided*, That either party to the dispute or controversy may at any time upon permission of the court, or, as of right, after such party has in good faith complied with such order, judgment, or decree for a period of 30 days apply to the court for a modification or a reversal of said order, judgment, or decree, and be entitled to present evidence and reasons thereof which together with the original testimony in the case shall be considered by the court: *And provided further*, That no order, judgment, or decree shall require any individual man to work except when and where and under such conditions as he pleases.

SEC. 5. Appeals may be taken by either party from any order or judgment or finding of the court to the circuit court of appeals in the circuit wherein the finding of the court is made, and the judgment of the circuit court of appeals shall be final on such appeals unless in the judgment of the said circuit court of appeals a further appeal to the Supreme Court of the United States should be granted. Pending the appeal to the circuit court of appeals or to the Supreme Court the findings, orders, decrees, or judgment of the court shall be in full force and effect.

The appellate court to which appeals as herein provided for are taken shall advance such appeals to as prompt a hearing and determination as may be possible.

SEC. 6. The court shall have a seal, with such design as it may order; shall regulate its own terms of court; make rules for its government; regulate the practice before it; possess all the powers and rights with regard to its writs, process, practice, and the enforcement of its orders, decrees, and judgment as may be now or hereafter possessed by the United States district courts with regard to their practices, orders, decrees, or judgments.

SEC. 7. The court shall be furnished with such officers, equipment, and supplies as may be necessary.

SEC. 8. All acts or parts of acts inconsistent with any of the provisions of this act are hereby repealed.

ABANDONED COTTON ACREAGE.

Mr. HEFLIN submitted the following resolution (S. Res. 333), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary of Agriculture be, and he is hereby, authorized and directed to include in his September 1 cotton report an estimate of the acreage of cotton abandoned since June 25 up to August 25, 1922, and the acreage remaining in cultivation on the last-named date.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened; and (at 6 o'clock and 20 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Saturday, August 5, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate August 4 (legislative day of August 3), 1922.

AGENT BEFORE THE ARBITRAL TRIBUNAL.

Fred K. Nielsen, of Nebraska, now Solicitor for the Department of State, to be agent of the United States before the arbitral tribunal constituted under the special agreement of the 18th of August, 1910, between the United States and Great Britain for the arbitration of outstanding pecuniary claims in accordance with the provisions of that agreement and of the convention of The Hague of the 18th of October, 1907, for the specific settlement of international disputes.

MEMBER OF THE FEDERAL FARM LOAN BOARD.

John H. Guill, jr., of California, to be a member of the Federal Farm Loan Board, vice William H. Joyce, resigned.

UNITED STATES ATTORNEY.

D. Q. Morrow, of Ohio, to be United States attorney, southern district of Ohio, vice Thomas H. Morrow, appointed by court.

Executive nominations withdrawn from the Senate August 4 (legislative day of August 3), 1922.

PROMOTION IN THE NAVY.

Ensign Rene F. A. Bucholz to be a lieutenant (junior grade) in the Navy, from the 7th day of June, 1922.

POSTMASTER.

James S. Young to be postmaster at Reedsville, in the State of Pennsylvania.

SENATE.

SATURDAY, *August 5, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. McCUMBER. Mr. President, I ask unanimous consent that when the Senate closes its session on this calendar day it recess until Monday at 11 o'clock a. m.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Is there objection? The Chair hears none, and it is so ordered.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Inasmuch as the Senator from Mississippi [Mr. HARRISON] has given notice of his intention to discuss the sugar schedule this morning, I see no reason why we can not take up the sugar schedule and go right on with it after the Senator has discussed it. For that purpose I ask unanimous consent that the Senate proceed to the consideration of Schedule 5, and that in its consideration any amendment offered by the committee or by any individual Senator to the schedule may be considered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota?

Mr. HARRISON. Personally I have no objection. Indeed, I should like to see that course pursued. But the Senator from North Carolina [Mr. SIMMONS], who is in charge of the bill on this side of the Chamber, is not here. He will probably be here in a moment, and I wish the Senator would withhold his request until that Senator comes in. There is just at this moment no minority member of the Finance Committee on the floor.

Mr. McCUMBER. I talked with the Senator from North Carolina yesterday, and he was very agreeable that these particular important matters should be taken up first and disposed of. I think this course will be very agreeable to him.

The PRESIDING OFFICER. The Chair will state that the Senator from North Carolina will enter the Chamber in about five seconds.

Mr. HARRISON. We can see about it then.

Mr. McCUMBER. Very well; we can consider it a little later.

Mr. SIMMONS entered the Chamber.

Mr. NICHOLSON. Mr. President, I would like to ask if the Senator from North Dakota [Mr. McCUMBER] will not have the time extended to some extent so that those of us who wish to discuss the sugar schedule, and who are not prepared at this time to discuss it, may be permitted to discuss the question, say, next Tuesday?

Mr. McCUMBER. I hope we will dispose of it before next Tuesday, but if we take it up this morning the Senator from Mississippi [Mr. HARRISON] desires to discuss it, and then the Senators from Louisiana, I understand, will go on with the discussion to-day, and the matter will probably go over until Monday. So we shall have time enough.

Mr. NICHOLSON. I did not anticipate that the discussion of the sugar schedule was to come before the Senate at this early date. It has not permitted Senators who are interested in the question to make the preparation they desire to make. For that reason I am asking now that those of us who are not prepared to take up the question before next Tuesday may be granted permission to debate it at that time.

Mr. WALSH of Massachusetts. Can not the Senator get ready by Monday?

Mr. NICHOLSON. There are some data from out of town, which I am trying to obtain, which may not be here Monday.

Mr. WALSH of Massachusetts. I hope we shall get down to business and dispose of some of the schedules once for all. If we take up the sugar schedule to-day, I hope that we will stick to it until we dispose of every amendment to it.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent that the sugar schedule, Schedule 5, may be taken up, and that the committee amendment and amendments offered by individual Senators to it may be considered.

Mr. SIMMONS. Mr. President, I was not here when this matter was brought up. I understand the request applies only to the sugar schedule?

Mr. McCUMBER. It applies to the sugar schedule, and I hope we shall be able to take up the other important ones in order.

Mr. SIMMONS. Is the Senator going to ask for a vote to-day?

Mr. McCUMBER. No; it would be impossible, because there are Senators who say they will not be prepared to discuss the schedule before Monday. However, there are a number of Senators who can discuss it to-day and who will probably take all day in its discussion.

Mr. SIMMONS. I have no objection. If insisted upon, I would not throw any obstacle in the way of taking it up and disposing of it to-day, but I think if we take it up for discussion it might be well, if the discussion is finished to-day, to let it go over until Monday, because I think the Senator from Rhode Island [Mr. GERRY] has prepared himself to discuss the sugar schedule to some extent, and I would like him to have the opportunity. However, I am so anxious, I want to say to the Senator, to get rid of these questions that I would undertake to satisfy the Senator from Rhode Island if it should become necessary.

Mr. McCUMBER. Discussion of the schedule will not be finished before Monday anyway, because other Senators have asked that it go over in order that they may be prepared to discuss it.

Mr. HARRISON. I have no objection to the request of the Senator from North Dakota.

Mr. McCUMBER. I hope we can have the agreement I have requested, and we can take care of the other matter.

Mr. WALSH of Montana. Would it not be wise to finish the schedule now under consideration before we go to the sugar schedule?

Mr. SMOOT. There is just one item remaining in that schedule, and that can easily be disposed of. The committee desires to secure some additional data.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered. The Senator from Mississippi [Mr. HARRISON] is entitled to the floor.

Mr. GOODING. Mr. President, will the Senator yield?

Mr. HARRISON. I yield.

Mr. GOODING. At this time I ask unanimous consent, out of order, to call up Senate Resolution 330.

The PRESIDING OFFICER. Under the rule the Chair can not recognize the Senator for that purpose while the Senator from Mississippi holds the floor.

Mr. GOODING. I understood the Senator from Mississippi yielded to me.

The PRESIDING OFFICER. Under the rule the Senator from Mississippi can not yield for that purpose.

Mr. HARRISON. I do not want to lose my right to the floor.

Mr. NICHOLSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	Lodge	Sheppard
Borah	Glass	McCormick	Shortridge
Brandegee	Gooding	McCumber	Simmons
Broussard	Hale	McLean	Smoot
Bursum	Harreld	McNary	Stanfield
Calder	Harrison	Myers	Sterling
Cameron	Heflin	Nelson	Townsend
Capper	Hitchcock	New	Walsh, Mass.
Caraway	Jones, N. Mex.	Nicholson	Walsh, Mont.
Culberson	Jones, Wash.	Oddie	Warren
Curtis	Kendrick	Overman	Watson, Ga.
Dillingham	Keyes	Phipps	Willis
Fernald	Ladd	Pomerene	
Fletcher	Lenroot	Ransdell	

Mr. CURTIS. I wish to announce that the following Senators are absent attending the funeral of the late Senator CROW:

The Senator from Pennsylvania [Mr. PEPPER], the Senator from Kentucky [Mr. ERNST], the Senator from Iowa [Mr. CUMMINS], the Senator from South Dakota [Mr. NORBECK], the Senator from Missouri [Mr. SPENCER], the Senator from Georgia [Mr. HARRIS], the Senator from Arkansas [Mr. ROBINSON], and the Senator from Florida [Mr. TRAMMELL].

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum is present. The Senator from Mississippi will proceed.

Mr. HITCHCOCK. Mr. President, will the Senator from Mississippi yield to me?

Mr. HARRISON. I yield to the Senator.

Mr. HITCHCOCK. Some reference made yesterday by the Senator from Idaho [Mr. GOODING] to his ownership of sheep has suggested a few verses which I shall take the liberty of reading:

GOODING had eight thousand sheep,
Their fleece was white as snow,
And everywhere that GOODING went,
The sheep were sure to go.

They followed him by night and day,
Which was against the rule.
They filled the statesman with dismay,
Tossed high the wool schedule.

And when the people found it out
Their rage began a-waxing;
They knew the presence of those sheep
Meant heavy tariff taxing.

But if the wool on GOODING'S sheep,
To make cloth for those who wear it,
Won't grow unless we tax our folks,
Then they must grin and bear it.

But GOODING'S case is only one
Of many like abuses,
Of taxes that the tariff lays
For private, not public, uses.

Mr. HARRISON. Mr. President, there are certain articles which are imported into this country the duty on which approximately is reflected to the full extent in the cost to the consumer. One of those articles is sugar. I think that is conceded not only by sugar experts and refiners but by the champions of a sugar duty upon this floor. Indeed, it has been conceded by Republican leaders who have previously been authors of tariff bills. I desire to insert at this point what Mr. McKinley, on the floor of the House of Representatives, said on May 20, 1890, in presenting the so-called McKinley bill, upon that proposition. He said:

I would have preferred, Mr. Chairman, if the article of sugar could have been left in the tariff schedule upon the dutiable list. This, however, was not practicable in the presence of an almost universal sentiment in favor of the removal of the entire duty upon this article of universal family use.

Then, speaking in the same month, Hon. Nelson Dingley, the author of the so-called Dingley bill, made this observation:

The duty collected on sugar and molasses the last fiscal year was $55,975,610, or nearly 2 cents per pound. Adding to this the increased cost of 275,000,000 pounds of sugar produced in this country equivalent to the duty of 2 cents per pound and the duty imposed on these articles, was practically a tax of $63,500,000, or $1 per head on the people of this country.

Inasmuch as there is scarcely another article of common use not now on the free list which can not be produced or made here nearly or substantially to the extent of our wants, the transfer of sugar and molasses to the free list will afford conspicuous relief to the people of this country.

In the same debate the "sage of Danville," that splendid old Republican leader who presided over the House of Representatives for so long and whom, without respect to party alignment, men in both parties love—ex-Speaker JOSEPH G. CANNON—said:

Mr. Chairman, the placing of sugar on the free list will relieve each inhabitant, rich or poor, of $1 per annum of tax and at least 50 cents of extortion levied by the sugar refiners. The gentleman from California asks, Why give a pound to the producers of sugar in the United

States? Well, I answer my friend, I am not anxious to give a pound if you do not want it. My principal anxiety is to place sugar on the free list and relieve the people of this great burden of taxes.

On June 8, 1895, Senator William B. Allison, of Iowa, in speaking on the Senate amendment to the Wilson bill, said:

If I had my way, I would strike from this bill every vestige which provides a duty on sugar.

Mr. President, let me see what some of the sugar experts and the owners of large sugar interests say with respect to the tariff on sugar and how it affects the American user of sugar.

Mr. Wallace P. Willett, of the firm of Willett & Gray, reputed to be one of the greatest sugar statisticians in America, said:

All the analyses of changing from duty to free sugar show that whenever duty is taken off the cost of refining decreases, and when duty is added the cost of refining increases; but these analyses also show that whenever duty is taken off the consumer gets the full benefit of the amount of duty taken off and also a part of the lower cost of refining.

Mr. Henry C. Mott, buyer of raw sugar for the American Sugar Refining Co., has testified before congressional hearings that "the amount of duty is always charged to the consumer."

Mr. C. A. Spreckels, president of the Federal Sugar Refining Co., likewise has stated that—

to place sugar on the free list would reduce the price of sugar to the consumer by the amount of the duty.

Mr. Edwin F. Atkins, vice president American Sugar Refining Co., has testified that—

if we reduce the tariff on sugar, the effect will be to reduce the price of refined sugar practically by the amount of the reduction, always subject to the fluctuations of supply and demand for raw sugar.

Mr. Frank C. Lowery, an expert in the sugar business, asked as to whether or not the removal of the duty on sugar would guarantee the consumer the full benefit of such removal, replied:

Exactly, because then there would be no combination of dealers in this country, because they would have to compete with the dealers in other countries, and you can not get the dealers of the entire world into a combination.

Mr. Henry T. Oxnard, American Beet Sugar Refining Co., said that by—

admitting Hawaiian and Philippine sugar free the advantage was given to the Hawaiians and Filipinos rather than to anyone in the United States because the sugar people in Hawaii and the Philippines had simply increased their price just the amount of the duty removed.

Mr. President, I shall not, following that, read from the Republican campaign textbook and the Republican platform of two years ago, on which that great party went before the American people. Senators will recall that plank and what the Republicans promised to do not only with respect to decreasing the price of sugar to the consumer but with respect to decreasing the price of all other necessaries of life. Indeed, they inveighed against the high cost of living, and one of the promises they then made to the people above all others was that they would legislate to decrease the cost of living to them. Senators have heretofore seen the remarkable pamphlet—I have exhibited it upon the floor of the Senate, not in this debate but in other debates—which two years ago the Republican campaign committee had printed and distributed, especially dealing with sugar. I shall insert at this time in my remarks some of the passages from that remarkable document, merely to show that the Republicans promised to do everything within their power to bring sugar cheaply to the American consumer—

Those who hold in the hollow of their hands the supply of sugar know that the American people will buy it, no matter at what price it may be sold.

* * * * * * *

The results of this policy are painful in the extreme. Having in mind the total consumption of sugar in the United States, every time sugar is raised 1 cent per pound the American people are forced to take out of their pockets $90,000,000. * * *

The poor, plundered citizen, struggling to feed and clothe his family, naturally complains of the high cost of living. But it is better to think than to complain. Consider.

Indeed, the Republican Party were trying to force upon his mind at that time that what they were interested in was to give to the American consumer sugar at a reasonable price.

Mr. President, the domestic producers have always claimed that any proposed tariff rate upon sugar was ruinously low. That contention has been made at every step of legislation pertaining to the sugar question. It was made when it was proposed to permit Porto Rican sugar to come in free; it was also made when it was proposed to admit Hawaiian sugar to come into this country free of duty. Likewise when it was proposed to admit Philippine sugar free that proposal was strenuously opposed and it was prophesied that ruin would be the fate of American sugar producers; and 20 years or more ago, when a preferential of 20 per cent was given to Cuba upon sugars imported into this country from that island, then again prophecies were made that it would be ruinous to the sugar manufacturers and refiners of this country. I propose to show that none of those acts has been ruinous, and that the rate carried in this bill is entirely too high. I propose also to discuss a little later on, as I go along, what is proposed to be done with this rate on sugar. It is stated that an amendment will be offered, and a sufficient number of Senators, it is alleged, are pledged, to put over a proposal to impose a duty of 2 cents on sugar from Cuba.

It is a remarkable occurrence, Mr. President, although dire predictions were made about the industry when the Underwood tariff bill a few years ago proposing to reduce the tariff on sugar to 1 cent a pound was enacted, that the industry continued to prosper and declare unusual dividends.

When the emergency tariff bill was passed in May of last year increasing the tariff on sugar 60 per cent and making the Cuban rate 1.60 cents per pound against the 1-cent rate under the Underwood-Simmons law it meant that on the 4,500,000 tons we use annually the added cost to the consumers of America would be approximately $90,000,000. I want to impress upon the minds of Senators the thought that when the increase to 1.60 cents was provided on Cuban sugar in the emergency tariff act the argument was made that Cuban sugar would sell at 2 cents a pound, which, with the 1.60 cents duty proposed by the then emergency tariff bill, would make the price in the United States 3.60 cents a pound duty paid, and such a price, it was claimed, was needed to protect our domestic industry. That was the argument and that was the reason advanced for the proposal to put the additional sixty one-hundredths cent upon the 1-cent-a-pound rate carried in the Underwood bill, namely, that the price of sugar in Cuba would go very low—down to 2 cents, it was predicted—and that the American sugar interests needed the 3.60 to protect their industry in this country.

It did temporarily go to 2 cents at that time; indeed, I think it went just below that, but only for a short time. I shall show, however, how conditions have changed so that the situation which confronted the sugar interests in America at that time and which prevailed in Cuba at that time does not to-day confront us in the consideration of this question.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I would much prefer to wait until after I shall have finished, and then I will yield to any question. If, however, the Senator thinks it is better to ask the question now, I will yield.

Mr. NICHOLSON. I want to inform the Senator as to the reason why the price of sugar has advanced at this time. It is because of the fact that the American——

Mr. HARRISON. I am going to state that in the argument which I am about to make——

Mr. NICHOLSON. Will the Senator excuse me for just one moment?

Mr. HARRISON. And I am quite sure that then the Senator will concede that my statement is absolutely correct.

Mr. NICHOLSON. I want to give the Senator this thought, that the reason for the advance in the price of Cuban sugar at this time is that the American supply of beet sugar is off the market and wholly exhausted, and the Cubans, finding the American market stripped of its sugar, have raised the price, because they have no competition at this time.

Mr. HARRISON. I am coming to that proposition in a moment, and I am going to show that every reason argues against this increase at this time; that not only is the production of beet sugar in this country lower this year, according to the estimates, than it was last year and the year before but that the production of Cuban sugar is about normal; that the surplus which was piled up in Cuba and stored away at the time of the passage of the emergency tariff bill has now been sold and is not on the market; that there is now no reason for any high tariff; and that no duty at all is needed at this time to protect the beet-sugar interests of this country. I shall show further, as the Senator from Utah admits, that all that is needed is 1.4 cents, and if the position of the Senator from Utah is to be followed, and he has any influence on the other side, Senators over there will stand with him in his contention for 1.4 cents a pound on sugar as a sufficient protection for the sugar interests of this country.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Texas?

Mr. HARRISON. I yield.

Mr. SHEPPARD. What is the total increase proposed by the Senate Finance Committee?

Mr. HARRISON. The Underwood law carried, as the Senator is aware, a duty of 1 cent a pound on Cuban sugar. The emergency tariff bill last year increased it to 1.6 cents a pound. This bill retains on raw sugar from Cuba the same rate that was provided for in the emergency tariff bill. It increases the rate over the Underwood bill from 1 cent to 1.6 cents a pound; but it is proposed to offer an amendment, and if reports are true Senators to the number of over 50 have signed up to vote for it, to provide for 2 cents a pound on Cuban sugar.

Mr. SHEPPARD. The rate on Cuban sugar is 20 per cent lower than the rate on other sugar, is it not?

Mr. HARRISON. Absolutely. They get a preferential of 20 per cent.

Mr. NICHOLSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I yield.

Mr. NICHOLSON. The Senator from Mississippi states that a certain number of Senators here have "signed up" for a 2-cent duty. If such a situation exists on our side of the Chamber, I certainly know nothing about it.

Mr. HARRISON. I do not think they would let the Senator into a scheme like that. He is one of the few fellows they would not take in.

Mr. SMOOT. I have not heard of it.

Mr. BROUSSARD. Mr. President, if I may speak for this side, there are not a sufficient number——

Mr. HARRISON. I know that on this side none have signed up.

Mr. FRELINGHUYSEN. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from New Jersey?

Mr. HARRISON. Yes; I yield.

Mr. FRELINGHUYSEN. The Senator states that over 50 Senators have "signed up"——

Mr. HARRISON. I say it is a rumor that is afloat around here that they have signed up, or that a poll has been taken.

Mr. FRELINGHUYSEN. Oh, a rumor?

Mr. HARRISON. Yes. I will ask the Senator if he has not heard that that is a fact?

Mr. FRELINGHUYSEN. No; I have not.

Mr. HARRISON. It has not been discussed, and Senators have not in part agreed or have been polled that they would vote for an amendment making the duty on Cuban sugar 2 cents a pound?

Mr. FRELINGHUYSEN. No; I have not heard of it; and I think, in fairness to the Senators here who are trying to consider this question from the standpoint of fairness, that if the Senator makes a statement of that character he should give names, because it is a very serious charge.

Mr. HARRISON. The only reason why the Senator does not know about it is that he has not been here.

Mr. FRELINGHUYSEN. I have been here, sir, and I think that when the Senator impugns the motives of any Senator on this floor from the standpoint of a rumor he is unfair to his colleagues in this Chamber.

Mr. HARRISON. I am not impugning anybody's motive simply because he agrees to support a 2-cent amendment on sugar. If it is so wrong, if it is such a crime as the Senator thinks it is, he certainly ought not to vote for 1.6 cents a pound on sugar.

Mr. FRELINGHUYSEN. Why is the Senator making the charge, then?

Mr. HARRISON. I do not make it as a charge. I simply state that rumors to that effect are afloat. We hear it said every day that an amendment is going to be offered to increase a rate to a certain amount. There is nothing particularly in that proposition. The Senator should not become so much aroused. He has cast many votes during the consideration of the bill that perhaps were just as reprehensible and indefensible.

I can understand why certain Senators would be in favor of 2 cents as against 1.6 cents a pound. I do not see any reason why the Senator should become excited on that proposition.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi further yield to the Senator from New Jersey?

Mr. HARRISON. I do.

Mr. FRELINGHUYSEN. The Senator is making an attack——

Mr. HARRISON. An attack? No, indeed. Wait until I shoot before the Senator jumps——

Mr. FRELINGHUYSEN. He is making an attack on those Senators who are standing for a certain rate of duty, and he charges that there is a rumor that Senators have "signed up" or formed a conspiracy for a higher rate of duty. I think that is in the nature of a charge, impugning the motives of Senators; but inasmuch as the Senator says that it is only a statement and it is only a rumor, I do not think it is very serious.

Mr. HARRISON. No; it is not particularly serious in the opinion of Senators over there. Their hearts are so hardened and their consciences so unmoved by any proposition, no matter how bad it might be, that merely to agree upon offering and standing for an amendment for 2 cents a pound on sugar ought not to ruffle your feelings at all. The Senator takes it too seriously. I do not know whether the Senator voted in the committee for 1.6 cents or not. I imagine that he did not, in view of what he says, because he says that it would be a conspiracy if Senators had signed up or had agreed to support a duty of 2 cents a pound on Cuban sugar. If he thinks that that is a conspiracy and that anyone who might state it as a rumor has made a very serious charge, impugning the motives of Senators, I take it that he did not vote in the Finance Committee for the 1.6 cents rate that was adopted by the committee. Did the Senator vote, may I ask, for the 1.6 cents?

Mr. FRELINGHUYSEN. I did.

Mr. HARRISON. All right. Now, Mr. President, I will pass from that.

Without discussing the merits of this claim, the fact is that Cuban sugar for a short time did sell for 2 cents a pound; but such a low price was only temporary, as I have stated. Prices followed the natural course, and last week sugar sold in Cuba in some instances at 3½ cents a pound. That price, with 1.6 cents duty, makes the duty-paid price in the United States 5.1 cents a pound, instead of 3.6 cents a pound, the price that it was claimed the domestic trade needed, the price that was said by those on the other side when the emergency tariff bill was up to be necessary to protect the sugar interests of America—namely, that the price in Cuba would go to 2 cents, and you needed 1.6 cents a pound protection, making the price of Cuban sugar 3.6 cents a pound, in order for the industry in this country to live; and yet if you put the price at which it sells to-day in Cuba at 3.5 cents and add even the 1 cent proposed in the Underwood bill you have 4.5 cents a pound, much more protection than you on the other side, when you passed the emergency tariff bill, said was needed to protect the sugar interests of America.

May I say in that connection, Mr. President, that that claim was made at a time when the cost of labor was higher than it is to-day? The Tariff Commission says that the cost of making sugar in the United States this year is from 5 to 10 per cent lower than the cost of making it last year in this country. If to the present price of sugar in Cuba—namely, 3.5 cents a pound—there should be added the duty of 2 cents that is suggested here, we would have a price range in America of over 2 cents a pound more than those who championed the emergency tariff bill said the sugar industry of America needed to sustain it.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. Yes; I yield to the Senator.

Mr. NICHOLSON. I take it that the Senator from Mississippi wants to discuss this question in an honest, straightforward way.

Mr. HARRISON. I thought I was doing that.

Mr. NICHOLSON. Yes; I say, I take it that the Senator is. Now, I take it that the information which the Senator is trying to convey in his speech is not correct—that is, it is correct from the Senator's viewpoint—but he will admit that while the sugar interests of the United States last year were producing sugar at the price the Senator mentions, every factory and every refinery was practically bankrupt, and likewise the farmers; so that it is not possible for sugar to be produced in the United States at the cost at which it was produced last year. The Senator will admit that the farmers have borrowed large sums of money, from seven to eight hundred million dollars. I doubt if there are any beet-sugar companies in the United States that were not compelled to mortgage their factories. I will admit that the cane-sugar factories made money on Cuban sugar.

Mr. HARRISON. I will say to the Senator that I have just stated that the cost of manufacturing sugar in the United States out of sugar beets this year is from 5 to 10 per cent lower than it was last year. I think the Senator will admit that.

Mr. NICHOLSON. I think probably that is true.

Mr. HARRISON. That is true; and the Senator ought to admit, because he was here and he heard the arguments proposed in putting over the emergency tariff bill, that the reason

for the increase of six-tenths of a cent a pound as an emergency measure was because it was predicted that Cuban sugars would drop to 2 cents a pound, and that 1.6 cents a pound protection was needed for the time in order to let the interest in this country survive; and notwithstanding that you have to-day in this country 2 cents more than that in order to protect the American interest you are yelling, pleading for still more protection against the American consumer.

Mr. NICHOLSON. Just a moment in reply to that statement. The Senator's statement is correct in part——

Mr. HARRISON. I am glad the Senator admits that much.

Mr. NICHOLSON. In this, that when the emergency tariff bill was passed there was a great quantity of home-produced sugar on the market. At that time, Cuban sugar was selling at the price which the Senator indicates; but after our supply of domestic sugar has been exhausted the Cuban comes on to the market with his sugar and raises the price. Hence, it seems to me that that in itself is a sufficient reason why we should have protection, in order to raise our sugar at home, and not be at the mercy of the Cuban sugar growers.

Mr. HARRISON. The Senator has made exactly the argument that I am going to show a little later on was made to certain officials of Cuba in order to get them to restrict their crop to two and a half million tons—something that no Senator here will dare to excuse—and that was the argument that was offered, not by the Senator, because he would not, but that subtle argument, that persuasive way of putting it, led the Cubans into the belief that it was the best thing for them to do. I will get to that point a little later on. That, perhaps, will be a little more interesting to some of the Senators. What I am discussing now are the facts, because the facts are not what the Senators on the other side of the Chamber want in dealing with this very important question.

Domestic sugar production is not an infant industry, but one of many years' standing that is thoroughly organized. It is in a position to serve the American people to advantage if not allowed to dictate its own terms to the disadvantage of the consumer as to other equally important industries. I could cite to the Senate the many large dividends that have been declared and the increase in the capital stock of the big refiners and the beet-sugar interests in America up until the late Great War broke out. I shall not, however, trespass too much upon the time of the Senate or the patience of Senators; but I am going to read some figures to the Senate to show how these poor little infant industries, these suckling babes who they say can hardly live on this enormous duty that they have already given to protect them, survived, prospered, and bled like leeches the American consumers in exacting from them high and conscienceless profits in the past, raising just when they desired it the price of sugar to the little babe that needed it or to the old woman who sought it or to the confectionery concerns that desired it in their business. It was in their power through this practice. They increased the price, and they made large profits; and I am going to show the Senator from Colorado, even though I can not reach his ears—he asks me a question, and then he leaves the Chamber, but I hope he can read it in the CONGRESSIONAL RECORD to-morrow—something about these little, petted infants that they say need protection.

Let us take first the American Beet Sugar Co., this little infant that is said to need some protection. It has capital stock of $20,000,000—$15,000,000 of common stock and $5,000,000 of preferred stock. In 1915 its net earnings were $1,424,000. It declared that year a dividend on its preferred stock of $300,000. It paid nothing on its common stock that year, but paid $300,000 on its preferred stock.

The interest on its preferred stock was 28 per cent and on its common stock 7 per cent. In 1916 its net earnings were $2,445,000. That year it declared a dividend on its common stock of $900,000 and on its preferred stock of $300,000. On its preferred stock it earned 48 per cent and on its common stock 14 per cent. Yet it is a little infant which needs more protection.

In 1917 it declared dividends on its preferred stock of $300,000 and on its common stock of $3,000,000. It earned dividends on its preferred stock of 97 per cent and on its common stock of 30 per cent.

Mr. NICHOLSON. What year was that?

Mr. HARRISON. That was 1917. In 1921 it declared a dividend on its preferred stock of $300,000. Yet they say the little infant needs some more milk.

Mr. STERLING. Mr. President, will the Senator state what percentage on the capital stock that dividend amounts to?

Mr. HARRISON. In 1921?

Mr. STERLING. In 1921.

Mr. HARRISON. Six per cent. I am sure there are farmers in the Senator's State and in Colorado, and other interests out there, that instead of making 6 per cent that year lost almost 50 per cent of the valuation of their holdings. I think it is remarkable that in 1921 an institution could have made 6 per cent when almost everbody else was losing money. But it was expected they would lose money, because the Republican Party came into control of the Government and confidence was shattered and general depression ensued.

Mr. STERLING. Will the Senator permit a suggestion?

Mr. HARRISON. Certainly.

Mr. NICHOLSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I yield.

Mr. NICHOLSON. The Senator has cited the profits made in 1916, 1917, and 1918 by the sugar companies. It is true that they made enormous profits. They were permitted at that time to profiteer at will. But when a change came over the situation of course their profits were reduced to normal.

Mr. HARRISON. Yes; and the Senator now wants to help them again to gouge and profiteer.

Mr. NICHOLSON. Not at all. I want to do something for the farmer.

Mr. HARRISON. I am going to show the Senator that he is not doing anything for the farmer.

Mr. NICHOLSON. I shall show that we are.

Mr. HARRISON. I am going to demonstrate to the Senator, before I shall have finished, that the House sought, for the first time when writing a tariff bill, to put a duty on sugar-beet seed. The Senator from Utah and the Finance Committee were generous in one thing. They showed wisdom in that particular. That is about the only instance I can recall where their hearts went out for the farmer. They did not ratify what the Ways and Means Committee of the House had done in that particular, by putting a duty upon sugar-beet seed. They took the duty off and put sugar-beet seed on the free list. But do you know what this concern, the American Beet Sugar Co., does? It sells to the American farmer at a higher price than is charged to the German farmer for sugar-beet seed. Not only that, they pay for beets a much lower price than is paid by the German sugar manufacturer, and, at the same time, they put in this bill no increased duty on sugar beets for the farmer. You are not looking after the farmer in the imposition of this higher rate; you are looking after the man who gouges the farmer.

The Utah-Idaho Sugar Co., a big company, is a remarkable concern. Let us see what they have done. That is the company in which, in a colloquy a few days ago, the Senator from Utah [Mr. SMOOT] said he had 440 shares.

Mr. SMOOT. Worth $3 and something a share.

Mr. HARRISON. On July 25 of this year, in a colloquy with Senator WALSH of Massachusetts, the Senator from Utah [Mr. SMOOT] said:

> I have 440 shares of Utah-Idaho Sugar Co. stock that I bought in the plant in Idaho years ago.

Let us see what that concern is doing. In May, 1917, a stock dividend of 150 per cent was paid on the capital stock of $10,000,000. The outstanding capital stock is $23,730,000.

Mr. CARAWAY. May I ask the Senator if, by paying that stock dividend, they did not avoid paying an excess-profits tax?

Mr. HARRISON. I presume they did. I expect they had some pretty good lawyers, and pretty good advisers, and pretty good trustees, who were advising that deal, and looking after the interests of that institution.

Let us take the Great Western Sugar Co. It operates 16 big sugar factories. Its capital stock, common, is $15,000,000, and its preferred $13,630,000. In 1916 it paid a dividend on its preferred stock of $954,000, and on its common stock of $1,050,000. In 1918 it declared a dividend on its preferred stock of $954,000 and on its common stock of $7,050,000. In 1921 this concern declared a dividend of $954,000 on its preferred and $2,662,000 on its common. It declared a dividend on its preferred of 7 per cent and on its common of 17½ per cent.

Mr. CALDER. Was that last year?

Mr. HARRISON. That was 1921. Yet this is a little, weak infant which needs milk.

Mr. CALDER. What company was that?

Mr. HARRISON. That was the Great Western Sugar Co.

Mr. NICHOLSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I yield, if the Senator can explain how they made so much under the circumstances.

Mr. NICHOLSON. I am perfectly willing to explain why they made so much. It was because the party which is not now in power permitted unconscionable profiteering. If the Senator at that time had had the interests of the farmer and of the consumer at heart, as he pretends to have to-day, would that have been permitted? He was not here at that time talking against unconscionable profiteering as he is to-day.

Mr. HARRISON. Before the Senator proceeds——

Mr. NICHOLSON. As to the Great Western Sugar Co., it is true that during the war they made the profits of which the Senator speaks. I do not deny that.

Mr. HARRISON. I read the figures for 1921.

Mr. NICHOLSON. Who are the owners of that Great Western Sugar Co. of which the Senator speaks? It is currently reported that it is largely controlled by refiners of cane sugar, who have a greater interest in Cuba than they have in this country.

Mr. HARRISON. The Senator a moment ago said that the reason why they were making such profits was that the Democrats had come into control, and I have just shown that that big profit was made in 1921, when the Republican Party controlled.

Mr. NICHOLSON. But there is a great difference between $2,000,000 and $7,000,000, which was paid on the common stock.

Mr. HARRISON. The Senator is a little inconsistent, but he is about as consistent as he generally is upon these big questions. Anyone who attempts to defend this iniquitous proposition will find himself in a hole. He will think he is going in when he is coming out, and he will get lost in the maze of what is being attempted. It is enough to cause one to lose his head.

Let us take the Amalgamated Sugar Co. It operates eight beet-sugar factories in Utah and Idaho. In 1917 its net earnings were $2,680,000. It declared a dividend of $698,000. In 1921 the amount of dividend that was paid was $394,000. It was doing pretty well. But it is a little infant, which needs a little more milk in the way of a larger tariff duty upon sugar.

Let us see what happened in addition to that. Prior to 1919 the only outstanding stock of the Amalgamated Sugar Co. was $5,824,000. At that time it was increased to $6,824,000, and $4,833,000 preferred was issued.

There is no use reading of these various big concerns which are making all this money at the expense of the American people, and which, if rumor is to be believed, have 52 Senators here who say they are going to vote for increasing the rate to 2 cents.

Mr. CARAWAY. Mr. President, I heard the Senator's statement awhile ago that there were 52 who had signed. I wonder if he was not mistaken. Was not a poll made of the Senate, and were there not 51 who agreed to stand for this plunderbund?

Mr. HARRISON. That is the rumor; whether it was 51 or 52 I do not know.

We have heard much recently from Senators on the other side against importers of this country making huge profits on certain articles imported from Germany. Let me give an illustration of profiteering upon the part of these interests for whom favoritism is sought in the sale and importation of their products.

For example, to-day the domestic price of Cuban sugar, that is, the price for which it is selling, is 3 cents, cost and freight; the duty is 1.50 and the insurance is 0.015, making a total of 4.615 cents. Raw sugars from the Philippines, Porto Rico, and Hawaii pay no duty, but sell on the duty-paid basis, that is, 4.615 cents. To this should be added the refiners' margin to cover cost and profit, which is approximately 1.265 cents. And to this should be added 2 per cent cash discount, making a total of 6 cents. That is the amount on which to-day's quotations for granulated sugar of 6 cents, as well as 2 per cent, is arrived at, and the sugar producer bases his quotations on the cane-sugar price.

Now, let us see, as to the export price. At the same net basis for granulated, that is, 5.88 cents per pound, deduct the drawback on refining, which is approximately 1.58 cents, and we arrive at the present quotation for export, 4.30 cents.

This is a sample of how the tariff is reflected in the price of domestic sugar, and from this it will be seen that when a refiner sells for export at 4.30 cents, his position and the raw-sugar producer's position are the same as though the sugar were sold in the domestic market at 6 cents cash less 2 per cent.

What about the German exporter who gets 4.45 cents per pound delivered at Hamburg, who is buying sugar that is grown on the same plantation, refined in the same American refinery as the sugar that is being sold in Chicago at 6 cents cash less 2 per cent. The only difference is that our protective tariff is reflected in the price the housewife in Chicago pays, while, of course, it is very probably not reflected in the price of sugar that has been exported. With this difference on the four and a half million tons of refined sugar that we will use this year our consumers are being taxed at the rate of $169,344,000 annually.

Mr. President, in the year 1920–21 in Cuba there was produced approximately 3,926,000 tons of sugar. Of beet and cane sugar there were produced that year 969,000 tons. In 1921–22 the amount was 911,000 tons. This year the beet sugar in the United States, according to the estimate of the Federal Tariff Commission, is 586,000 tons, a dropping off of over 300,000 tons, showing a shortage, a great shortage, according to the estimate, in the beet-sugar production in the United States this year. It will be noted, therefore, that if the other countries from which we get sugar yield approximately as much as they did last year there will be a shortage in the sugar production for this year, and that alone will necessarily cause an increase in the price of sugar.

But let me state further that Cuba this year shipped to the United States, up to July 1, approximately 2,645,592 tons. If her crop had been restricted to 2,500,000 tons, according to the letter which I hope the Senator from Utah [Mr. SMOOT] will produce before the debate to-day is over, with the 1,200,000 tons estimated was carried over, it would have given her a total this year of 3,700,000 tons, the entire supply being cleaned up practically by July 1. In other words, if the agreement that was suggested of limiting the production of sugar in Cuba to 2,500,000 pounds was carried out, there would now be such a shortage in this country that speculation would ensue and the prices would go sky high. There would be no curtailing it, no holding it down at all, no protection for the American consumer.

Mr. NICHOLSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. Yes; I yield.

Mr. NICHOLSON. If the statement made by the Senator be correct, that the production of beet sugar in the United States has declined from 800,000 or 900,000 tons to about 500,000 tons, I think that the Senator will be fair enough to admit that the Cubans, realizing that fact and finding that the American consumers are entirely at their mercy, are now raising the price, and will continue to raise it, as they did in 1920, when they thought the American consumer could not obtain sugar anywhere else. They raised the price to 22 cents at that time. I think the Senator from Mississippi is making the very best possible argument in favor of protection for the American producer.

Mr. HARRISON. I am glad the Senator likes it. If he will stay with me, I will give him more of it, because I have some really good stuff to come a little later. I hope the Senator will continue to agree with me.

It is known that our importations from Cuba are on an average about 2,500,000 tons annually. We can not lose sight of the fact that, therefore, the increased tariff or any tariff will cost the American people twice the amount that will go into the Treasury. If it costs the American consumer $140,000,000 a year, it will mean that only $70,000,000 a year will go into the American Treasury. If we raise out of the sugar tariff $90,000,000 of revenue, it will cost the American consumer about $180,000,000.

The 10-year pre-war average selling price——

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Louisiana?

Mr. HARRISON. I yield.

Mr. BROUSSARD. If the argument of the Senator is that the duty is added to the price, how can the Senator explain that when sugar was placed on the free list in 1890 the price of sugar went up and remained up until 1894, when there was a duty of 0.84 cent placed on the sugar, and then it went down and remained down as long as that duty remained on sugar? How can the Senator explain that when the emergency tariff law was enacted the price of sugar went down and has remained down ever since?

Mr. HARRISON. I do not know whether the Senator was here during the earlier part of my speech. I did not read from Democratic leaders in the past as to how the tariff rate affected it, but I did read from Republican leaders, from McKinley and Dingley on down to JOE CANNON and Allison, and I could have encumbered the RECORD with many other utterances of distinguished tariff leaders and experts in the Republican Party. But may I say to the Senator, of course, that the rules they laid down and the proposition that I am making that the duty on sugar is reflected to the American consumer apply when there are normal conditions, when there is approximately

a normal yield of sugar in the various countries from which we imported and in this country, namely, Porto Rico, Hawaii, Philippines, Cuba, and in our domestic cane-sugar and beet-sugar sections. Last year the emergency tariff bill was before the Senate for consideration, and that was the reason why Cuba paid the rate last year. That is very true. It was because of the enormous surplus that was on hand in Cuba at that time.

Mr. BROUSSARD. Then, if I understand the Senator, his statement that the duty is to be added to the price is not correct, since he now finds other reasons that affect the price.

Mr. HARRISON. The Senator certainly did not understand me. I said under normal conditions that was the universal rule. I produced the testimony of Republican leaders and experts on the tariff to show that. The reason why I say there is any exception to the rule is because there might have been abnormal conditions at that time. At this time, instead of there being a surplus in Cuba, from which country we get our enormous supply and which we are compelled to obtain, there is no surplus. In other words, there is, if anything, a shortage in Cuba at this time. There is a short crop in this country.

Mr. BROUSSARD. May I say to the Senator that I expect to follow him, and I want to say now that I expect to argue that at the time the expressions were given by the leaders to whom he referred the world market was Hamburg, but it is now New York, and that makes a difference. The freight and the cost, including the duty, must be added in order to bring the sugar to meet the world market at New York, and therefore the foreign producer must absorb the duty.

Mr. HARRISON. I hope the Senator from Louisiana, in whom I have such confidence and for whom I have such a high regard—in fact, it is so great and so constant that I almost love him—will not expect me to possess the logic or the superhuman force or the facts ever to convince him of the correctness of my view on the sugar question. That is an utter impossibility. I surrender to him now. I throw up the white flag. It is "out of the question." I give up.

Mr. BROUSSARD. I merely want to explain that I made this statement in order that the Senator might meet the argument at this time.

Mr. HARRISON. Now, Mr. President, going further, it is generally understood that on a proper basis of cost accounting it would take approximately 2½ cents f. o. b. Cuba to give the factories a fair return. At any rate, let us take that as a basis. Therefore, in determining where the domestic industry would stand in competition with Cuba, we can analyze the following figures, for example:

Cost f. o. b. Cuba	$0.035
Freight and insurance to refining centers	.0018
Present duty	.016
Refiners' cost and profit	.01
Making a total of	.0628

To the $0.0628 per pound should be added such protection, it matters not how insignificant, which the beet interests would receive through the freight rates—from seaboard points to the interior—giving them a minimum price of more than 6 cents to figure on. It will be seen, therefore, that it is reasonable to suppose that any beet-sugar factory that pays $5.50 per ton for sugar beets can make a reasonable profit at a great deal less than 6 cents per pound.

To put any industry on a cost-plus basis—that is, take any cost and simply add anything necessary for protection—will encourage inefficiency. Therefore, if you are going to have protection, we should determine a fair cost of production and put it up to the industry to manufacture at that figure.

Our trade with Cuba in 1920 amounted to $515,000,000. That was the value of our exports to Cuba. Since then naturally they have fallen off, but there is an enormous trade between the United States and Cuba. Indeed, Cuba obtains from our industries more of the things that she consumes and needs than from any other country. But we can not expect to maintain a trade balance with Cuba and to retain that sweet and pleasant trade relationship with that little country if we are going to erect against her chief product a wall so high that she can not pay us with it.

Mr. President, the Senator from Colorado [Mr. NICHOLSON] a moment ago said that this was in the interest of the American sugar farmer—and I imagine he wanted to include the laborer as well. It is quite true that there is a great deal of hand labor in the cultivation of sugar beets, and this is one reason why the American farmer, so accustomed to and fitted for extensive cultivation, does not take to it readily, although he is exceptionally well favored by climatic conditions and the quality of the soil.

Yet, as I have said, in the bill before the Senate, while it is proposed to levy this high and exorbitant tariff on sugar, it was proposed to levy a tariff on sugar-beet seed, the product he must have.

On sugar beets coming into this country in competition, under the arguments of Senators over there, approximately the same duty is levied as carried heretofore. In other words, they sought on many agricultural products to give him an increased protection which was in practically all instances fictitious and artificial and hypocritical; but the beet farmer, the man who actually raises the beets, the fellow who it is claimed the Senator wants these high duties in order to help, was overlooked in that particular.

May I suggest to the Senator from Colorado and to the Senate generally that under the Underwood bill the farmer in 1911 received for his beets $5.50 a ton. In 1912 he received $5.82; in 1913 he received $5.69; in 1914, $5.45; in 1915, $5.67. To-day, with the present high rate carried in the emergency tariff law, they offer him $5 to $5.50 for his beets. Why, only recently, if the report is correct, there was a general cut on sugar beets throughout the sugar-beet section.

Mr. NICHOLSON. Mr. President——

Mr. HARRISON. I yield to the Senator from Colorado.

Mr. NICHOLSON. The sugar contract has been changed so that the farmer is paid now based upon the saccharine content in the beet and the price of sugar. The price of sugar and the saccharine content of the beet are the basis of pay. So the information which the Senator from Mississippi has before him is rather misleading.

Mr. HARRISON. If it is misleading, the Tariff Commission misled me. I told them not to give me any of these "high-falutin" terms, but to give me something in dollars and cents, something that the average person can understand and appreciate. They gave me the information that there had been a cut in the price of beets, and that the price that the sugar beet manufacturers were offering to the beet farmer is from $5 to $5.50 per ton.

May I say, too, before I leave this point that I do not blame the committee for changing the measurements, and I do not blame the sugar manufacturers for employing another rule by which they may purchase the beets. It is the same operation that the Senator's crowd—I will not include him in it—the Senator's colleagues in writing the bill have attempted to apply. He will recall that the old obnoxious Schedule K, which stunk to high heaven, was changed in its name, but it did not remove the stench that attached to it. So the Senator's crowd, the beet manufacturers of the country, seek to change the measurements; they seek to give a price according to the amount of saccharine that is in the beets so that they can cover up that they are paying less to-day for their sugar beets to the American sugar beet farmer than they ever did before. While they are doing that, at the same time they have caused to be imposed a higher duty on Cuban sugars that are imported into this country.

Mr. NICHOLSON. Mr. President, if the Senator from Mississippi will once more yield, I desire to say that the Senator has failed to quote the price which the farmer, when sugar was selling at 22½ cents, received for his beets, namely, $12 a ton. Has the Senator that information before him?

Mr. HARRISON. I have not that information, but the Senator from Colorado may put it in, and I shall be glad to have it.

Mr. NICHOLSON. The Tariff Commission has that information, and it is a matter of general knowledge that the beet growers of the United States then received $12 per ton as the price for their beets.

Mr. HARRISON. That does not help the Senator's argument any.

Mr. NICHOLSON. Except to the extent that I am trying to convince the Senator and to show him that the price of beets is dependent upon the price of sugar to a great extent.

Mr. HARRISON. But I was trying to show to the Senator and to the Senate that the farmers, whom the Senator seeks to help, are to receive from the big interests, which are to be accorded the protection, less for their sugar beets this year than they received last year. The Senator from Colorado does not controvert that statement, and I do not blame him for not doing so.

Mr. NICHOLSON. I think the Senator should readily understand that is not correct.

Mr. HARRISON. The Tariff Commission, then, is not correct.

Mr. NICHOLSON. I can not help what statements have been made by the Tariff Commission relative to the question; but it is a generally known fact that the prices which the farmers obtained for beets last year and this year are relatively the same.

Mr. HARRISON. The Senator will have to fuss with some one else instead of me on that proposition.

Mr. President, I am now coming down to the proposition about which I wish Senators could hear the facts. Of course, if Senators wish to vote for this high rate without knowing what is behind it, without knowing the stain that will attach to this country in the imposition of this duty, well and good, they may do so; but I expect to lay before the Senate the facts that are connected with this sugar schedule; and if Senators vote for the amendment which is to be proposed making the duty 2 cents a pound on Cuban raw sugar or vote for the duty of 1.6, they will have to answer to their constituents in the coming election.

I expect to lay the facts before the Senate, even though some Senators will not remain and listen to the discussion, and, perhaps, will not do so because they might be led to violate—I will not say a pledge but the implied promise which they have made that they were going to vote for the 2-cent duty amendment when it is proposed. I say to the absent Senators, however, that they should be here and they should inform themselves about what has been happening in connection with the sugar question. One of the blackest pages that has been written in our relationship with Cuba has been written touching the sugar schedule. It is a proposition which calls for explanation, and the American people will not be satisfied until explanation is forthcoming.

I have shown, Mr. President, that when the emergency tariff bill was put through Congress the argument made and the reason given therefor was that the price of sugar in Cuba would go to 2 cents a pound, and that sugar growers here needed 1.6 cents protection, which made 3.6 cents, in order that the industry here should survive. I have also shown that to-day sugar is selling in Cuba for 3½ cents a pound, and even with the rate in the Underwood law of 1 cent a pound, that would make the price nearly 4½ cents a pound, giving nearly 1 cent more protection than the American sugar manufacturers said they needed last year in order to protect themselves.

Do you know, Mr. President, that immediately following the passage of the emergency tariff bill last year the people of Cuba were aroused, and they sent a commission to this country to protest against the very high rate imposed on sugar, namely, 1.60 cents? Do you know that they had a conference in this country in which protest was made against it, and that the representatives of this Government said to them when they made the protest, "If you will reduce the production of your crop of sugar to two and one-half million tons a year, it may be that then we can give you some relief"? Then the commission went back to Cuba and reported that fact to the President of that fine little island in the Antilles, and he informed the lawmaking body of Cuba of the suggestion that had come from Cuba's former mother country. They said in answer to his request, "We can not restrict the crop now; already contracts have been entered into and it is too late." They also said, "We have not received the suggestion in a thoroughly official form; you have heard it, but it has only been in conversations, and so forth." So for the time being production went on. In a little while, however, the Government of the United States appointed General Crowder to go to Cuba in order to help Cuba solve its economic problems. He worked among them, it is said, and the question of sugar was one of the problems which he took up. Then he went to the Cuban authorities with a letter which he had received and which evidently was an official letter, according to all the reports, although I do not know as to that. The letter, however, to General Crowder was from one high up in the legislative councils of this country, one who, after March 4, will occupy the highest position in this Chamber, so far as committee assignments are concerned, one who has been the champion of the imposition of sugar duties for many years upon the floor of the Senate, one who in a debate said he owned 430 shares of Utah-Idaho Sugar Co. stock, one who was the most influential personage and character in the writing of the pending tariff bill.

The senior Senator from Utah [Mr. SMOOT], the coming chairman of the Finance Committee of the Senate, wrote this letter to General Crowder, proposing that, if Cuba would reduce her crop to two and a half million tons, this country then would take under consideration the maintenance of or a reduction in the present rate on sugar. Let me read, Mr. President, in this connection what the American committee on Cuban emergency said about it:

> No formal proposal being received by the Cuban Government, the crop started with no restrictions, but about the middle of February this identical proposition was again brought to the attention of the Cuban Government; this time by what was tantamount to official action of the United States Government. The President of Cuba called a conference of the House and the Senate and laid the proposition before them.

Mr. Reubens, the chairman of the American committee on Cuban emergency, was interviewed on what happened after the President of Cuba notified General Crowder that the Smoot plan could not be met for 1922, as the crop was already in. Here is what he said:

> Here the matter stands, except that one outstanding fact has been admitted by this proposal to the Cuban Government, namely, that the offer to reduce the 1.6-cent rate on Cuban sugar to 1.4 cents in the permanent tariff is a frank admission that the former rate is too high and unnecessary as a permanent protection to American-produced sugars.

Mr. President, I have not that letter. I asked the Senator from Utah some weeks ago if he would produce the letter. He said he had the letter, and that it would be produced in due time. I am sorry that I have not that letter now in my possession in order that I might analyze its terms; but I have not. I will, however, if the Senator from Utah does not produce it at this time, assume to be correct the statement which has been made and universally accepted and carried in the press and reiterated by the Cuban authorities, namely, that the letter stated that if the Cubans would reduce their crop of sugar to two and a half million tons this year, a rate of 1.4 cents per pound upon Cuban sugar might be imposed by the Congress of the United States. I pause and await upon the Senator from Utah for a reply. Then I take it that that is practically the substance of the letter, unless the Senator now tells me differently.

> The impression thus created is most unfortunate. The Cuban Government having received a formal promise of a permanent rate of 1.4 cents, if the present crop were restricted, naturally was led to believe that the Congress of the United States would be ready to legislate to apply this rate.
>
> Unthinkable as the threat to raise the duty beyond the Fordney rate, not as a measure of protection to an American industry but as a punitive measure, permanent in character, for the failure of Cuba to accept at the eleventh hour a proposal which was not made until apparently too late for legal or practical acceptance.
>
> The Cubans have shown that they are disposed to accept the force of reason, but they would not be human beings if they were disposed to accept the reason of force. Attempted punitive measures will not aid American trade in Cuba.

Now I want to read what the Mercurio, one of the big papers in Habana, said about this proposition. This was on April 20 of this year. The Mercurio published this editorial on that date:

> The reports of the Cuban commercial commission attracted the attention of the Mercurio because the names of the American members were not mentioned in it. Therefore the Mercurio, always fighting to defend the interests of Cuban commerce and of the Cuban people, began a campaign of investigation.
>
> It first questioned members of the commission and published their replies as received. The first answers were courteous, but the Cuban commissioners thought themselves under obligations to withhold the names of the American members and therefore refused to furnish the Mercurio with the information. Dr. Gonzalo Freyre, although withholding the names, intimated that some one in the American Legation had worked to obtain the acceptance of the terms proposed by the Americans.
>
> Following this indication, the Mercurio sent reporters to Mr. Cable, the American chargé d'affaires; to the commercial attaché, and to General Crowder. Mr. Cable stated that the American Legation could not furnish such information; the commercial attaché said he knew nothing of the matter; General Crowder replied that because of the nature of his duty it was impossible for him to answer.
>
> The Mercurio interviewed Señor Gelabert and Señor Portuondo, but could not get the names of the Americans. At the last moment Doctor Ferrara sent a statement to the effect that the offer had been made by Senator SMOOT.
>
> The New York World, following this trail, has learned that Senator SMOOT made the proposition in a letter, and that General Crowder has done all that is possible to obtain the arrangements proposed by Senator SMOOT.

So, there you are. The representative of the American Government in Cuba, General Crowder, sent there to help them solve their financial and economic problems, is given a letter by the coming chairman of the Finance Committee to be used, I take it, as official to get the Cuban sugar-cane producers, backed by the Cuban Government, to reduce the production of sugar to two and one-half million tons this year on the condition that if they will do so this Government will reduce its rate on Cuban sugar from 1.6 cents a pound to 1.4 cents a pound.

Ah, Mr. President, if 1.4 cents a pound, according to the Senator from Utah, was sufficient permanent protection on Cuban sugars, provided just for this current year Cuba should reduce her crop to two and one-half million tons, how can you, may I ask the Senator from Colorado [Mr. NICHOLSON]—who is always fair and wants to do the right thing—how can you and your colleagues here vote for a tariff of 1.6 cents per pound as a permanent tariff duty in this tariff bill? Why did the Senator from Utah, in his letter to General Crowder, to be presented to the Cuban Government, say that 1.4 cents a pound would be sufficient in the permanent law

upon that one year's condition? Why do they seek now 1.6 cents a pound or 2 cents a pound?

Mr. POMERENE. Mr. President, may I ask the Senator to state, if he has the figures in mind, what the normal production in Cuba is?

Mr. HARRISON. For this year, I will say to the Senator, the estimate is about 3,800,000 tons. The sugar crop of Cuba is usually about 4,000,000 tons, roundly, I think.

This paper, the Mercurio, continues:

We applaud the work of the World and congratulate our northern contemporary for finishing so successfully the work we began here.

We must now conclude our labors, and to do so must study the status of General Crowder. The General, after having carried out the most difficult tasks for the United States during the war, came to Cuba to help us draft an electoral law. After a long time the law was completed, passed by Congress, and approved by the President. An election was afterwards held in Cuba, and the persons who General Crowder said were elected took possession of their offices, and apparently carried on the Government.

But General Crowder remained here and interested himself noticeably in Cuban political matters. He did not remain as minister or ambassador because such functionaries under the United States laws must be approved by the Senate. General Crowder was not accredited, because the credentials of a diplomat are public documents and must be delivered to the Cuban President publicly.

The Cuban people asked no questions because of their good breeding, but since the disclosures by the World we can not do otherwise than ask in what character General Crowder is here. As he is not a diplomatic officer he can not have greater rights in Cuba than any other American citizen. Nevertheless, he has intervened in the political administration and economic problems of this country and has tried to carry out an arrangement that would have been prejudicial to our country and our commerce, and he has not thought fit to declare publicly his participation in this project which would have injured Cuba so much.

The Washington Government can not lightly furnish excuses for all this which would have been so prejudicial to the Cubans. President Harding can not evade responsibility by declaring he never offered these conditions to the Cuban Republic. General Crowder is here as the personal representative of President Harding, therefore Mr. Harding must by his action prove he had no participation in all this.

As General Crowder is here as the personal representative of Mr. Harding, we ask Washington what is the legal status of this office which was unknown before President Wilson's administration? If General Crowder is here in a diplomatic capacity why was he not duly accredited in accordance with the American Constitution? If General Crowder is here, not as a diplomat but with other duties, we declare this is intervention in fact, and we ask for what legal cause the United States has taken action in the government of a friendly and peaceful nation.

Senator SMOOT may find favor with the voters of Utah but he would have difficulty in justifying his conduct before the consciences of the American and Cuban people. Senator SMOOT may say to his voters that he deceived General Crowder and the Cubans in order to protect the beet industry. Senator SMOOT may obtain the plaudits of the voters of Utah, but only at the price of General Crowder's reputation among Cubans.

The World's exposure will cause sad effects in our relations with the United States. We have always looked for fairness and always got it. We remember the times of Roosevelt and the "square deal" and we never had reason to be sorry for our confidence in the American Government. But Theodore Roosevelt is dead and, it seems, his principles exist no more.

Hereafter Cubans must assume an attitude of mistrust toward the Government which treats us so, not only to defend our interests but also to protect the American people, whom we love so well, from the irresponsible acts of their public officials who misrepresent them.

The Mercurio in making these statements is not anti-American. We have always tried to bring about the most complete harmony between the United States and Cuba, and to make closer the commercial relations between the two peoples. But in view of these disclosures the Mercurio, as a Cuban newspaper, steps forward to defend Cuban rights from aggressors, even though they are Americans, and declares itself ready to fight for the standard it has always upheld:

"Cuba for the Cubans."

Now, Mr. President, let me read from this great New York paper, whose special representative looked into the matter thoroughly, and see some more facts touching it. It says:

It was believed that the success of the Smoot scheme would have added a half cent a pound to the consumer and many millions of dollars to the holders of the surplus sugar.

Cuban statesmen, sugar producers, and newspapers know all about the Smoot-Crowder movement, but very little was said about it in the United States.

That is true. Cuba may have known about this letter from the Senator from Utah to General Crowder, our representative in Cuba, but in the United States, somehow or other, it was as secret as a blushing maiden's love.

The January number of the Economic Bulletin, of Cuba, recited part of the story of the negotiations to have the Cuban crop curtailed.

Let me read from that bulletin. It said:

"Toward the end of December after the hearings before the Finance Committee of the United States Senate on the sugar schedule," the Bulletin states, "negotiations were begun to reconcile the Cuban and United States beet-suger interests, and C. C. Hamlin, representing the latter, visited Habana and called a number of conferences with prominent sugar men, bankers, and General Crowder.

"The beet interests of the United States, speaking through Mr. Hamlin, proposed:

"1. A reduction of 33 per cent in this year's Cuban crop.

"2. A reduction of the duty on sugar in the emergency tariff and Fordney bill.

"3. The entry into the United States without the previous payment of duty of 1,000,000 tons of Cuban sugar for the purposes of being refined and exported to Europe.

"4. Financial assistance by American bankers for moving the Cuban crop.

"5. Regulation of the exportation of Cuban sugar to the United States.

"In order to discuss this plan, Señor Aurilio Portuondo, a recognized authority on Cuban sugar questions, was invited to Washington, where the negotiations were continued from January 11, Secretary Hoover, General Crowder, and Senator SMOOT participating in these pourparlers with the Cuban and beet-suger representatives.

"The plan upon which Mr. Hamlin had agreed with the Cuban interests at Habana was not accepted by the majority of the beet-sugar men * * * and consequently fell through.

"The division of the members of the United States Sugar Manufacturers' Association on the question of concessions to Cuba became pronounced, Mr. Havemeyer and others supporting Mr. Hamlin's proposals, but the majority and principally the eastern group, being irreconcilable and holding out the threat that if Cuba did not reduce its crop the duty on sugar would be raised to 2½ or 3 cents a pound.

Strong-arm tactics, indeed. Not satisfied with just 2 cents, the threat is made that 3 cents a pound might be imposed upon sugar from Cuba. Said this bulletin:

It is understood that Senator SMOOT does not support any increase of the duty of 2 cents—

The Senator from Utah is very generous in limiting it to 2 cents—

and in the conference held with General Crowder, Señor Portuondo, and Señor Despaigne on January 16 he expressed the opinion that if the Cuban crop was reduced by the enactment of law to that end the difficulties under which the industry is laboring would be solved.

Let me read that again:

It is understood that Senator SMOOT does not support any increase of the duty of 2 cents, and * * * he expressed the opinion that if the Cuban crop was reduced by the enactment of law to that end the difficulties under which the industry is laboring would be solved.

The conferences were suspended without any formal agreement being reached, it being understood, however, that if Cuba should agree to reduce its crop this year to two and a half million tons the duty on sugar, established by the emergency tariff and the Fordney bill, would be lowered to $1.75 per hundred pounds, making the duty on Cuban sugar $1.40 instead of $1.60 per hundred pounds.

When was a blacker page ever written in the legislative history of this country? When was a more inexcusable proposal made to another country with which we were on friendly terms? This bulletin continues:

It was after this that the famous Smoot letter offering a tariff rate of $1.40 for a reduction of crop to two and a half million tons was written.

Cuban sugar growers and handlers resented the proposition insisted on by the United States beet-sugar interests and Government officials.

Insisted on by the United States beet-sugar interests and Government officials of the United States.

Oh, I wish I could cut this bond which seems to tie the two together. Then, and not until then, will the American sugar consumer be able to get sugar at a fair and reasonable price. I continue reading:

Henry A. Rubino, vice president of the Miranda Sugar Co., denounced the "proposal by the United States" as unfair. In an interview February 23 he said:

"This proposal in substance would permit Cuban sugars to enter the United States at a tariff rate of 2 cents a pound, less a differential of 30 per cent, or 1.40 a pound net, provided that this 1.40 applies only to 2,500,000 tons and that Cuba agrees to limit its output to that number of tons.

"It is outrageous in peace times for one country to say to another how much or how little it shall produce."

He added that the United States "is attempting now to dictate the size and extent of this—the sugar—crop, and for what purpose?

"Its sole object is to give artificial protection to an American industry which at best can supply one-sixth of the American demand and solely to enable the producers of that sixth to escape financial ruin. The one-sixth is the beet-sugar industry of the United States."

Rubino charged that a beet-sugar lobby was behind the proposition made to Cuba. He asserted that the industry in the 16 States where the beet grows had collapsed and Congressmen were trying to save it.

Mr. President, that is not the worst of the story. I care not how black the ink may be that stains that page which I have revealed to the Senate; it is not as black as that which was used in what was to follow. When Cuba resented this proposal made by General Crowder, through Senator SMOOT, to have that Government restrict its crop to two and one-half million tons, upon the sordid consideration of a reduction of rates from 1.6 cents to 1.4 cents a pound, when it was turned down, these sugar-beet interests—these infants—which my friend from Colorado says need a little more milk to sustain them, which are just beginning to walk, and need more sustenance in the form of tariff protection, did not stop.

What did they do? The plan was to get together and do indirectly what Cuba had refused to do, and what the Congress had failed to do.

It is stated, and published in the press, that 12 of them formed what was known as a syndicate, each one of the 12 to put in about $1,400,000, and the syndicate was to give the sugar-beet interests of this country approximately $14,000,000; in other words, give to them the amount that an increase of 40 points in the tariff duty would amount to, and that $14.000,000 these beet-sugar interests were to extract from Cuban sugar

producers and pay over to the sugar-beet interests of the West, which seem to be crying out not only for the imposition of 1.6 cents a pound but who have laid the plan for 2 cents a pound on Cuban raw sugar.

I shall read to the Senate, in order to show that it is alleged that scheme was attempted to be put over, an alleged copy of the bill of exchange which was sent to each of those 12 people, with a memorandum, and if what is stated therein is true it is shown that there was a congressional arrangement back of the proposition.

Thwarted and defeated in their plan to have Cuba accept the Smoot proposal, these interests, apparently hungry to extract from the American sugar consumers larger profits, it is said joined in an infamous scheme to make the Cuban producer pay $14,000,000 over to the same interests who sought to be protected. I say Cuban interests to pay it. Why, of course, eventually it would come out of the American sugar consumer.

Mr. CARAWAY. Mr. President, do I understand that they were making the Cuban growers of sugar pay them in order to get a lower rate?

Mr. HARRISON. Absolutely.

Mr. CARAWAY. Selling legislation?

Mr. HARRISON. I do not know. This instrument which I am going to read says that a congressional arrangement backed them up, and it was to last until the Congress had put on the 40 points, which would have carried it to 2 cents a pound. Let me read. This is most interesting. It was carried on the front page of the New York World, one of the really great and reputable papers of the country:

These payments are to be made in 12 successive installments of $83,300 each, plus the final sum of $400, "for value received," as the note reads.

* * * * * * *

The increase in price of refined Cuban sugar is to be rebated to the refiners of American beet sugar, so that they will receive as much as they would have profited had the Cuban crop been restricted and the price of sugar gone up as a consequence of the resultant shortage.

* * * * * * *

Some of the largest refiners in the country received proposals in writing from the syndicate, which describes itself as "the United States and Cuban Sugar Producers' Agreement Syndicate (Inc.)," of No. 17 State Street, New York City, "Office of Henry W. Peabody & Co." The name of Alfred Grover is signed to the correspondence as "director" of the syndicate with the imposing name.

Mr. NICHOLSON. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I will yield presently; not just now. I want to go ahead with my line of thought, and then I will yield.

Mr. President, if the answer should be made to this that nobody knows about it, the Congress could do no better than to adopt a resolution to investigate this matter, because here are alleged facts which have been published, and here is an alleged copy of the supposed bill of exchange, with a memorandum, with men's names, with offices designated, and if nobody knows anything about it there ought to be an investigation. If it is stated that nobody knows about it, there will be an investigation, if it is within my power to extract it from the Senate. Let us find out something about it.

Mr. NICHOLSON. Will the Senator yield?

Mr. HARRISON. Not just now. I will yield presently. I continue reading:

Grover in his communications to the refiners explained that $14,339,394 will represent the "one-fourth of the total sum received for the entire crop of beet and cane sugar last year." He outlined that this amount is to be raised through operations of the syndicate from American consumers of Cuban sugar through the additional to the sales price of four-tenths of a cent per pound—

There are the four points—

until the sum of $14,339,394 has been gathered and the distribution made to the beet-sugar and American cane-sugar producers.

Evidently only manufacturers of beet and cane sugar were to get the rake-off—

I might say, in this connection, that the facts show, so far as I have seen, that the cane-sugar people had nothing to do with the proposition—

because no mention is made in the syndicate's proposal of the farmer or the growers of sugar cane and sugar beets.

Mr. President, let me read a copy of the instrument itself upon which it is said this syndicate was founded:

United States and Cuban Sugar Producers' Agreement Syndicate (Inc.), 17 State Street, New York City, office of Henry W. Peabody & Co., March 30, 1922.

This letter is signed by the United States and Cuban Sugar Producers' Agreement Syndicate (Inc.), and in the letter it is said:

DEAR SIRS: Our beet-cane and Cuban sugar duty compromise: Under the terms of this congressional arrangement the beet and cane sugar producers of the United States, in lieu of the benefit of the additional duty on Cuban sugar, are to receive an amount out of the sale proceeds of Cuban sugar equal to one-fourth of the total sum received for the entire crop of beet and cane sugar last year.

The Cuban ambassador in Washington desired to arrange a guaranty for the $14,339,394 payable to the beet and cane sugar growers under the terms of the compromise, but it was found that the only people in a position to provide the source of the actual funds required were the American refiners of Cuban sugar.

Therefore this syndicate has been formed to carry out the guaranty and the payments of the compromise, and it has been found desirable to regard and accept the American refiners as the representatives of the producers of Cuban sugar, and by putting them in a joint account with the beet and cane growers pay the refiners $14,339,394, and in this way provide the financial consideration required to bring the payment to the beet and cane growers into immediate effect.

After conferring with the five refiners in this city—

This is a most remarkable document—

After conferring with the five refiners in this city it was decided to make the first payment to the 12 principal American refiners of Cuban sugar per the inclosed bill of exchange, the printed indorsement on the back of which covers the entire premises; and we are now engaged in the endeavor to have the whole of these 12 bills of exchange presented complete to each of you principal refiners on the 7th of next month, when, with the whole 12 bills completed, we can arrange to have them discounted at the expense of the syndicate, charging the cost of the discount to the general funds.

The $12,000,000 for which these 12 bills will be discounted will then leave a balance of $2,339,394 to the credit of the 12 refiners' account, and this credit balance will finally be allocated to the excess volume of sales over the average effected by the refiners.

The cash capital of the syndicate is $3,321,212 available for the syndicate's general purposes.

Listen to this:

We desire to point out to you that the 40 points on 1 cent per pound is practically a del credere commission of brokerage added to the variable market price of the sugar, primarily to enable us to guarantee and then pay $14,339,394 to the beet and cane growers in the terms of the congressional compromise and to fulfill our financial engagements with you and others under it.

Let me read it again:

We desire to point out to you that the 40 points—

That was the amount that they sought to raise—

on 1 cent per pound is practically a del credere commission of brokerage added to the variable market price of the sugar, primarily to enable us to guarantee and then pay $14,339,394 to the beet and cane growers in the terms of the congressional compromise and to fulfill our financial engagements with you and others under it.

They were going to take the foreign market price of sugar and add four tenths of 1 cent to it in order to raise the $14,335,000 and give it over to the sugar-beet interests of the country.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. HARRISON. I yield.

Mr. LODGE. I merely wanted to inquire who signed the very interesting document which the Senator is reading?

Mr. HARRISON. This copy of the alleged letter is signed by the United States & Cuban Sugar Producers' Syndicate (Inc.), by Mr. Alfred Grover, and his office is 17 State Street, New York City, in the office of Henry W. Peabody & Co.—so the instrument states.

Mr. LODGE. Who is Mr. Grover?

Mr. HARRISON. If the Senator wants to know who Mr. Grover is and denies that which has been in the papers of the country, then we should pass immediately a resolution asking for an investigation of the whole matter, and particularly about Mr. Grover.

Mr. LODGE. I never heard of the document or this man. I should like to know who the syndicate is, who forms it, and what it has done. I rose merely to ask for information because I did not know anything about it. I should like to know who he is who signed the document. The Senator says he is willing to have him brought down here to find out who he is, but he does not state who he is.

Mr. HARRISON. I say to the Senator I do not know Mr. Grover nor the workings of this syndicate. I would be among the last to be on the inside and know anything about them.

Mr. SMOOT. Nor do I know Mr. Grover. I should like to know who he is.

Mr. LODGE. I should like to know who he is and who is behind the syndicate the Senator has mentioned. Who got the money?

Mr. HARRISON. The Senator has not been listening.

Mr. LODGE. I have been listening to the Senator.

Mr. HARRISON. And it does not interest the Senator at all?

Mr. LODGE. It would interest me if I thought it amounted to anything.

Mr. HARRISON. Of course some things, in the opinion of the Senator, amount to nothing that others think do. Will the

Senator join with me in passing a resolution asking for an investigation of the proposition?

Mr. LODGE. Of course if the Senator wants to investigate Mr. Alfred Grover——

Mr. HARRISON. It is not only Mr. Alfred Grover that I want investigated, but every interest that has tried to put over this alleged scheme. All of it from beginning to the end. If there is nothing to it, it should be known.

Mr. LODGE. Who are they?

Mr. HARRISON. Will the Senator join with me in asking for an investigation?

Mr. LODGE. I would ask for an investigation of the syndicate which the Senator has brought in.

Mr. HARRISON. And nothing else?

Mr. LODGE. Nothing else connected with what?

Mr. HARRISON. They charge that there is a congressional arrangement.

Mr. LODGE. Who charges it?

Mr. HARRISON. This correspondence states it.

Mr. LODGE. What correspondence?

Mr. HARRISON. I have presented copies of the instrument.

Mr. LODGE. Who constitute the concern?

Mr. HARRISON. I have given copies of the instrument itself, and I have given the name that is signed to it.

Mr. LODGE. The Senator has given the name of Alfred Grover. I never heard of it before and the Senator does not know who he is.

Mr. HARRISON. No; I am giving the facts as published.

Mr. LODGE. Who are these people?

Mr. HARRISON. If the Senator will stay with me, I will join with him in an investigation of the whole proposition. We can pass a resolution of investigation pretty quickly, and we will then know who they are and all about it.

Mr. LODGE. I will join with the Senator when he tells the Senate who Mr. Grover is and who is behind him.

Mr. HARRISON. Oh, yes; I thought the Senator would look for some hole to try to get out of.

Mr. LODGE. Oh, no; I am not doing that at all.

Mr. HARRISON. That is shown here, if the Senator will give me his attention. I will read the remarkable document, if the Senator will abide himself in patience for a time.

Mr. LODGE. The world is full of remarkable documents of no authenticity.

Mr. HARRISON. If the Senator will join with me in passing a resolution of investigation, we will find out who Mr. Grover is and all the other facts connected with this proposition.

Mr. LODGE. Very well.

Mr. HARRISON. I take it that is an answer that the Senator will join with me.

Mr. LODGE. Show us first who Grover is and who is behind him, and whether it is anything more than a printed scheme of irresponsible people.

Mr. HARRISON. The Senator would have me go to New York, get Mr. Grover, bring him down here, and make proffer of him to ascertain whether he had whiskers or not, and how large he is, and so forth?

Mr. LODGE. I would not have the Senator do anything today, except to show that he is not totally ignorant of the subject.

Mr. HARRISON. The Senator wishes I were.

Mr. SMOOT. Mr. President, I say to the Senator, never would I bring a question upon the floor of the Senate when I did not know the author of it. I do not know the author, and the Senator does not know the author.

Mr. HARRISON. It is published in a very responsible paper. I am laying the facts before the Senate, and if the Senator does not like the stain that seems to be——

Mr. SMOOT. There is no stain on me.

Mr. HARRISON. If he will join with me, we will investigate this proposition, because it is due the Senator. If there is no such fellow as Grover and no such scheme as this ever attempted and a newspaper published it, the Senator would have a libel suit against them in any court in the land.

Mr. SMOOT. If I took notice of all the charges in the papers and paid any attention to them, I would have little time to do anything else.

Mr. HARRISON. I think that is true

Mr. SMOOT. I want to say to the Senator I know of no syndicate. I never heard of any syndicate. I do not know this man Grover. If he has made some statement, I am not responsible for it, and no one else is responsible for it. I am just as clean as the Senator from Mississippi of doing wrong in this question. I want the Senator from Mississippi to be here when I read the letter, and I will show whether there was any agreement on my part or on the part of General Crowder as to what we would do or what Congress would do. I did not promise that Congress would do anything. I had no power to do it. I have promised no one what our Government would do. I had no power to do it.

Mr. HARRISON. No; I know the Senator had no power to do it.

Mr. SMOOT. And I have not done so.

Mr. HARRISON. I know the Senator had no power to do it, and I was surprised when I read these remarkable statements. Three or four weeks ago I asked the Senator if he would not produce the letter. Well, the letter has not been produced, and I wonder if he will not let me see it now?

Mr. SMOOT. When I speak upon the general question I will do it. I am not a demagogue. I do not try to bring questions before the Senate that I do not know anything about and that I would not stand back of. With all the regard that I have for the Senator and for every other Senator, I never would bring in here on the floor of the Senate a document that I knew nothing about and then try to blacken the character of another Senator. God help me, I hope that I may never live long enough to do such a thing. I say now that so far as I am concerned I can show the country that I am just as clean as I can be in everything I have said and done in this matter, and I am willing to have laid before the whole American people not only this but every other act of my life. I have never done anything that I have not been perfectly willing every living soul on earth should know all about.

Mr. HARRISON. Mr. President, that is what I know. I know the Senator would be very glad to remove anything that might attach to him in this matter, and that is why I would join with him. I knew he had no right to bind Congress on this proposition. I am glad the Senator said he would have no right to do it. He states that which we all know. But this thing looks very, very bad. It is just such occurrences when published in the press that destroy public confidence. If the Senator says that it is not true, that he did not write the letter——

Mr. SMOOT. I wrote a letter, but not the letter to which the Senator refers.

Mr. HARRISON. If the Senator did not write a letter in substance as I have stated, then, of course, that changes the whole complexion of the proposition. But he said he wrote the letter, he admits writing the letter. Here are some of the same interests headed by Mr. Grover, and copies of the correspondence have appeared in the papers, and yet the Senator has said that I am about to blacken his name. Now, the only place that we might assume that he got such an impression was that it was said this was the plan of the congressional arrangement. I do not know if there was any such arrangement. I do not know where Grover got the impression or how it appeared, but an investigation will disclose if it is not true that there was no congressional arrangement and the whole thing is unfounded and untrue.

Mr. SMOOT. I never would have taken the floor at all if the Senator from Mississippi had not, in speaking of this damnable thing, said that it cast reflections upon the Senator from Utah. I never would have taken the floor if he had not referred to me as he did.

Mr. HARRISON. Now, Mr. President, I shall proceed.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. HARRISON. I yield.

Mr. GOODING. I might say that I had a communication of some kind or other from Mr. Grover, and I was a good deal——

Mr. HARRISON. Does the Senator from Idaho know Mr. Grover?

Mr. GOODING. I do not know him, but I did try to find out who he was. I went as far as I could. I found out that he was some crank without any responsibility at all, and was the laughingstock of everybody who knew anything about sugar.

Mr. HARRISON. That is one fact that ought to come out in the investigation so that we can remove all the implications carried in this article and interwoven in this question. So the Senator from Idaho, who is still trying to get an investigation about wool, I am sure will join with me in trying to get an investigation of the sugar proposition. We ought to have no trouble about this at all. If, as he says, Grover is crazy, then we can soon know; but I submit that the language of this bill of exchange and memorandum does not indicate the work of a crazy man.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

Mr. HARRISON. I yield.

Mr. NICHOLSON. This remarkable document which has been read——

Mr. HARRISON. I have not finished reading it.

Mr. NICHOLSON. The remarkable document which is being read by the Senator from Mississippi purported to say that there were 12 different concerns interested in or represented at the meeting.

If Mr. Grover is a man of veracity and truth, why does not the Senator from Mississippi write to Mr. Grover and furnish us with information as to who the 12 parties were who were present at this conference? That is an easy thing for the Senator from Mississippi to do.

Mr. HARRISON. I am willing to do more than that. I am willing to have us get out such warrant as may be necessary, if he does not want to come down voluntarily, to bring him here and make profert of him, to get every incident and every detail connected with this alleged obnoxious scheme, so that we will know whether there is any truth in it or not. We will ascertain who, if anybody, is implicated. I take it from what the Senator said that he is willing to join with me in asking for this investigation.

Mr. LODGE rose.

Mr. HARRISON. Does the Senator from Massachusetts want to ask me a question?

Mr. LODGE. The Senator completely misunderstood my purpose, which was simply to try to get some information. I am not in favor, as at present advised, of increasing the duty over the amount recommended by the House. The Senator read here, and I listened to it, a very remarkable document. It seemed to be a paper of some importance, if the signers were of any consequence. It does not appear that the signer is of any consequence. We can not use the time of the Senate taking up everything that is offered by some crank.

Mr. HARRISON. Why, it does appear who the signer is.

Mr. LODGE. The only information we have is the man's name, and the Senator has declined to state who he is.

Mr. HARRISON. I do not know.

Mr. LODGE. No; the Senator does not know anything about it.

Mr. HARRISON. It was all published in the New York World, a very reputable paper.

Mr. LODGE. That proves nothing whatever.

Mr. HARRISON. Of course not to the Senator.

Mr. LODGE. Of course, any newspaper may publish a statement, and the newspaper may have been misled. Did the newspaper statement tell who Mr. Grover was?

Mr. HARRISON. The Senator knows a newspaper may state if there was such a thing or if there was a scheme; but when a newspaper states it as a scheme, and then produces a copy of the instrument, it is pretty strong evidence.

Mr. LODGE. If it gets some perfectly irresponsible persons to make such a statement and sign their names to it, it does not amount to anything.

Mr. HARRISON. Oh, yes.

Mr. LODGE. There is no difficulty in doing that.

Mr. HARRISON. If the Senator from Massachusetts will join with me, we shall find out all about Grover and all the details in connection with the matter.

Mr. LODGE. I am not going to join in wasting the time of the Senate.

Mr. HARRISON. We have wasted considerable time in other unimportant matters.

Mr. LODGE. We are wasting it now.

Mr. HARRISON. The Senator from Massachusetts does not want these facts.

Mr. LODGE. I do not care; if the Senator wants to go and investigate Grover, he may go and investigate him; but I think he ought to give the Senate something to go upon.

Mr. HARRISON. I am giving it to the Senator.

Mr. LODGE. The Senator is not. That is the trouble. We do not know who the man is.

Mr. HARRISON. I can not influence or have any effect on the Senator. When I try to lead him right on economic and political questions he is not amenable to reason.

Mr. LODGE. I am amenable to reason.

Mr. HARRISON. The Senator has become an irreconcilable, even on the League of Nations.

Mr. LODGE. Mr. President, I have tried to find out if I was right in my belief that the Senator from Mississippi knew nothing about the man whom he was quoting. I have proved that, and that is enough for me now.

Mr. HARRISON. I told the Senator——

Mr. LODGE. If the Senator wants to investigate Mr. Grover he may do so.

Mr. HARRISON. I have read the instrument that was written by the man; I have given the name of the syndicate that it was sought to form, the office address of the man, and I have read what purported to be a copy of the instrument that was published by one of the most reputable newspapers in this country. If that paper should publish something that was as untrue as the Senator suggests, the Senator knows that it would be subject to a libel suit.

Mr. NICHOLSON. Will the Senator from Mississippi yield to me?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I yield.

Mr. NICHOLSON. I think, in view of the statement made by the Senator from Mississippi [Mr. HARRISON] as to those who are interested in the tariff on sugar and the suspicion that is now being cast upon the question before Congress and before the American people, that we are entitled to have an investigation; so I ask that an investigation be ordered and that Mr. Grover be asked to appear and present the documents of which the Senator from Mississippi speaks.

Mr. SMOOT. I, too, hope the Senator from Mississippi may secure an investigation.

Mr. HARRISON. That is splendid; that is the first time I have seen Senators on the other side of the Chamber get right in a long while. They are proceeding in the right direction now.

Mr. SMOOT. We are always right.

Mr. HARRISON. Of course, I hope that the iron does not get too hot; but it may before the thing is over.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. LODGE. I should like to say one word.

Mr. HARRISON. I yield to the Senator.

Mr. LODGE. I have not the remotest interest in sugar of any kind or sort——

Mr. HARRISON. I know that.

Mr. LODGE. Beyond the fact that I wish to have imposed a duty upon sugar which will be proper and fair to the sugar grower and also fair to the people. I have no personal interest whatsoever in the sugar business.

Mr. HARRISON. I was not alluding to the Senator from Massachusetts or to any other Senator when I referred to the statement that these people are backed by a congressional arrangement. Simply because the Senator is the leader on the other side of the Chamber, I did not suspect that he was in it.

Mr. LODGE. As to the congressional arrangement, there was nothing of the sort. If the Senator from Mississippi wishes to investigate every irresponsible statement that is made by anybody who can get the money with which to print a circular, I have no objection, if the Senate so desires, but I think it would be empty nonsense.

Mr. HARRISON. Of course, the Senator from Massachusetts thinks that many things are empty nonsense, but the people of Massachusetts are interested in securing some sugar at a reasonable price, and the people of Massachusetts are also interested in a proposition that might be made by the coming chairman of the Finance Committee to a representative of this Government in Cuba to enter into an arrangement to curtail the production of this year's Cuban crop of sugar to two and a half million tons, upon the implied condition, as alleged, that we will reduce the tariff to 1¼ cents a pound. The people of Massachusetts also are interested if, after having failed in that, there was a syndicate attempted to be formed by these 12 refiners and large sugar interests to tax the American people in order to put into the pockets of these same sugar-beet interests $32,000,000. The Senator, even though he says it is nonsense, will, before we get away from this question, ascertain that the people of Massachusetts use sugar on their tables; that they sometimes give it to the little children, and also use it in the confectionery shops, and in many other ways. I had thought that the people of Massachusetts used a little sugar, even though we had passed the prohibition law.

Now, Mr. President, let me read further from this remarkable document:

> This del credere commission of 40 points of 1 cent per pound is relatively the same as though the amount of a brokerage were added to the variable price of the sugar, or the amount of a discount were deducted from its variable market price. Neither the brokerage added nor the discount deducted does more than affect the amount of the market price of the sugar to the extent of either, for neither fixes the actual amount of the market price of either the imported article or its manufactured product.
>
> Yours very truly,
>
> UNITED STATES & CUBAN SUGAR PRODUCERS' AGREEMENT SYNDICATE (INC.),
> ALFRED GROVER, *Director*.

The bill of exchange or promissory note inclosed with the letter reads:

UNITED STATES & CUBAN SUGAR PRODUCERS' AGREEMENT SYNDICATE (INC.).

BILL OF EXCHANGE FOR $1,000,000.

We promise to pay $1,000,000 to the order of ——— in 12 successive 30-day payments of $83,300 each, plus the final sum of $400, the said 12 payments being made by us for value received in accordance with the terms of the memorandum indorsed on the back hereof.

UNITED STATES & CUBAN SUGAR PRODUCERS' AGREEMENT SYNDICATE (INC.),
——— ———, *Director*,
——— ———, *Treasurer*.

Dated ———, 1922, at 17 State Street, New York City.

On the reverse side of the bill of exchange appeared the following in the form of a—

MEMORANDUM.

This bill of exchange is issued in accordance with the terms of the congressional compromise—

Congressional compromise—

between the beet and cane sugar producers of the United States and the producers of Cuban cane sugar and whereby a del credere commission of 40 points of 1 cent per pound is authorized to be added to the market price of all refined Cuban sugar and continued until 8,000,000,000 pounds have been sold in the United States, and the whole of the cash proceeds of the said 40 points of 1 cent per pound is paid to the order of the United States & Cuban Sugar Producers' Agreement Syndicate (Inc.), and the payees of this bill of exchange for the consideration set out therein hereby covenant with the said United States & Cuban Sugar Producers' Agreement Syndicate (Inc.) to add the said 40 points of 1 cent per pound to the market price of all the refined Cuban sugar sold by them from the date of this bill of exchange, and to pay to the order of the United States & Cuban Sugar Producers' Agreement Syndicate (Inc.) every successive 30 days from the said date all of the said 40 points of 1 cent per pound received by them as that part of the sale proceeds of all the refined Cuban sugar sold by them as their part of the said 8,000,000,000 pounds of refined Cuban sugar.

UNITED STATES & CUBAN SUGAR PRODUCERS' AGREEMENT SYNDICATE (INC.).

Mr. President, I am glad that the distinguished Senators on the other side think that that matter should be investigated. I agree with them thoroughly, and, if no other Senator will offer the resolution, I shall prepare one, in the hope that it may be passed, because if there is no person such as Grover, if Grover is a crazy man, if this concern is a fictitious concern and not incorporated, an investigation will disclose those facts. An investigation will further disclose, if Grover is a sane individual and there is such a concern as that mentioned, what big sugar interests were approached and what were the terms of the whole proposition. We can ascertain all the facts, and if there was no congressional arrangement that suggestion will be exploded; but if there was a congressional arrangement the country is entitled to know the truth, and we will find out the facts from the witnesses.

But, Mr. President, irrespective of this syndicate, which is alleged to have been formed and about which there has been much in the newspapers and which Senators seem to be very much riled and somewhat angry at me for having read, there is enough here, which has been admitted by the Senator from Utah, to influence every Senator on the roll call to vote at least for a rate of duty on sugar not greater than 1.4 cents. I have stated the arguments; it is useless to restate them. If, however, the Senator from Utah wrote the letter—and he says he did—and made the proposition that the Cuban producers should restrict their production this year to 2,500,000 tons, upon the condition that in the permanent tariff law to be written the rates on Cuban sugar should be 1.4 cents, then what reason is there to make it 1.6 cents? None in the world, and no man can argue to the contrary.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. HARRISON. I yield.

Mr. WALSH of Massachusetts. Is that the congressional promise referred to?

Mr. HARRISON. That was the letter that was written by the Senator from Utah [Mr. SMOOT] to General Crowder.

Mr. WALSH of Massachusetts. In other words, if there was a reduction in the production of sugar in Cuba there was to be an increase in the tariff duty levied by the Congress?

Mr. HARRISON. No. If there was a reduction for that year to 2,500,000 tons in Cuba, then in the permanent tariff law the rate on sugar would be lowered to 1.4 cents a pound; but if there was no arrangement as to the limitation of production the duty would be 2 cents a pound.

This attempted scheme to force upon Cuba the reduction of her sugar crop under the sordid promise of a reduced tariff is as unpardonable as it is inexcusable. What has come over the spirit of our dreams that would lead us now to oppress this fair maiden of the Antilles, for whom once we were willing, behind the rattle of guns and the beat of drums, to send forth our sons to lift the hand of Spanish oppression? In the name of humanity we opened up our Treasury and unstintingly gave in her behalf. The Stars and Stripes to those once oppressed and persecuted people has ever been emblematic of justice, fair play, and sympathy. What reason is there for us to drive from their bosoms that proud respect which our whole past history has won and endeared her to us? What has she done that we should now take the part of Spain and not only begin to oppress but to enslave her? Can they expect this once nurturing mother to have lost all sympathy and love for her child? Is this Government to be known among the nations of the world to possess no heart or soul? Have we become so commercialized and selfish and greedy that we would employ the giant's grip to strangle a baby? Is the Senator from Utah to receive allies in smearing a stain upon this Government that will obliterate those proud lines that were written in the blood of our brave heroes? Is there a Senator here who is willing to join in this conspiracy and indorse this scheme and drain the pockets of the masses in order to enrich a few already prosperous sugar barons? Is there a Senator within the sound of my voice, in view of these revelations, willing to join hands and add to the miseries of the American people, and by his act write an indorsement of this attempt to destroy the main industry of a people who have been dependent upon us? What would the lamented Roosevelt, whose gallantry was displayed in behalf of these people, think of such a scheme? Are the high lessons of courage and bravery and patriotic service exemplified on sea and land by Dewey and Sampson and Schley and Wood and Shafter and Joe Wheeler to be forgotten in this mad adventure to rob the many in order to benefit a few?

Oh, it is excellent to have a giant's strength,
But it is tyrannous to use it like a giant.

Mr. NICHOLSON. Mr. President, I insist that the Senator now demand the investigation which he has asked for.

Mr. HARRISON. The Senator will get it if he will just bide his time in patience. The Senator will have a good opportunity to vote for it.

Mr. NICHOLSON. I will vote for the investigation.

Mr. HARRISON. The Senator from Mississippi always is careful in the preparation of his resolutions. He does not draw them and offer them so quickly that they can be punctured with a lot of holes.

Mr. BROUSSARD addressed the Senate. After having spoken for some time,

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Louisiana yield to the Senator from North Carolina?

Mr. BROUSSARD. The Senator from North Carolina has asked me to yield in order that he may present a matter to the Senate, and I shall be glad to do so on condition that I may resume the floor after it shall have been concluded and be permitted to continue my remarks.

Mr. SIMMONS. I desire to call from the table the unanimous-consent agreement proposed by myself on yesterday.

The PRESIDING OFFICER. The Senator from North Carolina asks that there be taken from the table the unanimous-consent agreement proposed by him on yesterday. Is there objection?

Mr. LENROOT. I have no objection to that.

Mr. SIMMONS. I merely wished to ascertain that there was no objection to my asking that the unanimous-consent agreement be taken from the table.

The PRESIDING OFFICER. There is no objection to the Senator's request.

Mr. LODGE. Submitting a request for unanimous consent is a matter of privilege, I think.

The PRESIDING OFFICER. The request for unanimous consent is now before the Senate.

Mr. SIMMONS. I put the request in the form of a unanimous consent to take from the table the proposal which I submitted on yesterday.

Mr. LENROOT. In order to clear up this matter, I will now object to the proposed unanimous-consent request of the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from Wisconsin objects.

Mr. SIMMONS. The unanimous-consent agreement has already been read, and I will not ask that it be again read; but I ask that the unanimous-consent agreement proposed by myself on yesterday may be printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The proposed unanimous-consent agreement submitted by Mr. SIMMONS is as follows:

Unanimous-consent agreement proposed by Mr. SIMMONS in connection with H. R. 7456, the tariff act of 1922, viz:

It is agreed by unanimous consent, that not later than 10 o'clock antemeridian on the calendar day of Thursday, August 17, 1922, the Senate shall proceed to vote, without further debate and to the exclusion of all other business, upon any amendment that may be pending, any amendment that may be offered, any motion that may be made relative thereto, and immediately thereafter upon the bill (H. R. 7456) to provide revenue, and so forth, through the regular parliamentary stages to its final disposition.

That hereafter debate shall be confined to the question before the Senate or the bill itself, and no other business or irrelevant question or motion shall be entertained except by unanimous consent.

That upon the conclusion of the consideration of amendments to the schedule now before the Senate, the Senate shall proceed to the consideration of amendments pending or hereafter to be offered to the following paragraphs in the order named (the agreement heretofore made that committee amendments shall be first disposed of being hereby annulled), namely:

Paragraphs relating to sugar (Schedule 5).

Paragraphs relating to potash and bounty thereon (paragraphs 1635 and 1636) and white arsenic (paragraph 1).

Paragraphs relating to presidential powers (sections 315, 316, and 317).

Amendments to the Tariff Commission Act.

Paragraphs relating to hides, leather, boots, shoes, and leather goods (paragraphs 1427a, 1431, 1432, 1433, and 1435a).

That upon the conclusion of amendments to said paragraphs, or if the amendments to said paragraphs shall not be concluded prior to that time, after the hour of 11 o'clock antemeridian Saturday, August 12, 1922, no Senator shall speak longer than 15 minutes on any amendment or motion nor longer than 30 minutes upon the bill.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

Mr. McCUMBER. Now, Mr. President, I offer a proposed unanimous-consent agreement.

The PRESIDING OFFICER. The proposed unanimous-consent agreement submitted by the Senator from North Dakota will be read.

Mr. McCUMBER. I ask that the proposed unanimous-consent agreement submitted by me may be printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The proposed unanimous-consent agreement submitted by Mr. McCUMBER is as follows:

Unanimous-consent agreement proposed by Mr. McCUMBER in connection with H. R. 7456, the tariff act of 1922, viz:

It is agreed by unanimous consent, That not later than 10 o'clock a. m. on the calendar day of Thursday, August 17, 1922, the Senate shall proceed to vote, without further debate and to the exclusion of all other business, upon any amendment that may be pending, any amendment that may be offered, any amendment that may be made relative thereto, and immediately thereafter upon the bill H. R. 7456, an act to provide revenue, etc., through the regular parliamentary stages to its final disposition.

That hereafter debate shall be confined to the question before the Senate or to the bill itself, and no other business or irrelevant question or motion shall be entertained except by unanimous consent.

That upon the conclusion of the consideration of amendments to the schedule now before the Senate, the Senate shall proceed to the consideration of amendments pending or hereafter to be offered to the following paragraphs in the order named (the agreement heretofore made that committee amendments shall be first disposed of being hereby modified so far as such agreement affects those particular paragraphs and amendments thereto), namely:

Paragraphs relative to sugar, Schedule 5.

Paragraphs relative to potash and bounty thereon, being paragraphs 1635 and 1636, and white arsenic, paragraph 1.

Paragraphs relating to presidential powers (secs. 315, 316, 317).

Amendments to Tariff Commission act.

Paragraphs relating to hides, leather, boots, shoes, and leather goods (pars. 1427a, 1431, 1432, 1433, and 1435a).

That during the consideration of the aforementioned paragraphs no Senator shall speak more than once nor longer than one hour upon any one of such paragraphs or more than once nor longer than one hour upon any amendment thereto.

That upon the conclusion of amendments to said paragraphs, or if the amendments to said paragraphs shall not be concluded prior to that time—after the hour of 11 o'clock a. m., Saturday, August 12, 1922—no Senator shall speak more than once nor longer than 15 minutes on any amendment or motion nor more than 30 minutes upon the bill.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

Mr. LENROOT. Now I object to the unanimous-consent agreement proposed by the Senator from North Dakota.

The PRESIDING OFFICER. The Senator from Wisconsin objects.

Mr. LENROOT. I ask, Mr. President, that the unanimous-consent agreement which I have heretofore offered be now taken from the table.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin to take from the table the request for unanimous consent submitted by him?

Mr. HARRISON. Let us have it read.

Mr. LENROOT. The request which I presented on yesterday has been printed, and its reading would be a mere formality.

Mr. HARRISON. Does it propose any definite date for a vote on the pending bill?

Mr. LENROOT. It does not.

Mr. HARRISON. When does it begin to apply, may I ask the Senator? On to-day?

Mr. LENROOT. It begins to apply immediately, but provides that debate on the bill shall after 11 o'clock a. m. on August 11 be limited to one hour.

The PRESIDING OFFICER. Is there objection to taking from the table the request for unanimous consent proposed by the Senator from Wisconsin? The Chair hears none.

Mr. HARRISON. Mr. President——

Mr. SIMMONS. Mr. President, I do not know what is the proposition.

Mr. HARRISON. I understood that there was going to be objection made to the request proposed by the Senator from Wisconsin.

Mr. LODGE. There will be.

Mr. LENROOT. There will be, if the Senator will have patience.

Mr. HARRISON. But the Chair stated that there was no objection.

Mr. LENROOT. That merely related to taking the request from the table.

The PRESIDING OFFICER. The Chair was merely putting the request to take from the table the proposal for unanimous consent submitted by the Senator from Wisconsin. Is there objection to taking from the table the request for unanimous consent submitted by the Senator from Wisconsin? The Chair hears none. Now, is there objection to that request?

Mr. LODGE. I object, as I did on yesterday.

The PRESIDING OFFICER. Objection is made by the Senator from Massachusetts.

Mr. LENROOT. Now, Mr. President, I ask unanimous consent that the proposed unanimous-consent agreement submitted by me may be printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The proposed unanimous-consent agreement submitted by Mr. LENROOT is as follows:

Unanimous-consent agreement proposed by Mr. LENROOT in connection with H. R. 7456, the tariff act of 1922, viz:

It is agreed by unanimous consent, That whenever the bill H. R. 7456, "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States," is before the Senate until the final vote is reached, debate shall be confined to the bill before the Senate, and no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

That from and after the hour of 11 o'clock a. m. of the calendar day of Friday, August 11, 1922, no Senator shall speak in the aggregate more than one hour upon the bill, and any amendment or amendments offered thereto and motion or motions that may be made respecting the same.

That the Senate shall immediately proceed to the consideration of committee amendments to paragraphs 1427a and 1582 relating to hides, and 1431 relating to leather, and manufactures thereof. That upon the disposition of said amendments the Senate shall next consider committee and individual amendments to schedule 5, relating to sugar, molasses, and manufactures thereof.

The Senate shall next consider committee amendments to paragraph 1636, relating to potassium nitrate, and when disposed of the Senate shall consider the committee amendment designated as section 315.

After the disposition of the foregoing the Senate shall next proceed to the consideration of remaining committee amendments, and after the same have been disposed of individual amendments to the bill shall be considered and disposed of.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

Mr. McCUMBER. Mr. President, both the proposal offered by the Senator from North Carolina [Mr. SIMMONS] and the proposal offered by me contemplated a day certain when a vote should be taken upon the pending bill and all amendments. There has been objection to both of those propositions, mainly upon the ground that the objector did not desire to have a definite agreement entered into until the Senate had disposed of those paragraphs and the amendments thereto which might provoke considerable debate. To meet the wishes of Senators taking that view majority members of the Finance Committee and minority members of the Finance Committee have formulated a new proposal that will at least greatly facilitate the progress of the discussion of the bill, and which we believe in the end will bring about a final vote as early as that fixed in the proposed unanimous-consent agreements to which objection has been made. I therefore offer the request for a unanimous-consent agreement which I send to the desk and ask that it may be read.

The PRESIDING OFFICER. The Senator from North Dakota prefers a request for unanimous consent, which the Secretary will read.

The Assistant Secretary read as follows:

UNANIMOUS CONSENT AGREEMENT.

It is agreed by unanimous consent that the bill H. R. 7456 "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other pur-

poses," shall be kept before the Senate until the final vote is reached to the exclusion of all other matters, and the debate shall be confined to the question before the Senate or the bill itself, and no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

That from and after the hour of 11 o'clock a. m. of the calendar day of Saturday, August 12, 1922, no Senator shall speak longer than 15 minutes on any amendment or motion and longer than 30 minutes upon the bill.

That upon the convening of the Senate upon Monday (calendar day August 7) the Senate shall proceed to the consideration of amendments hereafter to be offered to the following paragraphs and subjects in the order named (the agreement heretofore made that committee amendments shall be first disposed of being hereby modified so far as such agreement relates to said paragraphs), namely:

1. Paragraphs relating to sugar (Schedule 5).
2. Paragraphs relating to potash and bounty thereon (paragraphs 1635 and 1636) and the paragraph relating to white arsenic (paragraph 1).
3. Paragraphs relating to hides, leather, boots, shoes, and leather goods (paragraphs 1427a, 1431, 1432, 1433, and 1435a).
4. Paragraphs relating to presidential powers (sections 315, 316, 317) and amendments to the Tariff Commission act.

That during the consideration of the aforementioned paragraphs no Senator shall speak more than twice nor longer than one hour in the aggregate upon any one of such paragraphs nor more than twice nor longer than one hour in the aggregate upon any amendment thereto.

And that at not later than 2 o'clock p. m., Tuesday, August 8 (calendar day), 1922, the Senate shall proceed to vote without further debate upon any amendment that may be pending to the sugar schedule; and immediately thereafter the Senate shall proceed to consider and vote before recessing on the calendar day of August 8 on all amendments pending to paragraphs 1635, 1636, and paragraph 1 (potash and white arsenic); and immediately thereafter the Senate shall proceed to consider and vote before recessing on the calendar day of August 9 on all amendments pending to the following paragraphs: 1427a, 1431, 1432, 1433, and 1435a (hides, leather, etc.); and immediately thereafter the Senate shall proceed to consider and vote before recessing on the calendar day of August 11 on all amendments pending to sections 315, 316, and 317 (presidential powers) and the Tariff Commission act.

After the disposition of the foregoing the Senate shall next proceed to the consideration of remaining committee amendments, and after the same have been disposed of individual amendments to the bill shall be considered and disposed of.

All questions of order under this agreement shall be decided by the Presiding Officer without debate.

Mr. LODGE. Mr. President, I wish to suggest one trifling verbal change in the third line of the second paragraph. I think it should read "no Senator shall speak longer than 15 minutes on any amendment or motion, nor longer" instead of "and longer."

The ASSISTANT SECRETARY. It is proposed to strike out "and" and insert "nor."

The PRESIDING OFFICER. Without objection, the modification will be made.

Mr. LODGE. Mr. President, I desire to say merely a word. I was extremely anxious that we should have a date fixed for a final vote. It was for that reason that I objected to the request of the Senator from Wisconsin [Mr. LENROOT]; but the most important thing is to bring the tariff discussion to an end and take final action on the bill. The request for unanimous consent now proposed seems to me to meet the situation as well as may be done. It represents the labors of Senators on both sides of the Chamber. The details have been considered with untiring patience by the Senator from North Dakota [Mr. MCCUMBER], the Senator from North Carolina [Mr. SIMMONS], the Senator from Wisconsin [Mr. LENROOT], the Senator from Kansas [Mr. CURTIS], and my colleague from Massachusetts [Mr. WALSH]. I believe the proposed agreement provides for all the contingencies as well as may be done in an agreement which is necessarily somewhat elaborate in its provisions, and I sincerely hope it may be accepted by the Senate.

Mr. LENROOT. Mr. President, will the Senator yield for just a word?

Mr. LODGE. I yield.

Mr. LENROOT. I merely wish to state that I am very glad that the request for unanimous consent has been proposed, and, while I do not think we will reach a final vote as early as under the unanimous-consent agreement which I proposed, it does preserve all rights of Senators, and I am certain will bring us to an early vote upon the bill.

Mr. POMERENE. Mr. President, may I ask the Senator from Massachusetts one question?

Mr. LODGE. Certainly.

Mr. POMERENE. The proposal is evidently a modified form of agreement, and I have not had an opportunity to see it. I know from the reading of it that there are certain provisions with respect, for instance, to the sugar schedule, boots and shoes, and so on. Do I understand that the privilege will be accorded to Senators to offer amendments other than the committee amendments?

Mr. LODGE. I understand so. The only limitation is as to time.

Mr. POMERENE. Prior to the consideration of the other committee amendments?

Mr. LODGE. The enumerated amendments all come first.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from North Carolina?

Mr. LODGE. Certainly; I yield the floor to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I was greatly disappointed at the failure of our effort to secure a day certain for a vote upon this bill. I think from many standpoints that would have been most desirable; but all efforts in that direction—and we on this side of the Chamber were very persistent in our efforts—having failed and all hope of fixing a day certain for a vote having passed, I somewhat reluctantly entered into negotiations which have resulted in the agreement now proposed.

I do not regard this as the very best way of approaching this matter, and I am afraid that it will take a very much longer time to dispose of this bill under the agreement as now proposed than any of us now anticipate, but it is certain that it will substantially curtail debate, and that it will expedite final action on the bill in the Senate. It is the best that seems to be possible of accomplishment at this time, and therefore, after collaborating and conferring with my associates of the minority side of the committee, and also with the chairman and with his associates on the majority side of the committee, I have reached the conclusion that this is the best that can be done. I hope that no objection to it will be offered.

The PRESIDING OFFICER. The Chair desires to ask the Senator from North Dakota a question. The request reads:

That upon the convening of the Senate upon Monday (calendar day August 7) the Senate shall proceed to the consideration of amendments hereafter to be offered.

Does the Senator from North Dakota understand that amendments proposed by the committee, as printed now in the bill, are embraced under the term "amendments hereafter to be offered"?

Mr. McCUMBER. That would be my understanding. The amendments would have to be formally offered, and they may be those which have already been printed or those which may be offered on the spur of the moment.

The PRESIDING OFFICER. That was the Chair's construction, but he wanted to have it made plain. Is there objection?

Mr. HARRISON. Reserving for a moment the right to object, yesterday a report was made by the Committee to Audit and Control the Contingent Expenses of the Senate touching the Gooding resolution. Is it the purpose to take that up this afternoon? Of course, if this unanimous-consent agreement is entered into, that would preclude——

Mr. SIMMONS. That does not go into effect until Monday.

Mr. HARRISON. It goes into effect after Monday. This is Saturday.

Mr. BROUSSARD. Mr. President——

Mr. HARRISON. What I am getting at is this: If the Gooding resolution is not brought up this afternoon it could not be brought up Monday.

Mr. BROUSSARD. Mr. President——

Mr. HARRISON. It is the purpose, then, I take it, to have final action upon the Gooding resolution this afternoon?

Mr. LODGE. It could be brought up——

Mr. BROUSSARD. Mr. President, I think I have the floor. I yielded the floor for this purpose, but I want to finish my speech.

Mr. HARRISON. I am going to object to it for the present, then. I am merely trying to get the status; that is all. I do not want to object to this unanimous-consent agreement.

Mr. LODGE. Adopting this unanimous-consent agreement does not alter the status of the Gooding resolution at all. It could not be brought up in any event except by unanimous consent.

Mr. HARRISON. It could be brought up this afternoon, before the unanimous-consent agreement is entered into.

Mr. LODGE. Only by unanimous consent.

Mr. LENROOT. Only by unanimous consent; and this does not prevent that.

Mr. HARRISON. This unanimous-consent agreement, then, does not prevent unanimous consent being had?

Mr. LODGE. Certainly not.

Mr. HARRISON. May I ask the Senator from Massachusetts and others a further question? The Senator from Iowa [Mr. CUMMINS] was going to make a report to-day on a resolution that I offered on behalf of the Senator from Utah [Mr. KING]. It touched the inspection of boilers, locomotives, and so forth. It is a matter which, if it is going to be passed at all, probably should be passed right away. The Senator from Iowa

came to me about it yesterday. He was going to report it today, but he is in attendance upon the funeral of the late senior Senator from Pennsylvania, and I know that he is going to report it on Monday. Under this agreement, can it kindly be understood that he can report that resolution at that time?

Mr. LODGE. Certainly; it is open to offer it by unanimous consent, and under such circumstances and in the case of such a resolution I should not think there would be any objection. I take it that it is not a matter that is going to lead to debate.

The PRESIDING OFFICER. The Chair will read this part of the proposal:

> And no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

Is there objection to the request of the Senator from North Dakota? The Chair hears none, and the agreement is entered into.

Mr. LODGE. I ask that a print may be made in bill form of the unanimous-consent agreement just entered into, so that it can be sent to other Senators.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LENROOT. Mr. President, will the Senator from Louisiana yield for a moment?

Mr. BROUSSARD. I yield.

Mr. LENROOT. I ask unanimous consent, out of order, to make a favorable report from the Committee on Public Lands.

The PRESIDING OFFICER. Under the rule, the Senator can not yield for that purpose.

Mr. BROUSSARD. I withdraw, then, the permission granted.

Mr. HARRISON. May I ask the Senator if he will not permit me, if I can, under the rule, to present a unanimous-consent request to which I think there is going to be no objection?

Mr. BROUSSARD. I yield if I am permitted to do it.

The PRESIDING OFFICER. The Chair will call the Senator's attention to Rule VII:

> It shall not be in order to interrupt a Senator having the floor for the purpose of introducing any memorial, petition, report of a committee, resolution, or bill. It shall be the duty of the Chair to enforce this rule without any point of order hereunder being made by a Senator.

The Senator from Louisiana has the floor.

Mr. BROUSSARD resumed and concluded his speech, which is entire as follows:

Mr. BROUSSARD. Mr. President, I desire to direct my attention first to the very old argument that the duty is always added to the price. I am not one of those who contend that this principle does not apply to some articles which are contained in any tariff bill. We know, however, that there are certain articles that are produced and are used universally in the world, and those articles have a world market. In other words, there is one center at which the price of the article is fixed. It is called the ruling market. In the Southern States, the cotton-producing States, this principle is well recognized, because the quotations for cotton are always the Liverpool price, less the freight. We of Louisiana who produce sugar know this to be a fact, because, unlike the beet-sugar producers, we are compelled to sell our products to the American refiners, and although the American Sugar Refining Co. has one of its largest plants in the city of New Orleans, known as the Chalmette plant, which converts and refines practically all of the products of Louisiana, our price is the New York price, less the freight. So much is that the case, Mr. President, that in consulting with the various departments here in order to ascertain the cost of the freight on sugar from New Orleans to New York, the Department of Commerce informs me, in a letter which I have here, that they have no record of any shipment of raw sugar from New Orleans to New York; but they arrive at what they call a parity by locating one shipment to Boston, and thereby arriving at the cost of the freight from New Orleans to New York.

The point I wish to make, Mr. President, is that the articles which have a world value have their price fixed at one place, and immediately when an article establishes itself as an article universally used the price all over the world depends upon that market; and if any foreigner wishes to sell sugar in the country in which this central or world market is located, the producer or importer of that article must pay not only the freight but the duty in order to get that price.

I listened with attention to the numerous quotations used by the Senator from Mississippi from leaders, Democratic and Republican, in the past with reference to sugar, in which the position was taken that the duty was always added to the price; and it was for that reason that I called upon my good friend the Senator from Mississippi to explain why, when in 1890 under the McKinley bill sugar was placed on the free list and a bounty substituted therefor, notwithstanding the fact that the Cuban and the German and the French and the other foreign sugars were free to enter this country, notwithstanding the fact that all duties were removed, the price of sugar went up, and remained up until 1894, when the next tariff bill was passed, and immediately the price of sugar went down on an average for the life of that bill practically the same amount as the duty imposed under that bill. Then I asked him, further, how he could account for the fact that notwithstanding the fact that in March of last year we increased the Underwood duty by 60 per cent under the emergency tariff bill the results immediately thereafter showed that the price of sugar dropped, and has remained down ever since. It is such a question that it will demand some consideration of the subject to answer it, and my good friend made no effort to answer it except to say that there might be other conditions which affected the price.

That is partly the answer, Mr. President, because an article used universally has its price fixed absolutely by supply and demand; and whenever the annual product of that article exceeds the world demand the price will drop, and whenever it is short the price will go up. Anybody wishing to compete in this country must pay not only the freight, which is an element of cost, but the duty, which is another element of cost, just the same as is the freight; and we must remember that since the statements read by the Senator from Mississippi were made the world sugar market has been transferred from Hamburg to New York, and so it is in New York that the world price is fixed.

Anybody wishing to import sugar here must pay this duty. My good friend, in arguing in favor of the Cubans, flies in the face of every statement made before the Finance Committee. I have here the statements which are taken from the hearings; and at this stage, as I am about to quote from Mr. Atkins, who is connected with the refining interests of this country and is largely interested, besides, in Cuban sugars, I may state that the attitude and the position of the sugar producers of Louisiana has always been against the refining interests of this country—necessarily so, because until the State of Louisiana brought a suit to oust them from the State we were unable to secure fair treatment from them, as we had no other purchaser for our product. They not only imposed upon us the freight from New Orleans to New York, when they refined that sugar in New Orleans and distributed it from New Orleans, but they forced upon us many other impositions and acts of injustice. They claimed the right, for instance, to test our sugars, and, having no other purchaser, we were obliged to submit; and those things went on until the State of Louisiana instituted a suit to oust them.

I have here that petition, which recites all the activities of the American Sugar Refining Co. in trying to get control of the sugar interests and the sugar distribution of this country in order to mulct the American people. Anyone who understands the sugar situation in the United States sincerely regrets that such an estimable gentleman as my friend from Mississippi [Mr. HARRISON] and others here should, under the guise of charges made by irresponsible people, stand on the floor of the Senate and denounce the local or domestic sugar interests, when by doing so they are absolutely defending the American Sugar Refining interests.

Mr. President, in order to show the correctness of the proposition I have laid down, that the Cuban sugar must not only pay the freight but must absorb the duty, I wish to read now from statements all of which may be found in the hearings before the Finance Committee.

Mr. Atkins says:

> I am sure that our opponents will say that the producers have paid this additional duty, which I concede.

Here is an excerpt from the official Cuban memorandum to the Secretary of State. It contains this declaration:

> On May 27, 1921, Cuba was selling her sugar at 3.875 cents a pound. The emergency tariff act was signed by President Harding on the night of the 27th and went into effect on the 28th; immediately thereafter Cuban sugar depreciated to the extent of 60 cents per 100 pounds, which is exactly the difference between the old and the new tariff rate on sugar for Cuba, equivalent to about $2 per bag.

Here is a paper called the Czarnikow-Rionda Market Bulletin, I think published by the Rionda interests, or named after them. Here is what it says:

> The producer * * * is himself paying in great part the increased duty of 60 cents per 100 pounds imposed by the United States emergency tariff.

Here is one from Mr. Rubino, vice president of the Miranda Sugar Co. In his Senate committee brief for the American sugar interests in Cuba Mr. Rubino says:

> Since the enactment of the Fordney emergency tariff Cuban as well as full-duty sugars have sold on a price basis equivalent to free-duty sugars, and at no time has the increased tariff of six-tenths of a cent been borne by the American consumer. The increased tariff, therefore, has in all cases been borne by the Cuban producer.

Here is what the American producers of Cuban sugar, in their brief to the Finance Committee, say:

> Under this act the producer in Cuba has been compelled to absorb this additional duty of 0.6 cent per pound. The day before this act was signed by President Harding Cuban sugars were selling at 3.875 cents and on the following day at 3.275 cents, or a decrease of 60 cents per hundred pounds. It is estimated that the coming into force of this act depreciated the value of the raw sugar made in Cuba about $35,000,000.

Here is what Mr. Rubino said, again, in his argument to the committee:

> It is reasonably certain that any increased tariff will continue to be borne by the Cuban producer.

Mr. President, if we learn anything from political economy, we know that there are certain laws which trade must obey.

The cotton producer in the South must meet the obstacles which are in his way to landing his cotton at Liverpool, and that is his price, less the freight. Should he decline to accept the price at home, after the freight is deducted, his option is to send it to Liverpool, and rather than go to that expense and trouble he accepts the Liverpool price less the freight. I know it can not be challenged that the world price for sugar to-day is fixed at New York, and if you refuse to fix a duty on Cuban sugar which will bring a revenue to this Government you will be remitting to the Cuban people that amount of money, and when you do that I think it is clearly established that you will, if not destroy totally the domestic sugar producer in this country, leave in existence only the low-cost production. Therefore you reduce the production at home to that extent, and you put under the control, the whim, and the caprice of the American sugar refining interests and the Cuban producer the entire American market, which they may manipulate as they please.

If that question were challenged, I would like to make it the subject of a debate solely upon that issue. But as there are many other things to be considered in this discussion I shall pass it by. But I wish now to say again that the world market is New York, and that the price in New York is fixed upon the world's production, and not upon a duty, and when you impose a duty any sugars which enter the United States must absorb that duty.

This is so logical, it is so forcible, that everyone representing Cuban sugar production who offered an argument made that assertion, and must stand upon it, because any other would be incorrect.

I wish more Democratic Senators were here. Anybody hearing that would say, "Why does he want a duty if the price is fixed at New York? Why does he want a duty if the price does not depend upon the duty, but depends upon the world production?" That is a question which logically any intelligent human being who likes to consider a proposition fairly would put forward, and I am glad to meet it. I will explain it in this way: No matter what line of industry or what line of business you may select, it is inevitable that you have your high cost production and your low cost production. Start two brothers in the same town with the same opportunities, and one very soon will conduct his business more economically than the other. So it is in the sugar factories; so it is in running cotton plantations; so it is in operating sawmills, and in the cattle business.

Why do we want a duty, and why do we want a 2-cent duty against Cuba? As I stated before—and I do not believe it can be controverted—the price of sugar is fixed by the world production. It is admitted by everybody that the cost of Cuban production is less than the cost of American production. But in Cuba you have also your high cost production and your low cost production. Let us assume we have no tariff duty. The very lowest production here is still higher than the highest Cuban cost of production.

This article is affected by the world production and demand. The tariff is merely a forcing of the payment by the foreigner of an additional cost in order to enter the sugar here and to sell it. If he has no duty and there is an overproduction of sugar, what will become of the American producer? The low-cost producer in Cuba will put the high-cost producer in the United States out of business. The price will drop below the return required in this country to enable our producers to produce and to finish the article.

In conditions which are variable in all lines of industry, especially in the sugar business, we want such a tariff that, under extraordinary conditions unfavorable to us, we may be preserved, because we are adding the cost to this man. Under ordinary conditions, as I shall read from the Tariff Commission itself, anyone wishing to sell sugar in this market must not only pay the freight to bring it here but he must deliver it in New York without having any cost added by the man who buys it, and therefore he absorbs the duty. In other words, under normal conditions the foreigner absorbs the duty. When there is overproduction the domestic producer has the advantage and will not be destroyed.

In order to cover this proposition, I have here from the Reciprocity and Commercial Treaties, page 333, just exactly the line of my argument, because many Senators may think that my statements are not logical. I wish to read that, because I think it is very significant, and the only argument, as I take it, that we have to meet is the charge made by those who want a low duty, that the cost is added to the price.

I read now from page 333 of the Reciprocity and Commercial Treaties, published in 1919:

> Chart III presents confirmatory evidence. In this chart there is shown by weeks, for the period from 1900 to the outbreak of the war in 1914, the relation of the New York price of 96 degrees centrifugal sugar to "Hamburg parity," or the equivalent, in cents per pound for 96 degrees centrifugal, after allowances have been made for the difference in grades, of the price at which 88 per cent analysis Hamburg beet sugar can be laid down in New York with the duty paid.

I wish to say this, that it was during the World War that the world market definitely shifted from Hamburg to New York, when there was so little sugar going to Hamburg for exportation, and all of it coming from the Western Hemisphere was marketed through New York. We maintained that supremacy, and New York is still and will remain the world market. So that when you go back of 1914 you have a condition which in a measure may justify some of the statements read by the Senator from Mississippi. I read further:

> As long as there were substantial imports of European beet sugar the New York price of sugar was based on the Hamburg price—itself determined at London, the ruling market—and normally was approximately equal to Hamburg parity in New York. The freight from Hamburg to New York is generally about the same as the freight from Hamburg to London. If the customs duties of both countries be disregarded the London price would under these conditions be equal to the New York price. But the freight from Cuba to New York is substantially less than the freight from Cuba to London.

So that the Cuban finds it to his advantage to market here. It costs him less. I continue reading:

> As a consequence, when the New York price was equal to Hamburg parity the New York bid for Cuban sugar f. o. b. Habana would be higher than the London bid.

In other words, the same offer would be more to the Cuban producer, because his freight was considerably less, which he absorbed, and he will absorb also the duty if we do not put a duty on this sugar, for the same reason. I continue reading:

> Prior to 1903 it had been necessary every year, at least for many years, to import European beet sugar in order to meet the American demand. In 1903, on the other hand, the domestic production of cane and beet sugar, the imports from the favored possessions of the United States, and the Cuban exportable surplus were all unusually large and, together with the imports from Java and the British West Indies, were much more than sufficient to satisfy the American demand at a price equivalent to Hamburg parity. As a consequence, the American price fell below Hamburg parity. As has been indicated, a fall below Hamburg parity would result in the diversion of Cuban exports to London only if great enough completely to offset the advantages in regard to freight rates which the New York market offered compared with the London market for Cuban sugar. In the spring of 1903 this was the case—for the first time in 20 years—and as a consequence there were Cuban sales to London and there were practically no imports of beet sugar into the United States.
>
> A fall in the price of sugar below Hamburg parity is not conclusive evidence, therefore, that the price of sugar to the American consumer is lower than it would have been in the absence of Cuban reciprocity. It may merely indicate conditions in the American market of supply in relation to demand which result in there accruing to the American consumer instead of to the Cuban producer the principal gain from the lower cost of transportation from Habana to New York as compared with the cost from Habana to London. In 1903 there were, as has been shown, some exports of sugar from Cuba to London. The average amount (0.36 cent) by which the New York price was below Hamburg parity from February to May, 1903, may be taken as approximately the maximum possible amount of excess of Hamburg parity over the New York price under equal tariff treatment of the European and Cuban sugar, and with shipping costs on the various trade routes remaining as they were in 1903. If the New York price had fallen below this point, Cuban sugar would have been diverted to London until the New York price rose again.
>
> Under reciprocity, the New York price may fall to a point more than 0.36 cent below Hamburg parity, to the amount by which the duty on Cuban sugar is less than the duty on German sugar, i. e., 0.337 cent until March 1, 1914; 0.2512 cent since March 1, 1914. This makes the lowest possible New York price under Cuban reciprocity equal to 0.697 cent below Hamburg parity under the tariff acts of 1897 and 1909 and to 0.61 cent per pound since March 1, 1914, under the tariff act of 1913. Not until this point is reached will Cuban sugar be diverted to London. This statement, however, requires some

qualification. It is based on the assumption, as stated above, that freight rates and other expenses incidental to transportation have remained constant since 1903. In fact, these charges had increased even prior to the war, and in the years preceding the outbreak of the war the freight advantage in favor of Cuban sugar was somewhat over 0.36 cent per pound. The New York price under normal conditions could therefore fall below Hamburg parity prior to March 1, 1914, by somewhat over 0.697 cent and since March 1, 1914, by somewhat over 0.61 cent. During short periods of time, moreover, and especially if shipping conditions from Cuba to Europe should be unfavorable, the Cuban exporters would accept bids below what would be for them a profitable basis during longer periods. With the Cuban sales organization and shipping schedules adapted to the prospective marketing of the Cuban sugar crop in the United States, the sudden transfer to another market would always involve inconvenience and costs, and these considerations would lead to the acceptance by Cuban exporters of what might otherwise be considered unacceptable bids for their sugar. On the other hand, the New York bids are often out of harmony with the Cuban offers, and at such times the New York market quotations may be merely nominal, no business being done at the quoted prices. Nevertheless, the length of the period in 1910 during which the New York quotations were exceeded by Hamburg parity by approximately 0.90 cent indicates that with shipping costs as they were prior to the war, the New York price of sugar could fall below Hamburg parity by at least 0.90 cent per pound without diverting Cuban shipments to London.

I have here also something from the United States Tariff Commission, entitled "Refined sugar. Cost prices of present product." Here is the effect of the tariff on prices in dealing with sugar:

Of more importance to the consumer of sugar than the effect of the tariff upon the profits of refiners is the effect of the tariff upon the price of the sugar which he buys. It is hopeless to attempt to form a judgment on this point by a simple comparison of price statistics with rates of duty before and after a change in the tariff. Many other variable factors such as good or bad seasons, improved methods of production, combination or competition, political conditions, costs of transportation, discovery, invention, war, growth of population, changes in taste of consumers, changes in the quantity of circulating medium, all operate together with the tariff to affect price, so that the actual price is the resultant of all these interacting forces and does not indicate the isolated effect of any one of them. For example, by the act of 1890 the duty was lowered and the average price of refined sugar during the continuance of this act was lower than under the preceding act. On the other hand, by the act of 1894 the duty was raised, yet in spite of this the average price of sugar during the continuance of the act of 1894 was actually lower than during the continuance of the act of 1890.

I wish now to read from page 23 of the same pamphlet:

Similarly, when the duty is increased, foreign producers, until they have accommodated their supply to the new conditions may be compelled to bear in whole or in part the increased burden of the tariff. There is some evidence that this was the case immediately after the act of 1894. This act increased the duty from zero to about 0.84 of a cent per pound. Referring to the chart (fig. 1) it will be seen that the foreign price of raws immediately fell from 2.9 to 2.1 cents per pound, and remained low during the three years covered by this act. So considerable was the decline that the position of the consumer of refined sugar was actually improved, the average price being slightly less than under the preceding act under which sugar was admitted free. In 1897 the duty was still further raised, but this time no further decline in foreign price is observable. This was the period of the Spanish War, which presumably affected adversely conditions of production in Cuba, the chief source of supply, and so tended to keep up the foreign price.

I might say, and it is within the knowledge of everybody here, that we had the same experience under the emergency tariff law.

Mr. President, I desire now to call attention of the Senate to the rates under the Underwood law. That was the act of 1913. We had an effective duty against Cuba of 1 cent. By the way, Mr. President, I would like to state now that in discussing the effect of the duties or in discussing what duty should be imposed on sugar it is useless to consider any but the Cuban sugar. The Senator from Mississippi [Mr. HARRISON] wanted to know what we had done for Cuba. We have absolutely taken her under our protective system since 1903 by telling the world that we would give Cuban sugar a 20 per cent preferential. So that whatever rate we fix does not affect the supply of the Cuban sugar to this market, because no matter how we raise or lower the duty the preferential in favor of Cuba is always retained, and it assures the American market to the Cuban sugar producer. It is a great thing for Cuba. It is the one single crop that she raises, outside of tobacco, a little coffee, and other industries of small importance comparatively. When we made the treaty with Cuba we allowed her a preferential of 20 per cent of whatever rate we might fix. It is a fact that, except when Cuba stored away 1,500,000 tons of sugar in 1920 and tried to fleece the American public by holding it for 24 cents a pound, in recent years Cuba has supplied over 99 per cent of all the importations of sugar into this country. So when we speak of any duty at all it is useless to think of the duty which we fix for the world, because Cuba is entitled to 20 per cent reduction under that rate.

Under the Underwood law there was a 1-cent tariff effective against Cuba. Under the emergency tariff law we raised it to 1.60. The House passed the Fordney bill, which provided for a duty of 1.60, the same as the emergency tariff law. The Finance Committee of the Senate have reported the same duty. I have offered an amendment asking that the duty be increased to 2 cents per pound. I do not know what the Senator from Mississippi meant when he said there were 52 Senators who have signed an agreement to vote for it. I offered the amendment. I understand from the other side that they have not any signatures, and I know I could not get 10 on this side if I were to give away both of my hands. I am sorry to say it, but it is a fact that they would not vote for a 2-cent duty. So I think that the remarks of the Senator from Mississippi mean nothing.

I want to read into the record the different rates which have been imposed on sugar by both parties in the past. The 2-cent rate is not an excessive rate. I am not saying that merely because I believe it but because I have the records which will prove it. It is not an excessive rate even under the theory of those who do not believe in protection but are willing to accord to a home industry that amount of protection which will equalize the cost of production at home and abroad. That is all I am asking under the 2-cent rate, as I will demonstrate by figures from the Tariff Commission and from other sources.

In the time of George Washington, under the act of July 4, 1789, we had a tariff of 3 cents on loaf sugars, and in the act of 1790 a tariff of 5 cents a pound. In the act of 1794 the rate was the same as that of 1790, except on refined sugar, where we had an additional 4 cents, so that the refined sugar at that time had a duty of 9 cents. The rate on raw or loaf sugar, as they called it then, remained the same. It was not the loaf sugar of to-day. It was a rough loaf sugar. At that time Louisiana had not perfected the system which permits the manufacture of the present sugar-cane sugar all over the world. It was demonstrated as a practical proposition after that date.

In the act of 1800 the rate was one-half of 1 cent per pound. In the act of 1816 brown sugar was 3 cents, white clayed or powdered sugar 4 cents, lump sugar 10 cents, and loaf or candy sugar 12 cents.

In the act of 1816 brown sugar took a rate of 2½ cents and white clayed sugar 3½ cents. In the act of 1842 raw sugar and brown clayed sugar took a rate of 2½ cents, all other sugars not refined 4 cents, and refined sugar 6 cents.

The Walker tariff act of 1846 gave a rate of 30 per cent ad valorem on sugars of all kinds. The act of 1861 gave three-fourths of a cent on raw sugar, 2 cents on refined sugar, and 4 cents on refined sugar when tinctured, colored, or adulterated.

The act of 1862 gave the following rates: Sugars not above No. 12 Dutch standard of color, 2½ cents; sugars from No. 12 to No. 15 Dutch standard of color, 3 cents; sugars above No. 15 and not above No. 20 Dutch standard of color, 3½ cents; refined sugar and sugar above No. 20 Dutch standard of color, 4 cents.

In 1864 the duties were 3, 3½, 4, and 5 cents on the grades of sugar just named. In the Morrill Act of 1883 sugars not above No. 13 Dutch standard were 1.4 cents per pound; for each degree above 75° an additional four one-hundredths cent per pound; 96° sugar, 2.24 cents per pound; sugars above No. 13 and not above No. 16 Dutch standard of color, 2.34 cents; sugars above No. 16 and not above No. 20 Dutch standard of color, 3 cents; above No. 20 Dutch standard of color, 3½ cents.

The McKinley bill gave us free sugar and gave us a bounty in place of the duty. Then we had the other laws with which all of us are familiar.

I wish now to call attention—and I have the records here obtained from the Department of Commerce—to the duties imposed by foreign countries at this time on sugar. Argentina imposes a duty of 3.49 cents per pound; Belgium, 3.50 cents per pound.

Mr. SHEPPARD. Is the Senator speaking about refined sugar?

Mr. BROUSSARD. No; this is 96° test. I have all the various grades of sugars and the duty on each, but I am merely taking the 96° because it is to it that we are seeking to apply the rate in the pending bill.

Mr. SHEPPARD. These countries also impose duties on other types of sugar?

Mr. BROUSSARD. Oh, yes. Not only that, but the duties quoted by me do not carry what they call an additional duty, which is imposed in most countries. There are certain cases in which they impose other duties, due to treaties which they have with certain countries. Those are the preferred nations. I am taking the lowest duty.

Italy imposed a duty of 2.68 cents per pound; Norway, 3.19 cents per pound; Portugal, 11.76 cents per pound; Sweden, 12.119 cents per pound; France, 8.64 cents per pound; United Kingdom, 4.994 cents per pound; and Canada, 2.27 cents per pound. All these figures and the conversions are made by the

department. So a 2-cent duty is below any duty of any country I have read.

Mr. SHEPPARD. Can the Senator tell us whether these duties represent the policy of the countries in the past or whether the countries have lately increased the duties on sugars?

Mr. BROUSSARD. As is known, England was for many years a free-trade country, but to-day her duties on many articles are in excess of duties we are imposing in the pending bill. For instance, on this particular commodity her duty is two and one-half times what I am asking for. Her duty is 4.994 cents per pound, while I am asking only 2 cents per pound. Canada imposes a duty of 2.27, but she has many other items which must be considered before the collector finally determines the rate. I have taken duty on sugar of 96° test without any other additional basis. I thought that was sufficient.

Mr. KENDRICK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Wyoming?

Mr. BROUSSARD. I yield.

Mr. KENDRICK. I wish to ask the Senator whether, in some instances, the unusually high duties on sugar referred to in the table from which he has just been quoting were not imposed by Democratic administrations?

Mr. BROUSSARD. Some of them were.

I have a most interesting table which I think very valuable. My contention has been, and it has been the contention of the Louisiana sugar producers long before the beet-sugar industry ever developed in this country, that the small production of Louisiana sugar always forced the market down when we were ready to sell. We did not have enough sugar to compete with imported sugar all the year around. Due to our increased production, and mostly due to the increased production of the beet-sugar people, the refiner has been forced from the very beginning to reduce his margin or his charges for refining sugar. He finds, for instance, that the Central West or the middle section of the United States is almost entirely supplied with beet sugar.

Beet sugar is a finished product; it is the refined sugar; in other words, it competes with the American refiner's sugar, the trust article. If any Senator would like to know—and I am digressing now—to what methods the Sugar Trust resorted in order to crush the domestic industry, all he has to do is to apply to the Attorney General for a copy of the proceedings in the suit which was filed to dissolve the American Sugar Refining Co. Such action was taken by the Government, I think, following the action of the State of Louisiana against the American Sugar Refining Co. in our State. In those proceedings Senators will see the various schemes that the sugar refining company employed in order to destroy the domestic sugar industry. Due to the domestic industry, the refining companies have been forced to give up most of their differential in the cost of refining sugar. The table which I have here shows that. For instance, the table begins with figures for the year 1860. In 1860 the charge for refining sugar——

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Florida?

Mr. FLETCHER. If the Senator from Louisiana will yield just at that point, before taking up the subject with which he is about to proceed, I should like to ask him a question.

Mr. BROUSSARD. I am glad to yield to the Senator from Florida.

Mr. FLETCHER. Inasmuch as the Senator from Louisiana alluded a moment ago to the production of sugar in Louisiana, I desire to inquire of him whether the industry has advanced there; what its present condition is as compared to previous years; and also what its prospects are?

Mr. BROUSSARD. I am glad to answer the question of the Senator from Florida. The Senator from Florida has been here, I think, for many years. I desire to say that there is no industry in the world which has been subjected to so many reversals as has the sugar industry of this country. Whenever we have prepared to increase our production; when those engaged in that industry have, through thrift and economy and such encouragement as has been offered to the production of the cane, produced in one year nearly 600,000 tons; after we had built up the industry and were prepared to still further increase our production the Hawaiian Islands were annexed to the United States; then Porto Rico was annexed; then there was extended to the Philippines the right to export here 300,000 tons of sugar free of duty; then we made a concession to Cuba of 20 per cent; then came the tariff of 1913, which promised free sugar in 1916.

We can not build up an industry in spurts and jumps. A man will begin building a factory in Louisiana, say—and some of our plants are worth $300,000—and by the time he has half finished paying for the plant there is a change in the tariff or there is a new policy adopted by the Government which affects the price of sugar. The harm, however, lies not so much in the effect on the price, I will say to the Senator, but it demoralizes the man who finances the builder of the factory.

For instance, the Cuban agitation was first for annexation. Let us say that a bank in New Orleans had advanced $100,000 to an operator who wants the money to advance to the cane grower. He already owes the bank. Say there is a bad crop. There is an agitation carried on as to conditions affecting sugar—and the greatest propagandist that this country ever knew was the American Sugar Trust; they started the propaganda and the New York bankers joined in—and the New Orleans bank calls in this man and says, "Mr. Fletcher, we can not advance you more than about 25 per cent of what you need next year." The result is that there is a lack of confidence and an inability to carry on, and we are waiting from day to day for the final stroke. Then we are permitted to live again and once more to get on our feet. Then something else happens.

The possibilities, I will say to the Senator, in my State are great; the possibilities are also great in Texas and in the Senator's own State of Florida, where the soil on which sugar is grown is similar to that of Louisiana. We have produced in Louisiana as much as 600,000 tons of sugar in one year. We produced nearly 440,000 tons during the last year. If encouraged we can double that production; Texas can join us and Florida can join us. If we ever reach the point where we are determined to establish a domestic sugar industry here, it can be done. If we did it we would have competition in sugar; but I will say to the Senator from Florida, there is an absolute impossibility of competition if we destroy the domestic sugar industry. In that case there will be no competition at all.

In the suit against the refiners, as to the proceedings in which I have invited Senators to ask the Attorney General for a copy, the court rendered a decree only three months ago.

I have a copy of it here. Long ago the American Sugar Refining Co. came and said that they had complied with all of the prayers of the petition of the Attorney General. Then they got the Attorney General to file a motion in court asking that the suit be dismissed; but the Federal court in New York refused to dismiss it. It perpetuated the injunction and said, "You continue obeying the law, and if later you make a showing that you are carrying out what you say you are doing we shall remove the injunction." However, they are under injunction now. But these people have fought the case in court since 1914—for eight years. Now they say they have complied with the orders of the court. All we need to prevent the extravagant profits which have been disclosed during the discussion of the tariff bill is the enforcement of the antitrust law. But it is difficult to do it where three or four plants on the seacoast can do all the refining that this country needs.

Mr. President, in 1864 the refiner charged 5.375 cents per pound for the refining alone, which is what we in Louisiana call the laundering of sugar—just the washing. In other words, they were then charging more merely to refine the sugar than we can get for the finished product in Louisiana to-day.

In 1865 they charged 7.156 cents per pound; in 1866, 5.219 cents per pound; in 1867, 3.720 cents per pound; in 1868, 2.820 cents per pound; in 1869, 2.630 cents per pound. I do not wish to read all of the figures, for they are too numerous; but in 1871 the charge was 2.470 cents per pound; in 1877, 1.908 cents per pound; in 1879, 1.362 cents per pound; in 1882, 1.437 cents per pound; in 1884, 0.923 cent per pound; in 1885, 0.712 cent per pound; in 1893 they must have had an opportunity to increase the price, for they then charged 1.153 cents per pound. In 1895 the charge was 0.882 cent per pound; in 1899 the charge was reduced to 0.5 cent a pound for refining. That was due to the growth of the beet sugar in the West. So the figures run through the list. In 1913 the charge was 0.772 cent per pound.

Mr. RANSDELL. Mr. President, will my colleague permit me to interrupt him?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to his colleague?

Mr. BROUSSARD. I yield.

Mr. RANSDELL. If my colleague will permit me, I have before me a memorandum regarding the production of cane sugar in Louisiana, which contains some interesting figures which supplement what my colleague said in answer to the question of the Senator from Florida. Very briefly, the memorandum shows that in Louisiana in 1921 226,366 acres of sugar cane were harvested for sugar production; that the tillable area of land in the sugar-cane parishes of Louisiana amounts to 1,963,554 acres; and that there is an additional area of ap-

proximately 833,000 acres in the sugar parishes capable of drainage. Further, it is set forth that there is a possible production of 1,000,000 tons of sugar in Louisiana; that they ought to make at least 1,000,000 tons and could make a great deal more.

If the Senator has no objection, I will ask unanimous consent that the memorandum in full be inserted in the RECORD at this point.

Mr. BROUSSARD. I will be very glad to have it inserted.

The PRESIDING OFFICER. Without objection, the memorandum presented by the senior Senator from Louisiana will be printed in the RECORD.

The memorandum referred to is as follows:

MEMORANDUM REGARDING SUGAR CANE.

The final returns on Louisiana sugar and sirup, 1921, prepared by the Bureau of Markets and Crop Estimates of the United States Department of Agriculture, dated May 26, 1922, herewith attached, show that 226,366 acres of sugar cane were harvested for sugar production, 6,079 acres for sirup production, and 46,031 acres were reserved for seed, making a total of 278,476 acres in cane in 1921.

In the other table attached herewith, taken from the Government census of 1920, you will note that the tillable area of land in the sugar-cane parishes of Louisiana amounts to 1,963,554 acres, and that an additional area of approximately 833,000 acres in those parishes is capable of drainage, making a total possible tillable area in the sugar-cane parishes of Louisiana of 2,796,554 acres.

Considering the area devoted to sugar cane in 1921 as compared with the present tillable area in those parishes, we find that less than one-sixth of the present tillable area and less than one-tenth of the possible tillable area in these parishes was under cultivation for sugar cane last year. The cane grown in 1921 produced more than 324,000, or approximately one-third of a million, tons of sugar. If, therefore, the cane acreage in these parishes in Louisiana should be increased threefold, approximately 1,000,000 tons of sugar would be produced in Louisiana. At the same time the sirup production in those parishes might be increased from approximately 6,500,000 gallons to 20,000,000 gallons. This could be done without utilizing one-half of the present tillable area in the sugar-cane parishes and without bringing into cultivation any part of the area still capable of drainage.

This possible production of 1,000,000 tons of sugar does not take into account the possible increase in the yield of cane through the use of better cultural methods nor through the development of better sugar-cane varieties. It does not take into account the possible cane-sugar producing areas in Texas, Florida, and other Southern States. It would seem, therefore, that Louisiana alone is capable of producing at least 1,000,000 tons of sugar annually and that under suitable conditions all of the sugar-cane States could be depended upon to produce considerably more than that amount of sugar annually, not to mention the possible increased output of cane sirup.

Mr. BROUSSARD. Mr. President, the table to which I have referred bears out the statement which I am about to make that sugar is the one article of household consumption which has continually decreased in price. The table gives the figures as far back as 1860, but it is a fact that we may go further back than that and show the price-declining tendency. In 1866 it was 21.562 cents per pound; in 1867, 16.875 cents a pound; 1868, 16.32 cents per pound, indicating a decline in the price right along. In 1869 the price was 10.56 cents per pound; in 1870 it was 9.484 cents per pound; in 1879, 8.785 cents per pound; and so on down through the list. In the early nineties it was 4.346 cents per pound. During the period from 1895 to 1899 the average price was 4.5 cents. In the next decade it was slightly higher than 4.5 cents on the average, but, generally speaking, throughout the course of years there has been a gradual decrease in the price of this commodity; in other words, sugar has been costing less and less every year.

I wish to say, Mr. President, that both during the World War and after that war and at the present time, with the duty of 1.60 cents, which is denounced here, we are getting much cheaper sugar than any other country in the world to-day. However, as stated by the Senator from Mississippi, the price has recently gone up, because there is no local competition now, all of our domestic sugar having been consumed, and therefore we have to pay more for the imported sugar.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Florida?

Mr. BROUSSARD. I yield.

Mr. FLETCHER. Is it not true also that the crop is somewhat short in Cuba, so that the supply is more limited?

Mr. BROUSSARD. I will say to the Senator that during the latter part of last year the Cubans stored 1,500,000 tons of sugar—if I am correct about that, and I am nearly certain that I am—which they refused to sell to the American people for less than 24 cents. It was only when the administration here, through the Attorney General, availed themselves of certain importers—and the Senator will remember the De Ronde claim and another claim for sugars which the Government had asked them to go to Argentina to get—it was only when the Government broke that price that the bottom fell out of this fictitious value, and then the Cubans could not sell at all, because they had borrowed more money on this stored sugar from the New York bankers and the Canadian bankers than they could get on the market. Therefore the sugar was forced to remain there. Gradually they are letting it out, but there has been a surplus. I could not say whether there is any of that left or not, but I am under the impression that there must be.

Another thing: The beet-sugar grower may reduce his crop from year to year, and we in Louisiana may do it also, because in Louisiana our cane is planted, and from that we get what we call the seed cane. Then the following year we cultivate the rattoons. We work it two years.

The well-balanced farmer would have an equal quantity of rattoons to the plant cane so that if we wanted to shorten the crop for next year all that we would have to do would be to plant none this fall for next spring, and we would cut our crop next year. Those conditions, however, do not prevail in Cuba. They plant it, and that plant cane is good for 10 or 12 or 15 years. Now, who in Cuba will go and destroy these rattoons? As a matter of fact, that cane is better the third year than it was the first year, and it is less expensive to cultivate it, because they have only to weed it, and the first year or two the weeding of it is expensive, but after that, when the plants have continued from year to year to shade the ground, there are no more weeds. You could not induce one of those fellows to shorten his crop unless you should go over there and destroy it, and you have no interest in doing that because it would cost you or him something to destroy it, and if he did not work it he would do what he does every year anyhow. They do not work it. They do not cultivate it. Those are the conditions. The weather may affect it, but to my notion the statistics furnished there by the Senator from Mississippi, I think, are not correct.

Mr. President, I have here a table which shows the domestic production of sugar. I think it shows the most marvelous growth of any industry I ever saw—the best interest, for instance. It has multiplied in a very short period of years 1,800 per cent. It has had some reverses. When the agitation for the annexation of Cuba came up, and after that the Cuban treaty, there were something like 300 plants that were under construction or ready to begin construction, and some in various stages of completion were abandoned. There have been great setbacks; but I should like to show, and put in the RECORD, the production. This table gives the beet-sugar production, and then gives the Louisiana production separately. There you will see the various years, and if you follow the tariff acts and the agitation for annexation or for a treaty, which affects the sugar industry, you will see it reflected right here, not only in the Louisiana sugar, but in the beet sugar.

I ask permission to insert this table in the RECORD. (See Appendix A.)

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none.

Mr. BROUSSARD. We come down now to the point which I think would justify even a Democrat in voting for this duty, and that is the difference in cost of production in this country and in Cuba.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Florida?

Mr. BROUSSARD. I do.

Mr. FLETCHER. Before the Senator concludes I should be glad to hear him discuss also the effect of this duty as a revenue-producing factor; that is to say, to show that whatever duty we levy on sugar produces a definite revenue, and that revenue goes into the Treasury of the Government and not into the pockets of the producers.

Mr. BROUSSARD. Absolutely. I have demonstrated already that the consumer does not pay this duty. I think the Senator remembers that there was a duty on coffee some years ago, and we remitted that duty. In other words, we put coffee on the free list. What occurred? The Brazilian Government did not want the coffee producers to pocket the difference. What did they do? They put an export duty on coffee of exactly the same amount that we had formerly had on it, and that amount of money was transferred from the United States Treasury to the treasury of the Brazilian Government.

Mr. FLETCHER. I think they also organized a great trust, backed by the Government.

Mr. BROUSSARD. Yes; absolutely.

The amount of revenue that will be raised under this bill is very easy to determine. If you put a duty of 2 cents on it—I think we import between 2,225,000 tons and 2,500,000 tons of 2,000 pounds each, which, multiplied by 2 cents, would give the amount of money which the Government would receive. Here is the difference between the collection of that duty and the collection of any other: There are only a few ports where sugar is imported into this country. You can count them all on the

fingers of one hand. There is some sugar imported from countries located on the Pacific Ocean, imported into San Francisco. Then there are the ports of New Orleans and Savannah and Baltimore and Boston and Philadelphia and New York. I do not think much sugar is imported anywhere else, so that the cost of the collection of that duty is nominal.

For comparison of costs, reference made and figures used are from three recognized and accepted official Government sources and one Cuban statement:

(a) War Industries Board Bulletin 13, "Prices of sugar and related products," on page 5, says the pre-war cost in cents per pound at factory was, for Cuba, 1.45; Louisiana, 3.98.

(b) In the hearings before the Ways and Means Committee, January 18, 1921, Philip G. Wright, of the United States Tariff Commission, testified that the average pre-war costs in cents per pound were: Cuba, 1.70; domestic beet, 4.123 (raw basis, 3.492); Louisiana, 4.480. (By reference to Tariff Information, series 16, page 32, and Miscellaneous Series 53, by the Department of Commerce, it is clear that the figures used by Doctor Wright were for sugar delivered in United States, exclusive of duty.)

(c) Miscellaneous Series No. 53:

Average cost of production in cents per pound f. o. b. factory: Louisiana, 3.973; Cuba, 1.445.

Delivered in United States: Louisiana, 3.975; Cuba, 1.719 (exclusive of duty).

(d) In the Times of Cuba, June, 1921, issue, it says:

> Cuba has made sugar profitably in former years as low as 1.50 cents a pound or less.

Analyzing these several independent sources, three of them official United States Government, the other Cuban and written in Cuba's interest, we find that to equalize costs we must have the following tariff rates as against Cuba:

War Industries Board—

Now I am giving the comparative costs of sugar from different sources, all of which bear out the request that we are making—

War Industries Board—	
Louisiana cost	3.98
Cuban cost	1.45
Tariff to equalize	2.53
Department of Commerce, Miscellaneous Series No. 53:	
F. o. b. factory, Louisiana	3.975
F. o. b. factory, Cuba	1.446
Tariff required	2.529
Tariff Commission, by Doctor Wright:	
Louisiana cost	4.480
Cuban cost	1.70
Difference	2.78
From this he makes deduction to equalize raws	.379
Tariff required	2.401
Times of Cuba:	
Cuban cost	[1] 1.50
Profit of	1.00
Sell at	2.50
War Industries Board—	
Louisiana cost	3.98
Profit	1.00
Sell at	[2] 4.98

So that, Mr. President, I think these figures clearly demonstrate that to equalize the cost of production here and abroad the rate proposed by the committee is totally inadequate, and that we should have not less than 2 cents protection.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Texas?

Mr. BROUSSARD. I do.

Mr. SHEPPARD. What does the committee propose?

Mr. BROUSSARD. One and six-tenths cents against Cuban sugar.

Mr. President, I have here another matter which I think those who are interested in giving a chance to the sugar industry may take into consideration. I have tried to ascertain the cost of transportation of sugar from New Orleans to New York, and then from Cuba to New York. For that purpose I had written to the division of operations, United States Shipping Board Emergency Fleet Corporation, for the information, and here is the letter. It is addressed to Mr. John M. Rogers, Washington, D. C.

> DEAR SIR: With reference to your inquiry concerning ocean rates on sugar from Cuba, would advise that going rates are nominally as follows:
> From north side Cuba to New York, 15 cents per 100 pounds.
> From south side Cuba to New York, 17 cents per 100 pounds.
> From north side Cuba to New Orleans, 13 cents per 100 pounds.
> From south side Cuba to New Orleans, 15 cents per 100 pounds.

I have stated before, Mr. President, that when we market our sugar we sell it to the American Sugar Refining Co., who refine it. They allow us the New York price, less freight to New York, although that sugar never leaves New Orleans. It is manufactured there and then distributed from that point; but in order to show the disadvantages to which the Louisiana sugar producer is put, both by reason of the tariff and by reason of the internal conditions in this country, I wish to read now what is said with reference to the freight rate from New Orleans to New York, which is deducted from our price.

> With regard to the rate on sugar from New Orleans to New York, such shipments are very infrequent, and it is therefore very difficult to say just what the rate is.
>
> They have no rate for it.
>
> For your information, however, the last record we have of a fixture from New Orleans shows 22½ cents per hundred pounds was paid to Boston, which would make the parity on New York 19½ cents. This rate was paid last December.

That is from the manager of the chartering department.

Mr. FLETCHER. That is the water rate?

Mr. BROUSSARD. Yes; that is the water rate. Senators will understand that this Cuban sugar pays 13 cents per hundred pounds freight rate to come into New Orleans. That is their transportation cost. Nineteen and one-half cents per hundred pounds for an imaginary freight expense is deducted from our price. But what is the additional transportation cost? For instance, I have here the commodity rates on sugar in barrels from the plantation to New Orleans. For instance, the rate for 70 miles is 27 cents per hundred pounds by the carload. So here is the disadvantage to which we are put; we have to pay the local transportation for a distance of, say, 70 miles—of course the other rates are greater, but I am coming to that—a rate of 27 cents, and then we have deducted 19½ cents from the New York price less the freight, whereas the Cuban is given this advantage in competing with American products produced by American labor, paying taxes to American institutions, and using American material, of landing his sugar in New Orleans at 13 cents. We are put in the almost ridiculous position of having sugar come in to compete with us at a cost of 13 cents a hundred pounds, while we must, for a distance of 70 miles, pay 27 cents plus 19½ cents per hundred pounds. I have here a list of the stations, with the rates all given, and it seems to me that something should be done to reduce these rates, because in all instances the foreign product reaches the home market here at a much less expense than the cost to the farmer less than a hundred miles away in marketing his product.

Mr. SHEPPARD. The Senator means, of course, that the freight rates should be reduced?

Mr. BROUSSARD. I think something should be done or, if we maintain those freight rates, if we do not reduce them to such an extent as will afford us relief, which would be impossible and at the same time maintain an American standard of living in the operation of these railroads, we should at least accord the American sugar producers the proper protection to protect them against the cheaper products of foreign countries coming here at much less freight cost.

That leads me to this thought, I will say to the Senator from Texas, that we voted here on restriction of immigration, and it was the unanimous thought of the Senate that we should limit the number of immigrants to 3 per cent of the nationals of any country already in the United States. I voted for that. There are some Senators on this side who voted that there should be no immigration at all, or only 1 per cent. The only justification we had for that was that we wanted to keep out of this country the cheapest labor, which was trying to find entrance into this country and compete and lower the standards of our employees. We did well to exclude them. But having adopted the policy of excluding them, if we do not protect American products, then we simply open the door to the capital of this country to do as they have done in Cuba. Americans claim they have now invested in Cuba $1,000,000,000 in sugar plantations and factories, and the cry is to save that $1,000,000,000 of investment, and they would have a very low rate. That money is invested in a foreign country, it employs foreign labor, it pays foreign taxes. The people about whom I am speaking live here, they enjoy the protection of our flag; and those who produce here in competition with the cheap foreign products must bear their burden in maintaining this

[1] Or less.

[2] Less 2.50 Cuban price, equals 2.48 tariff required to give Louisiana the same profit as Cuba. Therefore it is clear that Louisiana should have not less than 2.50 cents per pound tariff, Cuban basis, if her product is to meet the foreign sugar of Cuba on an equal basis in the American market.

Government which protects the foreign investor. A correct principle is, if you must keep out the immigrants—and I am for that, because I want to protect labor here—then we should put a duty on foreign products which are produced at a cost lower than that at which the home products can be produced.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Florida?

Mr. BROUSSARD. I yield.

Mr. FLETCHER. Let me see if I get the exact situation. The bill proposes a duty of 1.16 cents a pound. The act of 1913 gave 1 cent a pound, provided that in May, 1916, sugar should be free. Now, the Senator proposes a change from 1.16 cents a pound——

Mr. BROUSSARD. It is 1.60.

Mr. FLETCHER. The bill reads 1.16.

Mr. BROUSSARD. That is on 75° sugar; but there is an addition for every additional degree.

Mr. FLETCHER. Of 1 cent.

Mr. BROUSSARD. That is the scientific way of imposing a duty, because some of the sugars which come here are below 96 test, and, according to the experience of scientists, it has been demonstrated that a duty of 1.16 cents on 75° sugar, when the sugar is reduced in the process of manufacture to 96°, which is the standard test, will be equivalent to a duty of 2 cents a pound, which, when applied to Cuba, in whose favor there is a 20 per cent preferential, would mean a 1.60-cent duty. All tariff acts are written in that way, because one sugar house or factory in Cuba may send 80° sugar; another may send 75° sugar; another may send 93° sugar; and this was so framed, under the advice of the sugar division of the Bureau of Standards, as to be equivalent in every case to the basic duty of 2 cents.

Mr. FLETCHER. Then the rate in paragraph 501 would mean a duty of 2 cents a pound on the sugars we usually import?

Mr. BROUSSARD. Yes; and under the preferential of 20 per cent it would be equivalent to an effective rate as against Cuba of 1.60.

Mr. FLETCHER. What I am trying to get at is precisely what the Senator proposes to do, whether he proposes to strike out 1.16 or leave that as it is and change the other rate, or whether the Senator proposes any change at all.

Mr. BROUSSARD. I have an amendment to offer.

Mr. FLETCHER. The duty is 1.16 and the Senator has been arguing in favor of 2 cents.

Mr. BROUSSARD. Yes; 2 cents on 96° test.

Mr. FLETCHER. That would involve a change in these figures?

Mr. BROUSSARD. Yes.

Mr. SHEPPARD. May I suggest to the Senator from Florida that he is reading from the House text?

Mr. FLETCHER. Yes; that is correct.

Mr. SHEPPARD. The Senate Finance Committee has made a change, has it not?

Mr. BROUSSARD. No; the rate is the same; but I am proposing a change, which I will read now.

Mr. FRELINGHUYSEN. Mr. President, is not this the situation: The rate is 2 cents now, with 20 per cent preferential in favor of Cuba, making it 1.6 cents. The Senator is asking for 2½ cents, making it 2 cents?

Mr. BROUSSARD. Yes. This is my amendment: On page 95, line 18, after the word "degrees," to strike out "1.16" and to insert in lieu thereof "1.45"; and on line 20 strike out "four one-hundredths" and insert "five one-hundredths." When you reach a 96-degree sugar, then you will have a duty of 2½ cents, or, as effective against Cuba, of 2 cents.

Much has been said in the press about what a good customer Cuba is to us, and it has been argued that we should not hurt that market. I have here the Economic Bulletin of Cuba, published at Habana. This is the issue of March, 1922. Cuba imported in 1913 from the United States $75,288,000 worth.

Mr. SHEPPARD. Does that mean goods of all kinds?

Mr. BROUSSARD. Yes. The United States imported from Cuba $131,000,000 worth. I wish to insert this table in the RECORD. I think it gives the facts more plainly. (See Appendix B.)

The next table I have is entitled "Merchandise imported into and exported from the United States." It gives the excess of imports over exports, and the values. I ask to have this table inserted in the RECORD. (See Appendix C.)

Senators will find under this table the following conclusions: Reciprocity with Cuba became effective December 27, 1903. From 1904 to 1921, inclusive—and I wish the Senator from Florida would listen to these figures, because they are very interesting—the total imports to the United States from the island of Cuba amounted to $3,503,244,436. The total exports from the United States to the island of Cuba amounted to $2,240,443,630. The excess of imports over exports amounted to $1,268,800,806. The percentage of imports in excess of exports was 63.92 per cent. In other words, for every $100 worth of merchandise we bought from the island of Cuba she in return purchased from us $63.92 worth, leaving a balance of $36.08 against the United States and in favor of Cuba for each $100 worth of goods purchased by Cuba from us.

Mr. FLETCHER. May I ask the Senator if the table analyzes the character of the imports? I think they must be largely sugar and tobacco.

Mr. BROUSSARD. It is nearly entirely sugar. I have a table here showing the number of tons imported from Cuba covering the same period, and in 1896, previous to our treaty with them, we imported from Cuba 546,586 tons of sugar. At that time we were importing sugar from Germany, France, Spain, and other countries. To begin with, in 1901 we imported 549,702 tons.

To show the effect of the treaty, in 1902 we imported 492,108 tons, but in 1903, immediately after they prepared to increase their production, importations went up to 1,198,249 tons. During the year 1916 they had passed the 2,500,000-ton mark. That, I will again state, shows the great benefits of the treaty to Cuba, because it really puts her under the protective system of the United States and assures her the American market. There is no reason for them to complain when there is no proposition to reduce the preferential in favor of Cuba because, whether the rate be one-half cent or 1 cent or 1½ cents or 2 cents, under the treaty, which is the supreme law of the land, Cuba is still entitled to a 20 per cent preferential which insures her this market as against any other foreign sugar producer. It is merely interference on her part to come here and protest against what we are doing when we are according her a 20 per cent reduction over all other friendly nations in the world. It is intermeddling and should be resented.

I wish to call attention to the enormous amount of money invested in Cuban sugar properties by American capitalists. There is so much literature on the question that one hardly knows what to use. I have here a pamphlet which bears out all the testimony furnished by those who appeared on behalf of the Cuban producers and the American capital interested in Cuban production. They all agree as to the figures given here. I am reading from a pamphlet prepared by Mr. Palmer. It is taken from the hearings before the Finance Committee:

> In the following list of American-owned mills the "capacity" figures represent the approximate output of the largest campaign of each individual mill during the past five years, stated in tons of 2,000 pounds. Assuming that in their year of greatest production the 85 American-owned mills listed ran to capacity, they have a combined annual capacity of 3,116,942 pounds of sugar, equal to 70 per cent of the total amount of sugar produced in Cuba in 1918–19, the year of the island's greatest production.

So we see that all this agitation against the tariff in Washington really comes from Americans who refuse to establish their industries here, and thereby escape the payment of taxes here, escape the payment of transportation to the railroads here, escape the employment of labor which costs them more here, and escape the use of material which costs them more here. They simply go to a foreign country and invest to such an extent that they come back here and say, "For goodness sake, do not impose this rate." They do not say that we do not need protection, but they say, "If you do impose it, then you will destroy American capital invested in Cuba."

I continue reading from the pamphlet:

> Of the 85 American-owned mills, 49 are either owned outright by American seaboard sugar refining companies or are affiliated with them by interlocking officers and directors, as shown by Poor and Moody's manuals. These 49 mills have an average capacity of 47,572 tons per mill, a total of 2,331,033 tons, equal to 53 per cent of the total Cuban sugar production in 1920–21. The 36 American mills not affiliated with American sugar-refining interests have an average capacity of 21,831 tons. The output of the 113 Cuban and European owned mills in 1921 was 18,088 tons per mill.

So that we see that over 70 per cent of the sugar produced in Cuba is American owned. Seventy per cent of all the sugar produced in Cuba to-day is produced in mills owned by American capital. Of the 85 American-owned mills, 49 are owned by American seaboard refining companies. It can easily be seen, unless we afford proper protection to the domestic sugar industry here, that we already have a combination between the Cuban production and the seaboard refiners or the American Sugar Trust which will absolutely dictate the prices of sugar here.

Mr. OVERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from North Carolina?

Mr. BROUSSARD. I yield.

Mr. OVERMAN. How many tons does it take to supply the demands of this country?

Mr. BROUSSARD. Nearly 5,500,000 tons.

Mr. OVERMAN. How much do the sugar producers of Louisiana and the beet-sugar producers supply?

Mr. BROUSSARD. Continental United States, with our insular possessions, can furnish one-half of that.

Mr. OVERMAN. And the other half comes from where?

Mr. BROUSSARD. It comes from Cuba. Cuba has a 20 per cent preferential, so that she has a protection under our system and is bound to get our market.

Mr. OVERMAN. So she furnishes the other half of our consumption of sugar?

Mr. BROUSSARD. She furnishes over 99 per cent of all the sugar importations of this country in the average year.

Mr. OVERMAN. Do we not get sugar from the Philippines and Hawaii?

Mr. BROUSSARD. Yes. When I said our insular possessions, I intended to include the Hawaiian Islands, the Philippines, Porto Rico, and the Virgin Islands.

Now, Mr. President, much has been said, and I know that some one will speak again with reference to the price which domestic sugar industry received in 1920. As the time is short for discussion, I do not think I shall have an opportunity to present the matter again. I shall, however, before taking that up discuss what I have always contended and what my people have always contended would be the result if we were to put such a duty on sugar as to destroy or limit the production of sugar to only a few low-cost producers in this country who may survive under a small duty.

I have here a copy of a memorandum which Mr. Hoover sent to the President on August 22, 1917. I shall read that to show, if we eliminate domestic production and thereby leave the market to the Cuban producer, already in alliance with the American Sugar Trust, what we would have to pay for sugar. In 1917 Mr. Hoover wrote the President as follows:

Certain Cuban sugar producers (who are out of our reach)—

Mind you, we were within reach in this country and our price was fixed. We did not wait until we were called in to have the price of our sugar fixed, but we came forward and asked for a reasonable price to be fixed. But these people were out of reach, Mr. Hoover said, because our profiteering laws did not apply to them.

Mr. Hoover said:

Certain Cuban sugar producers (who are out of our reach) have combined to force up the price of the remaining 1917 Cuban crop, prior to the new crop in December, and have lifted the price of raw sugar in New York from 5.9 cents in June to 7.5 cents, duty paid, on August 16, and this against a three-year pre-war average of 4.2 cents. The recent advance of 1.6 cents alone would represent an added tax upon the American people of over $30,000,000 by the end of December.

So that it will be seen, figuring from August 22, 1917, to the end of December, it is easy to ascertain that they would have actually forced the American people to pay over $90,000,000 to them during that year had they been able to control the market. But the beet sugar went out of the market about that time and immediately there was no more sugar selling in competition with them, and they raised the price 1.6 cents per pound. Senators can draw their own conclusions as to what they would have done if they had absolutely controlled the market.

In the same way all the connected facts show the pool which the Cuban sugar producers formed when they were holding back their 1920 crop in that year. Our 1919 crop was sold just before the pool was formed, and when our crop was out of the market, then the Cubans, who had offered to sell their whole output to the United States Government or to the Food Administration for 6.5 cents per pound, stood out for 24 cents per pound. These facts became known and were published in this country. All of the facts were published in the magazine called "Facts About Sugar" in New York in July, 1920. I wish to insert them in the RECORD, so as to show how they combined there to force the high prices for which the American people condemned the domestic producers, because the people believed that the domestic producers had also been profiteering to that extent. The United States Government knew that there was no more sugar in this country, because it had the right to prosecute the American producers for profiteering. They were forced to go to Argentina and to other countries to import sugar here in order to break that price. It is disclosed here that the Porto Ricans were asked to go into this combination, but as Porto Rico is American territory it appears that the Porto Ricans said, "We can not join this because it would be violating the law"; but the Cubans carried it out, for the reason that Mr. Hoover gave out in 1917 that they were out of the reach of American jurisdiction.

Mr. President, I have frequently heard some comment on the high prices which the consuming public paid in 1920 for sugar, and reference has frequently been made to the fact that the sugar producers of Louisiana got 17 cents for raw sugar and 18 cents for plantation granulated sugar. There was an investigation by a committee of Congress, and I hold in my hand all of the proceedings before that committee as well as the resolution which ordered the investigation. I shall read briefly from the letter of the Attorney General, addressed to the House of Representatives of the United States, under the resolutions adopted by the House. The Attorney General stated:

This implied a determination that, as a practical proposition—

Referring now to the Federal district attorney of New Orleans—

he might successfully contend in court, in the absence of particular circumstances, that a sale of sugar above a reasonable, fair maximum price for this year's Louisiana crop of sugar was an excessive price and therefore a violation of the Lever law. He had before him the fact that Louisiana sugar was selling in the open market at from 20 to 27 cents; that the crop was but 40 per cent of the normal, and that the price was rapidly mounting.

It was the opinion of the department that all these factors would be taken into consideration by the court in considering any prosecutions, and that prosecutions begun in disregard of such considerations would offer no prospect of eventual success.

Then follows the correspondence between the Attorney General and the United States district attorney at New Orleans. So that we see the facts not as the public have been led to believe. There was no law, agreement, or limitation as to what price the Louisiana sugar producers should get, except in case the producers agreed to a certain price, and the only law under which they might be prosecuted would be for profiteering; so that when the fact was submitted to the United States district attorney that the crop was only 40 per cent of normal, that the expense of producing that crop was more than the ordinary expense of previous years, even the war years, that sugar then was selling in the New Orleans market for from 22 to 27 cents when the district attorney reported to the Attorney General that he thought 17 cents for raw sugar and 18 cents for granulated sugar was a fair price for sugar, the Attorney General readily acceded to that; and I wish now to show that the Louisiana sugar producers did not profit by that year's crop even at that price.

You will find on page 2310 of the hearings the testimony of Mr. Joseph B. Chaffe, who testified as to the losses in the year 1920:

In 1920 our losses were rather heavy on cane, because our crops, like those of the beet people, were made on high prices for everything. As to the details, each item of expense entering into the cost is shown here. We have here the figures showing the losses per ton on the crop of 1920. There are four plantations shown. In the year 1920 they lost all the way from $5.23 to $13 per ton on cane in the agricultural end. You must understand that that is the agricultural operation.

So Mr. Chaffe and others who appeared before the committee amply justified the district attorney in agreeing to a price of 17 and 18 cents a pound; and why the Louisiana sugar producers should be criticized for entering into that contract voluntarily when at that very time they could have disposed of their sugar at any price from 22 to 27 cents is beyond my understanding. It seems to me that our sugar producers should be commended for having accepted a price of 17 and 18 cents for sugars for which they were offered 22 to 27 cents per pound. They agreed to this price and lived up to it, some of them even going to the extent of canceling contracts which they had for the delivery of the sugar which they were then manufacturing.

I have only one other item that I wish to bring to the attention of the Senate; but before doing that, Mr. President, I wish to refer to a line of argument made by my friend the Senator from Mississippi [Mr. HARRISON] this morning as to the relative proportion of this duty extended to the cane growers. Our Louisiana contracts for the sale of sugar cane are based on a sliding scale. The grower is paid $1 per ton for each cent or fractional part of a cent for which sugar sells on the open market during that week. In other words, at the end of every week the average of the quotations of yellow clarified sugar is taken, and if that sugar averages for that week 4½ cents per pound the grower gets $4.50 a ton. If it sells on the average for 5 cents per pound, he gets $5 per ton. So that if it is argued that the tariff is reflected in the price of the sugar, then inevitably the producer must get his pro rata share of that increase due to the tariff.

It is a very fair contract, and one which has been in operation in the sugar-cane producing sections of this country for many years. The producer is just as much interested, therefore, in the adoption of a proper tariff rate on sugar as is the manufacturer, because he is not settled with on a flat basis per ton but on a sliding basis, wherefore he benefits by any condition which enhances the price of that sugar.

I have one other matter which I would like to submit which shows the conditions which exist in Cuba. It explains, to my mind, why Cuba produces such sugar. This is taken from Miscellaneous Series 53, Sugar Cane Industry, issued by the Department of Commerce in 1917. I want to read it. It is most interesting. It is as follows:

Table 217 shows the number and per cent of the agricultural workers by age groups. It is interesting to note that 18,238 persons, or 4.96 per cent, of those field workers were from 10 to 14 years of age, and that 16,385, or 4.45 per cent, were 65 years of age and over.

Then follows a table giving, according to ages, the number of people for each year. I ask that this table be inserted, as well as the next table. (See Appendix D.)

Table 218 shows the literary and conjugal conditions of the agricultural group, and from this it appears that 35.45 per cent were literate, while 64.55 per cent were illiterate. It also shows that 52.75 per cent were single, or with conjugal conditions unknown; 30.67 per cent were legally married; 13.85 per cent were persons living in a marital state without marriage; and 2.73 per cent were widows. Then follows the table which I have already obtained permission to insert.

In conclusion, some time ago there was a meeting here of what I think they call the Agricultural Congress, which convened in Washington. That congress represented all of the different agricultural pursuits, and among the various subcommittees appointed was a sugar committee. The sugar committee made a report, and I wish to read it because it was adopted afterwards by the entire congress which represented every agricultural element which consumes sugar, so that if it be charged that the subcommittee on sugar was partial to the industry, it certainly will be admitted that those who did not belong to that committee, and who represent the corn, the wheat, the cattle, the hides, the minerals, and other lines of endeavor in this country, certainly represented the consumers of sugar, and were not prejudiced in favor of sugar. Here is the resolution they adopted:

COSTS.

It is impossible, with the cost of production as it is in the United States, for the growers of either sugar cane or sugar beets to meet the costs of Cuba and other tropical countries.

PRICES.

The price of sugar depends upon the price the Cuban producer may charge, and as through cheaper labor he has greatly reduced his costs and increased his production until he can furnish all the sugar the United States can consume, it is necessary for a complete readjustment to be made of the conditions governing the agricultural position of this industry in this country.

It is the unanimous opinion of this committee that this readjustment must consist of a change in the tariff now in effect against tropical sugars.

READJUSTMENT.

To meet the competition of other crops and give adequate inducement to the American sugar farmer a tariff of $2 a hundred pounds must be levied against sugar coming from Cuba. Any reduction from this figure reduces directly the return from the farm.

From a study of the history of sugar production and consumption in this country we boldly affirm that this increased tariff will be for the benefit of the consumer of food in this country as well as the consumer of sugar, as it has been demonstrated more than once, and recently quite acutely that but for the competition of the American production the cost of sugar to the consumer would be considerably higher than when the source of supply was so restricted.

In addition to this, one of the lessons we learned from the war was that this country should be self-sustaining as far as its food supply is concerned, and right painfully all of us remember how we were seriously hampered because of a great shortage of this important food.

This congress, consisting entirely of people engaged in agricultural pursuits, have indorsed a duty of 2 cents on sugar, and I wish to say now that I shall call up my amendment and make an effort to have the Senate increase the duty on sugar to 2½ cents, the general tariff duty, effective against Cuba, 2 cents a pound.

APPENDIX A.

Production of sugar in the United States and islands now designated as noncontiguous territories, from 1854–55 to 1919–20 (in tons of 2,000 pounds).

Campaign year.	Beet sugar (refined).	Louisiana.[1]	Other Southern States.[2]	Porto Rico.	Hawaii.	Philippine Islands.[3]	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.

[1] Mean annual production; quantity varied from year to year between 336 and 560 tons. Mean annual production is included in the total in each year covered by brackets.
[2] Production uncertain; not exceeding quantity stated. Included in year's total as in footnote 1.
[3] Exports from 1854–55 to 1899–1900, inclusive. Production for subsequent years. Hawaiian sugar admitted to United States free of duty in 1876, Hawaii annexed to United States July 7, 1898.
[4] Porto Rican sugar admitted to United States at 85 per cent reduction May 1, 1900, and free of duty in 1901.
[5] Mar. 8, 1902, duty on Philippine sugar reduced to 75 per cent; Aug. 5, 1909, not exceeding 300,000 tons per annum admitted free of duty. Oct. 3, 1913, all sugar imported from Philippines admitted free of duty.
[6] Estimated. But Louisiana actually produced in 1921, 324,431 tons, as shown by report of Agricultural Department in statement issued May 6, 1922.

APPENDIX B.

Foreign trade of Cuba in calendar year 1921 compared with 1920, 1919, and 1913.

(Official figures obtained from the Cuban Treasury Department.)

IMPORTS, UNITED STATES DOLLARS.

	1913	1919	1920	1921
United States	75,288,000	271,506,080	404,385,767	265,548,658
Other American countries	10,529,000	26,730,907	36,435,851	23,391,239

Excess imports from Cuba over exports to Cuba, 63.92 per cent.

APPENDIX D.

CONDITIONS IN CUBA.

TABLE 217.—*Farmers, planters, and farm laborers, by age groups.*

Ages.	Male.	Female.	Total.	Per cent of total.
10 to 14 years	18,049	189	18,238	4.96
15 to 19 years	53,553	532	54,085	14.70
20 to 24 years	64,034	319	64,353	17.49
25 to 34 years	84,824	456	85,280	23.18
35 to 44 years	60,976	471	61,447	16.70
45 to 64 years	67,319	824	68,143	18.52
65 years and over	16,066	319	16,385	4.45
Total	364,821	3,110	367,931	100.00

Table 218 shows the literacy and conjugal condition of the agricultural group, and from this it appears that 35.45 per cent were literate, while 64.55 per cent were illiterate. It also shows that 52.75 per cent were single or with conjugal condition unknown; 30.67 per cent were legally married; 13.85 per cent were persons living in the marital state without marriage; and 2.73 per cent were widowed.

TABLE 218.—*Literacy and conjugal condition of farmers, planters, and farm laborers.*

[From Miscellaneous Series 53, "The Sugar Cane Industry," issued by the Department of Commerce in 1917.]

Condition.	Male.	Female.	Total.	Per cent.
Literate	129,794	643	130,437	35.45
Illiterate	235,027	2,467	237,494	64.55

Consensually married	50,100	853	50,953	13.85
Widowed	9,828	202	10,030	2.73
Total	364,821	3,110	367,931	100.00

Mr. BROUSSARD. Mr. President, I offer the amendment which I send to the desk and ask to have read.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Secretary will state the amendment.

The ASSISTANT SECRETARY. In the sugar schedule, paragraph 501, page 95, line 18, after the word "degrees" strike out the figures "1.16" and insert in lieu thereof the figures "1.45," and in line 20, after the word "test" strike out the words "four one-hundredths" and insert in lieu thereof "five one-hundredths," so as to make the paragraph read:

PAR. 501. Sugars, tank bottoms, sirups of cane juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above 75 sugar degrees, and all mixtures containing sugar and water, testing by the polariscope above 50 sugar degrees and not above 75 sugar degrees, 1.45 cents per pound, and for each additional sugar degree shown by the polariscope test, five one-hundredths of 1 cent per pound additional, and fractions of a degree in proportion.

Mr. WILLIS. I ask unanimous consent to have printed in the RECORD and referred to the Committee on Finance a brief telegram embodying resolutions adopted by the Northern Ohio Druggists' Associat on.

There being no objection, the telegram was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

[Telegram.]

CLEVELAND, OHIO, *August 5, 1922.*

Hon. Senator WILLIS, of Ohio,
Washington, D. C.:

Whereas the retail druggists of the country recently have been charged on the floor of the United States Senate with profiteering; and

Whereas the Senate has defeated the embargo on German dyestuffs, chemicals, and medicinals; and

Whereas the Germans have driven American manufacturers from South and Central America since the late World War; and

Whereas under German monopoly before the war phenacetine, aspirin, veronal, trional, sulfonal, and similar products sold in the United States at $1 per ounce instead of $1 per pound as at present: Therefore

Resolved, That the Northern Ohio Druggists' Association urges the Senators and Representatives in Congress from this State to make adequate provision in the tariff revision bill, H. R. 7456, pending in the Senate, for the protection of American industries and consumers by incorporating the amendment now before the Senate Finance Committee, which would prohibit the importation of merchandise into the United States bearing any trade-mark, label, print, or other mark registered in the United States Patent Office and owned by any person domiciled in the United States, unless imported by such owner, provided the owner shall file with the Secretary of the Treasury a certified copy of the registration of the mark.

NORTHERN OHIO DRUGGISTS' ASSOCIATION,
W. F. HAGEMEISTER, *President.*
CARL FLANDERMEYER, *Secretary.*

Mr. HEFLIN. Mr. President, the afternoon Washington papers on yesterday had something to say about the appointment of a governor for the Federal Reserve Board.

The PRESIDING OFFICER. The Chair must call the Senator's attention to the first paragraph of the agreement which

has just been entered into, it being the duty of the Chair to enforce the agreement. It reads as follows:

It is agreed by unanimous consent that the bill H. R. 7456, "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," shall be kept before the Senate until the final vote is reached, to the exclusion of all other matters, and the debate shall be confined to the question before the Senate or the bill itself; and no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

Mr. HEFLIN. The Senator from North Carolina [Mr. SIMMONS] told me that the agreement would go into effect on Monday.

The PRESIDING OFFICER. That paragraph went into effect immediately upon its being entered into.

Mr. HEFLIN. I did not know that. If I had, I would not have consented to it. I accepted the statement of the Senator from North Carolina, and I am sure that he meant exactly what he said to me. I ask unanimous consent that I may proceed to discuss another subject.

The PRESIDING OFFICER. The Chair was about to suggest that the Senator make that request. The Senator from Alabama asks unanimous consent that he be allowed to proceed with a discussion not pertaining to the tariff bill. Is there objection? The Chair hears none, and the Senator will proceed.

Mr. HEFLIN. Mr. President, the article in the Washington Times said that Governor Harding would not be reappointed, and the Star carried an article to the effect that, from the information obtained, he would be reappointed. The Washington News expressed about the same opinion.

Mr. President, I am still hoping and believing that the President will not appoint him. If he does appoint him I shall make the best fight that I am capable of making against his confirmation, and I believe that there are enough Senators here free from Wall Street control to prevent his confirmation.

I do not know whether the President fully realizes the gravity of the situation that now confronts him or not. He has come to a point in his administration as the head officer of the Government where he must decide a great question—one that affects vitally the prosperity and happiness of the whole American people. The question is, How will he decide it? The honest business men of the country who understand his deflation record do not want W. P. G. Harding. The honest and unintimidated bankers of the country do not want him reappointed. The wage earners and farmers of the country do not want him reappointed. The doctors, lawyers, preachers, and teachers who know what his deflation policy has done to them and to the American people do not want him reappointed. The millions of people who were held up and literally robbed by the deflation conducted by Governor Harding do not want him reappointed. Who are they then that are using every means at their command to obtain indorsements for this deflationist and destructionist, Governor Harding, and trying to create the impression that there is a strong demand for his reappointment?

They are those who bought at a low figure Liberty bonds upon which loans were refused and then forced out of the hands of the people by deflation. They are those who made millions out of cotton forced by deflation upon the market and sold at a price far below the cost of production. They are those who made millions out of grain and cattle forced out of the hands of the farmers and cattlemen of the West at low and ruinous prices. They are those who made immense fortunes out of the misfortune and the misery produced by deflation. They are those who controlled the money supply and credit of the country to their own advantage and enrichment, and to the distress and impoverishment of millions of American people. They are the speculators and heartless financiers of Wall Street, whose subservient tool Governor Harding was and is.

Wall Street made hundreds of millions of dollars out of the deflation policy of Governor Harding, while that same policy was spreading distress and working ruin in my State and other sections of the country. In the face of these cruel and indefensible things done by the direction of Governor Harding, can it be possible that the President will consider for a moment the reappointment of such a man to continue at the head of our great Federal reserve banking system? God forbid!

Mr. President, on the 2d day of August I made a speech in the Senate in which I showed, by a letter from the governor of the Federal reserve bank at Atlanta, Mr. Wellborn, that that bank had charged a country bank in my State under Governor Harding's progressive-interest rate in 1920 a rate of interest reaching 87½ per cent The notice of my speech went out through the Associated Press, I presume, and appeared in only two papers in all the South, I am informed—the Birmingham Age-Herald and the Mobile Register, both in my State. Why is it that such news is not sent broadcast the country over, so that the people everywhere may know what is being said now against Governor Harding as well as the things that are being manufactured for him? Can it be that there are those who wish to prevent such information from reaching into the other Southern States, where they are trying to deceive certain people into asking the President to reappoint this man? Is it possible that some thought that if they should obtain this information down there just now that it would interfere with their efforts to obtain indorsements with which they hope to deceive the President?

I have had the legislative reference of the Library of Congress go through the papers published in the South, and only two notices appeared of the speech which I made in this Chamber on the 2d day of August, in which I showed by the governor of the Atlanta bank himself that that bank had charged a bank in my State 87½ per cent. That notice sent merely said that "Senator HEFLIN claimed that he had the documents to prove his contention." I stated on the floor and read from the evidence that the governor of the board admitted it, and I printed it in the RECORD, giving the statement and the figures. Nobody can disprove that proposition.

Are the people to be kept in the dark and the President imposed upon in this fashion? Are the people whose battle I am fighting to be deprived of the charges and facts submitted here against the man who is trying to hold on to the position that he has used to their great detriment and injury? What is the duty of the President in the premises?

It is to refuse to be influenced and deceived by the men and the interests that made big money out of Governor Harding's deflation. He is not going to be deceived. He is not deceived. Scores of people have written to him. I have written him a rather lengthy letter, and if Governor Harding's appointment comes to this Chamber it will be discussed here by me and printed in the RECORD. I have written a letter to the Secretary of Agriculture appealing to him as the head of the great agricultural interests of the country to go, as a member of the Cabinet, and appeal to the President not to reappoint this man. I want the people of the West, the South, and all the country to know what Wall Street is undertaking to do in this matter at the Capital.

Mr. President, the people who subscribe for and support the newspapers are entitled to know what their public servants are saying here upon issues that affect them vitally. It is the duty of the newspapers to carry this news. We can at least put the truth in the CONGRESSIONAL RECORD. The special interests are powerless to blue pencil that. Beware lest the truth that I am putting into this RECORD to-day rise up to disturb and plague certain leaders of the Republican Party. The American people without regard to party refuse to remain silent and permit Wall Street to continue in control of the Federal reserve banking system. They are hoping and praying for deliverance from such a curse.

The Senator from Nevada [Mr. PITTMAN] put an article in the RECORD on the 2d of August saying that the four horsemen of the Harding administration are poverty, distress, disorder, and violence. Mr. President, practically all of them can be traced to deflation and the maladministration of our great banking system—deflation inexcusable and indefensible; deflation criminal and murderous; deflation inspired by a resolution passed through a Republican Senate and conducted by Governor Harding, of the Federal Reserve Board.

When this deflation drive commenced every freight train in the country was running, freight was moving, people had money to pay the freight rates charged then, and business was prosperous. But when the deflation policy struck they ceased to ship their products because the price in the market place did not warrant them in doing so. The producer was hurt, the shipper was hurt, the merchant and manufacturers were hurt. The traffic ceased and the railroads were hurt. When the purchasing power of the people of the South and West was destroyed the factories of the East and North closed because we could not pay for their goods. The stream of canceled orders that poured in upon manufacturer and wholesaler told how injurious the effect of deflation was to their business. So all the distress that came about when agriculture was stricken down, factories closed, and labor driven from employment was due to this murderous deflation policy, conducted by this same Governor Harding, whom the Star, the Republican newspaper of this city, tells us is to be reappointed. Does the President in the face of the distress, impatience, and unrest that confronts him in the country desire to aggravate and inflame them by reappointing the man who is detested, distrusted, and discredited by the rank and file of the American people?

Let me read an editorial from the Post-Express, of Rochester, N. Y.:

The Manufacturers Record, in a powerful editorial by Richard H. Edmonds, a publicist of notable ability, opposes the reappointment of Governor Harding, of the Federal Reserve Board, as the man who more than all others has brought that great and splendid banking system into disrepute. To save what is good in the system, what is bad must be eliminated; and he indicts Governor Harding for conspicuous inability, overmastering incompetence, and colossal blundering. No other country or century, he declares, shows a high financial official who so misconceived, misjudged, and inaccurately and inadequately assessed a serious situation and permitted it to exist and to grow worse. His arbitrary and artificial policy strangled national prosperity in critical years, forced down Liberty bonds, practiced usury and utilized the infamous graduated interest rate to ruin country banks, waged illegal war upon them, as the United States Supreme Court has declared, permitted great bank palaces to be erected out of enormous profits taken from stricken industry and brought the reserve system into such disrepute as made necessary a fight against its manifold exactions. The charge is directly made that this official has maladministered the system to the injury of the many in the interest of the favored few, that his policy is condemned by all other honest bankers who know the facts and dare to tell them, and that he is out of tune with everything the President and his financial advisers stand for and believe.

Mr. President, that is a strong indictment against Governor Harding. It represents in the main the feelings of millions of Americans. The closing line in the editorial says that he is not in harmony with what the President and his financial advisers believe in and stand for. It remains to be seen whether that is true or not. If the President reappoints him he says by that act that Governor Harding is satisfactory to him and that he condones what he has done and indorses his deflation record.

I said in my letter to the President, "I believe that you will agree with me that to reappoint him you must indorse and condone all that he has done through the deflation conducted by him." The minute he designates Governor Harding to succeed himself that minute every charge that I have made about certain influences being strong enough to keep him at the head of the Federal Reserve Board for the past two years is established before the country. I said here months ago that I could not understand why the President permitted him to remain at the head of our great banking system. Some of the President's friends said to me, "Why, his term has not expired." I replied that that was a rather feeble excuse, that "We had some men appointed by President Wilson, a United States marshal, or district attorney, one or the other, in Texas, and they asked for his resignation before his term expired. That has been done in other cases." So when the President made no effort to get rid of Governor Harding I understood that to mean that he was either satisfactory to the President or that some powerful influence was having him retained. And still some of my Republican friends said the President may let him serve his term out, but he will never reappoint him. Well, Mr. President, that phase of the question will soon be settled. Governor Harding's term of office expires next week. What will the President do? I have a stronger reason yet which I have not told the Senate as to why I do not believe that he will reappoint him, but I will tell it if Governor Harding should be reappointed. If the Star is correct that he is to be reappointed, then what I am relying on and what other Senators that I see around me are relying on has fallen down completely.

Mr. President, I read here on August 2 a statement from a Republican Member of Congress from the far West, Congressman SWING, of California, where he stated in the House of Representatives not long ago that he was present at a bankers' convention in southern California in the fall of 1920 when Governor Harding's deflation drive was on in earnest, and he said the vice governor of the Federal Reserve Bank of San Francisco came and addressed the convention, and told the bankers there assembled not to loan any money on farm products. He said, "It does not make any difference what the condition of the market is, do not loan any money on farm products. If you do, we will not rediscount your paper." What did that mean? That meant there just what it meant in the South—that people engaged in the business of agriculture were going to be denied every kind of financial aid and left defenseless in the hands of the speculators of Wall Street and Chicago. I sent the President my speech containing the statement of Congressman SWING showing how legitimate business in the agricultural West was denied the aid necessary to prevent business collapse and financial disaster. Will the President reappoint the man whose cruel deflation policy refused a helping hand to the American farmer, when the failure to give that aid meant the ruin of his business? I can not believe that he will.

Governor Harding's deflation policy permitted those who speculated in farm products to have all the money they wanted at about 6 per cent, but it shut the door in the face of the farmer and told him to throw his products on the market regardless of the price. "Won't you let us have money to hold our farm products" said the farmers, "until the price advances enough to cover the cost of production?" They said, "No; you must sell." They tied the farmer's hands and left him in the throes of financial distress, while the value of his products was ruthlessly destroyed by the flames of deflation.

Will the President disregard and offend the farmers and merchants and bankers in the agricultural sections by reappointing Governor Harding, the deflationist?

Now let me remind you of what happened in the South. September, 1920, the New York Commercial, among other things, said:

Governor Harding frowned upon the proposal that additional credits be provided as a means of holding cotton in warehouses beyond the usual marketing period in order to insure better prices.

Think of that, Senators! The cotton producers of the United States trying to obtain the loans necessary to save their business from ruin are told by Governor Harding that no help will be granted.

What did Congressman SWING say? He said that he heard the vice governor of the Federal Reserve Bank of San Francisco tell the bankers of southern California not to loan any money on farm products, and that if they did their paper would not be rediscounted. I have just reminded you of an instance where the governor of the board, W. P. G. Harding, frowned upon the farmers of the South who were begging him to extend the help necessary to prevent the destruction of their business.

Let us see what the New York cotton men said about that statement of Governor Harding's position. The New York Commercial in its cotton article on the same date said:

Many traders were inclined to sell the market after overnight consideration of the refusal of the Federal Reserve Board to help the cotton planters, as it is believed that this decision will effectually kill most of the holding movement because of the difficulty of financing the proposition.

When Governor Harding announced that he would not permit aid to be given to prevent the forced sales of cotton at destructive prices he tied a millstone about the neck of every cotton producer in the United States and threw him into the sea of mad speculation to be drowned.

Not only that, but Governor Harding's death sentence upon the business of the cotton producer carried with it destructive pains and paralysis to every other kind of legitimate business in the South. Will the President reappoint him in the face of such a record?

Money and credit are the lifeblood of business, and the Manufacturers' Record spoke the truth when it said "Governor Harding hoarded the Nation's lifeblood and would not let it circulate."

Now, what else? The editorial which I read a moment ago contained in the Manufacturer's Record speaks of the usurious interest rates charged. Here is what happened with regard to such interest at the outset. John Skelton Williams, then Comptroller of the Currency, said:

When I, as a member of the board, discovered that such rates were being exacted by the reserve banks I offered a resolution in the Federal Reserve Board to abolish the progressive rate and to limit interest to 6 per cent per annum.

Listen, Senators—

But my resolution was promptly voted down. I then offered another resolution urging that the interest be limited to 10 per cent, but that was not enough to satisfy insatiable greed, and it was also voted down.

Mr. President, it is so clear and plain that he who runs may read. That instead of using his position and power to save business, especially in the agricultural sections, Governor Harding deliberately planned the ways and means which destroyed that business.

He would not permit the Reserve Board to limit the rate of interest to 10 per cent, and yet his deflation policy refused to charge even as much as 8 per cent in New York City. At the same time, Mr. President, the progressive interest rate of 10, 15, 20, 30, 60, and as high as 87½ per cent was applied in the South and West. That was criminal discrimination against millions of people in the agricultural sections of the country. Will the President reappoint the man guilty of such cruel and reprehensible conduct?

A few days ago I read here excerpts from a statement of a cattle man in the West, in which he said that the eastern banks—Wall Street—called on the western banks; that the western banks were forced to call on the cattle men; that the cattle men were forced to sell their cattle; and that half the cattle industry was disposed of at ruinous prices under the deadly drive of deflation. Mr. President, what has this man done to entitle him to consideration at the hands of the President? He hails from my State.

I have previously stated, Mr. President, that there are many people in my State and elsewhere who believe—and I am one

of them—that the governor of the Federal Reserve Board was himself speculating in cotton at the time this deflation drive was on. I want to say to the Senate now if when cotton was 40 cents a pound, as it was when deflation commenced, he had sold 10,000 bales upon the exchange in New York, when cotton went down to 10 cents, he would have made $1,000,000 in that transaction alone.

Mr. President, is it not hard to understand why a man hailing from the South or from the West, when he saw ruin coming upon his people, would not do something to check it? What else but a selfish and questionable interest would prompt a man to continue to drive on and on under such dreadful conditions as he saw all over the cotton-growing States?

We do know that the deflation carried on by Governor Harding broke the price of cotton and that the price fell so rapidly that our people cried out "Help us, Governor Harding, to hold our cotton off the market until the price will cover the cost of production"; but as the New York Commercial said, Governor Harding frowned upon them and refused to grant their request.

That was the blow that broke the cotton farmer's back. After that those who speculated in cotton on the bear side of the market had nothing to do but watch their profits grow. Governor Harding had it in his power to aid the cotton farmers in holding their cotton until they received a price that would cover the cost of production, and he declined to do it. It was rumored here when President Harding went into office that if he did not permit Governor Harding to hold on to his office he could get a position paying $100,000 a year in New York. I do not doubt it in the least; but he is worth much more to that bunch up there where he is than he would be as a private citizen in any position in New York; right up here, at the head of this Reserve Board, he is worth more to Wall Street than he could be worth in any other position under the sun. They do not want him to give up control of the money supply of the country. He has done exactly wha they wanted done.

Mr. President, if his name does come here, I am going to submit some testimony from Hon. John Skelton Williams to the effect that while the presidential campaign was on in 1920 William Boyce Thompson, who was at that time the treasurer of the Republican National Campaign Committee, borrowed nearly $3,000,000 on a dummy note from a member bank in New York City.

That will be an interesting situation for the country to consider—that the President of the United States has appointed this man at the head of the Federal Reserve Board, when it is charged on the floor of the Senate that the bank in New York where the Wall Street manipulators profited billions by deflation is urging that Governor Harding be reappointed, when he knew that that loan was made and that it was not a straight deal and ought not to have been permitted. I call that to the attention of the President.

Should the man who permitted that crooked thing to be done in New York City and who, in denying loans to farmers, destroyed their business, even be considered for reappointment to such a high and responsible position? I want to read here a part of a statement made in the House of Representatives not long ago by Congressman TINCHER, a Republican from the State of Kansas. I want the President to know and the country to know what he said about Governor Harding and the deflation conducted by him. He said, speaking of the members of the Federal Reserve Board:

> They came to the House of Representatives and asked us for an amendment to the Federal reserve act permitting them to put in effect what they called a graduated scale of interest charges for the purpose of reconstruction after the war. I had the pleasure of opposing that on the floor of the House. What was the result of it? They started their deflation under the leadership of this man, Governor Harding, and they charged the member banks of my section of the country, who were loaning for agricultural purposes alone, as high as 60 per cent interest on the money, thus insuring to the country that they would destroy agriculture or have deflation, while at the same time in New York the Federal reserve bank was furnishing money for industry at 6 per cent.

There is your deflation producing business distress and disaster in Kansas while it makes men rich in New York. Mr. President, will the President of all the people use the power vested in him to continue longer such a man as Governor Harding at the head of the country's great banking system?

The country is in a state of great unrest. President Harding has an opportunity now to do something to quiet the nerves of the people by removing this man. I tell you, Mr. President, that if some Republican Senators will talk to President Harding as they have talked to me about the indictment which I have drawn against this man from time to time, I do not see how the President can give serious consideration to his reappointment.

I want to read excerpts from one of many letters just received by me:

> DEAR SENATOR HEFLIN: Let me congratulate you upon the splendid fight which you have been waging in behalf of a decent administration of our Federal reserve system. You have brought many serious accusations and charges against the management of the reserve system, and especially against W. P. G. Harding, its governor, and, as far as I can see, you have completely proven your case. If W. P. G. Harding had done nothing else than cause the 12 Federal reserve banks under his supervision and influence to disseminate and scatter broadcast more than 140,000 copies of a document containing numerous incorrect and misleading statements well calculated to deceive the uninformed as to the real truth regarding the mismanagement of the reserve system, he is deserving of prompt removal by the President. If some of the unfortunate debtors of the member banks whose paper had been discounted by the reserve banks had made statements of their financial condition one-half as untrue and as misleading as were the statements contained in the document gleefully scattered around by Governor Harding's influence, in the hope that it would whitewash or cover up his misdeeds and blunders, those debtors would be arrested for making fraudulent statements and would probably be put in prison.

And yet Governor Harding and those who profited by deflation have the unmitigated gall to ask the President to reappoint him.

Mr. President, the newspapers have not given as much publicity to the charges and criticisms made against Governor Harding as they should have done. I am getting letters from all over the country indorsing my position on Governor Harding and deflation. Wherever the CONGRESSIONAL RECORD goes I am receiving letters approving the fight that I am making for an honest administration of our great banking system.

Mr. President, if a one-sided arrangement is to be carried on by newspapers at the Capitol, how long will it be before the suggestion will be put into effect by the American people that a Government bulletin shall be sent out from this Capitol to give both sides of an issue each day, setting forth what the contention is of both Democrats and Republicans? Such a plan has been advocated by some Republicans and by some Democrats. Mr. Bryan has made such a suggestion. I have not gone that far, but if a large portion of the press is to be subsidized so that a man who makes a fight here is to have his utterances suppressed so that the people may not know what is going on, while a defense of the other side is to be plainly set forth and the effort made to discredit the man who is making the fight for the good of his country and decent government, something has got to be done to relieve the people from such a dangerous situation.

Mr. President, a large portion of our press is honest and clean; I praise it; it is to be commended; but there is a large portion of it that is corrupt and rotten. It can be bought just as a commercial commodity can be bought in the market place. Who is going to respect a press like that? Is it entitled to the respect of anybody? Why should we respect that portion of the press which is for sale and traffic to the highest bidder? Why should we countenance that portion of the press that is venal and corrupt? Governor Harding's deflation forces have done much to keep the people from knowing the truth about this thing.

Mr. President, I went out into one of the States campaigning in 1920. My friends on the Democratic ticket said, "You are going to have a fine crowd to-night; we could not get the publicity to which we are entitled; but we will have a good crowd, anyhow." I said, "Have you no Democratic newspapers here?" They answered, "No; not now; there were three newspapers here, two of them Democratic and one Republican, but the Republicans bought out the two Democratic newspapers about two weeks ago; they have all three of them now, and the Democrats have not any vehicle by which they can disseminate their news."

Mr. President, if we are going to have that condition in the country where the mighty rich can go out and silence these mouthpieces that carry information to the people there will be a social revolution in this country just as certainly as time rolls on. The people will not submit to it. They ought not to submit to it. I believe in a free press, a clean, honest, wholesome press. I do not believe in having our press trafficked with in that fashion.

I have received a lot of information along this line and a great many suggestions from people since I have been discussing it in this Chamber. You can tell from the results of the primary election in Missouri about how much influence some of the press have now. I understand that nearly every newspaper of any importance opposed the Senator who won the nomination in that State. The people just simply will not be influenced by a newspaper whose printing press is operated upon an auction block.

I could not prove it, but I am convinced by what I have seen that Governor Harding's deflation forces have spent money to have me attacked and criticized and the things that I have said suppressed.

I have said a great deal here about a publicity fund of the Federal Reserve Board and about a newspaper propaganda carried on by the board. The governor of the board gave out a statement the other day. He did not mention my name, but the press agents were kind enough to do it for him; those who fixed it up for him said that he said so-and-so, and while he did not call any names it was understood that he meant Senator HEFLIN. That is very kind. If I were to make a fling like that at some of them without speaking plainly and calling a spade a spade, they would say, "It is indefinite as to who Senator HEFLIN had in mind."

The governor of the Federal Reserve Board is doing his best to hide his deflation guilt by trying to keep the truth from the people. I am convinced that Governor Harding has used funds collected from the system to suppress my statements regarding him and deflation, and I am firmly of the opinion that he has used such a fund to have me assailed and criticized by certain newspapers.

President Harding has a great many vexing problems pressing upon him, but he has not a question before him now that is more far-reaching in its importance than the one that I am discussing. He is called upon to decide between the bond sharks and money changers of Wall Street, the men who made millions through deflation, and millions of patriotic Americans who were pillaged and plundered by deflation.

What will the President do?

Mr. President, if he should send in the name of Governor Harding, I do not believe that he can be confirmed. Knowing, as I do, this man's record in conducting his murderous deflation policy I have no hesitancy in saying that any man in this Chamber who votes for his confirmation deserves to be defeated and ought to be defeated. Mr. President, if the spirits of the dead who were driven to suicide under Governor Harding's deflation drive could speak they would plead with the President not to appoint this man. If the spirit of Buck Mitchell, a deceased banker in my State, could speak, he would protest against the reappointment of Governor Harding. He went down to death because of the destructive deflation drive of Governor Harding. Across the line in the State of Georgia is the grave of Lige Lewis, a banker, who succeeded Speaker Crisp and served in the House of Representatives five or six terms. Governor Harding frowned upon the cotton farmers of Georgia, refused them aid, and waved the wand of destructive deflation, and Lige Lewis killed himself in the gloom and despondency thus created. It is claimed that the number of suicides caused by deflation runs into the thousands. I have informed the President in a general way how I and others felt about Governor Harding and his record. I felt that I should bring certain matters to the attention of the President.

That is not all, Mr. President. The public is going to know who votes for the confirmation of this man if his name does come to the Senate. I am going to ask unanimous consent that his nomination be considered in the open Senate, if it does come up. Still, I do not believe that the President is going to send it up. I still have a reason for that back in my head. I will not refer to it now, except to say that I do not believe yet that the President will reappoint him. I can not believe that those who sat back here during the war and made hundreds of millions out of the Government and whose greed was not satisfied when the war was over, and who then started this deflation drive, and made hundreds of millions more, will now be permitted to have their way in securing the reappointment of Governor Harding.

Mr. President, I want to read a line here from the president of the British Banking Reform League, Mr. Arthur Kitson, in acknowledging receipt of one of John Skelton Williams's addresses on the deflation policy of the Federal Reserve Board, which had been sent him by his request. In his letter to Mr. Williams, Mr. Kitson said:

> I agree with all that you have written. We have been experiencing the same troubles in this country that you have had in the United States, and from identically the same cause. Our treasury officials, under the influence of the big money lenders, undertook to deflate our currency.

That is what has happened over here, and he says they are suffering from the same thing.

> The public stopped buying—

That sounds just like the story of deflation here—

> business collapsed, firms closed their doors, and we have at the present time the greatest roll of unemployed that we have ever had since the "hungry forties." * * *

> Neither free traders nor tariff reformers seem to have understood that that period of social misery was directly attributable to the Government's contraction of the money supplies.

Mr. President, how many times have I said on this floor that our troubles were caused by contraction of money and deflation of credit? That is what the president of the Banking Reform League of London has to say about it. Now, let me read a line from what Sir Reginald McKenna said:

> Let us look at the policy of monetary deflation to be obtained by a high bank rate and a restriction of credit. Let us suppose that it were practicable by this process to bring prices permanently down to the pre-war level. What sort of charge would our national debt then mean to us? It ranks to-day at £9,700,000,000, mostly borrowed when money was worth very much less than before the war. With prices back to their former level the true burden of the debt would be more than doubled, or in other words, the creditor would receive a huge premium at the expense of the debtor.

Do you get that, Mr. President? Sir Reginald McKenna says that by deflation they doubled the war debt of Great Britain; and what have they done here? Instead of our debt being $25,000,000,000 it takes twice as much to pay it as before deflation, from two to four times as much of our products, so our debt is more than doubled by deflation. That is what deflation has done for us in the United States.

The editor of the Clarion, of London, commenting on this statement, said:

> Thus, in Mr. McKenna's opinion the Government policy now being carried out by the banks—the policy of reducing the supply of money for industry—

Listen, Senators—

> will inevitably result in the robbery of the majority of the people for the benefit of a few rich men; second, an unbearable rate of taxation; third, widespread unemployment.

We have that. Look at the unrest about us. Look at the closed industries. Look at the army of the unemployed. Look at the distress among the farmers of the country. Look at the crippled and broken cattle industry of the land. Look at the army of bolsheviks increasing every day, with trouble on every hand, and then these deflation vampires who have fattened upon the substance of the people go to the President and ask him to reappoint this man who conducted the deflation that caused all this trouble, and whose continuance in office would keep the spirit of strife, distress, and unrest in the country.

Many a banker has been induced to indorse this man who in his heart wants to see him driven from power. I know a Senator in this body who wrote back to a banker who asked him to indorse Governor Harding and told him that he did not want him reappointed, whereupon the banker wrote him that the Senator's position was satisfactory to him.

I reminded the Senate the other day of an old fellow who came here from the West with a petition asking one of his Senators to go with him to see the President about reappointing Governor Harding, and this Republican Senator said, "I will go with you, but I am not in favor of the President reappointing him." The old fellow said, "I am not, either." Think of that. Did you ever see such a situation? Talk about dragging banks into politics. Why, old Biddle in Hickory Jackson's day was a mere piker compared to this man Harding in the business of dragging our banking system into misuse and disrepute.

In the Bible the story goes that Jonah was the disturbing element and the ship would not go right until they cast him overboard. The President of the United States can not and will not hold the confidence of the American people if he puts the stamp of his approval upon this man at the head of the Reserve Board. The minute the President signs his name to the appointment that minute he sanctions all the long list of wrongs and crimes that trail in the record of Governor Harding. If he is reappointed I expect to keep that record before the Congress and the country.

If the President wants to gain favor with the masses of the people, he must do one thing certain, and that is to put this man out. Senators will remember when Joshua went with his army and attacked and took the city of Jericho, they got the largest collection of golden treasure that they had hitherto taken, and it was so fascinating, so seductive in its charm that Achan, a trusted leader and warrior, stole from the collection a large and beautiful wedge of gold and hid it in his tent.

A few days thereafter Joshua sent out his spies to spy out the city of Ai. They came back and reported that 3,000 men were enough to take it. They went up against the King of Ai and, to the utter surprise and astonishment of Joshua, his soldiers fled, many of them being slain in the conflict, and the King of Ai was triumphant. Joshua, in humiliation, rent his clothes, put dust upon his head, and fell upon his face in front of the Ark of the Lord, and God told him that there was something wrong in the tents of Israel. God told him that some one in his camp had broken the covenant. All but one

had put the collection taken at Jericho in the treasury of the house of the Lord.

Joshua called his trusted leaders before him one by one, and when Achan appeared before him guilt was upon his face and Joshua accused him. He said, "I have it in my tent." They went and found it hid in his tent and restored it to its rightful place, and Achan was removed from his position of trust. He was not only put out of authority and out of the army but he was stoned to death by Joshua's men.

Does the President wonder why the people are downcast and low-spirited? Does he wonder why there has been so much distress and suffering in the land? If so, I will tell him that there is something wrong in his official camp. The covenant with the people has been broken. Their treasure has been hid in Wall Street. We provided gold upon which to issue money to answer the needs of the people and one of your trusted officials has hoarded it and would not let it circulate, and he would not issue money upon it, and the people have protested and rebelled against his continuance in office over them. Let me say to President Harding: You will not gain favor with these people, things will not go right, and prosperity will not come in your administration until he who hid and hoarded the Nation's golden treasure in time of national distress and need is driven from authority in our financial affairs. The poet spoke truly when he said:

Hoarded wealth forever rotted;
Unused strength forever failed;
These two have wrecked
The proudest ships of state that ever sailed.

If Governor Harding is reappointed there will be no cessation in the discussion of this subject. The truth of it must be known; it shall be known to the people. This crime must be condemned; it shall be condemned. Every State in this Union will have to pass upon it in 1924. Will Senators, then, say that they indorse deflation, or will they say that they condemn the monstrous and murderous thing? Where are you going to stand then? Governor Harding and his deflation henchmen can not stifle the truth and hide their crime in that critical hour. If the President reappoints him he indorses all that he has done. If you vote for his confirmation you become a party to his crimes.

How can you look the voter in the face this fall and ask him to vote to send you back to the Senate, where you used your position to keep in control of our great banking system the man who maladministered it, who perverted it from the ends of its institution, and who conducted it in such a way as to make it an instrument of torture, oppression, and plunder?

I have told the Senate of the tactics employed by Governor Harding to get the progressive interest rate amendment through Congress, of what he told Senator SMITH, of South Carolina, who opposed it, and others, that he intended to apply it only to New York and other big cities that were draining the money out of the agricultural sections, and that the progressive interest rate never would be applied at all in the agricultural sections.

I have shown you that when he got permission to apply the progressive interest rate, as he said, to big cities that wanted money for speculative purposes, that he never applied it at all to New York City, Boston, or Philadelphia, but did apply it to the agricultural sections, where he promised he would never apply it.

I have shown you that he permitted interest rates to be charged in the agricultural sections ranging from 10, 15, 30, 60, and 87½ per cent, and I have shown you by the statement of the governor of the Federal Reserve Bank of Atlanta, the bank that serves my State and other States in that section, that he came to Washington in 1920 and tried to get Governor Harding to permit the bank at Atlanta to be excused from applying the progressive interest rate, and Governor Harding declined to do it. It was after that that the bank at Atlanta charged a bank in Alabama that was aiding cotton farmers and merchants a rate of interest reaching up to 87½ per cent. I have shown you that Governor Harding's deflation drive in 1920 permitted one big speculative institution in New York City to borrow at one time twice as much money as all the Federal reserve banks were lending at that time on agricultural and live-stock paper to all 9,000 member banks in the whole United States.

I have shown you that while he was denying loans outright to the people in the agricultural sections he was furnishing all the money desired for speculative purposes in the big cities of the East.

Mr. President, I want to read again in the hearing of Senators what Mr. Lincoln said about deflation:

Any movement to artificially deflate before the debt can be paid, to change the medium of circulation upon which the debt was contracted, would be a crime.

Governor Harding did that very thing, and he is guilty of a crime, according to the definition of the lamented and martyred Lincoln. Yet they are asking the Republican President of to-day to reappoint him, when he is guilty of such a crime.

Continuing, Mr. Lincoln said:

I warn the American people not to permit a repetition of the crimes of history. Following great periods of inflation, if drastic artificial deflation is attempted, disastrous results must follow. I warn them not to permit the money powers to take advantage of the condition of the people. I warn them not to permit high and usurious rates of interest, contraction of the currency, or any change in the circulating medium that will affect the debt contracted until it has been discharged.

Governor Harding and his deflation henchmen did everything that President Lincoln said should not be done. Usurious interest rates were charged; the currency was contracted and credits deflated, while the cry of business distress and financial disaster was heard throughout the country.

Mr. President, I have said that that deflation policy was born in Wall Street and christened by a resolution passed through the Senate in 1920 and carried out by Governor Harding, who had fallen under the influence of the big bankers and speculators of New York. I have said that it was inexcusable and indefensible, and that it robbed the many for the benefit of the few. I said that it was a crime against legitimate business and a crime against the country, and I reaffirm it all to-day.

When I think of how Governor Harding with his murderous deflation swept through the South and West, leaving ruin in its wake, I recall what John said in the book of Revelations:

And I looked, and behold a pale horse; and his name that sat upon him was Death, and Hades followed with him.

Mr. President, in this instance deflation was the pale horse, Governor Harding the death that sat upon him, and the distress and misery produced and the destruction of the prosperity and happiness of millions of people was the hades that followed with him. I saw him approach prosperous industrial establishments and the hum of whirling wheels was hushed and happy wage earners were driven by the tens of thousands from their employment as the doors closed in the gloom of business despair. I saw him riding through the agricultural regions and once buoyant, enterprising farmers quailed and trembled as the value of their farm products perished in his presence. I saw him among the cattlemen of the West, and the live-stock industry fell down and all but perished.

I saw him in the towns and cities, and the cry of business distress was heard on every hand. Five hundred thousand ex-service men who fought to save the Nation in the hour of its peril could find no means of support. This and more I saw, but I must close. In the name of right and justice and in the name of plundered millions I call upon the President to cast this man overboard. If he will do that, millions of people will lift up their voices and out of millions of grateful hearts will exclaim:

The pale horse and his rider are cast into the sea,
All praise to Jehovah, His people are free.

INVESTIGATION OF INTERESTS IN TARIFF LEGISLATION.

Mr. GOODING. Mr. President, out of order I ask unanimous consent to call up Senate Resolution 330.

The PRESIDING OFFICER. Out of order the Senator from Idaho asks unanimous consent to call up Senate Resolution 330. Is there objection?

Mr. SMOOT. The Senator from New York [Mr. CALDER], who was compelled to leave the city a short time ago, just before leaving asked me if I would not, for him, object to the consideration of the resolution for the consideration of which the Senator from Idaho now asks unanimous consent, if it came up after his departure. I promised him to do so, and, therefore, I shall object.

The PRESIDING OFFICER. Objection is made.

Mr. LODGE. Mr. President, I move that the Senate proceed to the consideration of executive business.

Mr. HARRISON. I dislike to suggest the absence of a quorum.

Mr. LODGE. The Senator is perfectly welcome to do so, for that will answer the purpose just as well.

Mr. HARRISON. The object I have is to offer a resolution. The Senator said when we were discussing a certain matter affecting the sugar schedule that he was willing such a resolution should be offered, and now I desire to ask unanimous consent to offer it and to have it read and printed. I thought it was agreed that I should do so.

Mr. LODGE. I have no objection, of course, to the Senator having his resolution printed, but I can tell him now that I

have been looking up Mr. Grover and his syndicate to some extent, and I have obtained sufficient information, I think, to show that the syndicate never existed, although Mr. Grover does exist. Whenever the matter comes up I shall produce what I have discovered, but I can not permit the resolution to be taken up now and I shall object to its being taken up.

Mr. HARRISON. But the Senator will allow me to offer the resolution and have it read to the Senate, will he not?

Mr. LODGE. I have no objection to the resolution being read; but it will go over under the rule.

Mr. HARRISON. I ask unanimous consent to offer the resolution and that I may have it read.

The PRESIDING OFFICER. If there is no objection, the resolution will be read.

Mr. HARRISON. The resolution does not apply only to Mr. Grover, but it seeks information as to other matters. I should like to have the resolution read.

The PRESIDING OFFICER. Is there objection to the presentation of the resolution?

Mr. LODGE. I do not object to the resolution being presented.

Mr. SMOOT. I have no objection to the resolution being read.

Mr. LODGE. But I do not propose that it shall now be taken up.

The PRESIDING OFFICER. The Chair hears no objection to the presentation of the resolution.

Mr. HARRISON. I presume the Senator from Massachusetts has no objection to the resolution being presented?

Mr. LODGE. I have no objection to the resolution being read, but I do object to its being taken up.

Mr. HARRISON. I ask that the resolution may be read.

The PRESIDING OFFICER. The Chair did not understand the Senator from Mississippi to ask that the resolution be considered.

Mr. SMOOT. The Senator asked that he might present the resolution and have it read.

The PRESIDING OFFICER. The resolution will be read.

The principal legislative clerk read the resolution (S. Res. 334), as follows:

Whereas it has been charged in the public press of the country that an official of the United States undertook to negotiate an agreement with the Cuban sugar producers, or with the Cuban Government, or with some agency representing such interests, to restrict the production of sugar in Cuba for the current year to 2,500,000 tons, or thereabouts, upon condition that the Congress of the United States would reduce the duty upon raw sugars imported into the United States from Cuba to 1⅛ cents per pound; and

Whereas it has been further charged in the public press that certain interests concerned in the importation of Cuban sugar into the United States associated themselves under the name of the United States & Cuban Sugar Producers' Agreement Syndicate (Inc.), of which one Alfred Grover was a director, which organization had for its purpose the accumulation of a fund of approximately $14,000,000, to be contributed by the interests so associated on the basis of one-fourth of 1 cent per pound upon all raw sugar imported by them from Cuba, such sum to be paid to the producers of cane and beet sugar in the United States upon some arrangement or agreement involving the fixing of a rate of duty on Cuban sugar in the pending tariff bill: Therefore be it

Resolved, That a committee composed of five Senators, to be appointed by the President of the Senate, three from the majority and two from the minority, is hereby authorized and directed to make an immediate investigation in order (1) to determine the accuracy of such charges, (2) to obtain and preserve all available facts and information relating to such charges, and to the forming of such syndicate, and (3) to ascertain the authority, if any, such official or officials of the United States had to propose, enter into, or conclude such alleged arrangement or agreement. Such committee shall report as expeditiously as possible the names of all persons, corporations, or associations in any manner related to, involved in, or connected with such arrangement or agreement, the measures and methods adopted by such person, corporation, or association, to effectuate the purpose of such arrangement or agreement, together with such recommendation as such committee deems advisable. Such committee is authorized to send for persons and papers, to administer oaths, and to employ stenographers to report such hearings at a cost not exceeding $1.25 per printed page, the expense of such investigation to be paid from the contingent fund of the Senate.

Mr. HARRISON. I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDING OFFICER. The Senator from Mississippi asks unanimous consent for the present consideration of the resolution. Is there objection?

Mr. LODGE. Mr. President, it is too late to discuss the resolution now. I object.

The PRESIDING OFFICER. Objection is made.

Mr. LODGE. At some future time I shall show—for I think I have enough evidence to show—that no such syndicate as that referred to in the resolution ever existed. I think the whole thing is perfectly baseless. At this hour, however, I am not going to discuss the resolution. It is sufficient for the present to object to the consideration of the resolution.

Mr. HARRISON. Does the Senator from Massachusetts think that the statement contained in the first clause of the preamble of the resolution is also baseless?

Mr. LODGE. I do not think there is anything in it at all, if the Senator must know my opinion.

Mr. HARRISON. I am glad to have the Senator give his views on the matter.

The PRESIDING OFFICER. The resolution will lie over under the rule.

Mr. GOODING. Mr. President, I rise to a question of personal privilege. My character has been attacked in the Senate, and I have offered a resolution. I ask the privilege of making a statement. I shall be forced to suggest the absence of a quorum unless I may be permitted to make a brief statement.

Mr. LODGE. Of course, if the Senator suggests the absence of a quorum that will conclude the proceedings. I shall not make any objection, of course, if the Senator desires to discuss a question of personal privilege.

The PRESIDING OFFICER. The Senator from Idaho asks unanimous consent to make a statement on a question of personal privilege. Is there objection? The Chair hears none.

Mr. GOODING. Mr. President, I have been held up to ridicule and scorn by a resolution which has been submitted by the junior Senator from Arkansas [Mr. CARAWAY]. I wish to say that I am not only a grower of wool but I am a grower of wheat and of practically all farm products. If I have violated my oath of office as a Senator by voting for duties on agricultural products and defending them on this floor, I want to know it; and if the resolution which I have submitted is not acted on favorably when the opportunity again offers to have it considered, I am going to demand an investigation for myself. I am determined to ascertain once and for all whether a man who grows agricultural products in this country can, without a violation of his oath, sit in this body and defend the interests of his State and of agriculture generally. That is all the statement I care to make at this time; but I want to have that question settled once and for all, because other revenue measures may come before the Senate for consideration, and I want to know what my rights are on the floor of the Senate. If I have violated my oath of office, I am willing to resign, as I have said before on other occasions.

Mr. LODGE. Mr. President, I withhold temporarily my motion that the Senate proceed to the consideration of executive business.

PETITIONS.

Mr. WILLIS presented petitions of sundry citizens of Cincinnati, Ohio, praying that only a moderate duty be imposed in the pending tariff bill on light-weight kid gloves, which were refered to the Committee on Finance.

TARIFF BILL AMENDMENT.

Mr. CALDER submitted an amendment intended to be proposed by him to House bill 7456, the tariff bill, which was referred to the Committee on Finance and ordered to be printed.

THOMAS W. WILLIAMS.

Mr. NEW, from the Committee on Military Affairs, to which was referred the bill (S. 267) for the relief of Thomas W. Williams, submitted an adverse report thereon, which was agreed to, and the bill was indefinitely postponed.

LANDS IN FORT SABINE MILITARY RESERVATION, LA.

Mr. LENROOT. I ask unanimous consent from the Committee on Public Lands and Surveys to report favorably, without amendment, the bill (H. R. 10517) providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned. I submit a report (No. 845) thereon.

The PRESIDING OFFICER. Is there objection to receiving the report? The Chair hears none, and the report is received.

Mr. RANSDELL. Mr. President, I ask unanimous consent for the immediate consideration of the bill just reported by the Senator from Wisconsin. I am sure it will require no debate. It relates to a local matter in Louisiana. The bill has passed the House and has been unanimously reported by the Senate Committee on Public Lands.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. OVERMAN. I ask that the bill may be read.

The PRESIDING OFFICER. The bill will be read.

The bill was read, as follows:

Be it enacted, etc., That, subject to the provisions of this act, the title of all persons who prior to January 1, 1909, purchased from the State of Louisiana any lands formerly included in what was known as the Fort Sabine Military Reservation, in Cameron Parish, in the State of Louisiana, established by Executive order of December 20, 1838, and abandoned March 25, 1871, pursuant to the act of Congress of February 24, 1871 (16 Stats. L., p. 430), shall be confirmed and validated against any claim or interest of the United States: *Provided*, That satisfactory evidence of such purchase with description of the

lands claimed by each applicant, in accordance with the system of United States public-land surveys, be submitted to the Secretary of the Interior within six months from and after the approval of this act: *Provided further*, That patents shall issue to such purchasers and shall inure to the benefit of their heirs, assigns, or devisees to the same extent and as if such purchasers had secured full title from the State of Louisiana through such purchasers: *And provided further*, That section 32, in township 15 south, range 15 west, Louisiana meridian, used by the United States for lighthouse purposes, shall be excepted from the provisions hereof.

SEC. 2. That the lands within the limits of such abandoned military reservation not affected by the foregoing provisions of this act shall be disposed of under the provisions of the act approved July 5, 1884 (23 Stat. L., p. 103).

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PROOFS IN PUBLIC LAND CASES.

Mr. JONES of New Mexico. I ask unanimous consent for the present consideration of the bill (S. 3103) to amend section 2294, United States Revised Statutes, relating to homesteads.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

Be it enacted, etc., That section 2294, Revised Statutes of the United States, as amended by the act of March 11, 1902 (32 Stat. p. 63), and the act of March 4, 1904 (33 Stat. p. 59), be amended to read as follows:

"SEC. 2294. That hereafter all proofs, affidavits, and oaths of any kind whatsoever required to be made by applicants and entrymen under the homestead, preemption, timber-culture, desert-land, and timber and stone acts, may in addition to those now authorized to take such affidavits, proofs, and oaths be made before any United States commissioner or commissioner of the court exercising Federal jurisdiction in the Territory or before the judge or clerk of any court of record in the county, parish, or land district in which the lands are situated: *Provided*, That in cases where because of geographic or topographic conditions there is a qualified officer nearer or more accessible to the land involved, but outside the county and land district, affidavits, proofs, and oaths may be taken before such officer: *Provided further*, That in case the affidavits, proofs, and oaths hereinbefore mentioned be taken outside of the county or land district in which the land is located, the applicant must show by affidavit, satisfactory to the Commissioner of the General Land Office, that it was taken before the nearest or most accessible officer qualified to take such affidavits, proofs, and oaths; but such showing by affidavit need not be made in making final proof if the proof be taken in the town or city where the newspaper is published in which the final proof notice is printed. The proof, affidavit, and oath, when so made and duly subscribed, or which may have heretofore been so made and duly subscribed, shall have the same force and effect as if made before the register and receiver when transmitted to them with the fees and commissions allowed and required by law. That if any witness making such proof, or any applicant making such affidavit or oath, shall knowingly, willfully, or corruptly swear falsely to any material matter contained in said proofs, affidavits, or oaths, he shall be deemed guilty of perjury, and shall be liable to the same pains and penalties as if he had sworn falsely before the register. That the fees for entries and for final proofs when made before any other officer than the register and receiver shall be as follows:

"For each affidavit, 25 cents.

"For each deposition of claimant or witness when not prepared by the officer, 25 cents.

"For each deposition of claimant or witness prepared by the officer, $1.

"Any officer demanding or receiving a greater sum for such service shall be guilty of misdemeanor and upon conviction shall be punished for each offense by a fine not exceeding $100."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. LODGE. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and (at 5 o'clock and 30 minutes p. m.) the Senate, under the order previously made, took a recess until Monday, August 7, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 5 (legislative day of August 3), 1922.

COLLECTOR OF INTERNAL REVENUE.

Arnold J. Hellmich to be collector of internal revenue, first district of Missouri.

REGISTER OF THE LAND OFFICE.

Harry B. Drum to be register of the land office at Billings, Mont.

UNITED STATES MARSHAL.

Harry S. Hubbard to be United States marshal, district of Porto Rico.

PROMOTIONS IN THE ARMY.

Earl Hamlin DeFord to be captain, Air Service.

Walter Raymond Peck to be first lieutenant, Air Service.

Robb White, jr., to be chaplain with the rank of captain.

POSTMASTERS.

CALIFORNIA.

Irene Beckley, Grimes.
Bertha E. Kelley, Palms.

COLORADO.

Sylvester E. Hobart, Nunn.

CONNECTICUT.

Joseph H. Derenthal, Madison.

ILLINOIS.

Ulysses G. Stutzman, Carlock.
Lester Cromwell, Momence.
Daisy A. Nieman, Philo.

INDIANA.

George W. Shively, Winona Lake.

KANSAS.

Joseph B. Dick, Ellinwood.
Charles I. Zirkle, Garden City.

MAINE.

Lloyd A. Harmon, Clinton.

MASSACHUSETTS.

Louise S. Snow, Middleton.
Annie E. Cronin, North Wilmington.
Myra G. Jordan, West Upton.
Mabel Holt, Wilmington.

MICHIGAN.

Flora Van Zinderen, Grandville.
Helen B. Martin, Indian River.
Grace M. Miller, Union City.

NEVADA.

Helen M. Willis, Ruth.

NEW JERSEY.

Henry R. Parvin, Ramsey.

OHIO.

Joseph Jameson, Lorain.

OKLAHOMA.

Charles M. Henry, Carmen.
Simpson B. Richards, Waynoka.

OREGON.

George D. Wood, Brookings.
Charles B. Wilson, Newberg.
Grant L. Grant, Riddle.
Henry E. Grim, Scappoose.

SOUTH CAROLINA.

Dan K. Dukes, Orangeburg.

WASHINGTON.

Frank Morris, Bordeaux.
Raymond M. Badger, Winthrop.

SENATE.

MONDAY, *August 7, 1922*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, the pending question being on the amendment of Mr. BROUSSARD to paragraph 501.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Dillingham	Kendrick	Nicholson
Brandegee	Frelinghuysen	Keyes	Norbeck
Broussard	Gerry	Ladd	Oddie
Bursum	Gooding	Lodge	Overman
Calder	Hale	McCumber	Phipps
Cameron	Harreld	McLean	Pittman
Capper	Harris	McNary	Pomerene
Caraway	Harrison	Moses	Rawson
Culberson	Heflin	Myers	Reed
Cummins	Jones, N. Mex.	Nelson	Sheppard
Curtis	Jones, Wash.	New	Shortridge

Simmons	Stanley	Underwood	Watson, Ind.
Smith	Sterling	Wadsworth	Willis
Smoot	Sutherland	Walsh, Mass.	
Spencer	Townsend	Warren	
Stanfield	Trammell	Watson, Ga.	

Mr. LADD. I was requested to announce that the junior Senator from Illinois [Mr. MCKINLEY] is detained at a hearing before the Committee on Agriculture and Forestry.

The PRESIDENT pro tempore. Sixty-one Senators have answered to their names. There is a quorum present.

Mr. SMOOT obtained the floor.

Mr. HARRISON. Mr. President, I desire to ask unanimous consent to call up the resolution (S. Res. 334) which I offered late Saturday afternoon touching the sugar investigation.

Mr. SMOOT. I object.

The PRESIDENT pro tempore. Objection is made.

Mr. NICHOLSON. Will the Senator from Utah yield for a moment?

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Colorado?

Mr. SMOOT. I yield, but I do not want it taken out of my time.

Mr. NICHOLSON. No; it will not be taken out of the Senator's time. On Saturday there was a resolution introduced by the Senator from Mississippi [Mr. HARRISON] which contained certain statements and allegations concerning the sugar schedule which is now to be considered by this body. There were very serious charges contained in the article read by the distinguished Senator from Mississippi. Now he has asked for an investigation, and, under the unanimous-consent agreement, he is denied the right to have the investigation take place. I for one feel that we should not proceed——

Mr. SMOOT. Mr. President, I do not want to have this taken out of my time.

Mr. NICHOLSON. Just a minute. I for one feel that we should not proceed with the consideration of the sugar schedule until the charges contained in the article read by the Senator from Mississippi have been investigated, and I therefore move that the sugar schedule be temporarily laid aside until the investigation is made.

The PRESIDENT pro tempore. The Chair is constrained to hold that the motion is not in order.

Mr. SMOOT. We are proceeding under the unanimous-consent agreement now, and the motion is not in order.

Mr. NICHOLSON. I am not asking for unanimous consent; I made a motion.

Mr. SMOOT. Mr. President, I do not yield for this purpose.

Mr. HARRISON. Was the point of order made?

The PRESIDENT pro tempore. The Chair holds that the motion is not in order at this time. The Senator from Utah has the floor, and he will proceed.

Mr. SMOOT. Mr. President, on account of the limited time allotted me to speak upon this great question I want now to state that I shall decline to be interrupted. I want it so that what I have to say may be stated in regular order, and therefore I feel that it is my duty to give notice now that I do not intend to yield for any question.

I want the Senate and the country to know that the propaganda which has spread from one end of the country to the other is a continuation of the fight against the domestic sugar industry by the sugar refiners. They are back of it all, and since their evidence was given before the Hardwick committee of the House of Representatives, in which they all declared themselves unalterably opposed to domestic sugar production, they have made up their minds that they will never be contented until they destroy the production of sugar in the United States. Later in my remarks I shall call attention to who they are and why they are doing it.

In passing, I wish to say that five of the sugar refiners of the country to-day control companies in Cuba which produce the greater bulk of all the sugar produced in that island.

Mr. President, if they succeed in their fight, which they nearly did in January of this year, the American people will pay dearly for it. If I had the time to-day I should like to present the history of the industry and show to the Senate and the country that every time the sugar refiners of the country find a short crop of sugar in the United States, their profits have been unconscionably large. The extra cost to the American consumer directly and indirectly in 1911 was as much as would have been required to build all the beet-sugar factories in the United States.

Mr. President, what do we see to-day? I received this morning the American Sugar Bulletin, dated August 4, 1922, in which it is stated that raw Cubans opened on Thursday at 3⅞ cents. cost and freight. Why is this price? Simply because the domestic sugar has all been disposed of. That happens every year. So long as the refiners have it in their power, through the production of sugar in Cuba by themselves, to lower the price of sugar whenever the domestic sugar comes upon the market, they are going to do so. By reason of the conditions following the war they thought that last year was the time for them to throttle the sugar industry of America. They cut the price of sugar down to 1.67 cents a pound, knowing full well that that meant absolute financial ruin to every sugar producer in the United States, following a year of unheard-of losses in that industry. In my statement to-day I shall name the dates and the prices and show just what brought those conditions about.

This propaganda had its origin with the refiners. As I have said, they have always been enemies of the domestic industry. Their position is easily understood. Every ton of beet sugar which is produced means one ton less for them to refine; and the competition of beet sugar prevents their control of prices and markets so long as that product is upon the market.

Recently this propaganda of the refiners has been taken up by another group of men who have been seeking the same end but for different reasons. I speak of certain national bankers, promoters, and speculators who extended unwarranted credit on Cuban sugars at war prices and who took advantage of the sugar boom to expand Cuba's production of sugar beyond all reasonable limits and to foist upon the American public tens of millions of dollars of sugar stock, on the glowing promise that war-time prices and profits would continue indefinitely. These companies are "war babies," so called, in the fullest sense of the term. Now these gentlemen ask that we kick our own children out of their own house and make way for theirs.

Mr. President, in America we can reach and control monopolies within our boundaries, but beyond those boundaries we are powerless to do so. It is not necessary to indulge in speculation or in theory to establish this fact with respect to sugar. Recent history tells us what could and doubtless would be done in this direction were the domestic industry destroyed. We entered the World War in April, 1917; on August 10 of that year the food control act went into effect. The domestic crop of sugar had been marketed and the country had to look solely to Cuba for its supply. On August 22 in a memorandum to the President calling attention to the difficulties surrounding him Mr. Hoover, who had been appointed food administrator, said:

> Certain Cuban sugar producers, who are out of reach, have combined to force up the prices of the remaining 1917 Cuban crop, prior to the new crop in December, and have lifted the prices of raw sugar in New York from 5 cents a pound to 7⅛ cents, duty paid, on August 16, and this against a three-year pre-war average of 4½ cents. The recent advance of 1.6 cents alone would represent an added tax upon the American people of over $30,000,000 by the end of December of that year.

Soon after this the producers of sugar in the United States and its possessions voluntarily placed the output in the hands of Mr. Hoover at a price 1¾ cents below the price of Cuban sugar. By reason of this control of this crop, then in the making, and because of the ability of the Government to regulate shipping, the Food Administrator was able to purchase the 1918 Cuban crop and thereby supply our people with sugar at a reasonable figure, so long as this sugar lasted.

In 1918 Attorney General Palmer succeeded Mr. Hoover, and while still regulating the price of the domestic product, he refused to purchase the 1919 Cuban crop. What happened in 1920 and the early part of 1921 constitutes one of the most fantastic episodes of the history of speculation in a food necessity. A world shortage of sugar was heralded, although none existed, and raw sugars advanced rapidly.

Mr. President, I remember appearing before the Committee on Agriculture and Forestry of the Senate when the question of the amount of sugar in the world was under consideration. I then made the statement that there was no shortage; that there was a visible supply of sugar sufficient to furnish sugar for the whole world; but we then found the refiners down here before the committee testifying that there was a shortage of sugar in the world. They did so for no other reason than to advance the price of sugar to the American people and to insure unconscionable profits to themselves.

Raw sugars advanced rapidly until they reached the unheard-of price of 23 cents a pound, while in the East, where Cuba supplies the market, granulated sugar sold as high as 35 cents a pound. During this period the manufacturer of beet granulated sugar was receiving from 10 cents a pound to 12 cents a pound for his product. It has been estimated by reliable authority that this debauch of speculation and manipulation cost the American consumer some $600 000,000, and, from what I know of the situation, it is my opinion that this estimate is conservative.

Were the speculators in Cuban sugar satisfied with this stupendous price? Not at all. They saw no top, and held their supplies off the market for still higher prices. In the late spring of 1921 the bubble burst, and Cuba awakened to the fact that, while she was holding back her supply, 800,000 tons of full duty paid sugar from 44 countries had found their way into our market. This sugar Cuba could have supplied, and, if she had, there would have been no situation such as developed in the latter part of 1920 and the fore part of 1921. Had she done so at the price allowed by the Attorney General to Louisiana for her crop, which was from 5 to 7 cents above that which the producers of beet sugar were allowed, she would have had some $400,000,000 of American money with which to meet her obligations here and to maintain her financial house in good order at home. As it was she went into the grinding campaign of 1922 with a carry over of 1,200,000 tons, and during the month of January Cuban raw sold c. i. f. at New York as low as $1.67 per hundred pounds. It was this surplus which demoralized the sugar industry. Cuba not only pulled down her own house but destroyed that of her neighbor as well.

The control of the price of beet sugar by the Attorney General was not relinquished until August, 1920. The manufacturers were about to enter upon their manufacturing campaign at the instance of the Government. In the spring of that year they had contracted with the growers of beets to pay $12 per ton, which was more than twice the pre-war price. The sugar-beet crop was probably the only profitable one which the farmer produced in 1920; but the sugar-beet manufacturers, caught in the Cuban jam, were compelled to market their output at a loss estimated at $50,000,000 or more; some were forced to the brink of bankruptcy, and all were compelled to exercise their credit to the limit. Owing to the Cuban surplus the 1921–22 crop of beet sugar was then being marketed at a loss, in many cases, and, in all, at a ridiculous low margin of profit under the present tariff of 1.6 cents on Cuban sugar.

The control of the sugar necessary to supply our needs by those who, to repeat the words of Secretary Hoover, "are out of our reach." cost the American consumer some $50,000,000 in 1917 and $600,000,000 in 1920 and 1921.

In continental United States 700,000 acres of our best agricultural lands are devoted to the production of sugar beets; 100,000 farmers are engaged in growing them; 85.000 field workers, and 35,000 mill operators are employed in the industry. They give to our people a war ration of sugar which can always be depended upon; they furnish the competition which is necessary to prevent monopoly and insure reasonable prices to the consumer; they have introduced the element of crop rotation, which is so necessary to our agriculture; they keep at home millions of dollars which would otherwise be sent abroad to pay for foreign supplies. It is hardly fair, therefore, to ask that this industry be destroyed to cover Cuba's economic blunders. The American Congress should never again place it in the power of any set of men to monopolize a great food necessity, fix its price, and control its distribution.

Mr. President, I referred to the testimony before the Hardwick committee in 1912. I wish Senators would take that testimony and begin with the testimony of Mr. Claus A. Spreckels, winding up with Mr. Lowery's testimony, the stool pigeon of Mr. Spreckels, he that constituted the whole of the "Wholesale Grocers' Association of America" when the last tariff bill was up and the same class of propaganda was being spread from one end of the country to the other. It developed in the testimony that Mr. Spreckels furnished every dollar of the money for the propaganda, that Mr. Lowery was the only member of it, and he was the person that spread broadcast, under the name of the "Wholesale Grocers' Association of America," the lies that were so prominently printed from one end of this country to the other.

Who are the members of this American Committee on Cuban Emergency? Have you traced them back? Do you know who is the power behind the throne? Do you know who is furnishing the money? The great refiners of the eastern coast, with no other view than to destroy the beet industry and the cane industry within the confines of our own country.

Who are the American producers in Cuba? I have here a recapitulation, and if there is any doubt about it I will put in the RECORD the name of every company that I refer to in this recapitulation; but I have not the time now, nor do I desire to publish it in the RECORD unless somebody wants it.

Here is a recapitulation showing the producers of Cuban sugar, showing who is interested in this American Committee on Cuban Emergency:

Group 1. The American Sugar Refining Co. have two mills. They produce 224,000 tons of sugar a year.

Group 2. The W. J. McCahan Sugar Refining & Molasses Co. have 21 mills, producing 972,800 tons of sugar per year.

Group 3. The National Sugar Refining Co., with 14 mills, producing 630,100 tons of sugar in Cuba each year.

Group 4. The Pennsylvania Sugar Co., with six mills, producing 210,135 tons of sugar per year.

Group 5. The Revere Sugar Refining Co., with two mills, producing 160,000 tons of sugar per year.

Group 6. The Warner Sugar Refining Co., with four mills, producing 134,000 tons of sugar per year.

The total of the Cuban production by these six sugar refineries of the United States is 2,331,033 tons per year.

Group 7, concerns independent of the United States sugar refining companies, although their offices are located in New York, produce 785,909 tons, making a grand total of 3,116,942 tons.

Who produces the other small amount? A few Cubans with small mills, producing all the way from 25 tons up to 150 tons; and I want to say that not only was the object in January, 1922, when I wrote the letter to General Crowder, to destroy the industry in the United States but at the same time to crush to death every small producer of sugar in Cuba. Not one of them was to escape. These companies, together with the men in Wall Street, were not only to control the sugars of Cuba but they were to control or destroy the sugars produced in this country, and yet we find the Senator from Mississippi here pleading their cause, asking that they be given a chance to rob the American people as they have! He did not refer in his speech on Saturday to the fact that the price of raw Cuban sugars, since the local production had been absorbed, had increased from 1¾ cents a pound to 3¾ cents a pound. Who gets it? Directly and indirectly the refiners get it. They have contracts made for all the sugar produced in Cuba at these ridiculously low prices; and now the refiners, not satisfied with a reasonable profit, ask that the American people be mulcted from now on, since the local sugar is off the market, 2 cents a pound on every pound of sugar imported into the United States!

Mr. President, at this time I desire to place in the RECORD a list of the American producers of Cuban sugar, and then the Senate can find out just what is produced outside of this—a quantity this year that will amount to just a few hundred thousand tons—and yet they are so greedy that they wanted to kill them and the whole American industry!

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

GROUP I.

Mills owned outright by the American Sugar Refining Co., 117 Wall Street, New York:

Central Cunagua Co.: Capital, $15,000,000. (Cuban Corporation, all stock owned by A. S. R. Co.)

Central Cunagua, Moron, Province of Camaguey; 291,000 acres; output, 112,000 tons.

Central Jaronu, Moron, Province of Camaguey; output, 112,000 tons.

GROUP II (RIONDA GROUP).

Mills owned outright or affiliated with the W. J. McCahan Sugar Refining & Molasses Co., 101 South Front Street, Philadelphia, and 112 Wall Street, New York:

Cuba Cane Sugar Corporation: Incorporated in New York, 1915; 112 Wall Street, New York; capital, preferred, $50,000,000; common, 916,667 shares, no par value. W. E. Ogilvie, president; Regino Truffin, Alfred Jaretzki, Frederick Strauss, and B. B. Rionda, vice presidents; H. F. Kroyer, secretary and treasurer. Acreage, 747,800; output, 714,800 tons.

Centrals:	Output (tons).
LaJulia, Duran, Province of Havana	34,000
Alava, Banaguises, Province of Matanzas	53,000
Conchita, Union de Reyes, Province of Matanzas	30,000
Feliz, Union de Reyes, Province of Matanzas	24,000
Mercedes, Guareiras, Province of Matanzas	60,000
San Ignacio, Agramonte, Province of Matanzas	18,000
Santa Gertrudis, Banaguises, Province of Matanzas	33,000
Socorro, Pedroso, Province of Matanzas	60,000
Soledad, Jovellanos, Province of Matanzas	23,000
Lequeitio, Cartagena, Province of Santa Clara	26,000
Perseverancia, Real Campina, Province of Santa Clara	26,000
Lugareno, Lugareno, Province of Camaguey	48,000
Jagueyal, Jagueyal, Province of Camaguey	61,000
Moron, Pina, Province of Camaguey	102,000
Stewart, Stewart, Province of Camaguey	84,500
Violeta, Aguada de Pasajeros, Province of Camaguey	32,000

Cuban Commercial & Industrial Co.: Incorporated in New Jersey, 1901; 112 Wall Street, New York; capital, $450,000. B. B. Rionda, president; R. Zevallos, secretary.

Central San Vicente, Jovellanos, Province of Matanzas; output, 20,000 tons.

Francisco Sugar Co.: Incorporated in New Jersey, 1899; 112 Wall Street, New York; capital, $1,000,000.

Central Francisco, Francisco, Province of Camaguey; output, 75,000 tons.

Manati Sugar Co.: Incorporated in New York, 1912; 112 Wall Street, New York; capital, preferred, $5,000,000; common, $15,000,000. Regino Truffin, president; Manuel Rionda, Frederick Strauss, Alfred Jaretzki, William P. Phillips, Higinio Fanjul, vice presidents; E. D.

de Ulzurran, vice president and general manager; M. R. Angulo, secretary; M. E. Rionda, treasurer.

Central Manati, Manati, Province of Oriente; acreage, 276,060 acres; output, 90,000 tons.

Tacajo Sugar Corporation: 112 Wall Street, New York.

Central Tacajo, Tacajo, Province of Oriente; output, 33,000 tons.

Tuinucu Sugar Co.: Incorporated in New York; 112 Wall Street, New York; capital, $500,000.

Central Tuinucu, Tuinucu, Province of Santa Clara; acreage, 11,400; output, 40,000 tons.

GROUP III (HOWELL-POST GROUP).

Mills owned outright or affiliated with the National Sugar Refining Co. and the Colonial Sugars Co., 129 Front Street, New York. (Twenty-five per cent of the stock of the National owned by American Sugar Refining Co.)

Cuban-American Sugar Co.: Incorporated in New Jersey, 1906; 129 Front Street, New York; capital, preferred, $10,000,000; common, $10,000,000. James H. Post, president; T. A. Howell, vice president; H. W. Wilmot, vice president; John Farr, vice president; J. H. Land, treasurer; W. J. Vreeland, secretary. Acreage, 570,950; output 395,920 tons.

Centrals:	Output (tons).
Mercedita, Cabanas, Province of Pinar del Rio	28,000
Tinguaro, Tinguaro, Province of Matanzas	50,400
Constancia, Abreus, Province of Santa Clara	37,520
Unidad, Unidad, Province of Santa Clara	30,240
Chaparra, Chaparra, Province of Oriente	109,760
Delicias, Delicias, Province of Oriente	140,000

Also operates two refineries.

Atlantic Fruit Co.: Incorporated in Delaware in 1912; 129 Front Street, New York; capital, 1,300,000 shares, no par value; N. A. MacLeod, president; T. O. Muller, vice president and treasurer; Thomas A. Howell, director.

Central Tanamo, Cayo Mambi, Province of Oriente; 178,000 acres; capacity, 25,000 tons; new mill will grind in 1922.

Central Alto Cedro Co.: Incorporated in Cuba in 1918; 129 Front Street, New York; capital, $2,960,000; Andres S. Duany, president; Thomas A. Howell, vice president; Hubert Edson, treasurer; Antonio A. Duany, secretary; A. Kirstein, jr., assistant treasurer; Howard J. Pullum, auditor. Under management of West India Sugar Finance Corporation, 129 Front Street, New York.

Central Alto Cedro, Marcane, Province of Oriente; 16,000 acres; output, 36,000 tons.

Central Cupey Sugar Co., S. A.: Incorporated in Connecticut in 1915; 129 Front Street, New York; capital, preferred, $600,000; common, $1,000,000; T. A. Howell, president; H. W. Wilmot, vice president; H. J. Pullum, treasurer; L. D. Armstrong, secretary; A. Kirstein, jr., assistant secretary and treasurer. Under management of West India Sugar Finance Corporation, 129 Front Street, New York.

Central Cupey, Cupey, Province of Oriente; 19,442 acres; output, 33,600 tons.

Guantanamo Sugar Co.: Incorporated in New Jersey in 1905; 129 Front Street, New York; capital, 300,000 shares, no par value; J. H. Post, president; George R. Bunker, vice president; O. G. Sage, vice president and general manager; G. H. Bunker, secretary and treasurer; 56,147 acres; output, 66,080 tons.

Centrals:	Output (tons).
Isabel, Guantanamo, Province of Oriente	19,040
Los Canos, Guantanamo, Province of Oriente	19,040
Soledad, Guantanamo, Province of Oriente	28,000

New Niquero Sugar Co.: Incorporated in New York in 1905; 129 Front Street, New York; capital, preferred, $1,000,000; common, $500,000; James H. Post, president; Ricardo Narganes, jr., vice president and general manager; Aurelio Narganes, assistant general manager; A. B. Vanderkeef, secretary and treasurer.

Central Niquero, Niquero, Province of Oriente; 57,500 acres; output, 30,000 tons.

Palma Soriano Sugar Co.: Incorporated in Cuba in 1919; 129 Front Street, New York; capital, preferred, $1,100,000; common, $1,860,000; Thomas A. Howell, president; Henry W. Wilmot, vice president; Howard J. Pullum, treasurer; Juan A. Lliteras, secretary; A. Kirstein, jr., assistant secretary and treasurer. Under management West India Sugar Finance Corporation, 129 Front Street.

Central Palma, Palma, Province of Oriente; 14,600 acres; output, 43,500 tons.

GROUP IV (ATKINS GROUP).

Mills owned outright or affiliated with the Pennsylvania Sugar Co., 1037 North Delaware Avenue, Philadelphia. Controlled by E. F. Atkins & Co., 10 Broad Street, Boston; 111 Wall Street, New York.

Caracas Sugar Co.: Incorporated in Cuba in 1919; 10 Broad Street, Boston; capital, $5,000,000; E. F. Atkins, president; E. F. Atkins, jr., vice president; Antonio S. de Bustamante, jr., secretary; L. F. Hughes, treasurer.

Central Caracas, Sta. Isabel de las Lajas, Province of Santa Clara; 25,000 acres; output, 41,000 tons.

Punta Alegre Sugar Co.: Incorporated in Delaware in 1915; 10 Broad Street, Boston; capital, $12,000,000; E. F. Atkins, president; C. B. Wiggin, vice president; E. L. Ponvert, vice president; W. C. Smith, vice president and assistant secretary; R. W. Atkins, treasurer; 196,226 acres.

Centrals:	Output (tons).
Florida, Florida, Province of Camaguey	44,000
Punta Alegre, San Juan, Province of Camaguey	55,000
Trinidad, Trinidad, Province of Santa Clara	20,833

San Augustan Sugar Co.: 10 Broad Street, Boston.

Central San Augustan, Lajas, Province of Santa Clara; output, 25,800 tons.

Soledad Sugar Co.: 10 Broad Street, Boston.

Central Soledad, Cienfuegos, Province of Santa Clara; output, 23,500 tons.

GROUP V.

Mills owned outright or affiliated with the Revere Sugar Refining Co., 15 Broad Street, Boston:

United Fruit Co.: Incorporated in New Jersey in 1899; 131 State Street, Boston; capital, $150,000,000; estimated investment in Cuban sugar mills and plantations, $20,000,000; acreage, 278,615; A. W. Preston, president; M. C. Keith, first vice president; William Newsome, C. H. Ellis, V. M. Cutler, vice presidents; P. K. Reynolds, assistant to president; B. W. Palmer, secretary; Cecil B. Taylor, treasurer.

Central Boston, Banes, Province of Oriente; output, 80,000 tons.

Central Preston, Preston, Province of Oriente; 127,789 acres; output, 80,000 tons.

GROUP VI.

Mills owned outright or affiliated with the Warner Sugar Refining Co., 79 Wall Street, New York:

Miranda Sugar Co.: Incorporated in Cuba; 79 Wall Street.

Central Miranda, Miranda, Province of Oriente; output, 25,000 tons.

Central Palmarito, Bayate, Province of Oriente; output, 7,000 tons.

Compania Azucarera Andres Gomez Mena.

Central Amistad, Guinas, Province of Habana; output, 45,000 tons.

Central Gomez Mena, San Nicolas, Province of Habana; output, 57,000 tons.

GROUP VII.

Mills not reported as owned by or affiliated with United States sugar refining companies:

The Baragua Sugar Co.: Incorporated in Delaware; Pittsburgh, Pa.; capital stock authorized, $7,500,000; preferred, 125,000 shares, no par value; James D. Callery, president; J. R. McCune, W. C. Douglas, M. N. Ballard, vice presidents; Lloyd W. Smith, secretary and treasurer; Joseph L. Dunn, assistant secretary and treasurer.

Central Baragua, Baragua, Province of Camaguey; output, 70,000 tons.

Caribbean Sugar Co.: Post-office box 2259, Boston.

Central Macareno, Manopla, Province of Oriente; output, 13,000 tons.

Cape Cruz Co.: 138 Front Street, New York; Horace Havemeyer, Charles J. Welch.

Central Cape Cruz, Ensenada de Mora, Province of Oriente; output, 20,000 tons.

Central Armonia Co.: Bolondron, Province of Matanzas.

Central Armonia; output, 14,666 tons.

Central Cuba Sugar Co.: Incorporated in New Jersey.

Central Cuba, Pedro Betancourt, Province of Matanzas; output, 31,669 tons.

Central Flora, Guira de Macurigues, Province of Matanzas; output, 17,216 tons.

Central Saratoga, Bolondron, Province of Matanzas; output, 8,438 tons.

C. A. Central Habana; Hoyo Colorado, Province of Habana.

Central Habana; output, 14,600 tons.

Central Hormiguero Co., S. A.: 69 Wall Street, New York.

Central Hormiguero, Paradero Hormiguero, Province of Santa Clara; output, 42,500 tons.

Central Sugar Corporation: Incorporated in New York in 1916; 43 Exchange Place, New York; capital, preferred, $3,000,000; common, 80,000 shares, no par value; C. J. Welch, president; J. H. Pardee, vice president; T. W. Moffat, secretary and treasurer.

Central Fe, Salamanca, Province of Santa Clara; output, 32,000 tons.

Central Teresa Sugar Co.: Incorporated in Maryland in 1919; Munsey Building, Baltimore, Md.; capital, $3,500,000; A. W. Gieske, president; H. A. Tingley, vice president; E. E. Wells, secretary and treasurer; James R. Biggar, general manager.

Central Teresa, Ceiba Hueca, Province of Oriente; 23,600 acres; output, 13,000 tons.

Cia. Central Araujo.

Central Araujo, Manquito, Province of Matanzas; output, 24,500 tons.

Colorados Sugar Co.: 49 Federal Street, Boston.

Central Colorados, Omaja, Province of Oriente; new; will grind in 1922.

Constancia Sugar Co.

Central Constancia, Encrucijada, Province of Santa Clara; output, 20,000 tons.

The Cuba Co.: Incorporated in New Jersey in 1900; 52 William Street, New York; capital, preferred, $8,000,000; common, $8,000,000; Horatio S. Rubens, chairman of board; H. C. Lakin, president; W. V. Griggin, vice president; William H. Baker, secretary; H. W. Snyder, treasurer; acreage, 300,000.

Central Jatibonico, Jatabonico, Province of Camaguey; output, 44,000 tons.

Central Jobabo, Jobabo, Province of Oriente; output, 54,500 tons.

Cuban-Canadian Sugar Co.: 68 William Street, New York.

Central Rio Cauto, Rio Cauto, Province of Oriente; output, 30,000 tons.

Cuban Sugar Mills Co.: Los Palacios, Province of Pinar del Rio.

Central La Francia; output, 12,570 tons.

Ermita Sugar Corporation:

Central Ermita, Ermita, Province of Oriente; output, 20,000 tons.

Fidelity Sugar Co.:

Central San German, San German, Oriente; output, 16,250 tons.

Hershey Corporation: Incorporated in Delaware; 339 Sixth Avenue, New York City.

Central Hershey, Station Cruz del Norte, Province of Havana; output, 32,500 tons.

Central Rosario, Aguacate, Province of Havana; output, 16,250 tons.

Hires Sugar Co.:

Central Dos Rosas, Cardenas, Province of Matanzas; output, 11,000 tons.

Lapaz Sugar Co.:

Central Por Fuerza, Calimete, Province of Matanzas; output, 15,000 tons.

Loft, George W.:

Central Dulce Nombre, Macagua, Province of Matanzas; output, 8,000 tons.

Mapos Sugar Co.:

Central Mapos, St. Spiritus, Province of Santa Clara; output, 6,000 tons.

Matanzas-American Sugar Co.: Incorporated in Delaware, 1915; 43 Exchange Place, New York; capital, preferred, $1,000,000; common, $2,000,000. J. H. Pardee, president; R. B. Marchant, H. P. Dubois, Pedro Urquiza Y Bea, vice presidents; T. W. Moffat, secretary and treasurer.

Central Jesus Maria, Benavides, Province of Matanzas; output, 18,000 tons.

North American Sugar Co.:

Central Narcisa, Yaguajay, Province of Santa Clara; output, 40,000 tons.

Peterson, Barker & Gill:

Central Gerardo, Babia Honde, Province of Pinar del Rio; output, 8,300 tons.

Central San Ramon, Mariel, Province of Pinar del Rio; output, 13,000 tons.

Rio Cauto Sugar Co.: 890 Broadway, New York.

Central Jibacoa, Calicito, Province of Oriente; output, 25,000 tons.

Santa Ana Sugar Co.: 129 Front Street, New York.

Central Station Ana, Auza, Province of Oriente; output, 13,300 tons.

Central Hatillo, San Luis, Province of Oriente; output, 16,250 tons.

Santa Cecilia Sugar Corporation: Incorporated July, 1917; 115 Broad Street, New York. C. B. Goodrich, president; R. L. Dean, vice president and treasurer; R. H. Caplan, secretary and assistant treasurer.

Central Santa Cecilia, Guantanamo, Province of Oriente; output, 15,500 tons.
Santa Clara Sugar Co.: Cienfuegos, Santa Clara.
Central Juragua; output, 11,400 tons.
Santa Maria Sugar Co.: 2 Rector Street, New York.
Central Santa Maria, Guantanamo, Province of Oriente; output, 10,000 tons.
Washington Sugar Co.:
Central Washington, Hatuey, Province of Santa Clara; output, 27,500 tons.

RECAPITULATION.

Group VI. Warner Sugar Refining Co.	4	134,000
Total	49	2,331,033
Group VII. Independent of United States sugar refining companies	36	785,909
Grand total	85	3,116,942

Mr. SMOOT. We had before the Finance Committee Mr. Atkins, followed around by Mr. Lowery, telling what to say. Wherever he went, Lowery was there. Whenever he made a misstatement to the committee Lowery corrected him. He represented the sugar refiners of this country. What did he say in his testimony before the Hardwick committee?

Mr. MADISON. You stated a moment ago, Mr. Atkins, or this morning, that you decidedly opposed going into the beet-sugar business. What was the reason for that?

Mr. ATKINS. The beet-sugar business was a competitive business. It produced in the western territories, where our market lay. That is, I say "our market"—I mean the market of the refiners, the various refiners. As that industry grew—and I foresaw that it would grow rapidly—I believed that it would reduce the volume of business not only of the American Sugar Refining Co. but of all the refiners on the Atlantic coast; and although we had millions of dollars invested in the business there we were building up a competitive business, one that would compete with ourselves, and one which was bound to get away from us; we could not control it in the end. I say "we"—I had no connection whatever with it; that was simply a business man's opinion.

Why, Mr. President, so determined were they that they should control the sugar production in the United States that they began to secure control of these industries so that they could compel the American people to pay an unconscionable profit not only during the time that the domestic sugar was on hand but also when it was disposed of. They were not satisfied with 9 months of robbery; they wanted 12 months of it. The establishment of the sugar industry in the United States during the three months that they had their product on the market has saved to the American people millions if not billions of dollars more than ever the duty amounted to.

Mr. President, do Senators want to feed this monster? If they do not want to check it, let them place such a duty upon sugar that the American industry can not live. I know that the American companies are in straitened circumstances. I know that they did not have enough assets to borrow the money to pay for the beets last year. I know that the War Finance Corporation advanced to them $4 a bag upon their sugar to pay the farmers for the beets, and I know that when that sugar came upon the market they did not get the $4 a bag which they had to pay for the beets. I wish the American people understood the situation, Mr. President. The Senator from Mississippi would not be standing upon this floor pleading for the monster as he has been pleading if he understood it.

Let us see about the history of the transactions in sugar during the war.

American producers of sugar in Cuba, most of them connected with our seaboard refiners, boast that they have invested over a billion dollars in the Cuban sugar industry and since 1914–15 have increased the Cuban output from 2,900,000 to 4,400,000 tons, or practically enough to supply the entire United States requirements of 4,600,000 tons. To dispose of this enormous product to best advantage they now wish to supply the entire United States market, but to do this they first must put a quietus on the United States domestic and insular production of 2,480,000 tons. To accomplish this object they are flooding the country with elaborate propaganda directed not only against any increase in the United States rate of duty on Cuban sugar but advocating a decrease in the rate from 1.6 cents to 1 cent per pound.

THE CUBAN DIFFERENTIAL.

Inasmuch as under the reciprocity treaty Cuba enjoys a percentage preferential, the higher the duty the greater the preferential. Under the present duty of 2 cents per pound Cuba enjoys a preferential of 20 per cent, or 40 cents per hundred, while if the duty were raised to 2½ cents per pound the preferential would amount to 50 cents per hundred, and if reduced to 1½ cents per pound it would amount to only 30 cents per hundred. But as a 2½-cent duty would mean prosperity while a 1½-cent duty would mean disaster to the domestic sugar industry, the American investors in Cuba are for a 1½-cent rate of duty, and they feel that now is the time to strike and utterly destroy the domestic industry.

THE RECENT RISE IN THE PRICE OF SUGAR.

It should be borne in mind that the recent rise in the price of sugar has benefited few, if any, of the domestic producers, for it did not come until their product had been sold. As long as they have no sugar to sell, it would profit them nothing if sugar were a dollar a pound. As is the usual custom, as long as domestic sugar is on the market, say, from October to March, the Cubans force the price down and the seaboard refiners reduce their margin between raw and refined, with the object of making the domestic producer sell his product at the lowest possible price. And then when the domestic producers are out of the market the Cuban producers put up their price, the seaboard refiners increase their margin, and if on their earlier sales they have lost anything they speedily make it up, and meanwhile they have injured their severest competitor. If there were no domestic sugar, there would be no such seasonal depression in the price of the imported product.

CONDITION OF THE DOMESTIC INDUSTRY.

As a result of this studied policy on the part of the seaboard refiners and their Cuban mills and of the over speculation and production in Cuba, the domestic sugar industry, both beet and cane, is in a deplorable financial condition, all of the producers having been compelled for two years past to sell sugar at a loss, usually of 1 to 2 cents per pound below the actual cost of production. They have used up their cash reserves and most of them are in the hands of their bankers, from whom they have borrowed to the limit. Unless relief comes soon in the shape of a high enough duty to make it impossible for the exploiters of Cuba to continue seasonal selling of sugar below the cost of American production, a large portion of the present owners will be ruined, the factories will be closed down 12 months out of the 12, the American people will be at the absolute mercy of the very men who two years ago, when they found we had no sugar, pegged their price at the unconscionable figure of 24 cents per pound.

REASONS FOR PRESENT CONDITION OF DOMESTIC INDUSTRY.

The present deplorable condition of the domestic sugar industry is due to a combination of circumstances covering a considerable period of time.

The industry was built up under a protective tariff, the rates of which the best economic experts had figured out in 1897 to be just sufficient to encourage a reasonable rate of expansion. The industry grew by leaps and bounds—more than 600 per cent in five years, when the frightened refiners set about and secured a reduction of 20 per cent to Cuba, which immediately checked the growth of the domestic sugar industry and stimulated that of Cuba. Again, in 1914, the duty on sugar was reduced, this time 25 per cent, and during all this time the industry, with the exception of a few companies, has had a struggle for bare existence.

REGULATION OF DOMESTIC SUGAR INDUSTRY BY FOOD ADMINISTRATION.

In 1917, after we had entered the World War and when sugar refined from Cuban raws was selling at 8½ cents in New York, the Food Administration exacted from the domestic beet and continental cane sugar producers an agreement that they would market their entire 1917–18 crop at not to exceed 7¼ cents per pound less 2 per cent, or 7.1 cents net. Food Administrator Hoover since has stated publicly that this action of the domestic sugar producers saved the American people from $25,000,000 to $30,000,000, but it meant that while other American manufacturers were earning and setting aside reserves for a rainy day the American producers of sugar were selling at or near the bare cost of manufacture.
